> It may be concluded that Title I funds generally are being used for real pupil needs and not for frills, and that the funds are reaching the type of children for which they were intended but not nearly all such children and not at the level of support necessary to insure participant achievement gains.

This theme, potential excellence limited by insufficient funds, was underscored recently in a perceptive article entitled "ESEA: Five Years Later." I quite agree with statements in that article that—

> Virtually everyone connected with the legislation was convinced that the ambitious goals of ESEA would require years and annual appropriations at least 3 to 10 times greater than those of the first year.

And that—

> The nation's appropriation of $1.3 billion for Title I in 1970 is, in real purchasing power, actually less than Title I's fiscal 1966 appropriation.

I agree also with the conclusion that—

> Learning by trying is what ESEA was all about. On its fifth birthday in 1970 one wonders if ESEA has yet had a fair trial.

Several months ago, in an effort to determine the impact of Federal aid to education and pinpoint remaining problems and needs at the local level, the Committee on Education and Labor sent out detailed questionnaires to every school superintendent in the country. Over 7,500 responses, representing approximately 25 million schoolchildren—or more than half of the Nation's total public elementary and secondary school enrollment—have now been received.

Our findings further support the contention that ESEA has made a significant difference, but that its full potential has not been realized due almost exclusively to lack of adequate funding. In the wake of the Office of Education's title I study and the administration's continuing reluctance to make a full commitment to education, I believe the results of this survey will be of particular interest to my colleagues. Thus I intend to share these findings with you from time to time in the weeks ahead.

SURVEY DESCRIPTION

The survey questionnaire was composed of a series of multiple-choice questions, with additional space reserved for comments. It was sent to each school district in the country, and there is every indication that the returns are highly representative of the views of school superintendents in all regions, enrollment categories, and rural, urban, and suburban areas.

A total of 7,469 responses have been tabulated thus far. Questions have been examined on the basis of enrollment categories and according to State and region. It is estimated that responses have been received from school officials representing 25,760,000 students. The estimate of total enrollment was made as follows:

Enrollment 1 1-1,000 students
3,132 respondents × 500=1,566,000
Enrollment 2 1,000-5,000 students
3,099 respondents × 1,000=3,099,000
Enrollment 3 5,000-35,000 students
1,141 respondents × 10,000=11,410,000
Enrollment 4 35,000-100,000 students
77 respondents × 60,000=4,620,000
Enrollment 5 over 100,000
Actual count = 5,065,060
Total enrollment = 25,760,060

The survey sought to assess the impact of various Federal policies and programs, determine the source of any problems, identify present and future needs on a priority basis, and gage the desire for additional or alternative forms of Federal aid.

OFFICE OF EDUCATION REPORT ON TITLE I

Today, I intend to present some of the firsthand information we have received on the operation of title I progams throughout the country. First, however, for the benefit of the Members who have not yet had an opportunity to read the Office of Education report, I insert a summary of the major findings:

EVALUATION OF TITLE I

When title I was adopted, neither Congress nor professional educators knew exactly how many educationally deprived pupils there were, or how many might need special programs. Nor did they know the extent to which entire school districts or schools might themselves be "deprived" in the sense that their resources were limited, or that they contained high concentrations of low-income families, or both. Indeed, there was not even any general agreement on what "educational deprivation" or "educational disadvantage" might mean.

Nor by late 1967, when Congress required a national evaluation of title I, was there enough information available to support an assessment of the nationwide impact of title I either upon local schools and school districts or upon those pupils who took part in programs assisted by title I.

The very nature of title I made it difficult to gather the kinds and quantity of data required. For title I is an assistance program that furnishes full or partial financial support for more than 30,000 separate projects in about 17,000 local public school districts. These projects span the entire spectrum of educational activities offered by public schools, from preschool to high school, from reading to health services, from remedial instruction to special trips for cultural enrichment. The relatively embryonic state of the evaluative art simply would not permit any certain or searching evaluation of such a diverse, even disparate, array of programs. New approaches and new evaluative instruments had first to be devised, then developed, then applied. This was a complex and cumulative process that could not be completed within a short period of time.

In early 1968, the U.S. Office of Education initiated several surveys and studies designed to gather the data needed for a national assessment of the "results and effectiveness" of title I. It centered these surveys and studies primarily upon public elementary schools, where title I assisted programs were less diversified and test and related data more developed than at other levels. (The 1968 Survey on Compensatory Education, the major data source on which this report relies, consisting of a nationally representative sample of 3,822 public elementary schools operating title I programs in 465 school districts of 300 or more children, is described in the appendix. A Supplementary Survey on Compensatory Education conducted in January 1969, using basically the same sample as the 1968 survey, and the 1968 Annual Statistical Report of Title I Program Activities were used as additional sources of data for some parts of this report.)

This evaluation effort yielded important new information that will permit some of the alternatives for meeting the needs of "educationally deprived" school-age children to be understood and explored with greater precision. This report highlights that information, which includes the following:

(1) An operating definition of educational deprivation and operating distinctions between different kinds and degrees of such deprivation. (The operating definitions of educational deprivation in this report use estimates of pupils' economic status and/or their teachers' assessment of the likelihood for them to finish high school as bases for delineating five different classes of "disadvantage," the term used in much of this report to describe the educationally deprived. Basic definitions and classifications are detailed in chapters III and IV.)

(2) A reliable estimate of the number and kinds of educationally deprived children in the country and of the proportions of these youngsters in different categories of school districts

(3) A reliable estimate of the number of educationally deprived youngsters affected by title I

(4) A reliable estimate of the number of educationally deprived children that title I does not reach but should

(5) Relatively detailed descriptions of socioeconomic characteristics of pupils enrolled in public schools which provide programs assisted by title I.

FOCUS AND FINDINGS

This report explored the available data in terms of five preliminary areas of concern:

(1) The relationship of title I assistance and public school district financial ability and need (Chapter II)

(2) Characteristics of schools assisted by title I (Chapter III)

(3) Characteristics of pupils enrolled in schools assisted by title I (Chapter IV)

(4) School programs provided with title I funds and selected characteristics of participating and nonparticipating pupils enrolled in the schools offering them (Chapter V)

(5) Pupil benefits associated with programs supported by title I and problems involved in measuring benefits (Chapter VI).

These are, it must be stressed, preliminary areas of concern that later reports will both expand and examine in greater detail. This report can only analyze them in the varying degrees of depth and detail that the limited data will allow. It is still impossible, for example, to reach fully valid conclusions about the national impact upon participating pupils from programs provided with title I funds. Nationally representative information about pupil benefits derived from these programs simply does not exist. On the other hand, there is enough information to fashion a fairly accurate picture of how title I succeeds or fails in distributing funds to districts and schools according to their financial abilities and needs and how public schools use those funds to meet what they believe to be the needs of certain types of pupils.

Within these limitations, this report presents a number of significant findings and conclusions. Following is a summary.

*1. It is now possible to define the dimensions of the problem of reaching educationally deprived children in the Nation's public schools.*

There may be as many as 16.8 million school-age children (aged 5–17) who must be regarded as "educationally deprived" (Chapter IV), using the operating definitions developed and applied in this report (Chapter III). These 16.8 million youngsters suffer from economic deprivation and/or educational disabilities which require special attention or treatment in school.

About 4,450,000 of these 16.8 million disadvantaged children are from families having less than $3,000 annual income; about 9,770,000 are from families having $3,000–$6,000 annual income; and about 2,560,000 are from families having more than $6,000 annual income, but whose teachers believe they lack the ability to complete high school. Educational disability is a factor which also applied to 1,750,000 of the children whose families have annual incomes of less than $3,000 and to 2,345,000 of the children from families with incomes of $3,000–$6,000.

In summary, the 16.8 million disadvantaged school-age children include approximately 14.2 million children who are economically deprived. About 10 million of these 14.2 million children suffer from economic deprivation without reported educational disability, but 4.1 million of them are "multiply disadvantaged," i.e., they suffer from both economic and educational disabilities. The remainder of the disadvantaged school-age population consists of 2.6 million children whose teachers believe they lack the ability to complete high school but who have neither "severe" nor "moderate" economic deprivation.

The large majority of disadvantaged pupils enrolled in elementary schools assisted by title I live in cities and rural areas rather than in suburbs. About 23 percent live in cities of 40,000 or more population, and 31 percent in nonmetropolitan rural areas.

About three-fourths of these pupils attend schools that enroll a relatively small proportion of disadvantaged pupils. About 14 percent, however, attend an elementary school in which poor children make up 50 percent or more of the total enrollment.

A disproportionate number of these schools with high concentrations of economically disadvantaged pupils are in large cities.

The proportion of disadvantaged pupils is greater among minority groups than it is in the white pupil population. Negro pupils, for example, account for 21.8 percent of all enrolled pupils, but for 34 percent of all disadvantaged pupils. Moreover, they account for 51.7 percent of those pupils suffering severe economic and educational disadvantage.

*2. All available evidence seems to support the selection by Congress of the public school district as the main vehicle for reaching disadvantaged youngsters.*

All disadvantaged children live in a public school district somewhere in the Nation. Approximately 95 percent live in the 10,979 title I assisted districts that enroll 300 or more pupils; about 81 percent of these, or more than 75 percent of all disadvantaged children, live in the 3,493 districts that enroll 2,500 or more pupils.

Within these 10,979 districts, about 61 percent of public school pupils attend schools that offer programs assisted by title I. About 80 percent of the disadvataged attend these "title I schools."

*3. The problems that public school districts face in providing special programs for the disadvantaged seem far more complex than many of these districts are able to treat effectively.*

Public school districts vary greatly in their ability to mount and maintain appropriate

compensatory programs for disadvantaged pupils; indeed, they vary greatly in their ability to support the good general education curriculum upon which special compensatory programs must be built.

Schools vary in their ability to use title I funds in ways that really match and meet the special needs of their disadvantaged pupils. Public schools with very heavy concentrations of disadvantaged pupils, for example, confront a different and far more difficult problem than schools which enroll relatively smaller proportions of disadvantaged pupils.

The disadvantaged pupils themselves differ. Some suffer solely from economic disadvantage. To overcome it, they need certain "life support" services such as food and clothing, and health, medical, and dental care. Others are educationally disadvantaged, and require special remedial work in the basic number and language skills. Still others are multiply disadvantaged, and need a comprehensive set of compensatory services, both "life support" and academic in nature. For a variety of reasons, schools find it difficult to discover and differentiate between the particular needs of individual students. As a result, they frequently do not really deal with the different needs of different students.

*4. Under the legislatively prescribed formula, title I funds in 1968 did not flow to school districts and their disadvantaged students proportionately to their needs. Place of residence remains a primary determinant of the quality of services available to the Nation's disadvantaged pupils.*

Forty-six percent of low-income children receive their education in low-expenditure school districts. Chapter II distinguishes between low-, high-, and moderate-expenditure districts on the basis of their annual per pupil expenditure from non-Federal sources of revenue. These low-expenditure districts receive fewer title I funds for each poor child than do high-expenditure districts and both tend to spread their title I money among more pupils than they have poor children. Only moderate-expenditure districts use their title I funds on fewer participants than they have poor children.

As a result of these expenditure patterns, the poor child in a low-expenditure district finds himself disadvantaged in at least four ways: (1) He and his family are poor; (2) his school is poor; (3) his school district receives proportionately fewer title I dollars with which to provide special services; and (4) he receives a smaller share of those fewer title I dollars.

Mr. Speaker, although "Education of the Disadvantaged" describes itself as an evaluation of title I, I find this term misleading. Rather, it focuses on a description of the participating schools and students. This is valuable information which will be indispensable to further efforts aimed at improving title I services, but it hardly constitutes an indictment of the program to date. The only achievement data reported does not, in the words of the study, "allow a national evaluation of compensatory reading programs in title I elementary schools in the Nation." The majority of the States were not represented, nor was the number of usable student test scores large enough "to constitute a statistically valid sample for the Nation as a whole."

To my mind, the Office of Education report serves to remind us both of the solid conceptual foundation on which title I is based, and of the distance we have yet to travel before its full potential is realized. It provides us with new information on the number of educationally deprived students, and underscores the urgent need for financial assistance commensurate with the scope of the problem.

COMPARISON OF OFFICE OF EDUCATION REPORT AND COMMITTEE SURVEY

The findings of the Education and Labor Committee's survey of elementary and secondary education programs and needs complement the Office of Education report in several ways:

First, our data represents some 25 million pupils as compared to the 150,000 students included in the Office of Education survey;

Second, the committee survey is based on current data—data received by the committee during the past summer months on programs carried out during the 1969–70 school year. The major data sources on which the Office of Education report relies consists of a national representative sample of nearly 4,000 public elementary schools operating title I programs during school year 1967–68;

Third, we have asked the school superintendents themselves for their recommendations, opinions, needs and comments in the belief that we in Washington can benefit greatly from the lessons of their experience with Federal aid to education at the local level. Thus the committee's findings do not represent our interpretation of the data, but rather are a direct expression of the concerns, needs, and accomplishments of educators across the country; and

Fourth, we did attempt to gather information on the qualitative as well as the quantitative aspects of title I and other Federal programs. In the opinion of the vast majority of school superintendents, Federal funds have contributed to improving the quality of education in their school districts. Progress on standardized tests was reported and in many cases we have received hard data substantiating gains in reading achievement. These findings will be described in detail in my subsequent reports on the survey.

SURVEY FINDINGS ON TITLE I OF ESEA

From the responses to questions dealing directly with the uses, effectiveness, quantity, and funding of title I services, it is clear that although programs are being targeted on the areas of greatest need, insufficient funds restrict both the scope and effectiveness of service. All eligible children are not being reached, nor is adequate assistance always available in the areas of parent participation, health, and nutrition. The responses to the following eight questions spell out these findings in detail:

QUESTIONS AND ANSWERS

*1. Are Title I funds for the disadvantaged being directed to the areas of greatest need?*

In the largest school districts, representing more than 5 million students, 100% of the school superintendents answered "yes". 90% of these, however, cited insufficient funds as restricting the scope of their programs. In school districts enrolling 35,000 to 100,000 students, representing approximately four and a half million school children, 96% answered "yes," but 73% of these also mentioned inadequate funding.

Nationally, 95% of those receiving Title I funds responded in the affirmative; 58% however, also replied that their programs were restricted due to a lack of funds. Of the remaining 5%, 3% felt that "funds are not sufficiently concentrated on the disadvantaged." When the responses are grouped by size of enrollment, the percent of superintendents indicating that Title I funds are being directed to the areas of greatest need, but are restricted by insufficient funds, rises with each higher enrollment category.

The comments of local school officials illustrate clearly that funds are being properly directed but that a far greater fiscal effort must be made.

Rembrandt, Iowa (208): Two programs were installed for those students most in need of extra help. We believe the programs are helping us accomplish goals that we could not otherwise handle without the added funds.

Elk Grove, California (8,944): If we could finance our Title I program for all disadvantaged children we would begin to break down the walls that hold the cycle of poverty . . . All we need is funds. We can find personnel; we have the knowledge and ability. Give us some $.

Mercer County Schools, Princeton, West Virginia (14,583): We are trying to direct the programs to the needs of economically and educationally disadvantaged. We've made mistakes but are on the threshold of hitting the nail on the head . . . Both academic and service programs are operated in eligible Title I schools. The county also operates extensive summer programs under Title I. Title I has made and is making a contribution in Mercer County schools; however, not all eligible children are receiving required benefits . . . At the present time, neither facilities, equipment or personnel are available to increase the achievement and aspiration level of Title I children—to a level commensurate with their abilities. Too, only recently have we, as educators, really understood the problems of economically and educationally disadvantaged children. . . . It's presumptuous to say we are meeting the needs of eligible children when, in fact, we are really just beginning to understand their needs.

Capitan, New Mexico (230): Title I and Federal funds are imperative if small rural schools are to continue offering quality education programs. . . . We need to expand our program under Title I. Presently we are working in the reading area.

Grove City, Ohio (15,322): We are not obtaining funds any way near the amount necessary to meet the needs. We are presently having to limit program to children in early primary grades of target schools.

Great Neck, New York (10,000): The number of educationally disadvantaged is greater than those economically disadvantaged. With limited funds, we must focus on the poorest of the poor.

*2. What is the principal use of Title I funds in your district?*

90% of the largest districts responding use Title I funds "to make a significant improvement in performance of children in schools of *highest concentrations* of poor children." This is the principal use of Title I funds in every enrollment category and in every region. Nationally, two-thirds of the school superintendents report using funds for this purpose. About one-fourth of the responses in the smallest two enrollment categories report that Title I funds are spent for improvements in all eligible schools, while only 5 percent of the largest school districts chose this response.

In this regard, however, I would remind my colleagues of the original intent of Title I, as expressed in the Committee's report on

ESEA in 1965. At that time we acknowledged that: "There may be circumstances where a whole school system is basically a low-income area and the best approach in meeting the needs of educationally deprived children would be to upgrade the regular program." This principle was reaffirmed in the report of the Committee on the 1967 Amendments to ESEA, and is of particular importance to small school districts in low-income areas.

The responses to the above questions appear to substantiate the following finding of the Office of Education report:

More than 80 percent of all Title I funds spent in 1967–68 were used to meet the primary needs of disadvantaged pupils for basic skills development and life support services.

The following comments from local school officials indicate not only the variety of programs and services being provided, but more importantly, they illustrate that funds are being used for "real pupil needs and not frills":

Manchester, Tennessee (1215): Title I monies have been used in a most effective remedial reading program. We are proud of the progress shown by our pupils in this program.

Rembrandt, Iowa (208): Special programs were set up to help those students that are having difficulty with the academic classes. We are particularly interested in trying to teach these students to be better readers. We feel that we have made much progress since this Title I program was inaugurated.

Buffalo, New York (6700): The principal use of Title I funds in the district is to "provide basic skill instruction for educationally deprived students. Junior high students who are seriously deficient in reading and mathematics skills represent the "target group."

Farmingdale, New Jersey (190): Title I funds are principally used for remedial reading and mathematics programs for deprived students.

Henrietta, New York (10,200): We have made strenuous efforts to improve basic reading guidelines for all deprived children in grades K, 1, and 2.

Palisades Park, New Jersey (1900): The funds are used primarily for pre-school and reading and language arts programs.

Lake Oswego, Oregon (6550): Attempt has been made to improve achievement levels in the communication skills.

East Montpelier, Vermont (1500): The principal use of Title I funds in the district is "in conjunction with state and local funds to offer services for rural children that are badly needed such as health, speech, mental health.

La Grange, Kentucky (3200): The principal use of Title I funds in the district is to make a significant improvement in performance of reading of disadvantaged children in all Oldham County Schools.

Bisbee, Arizona (2800): Our Title I funds are concentrated on the improvement of reading and language arts for educationally deprived.

Grinnell, Kansas (391): We have worked almost entirely with reading programs, so we hope to improve other areas by this work.

Aztec, New Mexico (1888): Title I ESEA funds have enabled this school district to institute a remedial English-reading program for educationally-deprived children.

Higley, Arizona (146): The principal use of Title I funds in the district is "to eliminate problems arising from poor command and understanding of the English language."

Athens, Michigan (1100): Since the distribution of eligible children is equal in our three school buildings and funding is inadequate to serve all buildings, our efforts toward improving the performance of disadvantaged children is concentrated in the early elementary and middle schools in the form of guidance counseling and social work.

La Mesa, California (14,914): The principal use of Title I funds in the district is "to make a significant improvement in performance of underachieving children in schools of highest concentrations of poor children."

Shelby, North Carolina (5390): Title I offered many physical and social needs such as medical services, dental services, and guidance services as well as food and clothing services which enabled the students to attend school regularly and attain better results in achievement.

Saratoga, Wyoming (503): Our Title I program works in the following ways:

1. Remedial reading

2. Released teacher time and reduction of class size so that the teacher has more time to work with slow students.

Spotsylvania, Virginia (4362): Funds are used for special education (mentally retarded); school health services; home-school relations; remedial reading.

Winona, Minnesota (6000): A preventive program has been started with a summer diagnostic program for pre-kindergarten students offered to insure success in the school setting.

Dearborn, Michigan (21,451): We have concentrated on early diagnosis, pre-school and family orientation.

Santa Fe, New Mexico (11,572) The principal use of Title I funds in the district to make a significant improvement in the performance of children in schools of highest concentrations of poor children. Food services, health services and psychological services also have high priorities.

Mercer County Schools, Princeton, West Virginia (14,583): Title I has changed and is changing the total educational program. Not only are educators becoming more aware of the needs of children, but Title I is forcing them (us) to develop specific programs to meet known needs.

Green Bay, Wisconsin (21,876): ESEA Title I, our largest federal program, has contributed a "lighthouse" effect to the general program. Individualization of instruction would probably be first model, followed closely by attention to evaluation.

Ponca, Nebraska (410): The Title I program has provided the extra help needed by those underprivileged pupils to enable many of them to become near average achievers and develop confidence in themselves. . . . The services provided by Title I would or could never have been provided by the school district.

Lynn, Indiana (1020): Those students who normally were enrolled in our Title I programs have remained in schools, while pupils who were borderline cases not involved in the Title I classes comprise most of the few dropouts that this corporation experiences.

Kearney, Nebraska (3750): These funds have made it possible to provide some special programs for children with varied learning disabilities. Well qualified reading teachers and other specialists have provided much needed assistance to students and professional counseling for teachers and parents. Many innovative ideas for improvement of instruction have come from Title I projects.

New Rochelle, New York (18,000): Our title I thrust has been aimed at the professional development of teachers so that they can better serve the disadvantaged child in his own classroom. Since all of our schools are integrated it means that better performance by the teacher affects all children in her class. Our teacher aides in the Kindergarten classes are supportive of the disadvantaged, but improved behavior and motivation affects others.

The disparity between the number of children now receiving special services of the type authorized by Title I and the number of children who should be receiving these services was pointed up in the responses to the following questions:

*3. What percentage of the students in your school district are now receiving special services of the type authorized by Title I of ESEA?*

*4. What percentage of the students in your school district should be receiving special services of the type authorized by Title I of ESEA?*

About half of the responses indicated that less than 10 percent of their students were receiving Title I services, but a total of 73.6 percent indicated a need for services for far more than 10 percent of their students.

In the larger enrollment categories this trend was pronounced. In category 4 (35,000–99,999), for instance, while 45.6 percent of the districts are receiving aid for less than 10 percent of their students, over 60 percent indicated a need at the 10–30 percent level. 65 percent of the largest school districts, representing over 5 million children, receive funds for less than 10 percent of their students, but 90 percent indicate a need for more; 50 percent at the 10–30 percent level and 30 percent at the 30–50 percent level.

*5. If there is a disparity between the percentages in questions 3 and 4 above, to which of the following causes do you attribute the disparity? (Insufficient funds; insufficient personnel; insufficient knowledge of special areas; uncertainties of Federal funding; no disparity; none of above.) If more than one, please list according to the magnitude from 1 to 5.*

90% of the large school districts ranked insufficient funds as the primary cause for a disparity between the number of children who are receiving Title I services and the number who should be. This was the first choice of the majority of responding school superintendents throughout the country.

Second priority was given to "uncertainties of Federal funding" by more than 57 percent of all respondents. In schools enrolling 35,000–99,999 children, nearly 80 percent of the respondents gave this as their second priority. "Insufficient personnel" and "insufficient knowledge of special areas" ranked third and fourth respectively.

The effectiveness of various Title I services were questioned by the Office of Education report primarily on the basis of their intensity rather than on their goals. From the responses to the following question, it appears that school districts are concentrating on providing instructional services, but they can neither serve all eligible children, nor can they provide adequate programs in the areas of parent participation, health, nutrition and other supplementary services.

*6. Classify your Title I services by checking the appropriate columns on the effectiveness of each service:*

(a) *Reaching all eligible children*—In districts enrolling more than 100,000 pupils, 93% of the respondents indicated that there was "insufficient service" in this area. Those responding "insufficient service" increased significantly in the higher enrollment categories; of those in category 4, representing about four and a half million children, 87 percent indicated a need for more effective service in this area.

(b) *Instructional services*—In the two largest enrollment categories, about half responded "insufficient service." Nationally, a majority of the respondents, 64 percent, felt that their service in this area was effective; however, 33 percent answered "insufficient service."

(c) *Parent participation*—About half of the respondents indicated "insufficient service" in this area. Over 25 percent of all school superintendents noted "effective service," and another 26 percent provide "no service." A majority of big city school superintendents, however, feel that their parent participation service is effective.

(*d*) *Health services*—Responses to this part were about evenly divided between "effective service," "insufficient service" and "no service." Generally, districts with larger enrollments felt that their service in this area was ineffective.

(*e*) *Nutritional services*—Slightly more than 41 percent of the respondents reported that they have no services in this area. While a majority of the larger school districts have such services, they are considered insufficient by more than half of the school superintendents.

(*f*) *Other supplementary services*—Smaller school districts are less likely to provide additional services. Of all the respondents providing such services, slightly more than half believed them to be effective. The larger school districts, however, indicated that their supplementary services were insufficient.

In order to assess the level of funding necessary to provide Title I services and programs to all children in need, duing both the regular and summer sessions, the Committee asked the following questions:

*7. What level of funding would be necessary if your school district were to provide Title I programs and services for all children in need of such special programs and services during the regular session?*

In the largest enrollment category, which includes more than 5,000,000 children, 90% of the respondents desire 50 percent more or above. Of these, 20 percent need twice as much, and 35 percent need three times as much.

*8. What level of funding for Title I would be necesary if your school district were to provide Title I programs and services for all children in need of such programs and services during the summer session?*

75% of the largest school districts and more than 50 percent of those enrolling 35,000 to 100,000 students, replied that they need more than 50 percent more than they received in 1969–70. Nationally, about 30 percent of the respondents indicated a need for 25 percent more than the funds received in 1969–70, while 23 percent required 50% more.

Comments on the level of funding necessary to provide Title I programs and services for all children who are in need underscore the necessity for higher levels of funding:

Buffalo, New York (6700): Funding limits impose the necessity to operate a program at only two grade levels (7 and 8). Expanded funding could mean increased opportunity for other students at other grade levels.

North Manchester, Indiana (2189): We would need twice the amount we were allotted in 1969–70 as we are presently serving a little more than half of eligible children.

Great Neck, New York (10,000): We cannot serve all children eligible for Title I funds—we therefore choose a smaller percentage and concentrate services on them. . . . Total funds used entirely for poor children. Insufficient funds for staff development. . . . We should serve 500 children, not 200. We should do more for staff training.

Pennsauken, New Jersey (6843): We would require three times the amount we are receiving for this year to provide a program for all eligible children in the district. We can only enroll a percentage of them now.

Henrietta, New York (10,200): Requests an increase of 50% over their funding level of 1969–70, and comments: Title I funds now must be supplemented by the local district to support even a reasonable program. It barely provides the funding needed for a program.

East Montpelier, Vermont (1500): We could use 3 times our present allotment due to the rural nature of the area we serve and the needs that are evident.

Pratt, Kansas (1795): All of our present funds are in instructional salaries and as the cost of living and other factors enter into the picture, we have to narrow the scope of the project.

Aztec, New Mexico (1888): requests an increase in the allocation of 50% over 1969–70, and comments "We need to add a pre-first program for children who come from a bilingual home. We need to add a remedial mathematics program.

Baldwin City, Kansas (930): We're involved in a reading program. The funds almost provide the teacher's salary. Additional funds are needed for equipment and supplies, which we try to provide with local funds. However, we are very short of local funding.

Rembrandt, Iowa (208): Would like an additional 25% over its allocation for 1969–70, and comments: "We are unable to pay the salary of the Remedial Teacher from the Title I funds. The district has had to pick up more than 25% of the additional cost for the programs that were originally funded by Title I moneys. We are involved in 3 programs: A County Work Study program for students of educable abilities—IQ's of 75–80. A Remedial Reading program for students from K through grade 8 and a commercial program for 9th and 10th graders—involving skills that we believe will help these students—non-college bound—get a position upon graduation.

Mt. Pleasant, Iowa (2431): Our funds have been reduced each year until the present year. To provide the services originally provided would take a 25% increase. For additional services, extra money would be necessary; 50% would be a likely increase.

Cherokee, Kansas (1129): Request an allocation 50% greater than the amount for 1969–70. Additional personnel could be hired and teacher aides.

Ft. Myers, Florida (19,500): Only reaching ⅓ of children in need. 150% more with *full funding* is needed.

Yanceyville, North Carolina (5300): It would be necessary to more than double the current level of funding to provide programs and services for all children.

Marcellus, New York (2725): We would need approximately 4 times the amount of our present allocation to offer a compensatory educational program to the children in our school district. For instance, the present year's program began in January and the program concentrated on grades 1, 2 and 3.

Buffalo, New York (6700 public): Our program operates during the summer session because of limited funding, staffing and transportation. A major funding increase would be necessary if we were to conduct a program during the regular school year. 100% or more.

Washingtonville, New York (4074): ESEA Title I has not kept pace, in total amount of money available, with rising salaries for professional staff. Most projects require specialists which places them by degree and experience in the top money brackets.

Winona, Minnesota (6000): With the acquisition of so many small districts there is a need to serve these schools, too, and in the 1969–1970 school year we had to stretch the same amount of money as of previous years over a wider area and larger enrollment.

Dearborn, Michigan (21,451): Request an increase of 25% from the amount in 1969–70. This would allow us to help those families who do not live in a high concentration [of poverty] area. . . . We are only allowed to use money in the high concentration area. As a result, disadvantaged children living in areas without a high concentration do not receive the additional help.

Maple Valley, Washington (2700): We are just touching the surface. I believe that to properly assist the children we would need *at least* double the $12,000 (approx.) we are currently funded.

Saratoga, Wyoming (503): A 50% increase would about support the program that we now have. We are attempting to improve our instructional program through curriculum revision, individualizing instruction and team teaching. More money would enable us to move at a faster rate.

Palisades Park, New Jersey (1900): FY 1970 was the lowest level for Title I funds ever. Three times as much funds would be necessary to service all children in need of such special programs during the regular session.

Papillion, Nebraska (3459): We need funds based on the growth of the area. We are talking about 3 to 4 times the present appropriation. . . . We have been growing so fast during the last ten years that funds have not been available to provide programs. Our Title I appropriation is based on the 1960 census.

New Rochelle, New York (18,000): There are many unmet needs that we cannot fill unless *early* and *long-term* funding were available. The problems are mounting faster than our ability to handle them and we must provide both staffing and sufficient planning time, all of which requires commitment and money. We have the commitment.

Spotsylvania, Virginia (4362): Because of inadequate funding and personnel we are not doing some things we already know are needed. We would do if we could do.

Caldwell, New Jersey (4300): Reduced allocations for 69–70 forced cutback in services offered.

Newark Valley, New York (1950): Each year our Title I funds decrease. Our need for them does not! . . . Costs increase every year. The level of funding does not.

Washingtonville, New York (4074): Approximately 8% of our student group should be involved with programs authorized under ESEA Title I but we are able to provide services for only 3% due to limited ESEA funds and difficult fiscal year of state and federal levels.

Given the responses to the last two questions, this quote from the Office of Education Report holds no surprises:

"The intensity of title I support for the programs and services, as measured by average expenditure per participant, appears to have been so low that it probably is unreasonable to expect measurable achievement gains by the average participant."

In fact, the Office of Education agrees with the school superintendents from the largest school districts who estimated that they would need twice as much money to serve all students in need. For example, the Office of Education report conservatively estimates that an effective remedial reading program would cost at least double the amount which is currently being spent. And yet, as we have seen, most Title I funds *are* being spent for instructional services. There is simply not enough money to fully meet the need.

What *is* surprising, in view of the financial straits of our schools, is the progress which is being made *in spite of* inadequate services due to insufficient funds. The accomplishments of the Nation's educators in implementing the spirit of the law, even though these laws have lacked financial substance, must not be overlooked. In the days to come these accomplishments will be documented more fully. Preliminary analysis of the Committee's survey of elementary and secondary education programs and needs will not only justify congressional hopes for ESEA in the first five years of its operation, but will also serve as a reminder of the need for a new commitment to the realization of those goals which originally inspired our investment in the Nation's schools.

CHART OF RESULTS BY ENROLLMENT CATEGORY

[In percent]

QUESTION 1—ARE TITLE I FUNDS FOR THE DISADVANTAGED BEING DIRECTED TO THE AREAS OF GREATEST NEED?

| Enrollment category | Under 1,000 (1) | 1 to 5,000 (2) | 5 to 35,000 (3) | 35 to 100,000 (4) | Over 100,000 (5) | Total |
|---|---|---|---|---|---|---|
| RESPONSES | | | | | | |
| (A) Yes | 43 | 36 | 28 | 23 | 10 | 37 |
| (B) Yes, but insufficient funds restrict scope of program | 51 | 60 | 69 | 73 | 90 | 58 |
| (C) No, funds are not sufficiently concentrated on severely disadvantaged | 3 | 2 | 2 | 3 | 0 | 3 |
| (D) No | 3 | 2 | 1 | 1 | 0 | 2 |

QUESTION 2—WHAT IS THE PRINCIPAL USE OF TITLE I FUNDS IN YOUR DISTRICT?

| Enrollment category | Under 1,000 (1) | 1,000 to 4,999 (2) | 5,000 to 34,999 (3) | 35,000 to 99,000 (4) | Over 100,000 (5) | Total |
|---|---|---|---|---|---|---|
| RESPONSES | | | | | | |
| (A) Significant improvement in concentrated area | 60.6 | 64.2 | 78.1 | 83.6 | 90 | 65.2 |
| (B) Improvement in all eligible schools | 27.2 | 23.9 | 11.9 | 11.0 | 5 | 23.2 |
| (C) Other | 12.3 | 11.9 | 9.9 | 5.5 | 5 | 11.6 |

QUESTION 3—WHAT PERCENTAGE OF THE STUDENTS IN YOUR SCHOOL DISTRICT ARE NOW RECEIVING SPECIAL SERVICES OF THE TYPE AUTHORIZED BY TITLE I, ESEA?

| Enrollment category (percent) | Under 1,000 (1) | 1,000 to 4,999 (2) | 5,000 to 34,999 (3) | 35,000 to 99,000 (4) | Over 100,000 (5) | Total |
|---|---|---|---|---|---|---|
| RESPONSES | | | | | | |
| (A) 0 to 9 | 40.7 | 53.3 | 60.6 | 45.6 | 65.0 | 48.9 |
| (B) 10 to 19 | 28.5 | 24/2 | 21.2 | 36/7 | 15.0 | 25.7 |
| (C) 20 to 29 | 13.6 | 9.9 | 7.8 | 12.7 | 15.0 | 11.3 |
| (D) 30 to 39 | 7.1 | 5.8 | 4.6 | 3.8 | 3.3 | 6.2 |
| (E) 40 to 49 | 3.5 | 2.9 | 3.0 | 0 | 5.0 | 3.2 |
| (F) 50 to 59 | 2.2 | 1.8 | 1.4 | 0 | 0 | 1.9 |
| (G) 60 to 69 | 1.1 | .9 | .8 | 0 | 0 | 1.0 |
| (H) 70 to 79 | 1.1 | .4 | .3 | 1.2 | 0 | .7 |
| (I) 80 to 89 | .7 | .2 | .2 | 0 | 0 | .4 |
| (J) 90 | 1.3 | .4 | .2 | 0 | 0 | .8 |

QUESTION 4—WHAT PERCENTAGE OF THE STUDENTS IN YOUR SCHOOL DISTRICT SHOULD BE RECEIVING SPECIAL SERVICES OF THE TYPE AUTHORIZED BY TITLE I, ESEA?

| Enrollment category (percent) | Under 1,000 (1) | 1,000 to 4,999 (2) | 5,000 to 34,999 (3) | 35,000 to 99,999 (4) | Over 100,000 (5) | Total |
|---|---|---|---|---|---|---|
| RESPONSES | | | | | | |
| (A) 0 to 9 | 23.2 | 28.6 | 31.1 | 12.7 | 10.0 | 26.4 |
| (B) 10 to 19 | 27.4 | 29.9 | 28.6 | 31.6 | 20.0 | 28.6 |
| (C) 20 to 29 | 18.9 | 16.9 | 17.8 | 31.6 | 30.0 | 18.1 |
| (D) 30 to 39 | 10.8 | 9.5 | 9.9 | 13.9 | 5.0 | 10.2 |
| (E) 40 to 49 | 6.1 | 5.6 | 5.7 | 6.3 | 25.0 | 5.9 |
| (F) 50 to 59 | 5.0 | 4.1 | 2.7 | 2.5 | 0 | 4.3 |
| (G) 60 to 69 | 2.5 | 2.0 | 1.7 | 1.3 | 5.0 | 2.2 |
| (H) 70 to 79 | 1.8 | 1.6 | 1.2 | 0 | 0 | 1.6 |
| (I) 80 to 89 | 1.7 | .7 | .4 | 0 | 0 | 1.1 |
| (J) 90 | 2.6 | .9 | .7 | 0 | 5.0 | 1.6 |

QUESTION 5—IF THERE IS A DISPARITY BETWEEN THE PERCENTAGE IN QUESTION 2 AND 3 ABOVE TO WHICH OF THE FOLLOWING CAUSES DO YOU ATTRIBUTE THE DISPARITY?

[If more than 1, please list according to magnitude from 1 to 5]

| Enrollment category | Under 1,000 (1) | 1,000 to 4,999 (2) | 5,000 to 34,999 (3) | 35,000 to 99,000 (4) | Over 100,000 (5) |
|---|---|---|---|---|---|
| RESPONSES | | | | | |
| (A) Priority 1: | | | | | |
| (1) Insufficient funds | 37.2 | 53.1 | 57.4 | 72.6 | 90.0 |
| (2) Insufficient personnel | 2.7 | 1.7 | 1.1 | 0 | 0 |
| (3) Insufficient knowledge of special areas | 2.0 | 1.2 | 1.2 | 0 | 0 |
| (4) Uncertainties of Federal funds | 10.0 | 11.1 | 10.3 | 6.5 | 0 |
| (5) No disparity | 22.2 | 25.5 | 21.8 | 14.5 | |
| (6) None of the above | 7.9 | 7.4 | 8.1 | 6.5 | 10.0 |
| (B) Priority 2: | | | | | |
| (1) Insufficient funds | 16.4 | 15.6 | 11.9 | 4.2 | 11.0 |
| (2) Insufficient personnel | 25.0 | 22.4 | 19.5 | 8.3 | 22.0 |
| (3) Insufficient knowledge of special areas | 4.9 | 3.6 | 3.4 | 4.2 | 10.0 |
| (4) Uncertainties of Federal funds | 52.6 | 57.3 | 64.8 | 79.2 | 66.0 |
| (5) No disparity | .7 | .1 | .3 | 4.2 | 0 |
| (6) None of the above | .4 | 1.0 | 0 | 0 | 0 |
| (C) Priority 3: | | | | | |
| (1) Insufficient funds | 7.5 | 5.1 | 3.5 | 0 | 0 |
| (2) Insufficient personnel | 40.0 | 42.5 | 47.0 | 40.0 | 62.5 |
| (3) Insufficient knowledge of special areas | 16.2 | 17.9 | 15.7 | 40.0 | 12.5 |
| (4) Uncertainties of Federal funds | 34.4 | 31.1 | 31.3 | 20.0 | 25.0 |
| (5) No disparity | .4 | .7 | .9 | 0 | 0 |
| (6) None of the above | 1.6 | 2.6 | 1.1 | 0 | 0 |
| (D) Priority 4: | | | | | |
| (1) Insufficient funds | 6.9 | 6.1 | 5.4 | 0 | 0 |
| (2) Insufficient personnel | 26.6 | 22.0 | 21.6 | 0 | 0 |
| (3) Insufficient knowledge of special areas | 47.9 | 58.5 | 64.9 | 0 | 100.0 |
| (4) Uncertainties of Federal funds | .9 | 9.8 | 5.4 | 0 | 0 |
| (5) No disparity | 2.1 | 3.7 | 0 | 0 | 0 |
| (6) None of the above | 1.0 | 0 | 2.7 | 0 | 0 |
| (E) Priority 5: | | | | | |
| (1) Insufficient funds | 9.4 | 17.9 | 50.0 | 0 | 0 |
| (2) Insufficient personnel | 3.1 | 7.1 | 0 | 0 | 0 |
| (3) Insufficient knowledge of special areas | 31.3 | 14.3 | 0 | 0 | 0 |
| (4) Uncertainties of Federal funds | 0 | 10.7 | 0 | 0 | 0 |
| (5) No disparity | 50.0 | 42.9 | 50.0 | 0 | 0 |
| (6) None of the above | 6.3 | 7.1 | 0 | 0 | 0 |

QUESTION 6.—CLASSIFY YOUR TITLE I SERVICES BY CHECKING THE APPROPRIATE COLUMNS ON THE EFFECTIVENESS OF EACH SERVICE

| Enrollment category | Under 1,000 (1) | 1,000 to 4,999 (2) | 5,000 to 34,999 (3) | 35,000 to 99,999 (4) | Over 100,000 (5) | Total |
|---|---|---|---|---|---|---|
| RESPONSES | | | | | | |
| (A) Reaching all eligible children: | | | | | | |
| (1) Effective service | 48 | 39 | 27 | 13 | 0 | 41 |
| (2) Insufficient service | 48 | 59 | 72 | 87 | 90.0 | 57 |
| (3) No service | 4 | 2 | 1 | 0 | 10.0 | 2 |
| (B) Instructional services: | | | | | | |
| (1) Effective service | 64 | 63 | 64 | 51 | 45.0 | 64 |
| (2) Insufficient service | 31 | 35 | 35 | 49 | 55.0 | 33 |
| (3) No service | 5 | 2 | 1 | 0 | | 3 |
| (C) Parent participation: | | | | | | |
| (1) Effective service | 25 | 26 | 34 | 33 | 58.3 | 27 |
| (2) Insufficient service | 43 | 49 | 50 | 61 | 42.4 | 47 |
| (3) No service | 32 | 25 | 16 | 6 | 0 | 26 |
| (D) Health services: | | | | | | |
| (1) Effective service | 28 | 36 | 36 | 22 | 30.0 | 32 |
| (2) Insufficient service | 31 | 34 | 36 | 55 | 60.0 | 33 |
| (3) No service | 41 | 30 | 28 | 23 | 10.0 | 34 |
| (E) Nutritional services: | | | | | | |
| (1) Effective service | 30 | 32 | 30 | 26 | 35.0 | 31 |
| (2) Insufficient service | 25 | 28 | 31 | 47 | 55.0 | 28 |
| (3) No service | 45 | 40 | 39 | 26 | 10.0 | 41 |
| (F) Other supplementary services: | | | | | | |
| (1) Effective service | 20 | 29 | 37 | 30 | 33.6 | 26 |
| (2) Insufficient service | 29 | 36 | 40 | 70 | 61.6 | 35 |
| (3) No service | 51 | 35 | 23 | 0 | 25.6 | 39 |

QUESTION 7—WHAT LEVEL OF FUNDING WOULD BE NECESSARY IF YOUR SCHOOL DISTRICT WERE TO PROVIDE TITLE I PROGRAMS AND SERVICES FOR ALL CHILDREN IN NEED OF SUCH SPECIAL SERVICES DURING THE REGULAR SESSION?

| Enrollment category | Under 1,000 (1) | 1,000 to 4,999 (2) | 5,000 to 34,999 (3) | 35,000 to 99,999 (4) | Over 100,000 (5) |
|---|---|---|---|---|---|
| RESPONSES | | | | | |
| (A) Less than level for 1969–70 | 1.9 | 0.7 | 0.4 | 0 | 0 |
| (B) At the level for 1969–70 | 16.0 | 10.8 | 4.8 | 1.3 | 0 |
| (C) 10 percent more than 1969–70 | 17.2 | 14.3 | 11.4 | 9.1 | 0 |
| (D) 25 percent more than 1969–70 | 28.0 | 31.3 | 26.1 | 24.7 | 10 |
| (E) 50 percent more than 1969–70 | 28.7 | 32.2 | 38.8 | 33.8 | 30 |
| (F) Twice as much or more | 6.8 | 8.8 | 14.9 | 27.3 | 55 |
| (G) Other | 1.4 | 1.9 | 2.6 | 3.9 | 5 |

QUESTION 8—WHAT LEVEL OF FUNDING WOULD BE NECESSARY IF YOUR SCHOOL DISTRICT WERE TO PROVIDE TITLE I PROGRAMS AND SERVICES FOR ALL CHILDREN IN NEED OF SUCH PROGRAMS AND SERVICES DURING THE SUMMER SESSION?

| Enrollment category | Under 1,000 (1) | 1,000 to 4,999 (2) | 5,000 to 34,999 (3) | 35,000 to 99,999 (4) | Over 100,000 (5) |
|---|---|---|---|---|---|
| RESPONSES | | | | | |
| (A) Less than level for 1969–70 | 4.4 | 3.1 | 3.0 | 2.6 | 0 |
| (B) At the level for 1969–70 | 15.3 | 13.1 | 9.1 | 1.3 | 10 |
| (C) 10 percent more than 1969–70 | 16.4 | 17.5 | 17.0 | 15.4 | 5 |
| (D) 25 percent more than 1969–70 | 28.0 | 32.1 | 30.2 | 28.2 | 10 |
| (E) 50 percent more than 1969–70 | 23.2 | 22.3 | 24.1 | 27.0 | 30 |
| (F) More than twice as much | 12.7 | 11.9 | 16.7 | 25.6 | 45 |

## THE PROBLEMS OF EAST LOS ANGELES

(Mr. BROWN of California asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BROWN of California. Mr. Speaker, the highly publicized eruptions of violence in East Los Angeles during the past few weeks, and the tragic death of Ruben Salazar, have focused the attention of many citizens on the problems of that area and have created a new sense of urgency for solving these problems. But the problems are not new, and they are certainly not simple.

Community relationship with law enforcement personnel and with the entire system of criminal justice have been a sensitive issue for many years.

Concern for inadequate educational achievement in the community resulted in large-scale demonstrations beginning 2½ years ago.

The lack of reasonable political representation has concerned community leaders for more than a generation, and increasingly concerns the ordinary citizen today.

High unemployment, poor housing, low health service standards, inadequate transportation facilities, bureaucratic welfare administration, erratic immigration procedures—all have created increasing discontent in the community.

And slowly the Vietnam war, with its high Mexican-American casualty rates, but low Mexican-American representation on draft boards and in officer ranks of the services, has resulted in changing attitudes among both youths and adults who were previously noted for their willing and proud acceptance of their military responsibility.

Talented and sensitive professionals such as Ruben Salazar sought to increase public awareness of these problems, as a necessary step in their solution. An increasing number of sophisticated and dedicated young leaders—teachers, lawyers, students, writers—have moved into community organization roles, seeking to create within the community itself the power to achieve solutions to its problems.

Thus the community of East Los Angeles is in ferment. Few of its members are untouched by one or more of the serious problems I have listed. All wish to see progress toward a better community, progress made in the democratic tradition of this Nation. They are speaking up, marching, picketing, demonstrating, and petitioning the various organs of government for redress of a broad range of grievances. They are asking for help from their elected leaders and appointed public servants. They are asking for peaceful change in public policies and in the conditions of their lives. They are asking for understanding.

The citizens of East Los Angeles are not seeking to overthrow or undermine the Government of this country. A few, as in any community confronted by desperate problems, have given up hope in the promise of democratic and peaceful change. But the militant language and action of the new generation of Chicanos speaks more of a resurgent pride of culture and race, and a new determination to win their fair place in society, than of a plot to destroy the Government.

But more and more the Mexican American citizen, in common with growing numbers of blacks and other protestors against the status quo, are refusing the role of passive acquiescence. And more and more when confronted by a society which seeks to inflict violence upon them, they are reacting with violence.

Such violent episodes solve no problems—create no understanding. Only personal tragedy and private loss result, with each side seeking to justify its actions and blame the other side for what may have occurred.

For more than 30 years I have been involved in efforts to create solutions to the problems so obvious in the minority and poor communities. My motive was a simple desire to create a better community in which the promises of this great country were progressively fulfilled for every citizen. It is obvious today that all such efforts have been inadequate. The expectations and hopes for change have increased faster than the institutions and conditions of society have allowed that change to occur.

In east Los Angeles substantial resources have been directed toward job creation, education, health care, welfare, and other needs. The improvements resulting have been meager. Los Angeles city and county law enforcement programs have been improved, but the net change has affected very little the perception of the ordinary citizen of law enforcement as a hostile force. Law enforcement in general in this country, and particularly in minority communities such as East Los Angeles, has been called to bear the burden of resisting social and political change—a task for which it is ill equipped.

We need, today, to take a new look at east Los Angeles—to see its problems and its potential in a new light and make a new commitment to helping it solve its problems. At its core, east Los Angeles is a remarkably homogenous community in which the Spanish language and culture predominates. Outsiders sometimes view the community as an aberration—one which has failed to achieve a desired integration into the majority culture—and, therefore, a backward community toward which we should redouble our efforts to obliterate its unique characteristics.

The opposite is true. The community is a vital, dynamic, essential element in the sociological processes of the Southwest. It provides the environment through which an endless stream of rural families of Hispanic culture can be urbanized, oriented to a different—but not necessarily superior—culture, and helped to make their contribution to our multifaceted society.

As it succeeds in doing this it produces, in about a generation, a new group of capable, well-educated, bicultural citizens with unique contributions to make in today's world. These citizens frequently, but not always, move out in waves from east Los Angeles to neighboring communities, or other parts of the United States, as economic opportunity directs, and are replaced by more of the rural immigrants from throughout the Southwest, Mexico, and Latin America. This process has taken place since the founding of Los Angeles, and will continue indefinitely into the future.

Solutions to the problems of east Los Angeles depend upon recognizing its unique contribution to American cultural processes and strengthening the institutions and activities which contribute to its role. It should have an adequate economic base suited to the needs and talents of its residents. Its educational institutions should reflect the unique problems of acculturation which exist here. The institutional services—health, welfare, and so forth of government should be tailored to the characteristics of the community.

Every possible opportunity should be seized to capitalize and expand upon the special contribution of the Hispanic culture to our country and the world. Centers of excellence in art, music, handicrafts, architecture, food, and even religion and philosophy should be established in the community. We sometimes forget that Los Angeles has one of the largest concentrations of Spanish-surnamed citizens in the world, and East Los Angeles is its core.

Insteal of the poor and unwanted stepchild of a prosperous Anglo community, East Los Angeles should become an autonomous, healthy, productive part of a multicultural community. Instead of a politically powerless enclave subjected to outside control by frequently unenlightened officials and bureaucrats, it should have a strong framework of local government, and its own representatives at State and national levels. The abrasive effects arising from a system of law enforcement and criminal justice oriented toward the majority culture should be eliminated. The goal should be a locally controlled, bicultural police force and court system, with publicly or privately supplied bicultural legal aid services on a much broader basis.

I have taken this opportunity today to touch briefly on the problems of East Los Angeles because of recent attention focused on the violence there. Almost always we look on violence as the problem. In reality, violence is only the symptom of the problem. In the East Lost Angeles high school walkouts of 2½ years ago there was incidental violence. The Los Angeles district attorney sought to solve the problem by charging 13 leaders with conspiracy to disrupt the schools—a felony. Many of us protested that this was not only unconstitutional, but that it was not the solution to the problem. Within the past few weeks the appellate courts have stricken down the original charges. But the schools, which were the real problem, are little better, and many citizens are embittered at such a calloused reaction to the problem.

I hope that today, instead of focusing on the violence as the problem, we will focus on the situation out of which the violence arose. Only then can we stimulate the changes which will prevent the violence of the future.

---

## CLEVELAND GIVES QUESTIONNAIRE RESULTS—ANSWERS IT HIMSELF

(Mr. CLEVELAND asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. CLEVELAND. Mr. Speaker, for the eighth consecutive year, I have sent questionnaires to all of my constituents. At this time I would like to share the results with my colleagues and other readers of the RECORD.

These results have significance and meaning. In many respects New Hampshire is a microcosm of the United States. It is, on a per capita basis one of the most industrialized States in the Nation, yet an important segment of its economy is still based on agriculture and forestry. It enjoys an ever-increasing recreation and resort industry on a four-season basis. It is also blessed with many fine educational institutions.

Furthermore, New Hampshire has an outstanding record of citizen participation in government at all levels—from town meeting to presidential elections. Voter turnout is consistently among the highest in the country. New Hampshire's participation in presidential preference primaries is well known, and over the years has signaled to those who would heed extremely accurate forecasts.

This year's questionnaire was mailed out in June after eight drafts of questions and consultations with visitors, friends, and staff in a continuing attempt to phrase meaningful, unbiased questions. One of the last people to suggest changes was a visiting Dartmouth College professor, an expert in polling. His rewording of several questions, including question No. 2 on Cambodia, was accepted.

Some of the questions were asked because of their importance to the Nation. Others were asked because my mail and district visits indicated my constituents were interested in them. Still others were asked because similar questions had been asked in previous years to provide a check on opinion trends.

### MAJOR INNOVATION

A major innovation in this year's questionnaire was that two more categories of answers were added—"probably yes" and "probably no" to the more standard "yes," "no," and "undecided." This was in response to complaints that my questions were often such that neither yes nor no reflected the answerer's opinion. As true as this is, it is still a fact that when a bill comes before the House a Member must vote yea or nay—occasionally present in the case of an apparent conflict of interest.

The response this year was lighter than expected, being about the same as the 16,000 returned last year in spite of the fact that this year questionnaires were sent to six additional towns with a population of over 50,000 which have been added to the Second District. The lower response was surprising in that the questionnaire was sent out while the wave of discussion and debate over President Nixon's decision to destroy privileged sanctuaries in Cambodia was still at a peak. During May my mail was overwhelmingly against the President's decision. This fact which I announced together with my early stand in support of the President subjected me to criticism for not being in touch with the views of my constituents.

The results of my questionnaire suggest that early reaction to a controversial issue as reflected by mail must be carefully weighed with other factors.

### PRIORITIES—A SPOT FOR UNANSWERED QUESTIONS

For the first time since 1967 my questionnaire had an open-ended question on priorities. Many of the toughest questions this country is now facing are ones of priority: Which needs get the most money? Which programs are to be continued and which ones should be phased out? It is encouraging that there is now so much discussion on this basic issue. In my annual report for 1967 I commented that government, like individuals, must develop a sense of fiscal responsibility and establish priorities in spending. This is a central issue facing us as a nation. We must recognize the fact that there is not enough money to do everything. The Government must decide which programs are the most urgent, which can be stretched out, which can be deferred. It can then plan accordingly, allocating available resources to needs. The failure of the Great Society to recognize this, particularly while we are fighting a war in South Vietnam, has now resulted in a fiscal crisis. The inflation that many of us have been predicting is now a recognized fact.

### PRIORITIES

Indeed, the chickens have come home to roost, and now that they have, the selection of priorities is even more difficult.

Prior to a discussion of my priorities, I think it is fair to touch briefly on the rather awesome challenge which faced the Nixon administration when it assumed office in January 1969. We were faced with the problem of disengaging in South Vietnam, in a manner that would still preserve our credibility as a deterrent to aggression elsewhere in the world. At home, the Nixon administration was faced with the problem of halting inflation without creating a severe depression, and of quelling domestic disturbances and crime without abridging individual rights.

These problems are easy to state, but their solution by the first administration to take office for 120 years without control of Congress has not been easy.

With most of my constituents, I agree that the war in Southeast Asia is the most important priority facing the country. With the reduction of force levels in South Vietnam by more than 100,000 troops and more reductions underway, there is certainly reason to conclude that President Nixon's policies in Vietnam have, to date at least, been successful. In stating Vietnam as a priority, however, a word of caution must be reiterated as I have frequently done in my statements concerning our involvement there. This is the stark fact that our commitment in Vietnam cannot be considered in a vacuum. Our posture and policies there have important significance elsewhere in the world.

Bluntly stated, I do not think that we can cut and run in South Vietnam and still maintain a credible posture in our efforts to deter aggression in other parts of the world. This is not to suggest that we attempt to act as policemen for the entire world. It is simply a reminder that if we as a nation wish to assist in maintaining world peace, and surely we must, then we cannot bring ourselves by words and deeds to a point where our protestations for peace become meaningless. The complicated and dangerous Middle East situation is a clear and present example.

### THE ECONOMY

Another important priority is certainly the state of the economy. I am frequently astounded as I sit in the House and listen to some of my colleagues pontificate on the economy at how little attention is devoted to the interrelation between our Vietnam policies and the state of the economy. They are inextricably interrelated. Unemployment has now reached a level—5.1 percent—comparable to that which prevailed at the end of 1964. But much of this present unemployment directly reflects the efforts of the Nixon administration to reduce military expenditures and the numbers of people serving in the Armed Forces projected during this fiscal year. Total force reduction: 550,000. The loss of jobs in defense-related industries: approximately 650,000. Civilian Department of Defense jobs: 125,000. Together these figures—1,325,000—represent approximately 30 percent of the unemployment totals—4.2 million—prevailing in the month of September while these words are being written.

One of the little reported, but biting ironies of the day is the fact that some politicians who complain about unemployment also call for even greater defense cuts. They are frequently the same ones who are suggesting we crawl out of the Far East but crack down in the Middle East. As the poet said, "If I laugh at any mortal thing, 'tis that I may not weep."

### OUR ENVIRONMENT

Another high ranking problem facing us today is surely the quality of our environment. Our polluted rivers, smog-choked cities, and littered countryside need corrective and preventive measures. Communities need more planning. There is a population explosion in many parts of the world, coupled with migration patterns which are packing more and more people into unpleasant and unsafe metropolitan areas or crowded suburbs.

As a nation, we are too wasteful and materialistically oriented. Too little of our waste is recycled. DDT and mercury have come to stand for pollution rather than progress. Realization of this condition in recent years has grown rapidly. In 1967 when I last had a priority question this issue ranked 12th. It now ranks second which is most encouraging as an aroused and educated public is a first step toward a better environment in the future.

CRIME

Another priority is crime, which threatens the security of many of our citizens. Some polls show that the single worst problem facing many older people is crime and the resultant fear to go outside at night, or to go to the park to see friends, and so forth. We cannot as a nation enjoy a high quality of life as long as major segments of America are afraid to walk our city streets alone at night.

DRUG ABUSE

Most priority questions are interrelated ones. The problem of drugs and narcotics which is surely high on any national priority list is certainly a good example. The increasing dimensions of the problem certainly reflect a breakdown in communications between the young and the old, and the need for more education. In some parts of the country, of course, it is a contributing factor to the increase in crime. I am most impressed with the results of my questionnaire which indicate strong feelings that not enough is being done at the community level. Some people who have written me about this problem suggest that it is almost entirely the result of the very "untidy world" which my generation has presented to the next. In this connection, I think it only fair to point out that today's youths are not the only young people who have been faced with serious challenges. I often regret that more is not being taught about the troubled times of yesterday and how successive generations have met and solved their problems with fortitude and faith which often seem to be sadly lacking today. I am also reminded by frequent discussions and contacts with younger people that probably too much is being made of the aberrations of a few and not enough of the strengths of the many.

CONGRESSIONAL REFORM

As readers of my reports know, quite high on my personal priority list is the reform of Congress. As this report is being written, the House has at long last acted in this important area. Many people who are critical of the awesome power exercised by the executive branch fail to realize that a major cause of this is the failure of Congress to reform its procedures so that it can act more promptly and responsively to meet the challenges of changing times. As a first step toward responsively meeting some of the pressing problems of the day, it is becoming increasingly clear that Congress should put its own house in order. Many of our procedures are archaic. Congress has a very poor record for exercising badly needed watchdog functions. The Legislative Reorganization Act of 1970, if it passes the Senate, will hopefully set the stage for reformation of many of our programs and reordering of priorities during the 1970's. Although I do not think the Legislative Reorganization Act of 1970 has gone far enough, it is an encouraging one small step.

Although this concludes my discussions of priorities, I recognize that there are many that I have not discussed, and indeed, the list is almost endless.

Among them are rural and urban areas of disadvantage; the improvement of economic and educational opportunities; the restoration of stability and confidence in government and law; better communications; delivery of health services to people of all ages; meaningful programs for older citizens; highway safety; and continued reform and restructuring of existing Federal programs with increased emphasis on local participation and fiscal restraint.

VIETNAM AND CAMBODIA

Question 1: I agree that President Nixon is generally on the right track with his Southeast Asian policies. In the spring of 1968 following my first visit to Vietnam, I suggested the need for Vietnamization. Just as in Washington, the Federal Government was trying to do too much, I felt we were making the same mistake in South Vietnam. We were running the whole show and not doing enough to encourage the South Vietnamese and their allies to take over a greater share of the responsibility of their own defense.

Question 2: As I have already indicated, I approved of the Presidential decision to enter Cambodia. It is interesting to note that 12 percent more of my constituency answered positively yes on this question than on the first one. It would appear that this 12 percent feel we should be doing more in Vietnam rather than less. Last year about 9 percent of my constituency indicated we should increase our commitment in Vietnam to insure military victory.

VOTING AGE AND NEWS MEDIA

Question 3: Again this year I am in disagreement with my constituency in regard to lowering the voting age. Last year I stated that I did favor lowering the voting age and at the same time only 35 percent of my constituents agreed with me. As the answers indicate, there has been no change in either my position or that of my constituency. Earlier this year I voted in favor of lowering the voting age to 18—Voting Rights Act of 1970—although I would have greatly preferred to have had this action taken by way of a constitutional amendment which would have given the States an opportunity to express their approval or disapproval. Indeed this may be ultimately necessary if the Supreme Court decides that Congress did not have the power to lower the voting age by legislation.

Question 4: I agree with the majority of my constituents that there is considerable validity to Vice President AGNEW's charge that the national news media are often unnecessarily biased. Last year in answering my questionnaire I stated that meaningful national debate and sound legislation are at a low ebb. The reason for this wretched state of affairs is not as fully appreciated or discussed as perhaps it should be. In my opinion, it is a result, in part at least, of the poor reporting by those in Washington charged with informing the public concerning national affairs. More and more, I have come to the conclusion that the national media are increasingly out of touch with the real America and with reality. I believe that of all our national institutions which need reform, and most of them do including, of course, the Congress, the national news media is most in need of it. I am quite careful to refer to the national news media as there is a distinction between them and the local media as they are presently constituted in most parts of the country. Most reporting of local news on a day-to-day basis is adequate and in my district has been fair.

Question 5: At the time when I mailed out my questionnaire, it was probably true that not enough action was being taken at the community level to combat drug abuse, with a few notable exceptions. However, massive federal programs working closely with the State and with the Governor's crime commission have now been organized and their effects are now being felt. This development, along with the increased educational programs and awareness at community levels of the demensions of the problem and tough new laws at the Federal level reassure me that the problem of drug abuse is being met. To do this successfully quite clearly calls for education and understanding coupled with tough law enforcement at all levels of government.

ECONOMIC OPPORTUNITIES

Question 6: I do not feel that economic opportunities in New Hampshire are satisfactory. There are a good many factors involved which affect both individuals and businessmen. Prevailing wage rates in many of our industries are low by national standards. This may be in part caused by the depressing influences of unbridled imports which explains why I feel the adoption of a quota system has become necessary. In previous questionnaires, I have asked about quotas and the response has been overwhelmingly in the affirmative.

There is more to the problem, however. New England is at the end of the line from the sources of most energy supplies such as gas, oil, and coal. Attempts to build atomic generating plants are frequently stymied by local opposition.

In addition, President Nixon's economic policies, which involve the shifting from a wartime to peacetime economy obviously have lead to a lessening of opportunities in the higher paid, defense-oriented sector of New Hampshire industry.

An additional comment is pertinent here. There are people in my district and there are some areas in my district where attempts to improve economic op-

portunities are strongly resisted. A key factor in the economic development of many areas is the construction of better roads. Here we are sometimes faced with strong opposition from well intentioned conservation interests.

Another problem is the shortage of adequate housing that prevails in much of the district and here again a shortage of financing, coupled with high interest rates, has posed barriers. There are also some people in my district who don't want any more industry because of its potential threat to the quality of our environment.

In my opinion, all of these problems can be surmounted and we can improve economic opportunities in New Hampshire and at the same time fully and adequately protect the quality of our environment.

WELFARE

Question 7: There is such a heavy consensus that we need to reform our present welfare system, that the question is not whether to make changes, but rather how to make meaningful ones which will actually improve the system. This spring I voted against the administration's family assistance plan, which would have provided an income subsidy to the working poor in addition to present welfare payments to the nonworking poor. I voted against the proposal largely because I felt that its cost—at least $4 billion a year over the present welfare costs—was unjustified by any indications of success.

In this connection, I would like to point out that I have differed with the Nixon administration on several other issues as well. For example, trade and oil policies, and in several respects with its highway policies, to mention a few.

Income subsidies have been tested in only one small pilot project involving about 100 families, and this pilot had been operating only a year. This is far too little to justify a $4 billion a year increase in welfare costs. The guaranteed annual income concept should be seriously tested in realistic and longer term pilot programs, to see whether this as yet untried theory will work in practice.

CAMPUS UNREST

Question 8: I feel that generally college and university administrations have reasonably handled student protests.

For 6 years I served as a trustee of Colgate University, a liberal arts college. I base my answer, at least in part, on that experience. I do not think it is widely recognized or fully appreciated that in recent years and in the name of academic freedom much of the internal administration of colleges and universities has become decentralized. As a result, many disciplinary matters, curriculum decisions, and other campus affairs are almost totally controlled by the faculty and students working in a rather loosely defined manner with administration officials. It may be that in the future there will be a reorganization of the manner in which campus affairs are controlled and clearly there should be. Basically, however, an academic institution has to operate as free from outside interference as possible. The basic problem is probably that revolutionary extremists have sensed the possibilities inherent in the present structure of academic institutions and have seized upon the opportunity to promote their ends. But, given the situation as it is, particularly in New Hampshire, I cannot find that the college and university administrations have not acted reasonably well.

CHINA AND TAXES

Question 9: I favor opening relations with and broadening contacts with mainland China, though it is doubtful how interested they are in expanding contacts with us. They are a significant force in the world and we would be better off if we had some contacts with them. This question has been asked in previous years in a different form, recognizing Red China, and the response has been negative. So either attitudes are changing or people—like me—want to broaden contacts without explicitly recognizing that Communist government.

Question 10: I do not feel that the Federal income tax laws are fair and equitable. I have so stated on numerous occasions and my reasons for this statement are generally that the income tax laws are too complicated and thus, by their very nature, favor those people who can afford the services of accountants, tax lawyers, and financial experts. In our last attempt to reform the income tax laws, Congress failed notably to simplify the tax laws. We nibbled away at a few areas; for example, increasing exemptions; giving the single person a better break; and generally reducing the level of taxation. But we left many areas of avoidance and outright escape virtually untouched; for example, depletion allowances, and so forth.

POLLUTION ABATEMENT—CONSUMER PROTECTION

Question 11: The response to this question is very heartening, as it supports a proposal which I have urged as a feasible way to finance the enormous cost of sewage facilities which is based on the tremendous success which the highway trust fund has had in building our system of interstate and federally supported highways. In general this means that those who use and pollute our waters should pay the cost of cleaning them up. I proposed an amendment, which was accepted, to the Water Quality Improvement Act of 1970 directing the Secretary of the Interior to study all possible means of financing necessary facilities, including but not limited to user fees. This report is due by the end of the year. This need to study new methods of financing our environmental cleanup was recently reaffirmed by the Council on Environmental Quality's First Annual Report.

Question 12: I agree with my constituents, based on my experience particularly with constituents' mail, that protection of consumers is not adequate. An increasing number of constituents have turned to me with consumer problems ranging across the whole spectrum from new cars that are lemons to electrical appliances—some made in Japan—that do not work and a 5-pound bag of flour that has lost weight on its way home from the store. A good many of the complaints seem to stem from people who have gone far from their homes in shopping for so-called bargains.

Actually, more is being done to protect the consumer than most people realize, particularly since the 1970 special session of the New Hampshire Legislature established a new consumer protection division in the office of the attorney general. That office is just now starting to investigate and handle many of the type of complaints which have come to my office in the past several years. Also, President Nixon's Consumer Advisory Council has been quite active in focusing attention on consumer problems, and in solving many specific complaints.

THANK YOU

In conclusion, I would like to express thanks to those of my constituents who participated in this year's questionnaire, not only for returning their questionnaires, but for their many interesting and constructive comments.

These are, as I have often pointed out, troubled times, but I think it is important to remind ourselves that we as a nation have faced trying times before and with fortitude and faith have met them successfully.

There are, of course, deep divisions of opinion, but it is from differences of opinion that wise decisions are reached. Although responsibility for casting my votes as your Representative in the U.S. Congress is mine, the opinions that you have supplied me with are most helpful in meeting my obligations as your Representative. That there are differences of opinion is underscored not only by the fact that I find myself differing from a majority of my constituents as indicated by my answers to two of the questions this year, but also by the following interesting statistic which I would like to share with you. This year, we asked the IBM machine a new question. "How many of the 15,246 people who returned questionnaires before tabulation answered with the majority on each and every question?" The answer: 162.

The questionnaire results follow:

QUESTIONNAIRE RESULTS

PRIORITIES

List in order of priority the six most important issues, problems, or needs facing the United States today.

| | *Total responses* |
|---|---|
| 1. War in Indochina | 9,373 |
| 2. Pollution | 7,927 |
| 3. Inflation | 6,752 |
| 4. Student unrest | 4,748 |
| 5. Crime | 4,439 |
| 6. Drugs | 4,439 |
| 7. Civil rights | 3,586 |
| 8. Taxes | 3,001 |
| 9. Government spending | 2,740 |
| 10. Education | 2,093 |
| 11. Welfare | 2,015 |
| 12. Moral decay and lack of purpose | 1,896 |
| 13. Poverty | 1,839 |
| 14. Social security and medical aid | 1,683 |
| 15. Foreign policy | 1,364 |
| 16. Middle East | 1,126 |
| 17. Overpopulation | 1,090 |
| 18. Unemployment | 1,027 |
| 19. Housing | 923 |
| 20. Alienation in society | 851 |
| 21. The courts | 818 |

| | Yes | No | Undecided | Probably— Yes | Probably— No |
|---|---|---|---|---|---|
| 1. Is President Nixon generally on the right track with his Southeast Asian policies? | 53.9 | 22.2 | 5.3 | 13.6 | 3.4 |
| 2. Do you approve the Presidential decision to enter Cambodia? | 65.1 | 23.3 | 3.1 | 5.4 | 1.8 |
| 3. Based on your experience in your community, would you favor lowering the voting age? | 34.5 | 52.0 | 3.1 | 5.1 | 3.8 |
| 4. In your opinion, is there substantial validity to Vice President Agnew's charge that the national news media are often unnecessarily biased? | 57.3 | 21.3 | 5.5 | 9.4 | 3.7 |
| 5. Do you feel that enough is being done to combat the use of drugs in your community? | 13.0 | 58.2 | 9.5 | 8.1 | 8.9 |
| 6. Do you feel that economic opportunities in New Hampshire are satisfactory? | 32.1 | 42.4 | 8.5 | 9.2 | 5.1 |
| 7. Do you favor changing welfare to provide an income subsidy to the working poor, in addition to the present payments to those unable to work? | 30.1 | 47.2 | 8.7 | 7.3 | 3.9 |
| 8. Do you, in general, feel that college and university administrations have reasonably handled student protests? | 19.2 | 63.5 | 3.5 | 6.9 | 5.1 |
| 9. Do you favor opening relations with, and broadening contacts with mainland China? | 41.5 | 35.5 | 9.6 | 8.1 | 3.1 |
| 10. Do you feel that, in general, the Federal income tax laws in our country are fair and equitable? | 21.9 | 59.8 | 4.0 | 7.6 | 4.8 |
| 11. Would you favor user fees and/or taxes on all polluters and users of water in order to fully finance Federal water pollution abatement programs? | 65.4 | 14.9 | 7.1 | 8.2 | 2.1 |
| 12. Based on your personal experience do you feel that governmental protection of consumers is adequate? | 25.1 | 52.4 | 5.6 | 8.8 | 6.1 |

## PRESIDENT'S REORGANIZATION PLAN NO. 4 IS NEW FISHERIES THREAT

(Mr. DINGELL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DINGELL. Mr. Speaker, the Portland Oregonian has most appropriately labeled President Nixon's Reorganization Plan No. 4 of 1970 a "new fisheries threat." In an editorial under that headline, the Oregonian in its September 11, 1970, issue, urged the administration to revise Reorganization Plan No. 4, which would establish a National Oceanic and Atmospheric Administration—NOAA—under the Department of Commerce.

The Oregonian cited as an obvious flaw the proposal that the Bureau of Commercial Fisheries be transferred to the Department of Commerce, from which it was removed in 1942. The newspaper said this "would be a backward step of additional fragmentation of the management of the fishery resource."

In the event the administration does not revise its proposal, the Oregonian said "the House should vote 'no' to kill the National Oceanic and Atmospheric Administration."

Congressman Moss and I have introduced legislation, House Resolution 1210, disapproving of Reorganization Plan No. 4 and it is my expectation that this resolution will come up for a vote in the House in the near future.

So that the views of the Portland Oregonian may be known to my colleagues, I include the text of its editorial at this point in the CONGRESSIONAL RECORD:

NEW FISHERIES THREAT

The White House should revise its Reorganization Plan No. 4, to establish the National Oceanic and Atmospheric Administration (NOAA) under the Department of Commerce, before it comes up for a vote in the House of Representatives this month on a motion to disapprove.

The amendment should be to remove from the new organization the Bureau of Commercial Fisheries and leave it in the Department of Interior. To put this agency back in the business oriented Department of Commerce, from which it was removed in 1942, would be a backward step of additional fragmentation of the management of the fishery resource.

Virtually every conservation, fish and wildlife organization has come out against the severance of the BCF from the Fish and Wildlife Service and its companion agency, the Bureau of Sports Fisheries and Wildlife, in Interior. The basic issue is that of central management of the resource which is shared by commercial and sports fishermen.

So far as the Pacific Northwest is concerned, there is also the practical issue that the federal fishery program, especially the support of hatchery production of salmon and steelhead in the Columbia system, is now in more or less friendly hands. Although Interior has not been as sharp as the region desires in its operations, congressional support has been good. Rep. Julia Butler Hansen of Washington is chairman of the Interior subcommittee of the House Appropriations Committee which has kept the Columbia fisheries program in good health, and Rep. Wendell Wyatt of Oregon is a member. Sen. Henry Jackson of Washington is chairman of the Senate Interior Committee.

The Columbia River fisheries program was established by the federal government to compensate, in part, for the loss of valuable natural spawning because of the gigantic federal dams. The cooperative efforts of the federal government and the states to maintain these valuable salmon and steelhead runs could easily be destroyed if the Bureau of Commercial Fisheries should be moved to the Commerce Department and to other committees of Congress.

President Nixon is asking for NOAA to bring together in a single administration the major federal programs dealing with the seas and the atmosphere and to improve the overall management of programs dealing with the three-fourths of the earth covered by the oceans. The goal is laudable. But removal of the Bureau of Commercial Fisheries from Interior, unless all functions of the U.S. Fish and Wildlife Service should be put into a Department of Natural Resources and Environment, would be a false step. The fisheries resource must be managed as a whole, not fragmented.

If the White House does not make this change, the House should vote "No" to kill the National Oceanic and Atmospheric Administration and require the President to send it back in revised form. Certainly, West Coast members of Congress should not support it in its present form.

---

## PROVIDING FOR NATIONAL ENVIRONMENTAL DATA SYSTEM

(Mr. DINGELL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DINGELL. Mr. Speaker, On September 23, 1970, my Subcommittee on Fisheries and Wildlife Conservation of the House Committee on Merchant Marine and Fisheries ordered reported to the full committee H.R. 17436, with amendments. The legislation, as reported, would amend the National Environmental Policy Act of 1969 to provide for a National Environmental Data System.

Mr. Speaker, the President, on August 10, 1970, in his first report to the Congress on the state of our Nation's environment, pointed to the need for more adequate environmental data. He stated that—

Existing systems for measuring and monitoring environmental conditions and trends, and for developing indicators of environmental quality, are still inadequate.

The Council on Environmental Quality in its first annual report to the President also pointed to the need for more information. The Council said:

With less than one-quarter of the year available in which to prepare this first annual report, and with insufficient environmental quality indicators or systems by which to monitor the environment with any degree of accuracy, the Council has undertaken to bring together a description of environmental problems and issues facing the Nation.

While this report is wide ranging, the Council realizes that it is incomplete and uneven in some respects. Most important, the lack of measurement tools prevents as assessment at this time of the status and trends of the major environmental classes of the Nation.

Mr. Speaker, it appears that the National Environmental Data System—that would be established by H.R. 17436—will provide the type of information and data that is so vitally needed in order to evaluate the condition of our Nation's Environment and to chart changes in its quality. I am hopeful that the bill will be brought up on the floor of the House for a vote within the very near future. My subcommittee would welcome comments on the bill from Members of the House, Federal, and State agencies, and interested individuals and organizations.

H.R. 17436, as reported by the subcommittee, is amended so as to rewrite the bill in its entirety. The new language of the bill follows:

A bill to amend the National Environmental Policy Act of 1969, to provide for a National Environmental Data System

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the National Environmental Policy Act of 1969 (Public Law 91-190) is amended by adding at the end thereof the following new title:

"TITLE III—NATIONAL ENVIRONMENTAL DATA SYSTEM

"SEC. 301. This title may be cited as the 'National Environmental Data System Act'.

"SEC. 302. For the purpose of this title—

"(1) The term 'Data System' means the National Environmental Data System established by this title. The system shall include

an appropriate network of new and existing information processing or computer facilities both private and public in various areas of the United States, which, through a system of interconnections, are in communication with a central facility for input, access and general management. It shall also include all of the ancillary software and support services usually required for effective information system operation.

"(2) The term 'Council' means the Council on Environmental Quality established in title II of this Act.

"(3) The term 'environmental quality indicators' means quantifiable descriptors of environmental characteristics which will measure the quality of the environment.

"(4) The term 'information, knowledge, and data' shall be interpreted as including those facts which are significant, accurate, reliable, appropriate, and useful in decisionmaking in environmental affairs.

"SEC. 303. (a) There is hereby established a National Environmental Data System.

"(b) The purpose of the Data System is to serve as the central national coordinating facility for the selection, storage, analysis, retrieval, and dissemination of information, knowledge, and data relating to the environment so as to provide information needed to support environmental decisions in a timely manner and in a usable form. Such information as shall be deemed appropriate and useful for the achievement of the purpose of the system shall be made available by all Federal agencies and shall be collected and received, where available, from all Federal agencies, private institutions, universities and colleges, State and local governments, individuals, and any other source of reliable information.

"(c) Information and data shall also be sought from international sources such as foreign governments, the United Nations, and other international institutions; and the President is encouraged to enter into such agreements as may be necessary to accomplish this purpose.

"SEC. 304. (a) The information, knowledge, and data in the Data System and the analysis thereof shall be made available on request without charge—

"(1) to the Congress and all the agencies of the legislative and executive branches of the Federal Government, and their bona fide contractors and grantees; and

"(2) to all States and political subdivisions thereof, except that, in any case where it is determined that the service requested is substantial, the payment of such fees and charges may be required as may be necessary to recover all, or any part, of the cost of providing such retrieval service.

"(b) The information, knowledge, and data in the Data System and the analysis thereof shall be made available to private persons and entities—

"(1) upon payment of reasonable fees and charges as may be established as necessary to recover the cost of providing such retrieval services; and

"(2) subject to such terms and conditions as is deemed necessary to protect the interests of the United States.

"(c) In all instances the Data System shall perform its functions so as to protect secret and national security information from unauthorized dissemination and application.

"SEC. 305. (a) There is hereby created the position of National Environmental Data System Director, who shall be appointed by the President to serve at his pleasure, by and with the advice and consent of the Senate. The Director shall be a person who, as a result of his training, experience, and attainments, is exceptionally well qualified to analyze and interpret environmental data of all kinds and to appreciate its significance in the management of natural resources as required for the purpose of this Act. He shall serve full time and be compensated at the rate provided for Level V of the Executive Schedule Pay Rates (5 U.S.C. 5313).

"(b) It shall be the function of the Director to—

"(1) administer and manage, under the guidance of the Council, the operations of the Data System in all of its ramifications,

"(2) institute a study to evaluate and monitor the state of the art of information technology and utilize to best advantages new and improved techniques for accomplishing the purposes of this Act,

"(3) utilize knowledge developed during such study to develop criteria and guidelines to govern the selection of data as to scope, scientific validity, quantity, and quality, to be incorporated into the National Environmental Data System network, including the development of predictive ecological models,

"(4) develop and implement a plan to establish and maintain the environmental information network anticipated to accomplish the purposes of this Act,

"(5) develop, establish, and maintain, as necessary, general standards which will permit and facilitate the compatability and integration of existing and new information systems bearing on the environment to make them consonant and cooperative with the central facility established by this Act, and

"(6) develop and publish from time to time environmental quality indicators for all regions of the United States, including its coastal and contiguous zones, and for internationally significant environments such as the atmosphere and the oceans.

"(c) In carrying out his functions under this Act, the Director shall, to the fullest extent possible, provide the Council with statistical data and other information necessary for the preparation of the annual report of the Council required under section 201 of this Act, and in the development of long-range programs for the enhancement of the environment.

"SEC. 306. (a) The Director may employ such other officers and employees as may be necessary (1) for the efficient administration, operation, and maintenance of the Data System, and (2) to carry out his functions under this title.

"(b) The Director is authorized to provide such lawful incentives as may be required to achieve the purposes of this Act. These incentives may include, but shall not be limited to, grants of money, exchanges of information, sharing of facilities, specialized advice, programs and formats, and other like incentives. The Director shall also be authorized to enter into contracts with universities, individuals, and State and local governments when needed, and to purchase information, data, and personal services as required to fulfill its purposes. He is also authorized to employ consultants as required.

"SEC. 307. (a) The head of each department, agency, or instrumentality in the executive branch of the United States Government shall make available to the Data System such information, knowledge, and data on the environment which such department, agency, or instrumentality may have as a result of its operations. Such information, knowledge, and data shall be made available for incorporation into the Data System, as the Director deems appropriate as soon as possible after it becomes known to such department, agency, or instrumentality.

"(b) In the administration of all Federal programs resulting in financial assistance to any cooperative international study or to any State, political subdivision, or other public or private entity, and in all contracts in which the United States is a party, the head of the department, agency, or instrumentality administering such program, on entering into such contract, shall take such action as may be necessary to insure that information, knowledge, and data on the environment which either directly or indirectly results from such Federal financial assistance or contract will be made available to the Data System as soon as possible after it becomes known. In respect to Federally assisted environmental programs conducted by foreign nations, it shall be the policy of the United States Government to encourage, to the fullest extent possible, the availability to the Data System of such information, knowledge, and data arising from these programs which is appropriate to the purposes of the system.

"(c) The head of each department, agency, and instrumentality in the executive branch of the United States Government shall, to the fullest extent possible, permit the Data System Director to use, on a mutually agreeable basis, including the payment of compensation, personnel, facilities, computers, data processing, and other equipment within such department, agency, or instrumentality in carrying out its functions under this title; and, to the fullest extent possible, such computers, data processing, and other equipment shall be made compatible with all others in, and available for use by, the Data System.

"SEC. 308. There is authorized to be appropriated to carry out the provisions of this Act the sum not to exceed $1 million for fiscal year 1971, $3 million for fiscal year 1972, and $5 million for each fiscal year thereafter."

---

## INFLATION IN OUR ECONOMY AND COMMISSIONS

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

INFLATION IN COMMITTEES

Mr. MONAGAN. Mr. Speaker, from the other end of Pennsylvania Avenue, we repeatedly hear of commissions established to study the causes of the most recent crisis or press briefings announcing that the administration is disassociating itself from a commission or its findings, conclusions and recommendations, even though the Commission has not even issued a report.

Today we are in the throes of a recession involving a continuing rise in unemployment. The administration's answer is another study commission. Rather than taking steps of practical action, it appears that the President took the path of postponing action while insisting that the administration is really at work on the problem. With television fanfare, the President announced the appointment of a National Commission on Productivity and also a Regulations and Purchasing Review Board. In his television address of June 17, the President described the Commission's task as follows:

> In order to achieve price stability, healthy growth and a rising standard of living, we must find ways of restoring growth to productivity.
>
> This Commission's task will be to point the way toward this growth in 1970 and in the years ahead. I shall direct the Commission to give first priority to the problems we face now; we must achieve a balance between costs and productivity that will lead to more stable prices.

This is not the first Presidential Commission on Productivity or "full" employment. I find it difficult, if not impossible, to differentiate between the tasks

of the Commission and the statutory responsibilities of the Council of Economic Advisers under the Employment Act, as well as the duties of the Cabinet Committee on Economic Policy and the inactive Cabinet Committee on Price Stability.

The Regulations and Purchasing Board is slated to review all Government action to determine whether Federal purchasing and regulations drive up costs and prices. It appears that this unit will duplicate work being done by, and responsibilities vested in, the General Accounting Office, General Services Administration, the Commission on Procurement, NASA Procurement and Regulations Study Group, as well as several other governmental units.

Wages, salaries, employment benefits, prices, and employment fall within the scope of study of the Commission. But what about the work being done and the studies being made by the Council of Economic Advisers, other Employment Act responsibilities, the Cabinet Committee on Price Stabilization and the Cabinet Committee on Economic Policy? The administration's Commission is obviously not a first in the field but the administration has achieved a first in the creation of the present economic condition of simultaneous recession and inflation. Prior administrations practiced a controllable slow rise in inflation together with steady rises in economic productivity and growth. The proper use and the theory underlying the use of advisory commissions is fundamentally sound. However, is there a real need, in this instance, for further study and speculation to find the source of our economic woes? Information, stautory authority and governmental offices are available if the President wished to make use of them.

INFLATION IN THE ECONOMY

There is need to fight inflation, to use the available tools and to take real—not play acting—steps. But the present administration policies only continue to fuel and feed the fire of inflation. In the meantime, growing unemployment and inflation threatens to materially further damage our economy.

Inflation is spreading like a physical disease of major proportions. The cause may be several unhealthy conditions acting singly or in unison. Inflation can be related to an oversupply of money including increased Government expenditures, an overly expansive stock market, scarcity of consumer goods due to inadequate productivity or distribution, excessive profits in some areas, an oversupply of credit which is money, excessive interest charges on credit and increased charges on the Federal debt. Inflation can also be caused by so-called wage-price escalations in which wages and prices are forced upward without regard to the increased production of goods and reasonable margins of profit.

THE CURE?

The administration's inflation cure was to cut down the supply of money in circulation and cause a reduction in the demand for consumer goods. To do this they sponsored increases in the interest rate and cut down on Federal expenditures. Other alternatives were largely ignored.

Private spending for all practical purposes is not controlled by present monetary policies, yet private spending is nine times greater than Federal spending. So any administration move reducing expenditures only effects a small percentage of the remaining 10 percent.

The increase in the interest rates only resulted in an increase in inflation. Industry has piled up hundreds of billions of dollars in additional debt without cutting down on new construction and new capital investment and merely passed the excess interest cost to the purchasing consumer, foreign or domestic, in the form of increased prices. The increase in cost prices us out of some foreign or domestic markets and results in a further decrease in productivity.

The interest rates on high grade municipal bonds and on Federal borrowing have drastically increased. The administration has changed its regulations so that 90-day or less Government notes may not be purchased by small investors without difficulty. The increase in interest rates on governmental borrowing alone comes to several billions of dollars per year. The additional cost results in greater burdens being placed on the tax paying public in order to provide necessary and essential public services.

New channels and new sources of capital funds have had to be tapped by American industry, business, public institutions and consumers in order to function. Investment funds in many instances were funneled away from customary beneficiaries into new channels. Installment credit volume rose to new heights.

THE RESULTS OF THE ADMINISTRATION'S CURE

To obtain the use of money Americans have had to pay the highest interest rates in over 100 years.

Other results are upwards of 1,700,000 additional people unemployed, an unemployment rate in excess of 5.2 percent—10 percent in Waterbury, Conn., 14.9 percent in Bristol, Conn.—pressure for additional taxes, an increased demand on welfare and insurance funds, less goods purchased at higher prices and a diminution of productivity. The purchasing power of the dollar is lower. The sting is felt in all levels of our economy and society.

At first the burden of this policy fell on the aged, the middle- and low-fixed income wage earner, the consumer, the young home buyer, and all of us caught paying the cost of price and interest increases.

In cutting Federal expenditures there have been slashes in essential health, education, housing, research and national defense programs. There have been no real or effective curbs imposed on private spending. So we cut public spending without proper order of priority. This action, too, has forced public, quasi-public and educational institutions to borrow funds at the high interest rates to replace funds formerly provided by Government grants.

At present, the burden of the administration's fiscal policies has proceeded beyond the consumer and its impact is felt in all sectors of the economy. Stockbrokers and some of our largest corporations are now appealing to the Federal Government for help. The Dow Jones industrial average is down about 200 points. More than 120 brokerage firms have disappeared through merger, takeover, or just plain failure. Incomes of securities business employees have dropped a third to one-half of what they were prior to 1968 and the entire structure of our present security market is threatened. Confidence in American securities, and the dollar has decreased and investment moneys have moved elsewhere.

TOO MUCH CURE?

Last week the Vice President appeared on Wall Street with the message that it is important for the administration to take control of Congress this year in order that the President finish his programs. Will the final result be rule or ruin?

In the late 1920's and the early 1930's the depression was triggered by a decline in the confidence and operation of Wall Street. This stock decline caused other failures in our economy. It resulted in a period in which practically all breadwinners were unfavorably affected. The danger signals are showing today. Window dressing and rhetoric are not enough to meet the challenge.

The creation of a commission and a board are attempts to distract the public's attention away from the problem. It is obvious that remedies applied by the administration are inadequate, paper thin, and wrong. We still have uncontrolled interest rates, private spending, and private credit. Inflation and recession compound each other in their continued growth.

Existing statutory tools, available knowledge, and governmental agencies are not properly utilized to fight this debilitating disease. The House of Representatives recently passed a measure giving the President greater control over interest rates and price wage spiral but it has not been used.

I am convinced that the administration has not moved effectively against inflation. I urge the administration to lead, to utilize effectively the tools it has, and to take constructive action against the real causes of the Nation's economic woes.

---

## SALUTE TO A THINKING EDITOR

(Mr. RANDALL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RANDALL. Mr. Speaker, I wish to pay tribute to an editor of one of the papers in our congressional district that I regard as a keen analyst of the faults and failures of H.R. 16311 which this administration has chosen to call the welfare reform bill.

In his column, entitled "Frank Expression" the editor and general manager of the Nevada Daily Mail, Frank Merenghi, has written one of the most comprehensive appraisals of what is wrong about the new welfare bill that I have ever read.

He points out some interesting statistics particularly the fact that there is no such thing as a $1,600-a-year guaranteed annual income, but in many instances as much as $7,520 a year to a family even if the father were to be fully employed. His astute appraisal is that

this measure would put every eighth person in America on relief and without any true work incentives even though it has been praised by its promoters with the lofty description of workfare rather than of welfare.

As to new additions in Missouri, one of our State officials recently estimated that if this bill becomes law as many as 600,000 new recipients would go on the welfare rolls in our State. Think of it. Some of my friends from California tell me that out there, it would not be thousands or hundreds of thousands, but several millions that would be added to the welfare rolls of the Golden State.

Frank Merenghi has written an excellent article which is a keen analysis of what is wrong with H.R. 16311. I hope Frank and all of our constituents in Nevada, Missouri, and Vernon County and in fact everyone throughout our congressional district know that their Congressman opposed this bill with all the energies he could muster when it was before the House of Representatives. I want everyone to know I voted no on final passage, as is shown in the CONGRESSIONAL RECORD.

In the unhoped for event that the other body of the Congress should pass similar legislation let us pray that some of those who supported this bill when it was before the House will change their attitude and oppose the conference report. I share this editorial with my colleagues in the hope they may read it and enough will be convinced H.R. 16311 is not a good bill. Should the other body decide to act let us all pray there will be a change of heart by enough Members in the House of Representatives to undo the mistake they made when we passed this bill earlier this year.

The editorial that appeared in the Nevada Daily Mail of Thursday, September 17, 1970, under the heading, "Frank Expressions," is as follows:

FRANK EXPRESSIONS

The administration's "welfare reform bill," H.R. 16311, has been passed by the House of Representatives. It is now before the Senate Finance Committee.

There are some things about this bill that make you wonder:

It would guarantee a minimum income to all families in this country, as much as $7,520 a year to some where the father is fully employed.

It would triple the number of families on welfare.

It would increase the number of persons on welfare from 10,436,000 to 23,205,000, according to Senate Finance Committee statistics.

In some states—Arkansas, Colorado, Georgia, Indiana, Tennessee and Texas, for instance—it would more than double the number of persons on welfare. In Mississippi, Nebraska and Virginia, it would increase the number of welfare recipients nearly three times; in North Carolina and South Dakota, nearly four times; and in South Carolina and North Dakota, nearly five times.

It would put every eighth person in America on welfare.

For the first year, this welfare program would cost about $11 billion. But that's only the beginning.

The cost would go up each year. And no one can tell how high it would go.

There is already a bill pending in Congress, proposing a $5,500 minimum income, at an estimated annual cost to the taxpayer of $60 billion.

This comes at a time when Federal spending should be held in check. A deficit of $10–15 billion is projected for the current fiscal year 1971. For 1972 the deficit could reach $23 billion.

Continued excessive spending can lead to unstoppable inflation.

Business, large and small, across the country strongly favors welfare reform. Business recognizes that welfare reform is past due, and would like to see something done about it.

However, many businessmen do not favor the administration's welfare reform bill, H.R. 16311.

The reason support is lacking is not only because of the tremendous cost involved, but more especially because the bill is not a welfare reform measure, even though that is what its proponents call it.

It is welfare expansion; it merely piles another aid program on top of those which already exist.

It is not basic, it does not get to the heart of the problem. It does not solve the family welfare problem.

Welfare reform is needed, but not merely a guaranteed annual income for certain families, and a guaranteed annual tax increase for the rest of the citizens.

Therefore, many people feel that Congress should come through with a real welfare program. Specifically:

Doing a better job than is now being done of taking care of those people who are unable to support themselves, the aged, the blind, the disabled.

Meeting the living needs of able-bodied adults with children in need, and who are on AFDC–AID to families with dependent children. But these able-bodied adults should be given training for productive jobs—for self-support—and they can be.

FREE FAMILY PLANNING COUNSELING AND DEVICES

Adequate funding of day-care centers and child-care arrangements to help welfare mothers move into gainful employment and self-support.

A constructive program of occupational rehabilitation, with living allowances to help the individual meet daily family needs while in training and with built-in incentives to take a job.

We are not in favor of the HR 16311 welfare expansion program that would put every eighth person in America on relief—and that would carry with it no true work incentive for the able-bodied adult.

## IT IS NOT TOO LATE TO SIGN THE DISCHARGE PETITION

(Mr. RANDALL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RANDALL. Mr. Speaker, there is presently pending on the Clerk's desk a discharge petition No. 8 which I filed on September 14. The first page is filled with signatures. There are several on the second page.

It is not and will not be my intention to claim credit for building a fire under the Judiciary Committee. However, facts are that after this discharge petition was filed, and with several signatures already on the petition, Subcommittee No. 5 of the Judiciary Committee commenced to mark up the organized crime control bill of 1970. Moreover, this subcommittee scheduled an almost unprecedented, unheard of, and almost unbelievable evening session. Undoubtedly there have been other evening sessions of the Judiciary Committee but in my 12 years here I cannot recall another instance of any Judiciary Subcommittee deciding that they were working on a matter of such urgency that it would require an evening session.

Whether we call it the Organized Crime Control Act or the anti-Mafia law, the fact remains that if we adjourn on the 16th of October such means 2 legislative weeks in October and substantially 1 week remaining in September. As I attempted to point out in a letter I sent to my colleagues urging their signature on the discharge petition, no Member would want or can afford to go home without passage by the House of S. 30 which still languishes notwithstanding some action by the House Judiciary Committee.

The time is late. Certainly more tools and weapons are needed in the fight against organized crime. Mr. Speaker, For obvious reasons, I wish to share with my colleagues a recent editorial reprinted from the San Diego Union as follows:

ANTI-MAFIA LAW LANGUISHES IN HOUSE

One of the most important pieces of unfinished business facing this session of Congress is the Organized Crime Control Act, now bottled up in the House Judiciary Committee by Committee Chairman Emanuel Celler, Democrat of New York. Despite Senate passage in January with only one dissenting vote and endorsement by the American Bar Association, the act remains under Mr. Celler's thumb.

The Organized Crime Control Act is bipartisan. It was sponsored by President Nixon in April, 1969, on the basis of recommendations by the President's Commission on Crime and the Administration of Justice which had been appointed earlier by President Lyndon Johnson. The commission found that only 257 organized crime figures out of 5,000 identified suspects were indicted during the entire decade of the 1960s. Notorious leaders in the Mafia remain at large—profiteering from prostitution, gambling, pornography and the growing traffic in narcotics. Well-known crime czars have eluded indictment because better laws are needed.

The Organized Crime Act would strengthen the legal means of obtaining and using evidence against gamblers and drug operators. Its provisions offer government witnesses special protection from reprisal, grant immunity from self incrimination to witnesses to allow them to testify before grand juries, and extend federal jurisdiction to all major illegal gambling operations that now divert as much as $50 billion annually into Mafia treasuries. An important section prohibits the investment of funds from rackets into legitimate commercial businesses.

In short the Organized Crime Act, addressed to the biggest evils now exploiting the American people, is at the heart of President Nixon's war on crime. The country has reason to hope that bipartisan leadership in the House will pry this legislation out of Rep. Celler's hands and enact it into law.

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. KLUCZYNSKI (at the request of Mr. ALBERT) for today, on account of official business (funeral for James Guinea, late administrative assistant).

Mr. ADDABBO (at the request of Mr. BRASCO), for September 24, on account of official business.

Mr. OLSEN (at the request of Mr.

JOHNSON of California), for today, on account of official business.

Mr. ASPINALL from adjournment on September 25 until adjournment of the 91st Congress or November 5, whichever date occurs first, on account of necessity of campaigning for election to the 92d Congress.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. MADDEN for 15 minutes, today, to revise and extend his remarks and include extraneous matter.

The following Members (at the request of Mr. RUTH) and to revise and extend their remarks and include extraneous matter:)

Mr. WILLIAMS, for 5 minutes today.

Mr. MILLER of Ohio, for 5 minutes, today.

Mr. AYRES, for 1 hour, today.

Mr. FINDLEY, for 5 minutes, today.

Mrs. HECKLER of Massachusetts, for 5 minutes, today.

Mr. PRICE of Texas, for 15 minutes, today.

(The following Members (at the request of Mr. DANIEL of Virginia) and to revise and extend their remarks and include extraneous matter:)

Mr. RARICK, for 10 minutes, today.

Mr. FULTON of Tennessee, for 15 minutes, today.

Mr. PREYER of North Carolina, for 20 minutes, today.

## EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. ASHLEY and to include extraneous matter.

(The following Members (at the request of Mr. RUTH), and to include extraneous matter:)

Mr. WOLD.

Mr. KUYKENDALL.

Mr. LANDGREBE.

Mr. HOGAN.

Mr. FINDLEY in three instances.

Mr. ANDERSON of Illinois in two instances.

Mr. PRICE of Texas in two instances.

Mr. DENNEY.

Mr. MCDONALD of Michigan.

Mr. GUDE in two instances.

Mr. SCHMITZ in three instances.

Mr. HARVEY.

Mr. TAFT.

Mr. STEIGER of Wisconsin.

Mr. HALPERN.

Mr. SCOTT.

Mr. WYMAN in two instances.

Mr. GROVER.

Mr. LANGEN.

Mrs. HECKLER of Massachusetts.

Mr. BRAY in two instances.

Mr. BROWN of Ohio.

(The following Members (at the request of Mr. DANIEL of Virginia), and to include extraneous matter:)

Mr. PUCINSKI in six instances.

Mr. BRADEMAS in eight instances.

Mr. OTTINGER in two instances.

Mr. GRIFFIN in two instances.

Mr. ADDABBO in two instances.

Mr. HELSTOSKI in two instances.

Mr. BRINKLEY.

Mr. ROSTENKOWSKI.

Mr. MEEDS in two instances.

Mr. DANIELS of New Jersey.

Mr. WILLIAM D. FORD.

Mr. BINGHAM in two instances.

Mr. HUNGATE in two instances.

Mr. BLATNIK.

Mr. BYRNE of Pennsylvania.

Mr. GRAY.

Mrs. SULLIVAN in three instances.

Mr. BOLAND.

Mr. MILLER of California in five instances.

Mr. RYAN in two instances.

## SENATE BILLS AND JOINT RESOLUTIONS REFERRED

Bills and joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 2984. An act to permit certain Federal employment to be counted toward retirement; to the Committee on Ways and Means.

S. 3220. An act to protect a person's right of privacy by providing for the designation of sexually oriented advertisements and for the return of any such unrequested advertisements at the expense of the sender; to the Committee on Post Office and Civil Service.

S. 3765. An act to amend the Flammable Fabrics Act to increase the protection afforded consumers against injurious flammable fabrics; to the Committee on Interstate and Foreign Commerce.

S. 3958. An act to adjust the pay of the police forces at Washington and Dulles Airports; to the Committee on Post Office and Civil Service.

S.J. Res. 74. Joint resolution to provide for the designation of the first full calendar week in May of each year as "National Employ the Older Worker Week"; to the Committee on the Judiciary.

S.J. Res. 110. Joint resolution to amend the joint resolution entitled "Joint resolution to establish the first week in October of each year as National Employ the Physically Handicapped Week", approved August 11, 1945 (59 Stat. 530), so as to broaden the applicability of such resolution to all handicapped workers; to the Committee on the Judiciary.

S.J. Res. 187. Joint resolution to authorize the President to designate the third Sunday in June of each year as Father's Day; to the Committee on the Judiciary.

S.J. Res. 223. Joint resolution to authorize and request the President to issue annually a proclamation designating the month of January of each year as "National Blood Donor Month"; to the Committee on the Judiciary.

S.J. Res. 226. Joint resolution to authorize the President to proclaim the period from May 9, 1971, Mother's Day, through June 20, 1971, Father's Day, as the "National Multiple Sclerosis Society Annual Hope Chest Appeal Weeks"; to the Committee on the Judiciary.

## ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. FRIEDEL, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 11953. An act to amend section 205 of the Act of September 21, 1944 (58 Stat. 736), as amended;

H.R. 18127. An act making appropriations for public works for water, pollution control, and power development, including the Corps of Engineers—Civil, the Panama Canal, the Federal Water Quality Administration, the Bureau of Reclamation, power agencies of the Department of the Interior, the Tennessee Valley Authority, the Atomic Energy Commission, and related independent agencies and commissions for the fiscal year ending June 30, 1971, and for other purposes.

H.J. Res. 589. Joint resolution expressing the support of the Congress, and urging the support of Federal departments and agencies as well as other persons and organizations, both public and private, for the international biological program; and

H.J. Res. 1178. Joint resolution authorizing the President to proclaim the month of October 1970 as "Project Concern Month."

## SENATE ENROLLED BILL AND JOINT RESOLUTIONS

The Speaker announced his signature to an enrolled bill and joint resolutions of the Senate of the following titles:

S. 3637. An act to revise the provisions of the Communications Act of 1934 which relate to political broadcasting;

S.J. Res. 218. Joint resolution providing for the designation of a "Day of Bread" and "Harvest Festival Week"; and

S.J. Res. 228. Joint resolution to authorize the President to designate the period beginning October 5, 1970, and ending October 9, 1970, as "National PTA Week."

## ADJOURNMENT

Mr. DANIEL of Virginia. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 5 minutes p.m.), under its previous order, the House adjourned until Monday, September 28, 1970, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2401. A letter from the Director, Office of Emergency Preparedness, Executive Office of the President, transmitting a draft of proposed legislation to amend the Defense Production Act of 1959, as amended, to eliminate the restriction on guaranteed transactions under section 301; to the Committee on Banking and Currency.

2402. A letter from the Secretary of the Army, transmitting a draft of proposed legislation to amend the act of July 3, 1930, as amended, relating to the services of consultants in connection with civil functions of the Corps of Engineers; to the Committee on Public Works.

2403. A letter from the Secretary of the Army, transmitting a draft of proposed legislation to amend section 103 of the River and Harbor Act of 1960, pertaining to the pay of civilian members of the Board on Coastal Engineering Research; to the Committee on Public Works.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. STAGGERS: Committee of conference. Conference report on S. 1933 (Rept. No. 91–1467). Ordered to be printed.

Mr. HAYS: Committee on Foreign Affairs. H.R. 18012. A bill to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations (Rept. No. 91–1468). Referred to the Committee of the Whole House on the State of the Union.

Mr. DANIELS of New Jersey: Committee on Post Office and Civil Service. S. 437. An act to amend chapter 83 of title 5, United States Code, relating to survivor annuities under the civil service retirement program, and for other purposes; with an amendment (Rept. No. 91–1469). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOLIFIELD: Joint Committee on Atomic Energy. H.R. 18679. A bill to amend the Atomic Energy Act of 1954, as amended, to eliminate the requirements for a finding of practical value, and for other purposes (Rept. No. 91–1470). Referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MILLS (for himself and Mr. BYRNES of Wisconsin):

H.R. 19444. A bill to authorize for a temporary period the expenditure from the airport and airway trust fund of amounts for the training and salary and expenses of guards to accompany aircraft operated by U.S. air carriers, to raise revenue for such purpose, and to amend section 7275 of the Internal Revenue Code of 1954 with respect to airline tickets and advertising; to the Committee on Ways and Means.

By Mr. ADDABBO:

H.R. 19445. A bill to provide for the establishment of the Gateway National Recreation Area in the States of New York and New Jersey, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BELL of California (for himself and Mr. HAWKINS):

H.R. 19446. A bill to assist school districts to meet special problems incident to desegregation in elementary and secondary schools and to provide financial assistance to improve education in racially impacted areas, and for other purposes; to the Committee on Education and Labor.

By Mr. BOW:

H.R. 19447. A bill to protect the personal security and academic freedom of students, faculty, staff, and other employees of institutions of higher education by requiring the adoption of procedures by the States to govern the treatment of disruptive campus violence by students, and other employees, as a precondition to Federal assistance, and to assist such institutions in their efforts to prevent and control campus disorders; to the Committee on Education and Labor.

By Mr. BURTON of Utah:

H.R. 19448. A bill to amend title VII of the Public Health Service Act by providing for the establishment of a family physician scholarship and fellowship program; to the Committee on Interstate and Foreign Commerce.

By Mr. FISH:

H.R. 19449. A bill to provide for a temporary reduction in the salaries of certain officials of the Federal Government; to the Committee on Post Office and Civil Service.

By Mr. HANNA:

H.R. 19450. A bill to amend the Internal Revenue Code of 1954 to impose a manufacturers excise tax on mood drugs and to earmark the proceeds for drug education, research and rehabilitation; to the Committee on Ways and Means.

By Mr. STANTON:

H.R. 19451. A bill to amend the Social Security Act to provide for medical and hospital care through a system of voluntary health insurance financed in whole for low-income groups, through issuance of certificates, and in part for all other persons through allowance of tax credits, and to provide a system of peer review of utilization, charges, and quality of medical service; to the Committee on Ways and Means.

By Mr. VANDER JAGT:

H.R. 19452. A bill to protect the civilian employees of the executive branch of the U.S. Government in the enjoyment of their constitutional rights and to prevent unwarranted governmental invasions of their privacy; to the Committee on Post Office and Civil Service.

By Mr. VANIK (for himself, Mr. BELL of California, Mr. BROWN of California, Mr. FARBSTEIN, Mr. FRASER, Mr. GUDE, Mr. HARRINGTON, Mr. KOCH, Mr. LOWENSTEIN, Mr. MCCLOSKEY, Mr. MIKVA, Mr. OTTINGER, Mr. REID of New York, and Mr. REUSS):

H.R. 19453. A bill to amend the Clean Air Act to provide for a more effective program to improve the quality of the Nation's air; to the Committee on Interstate and Foreign Commerce.

By Mr. BROYHILL of Virginia (for himself, Mr. FUQUA, Mr. GUDE, Mr. HOGAN, Mr. NELSEN, Mr. O'KONSKI, Mr. SCOTT, Mr. SMITH of New York, Mr. SPRINGER, Mr. THOMSON of Wisconsin, and Mr. WINN):

H.R. 19454. A bill to increase the borrowing authority of the District of Columbia and to direct a study by the Secretary of the Interior leading to the establishment of an appropriate area or regional entity to regulate and control the water pollution problems in the Washington metropolitan area and the water resources for such area and to provide at reasonable costs water, sewer, sanitation, and related services for such area; to the Committee on the District of Columbia.

By Mr. FOREMAN:

H.R. 19455. A bill to require administration officials of institutions of higher education receiving Federal funds to maintain order on campus; to the Committee on Education and Labor.

H.R. 19456. A bill to provide a period of suspension, from attendance at any institution of higher education receiving Federal funds, of students who engage in destruction of property during campus disorders; to the Committee on Education and Labor.

H.R. 19457. A bill to establish liability of persons engaging in destruction of property at educational institutions; to the Committee on the Judiciary.

H.R. 19458. A bill to amend the Social Security Act to prohibit the imposition of any requirement, that a physician disclose privileged information or medical records in connection with the medicare or medicaid program; to the Committee on Ways and Means.

By Mr. PRICE of Texas:

H.R. 19459. A bill to authorize the creation of a National Commission on Individual Rights; to the Committee on the Judiciary.

By Mr. RARICK:

H.R. 19460. A bill to prohibit the expenditure of Federal funds by the Secretary of Health, Education, and Welfare to promote the use of drugs in public school systems; to the Committee on Education and Labor.

By Mr. SCHEUER (for himself, Mr. COWGER, and Mr. POLLOCK):

H.R. 19461. A bill to promote public health and welfare by expanding, improving, and better coordinating the family planning services and population research activities of the Federal Government, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. TAFT:

H.R. 19462. A bill to amend the Internal Revenue Code of 1954 to permit the exclusion from gross income of a portion of the compensation received by full-time law enforcement officers and firemen employed by State and local governmental instrumentalities; to the Committee on Ways and Means.

By Mr. TIERNAN:

H.R. 19463. A bill to amend title II of the Social Security Act to provide in certain cases for an exchange of credits between the old-age, survivors, and disability insurance system and the civil service retirement system so as to enable individuals who have some coverage under both systems to obtain maximum benefits based on their combined service; to the Committee on Ways and Means.

By Mr. WHALLEY:

H.R. 19464. A bill to amend section 139 of title 23, United States Code, relating to additions to the Interstate System; to the Committee on Public Works.

By Mr. DICKINSON:

H.R. 19465. A bill to authorize the granting of oil, gas, and other hydrocarbon substances, and all rights in connection therewith and pertaining thereto, to certain homestead patentees who were wrongfully deprived of such property and rights; to the Committee on Interior and Insular Affairs.

By Mr. ICHORD:

H.R. 19466. A bill to clarify the coverage status under the old-age, survivors, and disability insurance program of certain service performed after 1950 and before 1969 by auto license agents of the Department of Motor Vehicles of the State of Missouri; to the Committee on Ways and Means.

By Mr. NEDZI:

H.R. 19467. A bill to provide a program of national health insurance, and for other purposes; to the Committee on Ways and Means.

By Mr. NICHOLS:

H.R. 19468. A bill to authorize appropriations for public lands highways for fiscal years 1972 and 1973; to the Committee on Public Works.

By Mr. BINGHAM:

H. Con. Res. 750. Concurrent resolution authorizing the placing of a bust or statue of Martin Luther King, Jr., in the Capitol; to the Committee on House Administration.

By Mr. HORTON:

H. Con. Res. 751. Concurrent resolution urging the President to determine and undertake appropriate actions with respect to stopping armed attacks on aircraft and passengers engaged in international travel; to the Committee on Foreign Affairs.

By Mr. LANGEN (for himself, Mr. BERRY, Mr. COLLINS, Mr. GRIFFIN, Mr. ABERNETHY, Mr. LUKENS, Mr. FLOWERS, Mr. GETTYS, Mr. RARICK, Mr. O'NEAL of Georgia, and Mr. ROUSSELOT):

H. Con. Res. 752. Concurrent resolution expressing the sense of Congress with respect to sanctions against Rhodesia; to the Committee on Foreign Affairs.

By Mr. ICHORD:

H. Con. Res. 753. Concurrent resolution authorizing the printing of additional copies of publication entitled "Supplement to Cumulative Index to Publications of the Committee on Un-American Activities 1955 through 1968 (84th through 90th Congresses)"; to the Committee on House Administration.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. MATSUNAGA introduced a bill (H.R. 19469) for the relief of Mr. and Mrs. Logan Porter Dickinson, which was referred to the Committee on the Judiciary.

# EXTENSIONS OF REMARKS

## MILITARY CUTS WOULD BE "INVITATION TO WAR"

### HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. BOB WILSON. Mr. Speaker, the clamor of the antidefense spending lobby has grown increasingly loud and vocal in recent months and some press accounts tend to further distort the true picture of our Federal outlays for defense and domestic programs. Dr. Roger Freeman, Stanford University professor and former special adviser to President Nixon, made several cogent observations on this issue in his recent radio remarks. Professor Freeman's analysis casts a more balanced light on the military spending question and emphasizes how many overlook the serious consequences of a decline in our defense posture. I know my House colleagues will find the following article by Ray McHugh, Copley News Service, of particular interest:

TEACHER SAYS FURTHER DEFENSE BUDGET CUTS WOULD BE "AN INVITATION TO WAR"

(By Ray McHugh)

WASHINGTON.—A Stanford University professor and former special advisor to President Nixon says further cuts in the nation's defense budget would be "an invitation to war."

He also attacks the premise that defense spending has crippled U.S. educational programs.

In remarks recorded for a national radio program today (Sunday), Dr. Roger A. Freeman denies claims by Pentagon critics that the tight national budget is a direct result of increased military spending and that if arms costs are reduced education spending can be increased.

In the 1968–1971 fiscal budget period, Freeman says, defense spending has been cut 9 per cent while outlays for education and other social programs have risen 47 per cent and all other federal expenditures are up 21 per cent.

The 49 per cent increase in defense expenditures since 1953, he says, is approximately equal to the increase in prices, wages and other national economic factors using the same period.

But during the same 17-year period, spending for Health, Education, Welfare and Labor increased 944 per cent, he says, and the cost for all other government operations has risen 82 per cent.

While the defense share of federal revenues and of the gross national product has been almost halved since 1953, Freeman claims, "most of the huge savings were applied to social purposes, with education one of the main gainers."

"To slash our badly depleted defense establishment even faster or further in this troubled world," he says, "would risk the nation's very existence in an irresponsible manner and be an invitation rather than a deterrent to war."

Freeman says unrest in the nation's schools has for the first time shaken "the profound faith of the American people in their educational institutions and their belief in the wisdom of our educational leaders and in the soundness of their goals and practices." Faith, he says, has turned to "doubt and even outright disapproval."

"If a vote of confidence were asked from the people across this nation in the management and policies of their educational institutions, it would in most states no longer be as favorable as it would have been twenty, ten, or even five years ago."

This applies, he adds, not only to some prominent universities and colleges, but also to high schools and elementary schools.

Pointing out that public school enrollment has increased 88 per cent, or from 25 million to 47 million students, since 1950, Freeman said that school financial support jumped from $5.4 billion to $38.5 billion in the same 20 years.

About 93 per cent of the $33 billion of this increased financial support came from state and local governments.

"Nothing testifies more clearly to the continued effectiveness of the traditional American way of government by the consent of the governed," says Freeman.

Noting that enrollment growth in the public schools is ending in most U.S. cities, with little or no increase projected for the 1970s unless private schools are forced to close, Freeman says school funding problems should begin to ease "if the public schools can retain—or, in many cases, regain—the confidence and goodwill of the communities they serve."

## JBS NO LONGER AN ISSUE IN 24TH

### HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. McCLOSKEY. Mr. Speaker, of the various political organizations in America identified over the years as part of the "right" sector of the political spectrum, I suppose I have disagreed more often than most with the positions taken by the John Birch Society. Indeed, I cannot recall a single one of the society's published political efforts with which I have concurred.

Nevertheless, a number of patriotic American citizens belong to the society, and particularly one of my close friends of many years, our colleague JOHN ROUSSELOT from California.

I have known JOHN as an honest, hard-working, and dedicated American since high school days and was accordingly pleased to note the following recent editorial about JOHN and the Birch Society in the San Gabriel Valley Daily Tribune:

JBS NO LONGER AN ISSUE IN 24TH

Voters in the 24th Congressional District have resoundingly registered their support of John Rousselot. Tuesday they gave him a 2–1 margin at the ballot box and sent him on his way to Washington to represent them for the duration of Glenn Lipscomb's unexpired term.

It is not surprising that Rousselot won in the preponderantly Republican district. Nor is it surprising that voter turnout in the special election was relatively light.

If there was one thing to be learned from this special election, it is, we believe, that membership in the John Birch Society is no longer an issue as far as most voters in the 24th Congressional District are concerned.

Residents have been hearing this attack on Rousselot for a decade. We were among those who questioned his ability to represent the interests of the district while having an allegiance to the JBS in 1961. But, since that time the people of the district have learned much more about what the JBS is and what it is not. This, we believe, has led most voters to discount JBS membership as a threat to responsible representative government.

If voters had retained a suspicion of the JBS and its effect on John Rousselot, there would have been a huge turnout at the polls, and the vote would have been much closer.

Admittedly, other factors entered into the voting and non-voting. But, in our opinion, Rousselot goes to Washington with the firm support of his district. During the next few months he can firmly entrench himself as unbeatable in November upset. At this time we see little likelihood of his stumbling.

## BLATANT DOCTOR SHORTAGE IN RURAL AREAS

### HON. LAURENCE J. BURTON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. BURTON of Utah. Mr. Speaker, one of the greatest problems which afflicts many areas of rural America today is a shortage of trained medical practitioners.

The census figures show that in most rural areas, population is leaving and migrating to the cities, where employment opportunities are thought to be greater.

This has been especially true in the past few years with doctors.

The old family doctor, who used to be a fixture in the small communities of our Nation, is beginning to be rather hard to find.

In my home State of Utah, there is an area in the southern part of the State, comprising Wayne, Piute, Sevier, and Garfield Counties, which is large in territory but rather short of people.

Only a few years ago, this area had nine doctors. Today it has two. The doctor-population ratio in Utah as a whole is 1 to 1,160; in this four-county area it is 1 to 10,000.

Today I am introducing a bill which would provide scholarships and fellowships to medical students who pledge to spend some years after graduation working in the rural areas of our Nation.

I would also like to insert in the RECORD a telegram from the Standard-Examiner, in my home city of Ogden, which lauds a program which authorizes Federal funds for medical schools that establish separate departments for teaching family medicine.

As the editorial points out, the University of Utah College of Medicine has already established a new department of community and family medicine and is ready to take advantage of this Federal funding should it become available.

I would also like to call attention of my colleagues to the fact that two com-

munities, at least, in my State have also learned that community effort helps attract doctors to their area.

The towns of Roosevelt and Gunnison, both in rural sections of Utah, have worked to provide new and modern hospital and medical facilities in their cities—with the help of medical practitioners who already live there.

These new facilities have resulted in attracting other doctors to the area and will, in the future, attract more, solving one of the problems created by the shortage of medical skills in rural areas.

The Ogden Standard-Examiner editorial, to which I commend your consideration and attention, is as follows:

[From the Ogden (Utah) Standard-Examiner, Sept. 17, 1970]

CONGRESS AIMS FOR MORE FAMILY DOCTORS

The U.S. Senate this week approved a bill that would have a beneficial effect on the health of the United States, particularly for residents of sparsely populated areas like ours.

The aim of the legislation, the AP reports, is "to head off extinction of a vanishing American breed—the family doctor."

Members of the U.S. House of Representatives are now being asked to consider the measure. We strongly urge that our congressmen get behind the bill—SB3418—and insist that it be taken out from under the present log jam of pending legislation and receive a favorable vote at the current session.

The proposal would authorize the appropriation of $425 million through fiscal 1975 for medical schools that establish "separate and distinct" departments for teaching family medicine.

It would provide a badly needed impetus for family doctors or, as they are frequently called, general practitioners. This field has, the senator rightly insists, been all but neglected over the past 30 years, an age of medical specialization.

Fortunately for Utah, if the bill does pass the House and necessary appropriations are made, our state is ready for this revival of family medicine.

Effective last July 1, the University of Utah College of Medicine established a new Department of Community and Family Medicine. This department ranks equally with the college's other three, traditional departments—those of surgery, medicine and pediatrics.

Under this framework, the University of Utah is already in an excellent, forward-looking position to participate in any federally encouraged training of family doctors.

This is no coincidence.

The Governor's Conference on Health made this recommendation some time ago and the Utah Legislature provided necessary financing for the Department of Community and Family Medicine to be started.

The college, university and their advisors realized that a general practitioner—the family doctor—usually serves as the point of first contact for those who need medical assistance. About the only common exception is an accident where victims are taken to a hospital's emergency ward.

A family physician is trained to consider the total health care needs of all family members, referring them to specialists as appropriate.

"The family physician," explained one Utah expert in the field, "is the leader, the coordinator of the health care team. This type of physician normally manages 85 per cent of personal medical problems. He gets to know the family and considers all aspects of the individual environment in their treatment. And he knows their full medical history."

Many Utah communities now have no resident doctor. In the parts of our state—or Wyoming, Nevada, Idaho or Montana—where the distances between towns is considerable, this is a critical shortage.

Few young medical school graduates have wanted to practice in the small towns, when they saw the life style of the remaining general practitioners—busy from before dawn to after dark, frequently roused out at night but still making less money than their city colleagues.

So most new doctors have headed for the big cities.

If medical colleges produced more family physicians, the burden in the small towns could be shared. Each doctor could live a reasonable life and have time—not available now to the overworked general practitioners—to continue his medical education. They'd have a better income, too, because their fellow townsmen would be less inclined to seek "outside" medical help.

This renewed emphasis on family physicians in Congress, at the University of Utah College of Medicine and in cooperating hospitals could pay rich dividends.

The program will go forward without Congress' help, we recognize. But with enactment of the Bill and adequate financing of its provisions, the day will come even sooner when Americans can count on the services of a family physician when he—or she—is needed.

## KLEO COMMENTS ON THE PRESIDENT'S KANSAS STATE SPEECH

### HON. GARNER E. SHRIVER

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1970*

Mr. SHRIVER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial comment aired on radio station KLEO Wichita, which appropriately discusses the recent speech by President Nixon at Kansas State University in Manhattan as contrasted to the first national wire service reports on the event. The editorial was written by Frank M. Edmondson, Jr., a member of the KLEO news staff.

The editorial follows:

EDITORIAL COMMENT ON KLEO WICHITA, KANS.

President Nixon spoke in Manhattan today. Those who listened to the speech on radio, on television and in person—witnessed a strong speech delivered by him. Hecklers tried to drown out the President—there were about fifty in all—but the spontaneous ovations by the majority of the 15,000 plus persons at the Ahearn Fieldhouse on Kansas State's Campus drowned out the fifty easily. The enthusiasm was shared so much by the President, that at one time during the speech, he said this:

"The destructive activists at our colleges and universities are a small minority . . . My text at this point reads: '. . . their voices have been allowed to drown out the responsible majority.' That may be true in some places but not at Kansas State."

The comment was followed by a standing ovation.

However, the first national story on the speech released by United Press International showed quite a different side to the scene. Here is the story in its entirety:

"MANHATTAN, KANS.—About 50 dissidents interrupted his speech with shouted questions and obscenities as President Nixon warned today that American colleges risk losing public support unless they curb violence by 'destructive activists.' Mr. Nixon made his strongest remarks so far about radical student dissent in a speech at Kansas State University. As the dissenters tried to shout him down, Mr. Nixon called on responsible students and faculty members to 'stand up and be counted.' And he urged the hecklers to be willing to listen to someone without trying to shout him down."

That United Press International news story didn't make this particular KLEO Newsman happy. A letter has been written by this reporter to be sent to the President of the United Press International, with copies also to be sent to President Richard M. Nixon, Governor Robert B. Docking, Senator Bob Dole, Senator James Pearson. Congressman Garner Shriver and other dignitaries in public office.

## LAWS THAT DO NOT WORK

### HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. DINGELL. Mr. Speaker, pursuant to permission granted I insert into the CONGRESSIONAL RECORD an excellent editorial appearing in the Altoona, Pa., Mirror on Wednesday, July 22, 1970, pointing out the simple, self-evident truth that "gun control laws, of themselves, do little to retard the growth of crime."

I hope this will be of assistance to my colleagues in consideration of the continuing flow of legislation aimed at stripping law-abiding citizens of their right to possess arms for legitimate sporting and defense purposes.

The article follows:

LAWS THAT DO NOT WORK

Gun control laws, of themselves, do little to retard the growth of crime. Of the nation's 12 largest cities, four were covered by total firearms registration during the first half of 1969. Four more were under local or state laws requiring permits to buy or transfer handguns. One had an ordinance covering all firearms transfers. Three of the nation's largest cities, by contrast, had no local or state laws rigidly restricting the sale of firearms.

Among the cities with controls, New York City, Chicago, Washington, D.C. and San Francisco have, perhaps, the stiffest firearms laws. In these cities, the homicide rate during the first half of 1969 ranged from a six per cent increase in New York to a 102 per cent increase in San Francisco.

Five of the nation's largest cities with gun controls of varying stringency showed alarming increases in homicides, ranging from 53 per cent in Cleveland to 18 per cent in Philadelphia.

The other three of the nation's largest cities—Los Angeles, Houston and Milwaukee—having the least restrictive gun laws came up with these figures for the first half of 1969. Los Angeles, murders up 14 per cent; Houston, murders decreased five per cent; Milwaukee, murders decreased 18 per cent.

The foregoing are facts from figures compiled from the FBI Uniform Crime Report. They bear out the belief of Dr. Bruce Danto, director of the Detroit Suicide Prevention Center, that "gun control is not the answer" to the rising tide of violence in cities.

The sad truth is that many freedom-destroying laws aimed at law-abiding citizens are passed in an emotional fury; and, after passage, no one ever takes the time to appraise their effectiveness. It is much easier to pass another law than to remove a bad law from the statute books.

## FAD DIETS

### HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. WOLFF. Mr. Speaker, yesterday I included in the RECORD several statements submitted in writing to my able colleague, the gentleman from New York (Mr. BIAGGI), and me for a hearing we held earlier this month on fad diets, food myths, diet pill abuse and nutrition. Previously, I had placed into the RECORD the testimony of the witnesses who attended our hearing in New York City. Today, I would like to conclude this five-part series with the remaining statements submitted to us:

STATEMENT ON FAD REDUCING DIETS

(By Hazel Schoenberg, Good Housekeeping)

My name is Hazel Schoenberg. I am the Associate Director of the Bureau, a department of Good Housekeeping Institute. In this position I am involved in the editorial supervision of the You & Your Diet section of the magazine and I co-ordinate the test-kitchen and laboratory investigation of food products submitted for advertising. You & Your Diet is a monthly feature of Good Housekeeping devoted to information on family meal planning as well as low-calorie and therapeutic diets. I have a MS degree in nutrition and am a member of the American Dietetic Association. I have worked as a therapeutic dietitian in a teaching hospital and for five of my eight years at Good Housekeeping was the dietitian on the Bureau staff.

You have asked for my comments on the specific subject of fad reducing diets—the areas of greatest abuse and what should be done to correct these abuses. As a professional dietitian working for a women's service magazine, one of my main concerns is teaching homemakers to select well balanced meals that also meet their needs in terms of food preferences and cost as well as dietary problems. We at Good Housekeeping use the Basic Four as the meal-planning guide in developing all menus and meal plans. A tear sheet from the magazine explaining the Basic Four is attached. This standard is also used by governmental agencies, the American Dietetic Association, etc. to evaluate dietary adequacy.

The only difference between regular and low-calorie meals is in the calories; both should provide all needed nutrients. The Basic Four plan can be used for both regular and low-calorie diets. But a good reducing diet will, of course, contain few enough calories that the dieter will lose weight. At the same time caloric intake must be adequate to provide energy for basic metabolic needs. Twelve hundred calories for women and 1800 for men are commonly used levels.

A successful program should have three objectives, beyond the obvious one assuring weight loss.

1. It must produce weight loss at a safe, moderate pace.

2. It must offer variety, so that there's pleasure in dining as well as hunger satisfaction.

3. It must teach new and enjoyable eating habits, so that the dieter won't fall back into the old weight-gaining eating patterns. All the fad diets fail in these three additional objectives; many also fail in the primary goal of making the dieter lose weight.

All low-calorie fad diets currently popular are based on one of two principles: They are (1) low in carbohydrate and high in protein or (2) low in protein. The attachment, "Why Fad Diets should be Avoided," from the May 1970 Better Way section of Good Housekeeping explains the basis of 10 most popular fad diets, and the prime nutritional deficiencies of each. Summing up from this article, the prime disadvantages of the low-carbohydrate, high-protein diet are as follows: Lack of carbohydrate can lead to a condition called ketosis caused by the improper metabolism of fats. Fats cannot be metabolized properly when they are eaten without carbohydrate. Perhaps the most immediate danger to one's health on these diets, however, comes from ingesting too much saturated fats found in meat and dairy products. Saturated fats tend to raise blood-cholesterol levels. More than half the total fat intake in a normal diet should come from vegetable sources, which contain carbohydrate and polyunsaturated fats. This requirement is difficult to meet on a low-carbohydrate diet.

Five examples of high-protein, low-carbohydrate diets are: The Doctor's Quick Weight-Loss Diet, Calories Don't Count Diet, Air-Force, Mayo, and Drinking Man's Diet.

In the case of low-protein diets the nutritional imbalances take a different form but still are potentially dangerous in the following ways, again paraphrasing from the Better Way article: Protein, found in every living cell, is needed for growth and to build and repair worn-out tissues. When there is too little protein intake, the body excretes more protein than it takes in. Then the protein from lean muscle tissue has to be used for body maintenance. On low-protein diet, most weight loss is due to loss of lean muscle tissue, not the fat the dieter should lose. High protein foods are also a prime source of many essential vitamins and minerals. One of the dangers of ingesting too few protein-rich foods is the possibility of anemia resulting from the lack of iron as well as lack of protein itself. Essentially, most low-protein diets are a form of malnutrition.

The low-protein diets include The Doctor's Quick Inches Off Diet, The Banana and Skimmed Milk Diet, The Famous Rice Diet and, of course, all starvation diets.

I agree that there are specific health dangers to fad reducing diets, but I am not aware of any data which show the amount of illness actually caused by the diets. Surely some diabetic conditions, heart attacks or bouts with gout must be precipitated by the fad diets but it is virtually impossible to pin down the causes. I know that at least one girl has starved herself to death on a fad diet. But for the healthy general population, the greatest danger of fad diets is not physiological. The greatest danger is in leading the dieter away from sensible, balanced meals.

By emphasizing speed and ease of weight loss, fad diets set unrealistic standards. The dieter is kept from recognizing and accepting the fact that losing weight requires eating less than the body uses, and that this is a slow and painful process. The constant emphasis on quick weight loss discourages the dieter from accepting the need to pace dieting so the body can adjust to the decreasing food intake and weight.

For those who tend to gain weight, dieting should be a style of living rather than an on-again, off-again project. Weight should constantly be kept within bounds. Physicians believe that wide weight fluctuations place great stress on the system and are more dangerous to the health than moderate overweight. Keeping the weight within bounds requires sensible eating habits that balance the calorie expenditure against daily activity.

Also, fad diets completely shift the emphasis to dieting and away from exercise. Americans have become so comfort and transportation oriented that they don't even walk around the golf course any more. The National Research Council of the National Academy of Sciences recognized the need for more exercise in the explanatory information included with the Recommended Dietary Allowances. They wrote: "It is likely that a higher level of health would be reached if the population were more physically active. There is growing evidence that a sedentary life contributes to degenerative arterial disease, as well as to obesity and its many complications, notably diabetes mellitus."

Thus the greatest problem with the fad reducing diets is the negative effect they have on teaching Americans to eat sensibly. Teaching nutrition—even at the fundamental level of the Basic Four—is extraordinarily difficult. And nutritionists have failed. We spend most of the time talking to ourselves. But every time a doctor or anyone else publishes his latest miracle diet, it becomes more difficult to get consumers to realize that calories *do* count or that eating fewer calories than the body uses is the only way to lose weight.

What should be done to correct these abuses?

The long-term solution is education of consumers to appreciate the workings of the body, and the system of checks and balances that function in weight maintenance. In general terms, this educational campaign must be carried on throughout the school years and featured in the media. Public relation experts need to take a hand. Making nutrition an "in" thing would be the easiest way to sell it.

The approach must be soft-sell and fun. For example, any sensible individual hates exercise for exercise's sake. My personal mental image of exercising is touching my toes to bagpipe music in a school gym. If exercising had been fun then, I would be more active now. Similarly, if the foods that were good for me tasted better then, I would be less interested in candy and empty calorie goodies now. But education is a long-term goal which hopefully has been given a new life through the White House Conference on Food, Nutrition, and Health and the new consumer awareness of nutrition.

But what can be done now?

*The foods people are eating can be made more nutritious.* I don't believe in indiscriminate fortification of foods. But we desperately need guidelines for fortification. These guidelines could lead to the improvement of foods in many ways. Perhaps the least controversial would be the enrichment of all bread and cereal products to the level of the whole grain. This would include crackers, cake mixes, pretzels, etc. Some foods might also be fortified to higher than "natural" levels. Cereals are a prime candidate because the technology is simpler and the cereal companies are already leaders in this field. But before these enrichment and fortification programs are started, we must have guidelines. Accelerating vitamin wars—"my" orange drink has 200 times the MDR for vitamin C and "yours" has only 100 times are absurd, expensive, and dangerous. Guidelines would allow the most efficient use of vitamins and mineral fortification without the dangers of overdosing.

I see no way of preventing the circulation of fad diets unless it is related to an undefined commercial tie-in. The Calories Don't Count Diet is the classic of this type. Our principles of free press and free speech prevent (and should prevent) the suppression of cockamamie diets. I think most nutritionists realize that we have to face this frustrating proliferation of fad diets becaues we have been unable to answer the diet needs of the public. We have awakened them to the need for good nutrition without showing them how to plan the diets.

*Standards for low-calories foods* would help the consumer select and evaluate foods. The proposed standard that a modified low-calorie version of a food provide a maximum of 50 per cent of the calories of the regular food is an excellent example of a useful standard. These standards should also cover the full range of diet terms. For example, many products are labeled "dietetic." The

consumer associates "dietetic" with low-calorie. These products may be low in sodium or be sugar-free, but not lower in calories. "Dietetic" products are needed but they should be labeled to make it obvious how they differ from regular foods.

*It would be extremely helpful if the calories per serving were included on all food labels.* This would allow the dieting consumer to select regular foods which are comparatively low in calories. And it would reinforce the concept that ordinary foods can still be used on a reducing diet. Special low-calorie products are valuable in supplementing the normal choice of foods available to the dieter. But they are usually more expensive because they are produced in a small volume and for a specialized market. The flavor sometimes is third-rate at best. Consumers prefer to use regular products on their reducing diets but they aren't told how to do it. Calories per serving on packaging would be a good start.

To sum up: Any program to limit fad diets must broaden its goals to consider the entire problem of nutrition education. Consumers desperately want information about foods and diets. A large percentage of the information they do find is inaccurate, incomplete, or slanted. Just a tiny fraction of the remaining accurate information is presented in a form the homemaker will understand or even want to read. We must start with the basic concept of variety in the diet. It can be called food families, a smorgasbord of foods, or the Basic Four but the purpose is the same: broaden the selection of foods made by the homemaker.

---

STATEMENT BY VARNUM D. LUDINGTON, VICE PRESIDENT, GENERAL FOODS CORP.

The dictionary defines "fad" as a "custom, amusement, or the like, followed for a time with exaggerated zeal; a craze." By definition, then, one expects fads to be interesting, to be fun, and to add zest to life; they season the monotonous daily routine. But the dictionary is no help in distinguishing one fad from another or in assigning relative values to different fads.

This can be serious, because faddism in some areas of life is dangerous and undesirable. One such important area is our food and eating habits. In these the pursuit of fads is totally out of place. Doctors, nutritionists, dietitians, and food scientists know this. Nevertheless, promoters of food and diet fads thrive in our society, magnifying the benefits of certain foods and reducing public confidence in conventional foods and dietary habits.

The reason food faddism is inappropriate lies in the 50 to 60 nutrients the human body needs to remain healthy and grow. They come from the food we eat. They should come in constant and regular supply. Their respective contributions to human health and growth must be judged in concert with each other. Thus it is not basically a question of what is ingested at one meal or another, or in one day or another. What is important is that the pattern of nutrients ingested is in balance. There should not be too much or too little of any nutrient for any length of time. The ideal healthy diet includes a variety of foods every day to maintain a balance of nutrients. This disqualifies at the outset the familiar claims of food faddists for the magical quality of certain foods. A helpful rule of thumb is this: If a little of a nutrient is good, it does not follow that a lot is better.

Indifference to this commonsense principle is probably one reason that food fads and food quackery have plagued mankind through the centuries. It is a little harder to understand why today, with the rising level of education, so many people continue to become the victims of food fads and faddists. And the volume of victims is high. About seven years ago it was estimated that illegal medical and food quackery cost the American public about one billion dollars a year (*Fads, Myths, Quacks—and Your Health*. Jacqueline Seaver. Public Affairs Pamphlet No. 415. Public Affairs Press. Washington, D.C.). It is surely higher today.

The food faddist's most vulnerable target is found among the people suffering from a seriously disabling or fatal ailment. They will often seize on almost any nostrum in the hope of finding relief; the exploitation they are subject to is scandalous. To make deception easier, some foods and diets do have definite restorative value in certain situations. They are prescribed by physicians or dietitians and their good effects are, of course, publicized. The fact is enough to lend credibility to the food faddist when he comes along with his "curing" food or diet. The chances are overwhelmingly in favor of it being one of the many hundreds without significant curative properties.

The great majority of the food faddist's victims, however, is a part of the general public. With them it is a simple question of nutrition and its connection with continuing good health. And what troubles large numbers of them is excess weight. Each year, hundreds of thousands of people undertake diets, with or without a physician's authority and advice, to reduce weight. Special diets and foods have been advocated for this purpose for years. Some of the people they are intended for will eat—or not eat—almost anything in order to lose weight. There's the low fat diet; the high fat diet; the high protein diet; the low carbohydrate diet; the no-potatoes diet; the drinking man's diet; the safflower oil capsule diet, and on and on and on. Not to mention a variety of pills and tablets assuring their purchasers of the desired end.

The public should be wary of any and all of these. There is no easy road to reducing body weight. A doctor is better qualified to speak to the individual consequences of any one of the available weight-reducing systems.

As a food scientist I know that calories do count and that it is hazardous to plan to reduce calories without carefully considering the overall supply of nutrients. The only reasonable solution to overweight is to go on a medically recommended regimen that includes a proper balanced diet, regular exercise, and other good living habits.

Another appeal of the food faddist is established by charging that our soil is wearing out through being depleted of nutrients—so thoroughly, it is said, that crops grown on such soil are nutritionally inferior. The charge is further extended. It says that manufactured fertilizers—chemical fertilizers, in other words—are poisoning the soil and crops grown under these conditions are not healthful. The recommendation is that only organic fertilizers should be used.

Our soils, however, are not tired or devitalized. Crops grown on soil enriched by inorganic fertilizers are no less healthful than any other kind. The use of these manufactured fertilizers has enormously multiplied yield of food. It is also worth mentioning that organic fertilizers are also composed of chemicals—but not mixed in a laboratory or factory.

The suspicion of foods that have been processed in any way is quite unjustified. There is nothing damaging to health in canned or frozen foods, for example. Whole wheat bread is no more nourishing than enriched white bread; a nutritional analysis of the two foods show them to be almost identical in their composition and level of nutrients. Whole wheat bread is good. So is enriched white bread; a nutritional analysis of the foods and natural vitamins have no advantage over manufactured foods and vitamins. The "magical" potency of natural foods so-called is a myth without scientific substantiation.

The list of dietary panaceas is long, and for every item discredited and stricken from it others are waiting to be added. There was Royal Jelly from bees for rejuvenation and sexual stimulation . . . honey to cure cancer . . . apple cider vinegar for weight reduction . . . alfalfa to cure arthritis. The list itself is a monument to human gullibility. This is not to say that these foods are without nutritional value. But it is seriously misleading to claim exceptional value for them over other nutritional foods in the diet. The public then is encouraged to substitute them for more healthful foods.

No favor is done anyone when food faddists convey such misinformation. Sound nutrition understanding is either retarded or undermined. There is also the matter of the exaggerated prices that are asked for health food products. Often the person who can least afford such prices is the most susceptible to the faddist's salesmanship. A corollary result follows, too. The case for special foods and diets is usually so skillfully put that the buyer, once persuaded about their value to him, becomes convinced normal foods are not good for him. He rejects them, and is thus cheated out of the good nutrition he could otherwise have had from a much less expensive diet.

There are widespread pockets of nutritional deficiency in the United States, occurring at all levels of society. One attack against this condition is to dispel the widespread ignorance of nutrition that exists. The public must be better informed about nutrition and about selecting a balanced diet. This goal will continue to be obstructed so long as faddist food diets enjoy their present popular acceptance and credibility.

---

STATEMENT OF COSMOPOLITAN MAGAZINE

(By Joan Dunn, Dieters Notebook editor)

I think that the greatest area of abuse regarding fad diets is the alacrity with which the American public accepts them. These diets nearly always promise amazingly swift weight loss with little effort. They may be made dangerous by the concurrent use of so-called diet pills, which are amphetamines and should properly be taken only under doctor's care. Diet pills taken without proper medical supervision can be fatal.

The greatest area for improvement regarding dieting, I believe, is the proper education of the American public, particularly adolescents, on the subject of nutrition. American eating habtis are atrocious. We consume an inordinate amount of fats, starches and useless calories—calories that are weight-forming, but not body-building. The eating is easy, so people think that the losing should be easy too. Enter the fad diet, the use of pills.

Finally, it should be widely and constantly publicized by the government, by the medical profession and the news media—that there is really only one way to lose weight: eat less and exercise more. And that means eating nutritionally while eating less, and exercising wisely and consistently.

Implicit in any serious weight loss is the individual's determination to change his eating habits forever. Only his own will power can effect that change, not any fad diet or pill.

---

STATEMENT OF HARVARD UNIVERSITY SCHOOL OF PUBLIC HEALTH

*Dieting Companies, Fad Diets and Diet Foods:* An increasingly popular method of dieting, especially among women, is to enroll in the courses given by dieting companies. These usually involve the patient or customer paying a fee to obtain the special dietary regimen advocated by the company (which, by the way, is usually fairly sensible) and to have the privilege of attending weekly meetings giving her advice and counsel in dieting. Suitably monitored and regulated, such companies may serve a useful role in aiding some Americans in keeping their

weights in line; but I do feel some regulation of their activities is necessary to prevent possible abuses.

One problem is that certain persons who do not realize that they are ill might enroll in such programs thinking their problems were simply due to the fact that they were overweight, and as a result delay seeking medical advice or worsen their condition by going on the diet. I believe that laws at the state level requiring the companies to accept only persons who presented evidence of written approval from their physician might prevent such unfortunate incidents from occurring.

I am also disturbed by the claims which some of these companies' representatives or instructors make at meetings about the benefits of special low calorie food products made by them or by companies with which the dieting organizations have some sort of a tie-in. These claims are sometimes made in such a way that listeners are led to believe that these foods have special metabolic properties, outside of their low content of calorie providing nutrients, which will speed weight loss. Scientifically inaccurate statements are sometimes also made by the instructors about the special virtues of the diets of such organizations. While in my judgment these statements are most often due to real lack of knowledge on the part of the instructors (who usually have little training in the science of nutrition) rather than as a deliberate effort to defraud clients, the instructors are looked upon as authorities and specialists in nutrition by their customers, so that their mistaken notions carry somewhat more weight than those of advice from friends. Since many of these claims are made verbally in meetings rather than on printed material or on package labels, this poses a difficult problem for any sort of regulation. One possible solution might be more adequate staffing of state health departments with public health nutritionists who could serve as a source of scientifically accurate information on nutrition questions. Your own State of New York has one of the finest nutrition divisions in its State Health Department of any state in the country, but most states have sadly neglected public health nutrition efforts of this sort.

---

STATEMENT OF SAMM SINCLAIR BAKER

As an associate of Dr. Irwin M. Stillman (and coauthor), he has asked me to respond to your letter of August 13th, and to convey his thanks for your attention and invitation.

At age 75, he is not taking on any arduous engagements, and cannot appear at your September 8th hearing on "fad diets, food myths, and diet pill abuse."

Regarding a statement on the issue, Dr. Stillman's views are expressed in detail in his book, "The Doctor's Quick Weight Loss Diet." He notes that probably the greatest "abuse" is the common, faulty concept that "balanced dieting" is the only "proper way" to reduce. This myth has kept tens of millions of Americans dangerously overweight—after they piled on burdensome, unhealthy excess pounds due to the heavily promoted fraud that big breakfasts, fat-loaded meals, buttery high-calorie recipes, and rich, sugary desserts are "good for you."

---

STATEMENT OF MOUNT SINAI SCHOOL OF MEDICINE OF THE CITY UNIVERSITY OF NEW YORK

I am happy to submit the following concise statement:

I believe that fad diets represent one of the most surreptitious nutritional problems facing the citizens of our country. People who should lose weight are susceptible to a continuous parade of nutritional and diet-pattern gimmicks.

It is accepted medical knowledge that weight reduction diets must be carefully designed to:

1. Provide all of the essential nutrients in required amounts while at the same time providing caloric deficit.

2. Assure that the dieting process contains elements of proper nutrition education so that dieting is also an educational experience.

3. Accomplish weight loss in such a manner as not to induce nitrogen loss or the loss of vital body electrolytes.

4. Not induce abnormal body chemistries such as high levels of serum cholesterol and triglycerides, which if increased due to prolonged fad dieting on high saturated fat or high carbohydrate diets, might contribute to the risk of the development of coronary heart disease.

To me, the greatest area of abuse is the steady diet of crash weight reduction regimens fed to the American public appearing in lay literature.

The correction of this abuse can be made through nutrition education programs by individual physicians and by professional and public health organizations warning the public against the use of "crash" and unscientifically-designed diets, while simultaneously teaching methods of proper dieting.

---

STATEMENT OF THE AMERICAN MEDICAL ASSOCIATION

(By Philip L. White, Sc. D., Secretary, Council on Foods and Nutrition, American Medical Association)

Mr. Chairman, the Council on Foods and Nutrition is an advisory Committee of the AMA Board of Trustees. In addition to providing policy recommendations to the Board, the Council and the AMA Department of Foods and Nutrition conduct programs in continuing medical education emphasizing clinical nutrition. The AMA is actively interested in public health nutrition and in matters of food composition and use. We welcome this opportunity to comment on certain aspects of fad dieting and weight control.

Among the obese population exists a higher incidence of hypertension, cardiovascular and renal diseases, disorders of the liver and gall bladder, and diabetes mellitus. Obese diabetic individuals, in particular, have a mortality rate almost four times that of non-obese diabetics. Obesity is also a considered hazard for the pregnant woman and for the surgical patient.

Insurance data indicate a positive correlation between weight gain in excess of ten percent over "best weight" and the corresponding mortality rate. The mortality rate increases proportionately to the degree of weight gain; e.g., the mortality is 13 percent greater for men who are 10% over "best weight" but rises to 40 percent for those who are 30% overweight.

Obesity is a disorder which is not easily defined. It is usually assumed that the "normal" or "best" weight for an individual is achieved between the ages of 18 and 25 years. Therefore, any significant positive departure from this "normal range" could be considered "obesity." Height-weight relationships do not always indicate fatness since an individual's build is not necessarily taken into consideration. The proportion of fat in relation to total body weight increases with age and may exceed 50 percent in very obese individuals. The degree of obesity of an individual may be a reflection of both the number of adipose cells in the body and their size. Some recent studies have shown that fat cells may multiply early in life in response to generous caloric intake. More research is needed, however, to determine if the number of fat cells in a person is related to genetics or early infant feeding practices.

To identify a single or simple causative factor for obesity would be an exercise in futility. An association of several factors is likely whether they be genetic, psychological, physiological, or environmental. Regardless of the cause, obesity is a medical problem which requires proper medical supervision. The goal for treatment should be an appropriate weight loss and the maintenance of a desirable body weight thereafter. This can only be achieved if the individual is properly motivated to change his food habits in order to decrease caloric intake as well as to alter activities in order to allow for increased caloric expenditure. For treatment to be effective, the patient must learn to make adjustments and sacrifices and not to rely primarily on medications and other "crutches." Often when treatment is prolonged and dotted with failures, obese individuals will turn to a gadget, a "shed pounds quickly" diet, a pill, or a book which offers an easy and painless reduction of weight.

For this reason, the American Medical Association has attempted, through various media, to inform the profession and public of the latest scientific advances in the area of obesity control.

In a 1947 article published in the Journal of the American Medical Association, it was emphasized that control of obesity was difficult because patients usually demanded treatment that would produce immediate miraculous changes in appearance rather than adhere to a sound weight reduction diet. This type of obese patient is easy prey to anti-obesity drugs. The patient who lacks the motivation and self-discipline needed for the diet-exercise approach is a likely candidate for any drug regimen that promises a loss of weight without the necessity of changing his food and exercise habits. Anti-obesity medications that are made available by drug companies are generally classified into 6 groups: (1) hormones; (2) diuretics; (3) anorexiants; (4) laxatives; (5) sedatives; and (6) anti-pasmodics. While some justification may exist for the short-term use of certain drugs in the management of obesity under medical supervision, the hazards associated with the use of a multiplicity of irrational drugs is not justified.

Recent action by the Food and Drug Administration has greatly reduced the number and nature of drug combinations used in the treatment of obesity. A few years ago digitalis leaf alone or in combination with thyroid hormones was used extensively in the treatment of obesity. The combination has been discouraged and each preparation must carry precautionary labeling warning against its use in programs of weight control.

The treatment of obesity with thyroid hormone can also lead to undesirable effects: (1) thyroid hormone frequently increases the appetite and possibly the consumption of food over and above any beneficial effect of increased metabolic rate; (2) thyroid may precipitate dangerous symptoms associated with thyrotoxicosis, such as palpitation, tachycardia, nervousness, angina pectoris, diarrhea and insomnia; (3) administration of thyroid to a patient with a normal gland can produce undesirable, secondary glandular changes. In addition, prolonged thyroid treatment may lead to hypothyroidism.

There is no rational basis for the use of diuretic drugs in the treatment of simple obesity. The loss of weight produced by diuretics is mainly water which is promptly regained once the diuretic is discontinued.

Perhaps the use of anorexiants in the treatment of obesity rests on a sounder scientific foundation. Most drugs of this type are amphetamine derivaties, the principal ingredient, which supposedly acts by suppressing the appetite. With long term use, anorexiants tend to become less effective and can be habit-forming. These are potent drugs whose benefits should be weighed against these dangers.

The use of laxatives in the treatment of obesity cannot be justified. A constant in-

take of laxatives can lead to a great loss of potassium resulting in serious metabolic disturbances.

It would appear that antispasmodics, by reducing "hunger contractions" of the stomach, would be useful in the treatment of obesity. The side effects associated with a truly effective dose of this drug, however, would be unacceptable to the patient.

The proper diagnosis and treatment of obesity can best be accomplished through continued efforts to inform and educate. The American Medical Association frequently focuses attention upon those irregular practitioners and faddists who prey upon the unsuspecting public. Perhaps the most troublesome (and lucrative) practice in the area of fad weight reduction schemes is found in the publishing business. Overweight people, desperate to resolve their problems, fall prey to persuasive promises of quick, painless, and permanent weight loss. Books by physicians and laymen alike appear in regular cycles, each with some variation of the currently popular fad: low carbohydrate-high protein, low fat-high carbohydrate, high fat-high protein, high carbohydrate-low fat and low protein, etc. With all the possible variables it is no wonder that so many books have recently been published.

Other than to persuade publishers to seek competent medical opinion before accepting a manuscript, it seems that little can be done without infringing upon constitutional rights. However, advertising and other forms of promotion can be regulated within the framework of federal and/or state regulations. Unwarranted advertising claims for "successful weight reduction" can and should be prohibited in most cases. Usually there is little or no clinical evidence available to substantiate claims made. Physicians sometimes allude to case histories, but the histories are not available for impartial evaluation. "I have treated thousands . . ." is an often used reference to confirm the success of a current diet.

Presumably, responsibility for advertising evaluation falls within the purview of the Federal Trade Commission. The priority given to the regulation of such advertising is a mute question possibly best determined by the commissioners.

A subpanel of the recent White House Conference on Food, Nutrition and Health devoted its attention to deceptions and misinformation. This group, under the Chairmanship of Judge Felix Forte made a number of recommendations which we respectfully bring to your attention. We believe you will find much of interest in your review of food fads and nutrition chicanery.

---

STATEMENT OF CENTER FOR DISEASE CONTROL

(By Mary B. McCann, M.D., of Health, Education, and Welfare Department)

Deception concerning the healing qualities of particular foods and nutrients has been perpetrated on the public for centuries. Anacharis, a Scythian philosopher who lived about 2500 years ago, recognized this and stated "The market is the place where men may deceive each other." Unfortunately, the medieval axiom "let the buyer beware" is as pertinent today as it ever was.

In fact, the increase in scientific knowledge of nutrition and medical science has, in many instances, served to augment food faddism and food quackery. Food faddists often associate the claimed "miracle results" of their food with the report of scientific facts taken out of context, thus lending an authentic air to their claims.

HEALTH FOODS AND ILLNESS

In some cases, purchases of "health foods" do no harm except to the pocketbook. However, their apparently curative effect in some seeming illness could be achieved with conventional foods. Many of man's illnesses are psychosomatic, and an appropriate placebo—be it a sugar pill prescribed by a physician or a "miracle food" recommended by a vendor of health foods—can sometimes produce remarkable effects. These cases of "cured" psychosomatic illness undoubtedly account for many of the testimonials quoted by quacks and food faddists.

On the other hand, far too many persons with serious illnesses have been led by a hawker of health foods down a tragic path to an untimely death. Too many accept the claims of the food faddist and delay or avoid seeking proper medical care.

Misinformation or lack of knowledge of nutrition provides the foundation for food fads. Food faddists, and in fact many other individuals, do not realize that there is no *best* pattern of eating of eating, nor is any one particular food essential for good health. Good nutrition is dependent upon obtaining sufficient amounts of the specific nutrients in food. It makes little difference whether the protein is supplied by steak or fried ants, the calcium by cheese or fish bones, or the vitamin C by orange juice or rose-hips.

SOIL AND HUMAN HEALTH

One breed of food faddists, the "natural foods" advocates, states that our soil is worn out and our food worthless. These self-styled altruists insist that food must be grown on "natural" organically fertilized soil and condemn "processed" foods as "counterfeit", "prefabricated", "worthless", and "carbohydrate paste". They declare that Americans are sick people as a consequence of eating these "processed" foods.

The natural food devotees point to several reported cases of malnutrition occurring in animals fed on crops grown in limited areas where the soil, and therefore the crops, were deficient in some trace element such as copper or cobalt. From such reports they jump to the conclusion that human health is similarly affected. They fail to recognize the fact that Americans today eat a variety of food from many areas.

The only known instance where a relationship has been shown to exist between soil composition and human nutritional status is that between iodine deficiency and endemic goiter. Although it is believed that the chief factor responsible for the decline in endemic goiter in certain "goiter regions" was the use of iodized salt, other factors are also involved. Food processing and marketing systems have expanded and developed; foods grown in areas with adequate iodine were introduced into these "goiter regions". The introduction of a greater variety of foods also accounted for some changes in food habits, for example, an increased consumption of iodine-rich sea foods.

The genetic make-up of the seed, not fertilizer, is primarily responsible for the nutritional composition of foods. Corn can be bred to have more niacin, and apples bred to have more ascorbic acid, but the ascorbic acid of an apple will not be altered by a change in fertilizer. The chief effect of increased soil fertility is an increase in crop yield. There is little evidence that improvement in the amount of fat, protein, carbohydrate, or vitamins in any food is brought about by the fertility of the soil in which it is grown. The "organic gardener" and "natural food advocate" either do not know this, ignore it, or most likely simply overlook it.

However, the *mineral* content of plant products can be influenced to some extent by fertilizers. Thus, if a soil has more calcium, potassium, iron, or fluorine, it is possible that there will be more of these minerals in the plant materials, a desirable goal in those areas where these nutrients are low in average diets.

FOOD PROCESSING

The "natural food" vendor often argues that processed foods lose so much of their nutrients in processing that they are literally worthless as compared with fresh foods. It is true that fruits and vegetables are at their best in flavor and nutrition when used one or two hours after harvesting. However, most produce in our markets is over a week old and has journeyed hundreds or thousands of miles before it appears on grocery store counters. Thanks to modern transportation and refrigeration, it is still nutritious, but fresh fruits and vegetables are not superior in food value to commercially canned and frozen foods. Foods packaged by commercial food companies are picked at the proper time and are quickly and carefully processed. Canned and frozen foods contain essentially the same food values as fresh produce.

A favorite topic of faddists for centuries has been the relative merits of white versus brown bread. The controversy between white and brown bread began in earnest in the United States about a century ago with a Massachusetts clergyman, Sylvester Graham. Whole meal bread was good, he said, because it was "natural" and "vital". He condemned the practice of separating the flour from the bran. Brown bread proponents still extol the merits of whole wheat or whole grain flours and predict dire fates for the users of white flour products.

The script of the twentieth century traducers of white bread hasn't changed noticeably since the time of Graham; this is the way the Boston Nutrition Society writes it:

"The enriched white bread fed to the American public is a national scandal. First of all, the wheat grown on poor soil and fertilized with water-soluble commercial fertilizer is of low protein content. . . . The modern flour mill removes the precious vitamins and minerals. This is then bleached with a powerful oxidizing agent, chlorine dioxide (which is a poison); and to this lifeless mess, a few dead synthetic chemicals (improperly called vitamins) and inorganic iron are added. We not only think these foodstuffs are worthless; we believe that many of them are positively harmful. . . . Our hospitals are crowded to capacity. All the metabolic diseases are increasing by leaps and bounds. . . . Cancer is the leading cause of death in children under fourteen. Diabetes and mental disease are on the increase even in children. And dental caries are rampant!"

The plea for whole wheat flour in the average American diet today does not have justification. It has not been proved superior to enriched, refined flour for the nutrition of man.

SUMMARY

The real damage "natural food" faddists do is not the promotion of "natural" foods, because "natural" foods are good foods. Rather, it is the misinformation they dispense and the exorbitant prices they may demand for the wares, often from the misguided, desperate persons in search of health who can ill afford them. They ascribe to "natural foods" the powers of curing and/or preventing disease. Their claims are based on "testimonials" from the people they say they have cured. They allege that the Food Processors, the Chemical and Drug Interests, the "Old-Guard-Fishbein-Type" leadership of the American Medical Association and the Food and Drug Administration are all tied into one giant unholy alliance to protect each other and to maintain themselves and their profits in utter disregard of the health of our nation.

SOLUTIONS

The problem of food faddism is a major one, and a variety of methods must be used to solve the problem. Legislation is helpful; court actions are also of aid. But food faddism is far too big a problem for the Food and Drug Administration and the Federal Trade Commission to handle. Education,

continuing education, is the weapon which will eventually prove effective against it.

Concerted efforts should be made to develop programs for public information. Nutrition education should be integrated into the school curriculum, at both primary and secondary grade levels. The teachers' colleges should have courses in nutrition. No one teacher, such as the homemaking teacher, should have the entire responsibility for nutrition education. Methods for the integration of nutritional information into various subjects in the curricula for different grade and high school subjects must be developed. The teacher should have access to current material. This material should be brief and factual. Nutrition workshops should be established for teachers and administrative personnel as well.

The public should be well informed about nutrition. Both the scientifically trained individual and the skillful professional writer can make valuable contributions to this effort. Voluntary organizations such as the Better Business Bureaus and local medical organizations can assist. The American Medical Association has worked for many years in their campaign against food faddism and has produced educational materials including a movie entitled "The Medicine Man", which is distributed by local medical societies for use in schools, clubs, and other public gatherings. The American Dietetic Association is also active in the field of nutrition education.

Physicians and scientists should assume more responsibility. It is not enough that important scientific contributions should be accurately reported to scientific groups but the investigator should take care that his research is not misrepresented to the public. Above all, reputable physicians and scientists should not allow their names to be used in introductions or acknowledgements of fad-oriented books. Publishing companies should name scientific committees to advise them on books and advertisements.

Food companies and advertising agencies should continually examine their advertising claims and have them examined frequently by technically qualified outsiders. Food corporations should also assume more responsibility in presenting accurate information to the public which supports them. While we realize that this is a highly competitive world, we cannot excuse the claims that some food concerns make that the use of a particular product will result in good health. These are the claims of faddists, not of reputable manufacturers.

Nutrition is everybody's business. It is imperative and right that everybody should have access to correct nutrition information. Knowledge is the weapon that will prove most effective in limiting the food faddist.

---

## RECORD OF HIJACKINGS IN THE LAST 40 YEARS

**HON. ROMAN C. PUCINSKI**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. PUCINSKI. Mr. Speaker, the House Foreign Affairs Committee is currently holding hearings on legislation sponsored by myself and a number of our colleagues urging the United States to lead the way in negotiating unilateral treaties with as many nations as possible to provide for the mandatory extradition of airplane hijackers to the flag country of the aircraft hijacked so that the hijackers can be promptly prosecuted for the crime of hijacking.

The world is in a huge turmoil right now because of the most recent hijackings by Palestinian guerrillas, and there is special attention being paid to this problem.

I should like to place in the RECORD today analyses of all hijackings during the past 40 years so that we can better understand the urgent need for this legislation.

With the intensified activities in this whole field of hijacking, it occurs to me that we can wait no longer in adopting this legislation.

I should like to call attention to the House that the most staggering growth in hijacking has occurred since the Tri-Continental Congress was held in Havana, Cuba, in 1966 when Communist leaders from 83 nations in Asia, Africa, and the Americas agreed to export terrorism and subversion to an unprecedented scale.

The table of hijackings, as prepared at my request by the Library of Congress, follows:

HIJACKINGS

| Sequence No. | Date | Name | Airline | Type aircraft | Flight plan | Disposition |
|---|---|---|---|---|---|---|
| 1.[1] | 1930 | | (F) | | Peru | |
| 2.[1] | July 25, 1947 | | (F) | | Rumania/Turkey | |
| 3.[1] | Apr. 8, 1948 | | (F) | | Czechoslovakia | Landed in United States Zone of Germany. |
| 4.[1] | May 4, 1948 | | (F) | | do | Do. |
| 5.[1] | June 4, 1948 | | (F) | | Yugoslavia/Italy | |
| 6.[1] | June 17, 1948 | | (F) | | Rumania/Austria | |
| 7.[1] | June 30, 1948 | | (F) | | Bulgaria/Turkey | |
| 8.[2] | July 16, 1948 | | (F) | | Hong Kong | |
| 9.[1] | Sept. 12, 1948 | | (F) | | Greece/Yugoslavia | |
| 10.[1] | Apr. 29, 1949 | | (F) | | Rumania/Greece | |
| 11.[1] | Dec. 9, 1949 | | (F) | | Rumania/Yugoslavia | |
| 12.[1] | Dec. 16, 1949 | | (F) | | Poland/Denmark | |

| 185.[2] | Dec. 13, 1969 | 2 men | (F) Ethiopian | B-707 | Madrid/Addis Ababa | Hijackers slain by security guard. |
| 186.[3] | Dec. 19, 1969 | 1 man | (F) LAN (Chilean) | B-727 | | |
| 187.[3] | Dec. 13, 1969 | 1 man | (F) LACSA (Costa Rican) | C-46 | Puerto Limon/San Jose | Released 30 passengers at San Andreas. |
| 188.[3] | Dec. 26, 1969 | Martinez, M | UAL | B-727 | New York/Chicago | |
| 189.[2 3] | Dec. ,1969 | 1 man | (F) Ethiopian | | | Hijacker slain. |
| 190.[3] | Jan. 2, 1970 | 4 men, 1 woman | (F) Cruzeiro do Sul (Brazilian) | Caravelle | Montevideo/Rio | Stopped in Peru and Panama. |
| 191.[2] | Jan. 6, 1970 | Funjek, Anton | Delta | DC-9 | Orlando/Atlanta | Overpowered on ground, wanted Switzerland, plead guilty July 7, 1970; sentenced 25 years, July 30 1970. |
| 192.[2] | Jan. 7, 1970 | Rodriguez, Mariano | (F) Iberia (Spanish) | CV | Madrid/Zaragoza | Wanted Albania; surrendered in Zaragoza. |
| 193.[1] | Jan. 9, 1970 | Belon, Christian | TWA | B-707 | New York/Rome | Took over between Paris and Rome; landed Beirut, surrendered. Had 3 guns; fined $7 then rearrested. |
| 194.[4] | Jan. 9, 1970 | Medrano, Jorge | (F) Rapsa (Panamanian) | C-47 | David City/Bocas del Toro | Shot and killed by militiaman when plane returned to refuel. |
| 195.[3] | Jan. 23, 1970 | 2 men, 2 women | (F) ALM (Netherlands Antilles Airlines). | Fokker F-27 | Santo Domingo/Curacao | Landed in Santiago, Cuba. |
| 196.[3] | Feb. 6, 1970 | Bravo, Pedre; Vasquez Oscar | (F) LAN (Chilean) | Caravelle | Puerto Montt/Santiago | 1 hijacker killed, 1 wounded; stewardess wounded by detectives disguised as crew. |
| 197.[3] | Feb. 10, 1970 | 3 men | (F) El Al (Israeli) | B-707 | Tel Aviv/London | Hurled grenades at passengers while plane parked at Municipal Airport; 1 passenger killed, 11 wounded. |
| 198.[3] | Feb. 16, 1970 | 1 man (wife, 2 children) | EAL | B-727 | Newark/Miami | Latin-type man armed with gun, homemade bomb; could not speak English. |
| 199.[3] | Mar. 10, 1970 | 1 man (wife) | (F) Interflug (East German) | | East Berlin/Leipzig | Couple reportedly committed suicide when attempt failed. |
| 200.[3] | Mar. 11, 1970 | Stubbe, Clemente (Evans, R.), (wife, 4 daughters). | UAL | B-727 | Cleveland/West Palm Beach | Refueled in Atlanta. |
| 201.[3] | do | 4 men | (F) Avianca (Colombian) | B-727 | Bogota/Barranquilla | Landed in Santiago, Cuba. |
| 202.[3] | Mar. 12, 1970 | 1 man | (F) Varig (Brazilian) | B-707 | Santiago/London | Same flight as was diverted Nov. 4, 1969. |
| 203.[1 2] | Mar. 17, 1970 | Divivo, John J | EAL | DC-9 | Newark/Boston (shuttle) | Co-pilot killed; captain, hijacker wounded; landed safely in Boston; murder. |
| 204.[3] | Mar. 24, 1970 | | (F) Aerolineas Argentinas (Argentine). | Comet IV (British) | Domestic Cordoba/Tucuman | After 9-hour repair stop in Lima, Peru, landed in Cuba Mar. 25. |
| 205.[3] | Mar. 25, 1970 | 1 man, 1 woman | (F) Charter | Cessna 180 | Domestic, British Honduras | Refueled in Mexico. |
| 206.[3] | Mar. 30, 1970 | 9 students | (F) Japan Air Lines | B-727 | Domestic, Tokyo/Fukuoka | Armed with swords, youths wanted to go to North Korea; tricked into landing in South Korea. After 4½-day wait on ground, passengers exchanged for hostages and flight continued to North Korea April 3. Crew and hostage returned April 4. |
| 207.[7] | Apr. 30, 1970 | 1 man | North Central | DC-9 | | Hijacked bus to take him to airport; got on plane where he was subdued after threatening crew. |
| 208.[3] | Apr. 22, 1970 | Meeks, Ira D.; McKinney, Diane | Charter | Cessna 172 | Domestic, Gastonia, N.C. | Hijacked taxi to airport; hired plane; refueled at Rock Hill, S.C., Jacksonville, Fla., and Ft. Lauderdale, Fla. |
| 209.[3] | Apr. 25, 1970 | 1 man | (F) Viacao Aerea de Sao Paula (Brazilian). | B-737 | Domestic | Refueled in Guyana, deplaned 36 passengers, 1 "hippie" remained voluntarily. |
| 210.[3] | May 1, 1970 | 2 men (identified as American blacks). | (F) British West Indian | B-727 | Jamaica/Senegal | Originally wanted to go to Algeria but diverted to Cuba. |
| 211.[1] | May 5, 1970 | Verner, Pavel | (F) Executive plane (Czechoslovakian). | | Domestic | Junior executive for Czech uranium plan zonked out his boss and stabbed pilot; wanted to go to West Germany for job but diverted to Linz, Austria. 1 year jail, September 2. |

Footnotes at end of table.

HIJACKINGS—Continued

| Sequence No. | Date | Name | Airline | Type aircraft | Flight plan | Disposition |
|---|---|---|---|---|---|---|
| 212.[3] | May 12, 1970 | 8 men | (F) ALM (Netherlands Antilles Airlines). | Fokker F-27 | Santo Domingo | Dutch revolutionaries. |
| 213.[2] | May 14, 1970 | 1 man | (F) Australian | | Brisbane | Girl, 6, accidentally opened emergency exit door on plane as hijacker was threatening pilot with toy gun in plastic bag while plane on ground at Sydney Airport. |
| 214.[3] | do | 1 man | (F) Viacao Aerea Sao Paulo (Brazilian). | B-737 | Brasilia/Manaus | Refuel at Guyana and Curacao; hijacker armed with pistol and explosives. |
| 215.[3] | May 21, 1970 | 4 men | (F) Avianca (Colombian) | DC-3 | Domestic, Yopal/Sogamozo | Stopped unexpectedly in Barrancabermeja and later refueled in Barranquilla. |
| 216.[3] | May 24, 1970 | 3 men, 1 woman | (F) Mexicana de Aviacion (Mexican). | B-727 | Domestic, Cozumel/Merida | |
| 217.[3] | May 25, 1970 | 1 woman (w/son) | Delta | CV-880 | Chicago/Miami | Woman was armed with 38-calber revolver, took over plane after Atlanta takeoff. |
| 218.[3] | do | 1 man | AA | B-727 | Chicago/New York | Refueled at JFK in New York and deplaned passengers. |
| 219.[1] | May 30, 1970 | Stellipi, Gianlocca | (F) Alitalia (Italian) | DC-9 | Genoa/Rome | Used toy pistol; landed in Cairo. |
| 220.[3] | May 31, 1970 | 2 men | (F) Avianca (Colombian) | | Domestic, Bogota/Bucaramaga | Refueled Barranca-bermeja. |
| 221.[7] | June 4, 1970 | Barkley, Auther G | TWA | B-727 | Phoenix/Washington, D.C | Landed Dulles for $100,000 ransom; departed for upstate New York, returned for more ransom and was captured; armed with pistol, knife and can of fluid; pilot and hijacker wounded. |
| 222.[1] | June 5, 1970 | Mosczymsky, Josef Civanicki, Zbiginew. | (F) LOT (Polish) | AN-24 (Soviet) | Domestic Szczeczin/Dganst | Hijacker armed with 2 hand grenades; landed Copenhagen. |
| 223.[1] | June 8, 1970 | 4 men, 4 women | (F) CSA (Czech) | IL-14 | Domestic, Karlsbad/Prague | Landed Nuremberg, Germany; asked for political asylum. |
| 224.[3] | June 9, 1970 | 2 men | (F) LOT (Polish) | | Domestic, Katowice/Warsaw | Foiled by crew. |
| 225.[3] | June 21, 1970 | 2 men, 1 juvenile | (F) Iranian National Airline | B-727 | Iran/Iraq | Landed Baghdad. |
| 226.[1] | June 22, 1970 | Xyaert, Haxh | PAA | B-707 | Beirut/New York | Landed Cairo. |
| 227.[3] | June 26, 1970 | | (F) Avianca (Colombian) | B-727 | Cucuta/Bogota | Refueled Barranquill. |
| 228.[3] | July 1, 1970 | 1 man | NAL | DC-8 | San Francisco/Miami | Hijacked by armed man after stop in New Orleans; 4 servicemen passengers roughed up at Jose Marti Airport. Hijacker boarded plane in Las Vegas. |
| 229.[4] | July 1, 1970 | 3 men, 1 woman | (F) Cruzeiro do Sul (Brazilian) | Caravelle | Rio de Janeiro/Buenos Aires | Captured by Brazilian authorities; hijackers hoped to exchange passengers for jailed terrorists. |
| 230.[3] | July 4, 1970 | 2 men | (F) Cruzeiro do Sul (Brazilian) | | | Refueled French Guiana; allowed 37 of 54 passengers to leave plane. |
| 231.[1] | July 11, 1970 | 1 man | (F) Arabian | B-707 | Saudi Arabia/Syria | |
| 232.[2] | July 22, 1970 | Hardin, Pvt. George (S)[8] | (F) Air Vietnam | DC-4 | Pleiku/Saigon | Held pilot at knifepoint for 2 hours before surrendering; air let out of tires; all happened at Tan San Nhut Airport. |
| 233.[1] | do | 6 Arab commandos (5 men, 1 woman). | (F) Olympic (Greek) | B-727 | Beirut/Athens | Released passengers after promise of Greek Government to release 7 Arab terrorists; flew plane to Cairo. |
| 234.[3] | July 25, 1970 | 4 men | (F) Aeronaves de Mexico (Mexican). | DC-9 | Alcapulco/Mexico City | Made 30 minute refueling stop in Mexico City; no one deplaned. |
| 235.[4] | July 28, 1970 | Albornoz, Fermin Jurado | (F) Aerolineas Argentinas (Argentine). | B-737 | Salta/Buenos Aires | Hijacker pulled 2 pistols; plane refueled Cordoba where 23 of 48 passengers deplaned, and Mendozo Andes snowstorm forced plane back to Cordoba where hijacker surrendered to police. |
| 236.[3] | Aug. 2, 1970 | Rios, Rudolpho | PAA | B-747 | New York/San Juan | Displayed "gun" and bottle of fluid; took hostage as he and stewardess remained outside cockpit door. |
| 237.[3] | Aug. 3, 1970 | Huber, Johann | PAA | | Munich/West Berlin | Threatened crew with gun; wanted to go to Budapest; was told plane did not have enough fuel and he was convinced. |
| 238.[2] | Aug. 7, 1970 | Frej, Waldemar | (F) Polish | | Szczegin/Katowice | Hijacker with grenade denied entry into cockpit; landed in East Berlin; wanted to go to Hamburg. |
| 239.[1] | Aug. 8, 1970 | Father, 2 sons | (F) Czechoslovak | | Domestic | Landed in Vienna. |
| 240.[3] | Aug. 19, 1970 | 3 men | Trans Carib | DC-8 | Newark/San Juan | |
| 241.[1] | do | Inagaki, Sachi | (F) All Nippon (Japanese) | B-727 | Domestic; Nagoya/Sapporo | Ordered plane to land at Hamamatsu Air Defense Base, demanded rifle/ammunition in possible suicide plot; woman passenger feigned pregnancy pains and in confusion police came aboard and overpowered hijacker who had only toy pistol. |
| 242.[1] | do | 3 men, 2 women | (F) LOT (Polish) | IL-14 | Domestic; Gdansk/Warsaw | 1 hijacker had hand grenade; landed at Danish island of Bornholm; asked for asylum. |
| 243.[3] | Aug. 20, 1970 | Graves, Gregory (S) (AWOL Marine). | Delta | DC-9 | Atlanta/Savannah | Said he had bomb in his lap but no one saw it. |
| 244.[3] | Aug. 24, 1970 | Labadie, Robert (S) | TWA | B-727 | Las Vegas/Philadelphia | Said he had a bomb; landed in Pittsburgh for refuel but no one allowed off plane. |
| 245.[2] | Aug. 27, 1970 | Olma, Rudolf | (F) LOT (Polish) | | Domestic, Katowice/Warsaw | Threatened crew with bomb, which accidentally exploded injuring hijacker and 10 passengers; wanted to go to Vienna; plane landed safely at Katowice. |
| 246.[1] | Aug. 31, 1970 | 3 men | (F) Air Algerie (Algerian) | CV-640 | Domestic, Annaba/Algiers | Refueled in Sardinia and Italy; wanted to go to Albania, which refused landing; went on to Yugoslavia where they asked for asylum. |
| 247.[1] | Sept. 6, 1970 | Guerrillas | TWA | B-707 | Tel Aviv/New York | Palestinian guerrillas hijacked plane after stop at Frankfurt; taken to Dawson Field Jordan; plane blown up Sept. 12, 1970. |
| 248.[1] | do | do | (F) Swissair (Swiss) | DC-8 | Zurich/New York | Palestinian guerrillas hijacked plane near Paris; taken to Dawson Field, Jordan; blown up Sept. 12, 1970. |
| 249.[1] | do | do | PAA | B-747 | Amsterdam/London | 2 original hijackers joined by 7 others in Beirut during refueling; blown up in Cairo Sept. 12, 1970. |
| 250.[2] | Sept. 6, 1970 | Khaled, Leila (see 157) Arguello, Patrick | (F) EL AL (Israeli) | B-707 | Tel Aviv/New York | Armed El Al steward shot and killed male hijacker; female was overpowered by passengers; plane landed in London; Miss Khaled helped hijack TWA plane to Syria August 29, 1969. |
| 251.[1] | Sept. 9, 1970 | Guerrillas | (F) BOAC (British) | VC-10 | Bombay/London | Palestinian guerrilla forced plane to refuel in Beirut before going to Dawson Field; plane blown up September 12, 1970. |

## CONSTITUTION DAY

## HON. WM. JENNINGS BRYAN DORN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. DORN. Mr. Speaker, it was my great honor to represent Gov. Robert E. McNair and the State of South Carolina in ceremonies commemorating Constitution Day at the Washington Monument on September 17. These splendid ceremonies, sponsored by the Citizenship Committee for the District of Columbia, under the capable general chairman, A. Leo Anderson, marked the 183d anniversary of the signing of the U.S. Constitution. Master of ceremonies was the Honorable Philip J. Rutledge and the Constitution Day Proclamation was read by Mr. William H. Brown. The Governors of the Thirteen Original States were appropriately represented.

The principle address was delivered by Dr. Kenneth D. Wells, president and cofounder of Freedoms Foundation, Valley Forge, Pa. I commend this outstanding address to the attention of my colleagues in the Congress and to all the American people.

ADDRESS DELIVERED BY DR. KENNETH D. WELLS

As we Americans look over our shoulder to the span of the centuries since the calendar began, we find that the history of the human race has been a constant search by men and women on every continent for the fundamental high purposes and principles of human action that would provide an elevated, happy way of life with human fulfillment, as Justice Grady Head has written.

The greatest principles in this search have been known for a long time. They are hoary with age, but they are indivisibly together at this hour, as rock-like, as basic and as fundamental as when they came into being at the beginning of our calendar.

The ideals and high purposes found in the Ten Commandments received by Moses on Mt. Sinai have not been obscured, repealed, modified or improved upon in twenty centuries, except as the depth and magnificence of the expression in the Sermon on the Mount has expanded man's highest principles contained in the beloved rules given to Moses by God.

Neither hippies, nor Hitlers, nor any of their kind; nor Lenins, nor compromisers, nor fakers using hallucinatory drugs, nor smug atheist theoreticians nor surface scholars have found an ideal for a way of life that brings to your soul and mine the peace and understanding received when we follow the faith and teachings in the Sermon on the Mount.

When Justinian codified what the Roman civilization had learned through centuries, the most profound advance in the field of human law the world had to that time known became a foundation stone for the road to the future. This road to liberty under law has become rocky.

Your search, my search, everyone's search for an improved way of living together harmoniously in perfect liberty and freedom in its total sense has been an ideal that has not yet had continual constructive progress. The entire world fell back in the centuries between the days of the Caesars and the foundations of English liberty in the Magna Charta.

Every judge, every legally trained man in the world knows and, I believe, every person of high school training knows, that the elementary principles of freedom, justice and liberty indivisible under the English law originated on June 15, 1215, when the English Barons took from King John at Runnymede the concepts of the Magna Charta. But again the ideals of personal liberty in those few short centuries suffered a setback. A lack of integrity on the part of rulers and individuals, a lack of strength in great voluntary organizations existed. Because of persecution and refusal to give religious liberty, and liberty to engage in enterprise as one saw fit, the first English settlers were forced from their homeland to the shores of this Continent.

Anguish and joy grew apace. The assault on death and disease began. Free enterprise motivated everyone. Medical progress was accelerated. Single family homes were proudly built. The colonists engaged in more and great trade. Invention and opportunity were hallmark. Better farming was sought. The English government became deeply, deeply jealous of our prosperity and of our ability as individuals. They applied many forms of tyranny. The young colonists' determination grew. The winds of death and danger blew each day. They chose freedom.

Mind by mind they decided to cast off the yoke of tyranny. We became free and independent people in free and independent states. The wholeness of the ideas of rights of men, as first stated in our Declaration of Independence, had as its natural parallel a fiery desire that the rights of the individual as a child of God would be at their zenith, and every citizen knew he and she should accept responsibility as a parallel for every right, by exemplary personal conduct. Our desire for a free government that was our servant and not our master was our quest. Freedom was table talk. Our Federal Constitution was built. It has since been proclaimed a thousand times a thousand times as the greatest written document by any group of men of any nation, of any race, who desired the real blessings of personal freedom—religious, economic, and political, at least one great and respected religious denomination treats it as scripture.

From the Ten Commandments through centuries of the Sermon on the Mount to the struggle to build the Roman Code, to the forcing of King John to his knees to grant the Magna Charta at Runnymede, and to the time of our Federal Declaration of Independence and our Federal Constitution and our state constitutions and municipal ordinances man has struggled to govern himself. *These deep principles and positive truths—great in every sense—have been powerful and effective, and worthwhile, only as they have lived in the hearts and minds and daily lives of men and women.*

The Hebrews were not a great people because of Ten Commandments made them so, or because the Commandments were engraved upon stone and given to Moses by God for the governing of Hebrews.

The Hebrews became a great people and a great nation because they strove to place the great truth and principles of the Ten Commandments in every moment of their lives as individuals and as families, and in the development of their society.

The Roman Code of Law did not make the Romans great, but it became a vast nation—a world power—because the principles of Roman Law were the most advanced in the field of all human property and civil rights, responsibilities and human liberty, and they were widely applied in the lives of the people throughout the Roman Empire.

This Roman Empire fell and was smashed because the Romans did not live up to the concepts of liberty and justice in their laws. Moral decay destroyed them. Judges were dishonest. Law was not enforced. Private and public property was desecrated. Disregard for law crept throughout the land. The Roman Empire fell on history's scrapheap. Many others have been the same from the Incas to modern time.

Great Britain *was* a great leadership nation, had the greatest trade, the greatest sea power, and far-flung frontiers because the Magna Charta enumerated the great ideals and liberties under law. The common law was valid and powerful. Great Britain became a great nation because its people became on fire with the great ideas, incomplete as they were, of liberty and freedom applied in the daily work of English men and women. They worked, they prospered. Now it is different.

The United States is not the greatest nation on earth because Madison, Franklin, Jefferson, Washington, and all the others, framed the Declaration, Constitution, and Bill of Rights directed at just and personal freedom.

*But, we have become the greatest nation on earth because we applied these principles of our Constitution in government without watering down their interpretation to satisfy individual group and party political needs.* We are doing this now. To continue means our demise. We have been a great nation because we have been a good nation, respecting property rights, working hard, giving loyalty to God, country, and family—and seeking equity for all.

Our relations with other countries have been workable and usually stable. They have known what we believed in. They have known we would be firm yet compassionate, and have usually known what we have been committed to. Foreign nations have been able to cooperate with us because we have been

strong. They knew where we stood. They cannot cooperate with us when we are weak. No one can co-operate with weakness—moral, political, economic or military.

There are serious people in our land who believe that the United States is in its last days of its near perfect quest for liberty and individual freedom. They honestly fear that our beloved country is in historic and unnecessary danger induced by profligacy, parental neglect, and growing secular clergy and the subsidy of indolence; indeed, placing itself on the auction block because we are not standing fast with the faith that made us free.

These numerous citizens say we are living in the last days of the American Way of Life, its liberty, and its freedoms. I share their concerns, but I do not share their view of the outcome. Let the prophets of doom be quiet. If the U.S.A. goes into chaos, it will be solely because our people and our public and private leaders have wandered away from the moral, religious, and free political and economic concepts of our land; from the basic purpose of the Ten Commandments and the Sermon on the Mount and our fundamental documents, for are these not the greatest human relation principles.

Our productive risk capital American Way of Life is endangered in every generation. We must be determined that intelligent, able and conscientious men and women of the arts, business, science, education and religion will get off their perches and think, invest, speak and act in the perpetuation to the great ideals.

There is much too little teaching of responsible citizenship. Historian Arnold Toynbee has told us that every civilization that has been overcome and smashed has been overcome by barbarians within before it was smashed by barbarians from without. There are barbarians within our country. There are many men and women and youths all over this land, who hold no high standards for themselves, who take pride in being mediocre, who are unproductive, unwilling, frequently lazy and sometimes deliberately mentally and physically unclean. These affectations are many, but if he or she has any affection for anyone, it is affection for the slick dealers, the fast buck businessman, syndicate dope-pushers, "the wise guy" who sneers at accomplishment, the fixer who has committed himself, as John G. Fleck said recently, to the "cult of the slob." His first impulse is to turn to mob action.

We see "running off at the mouth" complaint, rather than responsible protest. Honest protest in a peaceable assembly we stoutly defend, but mobs must be put down. No decent American will put up with fires deliberately set and rifles poked out windows to snipe the innocent. Why not be tough-minded like our forefathers? Where is our moral indignation? Why can't we again *refuse* to call wrong, right? I see enough young people to know that most of them are sound of mind and body, wonderful, wonderful young people. But there are always those who revel in distressing and disrupting others. These few should not dominate, disrupt, and destroy our social fabric.

It is time we said "no" to ourselves when in any manner we harm our families and country and turn from the better things to the baser things.

Man is a child of God. Everyone alive has a divine spark. Let us call on that spark to ignite our faith—strong, thoughtful and bold. No bank accounts, stock portfolios or fancy clothes can ever make up for a fatty degeneration of our moral issues. If we want successful businesses, banks, schools, cities, we must have responsible famlies and homes. We cannot have them if we pursue indiscriminate sex and illegitimacy in hovels and pads in preference to family life in our homes, laziness in place of ambition, security in place of opportunity. The quality of life outweighs the quantity of life on the only scales that count.

The base-rock fact is that we are an inseparable part of a sick world. The question is: will it pull us down or will we stand fast with the faith that made us free?

A simple question is before the world. It is, Is there a God? For me, there is no denial except by the vicious Communist-Socialist world structure, or by the confused. *But if there is no God, it is better, even so, to be generous rather than selfish; better to be honest than crooked and sneaky; better to be clean of mind than lewd; better to be thrifty than wasteful; better to die a brave man or woman rather than as a self-convicted moral coward.*

There are certain guidelines, simple things such as personal integrity, a good day's work, regular thrift, kindness and fairness to every man regardless of race, creed or color must prevail, or a free country cannot live.

Whether the civil disorder in over fifty cities in recent months which have shaken the basic structure of our political and social relations in the United States, destroys or does not destroy our country, our lives and our investments, *it is clear that the lack of effective teaching of the great values is the root cause of our trouble, coupled with a lack of equity and opportunity in many things for all too many Negro and white citizens. We have known what to do.* We have not done it adequately, we have over relied on government, under relied on ourselves.

Open, moral support of law enforcement agencies, is especially important. If civil order is to be preserved, it is essential that those who break the law be punished and that the innocent be protected. It is critical and urgent that the law-abiding citizens receive protection of the law from the lawless.

There is no way to have liberty under law in our business relations or in our family relations unless self-reliance and self-discipline of our citizens are shown each day by belief in respect for, and adherence to the rule of law.

We need correction of inequities in the law in an orderly plus voluntary fashion for all, regardless of race, creed or politics. Job discrimination et al. are ridiculous when people are law abiding, have good personal conduct and work sincerely. However, individuals, whether in business, the clergy, education, farming, factory, or on welfare—whoever they may be, who ignore the orderly legal processes of the United States of America, and who seek illegal redress of grievances no matter how much they are deserved, through rioting mob violence, force accompanied by sniping, burning, arson, looting, and other criminal acts of the gravest order, deserve the appropriate stern punishment of a free society. A new legal approach is long overdue to clear the country of commercialized pornography. It is a tremendously corrupting influence. Moral indignation must rise to shackle this $5,000,000-plus-a-week industry.

*There are constructive things to be given assistance. Trials are delayed.* This can, these must be cured. Unreasonable and unnecessary delays in the administration of justice must be cured. Orphanages are full of good kids. They should be adopted. Cities are dirty or filthy. They can be cleaned.

We pray that our lives, regardless of age, health, wealth or lack thereof, may be a tribute to our country's heritage, equal to our competence as children of God. When our beloved President Eisenhower dedicated the American Credo monument at Freedoms Foundation at Valley Forge, his wise words included, "Let no man do less than his best". Let us teach our Credo.

The Right to Worship God in One's Own Way.

The Right to Free Speech and Press.

The Right to Peaceably Assemble.

The Right to Petition for Redress of Grievances.

The Right to Privacy in Our Homes.

The Right to Habeas Corpus—No Excessive Bail.

The Right to Move About Freely at Home and Abroad.

The Right to Own Private Property.

The Right to Free Elections and Personal Secret Ballot.

The Right to Work in Callings and Localities of Our Choice.

The Right to Bargain with Our Employers and Employees.

The Right to Go into Business, Compete, Make a Profit.

The Right to Bargain for Goods and Services in a Free Market.

The Right to Contract About Our Affairs.

The Right to Service of Government as a Protector and Referee.

*The Right to Freedom from Arbitrary Government Regulations and Control.*

Let's put forth our real enthusiasm to improve this nation so that it is near perfect by 1976, our 200th anniversary.

---

## SLEEPING BEAR DUNES

### HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. VANDER JAGT. Mr. Speaker, in the debate on Sleeping Bear Dunes National Lakeshore legislation an amendment was offered to change the cutoff date exempting improved private property from condemnation from December 31, 1964 to December 31, 1968. In the ensuing teller vote I voted "no" on this amendment.

At one point in time I had seriously considered offering an amendment to this legislation calling for a cutoff date as of the date of passage of the legislation. It seems no more reasonable to provide a December 31, 1968, cutoff date than a September 22, 1970, date if the idea were only to protect those people who have gone ahead since earlier legislative proposals, which failed to be passed, to construct their summer homes.

After careful consideration I chose not to introduce this amendment. And let me state my reason.

Our basic concern in Sleeping Bear legislation is protection of the environment. Park Service plans for the area developed in 1964 have this well in mind. Their plans were prepared when it was possible to lay out the optimum locations for public use areas to minimize damage to the environment.

To allow improved property constructed after December 31, 1964, protection from condemnation is to significantly disrupt those optimum plans for protecting the environment. It would force the Park Service to use second, third, and even fourth choices for locations of its public use facilities, thus encouraging damage to the environment, damage which we can otherwise effectively avoid.

Mr. Speaker, it is out of this deep concern for the protection of the environment in the Sleeping Bear Dunes National Lakeshore Area that I voted "no" on the amendment to change the cutoff date.

## LET US NOT SURRENDER THE PANAMA CANAL

**HON. HAROLD R. COLLIER**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. COLLIER. Mr. Speaker, I recently submitted House Resolution 1171, which, with reference to the Panama Canal, expresses "the sense of the House of Representatives that the Government of the United States maintain and protect its sovereign rights and jurisdiction over said canal and that the U.S. Government in no way forfeit, cede, negotiate, or transfer any of these sovereign rights or jurisdiction to any other sovereign nation or to any international organization." I urge the Committee on Foreign Affairs to hold hearings on this important measure as soon as possible, in order that it may reach the floor of this body for action during the present session.

While it is true that, under the Constitution of the United States "the President shall have power, by and with the advice and consent of the Senate, to make treaties," I do not interpret this to mean that Members of the House of Representatives, a coequal branch of the Congress, should remain silent on such an important matter as the treaty which the Johnson administration negotiated between the United States and the Republic of Panama.

The treaty, which is pending before the other body, provides for: Surrender of our sovereignty over the Canal Zone to Panama; a partnership between the United States and Panama in the management and defense of the canal; giving the United States an option on a site for a canal of sea-level design; and eventually giving both the existing canal and any new canal that may be constructed to replace it to Panama, all without any compensation whatsoever.

Even if such a colossal giveaway made sense, it could not be effected constitutionally without the consent of both Houses of Congress, the House of Representatives having as much to say in the matter as the Senate. The second clause of section 3 of article IV of the Constitution reads as follows:

> The Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States; and nothing in this Constitution shall be so construed as to Prejudice any Claims of the United States, or of any particular State.

It therefore becomes all the more necessary for Members of the House to speak out. We who must face the voters every 2 years are much closer to the people than are the Members of the other body, less than one-third of whom are seeking reelection this year. While a Senator may have been chosen by a majority of the voters of his State, his views on such a topic as the pending treaty may be diametrically opposite to those of the people who voted against him in the election or in his party's primary. It is possible that large numbers of those who supported him in the primary and in the election disagree with him in regard to the treaty. Members of the House have a duty not only to listen to the voices of their constituents, they also have a solemn duty to alert them to what is going on in the Nation's Capital, especially in this day of managed news.

I want to discuss briefly why I believe the status quo in the Canal Zone should be maintained and why I hope the pending treaty will be overwhelmingly rejected by the other body. Actually, but 34 votes are required to block ratification, but I hope rejection will be effected by a substantial majority.

Before the construction of the Panama Canal, a ship had to travel more than 13,000 miles, a distance exceeding half the circumference of the earth, in order to go from New York to San Francisco. Utilization of the canal cuts the distance to about 5,200 miles. Bear in mind that the ships that supply our fighting men in Southeast Asia utilize the Panama Canal.

Republicans are frequently accused of "wanting to go back to the days of McKinley" and are often told that we can no longer follow the counsel of Theodore Roosevelt, who advised us to "speak softly and carry a big stick!" Certainly I would not want to go back to those days, even if it were possible, but by way of rebuttal I will say that William McKinley knew what to do about Cuba and Theodore Roosevelt knew what to do about Panama. Both of these nations owe their independence, their very existence, to the United States of America.

An uprising occurred in Panama on November 3, 1903, when it was part of Colombia. The presence of the warship U.S.S. *Nashville* at Colon, where it had arrived he day before, prevented Colombian troops from crossing the Isthmus of Panama to put down the rebellion. When the independence of Panama was proclaimed, the United States was the first nation to recognize the new country.

Under the terms of the Hay-Bunau-Varilla Treaty of November 18, 1903, the United States was granted exclusive use, occupation, and control of the Canal Zone in perpetuity. The United States could exercise all sovereign powers to the entire exclusion of the exercise of sovereign powers by the Republic of Panama.

Panama was to receive $10,000,000 in cash and a $250,000 annuity to begin 9 years after the treaty was ratified. The annuity was increased to $430,000 in 1936 and to $1,930,000 in 1955. The treaty was proclaimed on February 26, 1904, and the United States formally acquired the Canal Zone on May 4, 1904.

To implement the treaty, the United States proceeded to acquire outright ownership of all land and other property in the Canal Zone by purchases from the individual owners. The rights exercised by our Nation in the Canal Zone are thus derived from both the grant from the Government of the Republic of Panama and purchases from the individual property owners.

As Panama had been a place of endemic revolution, the framers of the treaty of 1903 insisted that it contain perpetuity, sovereignty, and protective clauses, thus guaranteeing the political stability that was so essential for the future efficient operation of the canal. The United States would never have undertaken to build and subsequently maintain and operate the waterway if it had not been granted complete and perpetual control by the treaty. At this point I would remind my colleagues that Panama has experienced several unconstitutional changes of heads of government since 1930.

What has the Panama Canal cost our Nation? The net investment for acquisition of government of the Canal Zone, construction, maintenance, operation, sanitation, and police protection of the Panama Canal, offset by recoveries by the U.S. Treasury, totals approximately $1 billion.

Defense of the canal by the Army, Navy, and Air Force of the United States has cost over $4 billion, making our total investment in excess of $5 billion. Because of the presence of our Armed Forces in the Canal Zone, the Republic of Panama is spared the necessity of maintaining an elaborate and costly defense establishment. It is thus relieved of a tremendous financial burden.

Obviously the Republic has derived considerable in the way of financial and other benefits because of the huge expenditures we have made. Our Armed Forces furnish gainful employment to over 3,000 Panamanian citizens, while their dependents provide an additional stimulus to the Republic's economy because of their purchases of goods and services there.

More than $100 million is now injected into Panama's economy annually through employment and purchases. The isthmian nation has also been a passenger on the foreign aid gravy train, having received $226 million from the various foreign aid programs of the United States during the period 1946 to 1970.

Many of the benefits that Panama receives from us cannot be measured in terms of dollars. The U.S. Southern Command, which is stationed in the Canal Zone, frequently transports seriously ill or injured persons from the interior of the Republic to the capital or other sites where they can receive proper medical treatment.

Major assistance was provided in 1965 when Panama City suffered from devastating fires. Aircraft of the United States flew many missions in support of Panama's relief efforts during the floods in the Chepo region in 1967.

Due to the efforts of the U.S. Government, the Canal Zone area underwent a metamorphosis from one of the worst pestholes on earth to the healthiest spot in all the tropics. In accordance with the treaty of 1903, the United States continued to enforce sanitary and health ordinances in Panama City and Colon. The treaty of 1955 between the two nations, at the request of Panama, relieved the United States of this responsibility.

What was the result of this transfer of responsibility? Garbage accumulations in the streets of Panama City became the food sources for an unprecedented increase in rats, which are the carriers of the bubonic plague and other diseases. During one 8-hour day in 1967, the rodent control section of the Municipal

Health Board of Panama City trapped 934 rats that averaged over 2 pounds in weight.

The greatest benefit that Panama receives from our presence in the Canal Zone is its continued independence, which can be guaranteed only by our remaining on the isthmus in perpetuity. While it is true that Panama's most important natural resource is its strategic location, it must be recognized that this also constitutes its greatest danger. That danger has been greatly magnified by the Communist takeover in Cuba.

The fundamental question in the proposed surrender of our sovereignty over the Canal Zone is not whether the United States rather than Panama shall control this strategic area, but whether the United States rather than the forces of international communism shall control it. If Western civilization is to be able to defend itself against Communist aggression, it is absolutely imperative that the United States continue to control, maintain, operate, and protect the Panama Canal. If we relinquish full sovereignty over this strategic waterway, all of the nations of Latin America will inevitably and swiftly go the way of Cuba.

Surrender of the Panama Canal will encourage the overthrow of constitutional governments by Communist revolutionists throughout Latin America. It will also have a calamitous impact on such other crucially important strategic places as Southeast Asia, Gibraltar, the Suez Canal, the Red Sea, and Southern Africa.

In the event that expanded Communist power leads to control of the Middle East, Europe would be confronted with a situation similar to that it faced in 1453 when the capture of Constantinople by the Turks forced the Portuguese to seek a new route to India via the Cape of Good Hope. A fortunate result of the fall of Constantinople was the discovery of America by Christopher Columbus—do those who advocate the surrender of the Panama Canal anticipate equally happy results?

Continued economic sanctions against Rhodesia could open the back door to war with all of Southern Africa, the countries of which are anti-Communist. Seaports and airports in Southern Africa, occupied by Red naval forces, could well dominate the sea routes around the Cape of Good Hope and close the alternate passage between the Atlantic and Indian Oceans.

Several years ago the misnamed Carnegie Endowment for International Peace issued a general staff type of war plan for a land, sea, and air assault on South Africa, to be conducted by the United Nations organization. Such a plan, if successfully carried out, would inevitably place Communist power in position to control the ocean routes adjacent to Southern Africa by submarines and aircraft, thereby strategically isolating the sea transport of Western Europe and the United States from countries bordering the Indian Ocean.

Ratification of the pending treaty by the Senate would constitute a complete surrender to Panama of our sovereignty with respect to the canal and the Canal Zone in favor of a dual managerial and governmental setup, in an area of endless bloody revolution and political instability. Such control could only lead to the unending conflicts and recriminations that inevitably accompany extraterritorial jurisdiction. It would mean the scrapping of all laws enacted by this Congress since 1904 for canal purposes and for governing the Canal Zone territory.

Such abdication of sovereignty would also mean the loss of our $5 billion investment, as Panama does not expect to pay 1 cent for what it is trying to obtain.

If Panama were to become co-manager, its policy would be adamant against any use of the canal that might offend Communist powers and our Government would become involved in a constant state of friction with Panama concerning such matters.

In 1923, Secretary of State Charles Evans Hughes told the minister from Panama that—

> It was an absolute futility for the Panamanian government to expect any American administration, no matter what it was, any President, or any secretary of state, ever to surrender any part of these rights which the United States had acquired under the treaty of 1903.

In 1903 the Republic of Panama entered into a solemn treaty with the United States—it should honor the terms of that treaty just as we have faithfully carried out our obligations thereunder.

The United States has invested over $5 billion to construct, maintain, and operate the Panama Canal—we must maintain possession of this vitally important strategic waterway.

The international Communist aggressors possess altogether too many vital locations already—they must be told emphatically to keep their hands off the Panama Canal.

Mr. Speaker, I urge the Committee on Foreign Affairs to hold early hearings and report out the strongest possible resolution. We must let the United States Senate know that the House of Representatives, the branch whose Members report to the people every 2 years and which is therefore more aware of true public opinion, is emphatically and unequivocally opposed to any effort to surrender the sovereignty of the United States in the Canal Zone.

---

## UNITED STATES LINE INAUGURATES NEW SERVICE

### HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. HANNA. Mr. Speaker, I would like to take this opportunity to bring to the attention of my colleagues a new freight service inaugurated September 11 by United States Line. The new service will encourage coast-to-coast freight and cargo shipments between east coast ports and those on the west coast. The new route will also extend to Hawaii and the Orient.

I have long been an advocate of increased economic contact between our country, particularly the west coast, and those countries in the Far East. This new route and service of United States Line is most certainly a step in the right direction.

There will be regular once a week sailings, and the round trip from New York to the west coast to the Orient and back will take only 56 days.

We are at a crossroads in the economic life of our country. We must find markets for our export goods as our traditional markets become sated. The newly developing nations of the Far East are now available and must be given primary consideration in this context. The first step in developing new export markets must be an adequate freight and cargo linkage. This new route by United States Line, with its regular and rapid service, will serve as a much needed bridge between our Nation and the Orient. The linkage is a new and interesting contribution by the business community to the healthy growth of the economy of the United States, and I congratulate them on their foresight in taking this important step.

---

## BEHIND THE CAMPUS REVOLT

### HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. QUIE. Mr. Speaker, the July 18 Saturday Review carried an article containing many insights into the campus unrest question. The author lays to rest many of the theories on the unrest which do not stand up under logical analysis. He further places responsibility on the faculties of universities for developing adequate methods to cope with the destructive activities of student anarchists whose goal is to destroy the university and the establishment. Those goals will be fulfilled without such constructive efforts on the part of faculties.

I commend the article to my colleagues:

BEHIND THE CAMPUS REVOLT

(By Paul Woodring)

The tragic events at Kent State University this May, followed by demonstrations involving various degrees of violence on hundreds of other campuses, occurred only a few months after a number of college presidents had expressed the opinion that the worst was over—that campus dissent, protest, activism, and violence were on the wane. Now, with the college year ended, only a few will hazard a prediction. Whether the disorder will increase or subside when they reopen seems likely to depend on future events yet unforeseen and to some extent on the effectiveness of leadership on the national level. So far this administration has been even less successful than the preceding one in gaining the confidence of the younger generation, or in convicing it that our national policy is sound.

No administrator on either the national or local level can hope to be loved, admired, or followed by that segment of the younger generation which is convinced that all administrators are evil and that the Establishment must be overthrown. But this segment is a small minority of the nation's seven million college students. The great majority still is searching for leadership that it can

respect, as was demonstrated by those who shaved their beards and cut their hair in order to campaign more effectively for Senator McCarthy. There is grave danger, however, that in the absence of acceptable leadership, more students will give their allegiance to leaders who offer nothing but anarchy.

Millions of words have been written in efforts to account for the widening gap between young people and those whom they identify as "the Establishment." Though many causal factors have been listed, none of the hypothesis so far advanced adequately explains why the students of recent years differ so greatly from those of the Fifties, most of whom accepted the System and seemed eager to become a part of it. Why has there been so great a change in so short a time?

If dissent were found only in the United States, it might appear that the major cause is the moral dilemma presented to young men by our involvement in Vietnam. But, since protest and violence have become equally common in the universities of Japan, Mexico, Canada, France, Italy, and other nations not involved in the Vietnam conflict, any acceptable hypothesis must explain the world-wide nature of today's youthful activism. It must also account for the fact that college students—most of whom receive draft deferments, and few of whom get into combat even if they are drafted after graduation—protest more angrily than do the non-college men who are called upon to do the fighting. To say that it is because they are more intelligent and better informed seems a limp explanation.

Those who blame rigid college rules and authoritarian administrators for campus revolt must explain the fact that some of the most violent protests have occurred on campuses where the administrators have been noted for their liberalism, and where students enjoy an exceptional amount of freedom. They must also explain why the revolt came in the Sixties rather than a generation or two earlier when administrators enforced far more rigid rules without meeting much protest.

The view that campus unrest results from the bureaucracy and impersonality that come with large institutional size has some validity but cannot be a sufficient cause. Several American universities were excessively large even a generation ago (New York University enrolled 31,000 students in 1936), while some of the recent disorders have occurred on much smaller campuses.

The threats to the quality of life imposed by overpopulation and pollution increase the level of anxiety but do not adequately explain the attacks on the Establishment. It is young men and women, rather than older members of the Establishment, who have most of the babies, and it is they who can reduce the birth rate if they choose to do so. Industry can legitimately be blamed for much of the pollution, but students who drive overpowered cars also contribute to it.

Those who attribute campus protest to permissive child rearing must produce evidence, first that permissiveness really is productive of protest-prone personalities, and second that the students of the Sixties were reared more permissively than those who came to college a decade earlier. In the absence of such evidence, it seems unlikely that there was much change in child-rearing practices in so short a time.

When students are asked for their own explanation of the unrest, a frequent answer is, "Because we are *aware*." And indeed they are: well aware of social injustice, of the helplessness of individuals in a mass society, and of the dangers of pollution and of nuclear war. Yet, it seems a bit presumptuous for them to assume that no previous generation has been aware of the evils of the world or of the problems facing the nation. Students of the Thirties were aware of the horrors of war and of the probability that many of them would die in a second world war. They read daily of the threats to freedom posed by the rise of Hilterism. And they knew at first hand what it means to come to maturity during a depression.

Many of the students who came to college in the late 1940s and early 1950s had been personally involved in warfare, and all of them were aware of the existence of nuclear bombs that could destroy civilization. Yet, the level of campus protest was much lower in those previous decades than it is today.

Two recently published collections of essays by academic men throw additional light on these problems even though they do not adequately explain the magnitude of dissent on campuses. *Students in Revolt,* edited by Seymour Martin Lipset and Philip G. Altbach (Houghton Mifflin, 561 pp., $8.95), presents the international picture with chapters on activism in Asia, Africa, Europe, and Latin America. *Student Activism and Protest, edited* by Edward E. Samson and Harold A. Korn (Jossey-Bass, 265 pp. $8.50), covers the American scene.

The historical portions of the first of these books make it clear that anyone who wishes to avoid a revolution should not take student activism lightly. In Germany and Austria, students played a key role in the revolutions of 1848. In czarist Russia, they spearheaded various revolutionary movements and helped pave the way for the Revolution of 1917. More recently, student demonstrations played a role in the overthrow of Perón in Argentina and Jimenez in Venezuela. In 1960 the massive riots of Japanese students against the Security Treaty between the United States and Japan forced the resignation of the Kishi government. In all these nations the number of students in universities was much smaller than in the United States today.

The contributors to *Student Activism and Protest*—seven psychologists, one sociologist, and a political scientist—identify different types of dissenters; they stress the fact that only a small minority engages in violent or illegal forms of protest. James Trent, a psychologist at UCLA, says that, while some engage in "rebellion for the hell of it" and a few are anarchists who "want devastating confrontation for its own sake," others are "rationally motivated intellectual dissenters who are not interested in bringing down the social order but in probing it, testing it, and changing it." Kenneth Keniston says that the popular stereotype of the protesting student as a long-haired and unkempt individual who is influenced by Maoist or Castroite doctrines and who also experiments with psychedelic drugs, confuses two distinct varieties of students—the alienated and the political activists. In his own studies at Harvard, he has found that alienated students are not likely to engage in demonstrations, which they see as mere role-playing. Activists are of a different psychological type, which Keniston describes as the "protest-prone personality," noting that a student who demonstrates for one cause is likely to demonstrate for a number of others. Such students are not alienated. Many of them come from families with liberal political views, and their parents support their protest activities. They are recruited from among those young Americans who have enjoyed what is commonly considered the best of American life and have had the greatest opportunity to advance within the System.

The role of the faculty in stimulating and encouraging protest movements has not yet received the attention it deserves, but Sampson, in his introductory chapter, mentions two groups of faculty members who are sympathetic to the dissenters. The first is "composed of the old, disillusioned rebels of the Thirties [who] see in the present student movement their own life replayed, now life-sized on a screen outside their offices. Though their heart is with the movement, their minds tell them that failure is all that faces these new activists."

A second sympathetic faculty group "is composed of the younger, just Ph.D.'d instructors and assistant professors who rose from the ranks of the more recent protests and who now come naturally to continue their battles. These are the faculty who can be seen huddled head to head with the student activists at every planning session, joining together with them in preparing what they hope will be the groundwork for the wave of tomorrow." These younger faculty members, like the students, are prone to see university administrators as "the enemy in residence," and, because of the rapid growth of universities in recent years, they often outnumber the older ones. Dissenting students, because of their reluctance to trust "anyone over thirty," are prone to follow the lead of the younger faculty members.

Several of the authors repeat a statement that has appeared in a dozen previous volumes: Student protest is found mostly in highly selective institutions, and is rare in less prestigious institutions "such as teachers college." In addition to being outdated by events of late, such a statement reveals a remarkable lack of awareness of recent changes in higher education. In most parts of the nation, teachers colleges as separate institutions disappeared from the scene a full generation ago. Some of the state colleges and universities that grew out of them—San Francisco State and Kent State are conspicuous examples—have had their full share of protest and violence. Activism is no longer restricted to a few campuses, or to any one type of institution.

Richard Flacks, a sociologist at the Santa Barbara campus of the University of California, offers a hypothesis that organizes a number of the contributing causes of unrest into a pattern: "The expansion of higher education in our society has produced a social stratum that tends to rear its children with values and character structures that are at some variance with the dominant culture. Affluence and secure status further weaken the potency of conventional incentives and undermine motivations for upward mobility. The outcome of these new processes is a new social type or subculture among the young—humanistic youth. Such youth are especially sensitized to injustice and authoritarianism, are repelled by acquisitive, militaristic, and nationalistic values, and strive for a vocational situation in which autonomy and self-expression can be maximized. They have been politicized and radicalized by their experiences in relation to the racial and international crisis, and by the failure of established agencies of renewal and reform, including the universities, to alleviate these crises. They also sense the possibility that opportunities for autonomy and individuality may be drying up in advanced technological societies."

One additional factor deserves mention—the contagion that has been notable since the first Berkeley disorders were televised. In the words of Donald Brown, a psychologist at the University of Michigan: "The news-hungry media tend to fan the sparks of unrest by massive and immediate publicity. . . . There is bound to be a generalization and spread of effect from campus to campus." There is little doubt that the nationwide publicity given to student protest leaders encourages the rise of such leaders on other campuses.

Whether or not our military involvement in Southeast Asia is the major cause of unrest in the United States, it seems clear that the decision to move into Cambodia provided the trigger for the violence that led to the closing of hundreds of American colleges and universities in the spring of 1970. If the withdrawal of our troops proceeds on sched-

ule, and campus dissent remains at its present level, it will be apparent that the search for more deep-seated causes must continue.

Although some of these authors suggest possible ways of reducing campus tension—experimental programs, student participation in policymaking, special programs for the disadvantaged, and the cluster-college plan for reducing institutional size—those in search of immediate solutions will not find them in books such as these. Academic men, by virtue of their training and traditions, are more skilled in analyzing problems (and proposing further research) than in offering clear recommendations and answers to the question that many administrators have faced: What ought a college president to do when he is confronted by a group of students who present "nonnegotiable" demands and threaten violence if their demands are not met immediately? To say that the president must continue to search for underlying causes of the unrest is a feeble answer. To wait until he acts and then to criticize the action taken is irresponsible.

The faculty, as a policymaking body, has a clear responsibility to formulate procedures for dealing with such confrontations, and to support the administrative action taken when it is consistent with pre-established policy. The unwillingness of faculty members to support even the best college and university presidents has made it more difficult for administrators to deal wisely, effectively, and promptly with activities that, if continued, would bring down the institutions of higher learning.

---

## CAMBODIA OPERATION ANALYZED BY COL. WILLIAM C. MOORE, USAF

---

## HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. TEAGUE of Texas. Mr. Speaker, the U.S. News & World Report of June 22, 1970, carried an article entitled "Hanoi Has Suffered a Crippling Blow," and the issue of September 7, 1970, an article entitled "Cambodia Plus 2 Months." Both of these articles were written by Col. William C. Moore, the vice commander of Headquarters Command, USAF, Bolling AFB, Wash. Colonel Moore has served as a member of the Strategic Plans Group of JCS and also with SHAPE as a strategic planner. I believe his military appraisal of the Cambodian operation to be excellent and commend its reading to Members of this body.

The article follows:

"HANOI HAS SUFFERED A CRIPPLING BLOW"

(By Col. William C. Moore, USAF)

The Cambodian operation to date has been analyzed, evaluated and reported mainly in terms of statistics. The statistics are impressive. They leave no doubt that the enemy has been hurt. Now two essential questions arise: How permanently and how deeply has the enemy been hurt—and how quickly can he get well?

First, how deeply have the Communists been hurt?

The sheer magnitude of the impact that operations into Cambodia has had on the enemy's capability to fight is hard for many to comprehend.

It might help to recall MacArthur's landing at Inchon in the Korean War. Inchon serves a classic example of what happens to an enemy—no matter how well trained, organized or resolute—when his rear areas, his rest areas, his supply areas, his lines of communications are overrun.

Plans are disrupted, units decimated, communications destroyed, concerted resistance made difficult. Well-disciplined soldiers become preoccupied with their own survival, with their fear of death, capture or isolation. Their capability and effectiveness as soldiers are seriously impaired.

The Cambodian operation has not been reported in this press as a classic military flanking movement, as was Inchon. Nevertheless, it has had the same destructive effect always associated with a successful flanking maneuver or penetration. Not even the jungle can hide the facts. Not even the cleverest propaganda from the leaders in Hanoi can minimize the military debacle they have suffered.

The results to date—the booty captured, the bunkers uncovered, the enemy killed—tell the story.

Suddenly the leaders in Hanoi have suftheless, it has had the same destructive effectively contest U.S. operations, to terrorize the countryside, to disrupt urban and suburban centers of friendly forces. Suddenly there are no zones for soldiers to rest and recuperate, to regroup and replan new attacks. Suddenly the lines of communications to supply these troops are severed and the avenues to restore them are greatly diminished. Suddenly a large portion of the North Vietnamese force is no longer available to quickly and efficiently carry out Hanoi's attacks on South Vietnam. Suddenly, in the classical military sense, the leaders in Hanoi have been outmaneuvered, their lines penetrated, their communication zone supporting their frontline troops overrun.

Secondly, what lasting effect will the Cambodian operation have?

At this point the enemy has few alternatives except to continue his efforts to redress the tactical situation which is now highly unfavorable to him. The most pressing need is new supply routes and bases to replace those now controlled by U.S. and friendly forces.

In the meantime, there is an urgent need to save as many troops as possible—to regroup them, to re-equip them, to reinforce them, to re-establish them as a viable force.

How successful the leaders in Hanoi will be in doing this, only time will tell. The monsoon season will cause them trouble. It most certainly will delay their efforts.

Given time, the enemy will undoubtedly be able to improve the situation now confronting him. Some sense of order will be restored and there will be a step-up in attacks as supply lines begin to fill up. In time—much time—the enemy may be able to re-establish the capability it possessed before the operation into Cambodia. The U.S. will monitor closely his actions to do this. What the enemy does will serve as a clue to his determination and future intentions.

No matter what course of action the enemy decides upon, he can never regain the time that the Cambodian operation has provided President Nixon to proceed with the Vietnamization program and the attendant withdrawal of United States forces. Nor can Hanoi undo the shot in the arm that the Cambodian operation has given the South Vietnamese armed forces.

Without question, Hanoi desperately would like to disrupt the Vietnamization program. In the long run, Vietnamization confronts Hanoi with the dim prospect of a protracted war in which the principal adversary is not the prestigious United States but South Vietnam itself. In this light, Vietnamization confronts the leaders of Hanoi with a war in which there is little glory, less prestige and great opportunity to lose face.

This is the real military story of the Cambodian operation—the one receiving only minor attention. The operation has saved countless American lives—the exact reason for which U.S. forces entered Cambodia. No one can contest this. Moreover, the operation has engendered a new optimism that Vietnamization and its attendant withdrawal of U.S. troops will succeed. The achievement in Cambodia will rank high in the classical military sense, as passage of time reveals its full military scope and significance.

---

A MILITARY APPRAISAL—CAMBODIA PLUS 2 MONTHS

(By Col. William C. Moore, U.S. Air Force)

Four months have passed since U.S. forces moved into Cambodia to destroy Communist sanctuaries. Two months have passed since U.S. troops completed their mission and were withdrawn on June 30.

What are the military results at Cambodia-plus-two-months?

Sufficient time has not passed to permit a conclusive appraisal of the over-all strategic implications of the Cambodian operation. But sufficient time *has* passed to permit analysis of the tactical pluses and minuses that accrued during the operation and since.

On balance, the pluses far exceed the minuses. Most importantly, the Allied position in South Vietnam has improved far more than expected. And it was to improve the Allied position in South Vietnam that the Cambodian operation was undertaken.

The most significant failure of the Communists has been their slowness in re-establishing new base areas from which to conduct operations against South Vietnam. They are attempting to do this now in Southern Laos and Northeast Cambodia. Here the enemy has been forced to accept less efficient, more vulnerable alternatives than the sanctuaries he had in Cambodia.

Sanctuaries, assembly areas, bivouacs—call them what you wish—are extremely important to military operations. They permit combat troops to rest, regroup and plan new attacks. Most importantly, they permit combat units to assemble, to concentrate in force prior to commitment to battle.

Without base areas, concentration must be done independently by small units at the scene of battle.

Under the most favorable circumstances, this is a tricky, highly sophisticated military operation which military leaders try to avoid as extremely dangerous. To attempt such an operation—considering the climate and terrain of Southeast Asia—would be a cardinal tactical error.

The consequences to North Vietnamese commanders making such a decision would more often than not be disastrous. Commitment of forces would be piecemeal, with subsequent defeat in detail by Allied forces. The military commanders in Hanoi and in the field know this.

In order to comprehend fully what the loss of the base areas in Cambodia means to the enemy, the loss should be viewed in the perspective of history.

In 1967 the enemy base areas, known then as War Zone D, War Zone C and the Iron Triangle—and encompassing more than 1,500 square miles of area—were in South Vietnam. The Iron Triangle was only 25 miles from Saigon.

In late 1966 and early 1967 these areas were overrun and cleared out by the Allies during a series of operations, the principal one being "Junction City."

As a result, the enemy established new sanctuaries in Cambodia, principally in the areas called Fishhook and Parrot's Beak.

Now these have been disrupted by the Cambodian operation; the newest strongholds, it appears, will be in Northeast Cambodia and Southern Laos, approximately 275 miles from Saigon.

The geographical progress since 1967 in reducing the threat to Saigon, and indeed the whole of South Vietnam, is readily apparent

This retrogression is a serious blow to the enemy. Vital areas of South Vietnam are now great distances from the new bases. Enemy troops will no longer have a short midnight jaunt to their targets. Infiltration routes will no longer be as free from danger as they once were. The new sanctuaries themselves will not be immune from attack, as were the old. The Allied air forces will see to this. There will be no rest and recuperation for the troops once they leave North Vietnam.

Enemy leaders will find that planning and conducting military operations under these conditions will be far more complicated and hazardous than before. Getting troops to vital targets will be at best a long-drawn-out operation. Supplying them for any form of sustained attack will be even more difficult and time-consuming.

The dilemma facing the enemy planners will be nothing compared with that facing the individual soldier who will be operating continuously in an environment that will grow more hostile each mile he travels southward from North Vietnam. The trail south will not end in a large, well-stocked, secure rest area, as it once did. For many soldiers, apprehension and preoccupation with their own survival will make them less effective, less able to carry out the tasks assigned to them.

Under these conditions, it is doubtful whether the enemy ever again will be able to mount a large-scale operation in the Mekong Delta or, for that matter, in the southern half of South Vietnam. If he does, it will be short-lived, suicidal and of no lasting significance. The report that the enemy will return to guerrilla warfare using extremely small units is undoubtedly true. But this decision is not a preferred choice by the leaders in Hanoi. The operation into Cambodia has given them no alternative.

Since the end of the Cambodian operation, the U.S. Department of Defense has monitored statistics in South Vietnam closely to determine trends. These statistics confirm the optimism engendered during the Cambodian operation. The tactical situation is better, not worse. The chart on page 32, prepared by "U.S. News & World Report," shows the dramatic improvement since the attack on the Cambodian sanctuaries. It is worth noting that the number of enemy killed has dropped. This is a plus, not a minus. It indicates an unwillingness to stand and fight—not better performance by the enemy.

The reductions take on added significance when you consider that the statistics shown prior to the Cambodian operation are themselves a dramatic reduction from the statistics for 1969. In American lives lost, for example, the post-Cambodian figures represent a 35 per cent reduction from the pre-Cambodian figure, as shown on the chart, but this is a 60 per cent reduction below 1969 figures.

Recent reports indicate that infiltration of enemy troops into South Vietnam, based on monthly averages for the first half of 1970, has been one half the 1969 monthly average—from 12,000 to 6,000 per month. This is barely enough to replace losses.

These signs point to significant progress in the tactical military sense. This in turn portends progress in the broader strategic sense. It means progress in Vietnamization. Asian forces are assuming more and more of the burden. The number of combat operations in which absolutely no U.S. forces are involved increases daily. U.S. forces are being withdrawn on schedule. Draft quotas at home, as one result, are the lowest since 1964.

The optimism contained in this report does not mean that the U.S., South Vietnam or Cambodia itself is out of the woods. Things could change, governments could fall, the end of the monsoons could signal new initiatives on the part of North Vietnam. Targets in South Vietnam opposite the new Communist base areas are sure to come under more and more fire—as indeed some already have. The figures on the chart may rise; they may approach the pre-Cambodian figures. But at present, this seems unlikely.

The U.S. will continue to monitor closely enemy activity to determine Communist intentions. Their activity in Cambodia and Laos will be of particular interest. The leaders in Hanoi, having suffered a crippling blow to their ability to attack South Vietnam, may now attempt to redress the situation at the expense of these two countries. The odds at present, however, do not favor early success in such a venture.

## A LETTER FROM VIETNAM

### HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. ASHBROOK. Mr. Speaker, the Mount Vernon News of Mount Vernon, Ohio, carried in its September 18 issue a letter from S. Sgt. George W. Curry now serving in the jungles of Vietnam near the Cambodian border. I know that Sergeant Curry speaks for the overwhelming majority of American boys in Vietnam when he states:

How we are fighting this war is questionable at times, but the question of it being right or wrong is so ridiculous, it amazes me.

Of course, Sergeant Curry is learning the realities of the Vietnam conflict the hard way—by actual participation in the defense of the Vietnamese people against an unbelievably cruel and brutal enemy.

But one need not be exposed to the horrors of the Vietnam conflict to arrive at the truth. The late Dr. Tom Dooley described his experiences in Haiphong in 1954 when he treated victims of Communist brutality from the Communist North. Since that time many sources have documented the utter disregard for human life which has typified the activities of the Vietcong and North Vietnamese Communists. Yet there are those clergymen, public officials, educators, and others who can still claim that the United States plays an immoral role in the Vietnam war.

Following is the letter of Sergeant Curry whose feelings, I am sure, are those of the majority of thoughtful American citizens here at home as well as those of our servicemen in Vietnam:

PEOPLE'S FORUM

EDITOR, THE NEWS:

This is the first opportunity I have had to express my feelings toward the riots, student unrest, violence, and general dissent of the American people.

I myself, am in the middle of the jungle in Vietnam with Cambodia only a stone's throw away. Being in the position to know both sides, I wonder sometimes if people actually know what they are saying by "end the war." How we are fighting this war is questionable at times, but the question of it being right or wrong is so ridiculous, it amazes me. Communism is an enemy of any democratic society, be it here in Southeast Asia or right in the middle of the public square. I feel that what we are doing here safeguards our own country, families, and our way of life. This disease called communism must be battled even at the risk of American lives, because if not stopped here, it would eventually infect the good old U.S.A.

I'm more than willing to sacrifice a year and even my life to protect the things that are held most dear to me and I'm sure that the majority, if faced with the decision, would feel the same.

Like many young men of Mount Vernon and Knox County, I was drafted into the Army. Although my tour is relatively short. I have witnessed the devastating effects that a minority can impose on the majority. The young people of our city, state, and country are not all dope addicts, hippies, or revolutionaries. There are still some who value freedom, have respect for authority, and are willing to face the problems of the world, as it is today. These young people are your leaders of tomorrow, so cultivate in them the ideals that we, as Americans, fought and died for!

I am proud to be an American doing what is necessary to preserve the idea of "Americanism." No truer words were ever spoken when it is said, "For those who have fought for it, freedom has a taste the protected will never know!"

S. Sgt. GEORGE W. CURRY.

APO SF 96490.

## THE STORY OF FORCED REPATRIATION—OPERATION KEELHAUL

### HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. PUCINSKI. Mr. Speaker, for many years now, Mr. Julius Epstein of the Hoover Institution on War, Revolution, and Peace at Stanford University has been diligently researching one of the greatest infamies carried out in American diplomatic history, that of Operation Keelhaul.

Operation Keelhaul was an Army code name used during World War II for the forced repatriation of millions of anti-Communists back to the Soviet Union, where they were either enslaved or murdered outright.

Equally responsible for this infamy was the British Government, who worked with American forces to forcibly repatriate millions of anti-Communists back to the Soviet butchers.

Since World War II the Army has kept Operation Keelhaul files classified "top secret." Mr. Epstein sued the Secretary of the Army under the Freedom of Information Act to declassify the files, and the case eventually went to the Supreme Court. Without even examining the files, the Court denied Mr. Epstein his petition of certiorari, which disregards the intent of Congress under the Freedom of Information Act.

It has been 30 years since the infamous Ribbentrop-Molotov treaty. In the light of the on-going Soviet conspiracy and the manner in which the Soviets are continuing their treachery the world over, the American public ought to know how this country and the British were deceived by the Soviets into carrying out Operation Keelhaul. We ought to know who was part of this operation, what arguments were used to carry it out, what forces were at play, what agencies were

involved, and how this monstrous conspiracy was carried out.

In front of the National Archives Building here in Washington, one sees two inscriptions; one reads: "What is Past is Prologue," and the other: "Study the Past."

In receiving the full report on Operation Keelhaul, we Americans can be apprised of how a nation can be betrayed and from that lesson gird ourselves against a similar betrayal by the Soviets and their friends and dupes as they plunder the Middle East and prepare for new aggression into Africa, India, and other parts of the world.

Mr. Epstein will soon have published a book entitled "Operation Keelhaul—The Story of Forced Repatriation." I should like to place in the RECORD today a synopsis of his book which he prepared before the Supreme Court decision was issued.

I should also like to include in the RECORD two articles by Mr. Epstein which appeared in the Palo Alto Times concerning his legal action against the Secretary of the Army and the Supreme Court decision, and the notice from the Supreme Court denying a writ of certiorari.

Mr. Speaker, Julius Epstein is to be congratulated for his untiring efforts to bring before the American public the sordid details of Operation Keelhaul. He is a brilliant scholar whose sense of justice propels him onward to seek out the truth against those who commit crimes against humanity, serving to remind us that eternal vigilance is the price of liberty.

I also today call upon Secretary Laird to declassify the reports on his own initiative. I know this report will show a dreadful story of American duplicity but I am certain the American people are big enough, wise enough and strong enough to accept this information as an effort not ever to let it happen again.

Mr. Epstein's report follows:

OPERATION KEELHAUL AND MY LEGAL ACTION AGAINST THE SECRETARY OF THE ARMY

(By Julius Epstein)

What does "Keelhaul" mean?

According to Webster, Second Edition, "Keelhaul" means and I quote: "To haul under the keel of a ship, either athwartships or from bow to stern by ropes attached to the yardarms on each side. It was formerly a punishment in the Dutch and British navies and a method of torture used by pirates." Unquote. As naval historians tell us 95-99% of those "keelhauled" died in the process of their punishment, which is no wonder when you think of the thousands of goose barnacles on the hull of the boat which ripped the bodies of those subjected to this torture.

Fully aware of the meaning of the word "Keelhaul," the American army chose this word as the code designation of a three-volume documentary dossier, comprising the evidence of what I consider to be an American-British crime against humanity, the forced repatriation of millions of anti-Communists to Stalin's executioners and Siberian slave labor camps after World War II.

The fact that the army itself chose "Keelhaul" as code name for its own forcible repatriation of anti-Communists and especially anti-Stalinists, speaks for itself. It does not need any further comment.

The "Operation Keelhaul" dossier was assembled in 1948 by the army's historical division. It contains American as well as British documents. From its origin on, "Operation Keelhaul" was classified as Top Secret.

Before I go into the details of this classification, unjustified under American law and executive practice, and before I tell you about my lawsuit against Mr. Stanley Resor, the American Secretary of the Army, which is to the best of my knowledge, the first trial in American history to obtain the de-classification and release of improperly classified documents, I'll give you, in a nutshell, so to speak, the essence of this American-British crime against humanity, now known as "Operation Keelhaul."

Since Stalin had decreed early in the war that the Soviet Government considered every Soviet soldier who became a prisoner of war of the Germans as a "traitor to the fatherland" to be punished after his return, and since Molotov had declared and I quote: "We do not have prisoners of war in Nazi hands, we have only traitors" unquote, it is not hard to understand that the vast majority of the millions of Soviet nationals in German POW camps did not want to return to the USSR. Certainly, nobody could ever blame them for their intention not, under any circumstances, to return to the Soviet Union.

While this intention not to return prevailed among the large majority of all Soviet prisoners of war in German hands as well as among the forced laborers deported by the Germans to the Reich, there was a special group of Soviet prisoners in Germany who had additional reasons not to set foot again in the USSR. I am speaking of General Vlasov and his far more than one million followers.

Who was Vlasov?

General Andrei Andreevich Vlasov had a long and distinguished career in the Red Army. He was, of course, brought up as a Communist. In his youth, Vlasov had been deeply impressed by Lenin's promises of "peace, land and bread." He believed in the sincerity of the promises made not only by Lenin but also by Trotsky, Bukharin, Sinowjew, Kamenev, Piatakov, Rader and others, all men who turned out, if we believe Stalin, to be nothing but traitors, diversionists, agents of Western imperialism, etc. Most of them, as you know, were shot in the great Stalinist purges of the late thirties.

At the outbreak of World War II, when Hitler attacked the Soviet Union on June 22, 1941, Vlasov was Commander in Kiev. Stalin appointed him Commander-in-Chief of the 20th Army. As such, he was in charge of the defense of Moscow, now threatened by the Germans. Vlasov succeeded in pushing the Germans back to Rzhev, a distance of more than 125 miles. He had saved Moscow. For this deed, Stalin awarded him the Order of the Red Banner after he had already awarded Vlasov in January 1941 the Lenin Order.

On June 12, 1942, General Vlasov became a prisoner of war of the Germans. He was brought to Vinnitza in the Ukraine, the seat of the German High Command. It was there that Vlasov met many high ranking Red Army officers and could freely discuss for the first time in his life Soviet affairs without the perennial control and threat by Soviet commissars and the secret police.

In Vinnitza, Vlasov met the Soviet colonel Vladimir Boiarskii, Commander of the 41st Guard Division. Boiarskii told Vlasov that he hated the Soviet regime and that he thought it was possible to overthrow it with the help of the Germans. However, he was ready to cooperate with the Germans only under the condition that "liberation" and not "conquest" was planned.

Vlasov agreed. He and Boiarskii realized that a great many Russian soldiers would immediately desert if they only could be assured that they would not have to deal with the Nazis, but with a Russian national liberation movement, a liberation movement which would honestly represent the genuine national interests of the Soviet people.

The two former Red Army officers now wrote the first document of the Vlasov movement. It was a memorandum in which they declared that the vast majority of the Soviet population as well as the Soviet armed forces would welcome the overthrow of the cursed Stalin regime. Vlasov and Boiarskii stated that Stalin's forced collectivization had cost the lives of more than 10 million people, they recalled the history of the purges under the GPU chief Jeshov in the years 1936 to 1938, when every year 8 to 10 million Soviet citizens disappeared in Stalin's Siberian slave labor camps.

Sven Steenberg, whose Vlasov biography, "Vlasov, Traitor or Patriot?" appeared last year, states, and I quote:

"There is hardly any other example in history, that a regime was feared and hated by such a large segment of the population, as Stalin's regime. Only this fact explains that millions of Soviet citizens who felt no less nationalistic than the citizens of other states, were ready to enter into an alliance with the aggressor against their own regime. Only if we have this in mind can we understand that even those who had, in the beginning, no own conception, arrived at the same conclusion by the free dialogue with their compatriots." Unquote.

Thus, the Vlasov movement was born. A movement, unique in the history of war, a movement which the West has never been able to understand.

Ideologically speaking, the greatest ally of Stalin's in the fight against Vlasov and his movement with hundreds of thousands of deserters was Adolf Hitler and his East expert, Alfred Rosenberg, the Reichsminister for the Occupied Soviet Union. Both recognized only one goal: relentless subjugation and colonization of Poland and Russia. All Slavs were nothing but "Untermenschen" whose only purpose in life was to be the servants of the German "Herrenrasse."

Therefore, whatever support the Vlasov movement received from the Wehrmacht was, until very late in 1944, in contradiction to Hitler's and Rosenberg's intentions and orders. It was an expression of the Wehrmacht's opposition to Hitler's "Ostpolitik."

The message, contained in the Vlasov-Boiarskii Memorandum spread rapidly among the Soviet prisoners of war in the occupied zone as well as within the Reich itself. Millions of Soviet nationals saw themselves confronted with the problem whether or not to side with the Germans as the only practical way to destroy Stalin and Stalinism. Their other alternative was to defend the fatherland and, by doing so, to strengthen the hated regime.

To Vlasov's many friends and supporters among the German officers' corps belonged the most outstanding and courageous enemies of Hitler and everything he stood for: Colonel Count Stauffenberg who, on July 20, 1944, planted the bomb at the Fuehrer's Hauptquartier at Rastenburg and who was executed a few hours later in Berlin; the ambassador to Moscow, Count von der Schulenburg, who was also executed after July 20, 1944. Among the supporters of Vlasov and his movement we even find General Halder, Chief of the General Staff, an ardent opponent and conspirator against Hitler and Nazism. General Halder appointed Lieutenant Colonel Reinhard Gehlen to be "Director of the Department Foreign Armies East." Gehlen deeply believed in Vlasov's theory of an alliance with the Russian people in order to overthrow Stalin. He became later Chief of Chancellor Adenauer's Military Intelligence Bureau. Admiral Canaris, the chief of the German Counter Intelligence Corps, was another one among Vlasov's friends.

All these prominent people and thousands of others, less known officers, supported Vlasov and waged a courageous and immensely dangerous battle against the official Nazi Ostpolitik. They successfully sabotaged it

time and again. Under the silent toleration by the German OKH (Oberkommando des Heeres) but without the knowledge of the Fuehrer's headquarters, deserters and other prisoners of war were used in steadily increasing numbers by the German front units as drivers, mechanics, ammunition carriers etc. without being officially listed.

These Soviet nationals formed the very core of the later established "Russian Liberation Army."

The formation of a "Committee for the Liberation of the Peoples of Russia" was to be proclaimed in a special radio message from Smolensk. The proclamation was the so-called "Smolensk Manifesto" which consisted of 13 programmatic points.

The "Smolensk Manifesto" demanded the abolition of forced labor and all collective farms, the re-establishment of trade and private initiative, social justice and immediate termination of the reign of terror and violence. It also demanded complete freedom of religion, conscience, speech, assembly and press, as well as the inviolability of every person and his residence. It was modeled after the American Constitution and the Bill of Rights.

The Manifesto was a revolutionary bombshell and was so received. Millions of Russians greeted Vlasov as a messiah, a new liberator from Bolshevist terror and tyranny. The Manifesto did not mention Hitler and the Nazis with a single word. The Nazis tolerated the broadcast from Smolensk only as a propaganda lure to induce more Soviet troops to surrender to the German Wehrmacht. In spite of this fact, the Manifesto had the effect of binding millions of anti-Stalinist Soviet soldiers on both sides of the front. From now on they considered themselves as ideologically belonging to the Vlasov movement.

On November 14, 1944, Vlasov proclaimed the so-called "Prague Manifesto" in the presence of many high ranking SS officers.

Again, the Nazi hierarchy, unable to stop the Vlasov movement, was forced to tolerate it under the pretext of propaganda. The Prague gathering confronts us with a unique phenomenon in modern history: High ranking SS officers, exemplifying the most brutal and atrocious part of the Nazi apparatus, listening to Vlasov's most liberal and democratic document. If anybody had dared to proclaim such a program for the Germans, oppressed by the Hitler regime, he would have been shot or put in a concentration camp within hours. But here in Prague, the SS officers had to listen and even to applaud General Vlasov.

The preamble of the "Prague Manifesto" states and I quote:

"There is no worse crime than the one Stalin commits of destroying the countries and suppressing the peoples who strive to preserve the land of their forefathers and to build their happiness by their own labor. There is no worse crime than to subjugate another people and force one's own will on them." Unquote.

Can you imagine how the SS officers, now listening to Vlasov, must have felt when they heard this accusation of Stalin which was, of course, at the same time the strongest accusation against the Hitler regime ever uttered in their presence? But they had to swallow their Nazi pride and even to applaud Vlasov. Their only weak defense was their reservatio mentalis that it was only for "propaganda reasons."

The Prague Manifesto continued:

"The Bolshevists robbed the people of freedom of speech, freedom of political convictions, their personal liberties, free choice of domicile and travel, freedom of profession and the opportunity for everyone to take his place in society in accordance with his capabilities. They replaced this freedom with terror, party privileges, and arbitrariness toward the individual." Unquote.

The Manifesto laid down once and for all the aims of the "Committee for the Liberation of the Peoples of Russia" which were to overthrow Stalin's tyranny, to end the war, an honorable peace, the creation of a new free people's political system without Bolsheviks and exploiters. This was followed by 14 main principles which included the liquidation of the kolkhozes, forced labor and the re-introduction of "inviolable private property, earned by work." The Manifesto ended with the sentence: "The Committee for the Liberation of the Peoples of Russia calls upon all of you to unite and to fight for peace and freedom." It was signed by Lieutenant General A. Vlasov and by 36 members of the Committee, as well as by 11 candidates.

At that time—November 1944—the final defeat of Hitler was already visible. With the approaching defeat of the Hitler regime in mind, Vlasov and his General staff as well as his followers decided to surrender to the Americans and the British as the case may be. They wanted to surrender to the West—not only to escape forced repatriation, which could only mean death or slave labor camps, but also because sooner or later, the West's alliance with Stalin would necessarily come to an end since it was a most unnatural and uneasy coalition. When the break would come, so Vlasov and his officers thought, their movement with far more than one million people might be a welcome ally to the West. Vlasov correctly foresaw the decay of the uneasy alliance, but he was greatly mistaken about the West's capacity to understand his own motivations.

While one million Soviet nationals had registered as volunteers in the Vlasov army, less than 50,000 men were actually armed and organized as a fighting unit. They fought their first and last battle on the Eastern front near Frankfurt on the Oder. Shortly after this engagement, the division decided—without German approval—to leave the front and to march in the direction of Czechoslovakia and the Americans.

In May 1945, the short history of the Vlasov forces reached its climax with the liberation of Prague. Most people—among them even historians—do not know that Prague was liberated from the Nazis by Vlasov troops under the Command of his Staff officer, Buniachenko. It happened on May 5, 1945. More than 300 Vlasov soldiers and officers were killed or wounded.

An American correspondent's eye-witness report appeared in the Saturday Evening Post. It stated: "Prague really was liberated by foreign troops, after all. Not by the Allies who did not arrive until the shooting was all over, but by 22,000 Russian outlaws wearing German uniforms. The leader of these renegades was General Vlasov, a former hero of the Red Army." Unquote.

While the battle between the Vlasov troops and the Czech resistance on the one side and the Nazi troops on the other was still raging, a so-called "Provisional Government" was formed. It was dominated by Communists who did not like the idea that Prague should be liberated by non-Communists. They were waiting for Marshal Koniev and Stalin's Red Army. But they could not prevent the Vlasov troops in alliance with the anti-Communist resistance movement from liberating Prague. Not before this was achieved, the resistance was overthrown. The Communists ruled the hour.

Germany capitulated on May 7, officially on May 8, 1945. The Vlasov troops resumed their march to the South. They realized that there was only one way open to them: To the Americans.

They were eager to surrender to the Americans or British, not only for the reasons already mentioned. There was another reason. They wanted to make good use of the American-British specific invitation to surrender to the West. We had dropped millions of leaflets and so-called safe-conducts, signed by Eisenhower, inviting the Germans and all those who had fought with them—including the Vlasov troops—to surrender to us. We promised in these leaflets fair treatment according to the Geneva Convention. After the War Department made first the incredible blunder to promise the Vlasov troops "speedy return to your beloved fatherland," the last thing on earth they wished for, we dropped other leaflets, entreating them to surrender to the Americans, now solemnly promising them: "We shall never return you to the Soviet Union."

We did not honor this promise.

We and the British forcibly repatriated between 2 and 5 million people to Stalin. Atrocious scenes took place in every single POW camp in Germany and Great Britain, even in Canada and the United States. Thousands committed suicide, preferring death to forced repatriation to Stalin's hell.

Let me give you just one or two examples of what really happened. Then, you'll better understand why the army chose the code name "Operation Keelhaul" for the record of American-British sponsored forced repatriation.

What happened at the American camp for Soviet war prisoners at Plattling, Germany, on the 24th of February 1946? This is what happened:

During the night before they were packed into army trucks and carted off to Stalin's slaughterhouses, the 4,000 prisoners of war slept peacefully. They had again and again been reassured officially that there was no intention to deliver them against their will to a red vengeance.

The reassurance was a cruel trick. Before dawn that Sunday morning their camp was surrounded by American armed troops under the command of grim-faced officers. Though the war had ended more than nine months before, all was in readiness for one of its bloodier—and morally most shocking—operations.

At about six, the prisoners, awakened by searchlights suddenly flooding the entire camp, were hustled out of their barracks. They were frisked for weapons—not weapons of assault but of suicide. Those who resisted were beaten up; skulls were cracked and ribs smashed. Despite careful planning of the macabre business, many of the victims succeeded in slashing their wrists and throats with concealed razor blades and jagged glass. Quickly the air was filled with cursing, wailing and the agonizing moans of the wounded.

In batches the men were driven onto the waiting trucks, each guarded by American soldiers flaunting rubber clubs and machine pistols. Hour after hour, the trucks hauled away their freight of betrayed prisoners, some of them bleeding and dying, to the communist fate they dreaded far more than death.

Identical scenes occurred to the German camps for Soviet prisoners of war at Passau, Kempten, Bad Aibling, St. Veit, Marburg and Dachau.

Let me read to you a few paragraphs from an article in the New York Times of January 20, 1946 about the events at Dachau, Bavaria. The article was written by the Times' correspondent in Germany, Kathleen MacLaughlin. I quote:

"Ten renegade Russian soldiers, in a frenzy of terror over their impending repatriation to their homeland, committed suicide today during a riot in the Dachau prison camp . . .

"Twenty-one others were hospitalized, suffering from deep gashes that they had inflicted on themselves, apparently with razor blades, but no further deaths had been reported up to a late hour tonight. Many suffered cracked heads from the nightsticks wielded by 500 American guards who were attempting to bring the situation under control . . .

"The practical certainty of the fate they

would face on arrival in the Soviet area precipitated the disorder, which had its prelude Thursday in the resistance offered by the inmates in one of the barracks when ordered to line up to enter the trains waiting on the track inside the former concentration camp. Even though threatened with rifles and carbines, they refused to leave the shelter, begging GI guards to shoot them rather than carry out the extradition order . . .

"Authorities in headquarters of the United States Third Army at Bad Toelz stated in reporting the riot that every possible precaution had been taken to deliver the prisoners in accordance with the Yalta terms." Unquote.

Now, what were the "Yalta terms?"

It is important to deal with this subject because of the fact that in "justifying" forced repatriation always a reference to the "Yalta terms" is popping up as if some contractual agreements or terms prescribing force in carrying out repatriation could ever justify the crime. At Nuremberg we have taught the world that there can be no excuse for war crimes and crimes against humanity by referring to "higher orders." The top Nazis, tried at Nuremberg, were hanged for obeying "higher orders." This, certainly was just. But if it was international justice to disregard so-called "high orders" as extenuating circumstances in the case of the Nazi war criminals, it is equally just to apply the same norm to Americans who committed unspeakable crimes when they tried to justify them by referring to "higher orders" or to the abused "Yalta terms."

The truth is that the Yalta Agreement on the exchange of prisoners of war and displaced persons, signed at Yalta on February 11, 1945, does not refer with a single word to the use of force. Therefore, forced repatriation cannot be justified by any reference to the Yalta Agreement. To do this, would be a gross falsification of diplomatic history.

The truth is that forced repatriation of Soviet nationals by the Americans and British started in June 1944, eight months before the Yalta Agreement was signed. At that time Soviet prisoners were already forcibly repatriated from England to Odessa where it took the Soviet military police four days to disembark their prisoners who did not want to be returned.

As the record further shows, the principle of forced repatriation was officially accepted and acted upon by the Supreme Headquarters Allied Expeditionary Forces (SHAEF) as early as April 1945, weeks before the war's end.

This and other disturbing information on the sordid subject is spelled out in an official classified and unpublished document entitled: "The recovery and repatriation of liberated Prisoners of War, Occupation Forces in Europe 1945–1946." This highly interesting document which I unearthed, was compiled under the authority of the Army Chief Historian, Colonel Harold E. Potter by the Chief Archivist, Gilett Griswold.

This document proves to the hilt that not only SHAEF but the Joint Chiefs of Staff in Washington deliberately chose to use force to drive Soviet nationals to their doom—not because they had to but because they wanted to. On page 64 of this highly revealing document we read and I quote:

"The principle of forcible repatriation of Soviet citizens was recognized in Supreme Headquarters in April 1945. Although the Yalta Agreement did not contain any categorical statement that Soviet citizens should be repatriated regardless of their personal wishes, it was so interpreted by the Joint Chiefs of Staff. On instructions from the latter, Theater headquarters ordered repatriation regardless of the individual desire . . ." Unquote.

This decision, taken by the Joint Chiefs of Staff whose Chairman at that time was General Marshall, was distributed to all our European Army posts in May of that year as an equally restricted document. Its title reads, "Guide to the Care of Displaced Person in Germany—G5 Division Displaced Persons Branch." Let me read only two sentences from these instructions: Quote:

"After identification by Soviet Repatriation Representatives, Soviet displaced persons will be repatriated regardless of their individual wishes." Unquote.

And again, a few paragraphs later: Quote: "Enemy and ex-enemy displaced persons, except those assimilated to United Nations status, will be returned to their countries of nationality or former residence without regard to their personal wishes." Unquote.

The question arises: Why did SHAEF and the Joint Chiefs of Staff decide to invoke force against Soviet soldiers and civilians despite the fact that the Yalta Agreement did not make this obligatory?

Who was so anxious to rid the world of millions of anti-Communist Russians and other Soviet nationals, and why?

What we have learned in recent years about the infiltration of our government agencies, including the White House itself, by Soviet agents makes a clear solution of the mystery urgent and inescapable.

For that reason, I wrote a resolution to be introduced in the American Congress for the creation of a Select House Committee to investigate Forced Repatriation during and after World War II. The resolution was dropped into the hopper for the first time by Congressman Bosch of New York on February 8, 1955 as House Resolution 137.

I'll now read to you the preamble of the Bosch Resolution:

"Whereas the forced repatriation to Soviet-controlled countries of millions of anti-Communist prisoners of war and civilians by American military and civilian authorities in the years 1945–1947 in Germany and in other countries brought death and misery to untold thousands of these anti-Communists before Soviet firing squads, on Soviet gallows, and in the Siberian slave labor camps; and

"Whereas this forced repatriation of prisoners of war and civilians cannot be justified by the agreement on prisoners of war signed at Yalta on February 11, 1945; and

"Whereas this forced repatriation was in violation of the rulings in implementation of the Yalta agreement on prisoners of war, made public by the Department of State on March 8, 1945; and

"Whereas the forced repatriation of prisoners of war who had enlisted in the enemy's army was in contradiction to the opinions of the Judge Advocate General of the Army, as expressed during the last forty years; and

"Whereas the forced repatriation of millions of anti-Communist prisoners of war and civilians represents an indelible blot on the American tradition of ready asylum for political exiles; and

"Whereas the forced repatriation and annihilation of millions of anti-Communist prisoners of war and civilians of Russian, Ukranian, Polish, Hungarian, Baltic, and other origin is still poisoning our spiritual relations with the vigorously anti-Communist peoples behind the Iron Curtain, and is therefore impeding our foreign policy: Therefore be it

"Resolved, . . . etc.

Since the Committee on Rules of the 84th Congress did not report the resolution, Congressman Bosch re-introduced it in the 85th Congress as House Resolution 111 on January 17, 1957 and introduced it for the third time in the 86th Congress as House Resolution 24 on January 7, 1959.

Three times, the Bosch Resolution was introduced. And three times it was killed by the Committee on Rules.

Now, let me go back to "Operation Keelhaul". The British did not behave any better than the Americans. Rather worse, if this was possible. They repatriated under duress and unbelievable force more than 30,000 Cossacks including their wives and children. These 30,000 were assembled in Peggetz, a suburb of Lienz in the Austrian Eastern Tyrol. There were many old emigrés, among these Cossacks, who had left Russia between 1917 and 1920. By no stretch of the imagination could these old Russian emigrés fall under the Yalta or any other agreement. Nevertheless, they too were forcibly repatriated on June 1, 1945, the day of the great Lienz tragedy. The extradition of these old Czarist Cossacks surprised even the Soviet Repatriation Commission. The Soviet officers said that the British should never have repatriated them. Nevertheless, the Soviets did not return them to the British but shipped them to the Soviet Union where their leaders were tried and executed and the rest sent to Siberian forced labor camps.

The leader of the British in Lienz was Major Davis, who assured the Cossacks repeatedly on his word of honor as a British officer that they would never be turned over to the Russians. The British word of honor was as worthless as the American one which was given the prisoners in German camps. As one Cossack officer remarked: "The NKVD or the Gestapo would have slain us with truncheons, the British did it with their word of honor."

Under the fraudulent pretext to appear at a conference with higher British officials, all the Cossack leaders were carted off and surrendered to the Soviets already on May 28, 1945. Thus, the British got rid of 2,749 leading Cossack officers.

On June 1, 1945, the tragedy reached its climax.

At dawn of June 1, 1945, a tremendous procession went to an altar set up on the main square of the camp at Peggetz. Priests, garbed in their most ceremonial vestments, preceded it. There were thousands of crosses, flags, burning candles and holy books.

During the service, British tanks approached and heavily armed troops surrounded the camp. They belonged to the Argyll and Sutherland 8th Battalion, supported by the West-Kent 5th Battalion. Both battalions belonged to the 36th British Brigade. The tanks used in this British "Operation Keelhaul" belonged to the 11th British Tank Division.

Suddenly, during the continuing religious service, the British soldiers plunged into the Cossacks and their families and began beating with rifle butts on heads, shoulders, arms and faces. It was an unbelievable massacre.

The Austrian peasants of the villages, who witnessed the spectacle, first made the sign of the Cross, but soon started looting the tents and stealing the remaining horses and cattle. Church bells pealed. In near Doelsach, a black flag was hoisted on the Church spire. The British ordered it to be taken down.

As Mackiewicz reports in his book which only appeared in German, "Tragedy on the Drau," there were many honest soldiers among the British. The story was later told that one of them said to a Russian in broken Russian: "Don't surrender. They have no right."

A British soldier reported that a little girl came to him with a note, saying: "Kill us, but don't surrender us to the Bolshevists." With some difficulty, the soldier deciphered the note, put it in his pocket and began to cry.

There were many Cossacks who threw themselves under British tanks. Those who tried to escape were shot. Hundreds of Cossacks succeeded in committing suicide. Untold soldiers, women and children drowned in the river.

The so-called suicide cemetery at Lienz still bears witness today to the Lienz tragedy

which is just another name for what in reality was a British crime against humanity. Neither the Hague Conventions of 1899 and 1907 nor the Geneva Conventions of 1929 and 1949 mention force as a means of carrying out repatriation.

Our own Secretary of State, Dean Acheson, said in his speech before Committee One of the United Nations General Assembly on October 24, 1952, when the Communists wanted the United States to return by force the Chinese and North Korean prisoners of war and I quote:

"It was quite unthinkable to the United Nations Command that it should use force to drive into the hands of the Communists people who would be resisting that effort by force. That was the attitude taken by the United Nations command. It was the attitude taken by all other governments whose troops were in Korea and who would be required to carry out this forcible return if it were instituted. So far as I know, there has been no member of the United Nations outside the Communist group that has ever suggested that it was right, proper, or necessary to return these prisoners by force." Unquote.

The question arises: If it was wrong, improper, illegal or unnecessary to return prisoners of war to the Communists by force in 1952, why was it right, proper, legal, or necessary to return them to the Communists in the years 1944–1947?

The most prominent American statesmen, politicians and Generals expressed in numerous statements their strong opposition to the idea of forced repatriation.

To give you just a few examples:

General Eisenhower said on May 7, 1953 and I quote:

"People that have become our prisoners cannot by any manner of means be denied the right on which this country was founded . . . the right of political asylum against the kind of political persecution they fear . . . consequently, to force those people to go back to a life of terror and persecution is something that would violate every moral standard by which America lives. Therefore, it would be unacceptable in the American code, and it cannot be done." Unquote.

And General George C. Marshall made the following statement in a press conference in 1947:

"It is the fixed policy of the United States Government to oppose any forced repatriation of displaced persons." Unquote.

I could go on and on but time limits do not allow me to do so.

Everybody who reads today these statements necessarily asks himself: Why then, was it done?

The answer to this question is obviously buried in the three-volume dossier "Operation Keelhaul." This documentary evidence has been kept Top Secret for more than 23 years.

It is my opinion that this classification is a gross violation, not only of common sense, but of American law. A still unredeemed violation of American administrative policy as laid down by President Eisenhower.

The law governing administrative procedures concerning classification of military reports and documents was enunciated by President Eisenhower in his Executive Order 10501 on November 5, 1953.

What does the Eisenhower Executive Order 10501 prescribe?

Let me quote one paragraph:

"Top Secret. Except as may be expressly provided by the statute, the use of the classification Top Secret shall be authorized, by appropriate authority, *only for defense information or material which requires the highest degree of protection. The Top Secret classification shall be applied only to that information or material the defense aspect of which is paramount, and the unauthorized disclosure of which could result in exceptionally grave damage to the Nation such as leading to a definite break in diplomatic relations affecting the defense of the United States, an armed attack against the United States or its allies, a war, or the compromise of military or defense plans, or intelligence operations, or scientific or technological developments vital to the national defense.*" Unquote.

Now, I'll read you the text of an army document which is part of the "Operation Keelhaul" dossier and which was just a few weeks ago de-classified by the Secretary of the Army, Mr. Stanley Resor and released to me.

It reads. Quote:

"Reference operation KEELHAUL conversation between Captain Prail this Headquarters and Lt. Colonel Pateugill, ALCOME in Rome, indicates the following.

"ALCOME is unable to furnish interpreters at Separation Points or any person who will be able to identify individuals wanted imperative that individuals qualified to perform the above mentioned duties be furnished the Headquarters in order that mission may be accomplished." Unquote.

Now this little request—in a rather awkward language—for more interpreters in the Russian language was Top Secret for more than 23 years! During all these years "Operation Keelhaul" was reviewed time and again. But I was always informed that not a single document including the one I just read to you, could be released since it could endanger American foreign policy and defense.

How the disclosure of this document, part of the "Operation Keelhaul" dossier, could ever fall under Eisenhower's Executive Order 10501 is a major puzzle. How any serious person could ever maintain that release of this document would in the years from 1946 to 1969 have resulted in "exceptionally grave damage to the Nation such as leading to a definite break in diplomatic relations . . ." or an armed attack against the United States and in the other dangers, specified in the Eisenhower Executive Order, is unimaginable. This released document is the definite proof of the overclassification of documents going on in the Pentagon if there ever was such proof.

There is now a chance to get the documents de-classified and released to the American people. This chance came into being when the so-called "Freedom of Information Act" went into force on July 4, 1967. It was sponsored by Congressman John E. Moss of California who had waged a more than ten year battle for his bill.

The "Freedom of Information Act," better known as "Moss Act," provides that every citizen has the right to complain in the District Courts should the Government deny access to documents under the pretext that they are classified in order to protect American Foreign Policy and National Defense.

Then, according to the Moss Act, the Government has to prove in Court—in camera, of course—that maintenance of classification is justified. Should the federal judge find that disclosure of the documents in question would never endanger American foreign policy or defense, he has the duty to enjoin the Government to release the documents.

This is the sense of the "Freedom of Information Act."

I decided to test this Public Law 89–487 in the American courts. I filed my legal action against the Secretary of the Army, Mr. Stanley Resor in the District Court of San Francisco.

I lost in the District Court. Judge Carter found that classification was "appropriate." Period. How an American judge could find classification of documents "appropriate" without having seen them will always remain a mystery in American legal history.

I had no choice but to appeal to the Ninth Circuit Court in San Francisco. My case is still pending there.

In October 1969, the American Civil Liberties Union for Northern California joined my fight for "Operation Keelhaul." The Civil Liberties Union filed a Brief of Amicus Curiae on my behalf which is the most penetrating presentation of my case I have ever seen.

The concluding paragraph of the Civil Liberties Union's Amicus Curiae Brief states:

"The judgment below must be reversed because the trial court did not discharge its statutory resposibility to determine the propriety of the Army's withholding of the requested information and because the Army did not sustain its statutory burden of establishing its claim to an exemption. The express language and the fundamental purposes of the Freedom of Information Act require a reversal." Unquote.

I am now waiting for the outcome of my appeal. With me, the American people are waiting, the people who have a right to know the truth.

---

OFFICE OF THE CLERK, SUPREME COURT OF THE UNITED STATES,
*Washington, D.C., June 15, 1970.*

Re Epstein V. Resor, etc., et al., No. 1533, Oct. Term, 1969.

PAUL N. MCCLOSKEY, Sr., Esq.,
*Menlo Park, Calif.*

DEAR SIR: The Court today entered the following order in the above-entitled case:

The petition for a writ of certiorari is denied. Mr. Justice Douglas is of the opinion that certiorari should be granted. Mr. Justice Marshall took no part in the consideration or decision of this petition.

Very truly yours,

JOHN F. DAVIS,
*Clerk.*

(By ——— ———, *Assistant Clerk*).

---

[From the Palo Alto Times, June 19, 1970]

"TOP SECRET" OFTEN ABUSED

EDITOR of the Times:

The Supreme Court's refusal to review my legal action, Epstein v. Resor (Times, June 15) makes the miscarriage of justice in the lower courts final. By this denial, the Supreme Court declared the Freedom of Information Act a dead letter.

This raises the question, What is Congress going to do?

Human Events of May 30 carried an article "Is the Freedom of Information Act Really Working?" by Carol D. Bauman, who lists Epstein vs. Resor among the key lawsuits based on the act, Miss Bauman wrote:

"The appellate court upheld the decision of a lower court denying release of the document. However, freedom of information specialists say that the case was significant since it was the first time the appellate court clarified its authority to determine whether information is being stamped 'secret' legimately. Some congressmen are calling for a congressional investigation into the continued classification of the Operation Keelhaul files."

Two lower courts found that nondisclosure was warranted in the interests of foreign policy and national security. They miraculously found so without having examined a single document in the three volumes of Operation Keelhaul.

Material classified on the ground of protecting foreign policy and national security is indeed exempted from disclosure but, according to the act, only if disclosure would really harm American foreign policy or national security—in other words, only if the document was properly so classified.

The Army itself proved it was improperly classifying Operation Keelhaul files "top secret" when Secretary of the Army Stanley Resor suddenly released four documents to me. Not one ever warranted "top secret" classification, In one, ALCOM, Rome asked for more Russian interpreters. This purely technical document bore for 23 years the stamp

"top secret!" The three others are of the same character.

The American Civil Liberties Union of Northern California stated in its amicus curiae brief: "Finally, the judgment (in the lower courts) makes no sense. How can judges decide important questions without having the crucial facts before them? There was no compelling national interest to be served by precluding not only disclosure but also review in camera of the file. A citizen's right to know, a historian's scholarly research, the open disclosure policy of Congress, and the interest, vital to our judicial process, of having an adequate record to review were all sacrificed for a false sense of security."

JULIUS EPSTEIN, *Palo Alto.*

---

[From the Palo Alto Times, July 30, 1970]

INTENT OF CONGRESS—FREEDOM OF INFORMATION ACT AMENDMENT

(By Julius Epstein)

By the Supreme Court's denial of my petition of certiorari in my legal action, Epstein vs. Resor, the Freedom of Information Act was declared a dead letter.

I sued Mr. Resor, the secretary of the Army, in order to get the documentary dossier "Operation Keelhaul" finally declassified and released to the American people. The documents contained in the Operation Keelhaul file concern the forced repatriation of anti-Communist displaced persons found in Germany to Stalin's henchmen and slave labor camps.

The jurists agree that this forcible repatriation was a crime against humanity according to the norms laid down by the International Military Tribunal which tried the Nazi war criminals at Nuremberg.

We committed this crime against humanity in the years 1944 to 1947, when we forcibly repatriated against their will between 2 and 5 million anti-Stalinist prisoners of war and civilian displaced persons to the Soviet Union where their leaders were hanged and the others were sent to Siberian slave labor camps.

In 1955 Khruschev declared an amnesty and released the prisoners from the slave labor camps. At that occasion, Pravda remarked in an editorial: "Now, everything is forgotten and forgiven. But you will never forget how the Americans and the British forced you on the points of their bayonets unto the trucks and trains which brougnt you back to the U.S.S.R."

The official American army records of this crime against humanity are contained in the dossier Operation Keelhaul. The dossier was classified top secret when it was compiled in 1948.

Since a top-secret classification can only legally be applied if disclosure would result in "exceptionally grave damage to the nation," such as "a break in diplomatic relations, an armed attack against the United States, a war," etc., it must be assumed that the continued classification of the Operation Keelhaul dossier is completely unjustified.

The Freedom of Information Act provides the possibility to lodge a complaint in the U.S. District Court. Then, the classifying agency has to prove—in camera—that maintenance of classification is justified. If the judge finds that disclosure would not result in "exceptionally grave damage to the nation" he has the duty to enjoin the government agency from further withholding the document. This is, according to a sworn affidavit by Rep. John E. Moss, D-Sacramento, sponsor and author of the Freedom Act, the meaning of the new law.

The courts in which I lost my case (the District Court in San Francisco and the Court of Appeals for the Ninth Circuit in San Francisco) disregarded the intent of Congress as explained by Moss in his affidavit. They stuck to the text of the Freedom of Information Act. This text states that documents classified in the interest of foreign policy and national defense are exempted from disclosure.

What Congress meant was, of course, that the exemption can only be claimed if it was properly applied—in other words, if disclosure would indeed result in grave danger to the nation. The arbitrary use of the power to classify is strictly forbidden.

Unfortunately, this was not spelled out in the final text of the law itself. It was this absence of clarity which allowed the courts to decide against my complaint.

The only remedy to revive the Freedom of Information Act is an amendment to the law which would remove this gap and would spell out in the law's final text what the real intent of Congress was when it created the act.

At the suggestion of Congressman Moss, I have written this draft amendment.

DRAFT AMENDMENT

To Public Law 90–23, 90th Congress, HR 5337, June 5, 1967, 81 Stat. 55.

Exceptions. "(3) . . . On complaint, the district court of the United States in the district in which the complainant resides, or has his principal place of business, or in which the agency records are situated, has jurisdiction to enjoin the agency from withholding agency records and to order the production of any agency records improperly withheld from the complainant. This includes agency records classified under Executive Orders 10501 and 10964 to be kept secret in the interest of the national defense or foreign policy. The burden is on the agency to show that classification meets the requirements of the executive order, specifically the requirement of Executive Order 10501, Section 1(a) which provides the standard for top secret classification as follows:

"Except as may be expressly provided by statute, the use of the classification Top Secret shall be authorized, by appropriate authority, only for defense information or material which requires the highest degree of protection. The Top Secret classification shall be applied only to that information or material the defense aspect of which is paramount, and the unauthorized disclosure of which could result in exceptionally grave damage to the Nation such as leading to a definite break in diplomatic relations affecting the defense of the United States, an armed attack against the United States or its allies, a war, or the compromise of military or defense plants, or intelligence operations, or scientific or technological developments vital to the national defense."

Nonapplicability. "(b) This section does not apply to matters that are "(1) specifically and rightfully required by Executive Order to be kept secret in the interest of the national defense or foreign policy.

---

## THE RIGHT TO BE HEARD

### HON. ELIGIO de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1970*

Mr. DE LA GARZA. Mr. Speaker, free speech means the right of a man to be heard and the right of his listeners to disagree with what he says. But disagreement should not be expressed in such a way as to disrupt public meetings by trying to shout down the speaker.

In recent days the President and the Vice President of the United States have been subjected to treatment that brings shame on these responsible for it. The right to dissent does not include any right to scream obscenities at any individual. Even if we leave aside the matters of bad manners and worse taste such disruptive efforts cannot be condoned by any American concerned with the maintenance of freedom in our country.

Mr. Speaker, the mindless hurling of insults is no substitute for reason. Enlightenment does not come from the language of the gutter. Free speech is guaranteed by our Constitution for all. Not just for those with whom we agree. It should be upheld for all.

---

## WILLIAM A. GARRETT

### HON. EMILIO Q. DADDARIO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. DADDARIO. Mr. Speaker, I should like to take this opportunity to call the attention of the House to the observance of a birthday and advance in his profession by William A. Garrett of the Gannett News Bureau. Mr. Garrett is an accomplished newsman, a veteran of work with the Hartford Times and, one of the distinguished corps on which we Members of the House depend to carry our words and actions to the people.

Mr. Garrett came to the Washington Bureau of the Gannett service in 1951, following years of service in Bristol and Hartford. Born in Troy, N.Y., he is a graduate of Trinity College in Hartford, and worked for a time with the New Britain Herald before he came to the Times. There he specialized in politics and crime and is notably remembered at the Times for his special assignment work on a mercy killing in Vermont to which the Times sent him for coverage of the trial. He was the Times correspondent in Bristol when I was first becoming active in Connecticut; he shared desks with Bob MacGregor and Hank Murphy at the Times and worked with their present managing editor, Nat Sestero. Both Dick Hartford, former managing editor of the Times and Nat, who holds that job now, remember him as the "fastest one finger typist in the business." He was extremely popular as a correspondent in Bristol, and as a reporter in Hartford, and I can certainly testify to the respect which those of us in Washington hold for his fairness and his abilities.

He was the host to White House correspondents on the occasion of Connecticut visits to Washington, and despite attacks in recent years, has continued to put in a hard-working time at the bureau. He has been a friend for the years I have been in Connecticut and certainly in our time in Washington, and I have found him resourceful and accurate as a reporter. I have noted his pride in the development of his family, his continued interest in the Times, where he frequently spent time on his vacation to drop by and pay respects. Cheerful, he always carried his share of responsibilities, whether in Bristol, Hartford, or Washington.

On one or two occasions, he stepped aside from his news duties to take responsibilities in private industry or with the Government, but his basic loyalty is to the newspaper business. His friendship and mine go back many years, primarily with the Times. I understand that his retirement will come about at the end of this month with the bureau asking him to continue to make his experience and wisdom available in free-lance and consulting work. I am pleased to be a friend of a fine correspondent, and to pay tribute to his lengthy and distinguished career. The Gannett Bureau can be proud to have such a distinguished man on its staff.

## DENOUNCES POW TREATMENT BY NORTH VIETNAMESE

### HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. O'NEILL of Massachusetts. Mr. Speaker, I join my colleagues in denouncing the North Vietnamese treatment of American servicemen. The plight of our men who have been captured by the North Vietnamese has been well documented. The evidence indicates that many of these men have been, and are being, held in solitary confinement, improperly fed, harshly beaten, mistreated, prevented from receiving adequate medical care, subjected to humiliation by public display, and cut off from all communication. I am appalled that such atrocious cruelties have existed. I fear that in all probability they will continue to exist unless action is taken to undermine the objectives Hanoi has in perpetuating these cruelties.

The callousness and intransigence of the North Vietnamese toward our legitimate demands have also been demonstrated. Repeatedly they have elected to play politics with the lives and spirits of our men rather than extend to them the decency expected when man deals with man.

Our response to these flagrant and inhumane violations of the provisions of the Geneva Convention of 1949 must be to continue to mobilize world indignation against the unconscionable treatment of our men. We have seen Hanoi's response to adverse public opinion in the past. Their ill-advised decision to bring our prisoners to trial as war criminals was averted by the world outcry against that action. Such outcry must exist today. Pressure from the administration, from our negotiators in Paris, from the State Department, and from this Congress must be strenuously applied in a conscientious efforts to insure that the fundamental rights of our prisoners abroad and their families at home are upheld.

In addition, I feel that we should work diligently towards our goals through the International Red Cross. The fact that in the past North Vietnam has refused to allow the Red Cross to render their services to our men increases the gravity of their cruelty. I would hope the government of North Vietnam would cooperate with the Red Cross as most every nation in the world has. The Red Cross is not the tool of U.S. policy but an organization dedicated to the betterment of man.

Our goal must be to make it emphatically clear that the use of helpless prisoners of war as pawns in an attempt to influence our Asian policy is intolerable. Intolerable not only as a political lever but intolerable from a moral standpoint as well. While there may be disagreement as to the conduct of the war in Southeast Asia, I believe it is imperative that we unequivocably condemn the treatment of our prisoners of war by the North Vietnamese. The issue before us is not political but humanitarian. We must urge Hanoi not to be misled by our differences on policy into the belief that we are divided on this issue of human decency. We are united against this action so devoid of moral qualities.

## MR. AGNEW, WHAT ABOUT THE STATE DEPARTMENT?

### HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. RARICK. Mr. Speaker, our illustrious Vice President, the Honorable SPIRO AGNEW is presently on tour and promises in his stump talks to expose the radicals in Congress.

The American people certainly hope that he will continue his crusade, and many wonder why he does not extend his exposé to include the troglodytic leftists who infest the State Department and who it is that tolerates their remaining, against the thorough housecleaning promised the American people by President Nixon before he was elected.

The American people realize that their major menace is not the big Red Army from without but the big pink army within. With Marxism taking the world, the people are wondering why there is no mention of an obvious Communist menace within the higher echelon of our Government.

I include an article on William P. Rogers, by Frank A. Capell, which appears in the September 23 issue of the Review of the News, as follows:

WILLIAM P. ROGERS: PRESIDENT NIXON'S SECRETARY OF STATE CONTINUES TO PROTECT THE COMMUNISTS

(By Frank A. Capell)

Subversion in the U.S. State Department has for many years been a prime concern of those conservative Americans who helped elect Richard Nixon and hoped for the "housecleaning" he promised. Candidate Nixon assured America on October 13, 1968: "I want a Secretary of State that will join me in cleaning house in the State Department. We are going to clean house up there." Many actually believed him.

The *New York Times* of April 24, 1969, reported the response of Nixon's Secretary of State, William P. Rogers, when reminded of the above Nixon promise. The *Times* said Mr. Rogers laughed and declared: "You know, I come from a small town, and to us a housecleaning was something that was done once a year. The wives freshened everything up, moved things around, got rid of the things that weren't useful anymore—but they never threw out all the furniture."

It was thus that Mr. Nixon's new Secretary of State laughingly informed deluded Americans that there just was not going to be any housecleaning at State. In fact, Mr. Rogers even refused to allow Otto Otepka to return to the State Department so that Nixon could make good on another campaign promise—to see that justice was done in the case of Otepka, who had been ousted as State's top security evaluator for attempting to maintain some semblance of security in a Department seriously threatened by treason. Secretary Rogers means to have the State Department run by the same radical crowd.

William Pierce Rogers was born in Norfolk, New York, on June 23, 1913, the only child of Harrison Alexander Rogers and the former Myra Beswick. His father was a papermill executive, bank director, and local Republican leader who was left by the Depression with only a small insurance business. When William Rogers was thirteen his mother died and he went to live with his maternal grandparents, Mr. and Mrs. Pierce Beswick of Canton, New York. He graduated from Canton High School in 1930, attended Colgate University on scholarship, and was graduated from Colgate with a B.A. degree in 1934. With the help of scholarships, he continued his education at Cornell Law School, earning his degree in 1937. Bill Rogers married a fellow law student, Adele Langston of Wenonah, New Jersey, on June 27, 1936. They have a daughter and three sons.

While in college, Rogers displayed an inclination "to be with the guys who were doing big things," and had no problem penetrating the inner circle of any group he joined Then as now he was handsome, charming, and urbane. Upon graduation he joined the prestigious New York law firm of Cadwalader, Wickersham & Taft, but stayed only a few months. The place to be was obviously around Tom Dewey, who was being prepared by New York's *Insiders* for big things.

Thomas E. Dewey's rise up the political ladder had begun with publicity gained as a racket-busting New York District Attorney. Rogers went to Dewey's office and offered to work for him for nothing if permitted to join the Dewey staff of "top-notch young crime investigators." Tom Dewey was impressed, and Rogers became one of fifty young men selected from 6,000 applicants to be assistant district attorneys in New York. From 1938 to 1942 he argued over 1,000 cases in court.

Attorney Rogers joined the U.S. Navy in August of 1946. He returned to the New York District Attorney's office under Frank Hogan, who had by now replaced Dewey. In April 1947, however, Rogers resigned from the District Attorney's office to go to Washington. He became counsel to the Senate's Special Committee to Investigate the National Defense Program. In July of the same year he became Chief Counsel.

By March of 1948 the Special Committee was succeeded by the Senate investigations subcommittee of the Senate Executive Expenditures Committee. The Chairman was Senator Clyde R. Hoey, a Democrat of North Carolina, who asked Rogers to remain as Chief Counsel even though he was a Republican. Bill Rogers' only public act of anti-Communism occurred during this period. He publicized information which led to the perjury conviction of the Commerce Department's William Remington "for lying about passing secret information to Soviet spy Elizabeth Bentley." Miss Bentley forced his hand.

Rogers' other accomplishments during his stint with the Senate Committee were the jailing of Major General Bennett E. Meyers for inducing a witness to lie to the Committee during a war contracts investigation; and a perjury indictment against John Maragon,

a White House intimate, in the investigation of the "five percenters." Rogers left the Committee March 1, 1950, to join the Washington offices of the New York legal house of Dwight, Royall, Harris, Koegel & Caskey—the "world's largest law firm." [1]

William Rogers has been in, out, and on the fringe of government service for many years. But he would probably have attained his political aims much sooner had the results of the 1948 presidential election been different. As *Parade* magazine noted in its issue of February 23, 1969: "Had Dewey been elected President in 1948, Rogers, as his protégé, would have assumed a position of importance." Thomas E. Dewey had used his reputation as a "racket-buster" to propel himself into the New York governorship, from which he took the jump into the presidential race. The "Eastern Establishment" thought its boy had it made. But, Dewey's overconfidence and his refusal to use against the Democrats the issue of Communist subversion gave Harry Truman a surprise victory.

The next opportunity for a Republican try at the presidency, and Rogers' next chance at an appointment to a top government post, would not come until 1952. William Rogers devoted himself to the practice of law for the *Insiders*. When the *Insiders* of the "Eastern Establishment" persuaded General Eisenhower to be their candidate in 1952, Rogers offered his services in the campaign to secure the Republican nomination for Eisenhower. He was active at the Republican Convention and worked with Herbert Brownell Jr. in designing the strategy which sabotaged Taft. And, Rogers was chosen to accompany vice-presidential nominee Richard Nixon on his campaign tours.

Bill Rogers was by now not only a Dewey-style *Insider* but an old friend of Richard Nixon's, having counseled him in the Hiss-Chambers affair. Rogers had advised Nixon, who was then an unknown Congressman, to go ahead with the case. Pragmatically, it was a good move. It brought Richard Nixon an undeserved reputation as an anti-Communist—*and*, it assured him a key seat in the U.S. Senate. Rogers' advice was not so much based upon any desire to expose Hiss, as to warn Nixon that since Chambers' story was backed up by microfilmed evidence it was irrefutable.

Another crisis developed while Rogers was accompanying Nixon on his campaign. Again he gave his friend excellent advice and assistance. The famous Checkers speech was Rogers' brainchild, and it saved the day for the future Vice President. Demands had been made for Nixon to withdraw as Eisenhower's running mate after enterprising reporters established that a group of California businessmen had provided a "slush fund" to pay Nixon's expenses as a Senator. Rogers advised him to stand pat, and sold the idea of a grandstand play to Tom Dewey, who was masterminding the Eisenhower campaign. Nixon went on national television and, in a speech reportedly put together by Rogers, declared he had never taken any gift except a cocker spaniel named Checkers, and that he intended to keep the dog. That speech kept Richard Nixon on the ticket.

Following the Eisenhower victory, Rogers was at the request of Dewey and Nixon appointed Deputy Attorney General. He became the Department of Justice's chief liaison with Congress and other federal departments and agencies. When Attorney General Herbert Brownell resigned in 1957, William Rogers was immediately appointed to succeed him. Anthony Lewis of the *New York Times* stated prophetically: "Rogers is important not only because he is a member of the [*Eisenhower*] Cabinet; among the close advisers of the President, he is closet to the Vice President—officially and personally. In a Nixon Administration, Rogers would be even closer than he is at present to the center of American political power."

William Rogers played a principal role during the Eisenhower Administration in the drafting of the Civil Rights Act of 1957, and in establishing the Civil Rights Division of the Department of Justice. It was Rogers who wrote the brief justifying the use of the troops in Little Rock, Arkansas, in 1957. He is known as a strong advocate of "Civil Rights"; both Rogers and his wife have been contributors to, and sponsors of, the Washington Negro Student Fund. One of the founders of this fund was Lydia Katzenbach, wife of radical Nicholas Katzenbach—who is being retained as a special consultant by the State Department under William Rogers. Another contributor and sponsor of this outfit was Adam Yarmolinsky, who once raised funds for the Young Communist League, and who has admitted: The Young Communist League believed and I was inclined to believe that a so-called Communist government was a desired end."

One of Rogers' most important roles in the Eisenhower Administration was as a key operative in the effort to put an end to the anti-Communist crusade of the late Senator Joseph R. McCarthy of Wisconsin. Also involved was another Nixon appointee, Henry Cabot Lodge, who was at the time U.S. Ambassador to the United Nations. According to a press release in November 1953, Lodge was working on leave with the White House, after the recess of the United Nations, "in connection with matters on Capitol Hill or matters relating to the Senate." This was brought out in the testimony before the Special Senate Subcommittee on investigations to explain his presence at an anti-McCarthy strategy meeting held on January 21, 1954, in the office of the Attorney General.

Also present at that meeting were Attorney General Brownell; Deputy Attorney General Rogers; White House aides Sherman Adams and Gerald Morgan; and, John G. Adams, counselor, Department of the Army. As a result of this conference the decision was made for John Adams to start compiling notes to be used as the basis for filing charges against Senator McCarthy and members of his staff. Adams admitted before the Senate Subcommittee:

"The meeting finally concluded with the decision that I should call on the Republican members of the investigating subcommittee . . . and point out to them the two problems which I had discussed with the Attorney General's office."

One of these "problems" was the fact that Senator McCarthy planned Hearings on the loyalty board—which Senator McCarthy believed to have been clearing Communists for sensitive government positions.

As is well known, the anti-McCarthy plotters were successful. The charges against Senator McCarthy were given to the press even before they were presented to the Senators. McCarthy was "censured" by his colleagues and rendered ineffective in his efforts to clean out the Communists being harbored in our government. All this was the result of a well-planned operation hatched in the highest echelons of the Executive Department, and with much of the "responsibility" resting upon the shoulders of our present Secretary of State, William P. Rogers.

Upon his shoulders also must rest the responsibility for having Helmut Sonnenfeldt moved into a highly sensitive position on Henry A. Kissinger's staff in the National Security Council. It was during Rogers' tenure of office in the U.S. Department of Justice that Sonnenfeldt was in "very serious trouble" because of alleged "leaks of top secret and secret" classified information to foreign agents with whom he had frequent and close associations. An intense F.B.I. investigation resulted in discussions about prosecution. No such prosecution ever took place because the State Department held that it was "not in the interest of the U.S. government" to have the secrets involved become public knowledge. Rogers agreed not to prosecute and Sonnenfeldt was saved from conviction under the espionage statute.

Many other highly dubious characters have been retained, reassigned, and promoted under the new Secretary of State. Among these are such security risks as Jacob Beam (now Ambassador to the Soviet Union), Edwin M. Martin, and David H. Popper—all of whom received promotions despite long histories of association with Communist, radical, and subversive causes. More serious, Nicholas Katzenbach and George Ball were selected as special consultants, and Idar Rimestad was asked by Rogers to remain in the State Department to be in charge of all personnel.

Rimestad has been instrumental in keeping Otto Otepka, the ousted State Department security chief, from obtaining justice. The State Department just wasn't big enough for both. Rimestad is reported secretly to have learned Russian, to have conferred repeatedly in private with Soviet nationals, and to have maintained pro-Soviet and anti-American views going all the way back to 1946. Mr. Rimestad is now operating for Rogers out of Geneva.

Nicholas Katzenbach, appointed special consulant to Secretary of State Rogers, studied law with his wife Lydia under Abe Fortas at Yale University.[2] Mrs. Katzenbach (the former Lydia Stokes) comes from a famous Leftist family. Her aunt, Rose Pastor Stokes, was a notorious Communist with an ugly police record. Her uncle, James Graham Phelps Stokes, was president of the Fabian Intercollegiate Socialist Society and Counsellor for the Bolshevik Russian Information Bureau in the United States.

As Under Secretary of State, Nicholas Katzenbach issued a security clearance for John Paton Davies, a serious security risk who was heavily involved in delivering China to the Communists. Davies was cleared by Katzenbach to work as a consultant at the C.I.A.-financed Center for International Studies at M.I.T., which has a contract with the Arms Control and Disarmament Agency. The clearance was given with the consent of Secretary of State Rogers, who then ensured his continued access to Katzenbach by appointing him a special consultant. The M.I.T. center also has on its staff identified Communist Harold Isaacs, who was involved with Agnes Smedley of the Sorge Spy Ring.

George W. Ball, another of Secretary Rogers' consultants, was recommended for appointment as Under Secretary of State by Adam Yarmolinsky (himself a serious security risk) who worked in George Ball's office in Washington, D.C., from 1951 to 1954. Like many others in the Nixon Administration, the radical Mr. Ball is a member of both the Council on Foreign Relations and the Bilderbergers.

On March 5, 1969, Congressman John Rarick (D.-Louisiana) called the attention of the Congress to the fact that the citation of the National Lawyers Guild on the Attorney General's list had been rescinded by William Rogers. In light of the evidence, as Rarick noted, this was simply fantastic! Congressman Rarick quoted from public addresses of U.S. Attorney General Herbert Brownell Jr. as follows:

---

[1] In recent years known as Royall, Koegel, Rogers & Wells. William Rogers did so well he became a senior partner—earning $300,000 a year, a seat on the board of directors of the ultra-Leftist *Washington Post*, and a fancy apartment in the U.N. Plaza Building.

[2] The *Washington Star* of January 19, 1969, states that "before the election . . . William P. Rogers wrote to Nixon a letter recommending that Nixon name Justice Abe Fortas as chief justice if Nixon won."

"It is because the evidence snows that the National Lawyers Guild is at present a Communist dominated and controlled organization fully committed to the Communist Party line that I have today served notice to it to show cause why it should not be designated on the Attorney General's list of subversive organizations."

Congressman Rarick continues: "On September 11, 1958, the Attorney General [*Rogers*] rescinded the proposal to designate the Guild. (1958 Annual Report of the Attorney General, Page 251.) On September 12, 1958 . . . the Attorney General [*Rogers*] had 'concluded that the evidence that would now be available at a hearing on the merits of the proposed designation fails to meet the strict standards of proof which guide the determination of proceedings of this character.'"

That was pure balderdash! Rogers' reversal of Brownell was out-and-out appeasement of the Communists. The National Lawyers Guild had already been cited as a Communist Front by the Special Committee on Un-American Activities on March 29, 1944, and by the Senate Internal Security Subcommittee on April 23, 1956. The House Committee on Un-American Activities' citation of September 21, 1950, stated that the National Lawyers Guild is the "foremost legal bulwark of the Communist Party, its front organizations, and controlled unions," and that "since its inception has never failed to rally to the legal defense of the Communist Party and individual members thereof, including known espionage agents."

Yet, Attorney General William P. Rogers made the determination that sufficient proof was not available to keep the National Lawyers Guild on the Attorney General's list *even though* such proof had clearly been established by both Houses of Congress. As usual, he was supporting the Reds.

Another incident of Secretary Rogers' support for the Communists was brought to light by Willard Edwards in the *Chicago Tribune* of March 5, 1970. The matter concerned Communist terrorist Amilcar Cabral, whose seven-year guerrilla war in Portuguese Guinea has been waged with Communist backing and arms. Secretary Rogers had actually allowed Cabral to come to the United States for ten days so he could appear before the House Subcommittee on African Affairs. The State Department thus promoted yet another propaganda victory for the Communists. Ed Hunter pointed out in *Tactics* for March 20, 1970, that the use of the U.S. Congress as a forum for this Communist terrorist would be exploited abroad to enhance his prestige while being interpreted as a slap at Portugal, our N.A.T.O. ally.

Rogers' aid to the enemy was also brought out in the summer of 1969 when he authorized the State Department to pressure the courts in Chicago to release indicted anarchist prisoners so that they might represent the United States in Paris and in Asia. Rogers' sanction permitted self-confessed Communists Dave Dellinger, Rennie Davis, and other Leftists to negotiate with their Comrades among the Vietcong about the release for propaganda purposes of three American prisoners.

In March of 1969, Secretary Rogers laid it on the line to the Senate Foreign Relations Committee. "We are not," he said, "seeking a military victory" in Vietnam. Secretary of State William Rogers doesn't want victory over the Communists in Vietnam or anywhere else. As *Human Events* has noted: "Rogers, according to one high State Department source, is constantly thinking up ways in which the United States can make concessions to the Soviets."

During the Eisenhower Administration, Secretary of State John Foster Dulles carried forward the Leftward course of American foreign policy by "always saying the right thing and always doing the wrong thing." Rogers, thoroughly trained in the quiet behind-the-scenes maneuvers of the Eisenhower Administration, does "the wrong thing" without even bothering to say the right one. The latter task has been assigned to Vice President Spiro Agnew. But you will note that even Mr. Agnew avoids talking about "housecleaning" at the State Department.

## MIDEAST OUTLOOK GRIM

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. DERWINSKI. Mr. Speaker, the continued crisis in the Middle East is the type which could turn optimism to pessimism. The mounting complications in the area are such that one could honestly wonder whether a solution will ever be reached. The Chicago Daily News in a very penetrating commentary in its September 17 edition very effectively analyzes the Middle East situation, as follows:

MIDEAST OUTLOOK GRIM

There's little encouragement to be had from examining events in the Middle East just now. From the grim cat-and-mouse game being played by the Arab guerrillas with their remaining hostages to the breakdown of the peace talks and the fragile state of the regime in Jordan, the news is bad.

About the only trace of a silver lining is Egypt's vow that it will hold to the cease-fire as long as Israel does, even though it considers the rest of the peace initiative dead. But if this promise is no firmer than the earlier one to abide by the status quo on missile emplacements, it won't amount to much. The United States now says it has confirmed new movements of missiles in the cease-fire zone more serious than the violations previously reported.

Besides, with the guerrillas more than willing to do their dirty work, the Arab governments may simply elect to wait things out for a bit. King Hussein in Jordan appears to be an exception in opposing the guerrillas, but only because they pose a threat to his own skin. While fighting them and referring to their deeds as the "shame of the Arabs," he still calls for a united front against Israel.

The ominous clouds in the Middle East overshadow all other foreign policy considerations for the time being, as nothing could demonstrate more clearly than the just-announced itinerary of President Nixon. His end-of-the-month trip will put a world spotlight on the U.S. presence in the Mediterranean and on NATO.

As noted by Peter Lisagor, our Washington bureau chief, every stop Mr. Nixon plans bears in some way on the Mideast crisis, even though it involves such political opposites as the crusty old dictator of Spain, Francisco Franco, and that eminent Communist, Marshal Tito, in Yugoslavia. Franco's Spain still plays host to U.S. bases at the entry to the Mediterranean. Tito may still have the ear of Egypt's Nasser, though the "Third World" concept they tried to launch has fallen into disarray.

Mr. Nixon's review of the 6th Fleet is of course a direct reminder to the Russians that the United States still has power, as well as vital interests, in the Mediterranean regardless of Russia's naval buildup in that crowded sea.

The uses of power have undergone a considerable transformation since the old gunboat days, to be sure. Superbombs and missiles have proved to be no answer at all to such new phenomena as global skyjacking—a fact the Russians, too, must be pondering these days. Yet just such newfound tactics by fanatics or madmen could start a train of events unstoppable short of a clash of superpowers.

The prime objective of the United States must be to cool the hotbed in the Middle East and somehow try to get the Arab-Israeli peace talks going again. That should be the Russian objective, too, but if the Kremlin has come to that conclusion it is mighty slow in showing it.

---

## HON. TIM LEE CARTER'S 1970 QUESTIONNAIRE

### HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. CARTER. Mr. Speaker, I submit, for your perusal, my sixth annual questionnaire.

SEPTEMBER 1970.

DEAR FRIEND: Every two years you have an opportunity to elect your representative in Congress, and this is such a year. The only election other than for United States Congressman is that for Judge of the Third Appellate District, Kentucky Court of Appeals, which covers Adair, Clinton, Cumberland, Green, McCreary, Metcalfe, Pulaski, Russell, Taylor, and Wayne Counties. I remind you of the November 3 Election Day and encourage you to exercise your right to vote for whomever you desire, for this is the only way to insure a government that represents you.

I spend as much time in the District as possible and hope to see you personally, but it is impossible to obtain everyone's recommendations on major issues confronting us in Congress during these visits. For that reason, I am sending you the sixth annual questionnaire. Your answers will be computerized, and the consensus of your views greatly influences my voting. The results will be released to the news media when they are finalized so that you might see the opinions of your neighbors.

If I may have an expression of your thoughts it will be greatly appreciated, and if I can be of service to you in any way, please let me know.

Your Friend,

TIM LEE CARTER.

---

SIXTH ANNUAL QUESTIONNAIRE

Do you favor—

1. Federal gun registration laws?

2. Having Daylight Saving Time only from Memorial Day to Labor Day?

3. Passage of a Constitutional Amendment allowing prayer in schools?

4. The soil-banking of tobacco?

5. Stricter enforcement of laws to insure less pollution of our water, air and land?

6. Use of veto by the President if he believes an appropriation bill is inflationary?

7. Replacing the present military draft system with an all-volunteer Army?

8. Allowing Federal police officers, with a warrant, to enter a house without knocking, if they believe evidence being sought would be destroyed?

9. Exempting an only son, who is in the Armed Forces, from serving in a combat zone?

10. Continuation of United States Foreign Aid?

Please check answer which best expresses your feelings as to the policy the United States should follow in Vietnam:

a. Withdraw all troops immediately;

b. Withdraw all troops by end of 1971;

c. Withdraw all troops as fast as South Vietnam can assume combat duties;

d. Use all necessary military force to win a victory.

Please check best approach for assisting poor people:

a. Guarantee of remunerative employment (work);

b. Guarantee minimum income;

c. Guarantee minimum income by supplementing earnings if the person works;

d. Offer no assistance;

e. Continue present programs.

## THE FIRE ANT FIASCO

### HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. DINGELL. Mr. Speaker, pursuant to permission granted I insert into the CONGRESSIONAL RECORD an excellent article by a distinguished former Member of this body, the Honorable Stewart L. Udall. The article entitled "The Fire Ant Fiasco" eloquently speaks for itself:

THE FIRE ANT FIASCO

(By Stewart L. Udall)

In a triumph of bureaucratic log-rolling over common sense, the U.S. Department of Agriculture and farm agencies in nine southeastern states have proposed a $200 million, 12-year pesticide campaign to wipe out the imported fire ant. The campaign could eventually blanket 120 million acres with 450 million pounds of deadly Mirex bait, threaten human health and devastate fisheries throughout the Southeast.

The Alabama legislature has balked at the idea of sending airplanes aloft to shower this poison down on cities, forests, fields and streams. But in Mississippi, Georgia and South Carolina the federal-state war on fire ants has been fully funded and is picking up steam.

Never in the history of USDA-inspired pesticide drives has a more destructive cannon been leveled at a less significant target. The fire ant is neither a health menace nor a threat to agriculture. It feeds mainly on other insects, including the economically destructive boll weevil, bark beetle, pinetip moth and sugarcane borer. The chief complaint against this quarter-inch stowaway from Argentina (here since 1918) is that its bite is painful and its foot-and-a-half-high nests interfere with haying operations. But such minor nuisances can readily be controlled by local, mound-to-mound doses of short-lived pesticides.

Instead, over the protests of scores of biologists, USDA's Agricultural Research Service (ARS) and the nine state agricultural departments have called for an indiscriminate serial bombardment campaign that would saturate every square foot of terrain in cities and fields alike with about 50 granules bait laced with long-lasting Mirex. Deeply concerned about the human and environmental hazards, 100 Mississippi scientists and citizens have joined with the non-profit Environmental Defense Fund of East Setauket, N.Y. in a court suit to stop the fire ant program.

The biologists' objections are twofold:

The National Academy of Sciences has reported that it is sensible to control, but not to eradicate, the highly adaptable fire ant. Between 1957 and 1963, USDA and the nine southeastern states poured $25 million into an eradication campaign—only to have the fire ant *extend* its range by 11 million acres. This preview of the present all-out war made use of heptachlor, a pesticide whose residues were banned from most foods in 1960. The heptachlor experience should have been a warning to USDA, but it wasn't The Department proceeded to embrace Mirex with unbelievably little concern for its potential toxicity to people and wildlife.

Mirex, a chlorinated hydrocarbon closely related to DDT but longer-lasting, is a threat to many species besides the fire ant. Under present plans, which call for it to be dumped on ponds and streams as well as fields and forests, it could destroy the multi-million-dollar shellfish industry in the Gulf and South Atlantic estuaries. At Senate hearings in 1969, Francis J. Mulhern, associate administrator for regulatory and control programs in the ARS, testified that "this bait does not last too long in the presence of rain." Why not? Mulhern didn't say, but it is clear that the pesticide is washed into streams and bays.

The Interior Department's biological Field Station at Gulf Breeze, Florida, has recently found that minute doses of Mirex (one part per ten billion parts of sea water) kill over a third of the shrimp tested. Mortality among young blue crabs is also high. Like DDT, Mirex appears to reach higher and higher concentrations as it moves up through food chains. Livers of treated shrimp at Gulf Breeze accumulated 24,000 times as much of the pesticide as was present in the sea water.

Last year, moreover, a government commission on pesticides reported that Mirex causes cancer in laboratory mice and should not be used unless public health conditions absolutely warrant it.

It is true, as USDA officials point out, that laboratory findings do not necessarily show what will happen in natural settings. And it is a small comfort to know that USDA is now conducting field studies near Charleston, S.C. to determine the effects of Mirex on marine organisms.

But why in the name of sanity doesn't USDA call a halt to the fire ant campaign until the Charleston studies are completed? Why has it helped its sister agencies in Mississippi, Georgia and South Carolina take unnecessary risks with the seafood industries, wildlife and people of these states? In effect, USDA is saying that neither the Gulf Breeze nor the Charleston research amounts to a hill of . . . ants.

Environmentalists all over the country are candidly perplexed by this particular USDA performance. "Given the low level of need and the potential effects on non-targets species," says Charles D. Kelley, chief of the Game and Fish Division of Alabama's Department of Conservation, "it's incredible that this program has started up again. Why mess around with a carcinogen?"

Indeed, there is no popular demand for broadcast bombings against the fire ant. A few farmers who would rather have the government subsidize a control program than foot the bill themselves have prevailed upon politicians like Rep. Jamie L. Whitten of Mississippi to make the fire ant campaign their favorite pork barrel issue.

It is no accident that fire ant war was drummed to a fever pitch after J. Phil Campbell was named Under Secretary of Agriculture in 1968. Previously, Campbell had served as Commissioner of Agriculture in Georgia, where he made fire ant eradication drives just about the biggest thing in his bailiwick.

But the overriding reason for the fire ant fiasco may simply be bureaucratic inertia. "It's one of those horrible cases where an early commitment has grown so strong that the people involved can't back down," says Joe Broder, Washington, D.C. Director for Friends of the Earth. "A bureaucratic idea has turned into an obsession."

H.R. 19387

## HON. THOMAS L. ASHLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1970*

Mr. ASHLEY. Mr. Speaker, I am joining today in cosponsoring legislation, H.R. 19387, being introduced by the distinguished gentleman from Minnesota (Mr. BLATNIK), a bill to amend the act creating the St. Lawrence Seaway Development Corporation to terminate the accrual and payment of interest on the Corporation. This is a measure vital to the economy of the Great Lakes States and important to the continued growth of the Nation. While the legislation does not go as far as the measure I introduced last year, H.R. 12909, in that the bill introduced today does not relieve the Corporation of its obligation to repay its indebtedness to the Treasury, the bill is a timely step forward.

The administration last month changed its position on this issue and now fully supports this measure, and the other body last Thursday passed the legislation with little opposition. Now is the time for colleagues interested in advancing the St. Lawrence Seaway toward a status comparable in equity to that accorded other federally supported waterways to lend their full support to the bill being introduced today.

The proposed legislation would end the requirement for the Corporation to pay interest on the seaway debt. This includes unpaid interest which has accrued to date—about $22 million—and interest that would otherwise accrue on revenue bonds issued to the Treasury under the original 1954 act.

Under the bill, the obligation to repay the Treasury the principal on the revenue bonds issued by the Corporation would continue. Projections of the Department of Transportation indicate that repayment of the bonded debt with relief from interest payments should enable the Corporation to hold the line on tolls. Thus the bill is designed to put the Development Corporation on a more sound long-term financial footing while it more effectively develops and promotes the movement of cargo through the seaway.

Over its first decade of shipping the seaway has been more responsible financially than any other waterway in the continental United States. The seaway paid for the entire cost of its operation and maintenance, totaling almost $15 million. It paid the Treasury over $29 million in interest, approximately 60 percent of its total interest obligation. Under the bill, the seaway would still be treated unfavorably in comparison with all other waterways in the United States which have been developed and operated entirely out of general tax revenues. In this light, the proposed conversion of the seaway debt to an interest-free loan is but a modest step.

For the sake of comparison, through fiscal year 1965 the Federal Government

paid more than $54 million in construction costs and more than $113 million in operating costs for the Delaware River channel from Philadelphia to the sea. Combined Federal costs for the Houston ship channel were more than $67 million; for the Sacramento deep water channel, more than $50 million; and for the Mobile, Ala., channel, more than $19 million. The seaway together with the Great Lakes is a fourth seacoast and is very much like an ocean ship channel in the service it renders a particular geographic area. Yet, unlike ocean ship channels, it has had to repay invested capital, interest, and operating and maintenance costs.

Mr. Speaker, I believe that the limited remedy set forth in the legislation I am cosponsoring today will, nevertheless, permit the seaway to grow and remain viable. Failure to enact it will require substantial toll increases under terms of existing law and our agreements with Canada and may well signal the decline of one of the greatest Federal enterprises in our national history. I urge speedy consideration and enactment of the bill.

## PERSECUTION OF THE JEWS IN RUSSIA

### HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. PHILBIN. Mr. Speaker, I want to commend the gentleman from New York (Mr. OTTINGER) for sponsoring his concurrent resolution, House Concurrent Resolution 743, and am most happy to associate myself with this effort to focus public attention upon the plight of the Soviet Jews.

As one who has long been concerned over the persecution of the Jews in the Soviet Union, I am also pleased that I am one of the 39 cosponsors of this bill, introduced in the House yesterday, which I hope will have the early attention of the House Committee on Foreign Affairs to which an earlier resolution of mine has been referred.

Because of a meeting of the conferees on the military procurement authorization bill, it was not possible for me to attend the press conference called yesterday morning by the gentleman from New York, and I now want to take this opportunity to congratulate him upon his efforts and to let him know he has my wholehearted, unstinted support on this and other resolutions urging renewed efforts by this Government to bring about an end to the religious persecution of Jews in Russia.

In December of last year, I strongly protested Soviet mistreatment of Jews in Russia. I addressed the House in a fervent plea to our State Department and the Secretary General of the United Nations to circulate among its members the request of the Israeli Government on a specific case of mistreatment it cited and refer the matter for action to the Human Rights Commission.

In addition, I urged our Secretary of State to recommend to the Secretary General that this matter be officially referred to the Commission and placed on the agenda for consideration at the earliest possible time and to use the good office of our Government with the Soviet Union to prevent these abuses.

While some consideration has been given to mistreatment and persecution of Jews in Russia, there are continued complaints that these pernicious practices are still taking place. I renew my protest and again calling on the Secretary of State to give these matters his insistent attention, so that representations can be made to the Soviet Government in behalf of our own Government that we strongly oppose any manifestation of anti-Semitism, and particularly mistreatment and persecution, and denial of human rights of the Jews in Russia.

I am pleased to join with my friend and colleague, the distinguished Congressman from New York, the Honorable RICHARD OTTINGER, in the concurrent resolution he is sponsoring in an effort to fix attention on this very regrettable situation in Russia and bring it to an end.

I think we should continue to press the Soviet Government in conferences and in the United Nations to make every effort to end persecution and discrimination, and other manifestations of anti-Semitism, so that all men and women would be entitled to equal treatment under the law, regardless of race, class, creed, or status, and would be treated and be protected in their individual and human rights.

As I have noted before, anti-Semitism is a curse and a scourge to humanity, and it must be banished by all mankind, and this great Nation of ours must set the example, as we have done in the past. I repeat, and I urge, that the Jews must be free from the cruel bondage of discrimination, mistreatment, and persecution.

I also urge our Government to take a determined stand in striking down these gross violations of ordinary, human rights, and I plead with all my heart with the Soviet Government to end these deplorable practices that shock world conscience.

This resolution also strongly urges our President to condemn persecution of any person because of his religion by the Soviet Union and to try to negotiate permission for Soviet Jews to emigrate to Israel and other countries willing to receive them.

This resolution demands human rights for the Jewish people of Russia, and I hope this can be favorably acted upon and implemented by this Government at an early date.

## RESOLUTION AIMED AT HALTING AERIAL HIJACKING

### HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. EILBERG. Mr. Speaker, the city council of the city of Philadelphia at a meeting held September 10, 1970, unanimously adopted a resolution urging a boycott of the Arab States and to refuse landing rights to Arab planes and those airlines serving Arab countries in an effort to halt the crime of aerial hijacking. I plead with President Nixon and my colleagues to read this resolution carefully and to take all possible steps to implement it. Without action such as suggested here, many more lives of aerial passengers will be jeopardized. The resolution follows:

COUNCIL OF THE CITY OF PHILADELPHIA,
RESOLUTION No. 298

Resolution memorializing the President and the Congress of the United States to declare a boycott of the Arab states and to refuse landing rights to Arab planes and those airlines serving Arab countries, in an effort to halt the crime of aerial hijacking

Whereas, the recent and most barbaric wave of aerial hijackings has focused world concern upon the Arab states who harbor terrorists who prey upon international air travelers; and

Whereas, at the present time more than two hundred innocent people are being held captive in the Jordanian desert by Palestinian air pirates; and

Whereas, these actions emphasize the immediate need for cessation of all American commercial flights to any Arab countries which allow plane hijackers to operate from their territory; and

Whereas, it is long past time for the airlines and governments of the world to declare a boycott of the Arab states and to refuse landing rights to Arab planes or those airlines serving Arab countries; therefore

*Resolved, By the Council of the City of Philadelphia,* That we hereby memorialize the President and the Congress of the United States to take all possible steps to effect a boycott of the Arab states and to refuse landing rights to Arab planes and those airlines serving Arab countries, in an effort to halt the crime of aerial hijacking.

*Resolved,* That certified copies of this Resolution be forwarded to the President of the United States, the Senators from the Commonwealth of Pennsylvania and the members of Congress from Philadelphia.

Certification: This is a true and correct copy of the original Resolution adopted by the Council of the City of Philadelphia on the tenth day of September, 1970.

PAUL D'ORTONA,
*President of City Council.*

Attest:

CHARLES H. SAWYER Jr.,
*Chief Clerk of the Council.*

Sponsored by Councilman George X. Schwartz (on behalf of the members).

## VETERANS' ADMINISTRATION EDUCATION PROGRAMS

### HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. VANIK. Mr. Speaker, for the benefit of those many persons who have inquired about recent changes in VA educational assistance programs, I would like to enter the following table in the RECORD at this point:

| Title | Eligibility | Assistance |
|---|---|---|
| 1. VA orphans, wives, and widows education assistance. | Sons and daughters between 18 and 26, and wives and widows of service-connected deceased veterans or 100-percent disabled veterans. | $175 per month for full-time study; $128 for ¾ time study; $81 for ½ time study. |
| 2. Veterans Readjustment Benefits Act of 1966. | (1) Anyone serving more than 180 days active duty, part or all after Jan. 31, 1955, discharged on conditions other than dishonorable; or (2) released from active duty after Jan. 31, 1955, for service-connected disability; or (3) any person in service 2 years and continuing on active duty. | 1½ months of assistance for each month of service on active duty after Jan. 31, 1955, but not more than 36 months' assistance, however, a period of 18 months of such active duty will qualify a veteran for the full 36 months. Allowance: $1 to $230 per month plus $13 for each additional dependent over 2 depending on hours of attendance and number of dependents of student. These rates are applicable for institutional training—½ time or more. Varying rates apply to other types of training including less than ½ time. |

## USAF'S DUAL FRONTIERS

### HON. JACK BRINKLEY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. BRINKLEY. Mr. Speaker, on September 17, 1970, the Honorable John L. McLucas, Under Secretary of the Air Force, spoke to the Middle Georgia Chapter of the Air Force Association at Robins Air Force Base, Ga., which is so ably headed by Dr. Dan Callahan, Mister Air Force Association of middle Georgia. I was not privileged to be present when Secretary McLucas addressed this outstanding chapter of the Air Force association but my constituent and good friend, Mr. J. H. Rosenburg of Warner Robins, Ga., has brought this excellent message to my attention and I share Mr. Rosenburg's enthusiasm over the goals and outstanding programs of the Air Force outlined in this stimulating speech.

I ask your permission to share the contents of Secretary McLucas' address with my distinguished colleagues, but before doing so, I would like to take this opportunity to commend every member of our Air Force, not only for the fine job they do every day in performing their assigned military duties with honor and distinction, but also for their obvious willingness to go the extra mile in being good neighbors on an individual basis, as well as collectively, in sponsoring and participating in the many civic activities in the civilian communities near our bases throughout the country. I am particularly proud that we, in the third district of Georgia, have the fine men and women at Robins Air Force Base as our neighbors and especially appreciate the splendid leadership of Robins' commanding general, Maj. Gen. A. J. Beck.

The speech follows:

USAF'S DUAL FRONTIERS: MILITARY SECURITY AND SOCIAL EQUITY

(By Hon. John L. McLucas)

In deciding what to talk to you about this evening, I was torn between two themes. Both, I think, are of major interest to this audience; and both are extremely important to the Air Force. First, is the Air Force's mission in the 70's and our capability to fulfill it. Second, is the relevance and response of the Air Force to the society we defend. Although either topic is worthy of a full volume of analysis and exposition, the two are so important to our nation and to the USAF that I have decided to offer a few key thoughts on each of these subjects.

First, let me assure you that Secretary Seamans and I and all our colleagues are fully alive to the difficult task of maintaining adequate military forces. But we must carry out this task with a shrinking military budget. Dr. Seamans terms this unenviable position of the Air Force, "a three-way crunch," caused by pressing domestic needs, continuation of our worldwide commitments and a need to modernize our military equipment.

We hope for the success of the Strategic Arms Limitation Talks with the Soviets, but at the same time we must be sure that we can continue to deter strategic war. Two developments add to our concern in this regard: first, the increased numbers and total payload of Soviet ICBMs, and second the Soviet deployment of an initial ABM system and continued extensive ABM research. The combined effect could be a considerable reduction in the effectiveness of both our land-based and sea-based missiles.

To maintain deterrence in the face of these Soviet developments, we are deploying ABM protection for our missile fields, while modernizing with Minuteman III and Poseidon. But in the future, the effectiveness of our missile forces will tend to vary depending on the length of time it takes us to respond to new Soviet capabilities. As a result, it is extremely important that we maintain the bomber portion of our deterrent capability. To do this we must modernize our aging force of B–52's, and the B–1 appears to be the answer.

The Air Force has awarded development contracts to North American Rockwell for the B–1 system and to General Electric for the B–1's engines. The five test aircraft will incorporate only such avionics as are necessary to achieve the airframe and engine test objectives using off-the-shelf equipment. No decisions have been made on production of the B–1 or development and integration of the B–1's avionics.

Regarding the tactical airpower missions, present day fighter and attack aircraft cannot cope with the requirements of the late 70's. For air-to-air combat the Air Force plans to use the F–15. McDonnel-Douglas has a development contract which calls for 20 test aircraft, one wing of fighters, and options for two follow-on wings. Actual procurement money for the F–15, as contrasted to R&D money, will be budgeted in the future.

In response to the close air support needs of the ground forces we are working on a survivable, all-theater, attack plane known as the AX. Six contractors have responded to our May 7 Request for Proposal on the AX, and the responses are now being evaluated. By early next year contracts should have been awarded to two contractors to each build two copies of a competitive prototype. We are able to build flying prototypes of this aircraft because of its relatively low cost.

The three systems I've noted are badly needed if the Air Force is to continue to carry out its mission in the 1970's.

But the armed forces now have an additional role, one of front line engagement in the war against domestic distress. The F–15 program recently provided an example of the combined domestic and military concerns of the Air Force. Through oversight, the F–15 contract was awarded without an equal opportunity clause. The overriding importance that the Air Force assigned to correction of this error was quickly apparent. Secretary Seamans, attending a conference in Puerto Rico at the time, immediately flew to St. Louis to revise the agreement and to survey the hiring practices of McDonnel-Douglas.

As we have become more and more aware since World War II, there are real injustices in the societal framework of this great country. I think Ted Sturm, the Executive Editor of the *Airman* magazine, had a fine grasp of the interacting causes when he wrote the following:

"The 'enemy' has been well defined by many people. He is the evil rampant in our society—and his offspring are the multifarious outgrowths of poverty, ignorance and discrimination. It is difficult to separate these three villains and the evils they spawn—crime, hate, fear, destroyed lives. They are closely related. Poverty is often the result of ignorance and vice versa, and both can result from discrimination. Poverty and ignorance can set up a self-perpetuating and vicious cycle that must be broken by the destruction of one, or both, and the eventual removal of the basic causes."

As Mr. Sturm implied, conditions over which an individual has no control often tend to predestine the road of life he must follow. But in traveling that highway he carries within him the seeds of revolt against the institutions that denied him a fair chance in life. He feels little commitment to a society which does not respond to his basic needs. Too often this alienation of the underprivileged results in all types of anti-social reaction. Since 1948 the Air Force, keenly aware of these factors, has vigorously campaigned against their causes.

About 16 months ago Secretary Laird established the Department of Defense Domestic Action Council. I am especially proud to be the Air Force representative to this group, whose aim is to apply DOD resources to the alleviation of domestic difficulties. Our goals for 1970 are pretty impressive. They are:

First, to establish summer youth employment opportunities at a rate equal to 4.2 jobs for each 100 Civil Service employees. A goal which we believe we have exceeded.

Second, to provide in each military department the equivalent of 200,000 man weeks of educational, recreational and cultural opportunities for disadvantaged young people.

And third, to sponsor or support at each active and reserve installation at least one significant project to improve the health and well-being of the adjacent community.

Within the Air Force, we have a Domestic Action Policy Council which provides specific service direction to the guidance of the DOD Council. The policy council monitors and guides the USAF's field efforts. Our service has two categories of domestic action—centrally managed and locally managed.

Examples of centrally managed, service-wide endeavors are Project 100,000, Project Transition, Youth Opportunity Programs, ghetto area contracts and development of new construction methods. There are about 13 of these programs, and usually they involve such an expenditure of funds or effort that they require special legislation or appropriations.

Under Project 100,000, the services enlisted 100,000 men per year who would previously

have been considered mentally or physically disqualified for active duty. Rigorous inservice training and remedial courses of the most fundamental variety are making these people into productive servicemen. And the benefits will continue to grow as many of them return to a civilian society which can reward their enhanced skills.

Another important program is our research and development study of new construction methods for family housing. The pilot project at George Air Force Base, California looks like it may yield a three-bedroom house for $12,000. Such value would represent a considerable breakthrough in development of materials and techniques for low-cost housing.

Throughout the planning and execution of these programs the Air Force, through the Department of Defense, has been actively cooperating with the Departments of Labor, Housing and Urban Development, and Health, Education and Welfare. On a gratifying number of occasions, private businesses have also cooperated in sharing program costs.

Local domestic action programs are just what the name implies; they respond to the requirements of the time and the place. The field commander and his staff are in the most advantageous position to know and appreciate the area's needs and to help meet them with available resources.

Recognizing the local problem for what it is—often it's a derivative of ignorance, poverty or discrimination—and attacking the causes are the most important facets of local domestic action. Too often in the past, efforts of the well-meaning have addressed the effect rather than the cause. Thereby, they have perpetuated a status quo, altered only by a momentary anomaly within the established pattern.

The Air Force people at Tinker Air Force Base, Oklahoma, assisted a young lady to her feet through a domestic action program, but her gratitude was tempered by bitter memories. Recalling her past, she said:

"Don't offer me pity or handouts. Ones from the past burn in my heart."

The girl from Oklahoma had experienced charities which cost too much in dignity, charities directed at an effect, which did very little to eliminate the cause. We hope that our programs will go further toward long-term improvements.

At Wilford Hall USAF Medical Center, Texas, we trained a group of underprivileged girls as laboratory assistants. One of the outstanding graduates of this program, Miss Oralia Perez, a young lady who now plans to attend college in preparation for a career as a medical technologist, had this to say about the helping hand she received from the Air Force:

"It's the only way I could have received this training without first completing high school and earning enough money to pay for the course."

For a girl who had dropped out of school as a sophomore to help support her family, these goals might well have been unattainable. But those who worked with Miss Perez addressed the problem squarely and provided her a means to alter her future with dignity.

Fundamentally, the local domestic action program is dynamic neighborliness, but we couldn't call it that. In the first place the term seemed a little too exposed. We didn't want to be accused of being unneighborly when the requirements of the moment dictated full attention to our primary job. Community relations cannot become the dominant theme of Air Force activity. We must carry out our primary mission while at the same time doing whatever we can to be a good neighbor.

What is a neighbor? He's the fellow who loans you a ladder. Hancock Field made available vehicles and classrooms to the State of New York for a truck drivers school. Both jobs and untrained men were available, but facilities were in short supply.

Who else is a neighbor? He's a man who listens to your kids problems when they can't explain them to you. AIC James L. Habegger of Tyndall Air Force Base has spent the last year in just this type activity in Panama City. He's reaching out to communicate with a group of troubled teenagers. Fortunately, he digs them and they dig him. The school's curriculum coordinator labels the results, "Tremendous!"

Who is another neighbor? She's the lady who says she'll baby sit little Mike. When you come home, you find that your son's affections have been alienated by a group of very commonplace happenings, but to him they were very new and completely fascinating. Yet, what else is Project Youth at Robins AFB? Children are provided the facilities and opportunity to see, to do, to learn, to experience, and to enjoy a host of new things.

You'll also find that neighbors have taught your son to throw a curve, they've driven your wife to an appointment, and they've bandaged the scratched and bloodied knees of your offspring. There are service counterparts for them all. The "Big Brothers" of the Air Force Academy have associated themselves with disadvantaged youth in Colorado Springs. Numerous wives clubs throughout the country provide transportation and shopping services for the aged and infirm. The experimental Military Assistance for Safety and Traffic programs in San Antonio and at Luke and Mountain Home Air Force Bases provide helicopter evacuation of accident victims when requested by local traffic authorities.

There is, however, a difference between the neighborliness of your street and the more corporate variety between a base and its adjacent community. The latter takes a bit more effort and organization because it is bigger and lacks an initial, personal spark. Once underway, spontaneity can build. We have bases calling in to headquarters with imaginative campaigns which they feel deserve publicity so that other units can emulate them. Fortunately, our programs are to a degree self-sustaining which allows us greater leeway in DOD and Air Force Headquarters to examine new avenues of approaching the basic goals without fearing the collapse of our present endeavors.

Our current Domestic Action programs are reaching a large number of people. The Department of Defense has provided jobs for over 53% of the 66,000 disadvantaged youths hired by federal agencies this summer. Over 550,000 young people are engaged in service-sponsored endeavors similar to the WRAMA's Project Youth.

Domestic action is a highly important realm of endeavor for all federal agencies these days; and as has been true for many years, the armed forces are in the vanguard of the effort. That our efforts have met with as much success as they have has been attributable to two factors: First, the spare-time involvement of our airmen, officers and families. Second, the unselfish, unflagging assistance of community-minded organizations.

I'd like to salute one of the finest such agencies I know—the Middle Georgia Chapter of the Air Force Association. Your varied interests, valuable work and fantastic growth over the past year and a half border on the unbelievable. Most noteworthy I feel have been your contributions to the Project Youth Lunch program, your education scholarships, and finally the projects you have initiated on behalf of our Prisoners of War in North Vietnam. These men and their cruelly exploited loved ones at home deserve our ever-increasing efforts to secure both their rights under the Geneva Convention and their early repatriation.

The accomplishments of WRAMA, Robins AFB and the Middle Georgia Chapter of the AFA have provided the Air Force with one of its proudest examples of dynamic, productive Domestic Action. Others have noted this performance also. Next Monday at the AFA Annual Convention the Middle Georgia Chapter will be recognized in a citation as the Air Force Association's most outstanding unit in the field of community relations. Your president, Dr. Dan Callahan, will receive the Medal of Merit for his distinguished service to airpower and to the Association. General Beck will also be presented a citation for his steadfast support of the energetic AFA community in Georgia.

I see here in Middle Georgia the kind of teamwork and civil-military interaction which will go a long way to smoothing the Air Force's path as it faces the challenges of the 70's. Thank you and keep up the good work.

## VIOLENCE AND TERRORISM, AMERICAN STYLE

### HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. BOB WILSON. Mr. Speaker, the recent increase in senseless terrorism and violence across our Nation has horrified Americans in all stations and walks of life. Many of us are unable to comprehend the motivation behind such useless destruction. The following editorial from the September 11 Washington Star is an excellent analysis of the background and reasons for this violence as well as what it forebodes for the future of our free society if we do not take positive steps now to stem this lawlessness and reaffirm our own faith in America and the ideals for which it stands:

VIOLENCE AND TERRORISM, AMERICAN STYLE

With attention riveted on the guerrilla-held airstrip in Jordan, it was almost possible for people here in the United States to forget, briefly, the mounting turmoil in our own society. Almost—but not quite. For some, the grim chess game being played with human pawns did not serve as a horrifying diversion, but as a reminder that terrorism is not a foreign product. It is appearing in shocking quantity right here and right now. And it is quite possible that the terrorist tactic of kidnapping and the bartering of hostages could happen here, too.

It is time for us to recognize what is taking place in this country. It can be called by a variety of names. It is, if you will, a revolution, or a guerrilla war, or a terrorist uprising. But whatever the name of the game, the goal is the same: A small, dedicated group of warped romantics is determined to topple the structure of American society.

It has been possible for members of the besieged society to find consolation in the fact that the attack is being mounted by a revolutionary army of minute size. There was reassurance to be found as well in the knowledge that terrorist tactics are not new to America; we have been through outbreaks of violence and bombing before, and we have survived. It must follow, therefore, that we will survive the present microcosmic revolution.

Both of these rationalizations for apathy should be re-examined.

The example of the Palestinian terrorists should serve as sufficient instruction in what a numerically insignificant army can accomplish once an opponent's Achilles' heel can be found. The greatest powers on earth were helpless to prevent a handful of men from kidnapping hundreds of innocents. And here at home, the achievements of a small group

of terrorists—possibly numbering in the hundreds—is chillingly impressive. Over a recent period of 16 months, there were 4,330 bombings, many in public buildings; there were 1,475 additional attempted bombings and more than 35,000 disruptive bomb threats. More than 100 policemen have been wounded in unprovoked attacks during the first eight months of this year, more than a dozen of them fatally, and the incidence of bombing police cars, sniping at patrolmen and luring them into traps is increasing week by week.

The demonstrated vulnerability of an open society to the tactics of terror should dispel the illusion of weakness in numerical inferiority. And the comfort offered by history is equally insubstantial.

The United States has had its home-grown terrorists before the extremists who have turned to violence to change the status quo, But the radical reactionaries of the Ku Klux Klan and the Molly Maguires and the Wobblies of the early labor movement used violence and terror against a specific segment of society in pursuit of what they perceived as positive goals. We have had our anarchists, too, in the Great Red Scare of the early 1920s, practicing destruction for the sake of destruction. It was an importation of despair, brought by a handful of immigrants who harbored a paranoid hatred of authority.

But now, there is a difference. For the first time, the country is confronted with a terrorism that is both native and anarchistic. It is a movement that has no single, identifiable center. The two most publicized revolutionary groups—the Black Panthers and the Weathermen—have little in common beyond the impulse to destroy. The terrorists are not totally isolated from the main body of society. They are tacitly supported by an unthinking minority of unknown size of young Americans who share the despair if not the psychoses of the activists, who slip easily into the rhetoric of hatred, and who, if forced now to choose sides, might well rally under the black flag of anarchy.

This is the situation confronting the vast majority of citizens who believe that the American system is the farthest step yet taken by imperfect men in their endless search for the ideal form of government. What can be done about it?

First, society must move with firmness and determination to protect itself. Destruction of lives and property cannot be excused or tolerated. Those who volunter for service in the law-keeping forces deserve and must be given the full support of those they protect.

At the same time, the law-enforcers must be continually monitored to make certain that lawlessness and violence is not met in kind. Anger and panic can induce the police to take short cuts with the law. Terrorism in the protection of society is a suicidal course that must not be condoned.

Society must guard, too, against the possibility that it can be panicked into a reaction of blind repression that will succeed in achieving the goal of the terrorists: The destruction of the liberties and the constitutional protections that make this government worth fighting to preserve. We have taken such dangerous detours before, as in the Red hunt of 1920 undertaken by Attorney General A. Mitchell Palmer in response to a series of anarchist bombings when, on a single night, some 4,000 suspected radicals were arrested in 33 cities, most of them on the flimsiest of evidence. Any such action today, in this era of instant communication and excited passions, would give substance to the specter of repressiveness that now exists in the imaginations of the militants.

If the violence is suppressed without brutal repression, if the majority avoids the tempting illogic of assuming that because some destroyers are black and some have long hair, all black or long-haired youth is the enemy, the problem still will not be solved. The rash of violence is the symptom, not the illness. An end to the violence will not mean a cure.

But what disease is this that can bind together the despairing youth of the black ghetto and the affluent white youth in a deadly partnership? What common romantic aberration can make a black militant write that "dynamite is my response to your justice" and induce a Harvard student to describe his desire to blow up "the White House, the Capitol, the Pentagon, the university"—to destroy all of society because "only then will we be able to plant trees and flowers all over our woes, and begin again"?

Those who would answer that the Vietnam war is responsible are deluding themselves with an easy—and incorrect—answer. The war has been at most a catalyst hastening the chemistry of violence.

The fact is that there is no single cause, no readily isolated social virus to be cured. The black militant is reacting to a history of deprivation and a present of agonizingly slow progress toward a promised goal. The middle-class white militant is, it would seem, acting with less rationality, protesting against affluence, rejecting material wealth, striking out at the system that guarantees the right to protest.

There is, however, one common thread that runs through the confused tapestry of violence: A loss of faith.

There is a disbelief in the willingness or the ability of this government to right the wrongs that it acknowledges. There is a disdain for the past and a distrust of the future. There is a rejection of set values. There is a loss of purpose, a surrender to uncertainty, created by the repeated shock of changes that have come too quickly, and nurtured by the realization that annihilation is a daily possibility.

Exhortations, slogans, name-calling and stern lectures cannot effect a cure. The erosion of faith can only be halted if each of us who believes in the worth of our society reinforces that belief with a redefinition of goals and a candid re-evaluation of strengths and weaknesses. When faith is gone, it cannot be ordered back into being. It must be searched out and discovered anew. It is a difficult and painful process—but it must be done. The structures of a free society cannot stand on any less substantial a base.

---

## HOW TO SUCCEED IN BUSINESS WITHOUT REALLY TRYING

### HON. THOMAS M. REES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. REES. Mr. Speaker, all Members of this House are naturally deeply troubled by the difficulties being experienced by businessmen in this time of national economic travail.

Many thousands of businessmen have been forced into bankruptcy as the result of the Nixon administration's economic policies, and many thousands of others have seen their profit margins dip to the vanishing point.

It is, therefore, very encouraging when one reads about how some individual businessmen manage to succeed against great odds. It shows, indeed, that this is still the land of opportunity.

I refer, particularly, to the Horatio Alger success story of a fellow Californian by the name of F. Donald Nixon—as related in the following article in the Los Angeles Times:

[From the Los Angeles Times, Sept. 9, 1970]

ENVY OF RIVALS: DONALD NIXON'S EASY ENTREE AIDS IN SELLING

(By Robert L. Jackson)

WASHINGTON.—F. Donald Nixon is aware that some business competitors regard him as "unfair competition."

The name seems to open doors wherever he goes. And in the past eight months Don Nixon, the President's brother, has been to London, Lisbon, Athens, Rome, Mexico City and Caracas, as well as up and down the West Coast several times and back and forth between Washington and New York.

Not only does he have easy entree to business executives, but he seems to be able to see high foreign government officials almost without trying.

"I don't let my brother know when I'm going on trips," said Nixon, who was hired last January for a specially created vice president's post by the *Marriott Corp.*, a Washington-based hotel and restaurant firm that has international operations.

THE WORD GETS OUT

"Still the word seems to get out. Our ambassadors have frequently called my hotel to extend any courtesies to me. But I tell them it's a private trip."

Don Nixon's activities might not normally command much attention, except that he has been calling on many U.S. airline executives. He is asking them to shift their in-flight food catering business to Marriott, and there are indications he has been largely successful.

Since airlines are regulated by the federal government—and since President Nixon has sole authority to determine international air routes and who flies them—Donald Nixon's efforts are arousing jealousy and bitterness among many of Marriott's in-flight food service competitors, and a degree of wonder and uneasiness among some airline officials.

CRITICISM IS IGNORED

For his part, Donald Nixon is aware of the talk about him but is seemingly undisturbed by it. Interviewed in the Washington office of J. Willard Marriott Jr., the company's 38-year-old president, Nixon said he is accustomed to be criticized.

"It's nothing new," Nixon said. "Dick's been in politics many years. I've had to lead a careful life, to completely stay out of anything to do with politics, which is my brother's concern."

"He doesn't have to tell anybody who he is," said one airline executive. "He has entree into the top echelon everywhere."

Said another airline official Donald Nixon visited:

"It's a pretty fine line when you're dealing with companies that are federally regulated."

On foreign trips, when he is calling on potential customers or inspecting Marriott's overseas "flight kitchens," Donald Nixon is accorded privileges most businessmen would envy.

He dined with officials of the Greek military junta in Athens last March, and traveled recently to Caracas and met with two Venezuelan cabinet ministers. About two weeks later—although no one can show a connection—a new U.S. competitor of Marriott's in Caracas, Ara Services, Inc., experienced difficulties with the Venezuelan government and had to suspend its airline catering operations there.

Donald Nixon said he has pointedly avoided any involvement with government contracts. That was a principal reason, he said, he decided late last year to leave a similar job at Ogden Foods, an arm of the Conglomerate Ogden Corp. which has federal contracts.

Nixon had been a marketing consultant

for eight years at Ogden Foods before Marriott persuaded him to leave last January to become staff vice president.

BIG AIRLINE SWITCH

A month later, on Feb. 1, American Airlines switched a $500,000 annual food catering contract from Ogden to Marriott, this contract, at Dulles International Airport here, had been held for five years by Ogden.

An American spokesman said the decision to change caterers was made earlier—before Nixon joined Marriott. Ogden officials said they gave American "superb service" and had received no complaints.

Nixon said that "so far as any advantage to being the brother of the President, it has been a handicap to some extent because of having to avoid government contracts."

Asked if he has been handicapped while at Marriott Corp., Nixon turned to Marriott and said:

"Bill, have I been handicapped? Actually, Bill has not asked me to do anything for the company that relates to the federal government, so I'm not in conflict with any responsibilities of my brother."

PRESIDENT'S FRIEND

The firm is headed by Board Chairman J. Willard Marriott Sr., 70, who has been a longtime friend of President Nixon and a fundraiser for Republican causes. He was chairman of Mr. Nixon's 1969 inaugural committee and organized the national "Honor America Day" program on the Washington monument grounds last July 4.

Donald Nixon and the younger Marriott both denied that contacting airlines posed any conflict problems. "I don't play the game of being a brother to the President," Nixon said. "People have to find that out themselves."

Nixon, 56, is a heavy-set six-footer. He bears a strong facial resemblance to President Nixon, and his voice and gestures are strikingly similar. He lives in Newport Beach and works mainly out of Marriott's West Coast office.

Last Jan. 28, shortly after Marriott hired him, Nixon and other Marriott officials visited Trans World Airlines' corporate offices in New York to try to persuade the airline to give them more business.

For one thing, Marriott—which already serves TWA at Washington, Newark and some European stations—wanted the airline's $2 million annual contract at San Francisco, which has been held for 18 years by Club Catering, a small firm in Burlingame, Calif.

In a pattern he later followed at other airline offices, Nixon did not deal with the details of a new contract proposal. Rather, he spoke in general terms about the capabilities of the Marriott Corp. The specifics were gone into by Jerald O. Jarrard, Marriott's vice president for in-flight services.

Said Richard B. Patton, a TWA vice president who presided at the meeting: "I don't think Don Nixon believes he has much influence over his brother. And I think he's the first to tell you that."

Patton has known Nixon for four years as "a very modest, outgoing, sweet average person."

"There is bitterness around" in the airline food catering business, Patton said, because it is highly competitive. And Nixon, he said, is being unfairly attacked by some of his business opponents.

TWA officials said their eventual plans for the San Francisco contract are still in doubt. However, the airline has given Marriott additional business in Athens, where Marriott has opened a new flight kitchen.

Nixon said his responsibilities involve "customer and employe relations" in all aspects of Marriott's food and hotel business. The younger Marriott said Nixon was hired because of his long experience in the food business. His salary has not been disclosed.

KINSHIP "DOESN'T HURT"

"He's a sincere, friendly and very effective salesman," Marriott said. "And being the brother of the President doesn't hurt him."

Donald Nixon is a man of great charm, his acquaintances say, whose occasional references to his brother may only be misunderstood by critics.

He is well-tailored, belongs to the Marco Polo Club at the Waldorf Astoria in New York and, according to one source, "is a good man with a knife and fork."

"At dinner," said an airline official who has known him socially, "he often drops Dick's name or talks about the grocery store that the parents owned in Whittier. He talks about 'when Dick and I were kids.' He keeps reinforcing by implication that there's a close relationship—which, of course, there should be—but he doesn't strain to make the point."

At Western Airlines, here Nixon dined with officials in April, there was "no mention whatsoever of any White House influence," according to Richard Ensign, Western's vice president for inflight services.

THE "EXTRA GUEST"

Ensign said Nixon showed up "as an extra guest" for a dinner meeting Ensign had arranged in Los Angeles with two other Marriott officers—the younger Marriott and Jarrard. The purpose was to discuss Marriott's contract with Western at Mexico City.

"The whole group," Ensign said, "bent over backward a little bit to make clear his (Nixon's) attendance was just simply that he happened to be with them, and that was it, period."

Nixon has paid other office visits this year to three supplemental airlines headquartered in Oakland—World Airways, Trans International Airlines and Saturn Airways.

All are certificated to fly international routes and derive much of their revenue from charter flights, an area where the Civil Aeronautics Board is proposing strict new regulations.

In fact, the CAB this year filed civil complaints against World and Saturn, among others, charging violation of charter-flight rules. Those cases are still pending.

World and Saturn have granted new food catering business to Marriott, and Trans International officials said they will consider Marriott's bid later this year. Marriott's prices and services are the only considerations, officials of the airlines said.

Early in July Nixon traveled to Mexico City and Caracas on Marriott business. But he said firmly in an interview that he saw no foreign government officials. "I steer away from government officials," he said.

When asked specifically, however, if he had not conferred with the Venezuelan minister of development, Nixon said he may have. He said the Venezuelan government sought him out—not the other way around—to ask if Marriott would be interested in expanding its hotel facilities and initiating on-the-ground food service at the Caracas airport.

RIVAL FOLDS UP

Nixon said the main purpose of his trip was to meet some of Marriott's Latin-American airline customers.

Shortly after his trip, a new Marriott competitor, ARA Services, Inc., had to suspend catering operations at the Caracas airport after only four days in business.

ARA experienced trouble with the Venezuelan government over its permit to do business and was plagued by mechanical difficulties in some of its equipment. Nixon said ARA's plans to begin business were not discussed during his visit.

His Latin-American trip was similar to a European tour Nixon made last March for Marriott, highlighted by an Athens dinner attended by some leading officials of the Greek junta as well as Greek businessmen.

Nixon said he was surprised that government people were at the "social" function, which was hosted by Thomas Pappas, a Republican fund-raiser from Boston who has wide business interests in Greece.

Nixon said he inspected Marriott "flight kitchens" throughout Europe and visited with employees. In Athens his purpose was to meet officials of Olympic Airways, which has become a new client of Marriott's, he said.

Regarding air routes, Nixon said he avoids discussing the question when he contacts any U.S. airline, because he is sensitive about his brother's responsibilities in this field.

"When the matter comes up, I wish them all well," he said. "I say, 'I don't know which route you're going for.' I recognize that international routes go by the White House. I've never discussed this with my brother, and I wouldn't."

But Nixon said the matter has not come up since he joined Marriott.

Donald Nixon sees the President frequently in San Clemente or Washington, "but we only discuss family matters."

Another brother, Edward G. Nixon, 40, is a phone company official in Seattle. Edward turned down a $30,000-a-year federal position last year after being advised this might violate a 1967 antinepotism law.

Donald Nixon, for his part, says he has a right to earn his own living. "Just because my brother's President, I don't want to go on relief yet," he said.

---

## SENATOR FULBRIGHT ERRS IN MIDDLE EAST PLAN

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. DERWINSKI. Mr. Speaker, the contribution, or really lack of it, to the Middle East crisis by the junior Senator from Arkansas has been widely noted in many columns and press reports. One of the most effective commentaries on the newest misdirection of Senator FULBRIGHT was carried by the Elgin, Ill., Daily Courier-News on Friday, September 4, in a column by the international correspondent of the Copley Press, Dumitru Danielopol.

The column follows:

INTERNATIONAL SCENE—SENATOR FULBRIGHT ERRS IN MIDDLE EAST PLAN

(By Dumitru Danielopol)

WASHINGTON.—Sen. Fulbright's suggestions for a Middle East settlement reinforce the belief that he lives in a world of his own.

The chairman of the Senate Foreign Relations Committee calls for an "imposed settlement" under the charter of the United Nations.

Then in the next breath he recognizes Israeli and American lack of confidence in the U.N. and suggests he would be "willing to support a significant new commitment by the United States to assure Israel survival."

This implies a military pact with Israel which would automatically bring us into the war to protect that country.

Two points in the senator's proposal are simply unrealistic.

1. The United Nations is in no position to "impose" any settlement on anyone. With its veto structure the Security Council has never been able to take any major decision with Soviet approval.

The one exception came when it ordered help to South Korea, and that action was

only possible because the Russians were boycotting the council at the time.

Unless the USSR agrees on a Middle East settlement, the Security Council has nothing to say. And if the Russians are in accord on a settlement, who needs the Security Council.

A bilateral defense treaty with Israel is even more unrealistic. It would isolate us and the Israelis and expose both of us to all kinds of "credibility" tests.

Both Allies and would-be aggressors must be convinced that the United States is both willing and able to honor such a treaty with sufficient strength.

There are serious questions today about many American commitments, thanks to the performance Fulbright and his "doves" in the Senate who have done so much to undermine American re-credibility abroad.

Can one ask Israel, for instance, to take seriously Sen. Fulbright's offer to sponsor a new military commitment when one recalls what happened to his Tonkin Resolution.

It was, after all, Fulbright who sponsored and piloted that through the Senate in 1964, and then later, after he changed his mind, did everything in his power to nullify it and hamper our war effort.

Can one assure Israel that if attacked the United States would be able to muster enough support at home to come to its aid with the strength necessary to assure success?

The words of the Cooper-Church and McGovern-Hatfield amendments and the full-scale attack on our defense establishment were hardly encouraging.

Nor are the antiwar demonstrations, moratoriums, draft-dodging draft-card burning attacks against ROTC centers, slogans like "No more Vietnams," "We can't police the world," "bring our boys home," and other neo-isolationist trends in the U.S.

Sen. Fulbright has helped make the confused world in which we live. And now he wants to add more confusion.

---

## THE SEARCH FOR NATIONAL PRIORITIES

---

## HON. ELFORD A. CEDERBERG

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. CEDERBERG. Mr. Speaker, this week I am sending to the people of the 10th Congressional District a newsletter outlining what I feel to be two of the major problems which we face today. In our efforts to stabilize the economy I feel that several aspects of our fight have been overlooked and I treat this situation extensively in my report.

The drug problem among our youth is certainly one of the more frightening problems which our Nation faces. In an effort to provide some light on this subject, I am including in my newsletter a rather comprehensive but succinct fact sheet on the drugs which are being used today. I hope that this brochure will prove useful to the people of the 10th District of Michigan and I recommend it to my colleagues for their attention.

Finally, I think it is important for our people to share their thoughts and I have, therefore, included excerpts from a letter which I received which I believe to be representative of the feelings of a great number of Americans today. I highly recommend my constituent's thoughts to the attention of my fellow Members.

The text of my newsletter follows:

THE SEARCH FOR NATIONAL PRIORITIES

I welcome this opportunity to discuss with you some of the major issues and policies which are facing our nation and its citizens and ones that I do not believe have been getting through to the public in most recent newspaper commentary.

The search for national priorities—where we put our Federal monies and our national talent—is one of the most difficult challenges confronting Congress this year and one with which I am deeply concerned.

Despite the continuation of the war in Vietnam we are making progress. In the past two years there has been a significant shift in our priorities, a shift that is certain to continue and to intensify as the war in Indochina is brought to a conclusion.

To understand what is now going on in our economy, it is important that we realize our economic system is having to make not one but two major adjustments simultaneously. It is having to adjust to a major decline in defense spending while it is also cooling off from a long inflationary overheating that had become increasingly dangerous.

The adjustment in defense spending is a far greater force on the economy than many people realize. From 1969 to mid-1970 defense spending has been reduced over $12 billion (in terms of this year's prices) and by mid-1971 the reductions will approach $20 billion.

Now this is a massive re-ordering of priorities. While some have been busy orating about the need for this, the President has been busy doing something about it. As a matter of fact, for the first time in 20 years we are spending more this year for human resource programs than we are for defense. In 1962 the Federal government spent 48 percent of its budget for defense and only 29 percent for human resources. By 1968 that comparison was 45 percent to 32 percent. This year those priorities are reversed with 37 percent for defense and 41 percent for human resource programs.

While the Administration has been struggling to break the inflationary cycle, some Members of Congress still are intent upon increasing spending. I believe that this is one of the contributing factors to our present inflation and for this reason I have voted each year to cut government spending and to balance the budget.

True, we are still feeling the grip of inflation. Inflation created by a decade of massive fiscal irresponsibility cannot be stopped overnight. The President's anti-inflationary policies are having some effect on the economy. The per capita income was at an all time peak in the second quarter of this year. Money is becoming more available. Interest rates have been edging downward. Housing starts are already increasing. Commitments for mortgages are rising. All indications are for an improved economy during the last quarter of this year.

The time is long overdue for the "big spenders" of the Congress to assume their share of responsibility if the economy is to prosper once again. Continued reckless spending as we have witnessed so often in the past will only serve to fuel the fires of inflation.

HOW PARENTS CAN HELP TO COMBAT DRUG ADDICTION AND REDUCE CRIME

As a Member of Congress, I share with all citizens and particularly parents the increasing awareness and alarm over the twin problems of drug addiction and traffic in this heinous poison. Just how serious is the drug abuse menace? The number of narcotics addicts in the United States is estimated to be in the hundreds of thousands. Between 1960 and 1967 juvenile arrests involving the use of drugs rose by almost 800 percent, and one-half of those arrested for the illicit use of drugs and narcotics were under 21 years of age. Some five to seven million persons in the United States reportedly have used marijuana at least once, an estimated one million persons have used non-barbiturate sedatives and over 400,000 have used barbiturates and amphetamines. The estimated social cost of drug abuse in this country is $540 million a year. Studies show that the average heroin addict needs $47 a day to buy drugs. Larceny, mugging, shoplifting, burgulary, drug peddling—these are the cirmes he commits most often. Merchandise stolen is usually discounted by one-half to one-third. Property valued at $150 may bring only $50 when resold. Between July of 1969 and March of 1970 drug crimes cost the nation an estimated three billion dollars. Between 30 and 70% of all crimes in our large cities are attributed to drug addicts in search of money to support their habit.

It is a tragic fact but everything from marijuana and pep pills to heroin is being sold in the schools of our nation, the schools of our 10th Congressional District—perhaps the very school your child is attending. An estimated 35 percent of all students in high school and college use marijuana Each of us must be aware of this problem. No child, no school and college use marijuana. Each of us mune to the epidemic dangers of drug abuse. It is criminal to stubbornly refuse to believe that "it can't happen in my home," for indifference and apathy are the weapons of the pushers.

Parents must stop looking the other way until the problem hits home.

As parents, teachers, and concerned citizens, let us not succumb to and have a complex about cries of "generation gap" or "communications gap" as excuses for drug abuse.

Parents, please study the information in this brochure—and most importantly, sit down and discuss the problems of drug abuse with your children. Find out how they feel about drugs, how their friends feel about it. Be sure they are fully aware of the terrible consequences of being a slave to drugs. Above all, assure your children that you are available at any time to help with any problems they might have. Stop drug addiction before it grabs hold—and save your children.

GLOSSARY OF NARCOTICS TERMS

*Following is a list of major illegal drugs, how they are used, their popular names and the effects:*

Marijuana—Called "pot" or "grass." Derived from female hemp plant. Usually smoked. A mild hallucinogen that distorts perceptions of time and space and coordination. Strong doses can cause short-term psychotic reactions. Long-term effects are not known. To use marijuana is to "get high," "turn on," or "get stoned." Marijuana cigarettes are called "joints."

Hashish—Called "hash," same as marijuana, except more potent.

Amphetamines—Stimulants used to combat fatigue. Taken in pill form, although some stronger forms are dissolved in a liquid and injected with a needle. They speed action of the heart and metabolism. Called "bennies," "pep pills," "diet pills," and in strong doses, "speed." Not addictive physically, but psychological dependence is common. Larger doses are required for the same effect after a while.

Barbiturates—Sedatives, called "downs" or "goofballs." They relax the nervous system, slow the heart rate, lower blood pressure and slow down breathing. Effects can resemble drunkenness and users sometimes become irritable and angry. Physically addictive, like heroin, barbiturates are a leading cause of accidental deaths in the country.

LSD—A powerful hallucinogen called "acid." It causes sharp changes in perception. Non-addictive, but can cause panic, paranoia, and hallucinations. Can also

produce permanent derangement and physical defects. Mescaline, DMT, psylocybin are similar, but less potent substances.

Heroin—Called "junk," "stuff," "scag." Derivative of opium. Usually injected under the skin or "mainlined," injected directly into a vein, it depresses certain areas of the brain and nerves, causes physical and psychological dependence, and gradually takes greater quantities to achieve the same effect. Cocaine is similar.

It is possible to save a user of narcotics from a life of horror if detected early. There are not enough doctors in this world to examine each and every possible user, but there are enough parents.

I have prepared this brochure in order to alert parents to the various symptoms that drugs produce. Observe your children and note unusual changes in normal behavior.

For informative booklets on drugs, write my Washington Office: 2303 Rayburn House Office Building, Washington, D.C. 20515.

| Drug used | Physical symptoms | Look for— | Dangers |
|---|---|---|---|
| Glue sniffing | Violence, drunk appearance, dreamy or blank expression | Tubes of glue, glue smears, large paper bags or handkerchiefs | Lung/brain damage, death through suffocation or choking, anemia |
| Heroin, morphine, codeine | Stupor/drowsiness, needle marks on body, watery eyes, loss of appetite, blood stain on shirt sleeve | Needle or hypodermic syringe, cotton, tourniquet—string, rope, belt, burnt bottle, caps or spoons, glassine envelopes | Death from overdose, mental deterioration, destruction of brain and liver |
| Cough medicine containing codeine and opium | Drunk appearance, lack of coordination, confusion, excessive itching | Empty bottles of cough medicine | Causes addiction |
| Marijuana, pot, grass | Sleepiness, wandering mind, enlarged eye pupils, lack of coordination, craving for sweets, increased appetite | Strong odor of burnt leaves, small seeds in pocket lining, cigarette paper, discolored fingers | Damage to liver, inducement to take stronger narcotics |
| LSD, DMT, STP | Severe hallucinations, feelings of detachment, incoherent speech, cold hands and feet, vomiting, laughing and crying | Cube sugar with discoloration in center, strong body odor, small tube of liquid | Suicidal tendencies, unpredictable behavior, chronic exposure causes brain damage |
| Pep pills, ups, amphetamines | Aggressive behavior, giggling, silliness, rapid speech, confused thinking, no appetite, extreme fatigue, dry mouth, shakiness | Jar of pills of varying colors, chain smoking | Death from overdose, hallucinations |
| Goof balls, downs, barbiturates | Drowsiness, stupor, dullness, slurred speech, drunk appearance, vomiting | Pills of varying colors | Death from overdose, unconscious |

LETTERS I HAVE RECEIVED

The following is an excerpt which I believe expresses the concern of many of the Tenth Congressional District—a concern which I share.

"Many millions of good, solid American people like myself, which could be classified as silent Americans, are beginning to get anxious as to how long will the bombing of schools and burning of property by protesters and radicals, killings on street corners of our citizens throughout the land can go on. . . . What does get a person steaming mad when you read of these sad happenings throughout our land, is should the police, after spending many hours and days, apprehend our (criminals), they are put into a courtroom at public expense and immediately an attorney is hired to defend these so-called citizens to make sure their rights are not violated, again costing the taxpayers additional sums of money. What about the rights of the innocent victims and their families."

"How long will it be before serious thought will be given to protect the rights of our good Americans that work so hard that have never seen an inside of a jail, that don't draw any state or Federal aid although many would be entitled to it, especially our poor farmers that work so hard for such meager returns. In many cases if you figure by the hours that a man, wife and children spend in a cow barn, their straight time may not amount to anymore than 35¢ or 40¢ an hour. Yet, where would you ever hear of this class of people going out and burning anything? All the millions of these solid Americans' rights are violated in every direction and no one seems to care less."

I also receive hundreds of letters from my constituents requesting assistance on a wide range of matters, from Social Security and Veteran pensions to military cases. An example follows:

*Mr. D. A. of Bay City writes:* "As the Congressman for my voting district I wish to ask for a little of your time in straightening out a matter of great importance to me. I have had a lot of trouble receiving my V.A. benefit for education assistance."

"I have asked many times at the V.A. office but they cannot get anyplace. Your help in this matter will be greatly appreciated."

We contacted the Veterans Administration officials in his behalf to investigate the entire matter from his first enrollment to the present time and requested that payments be made for the Fall and Winter terms. We were successful in this matter and the funds were granted.

If you have a problem with any government agency and feel I can be of help, please contact me at my Washington Office, 2303 Rayburn Building, Washington, D.C. 20515. We are not always successful, however, you may be certain that we will do everything we can to be of assistance. Also, I would very much like to hear your views on any issue you feel is important.

## NEW BLOOD FOR TIRED HOSPITALS

### HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. HANNA. Mr. Speaker, as we all are aware, the current conditions of the health-care facilities in the country today are deplorable. There are those of us in the Congress who have realized this need and who have banded together to override the President's recent veto of the Hill-Burton appropriations.

However, the realities of existing policies force upon us the realization that we cannot accomplish all we desire in this vital area. We must, therefore, seek new alternatives, fresh approaches which will inject new life and concern in our health care programs.

The meteoric rise in health-care costs cause us further consternation as we are shown the clear inadequacies of current insurance programs. Economic incentive must be employed in this area to streamline and improve the efficiency of these programs and of the participating medical facilities.

I call the attention of my colleagues to the following article which deals with these problems in a commendable manner. I urge their careful consideration of Mr. Wasyluka's observations and recommendations.

[From the Harvard Business Review, September–October 1970]

NEW BLOOD FOR TIRED HOSPITALS

(By Ray G. Wasyluka)

Foreword.—Soaring costs have precipitated a nationwide health care crisis to the danger point; only the intervention of business leadership, augmented by federal government action, can remedy the situation. Hospitals need real management skills, not just titular management that rubber stamps the recommendations of the medical staff. In arguing this point, the author also prescribes a cure which would offer a choice of two brands of health care to the consumer, so that he could select the one he felt he could afford.

(Mr. Wasyluka is Vice President of a division of W. R. Grace & Co. He initially became involved with hospitals during his work as a CPA, and later became a management consultant for hospitals.)

According to the American Hospital Association: "Rising costs of health care got a lot of press coverage in 1969. But the consumer press that reported $100-a-day stays in hospitals despite the billions of dollars supplied by the Medicare and Medicaid programs also told the public of more basic shortcomings of the health care system in this country.

"As it emerged throughout the year, the basic problem became the fact that the United States has not a system but rather multisystems of health care . . . each beset with inefficiencies that would be intolerable in any other industry." [1]

The business community has meekly avoided any involvement in this health care crisis. It has obsequiously respected the nonprofit tradition of hospital operations—except in the case of about six small publicly held companies that have become known as "hospital chains."

If the business community continues its "head-in-the-sand" attitude toward hospitals, massive intervention by the federal government is sure to eventuate. And federal bureaucracy is not the kind of medicine needed to alleviate this crisis. Instead, the managerial skills of business organizations might be a more efficacious therapy.

After first exploring the causes of our present health care crisis, I shall concentrate on what steps can be taken by business and government to remedy the situation. Then I shall conclude by offering an "exemplary profile" of what the ideal type of health care system for our country would be like.

CAUSES OF CRISIS

There are no objections to the higher costs of health care from those whose lives have been saved by the many techniques and gadgets that have come into existence in the last two decades. Who is to say whether hospitals can "afford" to offer their cardiac patients the sophisticated equipment one finds today in the intensive care units that generally did not exist 20 years ago?

Today, an average of 16 laboratory tests are performed for each in-patient, whereas just 4 laboratory tests per patient were per-

Footnotes at end of article.

formed then. Some of the hospitals that used unsophisticated X-ray equipment in 1950 today use nuclear medicine and very specialized equipment for their diagnostic scanning.

*Insurance and welfare programs*

The number of people covered by medical insurance increased from 75 million in 1950 to nearly 180 million by 1970. Millions of elderly people who previously could not afford hospital care are now provided with a very respectable quality of care. Hospitals typically derive over half their revenue from Blue Cross and other private insurance plans.

The prevalence of health insurance coverage induces even the most reputable physician to prescribe diagnostic tests and medical treatment somewhat beyond what he would otherwise do if the patient had to bear the full cost of his hospital stay. The medical doctor has a human tendency to allow the insured patient to stay an extra day or two, to ensure a complete recovery. The fee charged by the physician is often inflated as the doctor plays Robin Hood and rationalizes that the higher fee charged to the impersonal insurance carrier simply compensates him for the charitable work he does for nominal fees.

As unpleasant as it seems, there is abundant evidence that the abuses of health insurance by medical doctors are sometimes of a deceitful and disgusting nature. It is not simply a matter of hospital facilities being used for services that could—and should—be performed in the doctor's office for no other purpose than to make the insurance company absorb the expense. Investigations by review boards repeatedly disclose instances of needless surgery. Other studies have shown that tonsillectomies, hysterectomies, and appendectomies have a significantly higher incidence among patients whose insurance is of the fee-for-service type, as compared with prepaid group practice plans in which the doctor's compensation is essentially a fixed salary.

*Dysfunctional compensation:* We cannot avoid a frank recognition of the fact that the doctor's compensation is corollary to the amount of diagnostic work he considers necessary, the amount of therapeutic services he regards as essential, and the complexity of the services he judges to be appropriate. Stated more simply, the bigger the illness, the bigger the fee he charges. Except for the group practice plans, there is no system of financial incentives and disincentives designed to discourage the doctor from loading the patient with unnecessary medical services.

Approximately 90% of the revenues of general hospitals come from Medicare, Blue Cross, and other commercial insurance plans. Except for a small portion of the Blue Cross and commercial insurance plans, reimbursement is made on the basis of the hospital's *cost*. This type of cost reimbursement is an open invitation to inefficiency. It provides the hospital with no incentive to control costs. An administrator knows that he will never be condemned for providing too much nursing care; of course, people may talk about his costs, but he knows that providing too much care has never got an administrator fired.

Ideally, it would be nice to have magnanimous men of great virtue ordained as medical doctors. It would be reassuring to have these men compensated by some scheme which enabled them to prescribe medical treatment without being influenced by the effect their diagnosis would have on their own compensation. In fairness to these men, it would also be desirable to have our medical schools produce a sufficient number of competent doctors so that they would have a workweek like that enjoyed by other professional men. Finally, it would be nice if those admitted to this priesthood were all selected on the basis of their intellectual competence and moral dedication, rather than their social class and financial ability to support themselves through the several years of medical school and internship.

*Pragmatic considerations:* It is stimulating to contemplate what our national health care system *might* be like; however, the pragmatic considerations are much different. It is not realistic to think that the American Hospital Association or the federal government will be able to suddenly achieve a massive reorganization in the ownership and management of all the hospitals throughout the country. They will continue to function in their present disorganized, uncoordinated state. It is doubtful that our medical schools will suddenly increase the number of doctors produced each year, and it is unlikely that the selection criteria will be modified appreciably.

Nevertheless, there is hope for improvements in insurance and welfare programs so as to curtail the current practice of perfunctorily reimbursing hospitals for whatever they chose to spend. Moreover, there is hope that business organizations will recognize the need for the emergency of a subacute medical care industry whereby commercially operated clinics would perform much of the diagnostic work and mini-malcare functions with which hospitals are now burdened.

PROPRIETARY HOSPITALS

Hospitals are classified by ownership into three groups: (1) voluntary or charitable hospitals, (2) proprietary hospitals, and (3) state and local government hospitals. Hospitals are referred to as "general hospitals" or "special hospitals" for the purpose of classifying them according to the range of services they offer patients. General hospitals offer a relatively full range of services whereas special hospitals are exemplified by mental hospitals, children's hospitals, and chronic-illness hospitals. These specialized institutions account for 51.6% of the 10,000 hospitals in the United States.[2]

Proprietary hospitals are typically quite small and provide a very limited range of services. They are usually owned by members of the medical staff. For this reason, aspersions are often cast at the doctor-owners, contending that their profit motive improperly influences their decisions concerning patient care. These doctor-owners are accused of sometimes keeping the patient hospitalized an extra day or two when beds just happen to be available, and also of admitting patients that might not be admitted if the doctor were not sharing in the profits of the hospital.

The critics who make such allegations fail to explain that doctor-owners are affected by the profit motive in exactly the same manner as other doctors are affected by their inclination to increase their compensation. Both the doctor and the doctor-owner benefit financially in proportion to the complexity and the volume of medical services they choose to perform.

Another objection commonly made about proprietary hospitals is the limited range of services they offer. They typically avoid the "loss services" such as obstetrical and emergency rooms. The proprietary hospitals do not obtain unusually expensive equipment for which very limited usage is normally made. Such highly expensive equipment does not permit a fee structure sufficient to recapture costs, and the nonprofit hospitals have to absorb the financial burden.

A final objection made about proprietary hospitals is that they tend to be fastidious about the cases they accept, whereas the nonprofit hospitals tend to accept everyone. The proprietary hospitals tend to accept fewer charity cases. They also prefer to cater to patients who will be hospitalized a relatively short length of time. Hospital fees per patient day tend to be highest during the first few days of hospitalization when the diagnostic tests and surgery are being performed. The hospital earns only the daily room charge plus small pharmacy charges on patients who have been hospitalized for a prolonged period. There is no doubt that the proprietary hospitals pursue the "high margin business."

*Appalling shortage:* In spite of these objections, proprietary hospitals are being constructed at a rate faster than ever. Thus the most obvious justification for their existence is the appalling shortage of hospital facilities that currently exists in this country.

This raises a very pertinent question: Is it reasonable for entrepreneurial investment to be diverted from the hospital community when emergency cases frequently have to wait several hours in out-patient departments before a doctor examines them, when very sick people are often denied admission to large metropolitan hospitals, and when residents of a ghetto have to be transported for miles before reaching a hospital?

The voluntary hospitals and government hospitals say that they are doing their best to alleviate the crisis, but this is no consolation to the afflicted who demand competent treatment today. Richard L. Johnson has protested that government regulatory agencies should compel proprietary hospitals to assume their fair share of the loss services which they have avoided thus far. His study of proprietary hospitals produced these findings:

Proprietary hospitals have 14% fewer employees per patient than do voluntary hospitals and 7% fewer employees than do government hospitals.

Payroll is 61.5% of total expense in the voluntary hospital and 65% in government hospitals, but only 50.9% in proprietary hospitals.

The quality of care as measured by the Joint Commission on Accreditation of Hospitals is slightly better in proprietary hospitals of 200 beds or more than it is in voluntary nonprofit hospitals, and both these groups provide considerably better care than is given in state and local government hospitals.

Proprietary hospitals have no hesitation about investing in expensive patient services (i.e., operating rooms) when the volume of usage is high.

Proprietary hospitals tend to avoid offering patient services requiring large investments and high operating costs when the volume of usage is low (i.e., premature nursery).

As proprietary hospitals increase in size, they increase in efficiency, since they do not add to the scope of services provided. By comparison, the voluntary nonprofit hospital typically adds to the comprehensiveness of its service, which leads to an increased cost per "patient day."[3]

Profit motive stigma: The business organizations that own the "hospital chains" maintain a consistent policy of providing fees lower than those charged by other hospitals in the community. Centralized purchasing, accounting, bookkeeping, and staff functions accomplish the cost savings that permit these organizations to charge lower fees and still make a profit. A substantial portion of proprietary hospitals are fully accredited in every respect, and they are judged by review boards to have medical services just as competent as those offered by the nonprofit hospitals.

Of course, there is a substantial number of proprietary hospitals owned by unscrupulous members of the medical staff or "get-rich quick" entrepreneurs. Virtually every medical doctor has heard of the individual who establishes an unaccredited proprietary hospital, staffs it with unaccredited doctors, selects only "profitable business," and provides poor patient care because of his in-

Footnotes at end of article.

satiable appetite for profit. Some individuals like this have committed the same rape behind the facade of a voluntary hospital, by hiring relatives and providing them with grossly inflated salaries.

It is outrageous to imply that maximization of revenues is something peculiar to proprietary hospitals. The voluntary hospitals might be just as culpable of maximizing revenues, even though they have no patent profit motive; instead, their motive is *loss avoidance*. They buy the equipment and perform the services that the doctors demand, and the doctors endeavor to adorn their hospitals with the most sophisticated gradgetry in order to enhance their own professional status. Since virtually everyone is insured these days, the doctor feels that the patient will not suffer any financial detriment from an inflated hospital bill.

Although the stigma of "profit motive" is ascribed to proprietary hospitals, the profit motive of physicians with nonprofit hospitals probably constitutes the greater evil. This is the microcosm that explains today's soaring costs of health care.

BUSINESS COOPERATION

The existing system has failed! The reasons for failure appear to be many. Regardless of how many factors are responsible for the breakdown in our nation's health care system, it is apparent that either one of two suggested remedies must be taken:

1. The federal government will have to adopt a national health insurance system which will enable everyone to afford the soaring costs of hospital care. In order to arrest these skyrocketing costs, this program might impose restraints on the amount of reimbursement paid to hospitals, or it might provide incentives to induce hospitals to control their costs.

2. The entrepreneurial dollar and the management skills of established business organizations will have to be contributed to the health care community.

The use of federal government bureaucracy might very well enable all people to afford the increasingly higher fees charged by hospitals. However, it certainly will not be able to—

Provide the existing caliber of health care at lower prices;

Supply the management skills hospitals so sorely need;

Offer the cost efficiencies of centralized services;

Disenthrone the doctor from the current powerful position that enables him to mold and refashion the services the hospital will provide and the resultant prices the hospital will have to charge for such services.

If our national health system is to escape the fat layers of administrative expense and the inevitable abuses that accompany greater federal control, business organizations must provide these three "wonder drugs": (1) real management, (2) a meaningful system of incentives and disincentives, and (3) the opportunity for each consumer to choose the basic medical services he feels he can afford.

*Managerial skills*

Except for the larger metropolitan hospitals, hospitals historically have been managed by a board of trustees composed of prominent civic leaders who generously contribute one hour or so of their time per month to oversee an operation they do not understand. They contribute kindness, rather than management. The important decisions they are compelled to make are necessarily compliant with the recommendations of the medical staff.

It is difficult to generalize about the quality of management found today in hospitals. Most hospitals now have an administrator who has been prepared for his responsibilities with several years of professional training in a university. Twenty years ago, it was common for the head nurse or head bookkeeper to function as the hospital administrator.

However, at most hospitals the practice of management has undergone little improvement over the years. This is particularly true of the small hospitals in rural areas where management is epitomized by the practice of finding out what the influential doctors want and satisfying their requests. If his request is not satisfied, the doctor may threaten to accept an opportunity to join a larger and more modern hospital in a metropolitan area.

Generally speaking, the doctor is trained to practice medicine. The administrator is trained to operate the hospital, supervise the personnel, and maintain proper relations with the community. Neither of them is trained to formulate organizational strategy, assess risks, develop multi-million dollar financial projects, and methodically transform plans into desired results. Business executives with hospital savvy constitute the only means of driving a wedge through the intimate relationship between the medical doctor and the hospital administrator. The management resources of ordinary business organizations should be injected into the power structure of some hospitals so that at least some hospitals will be able to provide the service that the businessman perceives as being desired by the consumer.

The stereotype of the U.S. businessman suggests a hard-driving executive striving to maximize profits and coldly eliminating all persons and product lines that do not meet his established corporate goals. This caricature has been drawn particularly by those who oppose corporate entry into proprietary hospitals.

Yet every time a patient swallows a pill or receives an injection, he is betting his life on a capitalistic organization having produced a product of acceptable quality. So let us dismiss any contention that business management is synonymous with a reduced caliber of patient care. Some proprietary hospitals have some incompetent and unscrupulous personnel, but there is overwhelming evidence that exactly the same conditions are found at some nonprofit hospitals.

If management in hospitals is to become something other than a titular activity, a power structure must be established whereby management personnel with hospital savvy will be given the responsibility of resolving: (a) the patient services to be provided by the hospital, (b) the price that the patients will be charged for those services, and (c) the administration of activities that will bring actual results into conformity with those desired objectives. If it wishes to stop socialized medicine from becoming an accomplished fact in this country, the medical profession must abdicate from the monopoly which it currently exercises in the areas of hospital utilization and hospital medical care.

*Incentives and disincentives*

No government-regulated monopoly is fortified with the privileges of (a) receiving guaranteed reimbursement of soaring costs and (b) denying services to consumers when no facilities are available. Yet this unrealistic scheme has been allowed to develop in the health care community, and it will be nourished to obesity if it is fed with even more government bureaucracy.

The last thing our country needs is a federally controlled system which would induce (or virtually coerce) a semblance of standard fees for all hospitals. For one thing, those hospitals that lacked the skills necessary to achieve low-cost efficiency would be dangerously tempted to sacrifice their quality of patient care. For another, such a system would impose a "one brand" range of health services on all the people.

One of the weaknesses of the existing health care system is that the doctors directly or indirectly choose the brand of health care they consider appropriate, and the people are expected to dutifully absorb the rising costs. If it is improper for doctors to have the exclusive discretion of resolving the brand of health care that will be provided to our people, nothing would be gained by endowing the federal government with such exclusive discretion.

What we need at this time is a health care system that offers the consumer a choice between two or more brands of health care. Instead of allowing the American Medical Association to resolve this matter through debate with Congress, a more equitable solution would be one that permits the consumer to choose between the Cadillac brand of patient care (and Cadillac prices) and the Rambler brand of patient care (and Rambler prices). There currently is no inducement for any hospital to offer this choice of brands. After all, a hospital that would espouse lower fees would risk losing some of its medical staff.

*Consumer choice*

The most immediate benefit of hospital investment by business organizations would be that more health care facilities would swiftly become available to deal with the critical shortage that exists today. Bills are passed in Congress, state programs are enacted, and fund raising programs are carried on by voluntary hospitals. These are well and good, but all have simply failed to provide sufficient financing for the hospital facilities that are desperately needed right now.

A massive investment in hospitals by business organizations would put the cost of basic hospital services within the reach of the average man. For example, 30 years ago an entrepreneur introduced the drive-in movie. A lower cost was offered to those patrons who were willing to sacrifice a scintillating marquee, an ornate interior, thick rugs, and cushioned seats. Yet those drive-in patrons were provided with the very same caliber of motion picture as that available at the expensive downtown theater.

Business organizations can offer a similar trade-off today to the consumers of health care. It can provide them with the opportunity to buy, say, a thoroughly competent appendectomy or tonsillectomy without having to subsidize the obstetrics (OB) department or to absorb part of the cost of some other person's open heart surgery.

Hospitals throughout this country respect a peculiar tradition of operating some facilities, such as the OB department and the emergency room, at a staggering loss year after year. Other departments, such as radiology and pharmacy, always produce an immense profit. Certain types of highly specialized surgery that are usually limited to prominent medical centers involve such extraordinary costs that there is absolutely no chance of charging fees that would recover them. Generally accepted financial policies of these nonprofit hospitals prescribe that enough revenues must be collected from the "routine business" to cover the costs of the routine services, *plus* the operating deficits of the OB department, the emergency room, and the extraordinary surgery work.

The proliferation of proprietary hospitals managed by reputable business organizations would make the basic services available at considerably lower cost. Those who desired these basic services with more human warmth and higher prices would continue to find both available at the nonprofit hospitals. The proprietary hospitals presumably would not take over any part of the extraordinary services that involved spectacular costs. The responsibility for these would remain with the nonprofit hospitals, but the absorption of their costs would not be indiscriminately levied on the people who desired fundamental medical services. It would seem more equitable that those extraordinary costs would be absorbed at least to

some extent by the taxpayers who were fortunate enough to avoid hospitalization.

Conceivably, some people might feel that it would be terribly callous to provide price competition on basic services to the nonprofit hospitals, which might deter them from offering the extraordinary medical services that involve spectacular cost. However, pressure of this type is exactly what is needed. Such pressure would make it more difficult for four hospitals at a single intersection in California to be equipped with costly cobalt machines for the greater prestige of their staffs. Such pressure would also make it more onerous for so many nonprofit hospitals to provide their staffs with the status symbol facilites for open heart surgery.

According to the President's Commission on Heart Disease, Cancer, and Stroke, 30% of the 777 hospitals equipped to do closed heart surgery had no such cases in the year under study.[4] Of those hospitals that had cases, 87% did fewer than one operation per week. Of all hospitals equipped to do open heart surgery, 77% did not average even one operation per week, and 41% averaged under one operation per month. Little of this was of an emergency nature, and the mortality rate for both procedures was far higher than in institutions with a full workload.

GOVERNMENT ACTION

The health care crisis is so immense that massive intervention by business organizations certainly will not obviate any appropriations that might be made available by federal and state governments. Legislation and government funds are needed to effect improvements in three areas: (1) the shortage of doctors, (2) construction of new hospitals, and (3) modification of the terms of welfare programs and insurance plans.

*Additional doctors*

Although some unscrupulous physicians resort to deceitful practices in order to inflate their compensation, the more typical medical doctor is currently putting in a 16-hour day. Many of these doctors devote one day a week to welfare cases for which no fees whatsoever are charged. Many interns are lucky to get 5 hours sleep a night, and they are paid a ridiculous subsistence wage.

The shortage of doctors in this country is so great that approximately 20% of our new doctors each year are imported from other countries that provide distinctly inferior medical training. The benefits anticipated from national health insurance have little chance of fruition until such time that additional medical personnel are made available to provide the free services that are difficult to obtain today at staggering prices.

*Hospital construction*

The federal programs aimed at making funds available for new hospital construction have proceeded at a glacial pace thus far. Huge government grants have enabled some impressive hospitals to be constructed which remain only half occupied years later. It is not simply a matter of providing vast sums of money; state planning commissions are desperately needed. These commissions must be given the authority to approve or disapprove the construction of new hospitals. Beautiful hospitals, symbolizing an eternal monument to some millionaire's philanthropy, continue to be erected in spacious landscapes of suburbia; but the denizens of Harlem and Watts continue to be provided with hospital facilities the caliber of which amounts to health brutality.

An example of the type of investment program needed from the federal government is the ill-fated 13-billion Johnson proposal for a coordinated national attack on heart disease, cancer, and stroke. The program, to be headed by a Presidential committee under the direction of Dr. Michael E. DeBakey of Baylor University, called for the establishment of a five-year program that would create two networks of special facilities to attack the three great killers. There were to be 60 regional centers for clinical investigation, teaching, and patient care; and those were to be ringed by 500 special diagnostic and treatment stations.

The operational efficiency of such a system is transparently evident to every member of the health care community. Despite this, and despite its magnanimous character, the provision was opposed so vehemently by the American Medical Association that it had to be withdrawn from the Medicare Act.

*Financial modifications*

Some people who oppose national health insurance choose to support their physician with nothing more than a reference to what they consider to be our abysmal experience with Medicare. No one can deny that Medicare's costs have greatly exceeded expectations. The auditing and administrative expense of complying with the paperwork requirements of Medicare have been staggering. Finally, the most significant objection is the absence of some incentive to control costs.

If corporate management were to enter the hospital scene and provide good basic services at lower prices, the private insurance companies should certainly respond by making lower premiums available to those who choose to patronize the hospitals with lower prices. The terms of Medicare should also be modified to either (a) offer some incentive for the patient to avoid the inflated costs of some hospitals, or (b) provide some incentive to the hospital to control costs.

It would be flagrantly imprudent to provide a direct incentive to the patient (a payment to the patient) for patronizing a hospital that offered lower prices, but it would be quite possible to impose a financial disincentive on the patient for patronizing a hospital that charged unusually high prices. The terms of Medicare might be modified in order to cover charges up to certain limits, say, somewhat above the median amounts.

(Earlier in this article, I expressed the opinion that the last thing we need is a national health insurance program which provides for a uniform set of prices for hospital services. In spite of this, it would be viable to have a set of maximum prices for services covered by Medicare. In the first case, we are concerned with just one price for the entire clientele of the hospital. In the second case, we are concerned with just a maximum on prices that applies to a small portion of the hospital's clientele. Although the spirit of Medicare is such that its insured senior citizens are not to be treated like indigents, we should not forget that this is essentially a welfare program with which carpeted hospital rooms and color television sets are rather incompatible.)

One of the simplest means by which the cost of hospital care can be reduced is to amend the terms of Medicare so as to extend coverage to diagnostic services performed outside the hospital. It is estimated that one eighth of patients hospitalized today are hospitalized only to obtain indemnification from Medicare, Blue Cross, or some commercial insurance policy. Commercial laboratories could be utilized for much of the X-rays and laboratory analysis without wasting the use of a hospital bed.

*Cost controls:* Medicare and most Blue Cross plans provide for payments to hospitals on the basis of the hospital's cost. The absence of upper limits on these costs stands out conspicuously as one area in which improvement is needed. Three methods of controlling cost appear viable:

1. Control might be achieved by simply imposing upper limits on reimbursable costs and by further prescribing that hospitals would not make any supplemental charges to Medicare patients. This would differ from the current system only in its refusal to pay outlandish costs that would presumably be incurred either by luxury hospitals or by the most mismanaged hospitals.

2. Bonuses might be paid to those hospitals with lower cost levels. Thus, perhaps, no bonus would be paid to hospitals that ranked in the highest quartile of cost, a nominal bonus might be paid to those in the second and third quartiles, and a more significant bonus (as a percentage of cost) might be paid to those hospitals that achieved costs in the lowest quartile.

3. Bonuses might be paid to those hospitals that effected reductions in their costs.

The desirable feature of both the second and the third method is that some incentive would be given to the hospital to control cost. Hospitals would thus be able to finance the acquisition of additional equipment and expanded facilities by achieving lower costs, rather than by performing needless "high margin" services on patients. It would be somewhat inequitable to provide a profit or investment funds to those hospitals that might be accused of offering the lowest quality of patient care. On the other hand, the third method could be criticized for providing a profit or investment funds to those hospitals that had previously been the most wasteful in spending money.

THE EXEMPLARY PROFILE

Instead of attempting merely to patch up the weaknesses in the existing health care system, perhaps it would be more meaningful to consider what the ideal system would be like. There is no doubt that if we were starting from scratch, we would construct networks of hospitals in "cluster systems."

The nucleus of each cluster would be a medical center and medical school. It would be supported by a group of regional specialized hospitals, each of which would have a group of satellite diagnostic clinics. The diagnostic clinic would be equivalent to the neighborhood hospital. It would provide emergency room facilities, out-patient services, an OB unit, and a range of other unsophisticated services.

The patients requiring specialized services, such as ophthalmology or chest surgery, would be transferred to the regional hospital. The patients requiring truly expert services, like open heart surgery, would be taken to the medical center. There they would be treated by the prestigious faculty members, and they likewise would have the benefit of the most advanced equipment.

In terms of business operations, all activities would be centralized at the medical center. A time-sharing computer would handle the purchasing, billing, payroll, insurance records, medical records, and other financial records for the entire network of hospitals. The business office would provide specialized staff functions and training programs to all of the member facilities.

*Two brands of service*

An industrial engineer or business executive might be quite impressed with the factory-like efficiency with which the large metropolitan hospitals operate. Hospitals of this type constitute an infinitesimal portion of the 10,000 hospitals located throughout the United States. An entirely different impression would be drawn by observing the operations of many of the small charitable voluntary hospitals.

Many of these hospitals operate as though patient care were the expression of a virtue, and concepts of efficiency and cost control are viewed with disgust. The kindness extended to the patients effusively extends to the manner in which hospital management caters to the interests of the medical staff and the employees. These people are characteristically the fine caliber of human being. They are alutruistic, dedicated, and diligent. The only transgression of which they are

Footnotes at end of article.

culpable is a monolithic conviction to help the patient recover. Their simplistic financial strategy is to spend all the money that is available.

It is wonderful to have institutions that display an intense concern for afflicted human beings. However, if all hospitals shared the same strategy of providing the very best in loving care without concern for cost, the people of our nation would be provided with just *one* brand of health care. Medical doctors and hospital administrators are currently empowered with exclusive jurisdiction for the determination of the degree of loving care to be provided to their patients and the resultant cost thereof.

However, it seems more reasonable that our people should be able to exert a choice of *two* brands of service—that is, whether they want: (1) plenty of loving care at skyrocketing costs, or (2) an efficient though somewhat impersonal caliber of patient care at considerably lower cost.

At least some of the hospitals in our ideal system must be provided with an incentive to offer reasonable patient care at reasonably lower cost.

At least some of the hospitals in our ideal system must be provided with an incentive to offer reasonable patient care at reasonable prices. This does not mean that constrictive bureaucracy should be used to coerce all hospitals to meet certain cost standards. Instead, incentives should be established that would cause at least some hospitals to become concerned with a brand of patient care for those who are willing to do without tender loving care in order to receive medical treatment at more reasonable cost.

As noted earlier, the manufacturers of Cadillacs and Ramblers offer automobiles of different caliber to the people of this country. They serve different segments of the market that have divergent views as to their needs and wants. And our free enterprise system allows the consumer to resolve the question of what caliber of automobile is appropriate for him. It seems that the consumer should be allowed a similar choice in selecting a caliber of health care.

CONCLUSION

The shortage of health care facilities is partially attributable to the expanding population and the dynamic medical technology. However, the most significant causative factor is the emergence of a system which has transferred the sting of paying the bill from the patient to some faceless entities. The willingness of Blue Cross, private insurance companies, and the federal government to reimburse hospitals for their true costs, regardless of how high those costs might be, has had a notoriously propulsive effect on the cost of hospitalization.

It is one thing to theorize what the ideal health care system would be like if we were starting from scratch to build hospitals, buy equipment, and train our medical doctors; however, we are confronted with the realistic task of making today's system better. We must deal with the vanity and emotions of all the people who are now medical doctors or members of boards of trustees. We must address ourselves to the network of hospitals that exists today, not to the physical structures that should have been built to accommodate current needs.

Intervention by business organizations into the health care community will probably be the one thing that can avert a take-over of hospitals by the federal government. The financial resources of business organizations can provide the sorely needed construction of additional health care facilities. These "junior hospitals" can take over the diagnostic and subacute services, so that our large hospitals can confine their activities to the advanced illnesses that require the use of sophisticated equipment.

The management resources of business organizations will abolish the current autocracy by which medical doctors formulate strategy, prescribe operational policy, and deliver to the public the single brand of medical care which they have unilaterally chosen for the people of our country. Business executives will be responsive to today's consumer demand for a "Rambler" brand of health care that accomplishes the task without luxury and without absurd costs.

The efficiency experts of the business organization will also make a badly needed contribution to an industry that for the most part has failed to utilize the developments in computer technology. Hospital payroll expense has soared, at least in part, because the thousands of small hospitals we have in this country cannot afford the services of an industrial engineer or a computer systems expert.

On the other hand, the handful of corporations that have acquired hospital chains have achieved impressive reductions in payroll expense through the application of industrial engineering concepts and computerized operational control. The application of these engineering concepts and the repeated use of the same standardized architectural plans have enabled the hospital chain corporations to achieve enormous economies in the construction of hospitals.

The opportunities available to business organizations extend beyond the ownership of proprietary hospitals. Some of the hospital-chain companies are already running voluntary hospitals on a management fee basis. The opportunity for greatest profit (with no capital investment requirement) is the management consulting services and the training programs that could be offered to voluntary and government hospitals by business organizations which have cultivated expertise in hospital managment. The most important opportunity available to business organizations is the opportunity to perform a service for our country that is critically needed right now.

"The engine which drives Enterprise is not Thrift, but Profit." John Maynard Keynes, 1883–1946, "A Treatise on Money."

## INTRODUCTION OF JOINT RESOLUTION TO PROCLAIM A PERIOD TO BE KNOWN AS THE "NATIONAL MULTIPLE SCLEROSIS SOCIETY ANNUAL HOPE CHEST APPEAL WEEKS"

### HON. JEROME R. WALDIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. WALDIE. Mr. Speaker, today on behalf of myself and Congressmen ANDERSON of California, BELL, BROWN of California, BURTON, EDWARDS of California, HANNA, JOHNSON, LEGGETT, MCCLOSKEY, MOSS, PETTIS, REES, ROYBAL, SISK, TUNNEY, VAN DEERLIN, WIGGINS, and CHARLES H. WILSON, I am introducing a House joint resolution which would authorize the President to proclaim the period of Mother's Day, May 9, 1971, through Father's Day, June 21, 1971, as the "National Multiple Sclerosis Society Annual Hope Chest Appeal Weeks."

Mr. Speaker, this dread disease strikes its victims when they are between the age of 20 and 40 years, a time when one's hope and aspirations are in the process of accomplishment. It is a cruel time for this particularly cruel disease to cripple a young man or woman.

Multiple sclerosis is a disease which so far has mystified researchers and physicians. It occurs when the covering matter of our nerve sheaths, called myelin, is destroyed, thus "short-circuiting" messages from the brain to various parts of the body. The results of this disease are speech defects, tremors, paralysis, vision impairment, staggering, and falling.

Mr. Speaker, no two patients have the same symptoms and thus it makes diagnosis almost impossible. Once a person contracts the disease, he has it for the rest of his life.

However, there is some hope. The National Multiple Sclerosis Society is concerned with the discovery of the cause, prevention, and cure of multiple sclerosis. Research is the only hope that multiple sclerosis victims have for the future. The National Multiple Sclerosis Society also provides for the present by giving patients the opportunity for recreation and transportation as well as other vital services.

Mr. Speaker, this resolution would designate the period of Mother's Day through Father's Day of 1971, the 25th Anniversary of the Multiple Sclerosis Society, as the "National Multiple Sclerosis Society Annual Hope Chest Appeal Weeks." The resolution additionally calls on the Governors of the 50 States to issue similar resolutions calling on the people of the Nation to join in the effort to find the cause and cure of this disease which has crippled some 500,000 persons.

The joint resolution follows:

JOINT RESOLUTION

(To authorize the President to proclaim the period from May 9, 1971, Mother's Day, through June 21, 1971, Father's Day, as the "National Multiple Sclerosis Society Annual Hope Chest Appeal Weeks.")

Whereas five hundred thousand Americans, stricken usually between the ages of twenty and forty years, are affected by the ravages of multiple sclerosis and related neurological diseases; and

Whereas two million members of American families are deeply concerned with the financial and emotional problems of this disease; and

Whereas multiple sclerosis predominantly strikes young fathers and mothers in their wage-earning and family-building years and reduces the buying power of such families; and

Whereas such reduction results in a $2,000,000,000 annual economic loss to the Nation and forces the removal of two out of every three disabled multiple sclerosis victims from the Nation's work force; and

Whereas multiple sclerosis remains a disease of unknown cause, unpredictable course, and undiscovered cure; and

Whereas the National Multiple Sclerosis Society, which is celebrating its twenty-fifth

anniversary in 1971, has launched a five-year research development plan to explore as quickly as possible promising clues that may lead to methods which will prevent or more effectively treat, multiple sclerosis: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation—

(1) designating the period from May 9, 1971, Mother's Day, through June 20, 1971, Father's Day, as "National Multiple Sclerosis Society Annual Hope Chest Appeal Weeks";

(2) inviting the Governors of the several States to issue proclamation for like purposes; and

(3) urging the people of the United States and educational, philanthropic, scientific, medical, and health care professions and organizations to provide the assistance and resources necessary to discover the cause and cure of multiple sclerosis and to alleviate the suffering of persons stricken by this disease.

## NIXON COMPILING GOOD RECORD

### HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. BOB WILSON. Mr. Speaker, in "Nixon Compiling Good Record" the San Diego Union lists the accomplishments of the Nixon administration from the international to the domestic front. The amazing thing, notes the Union, is that "all of this has occurred in a period of less than 2 years and in the face of a Congress that contains a majority of the opposite political faith!"

I agree with the Union that the Nixon administration achievements are remarkable and, therefore submit the editorial at this point in the RECORD.

[From the San Diego Union, Sept. 10, 1970]

DEEDS MATCH WORDS: NIXON COMPILING GOOD RECORD

When President Nixon was inaugurated on Jan. 29, 1969, during a period of great domestic crisis, he said that the United States of America was suffering from "inflated rhetoric."

"We cannot learn from one another until we stop shouting at one another, so our words can be heard as well as our voices," he said in his inaugural speech.

He asked also that the Administration be judged on the basis of its deeds as well as its words.

Today the President's words and deeds are being subjected to the scrutiny of public opinion as Labor Day disappears astern and we turn seriously to the fall elections that will determine the makeup of Congress.

President Nixon was in a difficult position in January of 1969. He had inherited a war that had gone politically sour—a conflict that had been a problem for the United States for five years. Inflation was a five-alarm fire. Historic allies were restive, world tensions were high, and domestic problems crowded the capital.

Today, 20 months later, the rhetoric is unfortunately still high on occasion, cloaking to some degree the really remarkable achievements of the Administration.

A presidential trip to Europe, the first order of international business in 1969, mended traditional fences. The North Atlantic Treaty Organization remains strong, and progress has been made toward the dissolution of European tensions.

The Nixon Doctrine, aimed primarily at Asia, clarified the commitment of the United States to self determination and regained some of our eroding credibility.

Progress of the Administration's Latin American policy was dramatized just a few days ago when President Gustavo Diaz Ordaz and President Nixon shared a state dinner in Coronado.

It was an American initiative that launched peace discussions in the Middle East. The United States is talking with the Soviet Union about a reduction of strategic arms. A dialogue has been reestablished with Communist China. The Administration has religiously kept every promise it had made regarding the assignment of our troops to Vietnam. By spring 265,000 fewer American soldiers will be stationed in that unfortunate land, with casualties and capital outlay correspondingly reduced from the 1968 peak.

At home the President is delicately guiding the many faceted transition from a wartime to a peacetime economy during a period of intense inflation. He has moved ahead with methodical precision to guarantee equal opportunities for all Americans. A postal corporation is a reality. The draft has been reformed, an anti-ballistic missile system inaugurated and the federal budget has been trimmed.

All of this has occurred in a period of less than two years and in the face of a Congress that contains a majority of the opposite political faith!

As the subject of the political composition of Congress keeps recurring during this election campaign, Americans might ponder how much more might have been accomplished had the President's actions been complemented by a more sympathetic legislative branch of government.

## MISS NATIONAL FIRE PREVENTION 1970 BEGINS NATIONAL TOUR FROM MEMPHIS

### HON. DAN KUYKENDALL

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. KUYKENDALL. Mr. Speaker, Miss National Fire Prevention 1970 left Memphis Monday, September 21, for San Francisco, Calif. During the next 12 months, Miss Rhonda James of Florence, Ala., will represent the fire service of the United States and spread the fire prevention story.

It is only fitting that Miss James should leave from Memphis and that the annual national contest should have originated in Memphis. Memphis has the lowest fire insurance rates it is possible to obtain—a tribute to the fire department of Memphis, headed by Chief Edward A. Hamilton. The department also has a class I rating, an honor shared by less than 10 other departments across the United States.

Fire Prevention Week, as proclaimed by the President of the United States, is proclaimed in October during the week in which the 7th falls, commemorating the big Chicago fire of 1871. It is the hope that during this week, the public can be made more conscious of the extreme dangers of fire in millions of dollars in property damage that result each year from carelessness and the tragic loss of life from fire that strike without warning in the middle of the night or even in the daytime, trapping the elderly, the sick, and the young.

It will be the duty of Miss James, as the Miss National Fire Prevention, to make the citizens of the Nation aware of their individual responsibilities in the prevention of deadly fires, to make them fire prevention conscious, both on the domestic and business level.

Tennessee Ninth District Congressman DAN KUYKENDALL, whose district includes Memphis, was at the airport to see Rhonda off on her tour. Aside from the pleasure of being in the company of a lovely young lady, there is a serious factor in what Miss National Fire Prevention represents.

Fire knows no political lines or geographical boundaries. It can become a common enemy and can only be controlled through the efforts each individual asserts and its growing awareness. In this respect, Miss James is to meet Governor Reagan while in California. One has only to view once the charred stumps of one's proud forest land ravaged by fire, as occurs in California almost annually, to understand why Mr. Reagan would be glad to greet Miss James and support what she represents.

Fire prevention is only one more area where the public needs to become involved, and Memphis, Tenn., through the Memphis Fire Department, with its Miss National Fire Prevention Pageant, is doing its small share in trying to bring about that awareness and involvement.

## WYOMING'S ONE-SHOT ANTELOPE HUNT AND THE "GREAT DANE," LAURITZ MELCHIOR

### HON. JOHN WOLD

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. WOLD. Mr. Speaker, for many years, one of the highlights of the one-shot antelope hunt, an annual sporting feature of Lander, Wyo., has been the participation of the "Great Dane," Lauritz Melchior.

The Heldentenor who is as competent with a big-game rifle, as with an opera score, is well known and highly regarded in the town of Lander and among outpublication of the American Association door-sport enthusiasts.

The August–September edition of the of Retired Persons contains an interesting article on the "Great Dane," including reference to the fact that "the big-game hunter recently was on the winning team during the annual one-shot antelope hunt in Wyoming."

Mr. Speaker, I include the AARP article on Lauritz Melchior in the RECORD with my remarks:

A BUSY OCTOGENARIAN

"The Great Dane," Lauritz Melchior is sentimental over anniversaries and special occasions. He recently was honored on his 80th birthday.

The Heldentenor was feted at gala dinners in both New York and Los Angeles by the Danish Royal Guards Societies. Melchior, who served with the Guards (the personal guards to the King of Denmark) as a young

man, is president of all overseas chapters of ex-Guardsmen.

The West Coast party, attended by 300, benefited the Melchior Heldentenor Foundation, which financially assists young, potential heroic tenors.

Melchior, who sang for 24 seasons at New York's Metropolitan Opera, holds the Danish court title of "Kammersanger" (singer to the Royal Court).

An album of his Wagner recordings will be re-issued soon, and his autobiography, "A Matter of Love: The Melchior Story," soon will be on sale.

The big-game hunter recently was on the winning team during the annual "One-Shot Antelope Hunt" in Wyoming. He also found time to attend the opening of the new Juilliard School of Music in New York City, and appeared at a state dinner at the White House honoring Denmark's Prime Minister.

Melchior keeps busy hunting in Denmark, touring Germany by car and entertaining friends in his Beverly Hills home.

## RESOLUTION ADOPTED BY THE CITY COUNCIL OF PHILADELPHIA DECLARING A BOYCOTT OF THE ARAB STATES

### HON. JAMES A. BYRNE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. BYRNE of Pennsylvania. Mr. Speaker, the Honorable Paul D'Ortona, president of the City Council of Philadelphia, has brought to my attention Resolution No. 298, which was adopted by the council on September 10. I am in hearty agreement with the sentiment expressed in the following resolution and feel it is of vital importance to call this important document to the attention of my colleagues:

RESOLUTION

Memorializing the President and the Congress of the United States to declare a boycott of the Arab states and to refuse landing rights to Arab planes and those airlines serving Arab countries, in an effort to halt the crime of aerial hijacking.

Whereas, The recent and most barbaric wave of aerial hijackings has focused world concern upon the Arab states who harbor terrorists who prey upon international air travelers; and

Whereas, At the present time more than two hundred innocent people are being held captive in the Jordanian desert by Palestinian air pirates; and

Whereas, These actions emphasize the immediate need for cessation of all American commercial flights to any Arab countries which allow plane hijackers to operate from their territory; and

Whereas, It is long past time for the airlines and governments of the world to declare a boycott of the Arab states and to refuse landing rights to Arab planes or those airlines serving Arab countries; therefore

*Resolved, By the Council of the City of Philadelphia,* That we hereby memorialize the President and the Congress of the United States to take all possible steps to effect a boycott of the Arab states and to refuse landing rights to Arab planes and those airlines serving Arab countries, in an effort to halt the crime of aerial hijacking.

*Resolved,* That certified copies of this Resolution be forwarded to the President of the United States, the Senators from the Commonwealth of Pennsylvania and the members of Congress from Philadelphia.

## STATES GIVEN MAJOR ROLE IN OCCUPATIONAL SAFETY BILL

### HON. DOMINICK V. DANIELS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. DANIELS of New Jersey. Mr. Speaker, the role of State governments under a Federal occupational safety and health law was discussed at great length during 15 days of public hearings by the Select Subcommittee on Labor in the first session of the 91st Congress. It is a subject of much concern to both State administrators and to all those interested in a viable and effective job safety bill.

Based on the excellent testimony of State safety experts, particularly Mr. Martin Catherwood of New York and Mr. Charles Hagberg of Wisconsin, the subcommittee incorporated section 17, "State Jurisdiction and State Plans" into H.R. 16785, the occupational safety and health bill reported by the full Education and Labor Committee on July 9. There was substantial agreement in the full committee over this provision.

Under section 17, whenever a State wishes to assume responsibility for developing and enforcing standards in an area where the Secretary of Labor has already issued a standard, the State may submit a plan to him. It must contain assurances that the State will develop and enforce standards at least as effective as that developed by the Secretary, that the State will have the legal authority, the personnel and the funds necessary to do the job.

As an encouragement for State action, the bill provides also for Federal financial support to assist States in assuming their own program for worker safety. Planning grants with up to 90 percent Federal participation, and program grants with up to 50 percent Federal participation are provided.

I want to call to the attention of my distinguished colleagues a letter I recently received from the Governor of the State of New York, the Honorable Nelson Rockefeller, voicing his interest in the role of State governments in Federal occupational safety and health legislation.

Governor Rockefeller believes that States which have or are willing to develop and maintain adequate safety programs as determined by the Secretary of Labor should have this opportunity. He also feels Federal aid will play a major role in encouraging more States to develop adequate occupational health and safety programs. Governor Rockefeller further declares:

> Where States fail to provide and enforce adequate health and safety standards, however, I see no appropriate alternative to Federal standards and enforcement.

The majority of the Education and Labor Committee joined with me in sponsoring H.R. 16785. We are convinced that section 17 is the best vehicle for giving the 50 States the opportunity to assert their authority and carry out their responsibilities for the safety of workers in their respective jurisdictions. States have the additional latitude to choose to assert their authority over only one industry or several industrial operations within their boundaries, leaving the remainder of uncovered industries or hazards subject to Federal jurisdiction.

Section 17 clearly delineates Federal-State relationships, allowing the States maximum flexibility in determining their respective roles in a national job safety program, while simultaneously placing the final responsibility with the Federal Government for insuring that all workers engaged in interstate commerce have safe and healthful working conditions.

I urge my colleagues to support H.R. 16785 when it comes before this body for a vote.

The full text of Governor Rockefeller's letter follows:

ALBANY, N.Y.,
*September 18, 1970.*

HON. DOMINICK V. DANIELS,
*Chairman, Select Subcommittee on Labor, House Education and Labor Committee, Cannon House Office Building, Washington, D.C.*

DEAR MR. DANIELS: Enactment of Federal legislation on occupational health and safety is vital to the well-being of the Nation's work force and I urge your support in assuring that it receives high priority in the Congress.

Although a final bill is not yet available, there need be no disagreement with most of the provisions of the bills which have received serious consideration after extensive public hearings and consideration by labor, management and professional groups.

The State of New York has long held a leadership position in development of an occupational health and safety program and is constantly revising and improving its standards to keep up with changes in methods, materials and toxic agents.

States which have or are willing to develop and maintain adequate safety programs as determined by the Secretary of Labor should have this opportunity, thus avoiding in such states unnecessary duplication of state standards and state inspection by the Federal Government. Fortunately, this objection seems to have been accepted in the various bills under serious consideration. Federal aid, as contemplated in the various bills, can also play a major role in encouraging more states to develop adequate occupational health and safety programs.

Where states fail to provide and enforce adequate health and safety standards, however, I see no appropriate alternative to Federal standards and enforcement.

The areas of agreement contained in the several bills are substantial and I hope that such differences as still exist will not be permitted to delay or prevent the enactment of this legislation to assure occupational health and safety standards for workers throughout the entire country.

Sincerely,

NELSON A. ROCKEFELLER.

## THE TRAGEDY OF DONALD LEE

### HON. LAWRENCE J. HOGAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. HOGAN. Mr. Speaker, time and again I have brought to the attention of my colleagues the problems surrounding the Washington ambulance crisis.

Recently we have had another glaring example that some action must be taken soon. A WWDC editorial spells out the details of this most recent tragedy and offers a remedy.

I commend it to the attention of my colleagues who travel and live in the District of Columbia:

THE TRAGEDY OF DONALD LEE

(NOTE.—Broadcast of this editorial by WWDC Vice President and General Manager William S. Sanders was on September 1, and 2, 1970. We welcome comments.)

The tragic thing is that people continue to die because our Government cannot or will not come to grips with the Washington ambulance crisis.

Sixteen months after our documentary, and our editorials, the situation remains the same. Ambulances still are over-worked. Ambulances still make taxi runs. People still do not grant right of way to ambulances. Our traffic lights still do not go to red when a siren nears.

And so four year old Donald Lee did not live to see five. An ambulance was rushing to what later would turn out to be a needless call. Donald Lee's mother had a green light at Fourth and Bryant. She apparently did not see or hear the approaching ambulance. The light stayed green, and Donald died.

Sixteen months ago we proposed an inexpensive addition to the city's traffic lights, a device which is activated by an approaching siren and which turns all lights in the intersection red.

If the lights at Fourth and Bryant had been red, Donald Lee would be alive today. That is the cost of living for Donald Lee.

Thank you for your interest.

## SOLDIER LOOKS HOMEWARD AND SEEKS CAMPUS PEACE

### HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. SCHMITZ. Mr. Speaker, a letter recently appeared in the Los Angeles Times which I feel will be of interest to all my colleagues. It is from a soldier fighting for his Nation in Vietnam who has a few things to say about the college students who are actively working against our war effort.

College students might also heed the advice given by Demosthenes to his colleagues in his second Phillipic when he admonished them to beware "lest in striving to rid of war, you find yourselves slaves."

The article follows:

SOLDIER LOOKS HOMEWARD AND SEEK CAMPUS PEACE

Many of us in Vietnam have been following the stories about the unrest on the nation's campuses with subdued anger.

It is demoralizing to read about our underprivileged counterparts vandalizing campus buildings, manhandling institution leaders and generally making asses of themselves.

It is painful to the thousands of less pampered "students" here who have taken their lesson from instructors in black pajamas and sandals, where the classrooms are sandbagged, hot, sweaty jungle clearings, where the Saturday night date is a cold beer and a letter from home, and where the grades are not A's, B's, C's but sudden death, crippling wounds or maybe victory.

Well, don't worry, people, because someday this war is going to be over and a half million angry men are going to descend on the 50 states with dreams of homes and families and education and jobs.

And when these men hit the campuses, I sincerely hope that someone tries to stop an ex-soldier or marine from attending classes, or that some sorry, flakey, social reject tries to plant a Viet Cong flag next to the artificial leg of a Sea Bee, or spits in the burned face of an Army medic.

I guarantee that it will only happen once.

Pfc. DENNIS J. BUTLER.

## REDEDICATION TO CONSTITUTION'S PRINCIPLES

### HON. HARRY F. BYRD, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

*Thursday, September 24, 1970*

Mr. BYRD of Virginia. Mr. President, the September 13, 1970, editions of the Knight newspapers carried a column by John S. Knight entitled, "U.S. Must Rededicate Itself to Constitution's Principles."

The Knight newspapers include the Philadelphia Inquirer, the Tallahassee Democrat, the Miami Herald, the Akron Beacon-Journal, the Detroit Free Press, the Charlotte Observer, and the Charlotte News.

Mr. Knight is one of the outstanding newspaper publishers of the 20th century, and his recent column is an incisive analysis of the difficulties that plague us because we have departed from constitutional principles.

Mr. Knight forcefully points out that the right of dissent, guaranteed in the first amendment to the Constitution, does not provide license for the violence of the revolutionaries who seem determined to destroy our democratic institutions.

I ask unanimous consent that the text of Mr. Knight's column be printed in the Extensions of Remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNITED STATES MUST REDEDICATE ITSELF TO CONSTITUTION'S PRINCIPLES

What has happened to America? Why, in our madness, do we turn to riots and destruction, to contempt for revered institutions which made the American dream possible, to nostrums instead of cures for our economic ills, to sleazy, cheap political devices rather than exercising at least a modicum of statesmanship?

Are we indeed a part of the world revolution which seeks only to destroy while parading under the banners of democracy, Marxist style?

Why are Americans, who enjoy greater freedoms under our Constitution than are permitted anywhere else in the world, berating "the system" which makes these precious liberties possible?

How long must we permit a small band of revolutionaries to disrupt our colleges and universities, to bomb government research centers, kill innocent people and ruin the careers of devoted scientists?

What kind of a country do we live in where the flouting of law has become a national pasttime, where a law officer automatically becomes a "pig," an object of derision and attack by an untutored, undisciplined and unprincipled rabble?

Where indeed, are our leaders, the parents of our youth, the educators and the great body of law-abiding, responsible citizens?

Are the leaders too politically oriented, too concerned with their personal ambitions to stand up and be counted?

Have the educators become so supine, so dependent upon government grants or so cowardly that they stand meekly by while their institutions of learning are defiled and brought to heel by roving bands of professional anarchists?

Must we yield to the sophistry that the right of dissent—as stated so forthrightly in Article I of the Bill of Rights—can be taken as license by those willful violators of the law who cannot distinguish between dissent and disobedience?

Ironically, the destroyers who abuse our Constitutional liberties would find themselves prisoners of the Marxist police state of the authoritarian world to which they give such frenetic devotion.

The greatest of all government documents—the United States Constitution—provides ample safeguards against tryanny and injustice.

Yet the Center for the Study of Democratic Institutions has drafted a new Constitution for the United States that would concentrate all authority in the national government, strengthen the Presidency, weaken the national judiciary and create new branches of government to oversee planning, elections and economic regulations.

Dr. Rexford G. Tugwell, 79-year-old former member of Franklin D. Roosevelt's "brain trust" and author of the document, observes that cherished traditions and institutions which no longer serve the needs of modern society must be pulled down as "impediments to progress."

Along with the Black Panthers who have also put together a new Constitution, Dr. Tugwell typifies the fuzzy and radical left who would tear apart our system of government while offering the absolute authority of statism in its place.

These are the true revolutionaries—along with Socialists in the teaching profession—who are more to be feared than college youth expressing their frustrations on the campus.

Yes, our young people are being taught that there is something inherently evil about the capitalistic system, that its rewards for the industrious and thrifty segments of our society are unfair, that a "people's capitalism" would somehow solve all our problems.

Why is it, Americans, that we of the world's most affluent society, now wish to embrace the fatuous economic doctrines which have failed so miserably wherever they have been tried?

Are we like the lemmings who migrate at intervals to their own destruction?

Where were our statesmen when Congress fueled the fires of inflation by passing a "tax reform measure" which insured a huge deficit?

Can you tell us, please, why such responsible Negro leaders as Whitney Young and Roy Wilkins constantly criticize the total community for the excesses of young blacks while making no substantial contribution of their own in the direction of restraint?

Does it bug you that elementary school teachers once dedicated to character building are now setting a sorry example for our youth with their union-directed strikes on the eve of a new school year?

Or that labor's power monopoly is able to cripple the economy by making a farce of collective bargaining?

Can these distortions of an orderly society be attributed solely to the war in Indochina? Or is the current unrest symptomatic of a world society in revolution?

Whatever the cause, this is a time for the rededication of all Americans to the proposition, as stated in the Preamble of the Constitution, that this nation was conceived to "form a more perfect union, establish justice, insure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity."

These were the wise and profound thoughts of our founding fathers.

That we have strayed so far from the paths of righteousness is a serious indictment of the weaknesses of man who in the almost 200 years of our Republic now finds himself for the first time seemingly incapable of constructive self-government.

For our enemies within would destroy the union, make a mockery of justice, insure domestic anarchy, gut the national defense, disregard the general welfare and repress the blessings of liberty.

This is what is happening to America, known in happier days as the Land of the Free and the Home of the Brave.

## MISSOURI'S (AND OTHER STATES) DESPERATE PLIGHT IN MEDICAID

### HON. LEONOR K. SULLIVAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 22, 1970*

Mrs. SULLIVAN. Mr. Speaker, last year, when the Social Security Act was before the Congress, there were some changes made in requirements of the States in connection with medical assistance, to the end that it would not be permissible for any State to reduce its expenditures. This was accomplished by the adoption of an added subsection (d) to section 1902 of the Social Security Act. The consequence of such reduction would be the loss of Federal funds.

The House has previously passed H.R. 17550 and it is now before the Senate Finance Committee. A fiscal emergency has arisen in my State of Missouri, due to the failure of the residents of the State to accept a tax referendum and the unfortunate reduction by the Missouri State Senate in the amount of medicaid funds by $3.1 million, has the State faced with the loss of Federal funds. This may also be true in other States. Because of this, the junior Senator from Missouri, the Honorable THOMAS F. EAGLETON, has introduced an amendment to H.R. 17550 which would amend section 1902 of the Social Security Act which would prevent the State of Missouri or any other State from suffering a complete cutoff of Federal medicaid funds as a result of a temporary fiscal emergency.

The proposed amendment of the Senator from Missouri has great merit and it is my sincere hope that his efforts to have it adopted will be successful.

It would provide a temporary relief until the State of Missouri could put its fiscal house in order. If the amendment is accepted in the Senate, I shall do everything within my power to have it accepted by the conferees when H.R. 17550 is before them, and also to have it adopted by the House of Representatives when the legislation is returned to this body.

If such action fails, the results to the people of Missouri will be catastrophic. It would mean the loss of medicaid for medical services to 280,000 residents of Missouri who are aged, blind, disabled, mothers, unemployed fathers, and children on ADC, and those on general welfare.

No one knows how it will be possible to transfer the 4,500 persons now in skilled nursing homes to State hospitals, or what will happen to the 5,500 persons who receive inpatient hospital care each month; nor do we know what will happen to the 52,000 welfare recipients who receive doctors' services each month; to the 80,000 persons who receive prescription drugs each month; to the 13,000 persons, many of whom are children, who now receive outpatient hospital or clinical services each month.

Of equal concern is the question of what would happen to the 95,000 welfare recipients who are 65 years of age and over, whose medicare supplemental medical insurance premiums are presently paid by the State of Missouri and which would be stopped if the title XIX program under the social security law comes to an end, leaving them entirely without medical insurance protection.

Without question, the results would be very serious. The amendment which has been offered by the junior Senator from Missouri would permit the State of Missouri, or any other State that may find itself in similar circumstances in the future, a limited period of time to restore its medicaid effort and thus avoid the cutoff of Federal funds.

It is my belief that this is one of the most important and humane amendments which has been offered and I urge all Members of Congress to accept it.

## BILLS INTRODUCED

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. FINDLEY. Mr. Speaker, during the 91st Congress I have introduced 97 bills and resolutions. Many of the proposals they contain have since become law. Below I list those of major interest. Copies and explanations are available upon request.

H.R. 8773, to limit to $20,000 annual payments to farmers and increase water-sewer grants to rural communities. A $55,000 limit was included in the final farm bill.

H.R. 9009, to adjust agricultural production and to provide a transitional program for farmers. Later cosponsored by 50 Members and 21 Senators.

H.R. 9251, to authorize the Secretary of the Interior to establish the Lincoln Home as a national park. Cosponsored by 65 Representatives and four Senators.

H.R. 12018, to prohibit the use of the mails to convey obscene material to minors. Passed the House.

H.R. 12019, to prohibit the use of the mails to convey salacious materials to anyone. Passed the House.

H.R. 13056, to establish a Police Heroes Fund to benefit law enforcement officers and firemen killed or totally disabled in the line of duty.

House Concurrent Resolution 305, urging joint exploration of space by United States and other nations of world. Now adopted as official policy of NASA.

H.R. 13379, to establish an all-volunteer army.

H.R. 13446, to increase to $3,000 amount individuals may earn without suffering a deduction in social security benefits. Amount was later increased to $2,000.

H.R. 13447, to provide cost-of-living increases in social security benefits. Passed the House.

House Concurrent Resolution 454, urging North Vietnam to provide humane treatment of U.S. prisoners of war. Passed the House and Senate.

H.R. 13923, to amend the Employment Act of 1946 to include "maximum price stability" as a primary goal of economic policy.

House Resolution 564, supporting President Nixon's withdrawal policy in Vietnam. Cosponsored by 114 Members.

House Resolution 613, supporting President Nixon's efforts to negotiate peace in Vietnam.

H.R. 14388, to authorize elderly to exchange food stamps for meals prepared by nonprofit organizations.

H.R. 14496, to strengthen voluntary agricultural organizations to provide for orderly marketing of agricultural products.

H.R. 15125, to establish an Institute for Continuing Studies of Juvenile Justice to study problem of juvenile delinquency.

House Joint Resolution 1037, to require congressional approval before U.S. combat troops can be sent into the Middle East.

H.R. 16038 through 16044, seven bills to clean up the environment by setting air standards, studying recycling of solid wastes and providing funds for water pollution control, and providing penalties.

House Joint Resolution 1089, proposing an amendment to the Constitution to guarantee equal rights for women. Passed by House.

H.R. 16263, to prohibit diversion of highway revenue by States for nonhighway purposes.

H.R. 17323, to make use of a firearm to commit a felony a Federal crime where such use violates State law. Cosponsored by 16 Members.

H.R. 17349, to increase the availability of mortgage credit for the financing of urgently needed housing.

H.R. 18654, to require presidential reports concerning U.S. military units on foreign territory in order that the Congress may fulfill its primary responsibility for the commitment of the Nation to war, and for the regulation of its Armed Forces. Adopted substantially by Foreign Affairs Committee.

H.R. 19308, to control aircraft hijack-

ing by boycotting those countries which harbor hijackers.

H.R. 19380, to grant tax deductions to families of prisoners of war for expenses made to secure information about them or their release.

## NATIONAL MACHINE TOOL WEEK

### HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. ANDERSON of Illinois. Mr. Speaker, pursuant to a resolution which I introduced and the Congress passed, President Nixon has designated this week, September 20 through September 26, 1970, National Machine Tool Week in recognition of the important contribution the machine tool industry has made to this great Nation of ours. For those not familiar with the term, let me explain that machine tools are a distinct class of machinery which are used to make all other tools. For instance, machine tools alone can make the machinery for farms, factories, mills, and powerplants; machine tools alone can make the special machinery for turning out building materials, office equipment, printing, clothing, and medicines; machine tools also directly make parts for products like household appliances and motor vehicles. In essence, everything we eat, wear, and use depends upon the performance efficiency of the Nation's stock of machine tools.

As President Nixon put it in his proclamation designating this special week:

> A strong machine tool industry improves the productivity of all industries and places a greater quantity of consumer goods within the reach of more people. It is vital to the continuing growth of our economy, and contributes to improving the quality of American life.

And our original joint resolution called for the designation of this special week as "a tribute to the importance of the national machine tool industry to the American economy, in recognition of its efforts on behalf of the Nation in peace and for our national defense and with the realization of the role it must play in the development of the sophisticated machinery and equipment necessary to eliminate and prevent pollution."

And so, Mr. Speaker, I want to take this opportunity to extend my commendations and gratitude to the machine tool industry of America, and particularly to those industries in the Rockford, Ill., area—the machine tool capital of the Nation. These are the people who have done so much to make our country great, and these are the people who will be in the forefront of efforts to build a better America.

Mr. Speaker, at this point in the RECORD I am including an article from the Sunday, September 13, 1970, New York Times, on the machine tool industry, its problems and prospects. The article follows:

[From the New York Times, Sept. 13, 1970]

IN MACHINE TOOLS, NOW THE LEAN YEARS

(By Robert Walker)

Successful builders of machine tools need the steady nerves of a bomb-disposal squad. They have lived through recessions before and they are about to do it again, expecting a 1970 sales decline of perhaps 12 per cent from last year's volume and 20 per cent from the record business they did in 1967.

Their understanding of the cyclical nature of the industry does not mean they welcome the slump they know they must weather—without panicky cost cutting—for at least the next two or three quarters.

For one thing, through bad times as well as good, these manufacturers must keep spending for competitive research and development. The machine tools that rifled the barrels of World War II naval guns to what seemed in 1945 like miraculously fine tolerances would look like stone axes beside today's equipment. An operator can tell a computer in Cincinnati to instruct an automated cutting tool in Detroit to adjust itself for a slightly harder grade of steel in the next batch of engine parts it is going to make.

"You could keep your earnings up through one dip in the business cycle, and look pretty shrewd for a while, simply by firing almost everybody," Henry D. Sharpe Jr. observed last week.

Mr. Sharpe, president of the Brown and Sharpe Manufacturing Company, a machine-tool builder based in Rhode Island, added, "But then you'd have no sales, service or research capability when the next upturn arrived—which is why management in this industry has to be assessed over decades of performance and on the basis of long-term profit growth."

A minority faction in the industry has been saying recently—especially to Wall Street stock analysts—that the feast-and-famine character of the business is diminishing. In rebuttal, the majority of the 350 American machine-tool concerns merely point to the current rate of shipments and new orders. They concede that some diversified concerns might be exceptions, like the industry's biggest company, Cincinnati Milacron, Inc.—formerly the Cincinnati Milling Machine Company. But only because items other than machine tools have grown to form more than a quarter of its dollar volume.

Most of the industry is cyclical because its products—the basic and generally expensive machines used to manufacture nearly all other machines—can only be sold to industrial customers that are planning or building new or enlarged production lines. Almost by definition, a machine tool is not a consumer product. For example, the hand-held drill press in a basement workshop does not qualify, although the heavier version of the same thing, bolted to the floor of a metalworking plant, does fit the definition.

Indeed, the value of new orders announced each month in Washington by the National Machine Tool Builders Association, is an eagerly awaited and closely watched indicator of the future capital spending of American industry.

INVESTMENT BUDGETS CUT

In the final stages of a recession—which is where most Americans devoutly hope the economy stands today—industry is feeling the pinch of reduced consumer spending and capital-investment budgets are being cut.

One of the first signals of this corporate belt tightening is in the new orders for machine tools—which were $538-million in the first half of this year, down a shattering 48 per cent from slightly more than $1-billion in the first six months of 1969.

Because of the time lag between order and delivery—usually between three and nine months the machine-tool builders already can see a disappointing sales year. Volume is expected to be about $1.4-billion in all of 1970, down from $1.6-billion last year.

Thus, as the industry prepares to play host to about 100,000 executives and prospective buyers at the 1970 Machine Tool Show, scheduled from Sept. 21 through Oct. 2 in Chicago, the outlook is depressingly different from that of 1965, when the last show was held.

BOOM 5 YEARS AGO

Five years ago, the domestic industry was plunging into the biggest boom in its history. In the four years from 1965 through 1968, it would sell more than $6.5-billion worth of machine tools. At the beginning of that boom, foreign tools had perhaps 5 per cent of the United States market, but when the bonanza was over they had about 10 per cent, in terms of dollar volume.

A full-scale showing of machine tools is such an enormous undertaking that the United States events have been held only once every five years since World War II. They also have excluded all but American-built products, but both these policies have been changed.

The Washington-based trade group, the National Machine Tool Builders Association, has announced that shows will be held in 1972 and every two years thereafter, welcoming exhibitors from all nations, despite the staggering problems of logistics and accommodations that this decision will create.

The show that will begin next week in Chicago will operate in conjunction with the 1970 Production Engineering Show, where prospective customers will see practically every type of industrial equipment other than machine tools—computers, conveyors, cranes, safety goggles, factory telephone systems, pulleys, clutches, gears and pumps.

TWELVE-ACRE SHOW

The Production Engineering Show will fill the Navy Pier, while the Machine Tool Show will test the capacity of the International Amphitheatre. The latter event alone will occupy more than 12 acres of floor space and will offer demonstrations of about 2,000 machine tools worth about $30-million, nearly half of them being shown for the first time.

It will attract representatives of nearly every major manufacturing corporation in the United States and most other developed nations, as well as observers from most branches of domestic and foreign governments. In view of the size of this expected crowd, the shows will not be open to the public.

For the first time within the United States, the Export-Import Bank will have an office at the scene, prepared to process applications for export financing on the spot or, at least, before the foreign buyer leaves Chicago at the end of the show.

NUMERICAL CONTROL

Just as the hottest topic at the 1965 show was the automatic operation of machine tools by punched tape—known as "numerical control"—the watchword of this year's show is expected to be "direct numerical control." It is a complex subject, but the techniques, in broad terms, are those that already are making the punched tape obsolete.

A computer, which need not be in the same metalworking plant or even in the same country as the machine tool, can adjust and revise the instructions to one or more automated tools.

These developments have led to a brisk market for small computers and related control devices, one of the several product categories into which Cincinnati Milacron has diversified.

"Business is tough, but it's been tough be-

fore," one industry veteran said last week. "But this show will prove once again that the long-term future looks great.

"Our only real worry is whether Chicago can handle 100,000 expense-account guys who are used to the best in food and service and will want it instantly."

## FIGURING HIGHWAY COSTS

### HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. BINGHAM. Mr. Speaker, having often pointed critically to our overwhelming national investment in highways at the expense of improvements in our urban mass transit system, I was most interested to read in a recent issue of the Wall Street Journal that from an accounting point of view the cost of our highways is systematically underestimated and the cost of urban mass transit overestimated. Precisely how that is so is spelled out in "Figuring Highway Costs," a letter to the editor of the Wall Street Journal by Prof. Robert B. Shaw. The item follows:

FIGURING HIGHWAY COSTS

*Editor, the Wall Street Journal:*

In order to rectify the present extreme imbalance in the allocation of governmental funds between highway construction and mass transit, two fundamental revisions in public attitude are essential.

First of all, the highways must be charged with the burden of their terminal functions and properties, viz., local roads, streets and parking lots. Highway proponents, including public agencies like the Port of New York Authority, have always asserted that highway projects are self-supporting, whereas rapid transit is unable even to cover its operating expenses, let alone its capital costs. This position is conveniently buttressed by the arbitrary separation of major highways, bridges, tunnels and the like from the feeder and terminal functions. Only by this device does it become possible to say that highways are "profitable," while the heavy burden of local streets, congestion, traffic control and parking are conveniently thrust upon communities and their taxpayers. Equally well, of course, the railroads could still claim that the Park Avenue tunnel or the converging lines across the Jersey Meadows were profitable—if only the towns and city at either end would assume the heavy cost of operating the terminals.

As a second point, automobile and truck users should be held liable for, not merely the actual public expenditures which they occasion, but for their usurpation of valuable space which could be used much more efficiently by other forms of surface transportation. This space belongs to everybody—not just to motorists—and should have been used to the best advantage in transporting the largest number of people—not vehicles. In practice, however, the motor vehicles were allowed, years ago, to crowd the far more efficient trolley cars off the streets, and to drive mass transit underground. This being the case, the enormously multiplied cost of building mass transit underground or on private rights-of-way is not properly chargeable to mass transit patrons, but to the motorists who have commandeered the use of public property for an extremely inefficient utilization.

In brief, to say that highways are normally self-supporting while mass transit is always a loss proposition is simply to perpetuate several superficial concepts, really nothing more than accounting conventions, widely accepted to be sure, but essentially political in nature. More thorough analysis suggests that these concepts were erroneous from the beginning, and today their replacement by sounder economic planning is imperative.

## FEDERAL GRANTS, LOANS, AND CONTRACTS IN 20TH DISTRICT

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. FINDLEY. Mr. Speaker, taxpayers from Illinois' 20th Congressional District will be interested to know where their hard-earned dollars are going. In fiscal 1969, the total Federal dollars paid into the 20th Congressional District was $363,264,066. This figure includes everything from social security and veterans' benefits paid to individuals to project grants to cities. On a county basis, the breakdown of Federal payments for the 12-month period is:

| | |
|---|---|
| Adams | $39,521,942 |
| Brown | 4,253,134 |
| Calhoun | 3,344,101 |
| Cass | 10,185,652 |
| Greene | 11,974,357 |
| Hancock | 18,683,654 |
| Jersey | 8,993,292 |
| McDonough | 17,058,121 |
| Morgan | 20,610,794 |
| Pike | 13,420,762 |
| Sangamon | 204,548,656 |
| Schuyler | 6,047,396 |
| Scott | 4,622,205 |

Below is a listing of major Federal grants, loans, and contracts for each county during 1969 and 1970, the years of the 91st Congress. Where more than one county benefits from a program, the item appears where the primary effect is felt. Payments to individuals are not listed:

MAJOR FEDERAL GRANTS

ADAMS COUNTY

$945,000 loan to Quincy College by HUD for new women's dormitory.

$480,000 loan to Adams Electrical Co-Operative by REA for distribution lines.

$346,419 loan to Camp Point by HUD for 24 low-rent housing units for elderly.

$313,991 loan to Clayton by HUD for 22 low-rent housing units for elderly.

$297,088 to Quincy College by HEW for work-study programs, library materials, financial assistance to needy students, and National Defense Student Loans.

$134,995 loan to Payson by HUD for 10 low-rent housing units for elderly.

$125,000 contract for construction of Quincy Social Security office.

$110,024 to Quincy Public Schools for Head-Start Program.

$46,406 grant to St. Mary's Hospital by NIMH for Mental Health Authority for West Central Illinois.

$30,000 for purchase of site for new Quincy post office.

$23,400 in grants to Gem City College School of Business for work-study program and National Defense Student Loans.

$22,050 to Baldwin Field by FAA for runway improvements.

$9,964 loan to Blessing Hospital School of Nursing for student loans.

$8,600 contract to Quincy Civil Defense Agency for Community Shelter Plan for Adams County.

$3,500 to purchase site of new Liberty post office.

BROWN COUNTY

$206,000 grant and loan to Versailles by FHA to build sewer system.

$100,640 by DOT for improvements to U.S. Route 24 near Mt. Sterling.

$34,562 contract by GSA for improvements to Mt. Sterling post office.

CALHOUN COUNTY

$155,000 grant and loan to Batchtown by FHA for central water system.

$19,038 to Calhoun County by Office of Emergency Preparedness for disaster assistance from 1969 summer floods.

$13,380 grant to Hardin by Dept. of Interior for sewage treatment facilities.

CASS COUNTY

$1,014,000 authorized for longterm Clear Creek Watershed Project.

$91,372 loan by SBA for Big Indian Camp and Recreation Park.

$47,060 to repair banks of Indian Creek by Army Corps of Engineers.

$30,800 contract for improvements to Beardstown post office.

$13,998 in grants to Beardstown School District by HEW and OEO for summer Head-Start Program.

$6,000 for remodeling of Chandlerville post office.

GREENE COUNTY

$32,873 contract for improvements to White Hall post office.

$29,400 contract for improvements to Carrollton post office.

HANCOCK COUNTY

$515,172 to Hunt-Lima Lake Drainage District for work by Army Corps of Engineers.

$326,000 loan to La Harpe Telephone Company by REA for improving service.

$35,113 to Dallas City School District by HEW for aid to federally affected areas and summer training of migrant children.

$34,190 to Nauvoo School District by HEW for aid to federally affected areas.

$32,207 to Robert Morris College by HEW for work-study programs, library materials, student financial assistance, and National Defense Student Loans.

$24,000 loan to Nauvoo by USDA for waste disposal system.

$18,270 to La Harpe School District by HEW for aid to federally affected areas.

$2,772 to Carthage School District by HEW for aid to federally affected areas.

JERSEY COUNTY

$159,886 contract to Grafton Boat Company by Army Corps of Engineers for six launches and one diesel engine.

$120,364 to Principia College by HEW for National Defense Student Loans.

$49,351 to Jerseyville Industrial Commission by EDA for administrative expenses.

$3,000 to Grafton by Office of Emergency Preparedness for disaster assistance from 1969 summer floods.

M'DONOUGH COUNTY

$3,427,857 by HUD for purchase of 209 low-rent homes in Macomb.

$547,290 grant to Macomb by Dept. of Interior for improvements to sewage treatment plant.

$432,205 to Western Illinois University by HEW, Dept. of Justice, NIMH, and Nat. Science Foundation for work-study programs, library materials, financial assistance to needy students, National Defense Student Loans, research projects, and training for

physics teachers and law enforcement career prospects.

$170,000 loan to Prairie City Community Corp. by SBA for 48-bed nursing home.

$9,980 grant to McDonough County Regional Planning Commission by FHA for water and waste disposal plan for rural areas of county.

$4,857 to Sciota School District by HEW for aid to federally affected areas.

MORGAN COUNTY

$644,008 to MacMurray College by HEW for work-study programs, library materials, financial assistance to needy students, National Defense Student Loans and training for service to mentally retarded children.

$128,309 grant increase to Jacksonville by HUD for urban renewal.

$115,098 grant to Wilbur Freitag Laborers Homes Development, Jacksonville, to supplement rental rates.

$108,392 to Illinois College by HEW for work-study programs, library materials, financial assistance to needy students, and National Defense Student Loans.

$67,620 grant to Jacksonville by Dept. of Interior for building sewage treatment plant.

$57,926 grant to Jacksonville Airport by FAA for improvements to runway.

$24,986 to Jacksonville State Hospital by NIMH for staff development and training program.

$22,660 to Elm City Rehabilitation Center, Jacksonville, by HEW to expand services.

$12,229 grant to Jacksonville School District for summer Head-Start Program.

PIKE COUNTY

$971,748 loan to Pike County Housing Authority by HUD for construction of 72 low-rent homes in Pittsfield for elderly.

$451,200 for Mississippi River bank repairs by Army Corps of Engineers.

$59,988 to Pike County by Office of Emergency Preparedness for disaster assistance from 1969 summer floods.

$55,000 loan to Milton by HUD for improvements to existing water facilities.

$27,996 grant to Pike County Summer Head-Start Program in Pittsfield.

$12,585 grant to Pike County by HUD for comprehensive urban planning.

SANGAMON COUNTY

$6,020,869 in contracts and loans to Springfield Housing Authority by HUD for 263 untis of low-rent housing and modernizing existing low-rent housing.

$2,660,220 grant to Springfield Sanitary District by Dept. of Interior for improvements to existing sewage treatment plant and a new plant.

$2,314,430 in contracts to Sangamon Electric Company by Dept. of Navy and GSA for sonar trainer units and data processing equipment.

$1,750,700 grant to St. John's Hospital by HEW for an addition.

$1,055,045 in grants to Lincoln Land Community College by HEW and Dept. of Justice for work-study program, library materials, financial assistance to needy students, National Defense Student Loans, addition to library building, and Law Enforcement Education program.

$740,000 loan to Auburn-Divernon-Girard-Pawnee-Thayer-Virden Water Commission by FHA for lake, water treatment plant, and distribution systems.

$622,736 contract to Allis-Chalmers by GSA for crawler tractors.

$300,966 in grants to Springfield and Sangamon County Community Action Agency by OEO for neighborhood services, community organization, day-care, food and medical services for poor and activities for low-income youths.

$290,000 loan to Rochester by HUD for water supply main and additions to sewage treatment facilities.

$212,378 grant to Springfield by HUD for acquisition of land in Lincoln Home area.

$161,789 to Springfield and Sangamon County Community Action Agency by OEO and HEW for Head-Start program for preschool low-income children.

$139,512 to local contractor for improvements to 7 Illinois post office buildings.

$117,000 grant to Springfield by HUD to rehabilitate housing areas.

$109,375 supplemental grant to Springfield Mass Transit District by DOT for buses.

$95,775 grant to Springfield Recreation Commission by Dept. of Interior for developing Riverside Park.

$82,000 in loans to small businesses in Springfield by SBA, such as janitor service, car wash, motel, potato chip company, and optical service.

$29,362 to Sangamon State University by HEW for work-study program, financial assistance to needy students, and National Defense Student Loans.

$27,612 grant to Land of Lincoln Goodwill Industries by HEW for equipment to improve vocational rehabilitation services.

$16,890 to Springfield Area Vocational Center by HEW for training welders.

$15,125 grant to Illinois State Historical Society for microfilm publication of Pierre Menard Papers.

$6,943 to Concordia Theological Seminary by HEW for work-study programs.

SCHUYLER COUNTY

$114,000 grant to Rushville by Dept. of Interior for improving existing sewage treatment plant.

$47,485 to Coal and Crane Creek Drainage and Levee Districts by USDA for sediment control.

$29,623 contract for improvements to Rushville post office.

SCOTT COUNTY

$703,000 loan to Illinois Rural Electric Company by REA for distribution lines.

$298,750 in loans to Winchester Area Development Corp. by SBA to assist Winchester Packaging Corporation.

$5,200 grant to Scott County Regional Planning Commission by USDA for comprehensive water and sewer planning.

ILLINOIS VALLEY ECONOMIC DEVELOPMENT CORPORATION, SERVING CALHOUN, GREENE, JERSEY, AND MACOUPIN COUNTIES

$162,482 in grants by OEO for anti-poverty program administration, planning and community organization, family planning and medical services to low-income families, job training, recreational and educational programs for low-income youths.

$104,614 in grants by OEO and HEW for summer Head-Start Programs.

## MAN'S INHUMANITY TO MAN—HOW LONG?

### HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks: "How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadistically practicing spiritual and mental genocide on over 1,500 American prisoners of war and their families.

How long?

## ROGERS PRAISES CHANGE OF TV MOOD DRUG ADS

### HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. ROGERS of Florida. Mr. Speaker, the impact of television on adults has been, without question, tremendous. The impact on children is even greater.

For that reason, I have been concerned about the impression that young children are given in TV advertisements showing great changes after an individual has taken some sort of pill.

These mood drug ads have given the impression that all one has to do when he is having a bad time is to take a pill and he can change his mood in very short order.

In addition, the fact that these ads run all the time and children see adults taking pill after pill tends, I feel, to create an acceptability to taking pills in general.

I also felt that a young person who has seen these ads for 4 or 5 years would have a hard time in discerning the difference if one of his school friends offered him another type of "pill" on the school grounds, one to pick him up or make him feel better.

Because of this concern, I wrote to the manufacturers who used television for this mood drug-type advertising. I also wrote to the networks, the National Association of Broadcasters, and the Federal Trade Commission, asking each to restrict this type of ad.

During the past 5 months individual companies have responded to my request for voluntary restrictions in television ads by reviewing their ads and, in several instances, changing them or limiting them to adult-only-type programs.

One company, for instance, completely dropped all their ads until they had the opportunity to review them. Another was ready to enter a new product in the mood drug field. The company had gone to the expense of trying the product in a test market, preparing advertising, labeling, and packaging. But rather than take even the slightest chance of entering the market at a time when there is such national concern, the company has decided to drop the plan to market the product.

This week, I was pleased to receive assurances in response to my requests that the National Association of Broadcasters has issued a set of guidelines for its subscribers dealing with mood drugs.

Several of the recommendations which the NAB committee has come up with go directly to the point which I made in my early correspondence. NAB has recommended that there be no pill taking on camera, that no children be used, that no dramatic or extreme before and after presentations be made and no language indicating that a product will heighten one's spirits shall be avoided.

I would hope that the members of NAB will act favorably on these rec-

ommendations and the pharmaceutical manufacturers will also do so.

I think that the voluntary action taken thus far on this matter is proof that there is still a means of solving a problem within voluntary measures and without Federal intervention. Of course, if the companies involved do not adhere to these guidelines I think the Congress will respond with legislation. But I hope this will not be necessary.

## REFUSE ACT REVIVED

### HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. DINGELL. Mr. Speaker, the Christian Science Monitor of September 23, 1970, carried a most perceptive article by Peter C. Stuart concerning the revived interest in the Refuse Act of 1899.

The article appropriately credits Congressman HENRY S. REUSS with stimulating new interest in the provisions of the Refuse Act. It was Congressman REUSS, as chairman of the Government Operations Subcommittee on Conservation and Natural Resources, who pointed out not long ago that the Refuse Act contained provisions which could serve as a valuable tool in the drive to control and abate water pollution.

The Christian Science Monitor article also points out that the Army Corps of Engineers has taken action to update its regulations to bring them into conformity with the act, but it finds that the Department of Justice under Attorney General John Mitchell is reluctant to carry out its obligations under the act. With regard to Attorney General Mitchell's agency, Mr. Stuart said "the Department of Justice—so militant on 'law and order' in other fields—has been oddly permissive" insofar as polluters are concerned.

So that my colleagues may have an opportunity to be familiar with the Christian Science article, I include the text at this point in the RECORD:

REFUSE ACT REVIVED—OLD DOG WITH NEW TRICKS

(By Peter C. Stuart)

WASHINGTON.—It was a year—1899—of environmental innocence.

The automobile, today's prime air polluter, still was outnumbered by the nonpolluting horse.

DDT was the newfangled experiment of a German laboratory. Detergents hadn't been invented.

When Rep. Theodore Elijah Burton of Ohio introduced a bill to keep shipping channels free of sediment, it slipped quietly through President William McKinley's Congress—and into obscurity.

Seventy-one years later, the Refuse Act of 1899 is being rediscovered—and used. The old law is the newest weapon against the environmental pollution of 20th-century urban America.

It's easy to understand why. Yesteryear's law cuts through much of the red tape and loopholes of "more sophisticated" modern clean-water legislation.

The act is bitingly simple. It flatly bans the discharge of refuse (all foreign substances except liquid sewage) into navigable waters without a permit from the Army Corps of Engineers.

While recent water-pollution legislation gives polluters six months to clean up, the 1899 law demands compliance immediately.

But the real reason for the law's sudden popularity is that it invites citizen involvement. Anyone can report a violation to a federal district attorney, and collect one-half of any resulting fines (from $500 to $2,500 a day).

Citizens have caught on quickly. Since the old law was resurrected earlier this year, the public has peppered district attorneys in all parts of this country with charges against hundreds of alleged polluters.

VOLUNTEERS

The do-it-yourself volunteers are aided and abetted from Capitol Hill. Rep. Henry S. Reuss (D) of Wisconsin—whose conservation and natural resources subcommittee rediscovered the Refuse Act—has mailed more than 3,000 instruction kits.

Rep. Edward I. Koch (D) of New York offers a similar mail-order packet.

Some early results from the 1899 law:

The city of Bridgeport, Conn., was compelled to stop dumping half-burned raw sewage into marshland being filled for an airport runway.

The Bass Anglers Sportsman Society of America (BASS) brought charges in Alabama against 214 corporations and municipalities.

Rep. Michael J. Harrington (D) of Massachusetts notified authorities of 151 alleged Bay State polluters.

Rep. Reuss listed 270 alleged polluters in Wisconsin and personally sued four firms. Representative Koch turned in the names of the 10 "most flagrant" industrial polluters in New York City.

DILIGENCE CONTRASTED

The citizen diligence contrasts sharply with federal enforcement over the years.

Since 1899, the government has issued but 415 dumping permits. Only 266 of these apparently remain in effect. No permits have ever been granted in 22 states—including such industrialized ones as Connecticut, Maryland, Michigan, Ohio, Rhode Island, and Virginia.

Nor has federal enforcement improved much lately.

The Army Corps of Engineers this summer updated its permit regulations, with new alertness to environmental protection.

But the Department of Justice—so militant on "law and order" in other fields—has been oddly permissive.

Mr. Reuss recently reminded the department that the 1899 act specifies "vigorous prosecution." Assistant Attorney General Shire Kashiwa replied that "it would not be in the genuine interest of the government" to prosecute corporate polluters that spend "significant amounts of money" trying to clean up.

POSITION RETREATED FROM

The Justice Department later retreated to the position that it would prosecute only "infrequent or accidental" polluters, leaving "consistent" polluters to the Federal Water Quality Administration.

The department's reversal became complete when, under persistent prodding, it resorted to the Refuse Act to seek court injunctions against 10 "consistent" polluters for daily dumping mercury into public waters.

Nevertheless, the Justice Department now finds itself in the awkward spot of being sued—by Rep. Richard L. Ottinger (D) of New York—to vigorously enforce the Refuse Act.

Others, meanwhile, are trying to shore up the old law in different ways. Sen. Philip A. Hart (D) of Michigan and Representative Reuss want to give the corps of engineers $4 million to hire 400 new pollution inspectors.

Sen. Theodore F. Stevens (R) of Alaska proposes boosting the maximum penalty from $2,500 to $100,000 to make it effective against "large-scale violators."

## AMERICAN PRISONERS OF WAR IN NORTH VIETNAM

### HON. ROBERT O. TIERNAN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. TIERNAN. Mr. Speaker, on Tuesday, Col. Frank Borman gave us a dim report on the condition of American prisoners in North Vietnam. Presently there are approximately 1,500 American servicemen held in their prison camps; 1,500 men who, according to all reports, are treated like animals.

I have today written again to President Ton Duc Thang urging him to abide by the provisions of the Geneva Convention. This includes not only publishing the names of the prisoners, but providing them with proper food and medical care, permitting inspection of war facilities, and allowing the free flow of mail between prisoners and their families.

At the very minimum, I strongly urge the North Vietnamese to release the names of the American prisoners whom they hold. There are hundreds of families in this country whose husbands or sons or fathers are listed as "missing in action." The anxiety of these families, not knowing whether their loved ones are alive, is overwhelming. In the name of decency, I ask President Ton Duc Thang to send a list of their prisoners' names to our State Department.

I have also written to President Nguyen Van Thieu of South Vietnam, calling on his government to observe these same Geneva Convention provisions. It is difficult to maintain pressure on North Vietnam when the government in South Vietnam, which we are fighting for, also refuses to treat its prisoners humanely. It is very much in the interest of American prisoners held in North Vietnam for South Vietnam to abide by the Geneva Convention.

I am not at this time attempting to debate the merits of present American policies in Southeast Asia. The issue involved far transcends the question of international politics. It is neither a political nor a military question. It recognizes a kindred humanity of all men. It concerns basic standards of human decency and morality. For these men and women who are held prisoners do not initiate policy, but merely carry out policies which others have formulated.

The public outrage against man's continuing inhumanity to man must be voiced again and again, for world opinion is a powerful force. We must continue to speak out until the dignity of man is recognized and respected by all involved.

## NINTH CONVENTION OF BYELORUSSIANS

### HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. ADDABBO. Mr. Speaker, on September 5 through 7, the Byelorussians of North America held their ninth convention in New York City. On a number of occasions in the past I have joined with other Members of the House to review the positions and resolutions adopted by the Byelorussians of North America and to state our concern with the cultural and political oppression which these people face as a result of the Soviet dictatorship.

At this time I insert in the RECORD, for the information of my colleagues, the resolution adopted by the ninth convention of Byelorussians of North America:

RESOLUTION

Whereas the Byelorussian people in their land have been subjected to a colonial oppression from Moscow; and

Whereas the Russian Communist dictatorship in its dealings with Byelorussia's neighbors has torn away parts of the Byelorussian ethnographic territory having incorporated the largest part of it into the Russian Soviet Federated Socialist Republic; and

Whereas the key positions in the Byelorussian SSR are occupied mainly by foreigners subservient to the Moscow center and unresponsive to the needs of the Byelorussian people; and

Whereas the Byelorussian people suffer from an incredibly low standard of living as a result of exploitation of their natural and human resources which have been used by Moscow to conduct its international schemes in Latin America, Indochina, Africa and now especially the Middle East, as well as in other parts of the world; and

Whereas a policy of forcible Russification is being carried out in the Byelorussian SSR, the Byelorussian language being eliminated more and more from administration, science, education, and publications in the BSSR; and

Whereas Byelorussia is deprived of genuine diplomatic and cultural ties with the outside world, is unable to participate independently even in such international events as the Olympic games, her only foreign representation in the United Nations being a tool of Moscow's policies; and

Whereas the Government of BSSR, fully controlled by the Communist Party center in Moscow, does not care for any improvement of Byelorussia's political status and the economic and cultural well-being of the Byelorussian people, nor does it protest against economic exploitation and Russification of Byelorussia; and

Whereas the Byelorussian nation has and will never become reconciled to a state of colonial dependence, but has decidedly resisted Muscovite oppression in defense of its natural rights to be its own master; and

Whereas the Byelorussian people are still conducting their freedom fight—

We the Byelorussians of the United States and Canada unanimously reaffirm our will to support the fighting Byelorussian people in the Soviet Union in their struggle for cultural freedom and political independence. We are determined to seek further support for fighting Byelorussia among political leaders and statesmen of the United States of America and Canada. We and our children shall never cease our effort until Byelorussia will again become a free and democratic nation in accordance with the postulates and principles enunciated in the constitutional charters of the Byelorussian Democratic Republic whose freedom and independence were proclaimed in Miensk (Minsk) on March 25, 1918.

Long live Fighting Byelorussia!

Long Live the Byelorussian Democratic Republic!

New York City, September 6, 1970.

J. ZAPRUDNIK,
*Chairman of the Convention.*

W. STANKIEVOCH,
*Chairman of the Byelorussian-American Association.*

A. HRYCUK,
*Chairman of the Byelorussian Canadian Alliance.*

---

## TWO ARTICLES DEALING WITH THE LEGAL DOCTRINE OF COLLATERAL ESTOPPEL

### HON. WILLIAM LLOYD SCOTT

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. SCOTT. Mr. Speaker, a constituent who specializes in tax law has written two articles dealing with the legal doctrine of collateral estoppel. While a highly technical subject, he has put in simple terms the civil liability an individual may incur by being found guilty in a criminal case for income tax evasion. The articles referred to follow:

[From the Washington Evening Star, Aug. 14, 1970]

PLEA OF GUILTY ADVISED HERE

(By E. Edward Stephens)

DEAR COUNSEL: I live in Falls Church, Va. When the time came to file my 1967 tax return, I couldn't scrape up enough cash to pay the tax. So I didn't file the return, and I haven't done so to this day, although I was on time in filing returns for 1968 and 1969. Now the Internal Revenue Service and the Justice Department have caught up with me. An Assistant U.S. Attorney has told my lawyer that, if I'll plead guilty, he'll charge me only with violation of Internal Revenue Code section 7203, willful failure to file a 1967 return; but if I decline, he'll ask the grand jury to indict me under code section 7201, willful attempt to evade my 1967 tax by willfully failing to file a return. Is the deal worth considering?

Yes, Here are some points that your lawyer will discuss with you:

If you take the deal, you'll be convicted of only a misdemeanor. The punishment can't exceed a fine of $1,000 and imprisonment for one year. Chances are you'll be fined and put on probation for a year or less.

If you don't deal, the grand jury most likely will indict you under section 7201 in accord with the prosecuting attorney's request. Then you'll have the expense of defending yourself and, if convicted, you can be fined up to $10,000 and jailed up to five years. Furthermore, you'll stand convicted of a felony—far worse on your record than a misdemeanor.

Whether you make the deal or not, IRS will go after you, later, for a 1967 deficiency plus the 50 percent civil fraud penalty. And here's an important point: If you've been convicted only under section 7203, IRS will have to prove that you intended to defraud the government. You might beat the rap. In a Tax Court decision filed July 28, George Arconti, of Lutherville, Md., was relieved of civil fraud penalty liability after he had failed to file returns for three years and had been convicted under section 7203. But if you've been convicted under section 7203 you'll automatically be held liable for the civil fraud penalty whether you go to the Tax Court, the U.S. Court of Claims, or the U.S. District Court.

You'll be held liable for the civil fraud penalty under the highly technical doctrine of "collateral estoppel." That is, you'll be precluded from trying to prove that you're not liable for the penalty. Reason: the government already will have proved—in the criminal case—that you intended to defraud the United States. This is now the rule that's applied in the Tax Court, the Court of Claims and all District Courts in the Fourth and Fifth Circuits.

The harshness of this rule can best be illustrated by turning to the case of O. K. Armstrong v. U.S., decided in 1965 by the Court of Claims. Armstrong was convicted, under section 7201, of willful tax evasion for '47, '48 and '49. Then IRS went after him for deficiencies for the years '45 to '50, and added the 50 percent civil fraud penalties. Trial Commissioner W. Ney Evans allowed Armstrong to present evidence to show his lack of fraudulent intent for each of the six years. He then concluded that Armstrong had cleared himself of fraud for all six years.

Then the judges upset the apple cart. Applying the collateral estoppel doctrine, they held that, since Armstrong had been found guilty of willful evasion for '47, '48 and '49, he was automatically liable for the civil fraud penalties for those years, even though the evidence showed that he was in the clear.

---

[From the Washington Evening Star, Aug. 21, 1970]

ONE-WAY STREET FOR THE IRS

(By E. Edward Stephens)

DEAR COUNSEL: I was surprised to learn from last Friday's column that if a person is convicted of willfully attempting to evade his taxes, and is punished under Internal Revenue Code section 7201, the technical "collateral estoppel" rule—now applied by some courts—makes him automatically liable for additional stiff civil fraud penalties under code section 6653(b). Does the doctrine work the other way too? If he's acquitted on the evasion charge, is he automatically relieved of liability for the civil fraud penalties?

No. In a historic 1938 decision, Helvering v. Mitchell, the Supreme Court held that the Internal Revenue Service can still go after him for the civil fraud penalties.

Here's the reasoning: Even though IRS must prove the same fraudulent acts and intentions in both cases, it's easier to prove them in the second case. Since Round One is a criminal action, IRS must show that the taxpayer is guilty "beyond a reasonable doubt." But Round Two is a civil proceeding, and IRS has only to prove that the taxpayer is liable "by a preponderance of the evidence." Therefore, although IRS may lose the criminal case, it still might win the civil action, and it should have a chance to try.

As you have indicated in stating your question, some courts now sing a different song when the shoe's on the other foot. If the taxpayer loses the criminal case, these tribunals deny him the opportunity to contest his liability for the civil fraud penalties—which, in most instances, are far greater than his fine for the tax evasion conviction. This rule is now being followed by the Tax Court, the Court of Claims, and all U.S. District Courts in the Fourth and Fifth Circuits—Maryland, Virginia, West Virginia

and the Carolinas, as well as Georgia, Florida, Alabama, Mississippi, Louisiana, Texas and the Canal Zone.

These courts reason: IRS can win both cases by proving the same fraudulent acts and intentions of the taxpayer. Since IRS has proved them in the first, more difficult action, it should not have to establish them again. However, there are some mighty strong objections to this position:

Collateral estoppel is unfair when applied in this manner. It favors IRS. It's a one-way street.

Many legal scholars are convinced that the rule enables IRS to take a taxpayer's money in violation of the Constitution's celebrated Fifth Amendment, which says that no person shall be deprived of his property without due process of law.

Even though a taxpayer has been convicted in the criminal court, he still may beat the second rap if he's given an opportunity to defend himself. For instance, he might discover new evidence, between the two trials, that will clear him.

Congress has given the Tax Court "exclusive jurisdiction" to approve or disapprove IRS determinations of civil penalties. By applying the collateral estoppel rule the court has, in effect, abandoned part of its exclusive jurisdiction, without any authority to do so.

Congress can render a great service to the public by enacting legislation that will make it clear that every taxpayer is entitled to his day in court when IRS goes after him for civil fraud penalties, even if he has been convicted of attempted tax evasion.

## "DOOM-CRYING" CANNOT FOOL MANY PEOPLE

### HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. ANDERSON of Illinois. Mr. Speaker, yesterday the Senate Democratic policy committee produced a report on the economy by three Johnson administration economists which was critical of the Nixon administration policies. The fact that the release of this report happened to be on the same day as the encouraging news on the cost of living index was a pleasant coincidence for the Democratic Party. However, it must lead a few cynics around the country to wonder if the Democrats were not just keeping this report in their back pocket to serve up to counter Republican good news on the economy.

The opposition party is in the sad position of having to cry bad news in the face of obvious good news. However, there is a basic difference in the opposing views offered on the economy yesterday. The announcement by the administration of a slowing in the rise of the cost of living was a statistical fact. The report by the Senate policy committee was based on partisan opinion.

This type of doom-crying is not going to fool many people. Even the Washington Post, which has not been overly kind to the administration's economic policies, said this morning:

With the September figures in, the clear-cut trend toward a much lower rate of inflation so long sought by the Nixon Administration is unmistakable.

## SAGINAW STEERING GEAR HONORED BY DEPARTMENT OF TRANSPORTATION

### HON. JAMES HARVEY

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. HARVEY. Mr. Speaker, it was my great privilege yesterday to participate in special ceremonies at the Department of Transportation as the Saginaw Steering Gear Division of General Motors was singled out by that Department for the production of the 20 millionth energy-absorbing steering column by the division since its introduction in 1966.

Under Secretary of Transportation James M. Beggs most graciously and ably substituted for Secretary John A. Volpe as Mr. Ellis M. Ivey, general manager of Saginaw Steering Gear, presented the actual 20 millionth steering column to the Department.

In turn, Under Secretary Beggs presented to Mr. Ivey a special plaque bearing the Department of Transportation seal with the following inscription:

The Department of Transportation salutes the Saginaw Steering Gear Division, General Motors Corporation, on the production of the 20-millionth Energy-Absorbing Steering Column.

This device, since its introduction in 1966, is credited with saving an estimated three thousand lives.

Awarded in grateful appreciation for an outstanding contribution to improved safety for the American motoring public.

The plaque is signed by John A. Volpe, Secretary of Transportation and is dated September 1970.

Naturally, I share with great pride this marvelous development of an outstanding automobile safety device and the deserved recognition now accorded the nearly 9,000 employees of the Saginaw Steering Gear Division.

At this time I would like to include with my remarks, a very fine statement of Mr. Ivey's relating to the events of yesterday and the energy-absorbing steering column:

STATEMENT BY ELLIS M. IVEY

Earlier this afternoon we received a citation from the Department of Transportation, signed by Secretary Volpe, honoring Saginaw Steering Gear and General Motors for its "outstanding contribution to improved safety for the American motoring public. The citation credited the energy-absorbing steering column with saving an estimated 3,000 lives since its introduction on the 1967 model GM cars.

Such recognition is high praised, indeed, and we are grateful to Secretary Volpe and Representative Harvey for making it possible. I am proud to accept it on behalf of the 8,600 employees who conceived, designed and are producing the column.

I certainly don't want to bore you with statistics about the energy-absorbing steering column. However, it is worthwhile to note one or two salient facts concerning its development—an achievement in which we take considerable pride. Our divisional advanced engineering section started development of the column early in 1960. It was not a matter of improving upon an existing design. We were entering a brand new ball game. No one ever had produced such a column before. Almost no medical data existed concerning the impact forces the human body can survive. Many designs were painstakingly conceived, built, tested, and discarded—at the same time that the medical researchers were slowly and laboriously working out the parameters within which the ultimate design would have to fall. When the final design was approved late in 1965, and impact tests using dummies and cadavers proved its merit, General Motors ordered an all-out effort to produce it for the 1967 model cars. To make this almost impossible short deadline, we launched an around-the-clock, three-shift, effort to simultaneously complete a plant, fill it with the necessary production equipment, and convert an engineering design into a fully-tested, mass-produced assembly.

It was an agonizing job, but we made it—and put the life-saving steering column on our cars one year ahead of the Federal regulation calling for a production of this type. We also were one year ahead of our competitors. Since that time we have developed and marketed a still better, second-generation energy-absorbing column. In addition, we have developed and added a steering column lock that simultaneously locks the steering wheel, gear-shift, and ignition. This adds significantly to the safety value of the column by reducing the number of car thefts. National Safety Council statistics show that one out of every six stolen cars is involved in a collision.

The honor that has been paid us today by the Department of Transportation, and by you gentlemen, helps make our investment in time, effort, and money still more worthwhile. Our industry has no scarcity of vociferous critics, who do not hesitate to call attention to our faults, either real or imagined. We are, therefore, doubly appreciative of your recognition of this successful phase in our continuing effort to increase the safety of the American driving public.

## INDUSTRY HELPS TO REDUCE AIR AND WATER POLLUTION IN ILLINOIS

### HON. KENNETH J. GRAY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. GRAY. Mr. Speaker, a recent article in my hometown paper, the West Frankfort Daily American, has brought to my attention another outstanding illustration of how an industry in my district is helping to reduce air and water pollution. The article states:

Construction on a third electrostatic precipitator at Grand Tower Power Station of Central Illinois Public Service Co. is approximately 70 percent complete, with the project expected to be finished by early December. The work is part of the utility's $16 million, five-year air quality control program to install the anti-pollution devices at all four of its power stations. Two precipitators serving generating unit No. 3 at Grand Tower have been in operation since early this year.

The equipment now being installed will remove fly ash . . . which is residue from burning coal . . . from stack emissions of unit No. 4 at the Jackson County power plant. In addition to installation of the precipitators, a new sewage treatment plant and new ash ponds were constructed at Grand Tower as part of CIPS' anti-pollution program. The ponds, a large scooped-out area enclosed on all sides by dikes, are used to store ashes resulting from coal being burned in the power station boilers.

Mr. Speaker, this is an excellent example of how private initiative in my district is meeting a pressing, present-day problem.

I know my colleagues would join me in extending congratulations to the Central Illinois Public Service Co. for taking this important step to "clean up our air."

## ECONOMY LOOKS UP

### HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. BROWN of Ohio. Mr. Speaker, after more than a year and a half under the policies of the Nixon administration, the Nation's economy shows strong signs that we have successfully brought under control the most rampant inflationary forces that afflicted the United States when Mr. Nixon became President. The President did not create the fiscal chaos that set the wage and price spirals in motion and pushed up interest rates to record highs. Neither did he undertake the war in South Vietnam and then try to pay the costs of that war through huge deficit budgets that provided the major impetus for the inflationary forces at work in the economy.

For more than a year and a half, however, it has been the President's responsibility for curtailing both inflation and the war. He has been able to move the Nation ahead on both fronts, despite minimal cooperation on holding down spending from the Democratic-controlled Congress which has often seemed oblivious to its own support of the past policies of overspending that got us into the present inflationary mess in the first place. It is to the President's credit that he has been able to score the successes he has in spite of this major obstacle.

Wall Street Journal writer John O'Riley, in an article published last Monday, put the present picture of the economy into some needed perspective, especially for those who would rather spend all of their time pointing out the present difficulties without also noting what developments have taken place to move us beyond those challenges and into a more promising period. I am placing the article in the RECORD for the benefit of my colleagues who might not have had a chance to read it:

APPRAISAL OF CURRENT TRENDS IN BUSINESS AND FINANCE

(By John O'Riley)

Summer's gone. So is a decade. The stock market rises once again. And, despite the auto strike, the economic wise men are now nearly unanimous in the opinion that the recession—or whatever it was that hit us—is finally on the way out. What, if anything, have we learned in the 1960s about the workings of the vast and complex American economy? And where do we go from here? It may be presumptuous to say we've learned anything. It may be foolhardy to forecast the future. But some answers seem pretty clear as far as the human eye can discern.

One thing written pretty clearly on the record of the 1960s is the picture of Americans as an economically nervous people. You might almost call them economically neurotic. Rarely has a people fretted so much about recession-depression while experiencing so little of it.

The massive dynamism of the period hardly needs documenting. Starting in 1960 at $503 billion, the GNP reached $971 billion in the second quarter of this year. That's almost doubling in a decade.

Some of this has been inflation, of course. But most of it has been solid growth. The Federal Reserve's 1957–59 based industrial output index stood at 108 in 1960 and at 169 last month. In 1960 there were 65 million people with jobs in the country. And today there are nearly 80 million.

This is not to deny at all that there has been much economic pain felt by both individuals and companies in the slowdown of the past year or so. Many, many individuals have lost jobs. Many, many companies have felt sharp profit shrinkage. And people with much of their substance in stocks and bonds have suffered extremely painful losses. Still—on the larger scene—total employment, personal income, industrial production, GNP—all are at or within a whisker of their all-time highs. It scarcely adds up to a depressed economy.

What about the stock market? Have we learned anything in that area? Probably not. But one lesson does seem to be offered—whether we learn it or not: A stock market bust certainly does not always portend a bust in the economy.

During the past decade, the most sustained period of prosperity in modern times, the stock market managed to record not just one but all three of its biggest breaks of the past quarter century.

Measured by the Dow Jones Industrial Average, the declines were:

[In percentages]

| Periods: | *Stock Market* |
|---|---|
| 1961–62 | Down 27 |
| 1966 | Down 23 |
| 1969–70 | Down 36 |

The 1961–62 period saw a barely measurable recession (actually in 1960–61) that lasted only nine months. In 1966–67 there was a slight slowdown never officially called a recession—labeled by some a "mini-recession." And the slowdown now believed to be ending has never gone far enough to bring agreement on whether it has or hasn't been a recession, as measured by historical standards.

The stock market is partly a barometer of hard economics and partly a barometer of mood. The stock-buying public's mood swings violently from unmitigated optimism to the darkest gloom, and back again. Thus the market, swings also—too far up when it's rising and too far down when it falls. Much of the steepness chronicled in the breaks above lies in the fact that the market simply got unjustifiably high in each case before the tumble.

And every big break, of course, is helped along by those who always see "the end of the world" in the bust, or at least "another 1929." This scares people. But people like to be scared. And many pay well for a steady diet of frightening advice, however unfounded it may be.

One lesson taught before but reiterated in the 1960s is this: You can't have "full employment" and price stability at the same time. Some political wizard may some day join the two together in a compatible marriage, of course. But the trick has yet to be turned.

Full employment, with the unemployment rate under 4%, for this country at least has been a phenomenon of war periods. We had it in World War II. We had it with the Korean War. And we had it with the Vietnam conflict prior to the recent throttling down of defense expenditure. But these are the only times we have had it. And each period, of course, has been marked by inflation.

If American fingers can really be withdrawn from the sticky mess in Vietnam, and if somehow the threatening fire can be smothered in the Middle East, the 1970s may be the stage for a new attack on the full-employment-no-inflation riddle. A solution won't come easy.

War and threatened war, of course, is the big shadow over the 1970s. In comparison, the General Motors strike is peanuts. The strike will hurt the economy; but it will pass. The possibility of trouble in the Middle East escalating to a point of direct confrontation between Russia and the U.S. raises the spectre of danger far beyond the scope of mere economics.

But, with peace postulated, the years just ahead should bring more prosperity to the American economy. Public buying power is high and, more important, there is no good reason to think it won't continue high.

Personal income is the backbone of buying power. And public buying power is the stuff on which all business feeds. Despite the much publicized problems of the last year, personal income in the U.S. last month reached an all-time high of $807 billion yearly. It has risen nearly $50 billion in the past twelve months. It was under $500 billion as recently as six years ago.

Despite the payroll trimming of months just past, total wage and salary payments in the nation, now at the rate of some $544 billion a year, have climbed nearly 30% in less than three years.

Personal saving as a percent of disposable income is now at the highest level in nearly 20 years. And, Puritan ethic or no Puritan ethic, it is not in the nature of the American consumer to sit on savings forever.

## DRUG SONGS AND MOVIES

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. DERWINSKI. Mr. Speaker, WBBM Radio, Chicago, in an editorial commentary on September 17 effectively emphasized the relationship between songs and movies and the so-called drug culture. In view of the very grave concern that Members of Congress are showing in this issue, I insert into the RECORD at this point this most effective and timely editorial:

DRUG SONGS AND MOVIES

When it comes to attacking various elements of our society, Vice President Agnew has no peers. Let's make it perfectly clear we don't always agree with him, as in the case of his attack against elements of the press and broadcasting.

Nevertheless, he does make some sound arguments. Vice President Agnew says that some song writers and movie makers are glamorizing the use of drugs. In our opinion, he's absolutely right about this matter.

Just listen to what's being sung or really examine some of the movies we are being shown. Often, both songs and movies make it appear that living with drugs is the natural order of things. In fact songs and movies in many cases make it seem to be desirable to take drugs. It's helping to create a drug culture.

With all the talk of pollution these days—it's about time we became concerned about another kind of pollution—and that's the pollution of the minds of our young people.

The song writers and movie makers are

wrong. They make money, oh yes. But they're wrong nevertheless. If you don't believe me, just ask the youngsters who are getting help at Gateway House. They tell you all about the elusive joys of drugs once you're hooked. If this makes us "squares"—then so be it—we're glad to hold that title. It's better than being a dope addict—even if that's supposed to be the "in" thing.

Song writers and movie makers owe some responsibility to the public. And that responsibility includes not making the use of drugs appear to be a good or even happy experience. Drug use is bad. Songs and movies are dead wrong when they try to make it appear otherwise.

## VOTING RECORD

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. FINDLEY. Mr. Speaker, each year hundreds of votes are taken in the House of Representatives. Some are on controversial subjects where the vote is close, while others receive lopsided majorities.

It is not practical to list every vote I cast during the 91st Congress. However, here is my record on some of the more important bills. A fuller explanation on these or other votes is readily available.

I voted in favor of the following bills:

Military procurement authorization for fiscal 1971.

National Science Foundation authorization for fiscal 1971.

Office of Education appropriations bill. Voted for bill as it passed House, but voted to sustain President's veto of higher inflationary conference version.

Independent Offices—HUD appropriations for fiscal year 1971. Voted for original bill, but supported the President's veto of higher inflationary conference version.

Amendment to Constitution providing for election of President and Vice President by direct popular vote.

To allow the President to institute a lottery system for selecting draftees.

To require Members of the House to report honorariums of $300 or more, and unsecured loans for more than 90 days in excess of $10,000.

To lower voting age to 18, set up a nationwide 30-day residency requirement for presidential elections, and extend provisions of the previous Voting Rights Act.

Postal reform bill including a prohibition on postal workers strikes and containing a right-to-work amendment.

Amendment to the Constitution providing equal rights for women.

To provide for reform procedures in the House of Representatives.

The Elementary and Secondary Education Act authorizing $5.3 billion per year through 1972.

To provide milk for school children at reduced cost.

Amendment to deny Federal interest subsidies on college construction loans to colleges which fail to cut off Federal aid to students who willfully violate college regulations of a serious nature and contribute to substantial disruption.

To provide for a National Center on Educational Media and Materials for the Handicapped.

To provide guaranteed Government loans at 7 percent interest to college students.

To authorize a 3-year program of research, advanced training, and remedial programs to help children with learning disabilities.

To authorize special educational programs on the dangers of drugs.

To provide for programs on environmental education.

To extend the Hill-Burton hospital construction aid program for 3 years. Later voted to uphold the President's veto due to the acceptance in the compromise proposal of the Senate's higher inflationary authorizations.

Community Mental Health Centers Construction Act with provisions for mentally-ill children.

Amendments to the Mental Retardation Facilities and Community Health Centers Construction Act of 1963.

Health Act extension bill for research and training in the fields of heart disease, cancer, stroke, and other diseases.

Family assistance bill providing for comprehensive reform of the present welfare system.

To provide additional safety standards, require closing of unsafe mines, and provide compensation for miners suffering from black lung disease.

Unemployment compensation bill to provide coverage for 4.5 million additional workers.

Food stamp program authorization for $610 million for food aid to needy people.

To authorize $348 million for a 3-year period to control water pollution.

To establish the Council on Environmental Quality.

To authorize $775 million to control air pollution.

Golden eagle program for Federal recreation areas.

To investigate crime in the United States.

To increase education benefits for 736,000 veterans.

To provide necessary hospital or domiciliary care to veterans over 70.

To provide additional mortgage guarantees for veterans.

To raise social security benefits by 15 percent.

The 1970 social security bill increasing payments by 5 percent and providing for cost-of-living benefit increase and increasing to $2,000 the outside earnings limitation.

To provide for a 15-percent increase in benefits for retired railroad workers.

To authorize $4.8 billion for housing and urban development programs.

To provide additional funds for the home mortgage market.

Antismut mail bill prohibiting such mailings to minors under 17.

To prohibit use of mails for unsolicited salacious advertising.

To provide tax relief to most taxpayers and to close many tax loopholes. Major provisions included: Increase in personal income tax exemption from $600 to $750 over the next 3 years, reduction of income tax surcharge to 5 percent through June 30, 1970—presently removed altogether—reduced depletion allowance on gas and oil from 27.5 to 22 percent, increased in stages the maximum standard deduction for taxpayers who do not itemize from the present 10 percent of income with a $1,000 ceiling to 15 percent with a $2,000 ceiling, fully effective in 1973.

Calling for humane treatment and release of prisoners of war held by North Vietnam.

Supporting President Nixon's effort to negotiate a "just peace" in Vietnam.

I voted against the following bills:

Pay incerase for Members of Congress, which was untimely, ill-advised and which contributed to inflation.

Agriculture Act of 1970, which provided little progress toward market-oriented agriculture and high payments to wealthy farmers with little special aid to low-income farmers. My amendment to limit payments to $20,000 was defeated on a close vote.

Radio-TV campaign spending bill which would discriminate against broadcasters and against minor candidates.

Resolution disapproving reorganization of the executive branch, which would have prohibited President Nixon from streamlining the executive branch.

Commission to study proposals for national holidays.

To authorize each Member of the House to hire an additional staff member.

To authorize $475 million for the Appalachian Regional Commission which excluded most of the United States from benefits.

To authorize a new sports arena in Washington, D.C.

To permit retirement of U.S. judges at full pay after 20 years of service.

Proposal to override President Nixon's veto of hospital construction bill which was inflationary and would deny the President the right to manage the budget.

Senate amendment to add $587.5 million in urban renewal funds.

Local withholding tax bill under which Federal Government would serve as tax collector for cities.

## TAX EXCLUSION FOR LAW ENFORCEMENT OFFICERS AND FIREMEN

### HON. ROBERT TAFT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. TAFT. Mr. Speaker, I have today introduced a bill that would permit a $200 tax exclusion per month for law enforcement officers and firemen nationwide. The proposal would give these deserving public servants up to a $35 per month reduction in Federal income taxes and in effect provide an "instant pay increase." The rationale of this bill is that it is justified as the equivalent of combat pay, a position, unfortunately, that becomes more apparent daily.

When I originally introduced this proposal in 1967, I did not include firemen. Indeed, the record with reference to the

service of firemen during civil disturbances indicates that they are subject to equal danger.

## ELECTORAL REFORM TIEUP

### HON. GILBERT GUDE

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. GUDE. Mr. Speaker, in light of the importance and need for electoral reform, I thought the following editorial from the Evening Star yesterday was a very good analysis of the problem. I supported the amendment to provide for the direct presidential elections as I believe it reflects the direct relationship between American citizens and the Presidency which has grown in recent years. The Presidency is the last major office in the country for which the people do not have a direct vote. The American people want this amendment; it is time to stop talking and act.

The editorial follows:

ELECTORAL REFORM TIEUP

From the standpoint of popularity with the public, probably no measure before Congress is the equal of the proposed amendment for direct election of presidents. If the polls are to be credited, about 80 percent of the people regard the electoral college system—at least as it is now functioning—as an absurdity. They want a new process in effect before the 1972 election.

This sentiment is recognized in Congress, and by the President. Still as pre-adjournment pressures mount, the proposal is locked in a procedural vise. Last Thursday, a motion to shut off the Senate debate on it and bring it to a vote failed, and its fate now hangs on a thin thread. We hope the cloture decision will be reversed, and that the President will choose this moment to enter the battle so that that can be achieved.

The cloture motion fell six votes short of the required two-thirds approval. Thirty-six senators held out against breaking the impasse. Perhaps some of them voted that way out of devotion to the principle of extended debate, rather than because of strong feelings against the amendment. In any case, the proposition is being subjected to a double-barreled test.

Since a constitutional amendment must finally receive a two-thirds majority for Senate approval, it seems unfair that this one is having to buck a preliminary two-thirds hurdle just to be advanced for a vote on its merits. While there is a strong case for the Senate's traditional filibuster sanction, as a brake on ill-considered plunges, surely on this question the requirement for a two-thirds majority on the finished product should be sufficient. Senator Mansfield correctly observed last week that the forcing of a cloture vote on the amendment "abuses the clear purpose and interest of the Senate rules" by imposing "an additional, unnecessary, uncalled-for roadblock."

Senator Bayh, the chief sponsor of the electoral proposal, has assured that he is willing to consider compromises on both content and procedures. Hence senators wishing to alter or even eliminate some parts of the Bayh resolution, including the controversial runoff election provision, will have opportunities to do so if the whole effort doesn't die aborning under the filibuster.

There still may be time for ratification of the amendment by the states so it can be applied in 1972, if the Senate moves speedily. It already has been approved, almost five-to-one, by the House. The Senate probably will settle the matter one way or the other within the next week, when a second vote on cloture is called. It should shut off the debate, consider revisions and bring the proposal to a vote. A minority should not be allowed to—indeed should not want to—foreclose a decision on an issue of this magnitude.

## THE FIRST OPTION

### HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. SCHMITZ. Mr. Speaker, Adm. C. Turner Joy said:

It has been said that in war there is no substitute for victory. It can also be said that in debating with the Communists, there is no substitute for the imperative logic of military pressure.

Last week I introduced a resolution calling for a formal declaration of war against the North Vietnamese Communists unless they release all American prisoners of war and start moving their armies back within their own borders. There were two major reasons for this resolution. The Communists will hardly be likely to concede anything if they are sure that all they have to do is prolong the conflict and in the end attain all their primary objectives. With the Senate debating whether or not we should surrender South Vietnam, by way of the Hatfield-McGovern amendment, which failed by only 16 votes, the Communists surely did not feel compelled to make major compromises. With the House discussing a resolution for possible Communist defeat, they may be more amenable.

The very concept of victory has been lost in the shuffling of options. It is necessary to revive this prospect in the light of the present situation, and to have our citizens reflect upon this possibility. Victory is not only possible but by far the most desirable solution to the whole question of what to do in Vietnam. It is the first option.

Three principal reasons have been advanced for not seeking a military victory: First, that it would provoke the Soviet Union; second, that the war is primarily a civil war along the lines of a popular uprising, and therefore, beating the North Vietnamese would not end the conflict; and third, that a strategy of victory would "polarize" our Nation and be divisive. As time wore on, a fourth reason crept in. People began confusing the fact that we were not trying to win with the notion that is was impossible to win.

Actually, it is almost inconceivable that the United States cannot defeat North Vietnam. If we truly cannot now achieve a military victory over North Vietnam, then why to the same people who tell us this also advocate drastic cuts in funds for national defense? If our military forces have deteriorated to the point where they are not capable of beating the North Vietnamese, where, one might ask, would further cuts leave us? Safe and sound, say the same voices, although usually in different speeches. Fortunately, most Americans understand that will and capability, while interrelated, are not the same. We have the capability; it is our will which is paralyzed.

The second and third major reasons adduced in opposition to victory have been clearly disproved by time itself. No one seriously contends any more that the war is some type of spontaneous revolt. Neither will anyone contend today that the policy of prolonging the war through refusing to win it has not been internally divisive. The ambiguous, uncertain, and hesitating nature of our policy has resulted in what amounts to a revolutionary situation in our own Nation.

Once our citizens, especially the young people, saw that we were not attempting to win the war, they began to wonder why. The LBJ administration, confounded by its own rhetoric and afraid either to win or to lose, could give them no cogent answer. Others did. They said we did not win because we were embarrassed to be fighting an unjust war; that our uncertainty and hesitation stemmed from guilt. Their logic, if not their facts, sounded a bit more reasonable than sophistries about limited war, gradual escalation, and flexible response. Even a child could see the gaping fallacies inherent in these theories—and young people did.

When one's cause is just and he has the capability, he presses on to victory. Our cause is just; we have the capability; it is time to press on. The minority, whom this might alienate, must not be allowed to determine our policy.

Fear of the Soviet Union is the major stumbling block in our path today as it was 5 years ago. The substance behind this reason for not winning has increased because Soviet power has increased. The Soviets moved into high gear in nuclear rocket production as we muddled along in neutral in Vietnam. Today, Secretary of Defense Laird says our strength is "at the edge of prudent risk."

Although the substance behind this rationale itself is as spurious as it was when first advanced back around 1950. The Soviets will not attack until they are assured a probability of success. When their strategic capability gives them the prospect of success, they will attack—but not until then. To launch an attack on the United States in response to our victory in Vietnam would be, in effect, to allow us to pick their time for attack—a time before they are assured success. This they would hardly allow us to do. Soviet Minister of Defense, Marshal Grechko, realizes full well that "the edge of prudent risk" does not mean that we have fallen into the valley of probable defeat.

It will take courage to strive for victory. It will be a disaster if we do not. If the majority of Americans who have always been for victory give their support to a formal declaration of war, I am sure our leadership will respond. The forces of surrender have taken the initiative and gained the upper hand. This must be changed. For the sake of our men suffering in enemy prisons; in memory of our good men who have died young fighting for the freedom of others; for the future of our Nation, we must work to win. We must promote the first option—Victory.

The joint resolution follows:

H.J. RES. —

Joint resolution providing for a formal declaration of war against the Government of the Democratic Peoples Republic of Vietnam (North Vietnam) unless certain conditions are met, and for other purposes.

Whereas the Communist dictatorship controlling the Democratic Peoples Republic of Vietnam has for the past fifteen years been waging a ruthless war of aggression against the peoples of Indochina, in which at least three-fourths of a million men, women and children, including over 50,000 American soldiers, have lost their lives; and

Whereas the above-mentioned Communist dictatorship has shown itself to be barbarous and repulsive to all civilized men by, among other things, its inhumane treatment of United States servicemen captured in the line of duty and its failure to abide by the Geneva Convention regarding the treatment of prisoners of war, to which it is a signatory; and also by its continuing acts of savage terrior against the civilian population of the Republic of Vietnam, Cambodia, and Laos; and

Whereas the above-mentioned Communist dictatorship has, in the face of continued efforts by the Government of the United States and the Government of the Republic of Vietnam to arrange for an end to the bloodshed with something less than abject and complete surrender of the noncommunist nations under attack, shown itself absolutely opposed to any cessation of its aggressive activities short of the complete conquest of its intended victims; and

Whereas in the face of continuing arrogance, intransigence, and unremitting hostility the United States has shown restraint to the point of severe injury to its own national interests; Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That, unless within thirty days following passage of this joint resolution the government of the Democratic Peoples Republic of Vietnam indicates a genuine desire for peace in Southeast Asia by (1) the release of all United States prisoners of war and also (2) the large scale withdrawal of its fighting forces back within its own territorial limits indicating to the satisfaction of the President of the United States that their aggression is ended the state of war between the United States and the Communist government of the Democratic Peoples Republic of Vietnam which has been thrust upon the United States is hereby formally declared; and the President is hereby authorized and directed to employ the entire air, naval, and military forces of the United States and the resources of the Government to carry on war against the Communist government of the Democratic Peoples Republic of Vietnam; and, to bring the conflict to a successful termination, all the resources of the country are hereby pledged by the Congress of the United States.

SEC. 2. The sending of any ground, naval or air forces to the assistance of the abovementioned Communist government after the passage of this joint resolution will be regarded as an act of war against the United States itself.

## VIETNAM

## HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. LONG of Maryland. Mr. Speaker, in May 1968, Cpl. Gary Daffin, of Dundalk, Md., wrote a very moving letter to his mother in which he describes Vietnam and his own reasons for being there:

This country is so beautiful, it's hard to put into words. Winding rivers play touch with mountains that shoot up out of the valleys as if someone had come along and carved them . . . Small towns are spotted along the winding river that flows so gently towards an even bigger body of water . . .

Death is not uncommon in this country or in any other country. True, there's more during war, but men give their lives because it's what they believe in. This is what I want to put across. I am here because I believe in what I am doing. I believe in fighting for what is right. I would do it again if I had to . . .

I have only seven months left, but in these last seven months a lot can happen. I will be home, I promise that . . . to see all the loved ones again that I have missed so dearly . . .

There's only one more thing I wish to say and that is, that this country has two sunsets. It's so beautiful that it's beyond words.

I miss you all and will be home soon.

This was the last letter that Mrs. Daffin received from her son. In September Corporal Daffin died in Vietnam from wounds received from hostile mortar fire.

## MAKING CONGRESS MORE EFFECTIVE

## HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. STEIGER of Wisconsin. Mr. Speaker, the Committee for Economic Development released today its study of the Congress.

While the House has just completed its action on legislative reorganization the CED report entitled "Making Congress More Effective," will, I hope, give aid to the effort to get the bill passed by the other body.

Chapter 1 of the report, "Why Changes Are Imperative," outlines well the reasons for both this study and the actions of the House in passing the legislative reorganization title.

I commend this chapter along with the summary of the recommendations to all in both Houses for your study and attention:

CHAPTER 1. INTRODUCTION: WHY CHANGES ARE IMPERATIVE

This country is in the throes of change. Congress, like every institution, must respond to transformations wrought by science, technology, and education upon every aspect of urban and rural life. Business concerns of all kinds, universities, even religious organizations and the family are subject to continuous modification. There is now a rising insistence that government must also adapt itself to deal more effectively with new and challenging conditions.

As its burdens have grown in range and scope far beyond anything foreseen only a few years ago, a competent and vital Congress is more essential than ever before. The formulation of public policy is a joint responsibility shared with the Executive Branch, but in the final analysis it is Congress that adopts (or rejects) legislation that determines the health of the economy, the national security, the character of life both urban and rural, the condition of the environment, and levels of generational, racial, and other group tensions. The people of this country have every right to insist upon a responsive and effective Congress.

This Committee has recommended modernization—legislative, executive, and judicial—of state and local governments to permit them to solve currently pressing problems.[1] We have also called attention to the urgent necessity for better personnel, budgetary, and other management practices in the federal establishment.[2] Our concern in this statement is with the tasks and burdens of Congress, and with growing doubts about its ability to master them. Without improvements at all levels and in all branches of government the federal system cannot cope successfully with the swift pace of social, economic, and political change.

The quality of management throughout the federal establishment depends heavily upon Congress. The nature of basic legislation, appropriations, and legislative oversight can either impair an agency's effectiveness or make successful operation possible. Congress exercises powers in fields far beyond policy determination. It decrees organizational patterns, administrative standards, personnel arrangements, program priorities, and pay levels. The most able of executives cannot manage effectively without Congressional support. Congress is, therefore, the keystone in the governmental arch and deserves strong public support in its modernization efforts.

The Member of Congress has a very different job today from that of years past. Service is full-time, year-round, in contrast to the part-time approach of the early 1930's when, during the depths of a serious depression, Congress was in session only nine or ten months of each two-year term. The average Congressional district now contains more inhabitants than any of the original 13 states, except Virginia. The activities of the national government conducted in each district exceed those of the entire federal establishment throughout the administration of the first President. The range of knowledge expected of each Member expands steadily, while the burden of continuous campaigning grows. The hard work of dedicated Members commands sympathetic understanding and justifies a determined effort to eliminate needless workloads so that the energies of Congress may become more productive.

Each Member of Congress provides a channel for communication between the people of his constituency and the seat of government in Washington, D.C. There is a vital two-way flow of information—on governmental affairs to the citizenry and on public opinion to the nation's policy makers. Those aggrieved by actions of the bureaucracy or bewildered by governmental complexities may secure guidance from the Member in obtaining pertinent facts or finding the proper forum for a specific problem. In devising corrective measures, legitimate complaints form grist for the legislative mill.

Our primary concern in this statement, however, is with the functioning of Congress as a collective body. In this perspective, Congress has two primary responsibilities. One is to reconcile or compromise divergent interests so that the informed will of the people may find expression in legislation. The other is to review program execution and agency performance in order to check tendencies

[1] *Modernizing Local Government* (July 1966), *Modernizing State Government* (July 1967), *A Fiscal Program for a Balanced Federalism* (June 1967), *Reshaping Government in Metropolitan Areas* (February 1970).

[2] *Improving Executive Management in the Federal Government* (July 1964), *Budgeting for National Objectives* (January 1966), *Financing a Better Election System* (December 1968)

toward improper exercise of executive authority or perpetuation of obsolete programs. Both functions are indispensable, but Congress as it now operates is unable to fulfill either satisfactory.

Too many committees and subcommittees fragment broad policy issues into bits and pieces of legislation. There is inadequate communication between separate, independent power centers. The coordination essential to consistent and coherent decision making is lacking. Review of agency performance is badly subdivided and variable in quality, often focused upon trivia while neglecting evaluative inquiries into over-all achievement. Continuous feedback review of agency progress on approved projects and ongoing programs is the exception rather than the rule.

Congress has not brought its methods, approaches, or structures into conformity with the dynamics of change. Consequently—and regrettably—public attitudes toward Congress as a collective body are increasingly critical. The esteem accorded to individual Members cannot obscure widespread discontent with the institutional performance of Congress.

We believe that the growing difficulties encountered by Congress stem not from within but from new and powerful forces in a swiftly changing world outside legislative halls. The issues facing Congress today are far more challenging in range and intensity than those of 1900, or even of 1940. The difference in degree is of such magnitude that it has become a difference in kind. This is the basic justification for modifying the ways Congress has been doing its work and for the specific proposals advanced in this statement.

The changes visible in three primary fields of policy formation illustrate the critical need for better Congressional mechanisms to cope with the effects: (1) maintaining a healthy economy, (2) solving the interconnected problems of rural and urban America, and (3) setting policy for national security and foreign affairs. If the limitations of space permitted, other examples with comparable implications could be cited. None of these responsibilities can be adequately met within the existing framework.

EXPANDING RESPONSIBILITIES

Maintaining a healthy economy involves complex, interrelated issues including price levels, the availability of credit, interest rates, unemployment, the balance of international payments, and federal budgets. By adopting the Employment Act of 1946, Congress placed upon the government of the United States major responsibility for actions to sustain the health of the national economy.

The magnitude of this function grows geometrically from decade to decade. The annual gross national product (GNP), about $17 billion in 1900, now approaches $1,000 billion. Federal revenues were half a billion or 3 per cent of GNP in 1900 but are now $200 billion, 21 per cent of GNP. State-local expenditures, $1 billion in 1900, are over $100 billion. Federal-state-local debt was only $5.6 billion in 1916 and is $500 billion. Federal aids to state and local governments that were $7 million in 1900 are budgeted at $27.6 billion or 4,000 times as much today.[3] Per capita personal income has grown from about $200 in 1900 to approximately $3,500 in 1969, about three and a half times as high in *real* terms.

Complexity and interdependence have made the health of this expansive economy vulnerable to dangers different in many ways from those of the 1920's or 1940's. In recognition of this challenge Congress has strengthened executive capabilities by establishing the Federal Reserve System (1913), the Bureau of the Budget (1921), and the Council of Economic Advisers (1946). Congress gave approval in 1970 to reorganization of the Executive Office of the President involving establishment of a Domestic Policy Council and a revised Office of Management and Budget. These measures have given the Executive Branch greater ability to develop and coordinate comprehensive economic plans; there were no tools to build such plans in earlier years.

But Congress retains a vital role in these matters. Executive plans and programs lack substance without statutory confirmation, even though Congressional response often takes the form of modification rather than outright rejection or adoption. Yet except for creation in 1946 of its Joint Economic Committee (which lacks power to sponsor legislation), Congress has not equipped nor structured itself to deal coherently, consistently, or effectively with wide-range economic issues.

The condition of the national economy affects every citizen of the United States. Since the federal government has assumed major responsibility for that condition, Congress must organize itself and its procedures to discharge its resulting obligations properly and in timely fashion.

The "urban crisis" deserves high priority in Congressional deliberations. Concern is commonly focused upon grave problems typical of the central sections of the nation's great cities, but the urban crisis results, in a basic sense, from phenomenal changes in American agriculture.

Fifty years ago, 30 per cent of the country's population lived on farms; now less than 5 per cent do so. In other words, one-fourth of the whole population (or about 50 million persons) has shifted from farms to cities—most commonly to metropolitan areas—in the brief span of half a century. The basis of this migration is technology built upon research, leading to explosive growth in productivity.

Paradoxically, this triumph of technology has led to acute economic distress in rural America; the swift decline in farm population has had a catastrophic impact on thousands of rural trading and service communities. Almost every statistical indicator shows the rural population, both farm and nonfarm, at a serious comparative disadvantage: poverty levels, personal incomes, mortality and morbidity rates, and educational attainments. There is a "rural crisis," now in its sixth decade, paralleling the "urban crisis" and closely intertwined with it.

The migration of tens of millions of dislocated and disadvantaged persons from rural to urban America is reflected in the congested slums and ghettos of the large central cities, and the effects reach out increasingly to their suburbs. Most inner cities are plagued by poverty, high unemployment and underemployment, family disorganization, high crime rates, racial tensions, environmental hazards, substandard housing, high death and disease rates, and weak educational and transportation systems. In large metropolitan areas the contrasts between concentrations of disadvantaged minority groups in central cities and concentrations of privileged whites in suburban enclaves aggravate these conditions.

The public looks to Congress for solutions to the nation's ills, whether urban, rural, or suburban. The states, and the local governments which are their creatures, are theoretically responsible for corrective actions. But too often the states are operationally impotent to use their legal powers, and local governments are so handicapped by structural and fiscal weaknesses that very few communities are able to deal effectively with issues of such range and scope. The resulting vacuum has stimulated federal activity on many new fronts.

This activity has been fragmented among many agencies in the Executive Branch. In January 1969, President Nixon pointed out that:

"The American National Government has responded to urban concerns in a haphazard, fragmented, and often woefully short-sighted manner . . . What we have never had is a policy: coherent, consistent positions as to what the National Government would hope to see happen; what it will encourage, what it will discourage."

The Executive Branch is not alone in its need to reconcile and coordinate divergent policy interests. The Congressional committee structure subdivides responsibility for urban affairs to an extreme degree. This is visible in the functions of the 268 Congressional subcommittees, over half of which claim some share in urban policy issues. (See Appendix.) There is no central focal point in either chamber where consideration may be given to urban problems in their entirety, nor where a suitable allocation of available resources may be made.

The Congressional approach to the issues involved in rural decline has also been narrowly focused, in this case on agriculture as such. The Senate Agriculture and Forestry Committee and the House Agriculture Committee are mainly concerned with those farms that continue to operate. Together with the Department of Agriculture, they form a powerful triangular decision-making complex, with large-scale agriculture the chief beneficiary of some $4.5 billion in annual "farm income stabilization" payments. Meanwhile, scores of thousands of small "family farms" are abandoned each year. The collateral effects of farm out-migration are largely disregarded by this powerful farm triangle.

Other committees are concerned with various aspects of the agricultural transformation: the Appropriations Committees; the House Ways and Means and Senate Finance Committees; the Public Works Committees; the Interior and Insular Affairs Committees; the Banking and Currency Committees; the Labor and Public Welfare Committee of the Senate; and the Education and Labor Committee of the House. This partial enumeration goes far to explain the continuing lack of a comprehensive national policy for the improvement and advancement of life in rural America. Congressional committee patterns are no more designed to deal with the "rural crisis" than with the problems of the cities.

As matters stand, Congress cannot hope to formulate any overall program for the rehabilitation of either urban or rural America. Congress should make the structural and procedural changes necessary to devise policies designed to relieve the urban crisis and to foster and utilize the human and material resources of rural America more effectively. All Members, whether from metropolitan or rural districts, should share in development of these policies. Congress should not limit itself to piecemeal response to Executive initiatives in these crucial fields.

* * * * *

International security and worldwide economic interdependence confront Congress with a complex of problems new to the decades since World War II. The enormous peace-keeping operations of the United States, the swift growth of private investments abroad, the vast expansion in world trade, the growth of an international monetary system, the provision of development aid through national and international institutions, and much wider contacts through travel and communications have all brought home to Americans the vital importance of a constructive foreign policy.

[3] The comparisons shown should be read in full recognition of changes in the purchasing power of the dollar. It takes about $5 to buy what $1 would obtain in 1900, and the ratio is about four to one between 1968 and 1916. Many kinds of goods and services now in use were not available for purchase in 1900, or in 1916.

Continuous tensions have led this country over the past quarter-century to incur severe casualties, to spend over $1 trillion on defense, to assign to the Department of Defense title of land acreage larger that the combined areas of eight of the 50 states, to maintain 25 times as many men in uniform as in 1900, and to absorb in military procurement up to one-seventh of all value added by manufacturing. The implications of nuclear power place this nation's foreign relations and the quality of its diplomacy in a totally new context. The public interest ought never to be subordinated to special or parochial interests in fields of such importance.

The initiative here is in the Executive Branch, but the ultimate authority over foreign relations and military operations resides in Congress. Primary jurisdiction in these matters is divided among six separate Congressional committees; nine more play important secondary roles; and still others have marginal jurisdiction. These arrangements make it extremely difficult for Congress to fix coherent and consistent policies governing the nation's role in world affairs. The history of foreign aid legislation—both civil and military—presents one dramtic case in point. Continuing disagreements over various weapons systems provide others.

Any parliamentary body making decisions on such complex and critical matters is handicapped by a relative lack of expertise. Few, if any, Members can claim thorough personal mastery of the highly sophisticated subject areas upon which modern diplomacy and defense depend. Qualified and unbiased advisory sources in these fields are not readily available. Congressional limitations are magnified by comparable deficiencies at key leadership levels in the Executive Branch.

The President has access to few sources of expert advice outside the Department of Defense. The Bureau of the Budget has never been suitably staffed to subject Defense requests to the kind of intensive review applied to other expenditures. Congress has had to cope with Defense budget recommendations based almost entirely on personal negotiations between the Secretary of Defense and the President—without adequate staff or research aids to estimate the nation's needs independently. The public interest calls for judicious use of the $75 billion entrusted annually to the defense establishment. It is the joint responsibility of the President and Congress to make sure that security objectives are attained at the least possible cost.

The realities of American politics put pressures on Members to obtain economic benefits for their constituents from the flow of defense dollars. These pressures frequently operate against the interests of the nation at large. Public confidence is weakened by the selection process for membership on key committees. Members whose states or districts contain major defense installations or plants are often appointed to the Armed Services Committees or to Appropriations subcommittees concerned with defense. Hence, these committees tend to be dominated by Members whose constituencies are directly affected by the size and distribution of the armed forces, by the extent and nature of defense procurement, or by both. The fact that their constituencies have so great an economic interest in their decisions arouses great skepticism about the objectivity of these committees.

There is a primary need for Congress to consider diplomatic and military aspects of foreign policy in a unitary context, not as separate subjects. Furthermore, the public interest urgently requires structural and procedural changes that will check tendencies to foster local interests at the county's expense. At stake is, quite literally, the nation's survival.

SUMMARY OF CONCLUSIONS AND RECOMMENDATIONS

Facing issues or unprecedented magnitude and scope, Congress—like most other human institutions—is reluctant to modify its long-established, habitual ways of doing business. Continuing delay in modernization of Congressional structures and procedures, however, will surely be injurious to the national interest and can lead only to further erosion in influence and effectiveness of the Legislative Branch.

Recognizing the complexities and obstacles standing in the way of change, we have limited the recommendations in this statement to proposals designed to overcome weaknesses without undertaking a complete remodeling of the present system. No further reference is made, for example, to the possible substitution of multi-member for single-member districts in the House of Representatives, or to changes that would require amendment of the Constitution.

In the following chapters we advocate significant modifications that are both pragmatic and immediately practicable, dealing with three separate though interrelated fields of action. *First*, we urge fundamental improvements in the Congressional handling of fiscal-economic decisions. *Second*, we propose readjustment of the entire committee structure and of the procedures associated with it. *Third*, we strongly support divestment by Congress of inessential and unsuitable administrative burdens, together with other measures that would strengthen public confidence in its objectivity.

The present Congressional approach to fiscal affairs is indefensible. When budget decisions are extended long past the beginning of the fiscal year for which they are intended, when there is no Congressional mechanism to tie revenues and appropriations into a coherent pattern, when no legislative procedure exists to initiate actions based on a comprehensive view of the economy, then national stability is endangered. When Congress permits its evaluation and oversight of programs to be carried out in ways that allow the continuance of obsolete programs and the wasteful management of potentially useful ones, then both the credibility and the effectiveness of the entire national government are seriously harmed. To correct these conditions we recommend that:

Means for comprehensive review of the annual budget be established and used, relating total revenues and expenditures to the state of the economy.

Annual authorizations be discontinued; instead, authorizations should be made along program and project lines, fully funded, for minimum terms of four years.

Evaluation of program performance, in terms of objectives as well as dollars, be heavily stressed.

The federal fiscal year be changed to coincide with the calendar year, so that appropriations may always precede expenditures.

Congress establish and observe deadline dates for both authorizations and appropriations.

The committee system has the crucial role in Congressional decisionmaking. As it now operates, however, decisions are fragmented; problems demanding a broad policy approach are handled in piecemeal fashion and hence poorly by the many autonomous committees and their innumerable subcommittees. These committees carry out much of their work in obscurity or secrecy which can be and often is maintained—even against the inquiries of other Members—in defiance of the elementary tenets of democracy.

Through the assignment system that determines their makeup, and by means of restrictive procedures, committees can be dominated by small groups of Members with special interests held in common—or even by the desires of a powerful and autocratic chairman. These conditions prevent Congress from making open and effective response to urgent national needs. Therefore, we recommend:

Fewer standing committees, with broader jurisdiction for each.

Better use of joint and select committees.

More flexible subcommittee arrangements, with rotating chairmanships.

Abandonment of seniority as the sole criterion in selecting committee chairmen.

Democratized procedures, with many more open hearings.

Better informational and analytical resources for committees.

There is no doubt that there has been an erosion of popular respect for Congress. This is injurious to the nation as well as to Congress as an institution. Citizens are now insisting that every level and branch of government become more responsive, more open to the demands of all the people, more attuned to current priorities, and less bound by traditional approaches or endless red tape. In the face of these trends Congress has appeared to fold in upon itself. Its endless involvement with minor details of administrative management and its open and attentive solicitude for special interest groups contrast with its negative reaction to many concerns of the general public. Prompt action on several fronts is needed to restore public trust. Hence, we propose:

Relinquishment of detailed direction of all administrative functions unsuited to management by a legislative body or by any committee of such a body.

Stronger "Codes of Ethics."

Assurance of majority rule on major issues in both chambers.

Installation of modern voting procedures which would eliminate the secrecy surrounding teller, standing, and voice votes in the House of Representatives.

Thorough reform of campaign finance, with full disclosure and tax incentives for contributions.

Prohibition of committee meetings while sessions of the chamber are in progress.

Acceptance of these recommendations would do much to improve Congressional operations and to enhance the Congressional image. Fortunately, there are no legal barriers to their adoption; changes in House and Senate rules, modification of outmoded customs, or statutory enactments in some few cases, would suffice. The Members can make the necessary changes whenever the majority chooses. Congress has considered and debated many of them in recent years, so far to little or no avail. It is now time to correct obvious weaknesses. The defects of Congress are not congenital; its wounds are self-inflicted.

---

## VICE PRESIDENT KY ENTITLED TO FREE SPEECH

---

### HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. RARICK. Mr. Speaker, certainly no thinking American can find anything wrong with victory. That is why many concerned and informed Americans are wondering why all the frantic efforts to prevent and discourage Vice President Ky from attending the March for Victory in Washington on October 3.

Mr. Ky is the elected representative of a war ally for whose people's free-

dom and independence, over 50,000 American men have thus far given their lives. For certain, our men who so died would be repulsed to think that a leader of such an ally would not be enthusiastically welcomed and entitled to free speech in our country.

What can it be that the vocal few so fear from the message of Mr. Ky? Our people have been exposed repeatedly to the views, the ambitions, and the line of the Communist enemy at Hanoi through her dear American friends and experts. Why should our people not hear from an ally?

Some would suggest that this is the wrong time for Mr. Ky's appearance. Pray tell, with mounting American casualties each week, when is the right time to talk about ending the war in Vietnam? After all, ending a war by victory is also an alternative—in fact, it is one of the few alternatives that our leadership has never tried nor has set to pursue.

We of the United States have a Vice President who has been highly vocal and for his forthright speeches is admired by a great number of Americans. Why should not the Vice President of Vietnam be entitled to speak his piece as best he feels represents the feelings, fears, and frustrations of his people?

I agree with Mr. Ky's right to come to our country and be received with the respect due any sovereign friend or representative. In fact I dispatched a letter to him encouraging his visit and participation. Recently, I joined with 136 fellow Democratic Congressmen in an appeal to reason in condemning efforts to disrupt campaign speeches by President Nixon and Vice President AGNEW.

I am confident that if all sides of a question can be heard, the American people will decide wisely. Without a free exchange of ideas, there can be no free society. In such exchange lies the ultimate worth of our democratic system.

## NEW ENGLAND AND THE FUEL OIL MERRY-GO-ROUND: PAY HIGHER PRICES OR FACE SEVERE WINTER SHORTAGES

### HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. BOLAND. Mr. Speaker, a newspaper report this week indicates it is the aim of the American oil producers' lobby to hold New Englanders as hostages to force unreasonable fuel oil price increases during the coming winter, or allow shortages to develop which might result in cold homes, power shortages, closed schools, and disrupted industries with resulting job losses.

This cruel ploy was revealed by Columnist Jack Anderson in "The Washington Merry-Go-Round" printed in the Washington Post Tuesday, September 22, under the subheadline "Fuel Shortage." Columnist Anderson wrote of the latest oil merry-go-round that New Englanders can expect this winter as follows:

FUEL SHORTAGE

Industry officials have told Paul McCracken, the President's chief economic adviser, that coal, gas and oil prices should be permitted to rise sharply. Otherwise, they warned that producers would not have enough incentive to prevent fuel shortages across the country this winter.

McCracken heads an interagency task force which is investigating the threat of fuel shortages. This threat has been aggravated by the Middle East crisis and the antipollution campaign.

There's pressure upon building owners, for example, to burn low-sulfur fuel oil. The main source is the Middle East where Arab-Israel tensions have disrupted shipments. Utility companies have also held back construction of fuel plants because of the clamor over pollution.

Meanwhile, our natural gas reserves are dropping low. Gas producers are petitioning the Federal Power Commission for huge price increases, which they claim are necessary to encourage them to explore for more reserves.

A major strike or transportation tieup or severe winter could leave a lot of homes and buildings short of heat during the cold months ahead.

Mr. Speaker, the artificial and arbitrary oil import quota system has been studied to death over the years, and the only result has been price increases and annual threats of fuel oil shortages in the Northeast.

The time has come for the administration to take positive action to alleviate these twin threats which constitutes an unjust and inequitable discrimination against millions of New Englanders.

We do not need one more study while fuel oil prices escalate and our region struggles and suffers through another frigid winter. Past studies have produced nothing more than delay until the warm air of spring returns to evaporate the crisis, and then a decision is made not to tamper with the mandatory oil import quota program in the wholly unjustified and greatly exaggerated name of national defense.

Mr. Speaker, I again urge this administration to take action, as I did in a telegram to the President on September 9, by liberalizing the oil import quota for the Northeast region this winter in an effort to alleviate the twin threats of fuel oil price increases and shortages.

I ask permission to have my telegram included at this point with my remarks, and the September 10 White House response, signed by William E. Timmons, assistant to the President, together with editorials dealing with the fuel oil crisis facing New England, taken from the Springfield Sunday Republican of September 6 and the Boston Globe today, September 24:

SEPTEMBER 9, 1970.

President RICHARD M. NIXON
*The White House,*
*Washington, D.C.*

Respectfully urge you order Interior Secretary Hickel and Defense Secretary Laird take immediate steps that would assure homeowners and industries in Massachusetts and New England of adequate fuel supplies at reasonable prices during the coming frigid winter season. I suggest this can be accomplished by further liberalizing the mandatory import quotas on No. 2 fuel oil and the emergency release of Defense Department oil quota reserves. Shortages of residual oil and coal supplies has forced industries, institutions, and utilities to seek No. 2 home heating fuel, also in short supply because of Mid-East crisis and shortage of jumbo tankers to make long voyage around Cape of Good Hope to East Coast ports due to Suez Canal closure. The Federal Government has the power to relieve the people of Massachusetts and New England of this unjust burden on their comfort and their pocketbooks. The mandatory import controls on home heating oil are artificial and arbitrary. Existing lack of flexibility in their administration serves no legitimate national purpose, but merely constitutes an unjust and inequitable discrimination against millions of Americans in the Northeast. If these proposals are not implemented to alleviate the fuel oil crisis, the alternative will be oil rationing and price controls for New England this winter.

EDWARD P. BOLAND,
*Member of Congress.*

THE WHITE HOUSE,
*Washington, September 10, 1970.*

Hon. EDWARD P. BOLAND,
*House of Representatives,*
*Washington, D.C.*

DEAR MR. BOLAND: I would like to thank you for your September 9 telegram to the President regarding the national energy situation and the possible fuel shortage in the New England area.

A committee, under the chairmanship of Chairman McCracken of the Council of Economic Advisers, is now engaged in a study of all aspects of the fuel situation. We believe that the studies conducted by this committee will result in specific recommendations for administrative and, to the extent necessary, legislative action. You may be assured that a high priority has been assigned to this problem.

With cordial regard,

Sincerely,

WILLIAM E. TIMMONS,
*Assistant to the President.*

[From the Springfield (Mass.) Republican, Sept. 6, 1970]

FUEL-SHORT REGION

What may have been regarded in the past as a political agitation for lower fuel oil prices in the Northeast has emerged as something quite different. It is, obviously, not political and not a matter of cheaper fuel. The objective is fair treatment for consumers in the New England region, who face a shortage of heating oil at any price.

In the first of three regional hearings by the Governor's Emergency Commission at Springfield's city hall Thursday, public officials from the western counties colored the fuel picture black. Prices are rising sharply as supplies become scarce, it was reported. Industrial heating oil, on which much of the area's electric power supply depends, is in particularly short supply. Natural gas shortages are a problem for some industries.

But the pressure is also on home heating oil, the price of which has gone up—and which reportedly is being used by some suppliers to thin the heavier industrial oil. The prospect of fuel rationing in the coming winter, to say nothing of power brownouts, is disturbingly real.

Basically, the problem is a conflict between the interests of the domestic oil producers, who have been supported generally by both the Johnson and Nixon administrations, and the New England states, which have no oil refineries or gas supplies of their own and are remote from the production areas. The cost, and sometimes the inadequacy, of transportation has long been reflected in the high prices New Englanders have had to pay for fuel—and, indirectly, for steam-generated electric power.

Hopes of remedying the price inequity rose a couple of years ago when Occidental Petroleum Corp. announced plans to build a refinery at Machiasport, Me., which would process imported crude oil. But it was neces-

sary for the state of Maine to apply for federal authority to establish a free trade zone in that state to free the imports of customs limitations. Also, the company needed permission, under the federal oil import quota program, to receive shipment of foreign crude oil. Neither application has succeeded.

The entire proposal was fought strenuously by the domestic oil industry, which cited "national security" as one reason to protect the home market against competition from abroad. Another reason was that the development of yet-untapped oil reserves in this country should be encouraged.

While the administration has given lip service to abandonment of the 11-year-old oil import quota system—and indeed seemed ready to replace it with a stepped-up tariff program—the picture changed abruptly in mid-August. The key was the position of the President's oil policy committee, which first recommended replacement of the quota system, then reversed itself—apparently on the strength of "national security" in the light of the Middle East situation.

(The Department of Interior, reporting on a study done for it a year ago, said that with removal of the quotas the United States could store ample oil for emergency purposes at much less cost to the nation than accrues from enforcement of the quotas. The cost to Americans because of the quotas was estimated at $7 billion to $8 billion annually.)

For now, the only apparent hope of a fair deal for New England oil users is the pressure that can be brought on Congress and the administration by public groups, such as Gov. Sargent's Emergency Energy Commission and the Massachusetts Consumers' Council, by the region's own U.S. senators and representatives—and by private individuals and organizations throughout the region.

---

[From the Boston Globe, Sept. 24, 1970]

WE GET IT COMING—ON OIL

The quota-sheltered, tax advantaged oil industry is telling New England it may not be able to provide adequate supplies of fuel to keep power plants and industry running and schools and hospitals warm this winter.

The public is being asked to accept this state of affairs after paying artificially inflated fuel prices for 14 years under an import quota system whose purpose was said to be to protect the security of the United States' supply in the event of a national emergency.

New England's deepening energy crisis is credible evidence of the spuriousness of the national security argument and the bankruptcy of the system.

Hospitals, universities and municipalities are today without assurance of the availability, at any price, of enough residual oil to see them through the winter.

A shortage of low-sulfur fuel for the generation of electricity threatens the Oct. 1 deadline for imposition of power plant emission standards.

A 10 percent increase in the price of home heating oil is predicted for this winter, an increase above a price already too high because of import restrictions.

Of course, the situation is not entirely the government's fault. The petroleum industry apparently underestimated potential demand for its product, natural gas is in short supply, the Middle East war has produced a worldwide shortage of tanker capacity, nuclear power generation has not increased as fast as had been expected and the pollution issue has complicated the entire situation, both at sea and in the air.

Yet charges of misfeasance, malfeasance and nonfeasance seem fairly to lie against the government in this situation, and, in particular, against the Nixon Administration.

The misfeasance was in buying the phony oil industry argument on national defense in the first place. The current crisis proves that the quota system failed to guarantee a domestic emergency supply. What it did was and is to protect the price of petroleum products against competition.

Malfeasance is an adequate description of the President's shelving of his cabinet task force report and the inclusion of a freeze-in of the oil quota system in the trade bill now before Congress. The report recommended phasing out the quotas.

And nonfeasance is about the kindest thing one can say about the unresponsiveness of the Federal authority in a situation which threatens inconvenience, hardship and even, perhaps, health hazard to this region of the country.

It is to be hoped that the White House will grant Gov. Sargent and the other New England governors a speedy and sympathetic hearing on their complaints. Such a hearing would help dispel the suspicion that the Administration has more concern for oil lobbyists than for New England homeowners and hospital patients.

But more than dialogue is needed. In a time of economic troubles, continued inflation and rising unemployment, jobs and financial stability are at stake.

The House, clearly, should knock out of the protectionist trade bill now before it, the oil import quota freeze.

The President has the power, unilaterally, to lift the quota on No. 2 home heating oil, which is now in demand not only for home heating but in industry as a low-pollutant additive and alternative to the cheaper residual oil. The prospect of industry and utilities competing with home owners for the available supply of No. 2 oil should make the home and apartment owners literally shiver.

The Administration should act to make available every possible tanker resource now, including Navy vessels in mothballs, if only to try to drive down the skyrocketing tanker charges which are blamed for a 100 percent increase in the price of residual oil here recently.

The President should use his influence to prevail upon domestic producers to switch over some refinery production from gasoline and other lighter distillates to heating oil.

With prudent respect for environmental factors, Federal policy should be to encourage construction of refinery capacity in New England, the region of the nation most dependent upon oil for warmth in winter, industrial production and power generation.

Finally, the suggestion of a legal attack in the Federal courts, not excluding a grand jury investigation of possible anti-trust aspects and a questioning of the constitutionality of the oil quota system, is recommended to the appropriate Federal and state authorities.

It is too much to expect all of these things will be done. The discouraging thing about this very worrisome situation is that, as of this morning, none of them is being done.

That this region, annually should have to go begging to its government in Washington for relief from the economic discrimination imposed upon it by national oil policy is a disgrace. Should New England encounter the crisis in energy and heating predicted by some keen observers, its citizens will know where to place the blame.

---

## AMERICAN LEGION ASSESSMENT OF VA HOSPITAL CONDITIONS

---

## HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. BINGHAM. Mr. Speaker, recent press reports by CBS and Life magazine, among others, have focused public attention on conditions in our Veterans' Administration Hospitals. The Kingsbridge Veterans Hospital in the area of the Bronx, N.Y., which I have the honor to represent, was prominent in the controversy. I am pleased to see that one of the most prestigious and respected of the veterans' organizations, the American Legion, through R. B. Pitkin, the editor of the American Legion magazine, has undertaken to evaluate conditions in our Veterans' Administration Hospitals, including those at the Kingsbridge Hospital. I am impressed with the fairness of this evaluation, which closely corresponds in its conclusions to my own views. The American Legion magazine article, "The Truth About the VA Hospitals," follows:

THE TRUTH ABOUT THE VA HOSPITALS

(By R. B. Pitkin)

The American Legion has been getting distress signals from members asking if a story about the 166 U.S. Veterans Administration hospitals in the May 22, 1970, issue of Life magazine is accurate or misleading.

In a dozen pictures Life showed ten scenes in the spinal injury center of the Bronx VA hospital in New York and two in the Wadsworth VA hospital in Los Angeles. They are two of the oldest hospitals in the system, both rated inadequate by the VA and slated for eventual remodeling or replacement. Life's photos and much of its text portrayed callous neglect of paralyzed veterans, staff apathy, filth, rat infestation and disarray. VA patients were called "Our Forgotten Wounded," and Life said that to be put in a VA hospital was "An Assignment to Neglect." Paralyzed patients were shown lying exposed and mainly naked in open wards; stripped of privacy and dignity; left abandoned and undried in a shower; having to aid one another for lack of staff attention; lying with garbage pails beside what seemed to be their beds; or left helpless for "up to four hours" to be attended for enemas. This story overgeneralized and misshaped a real situation that is neither good nor typical of VA hospitals. As a generality, it better fitted the pre-WW2 VA hospitals, then run as a civil service bureaucracy that was scrapped in 1946. The Administrator of the VA, Donald E. Johnson, of Iowa, advised Life's editors that the photos were staged. Life denied it, and "staged" might suggest actors and false settings. The patients were real and the hospitals were real. But nurses, aides and patients in the spinal injury center of the old Bronx hospital have described some posing, arranging and miscaptioning, if not "staging."

Life's cover photo showed a forlorn patient sitting slumped forward and unattended in a wheelchair, hair hanging over his face, stripped to the waist in a dingy ward—the picture of despair. This view was shot once, says one nursing aid, when she was giving the paralyzed patient a bed bath. She was interrupted to have the patient posed alone before she could put on his jacket and comb his hair. But another employee says that the published photo was taken on another occasion when the patient was in the midst of being dressed, then pictured without his attendant. It appeared under the heading "Our Forgotten Wounded."

A two-page photo of the same patient, alone and apparently abandoned in a shower, was captioned ". . . waiting helplessly to be dried." He was waiting helplessly while a Life crew interrupted his shower, according to his attendant. The attendant said he was shampooing the patient when he was asked to step aside for a picture of just the patient. Two other attendants confirmed that description. Several patients said that being

left alone in the shower would be a rare thing.

Patients who were in the enema room of the Bronx hospital, where paralyzed patients who have lost the nerve responses of their colons must sometimes lie for hours on "Stryker frames" for an enema to work, described some other photos in the taking. An employee said that the picture-taking crew hauled a garbage pail away from a curtained corner and put it by one of the patients dozing on a Stryker frame, whose curtain was not pulled around it. The photo crew, said one patient, moved a garbage pail lid and added refuse to the pail. The patient on the near frame said he awoke to find a strange wheelchair patient offering him a cigarette, one garbage pail heaped and placed by his frame, and cameras snapping. As the photo appeared, the cigarette scene seemed to reinforce the idea that the patients could not get staff members to light cigarettes, while the garbage pails supported Life's phrase "a medical slum." Another patient said that he was awakened on his Stryker frame with an offer of a cigarette, but explained he didn't smoke. Life's caption said that these patients were "awaiting treatment" and "because of overcrowding, they must share a corner with garbage pails," and did not identify it is the enema room.

They were not awaiting treatment. The patients on frames were waiting for their enemas to work. The man offering the cigarette seemed to be truly crowding the scene and he was apparently invited in by the photo crew to offer the cigarette. The garbage pails were in the enema room because they have to be, to receive its unpleasant product which is then removed by the housekeeping department of the hospital. But some say they also collect general ward refuse.

Another Life photo heightened the idea that if the patients don't tend to one another, nobody will. It showed a wheelchair patient throwing a sheet over a bed patient, and Life explained to its readers that ". . . a totally crippled patient must depend on a buddy who still has the use of his arms to get a sheet thrown over him." When the picture appeared in Life the "totally crippled patient" was dismayed. He has been a paraplegic for 26 years, has full use of his arms, lives alone in an apartment, is able to take care of himself, and was then in the Bronx VA hospital temporarily for ulcer surgery. The sheet throwing, he said, was horseplay indulged in at the request of the photographer. He said he did not want a sheet and could have gotten one if he did.

Life said of quadriplegic patient Marke Dumpert, who was featured in many of its photos, that "Dumpert hopes to finish high school, and has a dream of becoming a lawyer, despite his disability. But his will to struggle has been seriously impaired by neglect and frustration."

From this it is not apparent that the Pronx VA hospital has a five-man educational therapy department or that about the time the Life story appeared Dumpert was completing six months of instruction in grammar, literature, math, social studies and science under blind staff instructor Anthony Aliverti. Dumpert sailed through with no grade under 90. He has received his New York State High School Equivalency Certificate and had admission applications in with several colleges last spring. He has learned to type and to turn pages while reading, using a mouth stick.

On these pages and on our cover are shown pictures of 41 of the VA hospitals, and there 125 more, with new ones going up. No view, either accurate or distorted, of just one section of one hospital can well serve readers as either a good or a bad portrait of the whole system. The spinal injury center in the Bronx is about 1/1250th of the whole.

The VA hospital system today is made up of (1) the dwindling remains of an old, pre-1946 system, and (2) a growing new system of some of the finest hospitals in the world.

Starting in 1946, the new system began to replace the old. In 25 years, 82 brand new hospitals have been added, either as additions or to replace older hospitals. These are, without exception, magnificent. During the same period, 31 of the older hospitals have undergone modern additions and renovations. A total of 106 of the new and the improved hospitals are rated "adequate" by the VA. It is a modest use of the word. Few if any community hospitals can match them in either their facilities or the quality of medical care they give. They are on a par with, or superior to, the hospitals of the great medical centers here and abroad. Sixty hospitals in the system are rated "inadequate" by the VA. Of them eight are rated as "obsolete" and are in line, with six more of the "inadequates," for the speediest replacement possible under the ponderous legislative and budgeting pace of the Congress. Replacing these 14 is a project that will stretch well into the 1980's at the present pace.

The Bronx hospital is among the 60 "inadequates" but not among the eight "obsoletes." It is well located for patients and to command the services of good doctors. It is poorly located to attract nurses, nursing aides, attendants, and others whose VA pay has not been up to the high living costs in New York City. The building's interior is a fright as a piece of hospital architecture. It was built as a huge Catholic orphanage between 1901 and 1903. It was taken over as a veterans hospital in 1922, and D Wing was added in 1940. Of nearly 1,000 patients on any one day, from 90 to 95 may be spinal injury cases. It is a general hospital, and includes psychiatric and tubercular patients. None of the staff there is "neglecting" the patients, but the interior design heaps inconveniences on the whole staff, which is seriously shorthanded.

The devotion of this staff, from Director Dr. Abraham M. Kleinman, down, while working shorthanded . . . working shorthanded in an antiquated building never designed for hospital use, impresses everyone who comes to take a fair look. An aide to Senator Bob Dole, of Kansas, who went there to double check the Life story, put it in a nutshell in a brief report saying that the staff was absorbing the chief punishment of the hospital's handicaps and sparing the patients from most of it.

Many of the paraplegic patients (legs paralyzed but arms normal) speak well of their care there. Life would have rated undiluted applause had it stuck to a valid point it made about the need for more help, especially for quadriplegics, instead of charging neglect at the hospital and identifying exaggerated Bronx conditions with the whole VA system. A quadriplegic cannot move from his neck down, and there is no way that a staff can absorb the punishment that undermanning inflicts upon quads. They must literally ask to have their noses scratched, to be rolled over in bed, to be attended for every least thing. They need attendants to do for them the little things that the un-paralyzed do for themselves without even thinking about it. Lacking constant attendance, they do not merely suffer physical discomfort, but mental torment. To be a beggar to have your nose scratched when it itches is not just itching. To have to wait even five minutes is humiliation at your helplessness.

On these pages we show a photo of John Pearo, in the Bronx hospital, a quad except for slight use of his right hand. He was provided with an electric wheelchair, with a control in his right hand. Nurse A. T. Campion, RN, who served five years on the famous international hospital training ship *SS Hope*, asked him if he'd run his wheelchair for our camera. He tooled up and down the hall, zooming from within a fraction of an inch of one wall to a fraction of an inch of the other, wreathed in smiles. "What did the chair mean to you?" asked Miss Campion. "It gave me my liberty back," he told us. "Before then I had to scream for everything." Marke Dumpert, who cannot use either hand, now has a wheelchair run by a microswitch in his mouth.

There were not enough people in the Bronx VA hospital over the last two years to give the quads the full attendance they need, thanks jointly to a staff reduction harking back to the 1968 budget, and to recruiting problems in New York. Congressional committees got going in 1969 to raise the budget, and President Nixon pledged himself to an increase in budget and more staff last April 2.

The problem of more help is not an easy one to solve. The VA pay scale for various attendants is good for many areas of the country, but low for New York and other metropolitan areas where living costs are high. Most of the Bronx employees stay on more out of dedication and the satisfaction of the kind of service they are rendering than for the financial rewards. The place is seriously undermanned for the evening and night shifts, partly because of the difficulty of recruiting at all, partly because of unattractive hours, and partly because of insufficient budgeting by Congress.

The American Legion, other veterans organizations, and many members of Congress have loudly insisted on more adequate operating budgets, particularly for personnel and the putting into use of new medical equipment. In the May issue of this magazine, National Commander J. Milton Patrick asked every Legionnaire and Legion Post to write their Congressmen to ask them to support "sufficient VA funds to keep the high quality of care that has been famous for 20 years." He advised Legionnaires that "the start of decay" was showing "due to repeated cutbacks in staff . . ."

There is no way of knowing how many Legionnaires and Posts actually wrote to their legislators. Congressmen badly need evidence of grass roots support in order to front for an adequate VA budget.

Over the years, the American press has been largely apathetic or hostile to VA appropriations, and has either supported cutbacks or failed to oppose them. Some of the roots of the present difficulties within the system hark back to 1965, when President Johnson ordered a large-scale slash in the VA hospital system. The veterans organizations and many members of Congress bitterly opposed the order, and within six months President Johnson rescinded half of the slash, while putting the other half into effect. Thereafter, he supported many veterans programs, and initiated beneficial legislation, though he presided over a 1968 staff cutback that is the main cause of the present problems.

An examination of Life's issues during the six months battle in 1965 shows that it was editorially silent on the whole issue. This could be called a form of "neglect" by the press, but at least it wasn't hostility. The New York Times and some other major newspapers supported the cutbacks and characterized the opposition to them offered by the veterans organizations with the usual cliches about greedy veterans. With year-in-year-out apathy and hostility in the more influential press, it is not surprising that it is extremely difficult for Congressmen to do right by disabled veterans in the annual tugging and hauling over the federal budget. All who care should give them tangible support, which costs 6c postage.

Congress should, but seems unwilling to, take a step that would especially help situa-

tions like that in the Bronx. It should recognize differences in local living costs, and permit hospital pay scales that are pegged to a local cost-of-living index. Wherever living costs are high, VA hospitals are seriously handicapped in recruiting needed staff. With many categories of good hospital personnel in short supply everywhere, the inability to be competitive locally is a drawback to a hospital which is immediately reflected in what it can do for patients.

Much closer to the Time-Life Building in New York than the Bronx hospital is the magnificent Manhattan VA hospital, opened in 1954. It was not represented in Life's story, but it is one of the finest general hospitals on earth. Its competition for that ranking includes many of the other newer VA hospitals. But, as its Director, John Sheehan, told this writer, it is the very devil to recruit some of the needed people.

"Private hospitals simply raise the rates they charge to patients and pay what they have to for help. We are tied to a nationwide pay scale, which is pretty good in some places but not here in New York," Sheehan told us.

Nevertheless, the Manhattan hospital has to be seen to be believed. We accosted a patient in one of its sparkling halls who was just up and about after eye surgery. "Do you have any complaints about this place?" he was asked. He exploded, "Anyone who complains about this place ought to be kicked out!" We then identified ourselves as the editor of this magazine and gave him a chance to voice any gripe to 4½ million readers. He identified himself as Lawrence McShay, of Towaco, N.J., a 71st Infantry Regiment veteran of the WW2 European theater. "I mean it," he said. "Everything about this hospital is fantastic. It's my second time in. I was here three years ago, on my deathbed with pneumonia and complications, and these people saved my life." It says something when an infantryman of any war passes up a chance to gripe.

When Life accompanied its gloomy, special-effect photos with its message that assignment "to a VA hospital" is an "Assignment to Neglect," the copies circulated in Vietnam created in some of the servicemen there a dread of ever having to go to a VA hospital. Perhaps McShay's belligerent defense of the Manhattan hospital may reassure them. Certainly any veteran or serviceman who either must or may go to a VA hospital some day should not be given a bogie-man image of what awaits him there. Needless fear of the institution is not good for someone who is already sick or disabled. One's own spirits and outlook are an important part of restoration to good health, while dread and fear make sickness and disability worse.

Even the gloom of the old Bronx building and the burdens caused by its undermanning are pierced by the tenderness and devotion of the overtaxed staff, the good humor of many of the patients and their appreciation of the excellence of their medical care and training in the face of handicaps. One of the quadriplegics there who was featured in Life is back at his own request after having been transferred to another hospital in a better building.

Richard Carter is shown here in completely candid and undirected photos on pages 8 and 9 as he helps paraplegic Matt Raible break his standing-up record after two years off his feet. Carter has been a corrective therapist in the spinal injury center at the Bronx hospital for eight years. "The pay isn't too much," he says, "but helping these fellows gives you satisfactions that are hard to find in other work." Carter looks as if he might have passed up the world heavyweight championship, he is so burly and powerful. But the tenderness with which he helps Raible shines through in our candid photos of their regular exercise session of 11 a.m., June 24.

Equally attentive to the patients is Carter's corrective therapy teammate, James Ford. On page 10 we show a posed picture of Ford exercising paraplegic Thomas Gary. The photo is posed because Gary insisted that we pose it, so proud was he of the care that Ford gives him. Beside it, we show an unposed picture of Ford putting another paraplegic through his arm-exercise paces. Ford holds up the patient's useless legs while the patient builds up his arm and abdominal strength with pushups.

Vietnam servicemen may believe a statement in Life, attributed to Marke Dumpert, that even the GI humor that men can indulge in under fire is impossible in the Bronx hospital. In Life's photos of Dumpert he appears as a tired, dispirited man. In his shower room photo he seems to be at least 40 years old. In its cover photo where his dressing was interrupted he seems forlorn and forsaken. On page 11 we show an unposed photo of Dumpert who has just cracked a joke about the Marine Corps that set the corrective therapy patients and staff roaring with laughter. That's what Carter and Raible are laughing at in the first photo of them on page 8. Dumpert is actually bright, alert, 21, good-looking, well groomed, and, when not depressed by his terrible injury or the shorthandedness of the hospital, has a sharp sense of humor. He participates in many of the regularly scheduled parties and special events that the Bronx hospital puts on for its spinal injury patients. Thus on May 22 he was one of a party of six who were taken to Aqueduct for a day at the horseraces in a special bus with a hydraulic lift which is regularly used to take the spinal injury cases on outings in the New York area.

None of this is said to make the life of the spinal injury cases or the old Bronx hospital a bed of roses, but simply to tell it as it is, in balance. It is nothing short of a shame that these patients, especially those who cannot use their arms, do not have more attendants—but it is preposterous to pretend that they are "assigned to neglect" or that life is better under fire in Vietnam than in a VA hospital. What is better is to be whole rather than disabled, a fact without bearing on the VA hospitals.

Two other statements in Life that could dismay a prospective VA patient need attention. One was that a totally paralyzed veteran had lain on one side in bed without anyone coming to turn him over from 6 a.m. to 4 p.m. In that period there is a mandatory full day's schedule to be carried out. The statement could only have referred to the refusal of an emotionally upset patient to let anyone touch him (which *has* happened) and not to a refusal of the staff to offer help. The daily routine at the Bronx, as in all hospitals, gets under way at what often seems an ungodly hour of the morning for many patients. Nobody lies in bed unattended all day except at his own insistence. And when that happens it is a staff emergency than can go all the way up to the director if the head nurse cannot persuade the patient to accept care.

And again, Life said of the enema room for spinal injury cases that "patients wait up to four hours to be attended by a single aide." Things are not that bad. The whole enema process for patients with nerveless colons is a tedious, unpleasant bore for patients and attendants alike, due to the nature of the injury. Four hours is maximum for the whole process, from being wheeled to the enema room to being returned to bed after a shower. Most of this exasperating time is spent lying on the Stryker frame waiting for the enema to work, a process that not Life, Congress or the VA can speed up. Nobody waits four hours, or three hours or two hours, or one hour "to be attended" for an enema. Two to 3½ hours is more common for the entire process. The quads learn to doze off or fall fast asleep while on the frame, as two of them have stated they were doing when awakened by the Life crew for the garbage pail, cigarette-offer scene. According to several Bronx patients, the worst delay while *awaiting* an enema is not traceable to staff neglect, but to the slowness of the enemas of those ahead of them to work. A nerveless colon does not react normally.

Just as the revolutionary successful treatment of tuberculosis with drugs was a VA development, so the Veterans Administration is largely responsible for the enormous advances of the last quarter-century in the care and training of paraplegics, quadriplegics, and amputees. Most WW1 quadriplegics were dead within five years of the war. Many WW2 quadriplegics are going strong today after 25 years. Nobody has ever found a way to restore the severed nerves of a broken spine. The VA cares not only for war-disabled paraplegics and quadriplegics, but for war veterans who suffer such paralysis in civilian accidents, or from polio or other causes, if they cannot afford their own care (which is astronomical in cost). It returns all of them it can to private life outside of the hospitals, and trains them for a way of life if possible. The war-disabled spinal cases receive a current $400 a month for 100% disability, plus several hundred extra dollars in awards allowed by law because of the special severity of their injuries. Their physical retraining, special equipment, medical care, and further education are free, and special housing and automobiles are provided where applicable. There are other forms of four-way paralysis, such as that caused by multiple sclerosis. If a totally paralyzed service-connected multiple sclerosis case has a family who will keep him at home, the Manhattan VA hospital, for instance, will provide special equipment and send therapists up to 60 miles to their homes to train the family in the ways of care and to keep an eye on the condition of the patient. It will pay a non-VA therapist to do the job if the veteran lives off the beaten track of its own therapists.

Though the VA is doing things like this, and more, and is still in the forefront of world medicine, it is nevertheless hurting.

There has been a steady attrition of staff in the VA hospitals for several years. Without a murmur of protest in the press, the VA medical appropriation as passed by Congress in 1968 required a cutback to the 1966 levels. It was achieved by failing to replace thousands of employees who quit, were discharged or retired.

That made a belt-tightening inevitable, since the influx of new patients from Vietnam service guaranteed an increase of new patients over the 1966 levels.

We wish we could report that Life or any other medium of national influence had spoken up on behalf of a better medical appropriation in 1968 when the damage was done.

An attempt to increase the present VA medical budget failed in Congress last November, and again we can find no word of protest at the time in the media. There was plenty of protest from the veterans organizations and some of the key leaders in veterans affairs in the Congress, including committee chairman Olin E. Teague in the House and subcommittee chairman Alan Cranston in the Senate, as well as from some of the VA medical and administrative staffs.

Last April 2, more than a month before Life's story appeared, President Nixon told the press that he had approved an increase of $50 million in his VA medical care budget for fiscal year 1971—which would make it $210 million more than for 1970—and that he had authorized VA Administrator Johnson to ask Congress for an extra $15 million for

the remainder of the 1970 fiscal year. Mr. Nixon gave the background to the press in some detail on April 2. He cited the 1968 cutback and said bluntly that it "deprived the VA's medical care program of several thousand workers in all categories of the health service professions at a time when the VA requirements for such personnel were growing steadily."

VA chief Donald Johnson was the Legion's National Commander in 1965, and led the Legion's fight against the cutback of the VA hospitals of that year. Mr. Nixon named him to head the VA in June 1969. Nixon told the press on April 2 that, after 10 months in office, Johnson had reported to him that "additional funds are required immediately if the VA is to meet its obligations to veterans requiring medical attention."

The President told the press specifically that the VA has not had the funds to open and operate enough treatment centers for the amputee and spinal injury cases coming from Vietnam, where helicopter airlift and rapid evacuation is saving many who would have died on the battlefield in earlier wars. He told them that in two separate actions he had authorized a total increase of 3,500 employees for VA medical operations, perhaps most of whom were only paper additions, due to lack of funds, until June 30.

The VA hospitals have many of the most advanced treatment centers—coronary intensive care units; cobalt cancer radiation units and even three linear accelerator high voltage radiation units that are a step beyond the older cobalt units; organ transplant centers; pulmonary emphysema units and artificial kidney (hemodialysis) units which keep patients with failed kidneys alive by "cleaning" their entire blood supply twice a week.

Many of these units have long been in operation. Some fine equipment is new but unused for lack of current operating funds. John Andreola, of the staff of this magazine, visited the Bronx hospital last winter where Director Kleinman showed him new equipment stored in crates. Congressional committees in both houses have reported more such unused equipment around the country. President Nixon told the press on April 2 that he wanted to put this equipment into use and open up more special care centers, and what was needed was funds. He pointed out that the VA has to get moving faster in these areas not only for veterans but for all Americans. Acting in partnership with many medical schools and medical centers, it has a leading role in the development of new techniques and new equipment that benefit all medical practice.

The austerity caused by the 1968 cutback to 1966 operating levels has slowed the progress of the VA's celebrated medical research programs, according to conversations that American Legion National Commander Patrick has had with the professionals of many of the hospitals. This adds weight to the President's comments about getting medical advances cracking again as well as more help for overworked patient-care staffs.

Life was silent on the President's press conference, was silent on Johnson's report to the President, was silent on Nixon's projection of VA needs and the need for funds for them. It did not mention that the Administration was seeking new funds for 1970 or 1971. It mentioned a possible increase of $122 million by Congress for next year and was silent on Nixon's proposal to make it $210 million while $15 million more should augment the VA budget for the dying year.

Congress granted the extra $15 million for the old year, and by June 30 the first 1,000-odd of the new staff members that the President sought were being hired. Rep. Teague in the House and Sen. Cranston in the Senate, with their respective committees, had, along with the veterans organizations, been working hard on an appropriations increase for more than a year.

When President Nixon's April request for an extra $210 million for 1971 over the original 1970 VA medical budget reached the House, the House passed it with an additional $25 million tacked on by Teague. In the Senate, Cranston's committee added another $80 million, and the Senate approved it. At this writing the House and Senate are scheduled to come together to agree on a final figure. If the whole package goes through it would be $315 million over 1970. The VA says that would allow it to add more than 5,000 to its hospital staffs. This should help upgrade the operating performance of the hospitals tremendously.

Perhaps the climate created by Life's article may rate some of the credit if the whole $315 million increase survives the usual tendency to compromise House-Senate-Administration differences at a lower figure. We live in an age when exaggeration seems to get more results than a balanced view of things.

The renovation or replacement of the 60 "inadequate" hospitals is another matter. It moves slowly, so much is involved. There are hospitals in the system whose need of replacement is both more urgent and simpler than that of the Bronx, and new construction is going on all the time. The San Juan, P.R., and Long Beach, Calif., hospitals are brand new. The old Hines hospital, just outside of Chicago, became completely outmoded. A brand new Hines hospital will probably open up when you read this, or shortly thereafter. The Hines hospital on our cover is the new one, and it should take in its first patient by October at the latest, to be a sister to the magnificent Chicago VA hospital. A new hospital is going up in Tampa, Fla. It ought to, and may, absorb the patients of the old Bay Pines hospital in St. Petersburg, a few miles away.

In many respects, the St. Petersburg hospital is worse off than the Bronx. It is not air conditioned—which makes it beastly in the Florida summer—and it is better located to attract retired doctors than those in active practice, while the Tampa hospital will be tied as a partner to an existing medical institution. St. Petersburg could more easily be renovated to become a VA nursing home, and it may.

Two hospitals new to the system should open in Columbia, Mo., and San Diego, Calif., next year. The Northport, N.Y. and the Lexington, Ky., hospitals will also probably be replaced before 1971 ends. A 250 bed addition to the Seattle hospital is due soon, as is a major addition to the San Francisco hospital. General hospitals at Martinsburg, W. Va., Richmond, Va., Temple, Tex. (its old section), and Vancouver, Wash., are rated obsolete, as are psychiatric hospitals at Augusta, Ga., Gulfport, Miss. (badly damaged by hurricane Camille), Marion, Ind., and Sheridan, Wyo. Plans to replace all of these by 1980 or before, are in various stages. The Richmond replacement has the needed financial OK. Site selection—no simple matter—is being worked out for Richmond. Bids are out for a new hospital at San Antonio.

Vancouver is an example of an "inadequate" hospital with a higher priority than the Bronx. It too is old. It is also poorly located for the best medical practice and not centrally located for the potential patient population. The VA has insisted since 1946 that it wed all of the hospitals it can to a medical school or center, though this is not possible in some areas. It is these partnerships, more than anything else, that raised VA care quality from perhaps the worst in the country to world leadership over the last 25 years. The Army more often places its hospitals for its convenience. Since it commands its own personnel it can take the staff wherever it wishes. The Vancouver hospital was inherited by the VA from the Army. Its replacement, though only in the talk stage today, will probably be located more centrally in the Vancouver-Portland population area.

The Bronx hospital benefits by affiliation with Mr. Sinai Hospital medical school and the Columbia U. dental school. The Manhattan VA hospital is tied to the NYU medical school and the city-owned Bellevue hospital, which is operated by NYU under contract. These three institutions, all physically together, attract a concentration of skilled doctors in all specialties and jointly formulate teamwork in practice and medical policy-making.

The huge Bronx building is a puzzler. VA engineers say that the outer shell is perfectly good, and the insides could be torn apart and restructured to make a fine modern hospital. There are few other land sites in New York, if any, that are as conveniently located except at huge cost. So far nobody has any answer to the question: What would you do with 1,000 Bronx patients during the time the insides were ripped out and rebuilt? In the New York area the Brooklyn hospital (another splendid one), the Manhattan hospital, and the fine East Orange, N.J., hospital could hardly take on the Bronx patients for a couple of years even if they shared the load.

There is reluctance to find some less perfect site for a new hospital and close out the Bronx, though in VA gabfests some say that seems the only choice. New York's Castle Point hospital, not far away, is another old one that is due for renovation or replacement, though plans are vague.

Of 31 older VA hospitals that were modernized rather than replaced in the rebuilding that started in 1946, all but seven are rated "adequate" today. Of the seven that are not, perhaps the Wadsworth hospital in Los Angeles is most critical. In spite of a modern addition since WW2 the whole thing is now rated "inadequate," and its older section hardly belongs in such a fine system.

It's clear that before the last 60 hospitals of this huge system are made completely modern a big pile of money must be spent, and each and every one of them will have to fight its way through the annual federal budget debate.

The future construction on which the VA is actively working or specifically planning today has a present estimated price tag of $250 million, spread out from now into the 1980s. It's anybody's guess that with the way costs are going that could double before the work is finished.

During 1969 alone, seven new hospitals were under construction and six, not yet started, were authorized.

Referring to the entire VA hospital system, Life said that its "standards are far below those of an average community hospital" and rated its facilities for long-term treatment and rehabilitation of paralytic injuries as "generally inferior." The VA's hospitals in general are vastly superior to the average community hospital, while the VA is excellent in its long-term treatment and rehabilitation of paralytic injuries by perhaps one or two highly specialized institutions with limited capacity.

There is not a specialty in medicine practiced in the VA in which it is not accredited by the corresponding professional medical group. Nor is this surprising, in view of the partnership established by the VA with leading medical schools and medical centers starting in 1946.

It was not always so. In 1922 the American Legion National Convention asked that the veterans hospitals be wedded to the great medical schools. It was an idea whose time had not come, and the VA hospitals developed between 1922 and 1946 as a closed system of bureaucratic medicine, with doctors on civil service. It was totally unsatisfactory, locking veterans care in the backwash of American medicine.

In 1945, Earl V. Cliff (who died early this summer) revived the idea of tying the VA hospitals in with leading professional institutions in a conversation with Dr. J. A. Pringle, head of the St. Cloud VA hospital in Minnesota.

Cliff, a practicing lawyer of Ortonville, Minn., was an American Legion volunteer rehabilitation leader in Minnesota and nationally. The idea of a medical wedding took fire in Minnesota in 1945–46, and soon Cliff (as the chief catalyst) and Dr. Pringle enlisted the support of the late Dr. Charles Mayo, of the Mayo Clinic; Dr. Harold Diehl, Dean of the University of Minnesota medical school, Dr. Paul Magnuson and others in Minnesota.

Dr. Diehl got his university's consent to team up his medical school with the Fort Snelling VA hospital if Congress and the President would revise the VA system to permit it.

Dr. Paul R. Hawley was then VA medical chief. He was later a director of the American College of Surgeons and head of Blue Cross-Blue Shield.

Using his Legion contacts, Cliff asked Dr. Winfred Rountree, head of St. Elizabeth's Hospital in Washington, to propose the idea to President Truman. Dr. Rountree had been the Selective Service medical chief in WW2. Gen. Omar Bradley, then briefly the head of the VA, called in Dr. Paul R. Hawley to hash the idea over. When Hawley endorsed it, Truman named a special medical committee to make final recommendations, including Dr. Mayo and many of the others named here. Mayo, Rountree and others also served concurrently on the Legion's medical advisory committee. The new system went into effect swiftly. In August 1954 Dr. Mayo, writing in this magazine, described the great transformation in these words:

"Nine years ago the Veterans Administration voluntarily abandoned the bureaucratic idea of medicine, which had failed to achieve medical leadership and could not have cared for the large number of disabled veterans of WW2. . . .

"The remarkable change in VA medicine since then has come about because it has been running away from 'bureaucratic' medicine as fast as it could. For the care of its veteran patients, for the conduct of its new education and research programs, and for the formulation of its medical policy, the VA asked Congress to write a new law to let private medicine assume a huge role in the VA.

"Today, 92 of the VA's hospitals are affiliated with 72 of our leading medical schools and clinics. The schools appoint Deans Committees from their staffs to help guide and formulate VA medical policy.

"To create national VA medical policy, the VA depends largely on two committees of independent physicians, totaling fifty leaders in medical specialties.

"Thousands of nongovernment doctors take residencies in VA hospitals to qualify for specialties, and VA has already contributed to the education of more doctors than are on its full-time medical staff.

"Thousands of independent doctors work on a consulting basis in VA hospitals, caring for patients and guiding medical policy.

"Most of the 4,407 full-time VA doctors are now members of the American Medical Association, while more than 11,000 nongovernment doctors participate in the program of the VA hospitals. . . .

"The whole inspiring story of VA medicine since 1946 is a brilliant example of the American way to solve enormous problems—a story of the voluntary teamwork of all concerned to accomplish what neither government nor private monopoly could ever accomplish alone. . . .

"I am proud of the care we are now giving our veterans. Some of my pride is personal, because I played a small part as one of the outside physicians who were invited to aid the medical program for veterans.

"More of my pride is professional. Our hospitals for veterans have helped raise the standards of my profession.

"Part of my pride is patriotic. I am proud that my country and the men of my profession have not forgotten, in peace and security, the awful obligation that we placed on millions of boys and young men in the prime of their lives, when they stood between ourselves and national ruin—and stood well. It is fitting, in time of peace, that if they now stand on the brink of ruin through failing health, we as a nation do not entirely forget them."

That was said by Dr. Mayo in 1954.

The essential problems of VA medicine in 1970 are two in number.

The first is to finish modernizing a system in which 106 hospitals are superlative while eight are obsolete and 52 are not fully up to the VA's exacting standards. To this end, construction is continually under way—which is not to say that good medicine cannot be and is not practiced in old buildings. In fact, when the American Medical Association's Joint Commission on Hospital Accreditation surveyed the antique Bronx hospital last December, it commended it on the "high quality" of the care given, old building or no. The Joint Commission could be called the high court of hospital evaluation in the land.

The second basic current problem is to maintain an operating budget to fit the same exacting standards.

Whether the House and Senate will approve the full $315 million increase for 1971 is not known at this writing. If they do, it will not be evident until some time next year if this is enough, in view of spiralling hospital administration costs, and new federal pay raises which any appropriations increase must absorb.

The painful cutbacks in staff in recent years have not been due to a dollar reduction in budget, but to a failure of the budgeting to keep abreast of needs. Each year, VA medicine has received more operating money from Congress, but not enough more to meet the higher costs of just exceeding 1966 levels. Specific help from the opinion-forming news media at appropriation time each year has been lacking. The Congressional veterans committees and the veterans organizations have pretty much gone it alone to rally support at that key time each year when the money was being handed out.

## A PRIMER FOR VOTERS

### HON. WILLIAM L. HUNGATE

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. HUNGATE. Mr. Speaker, at a time when citizen participation in elections is more important than ever before, I would call attention to the importance of voting as stated by Luis Munoz Marin, former Governor of Puerto Rico, in Harper's magazine, September 1964:

A PRIMER FOR VOTERS

Let no one stop you from voting! If it rains, remember the hunger of your entire future is worse than one day's rain—If you have no clean clothing, vote in your work clothes—there is your future! It is not a holiday; it is the most serious day of your life. Better to come in clothing dirty from work than—with your soul filthy for having sold your own right to justice, your future and the future of your children.

Come to vote, seriously, without foolishness. You don't win justice with fooling. Above all, have faith in yourselves. Have faith in your own honor—Be the men and women that God wanted you to be.

## CONGRESSMAN JACK McDONALD'S CONGRESSIONAL REPORT

### HON. JAMES R. GROVER, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. GROVER. Mr. Speaker, a Representative must wear many hats in carrying out the responsibilities of his office. One of the most important of those is the ability to listen to and communicate with the people who have elected him to that office.

A vital tool in that listening and communications partnership is the questionnaire. Through this device, Members of Congress reach into the homes of their constituents and learn firsthand the opinions and desires of the people.

My colleague from Michigan (Mr. McDONALD) recently completed tabulations on his fourth annual questionnaire, and made public his findings through his congressional report. These findings warrant, Mr. Speaker, that this document be made available to all Members. My colleague and I come from different States, and represent different people; however, it is important to me as a legislator to know how others feel about the issues of this decade.

I submit, therefore, for printing in the RECORD, a copy of Mr. McDONALD's congressional report:

THE JACK McDONALD CONGRESSIONAL REPORT TO MICHIGAN'S 19TH DISTRICT

THE ANNUAL QUESTIONNAIRE: A VITAL LINK

My annual questionnaire is a vital communications link which makes it possible for this office to assess the needs and desires of the people of the 19th District. This year the returns were higher than ever before, reflecting continued interest in the opportunity to participate in government.

This Congressional Report contains the results of the questionnaire as well as reports on legislative items which are of deep concern to the 19th District.

There are no simple solutions to the problems and priorities that face this nation today. I feel that the response from the people of the 19th District indicates an active interest in government, and a deep understanding of the problems with which we must deal.

Of those responding, 15 per cent were in the 18–21 age group, which for the first time was offered the opportunity to take part in the questionnaire. Their approach to today's problems was, in my view, responsible, and gives me confidence that our future would be secure in their hands.

Details on the questionnaire results are on page two and three of this report.

On page 1 is a picture of Congressman McDonald and 11-year-old Clayton Edmonds of Walled Lake, with the following caption: "Aid for pollution: Congressman Jack McDonald, primary sponsor of a 7-point pollution abatement program, received some unexpected help from Clayton Edmonds, a Walled Lake youth who sent the Congressman 48 cents to be used to fight pollution."

THE 91ST CONGRESS AIMS AT IMPROVING QUALITY OF LIFE

The major aim of the 91st Congress has been to improve the quality of life for more than 200 million Americans living under our flag.

As we near adjournment, sometime toward the end of October, more legislation will come before Congress pertinent to accomplishing its stated aims.

I anticipate Senate approval of the House-passed Omnibus Crime Control and Safe Streets Act, plus House action on the Emergency Community Facilities Act and on the remainder of the 7-point pollution abatement program which I introduced earlier this year.

The Emergency Community Facilities Act provides basic safeguards for the health and well-being of Americans and checks widespread water pollution by providing funds for locally directed water and sewer projects.

The environment bills face a series of hearings before the House Public Works Committee, of which I am a member. I feel confident that this Congress will accomplish more in the field of environment control than any other previous Congress, and pledge my personal effort to get this vital legislation passed.

Items which have been passed in the House since the last Congressional Report include: reinstatement of the Golden Eagle Passport Program; the Hill-Burton Hospital Construction Bill; additional funds for the home mortgage market; three years funding for the National Foundation on the Arts and Humanities; proposed amendments to the Constitution which insures equal rights for men and women; and a bill which prohibits the use of interstate facilities, including the mails, to transport unsolicited obscene advertisements.

There have been other significant steps taken in this Congress toward making a better life for all; and much yet to be done. This report focuses on some of our achievements and some of our hopes.

THE 1970 QUESTIONNAIRE RESULTS—CRIME, POLLUTION, EDUCATION: THE MAJOR CONCERNS IN THE 19TH DISTRICT

The results of my annual questionnaire indicate 19th District residents are concerned about crime, pollution, education, and that they support withdrawal of troops from Vietnam.

In a series of McDonald in Washington columns, mailed weekly to the local press media, I covered each question as reflected in the questionnaire and gave my views on the issues.

This portion of the Congressional Report is devoted to listing the views of the 19th District as reflected in the questionnaire returns, and my views on the issues and priorities.

The first question was: Do you support President Nixon's strategy to withdraw U.S. troops from Southeast Asia?

Your view: 75 per cent of the men responding approved it. Of the women who responded, 70 per cent approved it, and of the 18–21 age group, 65 per cent approved it.

My view: I support the President's strategy to remove troops from Southeast Asia with the proviso that all troops be out on an agreed upon date. I would oppose any efforts to remove from the President his Constitutional power to use any military maneuver necessary in bringing our men home. However, I have most serious qualms about the possibility of over 200,000 troops remaining in South Vietnam by May, 1971.

Question two: Do you favor abolition of the draft as now constituted and creation of an all-volunteer Army?

Your views: 68 per cent of the men responding support this concept. Of the women, 80 per cent approved it, and of the 18–21 age group 83 per cent approved it.

My views: I feel this reorganization is long overdue and have urged Congressman Mendel Rivers, Chairman of the House Armed Services Committee, to go forward with true draft reform and not mere tokenism.

Question three: Do you favor my bill (H.R. 15283) prohibiting federal agencies from selling mailing lists to the public?

Your views: 93 per cent of the men responding favored it.

Of the women responding, 90 per cent favored it, and of the 18–21 age group, 71 per cent favored it.

My views: Several federal agencies gather private information through required forms, and sell the names and other pertinent data to commercial firms for use in direct mail advertising. I do not support this, and therefore introduced a bill preventing such a practice.

Question four: Do you approve the use of federal funds for busing of schoolchildren to achieve racial balance?

Your views: The tally against this practice was men, 91 per cent; women, 92 per cent, 18–21 age group, 85 per cent.

My views: I introduced a Resolution to the Office of Education appropriation bill preventing the use of such funds for busing for the express purpose of achieving racial balance. That language is now law, having been included in the bill passed by the Congress, vetoed by the President, and overriden by the House and Senate.

Question five: American flag ships carry approximately 6.4 per cent of the total tonnage of U.S. trade. Would you favor increased federal shipbuilding subsidies to expand and modernize our merchant marine fleet?

Your views: The tally in favor of the subsidies was men, 75 per cent; women, 69 per cent, and 18–21 age group, 65 per cent.

My views: I consider it important that American produced goods be transported on American built ships manned by American crews. I voted in favor of the $10 billion, 10-year program to strengthen and expand our merchant marine fleet. As a member of the House Merchant Marine and Fisheries Committee it has been my pleasure and duty to study closely the effects that such a program offers to the economy of this nation.

Question six: Which direction would you like taken with regard to an ABM system? (Check one) a. Gradual installation of a limited network b. An eventual full-scale network c. No funding at all.

Your views: The men voted 38 per cent in favor of a gradual, limited ABM system, 45 per cent in favor of an eventual full-scale network, and 16 per cent in favor of no ABM at all. The women voted 44 per cent gradual, 48 per cent full scale, and 8 per cent no ABM at all. The 18–21 age group supported the gradual, limited network by 57 per cent, a full-scale by 22 per cent and 21 per cent favored no ABM at all.

My views: An effective defense network is an absolute necessity for this nation. But the Safeguard ABM as proposed is simply not an effective way to strengthen our defense posture. It is technically vulnerable, of questionable effectiveness, and also expensive. The Defense Department must be as careful in its expenditures as any other government agency. If we are to maintain our peace and freedom at home, we must stop playing politics with our national defenses and develop a workable deterrent to possible nuclear attack.

Question seven: In addition to reducing federal spending, which policy would you favor to curb inflation? (Check one) a. Increased taxes. b. Wage and Price Controls c. Tighter credit.

Your views: The men voted 8 per cent in favor of increased taxes, 69 per cent in favor of wage and price control, and 23 per cent in favor of tighter credit. The women voted 2 per cent in favor of increased taxes, 76 per cent in favor of wage and price controls, and 22 per cent in favor of tighter credit. The 18–21 age group voted 9 per cent in favor of increased taxes, 84 per cent on wage and price controls and 7 per cent on tighter credit.

My views: If inflation continues its sharp increase after every possible effort has been made to control it, or in the event Congress fails to honor the budgetary restraint sought by the Administration, I would support wage and price controls. We are now paying the price for years of fiscal neglect. In my votes on budgetary legislation this session, I opposed NASA's space budget, Foreign Aid, the SST, and certain Defense Department appropriations. Fiscal responsibility by the Federal government is by no means a cure-all for our economic ills; but it's a step in the right direction.

Question eight: There is much talk these days about "reordering our national priorities." In which order would you place these programs? 1. Crime Control 2. Defense 3. Education 4. Pollution Control 5. Space 6. Urban Problems.

Your views: Men—1. Crime. 2. Pollution. 3. Education. 4. Urban Problems. 5. Defense. 6. Space. Women—1. Crime. 2. Education. 3. Pollution. 4. Urban Problems. 5. Defense. 6. Space. The 18–21 age group—1. Pollution. 2. Crime. 3. Education. 4. Defense. 5. Urban Problems. 6. Space.

My views: The pressing problems of crime control, pollution abatement, and educational aid require urgent and immediate action by Congress and every other form of government. However, attention to our domestic problems will be in vain unless we achieve peace and stabilize the economy. Peace first, for without it any effort to improve our quality of life will be meaningless. And stabilization of the economy must follow in order to restore purchasing power to tax dollars.

My votes reflect my concern for the priorities as listed above: I voted for the Omnibus Crime Control and Safe Streets Act; I was a prime sponsor of a 7-point pollution abatement program; and voted in favor of the Office of Education appropriation bill.

It is time that we began to invest in ourselves. We are working toward peace in Vietnam, and turning around the runaway inflation which has swelled costs of government this past decade. We must now put the tax dollar to work for the benefit of the American taxpayer.

On page four is a picture of Congressman McDonald and Federal Water Quality Commissioner David Dominick with the following caption: "Environmental strategy—Congressman Jack McDonald plans next move in his battle against pollution during informal conference with Federal Water Quality Commissioner David Dominick."

LOCAL BOY'S 48 CENTS INITIATES POLLUTION FUND

My efforts to obtain a cleaner environment through a 7-point pollution abatement program which I introduced early in this session received an unexpected boost when Clayton Edmonds, son of Mr. and Mrs. John Edmonds of Walled Lake sent me 48 cents to be used to fight pollution.

I forwarded the 48 cents to Secretary of the Treasury David Kennedy, who in turn put the money in a special fund established by the Environmental Quality Administration to combat pollution.

From Secretary Kennedy's reply, I gathered that Clayton's money was the first to enter the fund. The pollution abatement program which I introduced will add substantially to the monies which will be made available to clean up our environment.

More significant than the money, however, is that Clayton took the initiative in dealing with pollution. Until every American takes it upon himself to do everything possible to combat this problem, the problem will go unsolved.

No amount of Federal funds, of Federal legislation will prevent an individual from littering or otherwise polluting. Only an individual commitment, such as Clayton's, can prevent pollution of our air and water.

EDUCATION FUNDS GAIN SIGNIFICANT PROVISIONS

The $4.5 billion Office of Education appropriation bill for fiscal 1971, passed by the House and Senate, vetoed by the President and overridden by the House and Senate, contains several provisions significant to the 19th District.

Elementary and Secondary education funds were increased $232 million to $1.8 billion. Most of the funds in this category were for Title 1 of the Elementary and Secondary Education Act.

Basic vocational educational grants were increased by an additional $54 million, and nearly $1 billion was included for higher education. Many students unable to afford college may use the funds to participate in the student loan program under the Higher Education Act.

A key amendment to the appropriation bill contains language which I introduced prohibiting the use of Federal funds for the busing of students beyond normal geographic boundaries for the sole purpose of achieving racial balance.

The majority of parents and students would rather go to the schools closest to their homes. There is no justification in using Federal funds as blackmail to influence local school district policies.

## TRIBUTE TO THE LATE AL DEL GRECO

### HON. HENRY HELSTOSKI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. HELSTOSKI. Mr. Speaker, a man who had established himself as a community institution in Bergen County, N.J., because of his devotion to his work and to people, his integrity and his wit has departed from this earth.

He was Mr. Al Del Greco, for 40 years sports columnist of the Record of Hackensack, N.J., who died last week of a heart ailment at the age of 64. He was widely respected, and will be truly missed by people in all walks of life.

As one who knew Al Greco from my school days as Mr. Sports Writer, I could go on endlessly reporting on all of the good things Al did for so many and particularly young athletes, but I believe the best descriptives of Al Del Greco the man, his career and his accomplishments are best set forth in the following series of articles written by his colleagues on the RECORD.

AL DEL GRECO DIES—RECORD SPORTS COLUMNIST

Al Del Greco, sports columnist of The Record for more than 40 years and dean of New Jersey sports writing, died yesterday in Hackensack Hospital of a heart ailment. He was 64.

Del Greco joined the sports staff March 18, 1928. He was with the paper nine months when he brashly told James Sutphen, then sports editor, "I can write a better column than you."

Sutphen, now senior managing editor, told him to go ahead. Ten days later Sutphen told Del Greco: "You're pretty good. The column's yours as long as you live."

That was Dec. 19, 1929. Del Greco rarely missed a day, writing what first was called At Random In Sports and later For The Record, until he was taken ill last May 17.

Del Greco had a special gift for limning the world of sports. His ability to cut down the pompous with a biting phrase was matched by a compassion equally quick to offer credit lavishly where it was due.

He often made fun of his own athletic prowess, but in truth had been a fair football halfback. He tried boxing.

"I quit," he used to quip, "when I found out the idea was to hit the other guy, not let him hit you. Brave, I was. Stupid, I wasn't."

Del Greco's personal favorites in the sports world were football, boxing, horse racing, and bowling, in which he carried a 180-plus average until giving up the sport four years ago. He claimed to have attended every New York Giant home football game since 1927.

Closest to his heart was the annual Boat-jumper's dinner, a gathering of the descendants of Italian immigrants which became legendary throughout the state. In 1968, when there were nine candidates for New Jersey's gubernatorial nomination, all nine showed up. They didn't dare refuse a Del Greco command performance.

The dinner, invariably presided over by Del Greco as toastmaster, has been imitated in other counties but never equaled. It was pure Del Greco from start to finish. He arranged the catering, doled out the invitations, wrote the script.

A 1925 graduate of Garfield High School, Del Greco attended the Savage School of Physical Education, intending to become a gym teacher. He left school to join the Record.

It was as sports editor beginning in 1931 that Del Greco hit his stride.

Donald G. Borg, Editor and Publisher of The Record recalled yesterday:

"Al Del Greco was my boss in sports when I became a newspaperman. I got $25 a week in 1929, and he made me earn every dollar.

"I enjoyed working with Al then, and I enjoyed working with him since. He was one of a kind, writing his column to the end. And not the least of his virtues was that he used his magnificent sense of humor not just on others but on himself. We'll all miss him deeply and long."

One of Del Greco's last communications was to The Record's executive editor, Don Carter.

"I feel pretty bad about my therapy foundering," Del Greco wrote. "Doc had the idea no work was involved. But I took a bad turn.

"I broke down May 17 and have been off since.

". . . I'm out for a long while."

The Board of Freeholders, at its meeting last night, observed a moment of silence in Memory of Del Greco.

Del Greco was a lifelong resident of Lodi. His survivors include his widow, Mrs. Marie Senft Del Greco; a daughter, Mrs. Arthur C. Sweet of Arlington, Mass.; a son, Albert J., 24, at home; two grandchildren; and three sisters: Mrs. Mary Luggiero of Maywood, Mrs. Josephine Guidetti of Lodi, and Mrs. Anita Gallo of Atlanta.

There will be a solemn high requiem mass at 9:30 a.m. Saturday in St. Joseph's R. C. Church, Lodi. Burial will be in St. Nicholas Cemetery, Lodi.

Visiting hours at Santangelo Funeral Home, 300 Main St., Lodi, will be today and tomorrow from 2 to 5 and 7 to 10 p.m.

FORTY YEARS "FOR THE RECORD"

(By Lew Azaroff and Ron Drogo)

Al Del Greco wrote his column, For The Record, and its predecessor, At Random In Sports, for 40 years. He wrote roughly 20,000 columns and to pick the best is next to impossible—there were thousands of bests.

Here are some examples of Del Greco's best:

On basketball: "Those guys look silly running around in their underwear."

On freeloading sports writers: "There's enough invitations on my desk to eat free for a year. I might go to a couple."

On hunters: "They should give the animals guns so they can shoot back."

On fishing: "It's a bore. It gives you a chance to catch up on sleep."

On last year's New York Mets: "What a pity it will be if a bunch of stiffs like the Mets win the National League pennant."

On the New York Football Giants' No. 1 draft pick in 1965: "Who the hell is Tucker Frederickson?"

On golf: "Of all the arrogant guys in sports, my nomination would be the golf professionals because of their refusal to wear an identifying number or name on their shirt. Take away Jack Nicklaus, Arnie Palmer, a fire plug like Gene Sarazen, and the rest of the group is a horde of anonymous slashers."

On Willis Reed: "Willis Reed gets a car for being the most valuable player in the NBA and he graciously says the car belongs to the team, so-o-o how about Cazzie Russell using it for a week or so?"

On politics: "Methinks President Nixon would be sent to St. Joe., Mo., if he were a ballplayer and measured by his achievement thus far."

On cats: "There are qualities about a cat that I admire. They are sneaky and disloyal. Rub the cat's skull or make it walk along rubbing its stomach against your leg and you have a life job—or as long as it's your leg the cat wishes to rub its stomach against."

On dogs: "The dog people gave up picking dogs that look like dogs as champions quite a few years ago. Right now, the closer a dog resembles a goat, the better chance it has to win a prize. A few years ago, if the little mutts resembled black-widow spiders and you could carry them in your wristwatch case, you had a winner."

DEL GRECO AT RANDOM

First column, subbing for Jim Sutphen, Dec. 9, 1929: "It's a tossup as to who is going to have the tougher time this week: Sutphen at the Hackensack Hospital, or me with this very, very long column."

"Never came close to winning a raffle, lottery, or what-have-you. Won a pigeon once and was abused for eating it; the owner claimed it was a champion flier."

New Jersey Racing Commission: "The governor says quit dragging your feet, approve the new harness tracks. Does a gent by the name of Kenny have to give the okay, too?"

"As you grow old on the sports beat, you don't see as many of the old faces because they take to sensible things like rocking chairs and racehorse charts, and, when they're feeling sprightly, play a vigorous game of tick-tack-toe."

"Chicago Cub manager Leo Durocher and former umpire Jocko Conlon have one thing in common: they despise each other. And quite a few people think both of them have good reason."

"If a horse's coat shines, it indicates he's in good condition to run—or pull an ice wagon."

On Allie Sherman: "Personally, I'm one of his greatest admirers. He makes a good impression wherever he goes, is a gifted speaker, coins more expressions than a college professor, and can explain away loss after loss after loss."

FOOD FOR THOUGHT

"I wouldn't want to be a horse. What horses eat isn't fit to even look at. If they served oats or sour mash or the rest of that sort of junk to human beings, they'd throw it in the garbage pail."

"Every time I think of good hitters, my mind goes back to the eighth grade when a

little teacher by the name of Miss Shea used to whack us across the face without telegraphing the slap."

"A dark gloomy day at the race track means that you bet less, you eat and drink less, you feel low down, and even a winner can't make you shake the mood."

"It's considered a gag in the East to talk about eating a horse if he can't run fast. In the West, they reach out for the utensils."

"I think I'll go up to Main Street, Hackensack, and break a few windows and steal some TV sets and sports jackets. The guy overcharged me on the price of a tie."

"Get your tickets for the Jersey Americans!"

"Oh, it gives you a headache but abstainers will never understand the fun guys can get out of sitting around, drinking, and telling lies."

"Hackensack's Ed Waldo has a collection of remarks made by Yankee broadcasters which prove, he says, they are school dropouts. He has Phil Rizzuto and Joe Garagiola dead to rights."

"It was a great weekend for golf. One guy caught a fish."

"Every one has a question. So Old Cockeye is going to answer them:

Q—You frequently mention your Italian ancestry. Isn't it true you're a Greek?

A—Not so at all. No one in the family ever owned a restaurant or a boat.

Q—What is your favorite drink?

A—Water—but I have an allergy to it so I go to champagne as a substitute.

---

"LIVED LIFE TO FULLEST:" A COLLEAGUE'S TRIBUTE

(By Don Sherlock)

Al Del Greco took a lot of the world with him. He lived life to its fullest.

People loved what Al Del Greco wrote, or they didn't understand him. There was little middle ground.

He had a way with words. It just came naturally; he didn't have to try.

My first memories of him were as a Teaneck High School student in the 1950s. It seemed as if all he wrote about in those days was how good Hackensack was and how badly the Comets were going to beat Teaneck on Thanksgiving Day. It burned us. But Hackensack beat us bad, just as Al said.

We were of the do-nothing '50s, but Al told of a group of irate Hackensack students and athletes who didn't appreciate a column of his in which he predicted that Englewood would rout Hackensack in football. They stormed the old Record building on Main Street, splattering the walls with tomatoes and ransacking the office.

"I was never so scared in all my life," Al said. He must have told that story a thousand times. If Al ever knew fear, that was it.

There was the time The Record entertained a South Korean newspaperman in an exchange program. Al really got to like the man, but, sneaking around to the different offices where the guest was chatting with various editors, Al would get down on is hands and knees, stick his head around the corner into the office, and say, "Don't worry, I'm keeping an eye on this spy."

That was Al Del Greco as the people of The Record knew him. Always good for a barrel of laughs.

Al was from the old school of newspapermen. He was known to hoist a few every once and a while, wasn't averse to putting down a bob or two on a nag or a football game, and was always around when the tab came.

Al ran an annual show called the Boatjumpers. If you were anybody in Bergen County—in sports, business, or politics—you got an invitation.

He referred to the Boatjumpers as descendants of those guys on Christopher Columbus's ships who jumped off without passing through customs. Al was the leader.

"My first memories of Al Del Greco are that he worked me 16 to 18 hours a day for $25 a week," said Donald G. Borg, Editor and Publisher of The Record. "Oh yes, that's when we worked a six-day week, too."

"There was a time in 1932 when we were having a bit of trouble with the ITU," Borg said. "Some of our employes were members of Company G [National Guard] and they went down to the armory and came back with a bunch of .45s.

"One of them mounted guard and Ernest Zimmerman went inside. Al was sitting there writing his column and Zimmerman came up behind him and laid the muzzle to Al's neck.

"It kind of shook up Al. He left a note for the day staff saying, 'If I'm shot, Zimmerman did it!' "

In 1960, when I first joined the sports department, Al was in charge of the whole works. He wrote his column and put the paper to bed in the morning. Those were the days of the six-day work week.

I was working the late shift one Thursday night during November and there was little to do in the office except wait for the bowling league results to be delivered. So, I decided to take a ride over to Feibel's Recreation in Teaneck, hoping to meet my sports editor. I did.

The first thing he said was, "What's your name, kid?". The second was, "Want a drink?". That was Al Del Greco.

The next time I met Al was when I started working the morning shift with him about a year later. I walked into the office bright and early at 5:30 and there was Al, feet up on the desk, sound asleep.

I didn't know what to do, so I went out into the old wire room to get all the sports copy. It was gone. When I came back into the sports department, Al said: "Hi, kid, not much left to do. Start reading proofs."

About a half-hour later, after taking another short snooze, Al awoke and started typing (he was of the old three-finger, hunt-and-peck school). In a little while, he tossed over a couple of sheets of copy and said, "Read this over, will ya, kid?" It was the day's For the Record column.

Next, he headed for the composing room and started tossing around the type. He'd grab a handful and 'pie' it—that's the same as Gene Michael booting a ground ball—and say to makeup man John Amico:

"What'd you do that for, John. Can't ya do anything right? Hey, Ray, look what John did over here."

Back to the office to go through the mail. Again, there was Al with his feet up on the desk, chair tilted back. The New York Times in his lap, and his eyes shut tight.

After the paper was out and we checked it for mistakes, Al would take off for Monmouth, a Yankee game, Guido's, Petrullo's, or for lunch with his friends at the real estate office.

A crossword puzzle nut, I'd pick up The Times only to find that Al had finished the whole darned thing. That was Al Del Greco, too.

Back in early spring, Al had this hacking cough. He just couldn't shake it. Went to the doctor but there was no diagnosis. Then there was a call from Al's wife, Marie, saying Al had had an apparent heart attack. It hit like a sledgehammer.

He had rarely missed a day of work in more than 42 years at The Record.

During his stay in the hospital, Al wrote a note to Lew Azaroff, our sports copy editor who edited Al's column for the last 10 years or so.

"I lived one helluva great life and anything I get to do now is repetition—and pretty poor at that."

He signed it, "Your old buddy who always appreciated help. Al."

LOOKED AHEAD TO REUNION WITH LOMBARDI

(By Augie Borgi)

The Record reader never really knew Al Del Greco. Sure, he read what Al Del Greco had to say ever since March 18, 1928, until 10 days ago when his last column appeared.

"I guess he knew he was going to die," Father Tim Moore said yesterday, "when he talked to me in the emergency room as they put him in intensive care. Al told me that the country had lost a great man when Vince Lombardi died.

"He held my hand and said: 'I'll see him tomorrow, I guess, and I'll say hello for you.' "

Jack Armstrong never really knew Del Greco until a few years ago.

"When I was coaching," said the former Tenafly High School football coach, "I didn't know what kind of guy he was. I had read him since I was a kid, but really didn't know him until I got into the brokerage business, and then I found out he was one of the kindest men I ever knew."

"Sure he tried to keep the raucous image and I got a kick out of the impression other people got," he said. "Ever since Al took sick, my four little girls have said a prayer for him every night."

Del Greco loved sports.

"I remember him when he became sports editor," said Lud Shabazian of Ridgefield, sports editor of the Hudson Dispatch. "He was a helluva writer; such a good touch and quite a guy. The first time I met him was at Jimmy Braddock's training camp. After that we went everywhere together."

"I can still remember how he won the King and Queen (bowling tournament which is still the biggest amateur mixed doubles event in the country) in 1954," he said "He rolled 216, 202, and 201 for a 619 that went with 18 handicap pins. He and Clara Archibald of River Vale won the championship. But Al was a real competitor in that he entered every year."

Frank Esposito, owner of Paramus Bowling, said:

"Bowlers attribute to Al Del Greco everything that bowling is in Bergen County. Bergen is recognized throughout the country for its bowling activity. Al pioneered it. During the years when bowling was getting very little publicity, Al helped it grow tremendously.

"We in the bowling sport are saddened to have lost such a good friend—and a fellow bowler."

Del Greco also helped found the New Jersey Boxing Writers Association. Until Jimmy Colatto of Englewood began his promotions in North Bergen a couple of years ago, the boxing writers had more meetings than there were matches. But Del Greco never lost his enthusiasm for the fight game.

"He really liked boxing," said Charley Hoffman of Fort Lee, a close friend. "But he also liked just about everything else. I can still remember the column he wrote about me 28 years ago. He said I was the best amateur handicapper in Jersey. He really loved the races."

"We'd be at the track," he said, "and a guy would come up to him and ask him who Al had bet. Al would say: 'No. 1', and then another guy would come and Al would say: 'No. 2', and another would come and before you knew it Al told somebody every horse in the race. Then he'd say: 'I gave somebody a winner.' "

"He wrote crazy columns, but he was a wonderful guy in my book," said Jackie Farrell of Hasbrouck Heights, director of the Yankees' speakers bureau. "He had quite a reputation in Hudson and Bergen, and the writers there respected him. He wrote as he talked—a crazy guy and I loved him."

"He offered me a job in 1941," said Record copy editor Joe Lovas, former sports editor of the Passaic Herald-News. "It was for more

money than I was making in Passaic but I didn't have a car and during the war it was hard to travel at night. I lived in Garfield then."

"He was the kind of guy who grew on you," he said. "I remember one year in New Brunswick at a basketball game when he was throwing coats out of the windows of the ninth floor of the hotel."

"He's been a friend of mine for years," said Col. John Roosma, a member of the Passaic Wonder teams that won 159 straight basketball games (1919–25). "He was one of the outstanding sportswriters in New Jersey. And it wasn't just writing. He had an interest in the players and the teams. He could tell me more about my days at West Point than even I remember."

Del Greco never was a basketball expert. He called it round ball. But Wally Green of Demarest, the youngest player ever to win a varsity H at Hackensack High and current president of the Hackensack Alumni Association, helped Del Greco when it came to basketball.

"Ever since the first week when he came to The Record, I remember what a wonderful guy he was," Green said. "And I remember about seven years ago he took me to Gracie Mansion as his guest. I met every big name in sports. Guys like Stan Musial down to the Giants' third-string quarterback. I can never thank him enough."

The man on the street knew Del Greco, too, if he happened to be in the vicinity of Hudson Street in Hackensack the last few years or at Guido's Restaurant, or Petrullo's, or just about any establishment in Bergen.

"He was in our office practically every day," said Phil Mancini of Myd Realty. "The last year he used our typewriter to do his column."

"Four or five days a week he'd cook for us," he said. "He'd come in and move the long tables around and cook for about 25 people. His hobby was cooking. He was great when it came to Italian stuff like pastafagiol and he was the center of attraction. Some of the guys here broke down when they found out Al died today."

The sports world lost a man who loved fun and games.

One day The Record's hunting and fishing columnist went on vacation, so Del Greco wrote Rod and Gun. Of course the name on the story was: By J. Hunter Fish. The first sentence said: "All hunters and fishermen are murderers."

The hunters and fishermen telephoned that day and asked for J. Hunter Fish and Al told them all the same thing: "J. Hunter Fish? He got fired. Did you see the stupid column he wrote today?"

Art Argauer, former Garfield High School coach, perhaps summed it up best.

"I just can't believe it," he said. "Al Del Greco was a classmate of mine at Savage School for Physical Education in New York City in 1924–25. Instead of going into education, he chose the newspaper field in which he became one of the outstanding writers. He was always fair and impartial and was respected by all who knew him and read his humorous columns.

"He was a credit to his profession, his Italian heritage, and to his family. His humorous columns will be missed. All of us have lost a fine friend."

---

AL DEL GRECO

(NOTE.—"Al and I started on The Record more than 40 years ago. We have shared a great many laughs, a lot of excitement, and a few tears. I have in all those years never known a man with a more devastating contempt for the phonies in the many worlds in which he moved, or a man with greater appreciation of the good and decent things in sports, his associates, and his profession."
—JIM SUTPHEN, *Senior Managing Editor*)

Al Del Greco was a public institution, established and famous. He knew it, and took pains to say or do nothing that would be inconsistent with his reputation. He was, then, tough, sardonic, cynical and worldly both, candid to the edge of cruelty in his judgments on his fellowmen whether they were the athletic heroes of the season or United States Senators or bookmakers. This was his reputation, and he was faithful to it and to the countless tens of thousands who knew him and expected of him the kind of integrity they never required of their legislators and archbishops. Al was himself. Let that first be said.

And then let it be said, as it could not be said as long as he might wander into the newsroom with that hobgoblin grin and repudiate the libel in a gravelly baritone that could be heard in the next block—let it be said that Del Greco was an incurable idealist, a hopeless romantic, was the starry-eyed small boy who never grew up and didn't want to.

He was a sports writer—when the subject interested him one of the best in that mysterious field of literature. He admired that which was admirable in the athletes he knew through four decades and more: their strength, skill, intelligence, courage. He had no use for the man he suspected of doing less than his best; and for the muscular egotist who gave himself pompous airs off the field or outside the ring, Al had nothing but curt contempt. His ethical standards were high, and he tested every man he knew in politics and public life against them, and the hilarious acidity of his comment on the world around him was not a sneer but a cry of despair. Let it be said, then, that he was an idealist. Perhaps the only man who never disillusioned him was the late Vince Lombardi. They were much like each other. They had things in common and still do.

He loved the contact sports, played them, was trained to teach them. He loved the look and crash and smell of the physical games, and although he played the gentlemanly sports and wrote about them competently they did not engage him and he declined to accept an excitement over golf or tennis or track and field, not to say yachting, which he did not feel. But when the game had been honest and the men were brave, when it mattered to him who won and how, then when the shadows slanted down the field, he would hurry back to his desk and, hunched over his typewriter, take up the tale of arms and the man in a transport of joy not much unlike old Vergil's.

Al would never have stood for this, but he was a poet, a young and ageless poet, and it is heartbreaking to know that we shall not see him again. To his wife and family is extended the deepest sympathy of us who were privileged to be his friends and companions.

---

## "MEDDLING"

## HON. EARL F. LANDGREBE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. LANDGREBE. Mr. Speaker, I am inserting in the RECORD a sermon given this past Labor Day by Rev. Hillsamer of Michigan City and sent to me by Mr. Stanley A. Lauer of Michigan City, Ind.

Rev. Hillsamer's sermon pointed up a subject long overdue for recognition and comment, and as Mr. Lauer said in his letter to me.

It should not be sentenced to oblivion.

I urge every Member's attention to its message and contents which follows:

MEDDLING

Labor Day is a time of tribute to men and women whose efforts contribute to the greatness of our land. Work in this era of mechanism and automation and through factories, no longer include the same processes as in the time when the Biblical writers described "the work of our hands."

Today, Labor encompasses an array of different activities, almost defying description. But the same motivations and relationships still exist.

This is why we turn to the Word of God for our instruction. Listen as we read from Ephesians 6:5–9: "Servants, be obedient to them that are your masters according to the flesh, with fear and trembling, in singleness of heart, as unto Christ; Not with eyeservice as menpleasers; but as the servants of Christ, doing the will of God from the heart; With good will doing service, as to the Lord, and not men; Knowing that whatsoever good thing any man doeth, the same shall he receive of the Lord, whether he be bond or free. And, ye masters, do the same things unto them, forbearing threatening; knowing that your Master also is in heaven, neither is there respect of persons with him."

This may seem a little strange in its context, but remember, labor and management was not the focus as it is today. Paul has described the family relationships, now he extends the application of Christianity to the next removed, Masters and Slaves.

Let us look at this passage: Not ideally, but practically. Not at things as they are, but as they ought to be.

In order for a person to be happy with their work, there certainly must be loyalty toward their employer. This loyalty would be manifested in our appreciation for the product manufactured or for the service rendered. To have a little regard for our work, and, or product, would be less than Christian.

This loyalty is twofold: The employee must be obedient to the employer. Our Scripture says that slaves should obey their masters. Every place I've ever worked, including my present job as minister of the First United Methodist Church in Michigan City, my employer has had ideas about how I should spend my time. Whether I agree or not, was of no importance. If I signed up for the job, then it was mine to do. The second factor about this loyalty to employer, is what might be called, singleness of purpose. The only effective way I can serve this church is as though it were mine for the rest of my life. I have a feeling that if we worked at our jobs with this attitude rather than just a living, or until I get something better, we would be living under more pleasant circumstances than we do.

If a person is to be really contributing of himself, there must be sincerity. Wherever you work, you must feel that you are contributing of yourself for the sake of living with yourself and you must also feel you contribute some small part to the whole product. The Christian ought to work harder than anyone else. Not to make more money, but because he or she represents Jesus Christ. "Working for God not as unto Men." This translation says, "Remember that the Lord will repay every man, whether slave or free, for the good work that he does."

What about compensation? How much does a person work only to be paid? Do we work just for the sake of work?

Ever since the fall of man, God has so designated work as an integral part in the livelihood of man. To live we must work, so says God. It is not God's intention that man receives something for nothing, even though this philosophy seems to be running rampant in our society today, with almost every place of business offering chances on prizes for the lucky.

It could also be said then, that God expects man to be compensated for his efforts in proportion to his accomplishments. The

hard working farmer for the most part, is the successful farmer.

Humankind does not always compensate as God does. Hence, man has devised means for recognition and compensation. Such organizing has placed the emphasis on compensation, and less upon the dignity of work incumbent upon every human being.

Many employers are less than Christian, according to this principle, so therefore, let us look at the other side of our text.

The greatest thing that management can do for labor is to respect them. The lowly private in the line infantry company is the last in the chain of command. Orders may be given from the General of the Army on down the line until they come to the Private. That is as far down as you can be. In other words, in the last analysis, it is the Private that really does the work in Uncle Sam's Army. And the Private should be respected. If work is to be done, if labor is to be exercised, it will be the buck privates of industry, the laboring man that will do it. And the laboring man needs to be respected for what he does.

Our text says, "Masters forbear threatening." What would our society be like without threatenings? Can you imagine people respecting the wishes of others without threats? For example, the speed limit sign is posted and nobody violates the limit, not because of threats of arrest and fine, but because respect is held for it. Can you imagine raising a family according to respect? No discipline necessary because the children just wouldn't think of violating their parents' wishes. Because they have too much respect for them.

Management needs to recognize that every man has worth in God's sight, and if a man is hired for a job, let him work.

Management needs always to be reminded as our text says that the Master of Labor is their Master too. Like I told a friend of mine who had just finished Officer's Candidate School, "we all put our pants on the same way, one leg at a time". Among the priesthood of believers, is where all men meet to worship the one true God.

Management needs further to realize that while some men may be more productive than others, yet every man has the same value to God. The best men get the best jobs, but every man gets some job.

These truths we have talked about today have eternal significance, yet their manifestations have had a shorter history. The factory system here in these United States is only a little more than 150 years old. The labor-management conflict is even younger yet. And to make it even worse, only a small minority compose the Christian element.

Jesus Christ is always the answer to man's problems, regardless of dimension. It is time for Christians to witness.

Christian labor ought to be showing a loyalty to management. Christian labor ought to be convincing management of its sincerity. Christian Labor ought to be allowing God to be the paymaster.

While on the other hand, Christian Management ought to show respect to its laborers. Christian Management should also be subservient to God. Christian Management needs to be recognizing the dignity of every man. Amen.

## FINANCIAL STATEMENT

## HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. BRADEMAS. Mr. Speaker, I insert at this point in the CONGRESSIONAL RECORD a statement of my financial assets and liabilities:

ASSETS

SECURITIES

| | Shares |
|---|---|
| Booz-Allen Hamilton | 25 |
| Mass. Investment Trust | 190 |
| Advance Ross Corp | 50 |
| Ashland Oil Inc | 60 |
| General Motors | 25 |
| Pneumo Dynamics Corp | 100 |
| Ramada Inns Inc | 55 |
| Union Carbide Corp | 50 |
| Xerox Corp | 50 |
| A.T. & T. 8¾% bonds | 6 |
| Cash on account | $172 |
| Total value of securities as of Sept. 24, 1970 | $20,819 |
| INSURANCE | |
| Prudential, cash surrender value | $2,310 |
| GI life insurance, no cash value. | |
| Checking account at Sergeant At Arms, U.S. House of Representatives (Sept. 1, 1970, balance) | $2,974 |
| SAVINGS ACCOUNTS | |
| South Bend Teacher's Credit Union | $90 |
| RETIREMENT | |
| Equity in Federal retirement fund | $24,410 |
| Total assets | $50,603 |

I have no interest in real estate or in any commercial enterprise not listed here.

Liabilities: None.

## NEWSLETTER OF HON. ALBERT W. JOHNSON

## HON. JACK H. McDONALD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. McDONALD of Michigan. Mr. Speaker, Congressman ALBERT W. JOHNSON has just issued a newsletter, which I have found very interesting and informative, and I am submitting it for the RECORD as a part of the official proceedings of the House. The newsletter contains the usual heading of previous newsletters, as follows: "Newsletter From Your Open Door in Washington, Congressman ALBERT W. JOHNSON, 23d District of Pennsylvania, Newsletter 18, September 1970." The newsletter also contains a picture of Congressman JOHNSON holding the door open at his office, room 1424 Longworth House Office Building. The newsletter is as follows:

DEAR FOLKS IN THE 23D CONGRESSIONAL DISTRICT: Following my usual custom at this time of the year and before the close of the Congressional session, I am sending you this Newsletter, in which I will point out some of the highlights of the accomplishments of the 91st Congress as well as some of the legislative proposals remaining to be acted upon.

SOME OF THE BILLS THAT HAVE PASSED

This 91st Congress convened on January 3, 1969. The House membership now stands at 243 Democrats, 187 Republicans, and 5 vacancies. All of the 435 House seats are up for re-election now on November 3rd. The U.S. Senate is also controlled by the Democrats with the result that when President Nixon took office, it was the first time in 120 years that an incoming President of one Party faced a Congress dominated by another. However, despite this unusual situation, Congress has enacted a number of new legislative proposals which have been signed by the President. The most important being the bill turning the Post Office Department over to a government-controlled corporation, the tax reform bill, and the extension of the poverty program. Congress also increased social security benefits by 15% last year, and the House has passed a bill this year providing for an additional increase of 5% to cost $1.7 billion a year and to be financed by an increase from $7,800 to $9,000 in the social security tax base. This measure also ties future increases in benefits to the cost-of-living index. The President supports this bill. The Senate Finance Committee is now holding hearings on this proposal. Some other bills passed I will discuss elsewhere in this Newsletter. Only 4 appropriations bills out of 14 have passed to this date. Congress has a real job to do before it can adjourn.

STATUS OF BILLS REQUESTED BY THE PRESIDENT

Not yet acted upon, but urged by the President are the following:

*Welfare Reform:* Called the Family Assistance Act, which abolishes the discredited welfare system of the past, by providing for basic income supplements, work incentives, job training, and provision for jobs. This has passed the House and is being re-written in the Senate.

*Draft Reform:* A bill improving the random-selection system by direct national call of selectees, as well as a plan for a volunteer army replacing draftees.

*Electoral Reform:* Provides for direct popular vote election of the President. This Constitutional amendment passed the House, is now being debated in the Senate.

*Crime Control:* Only two bills have passed in this category, the one, the Washington, D.C. crime bill, the other, the Youth Correction Act. Awaiting action are bills to: control the drug traffic, deal with organized crime, terrorist bombings and obscene mail. This omnibus crime bill, with ten titles passed the Senate, but the House has not acted. This is a must.

*Some other bills not acted upon:* Vietnam Veterans Assistance Act; Amendments to the Food Stamp Act; Revenue Sharing, wherein Pennsylvania will receive $252 million, Manpower Training Act, and a host of bills in the field of education, consumer protection, mass transportation, urban affairs and pollution control.

THE PRESIDENT VETOES FOUR BILLS

This Congress will be remembered by the almost precedent shattering vetoes by the President of four appropriations bills to date, with more vetoes likely. The President is determined to hold down Federal spending in order to achieve a balanced budget and thus reduce inflationary pressures. When Nixon became President, one of the first matters placed on his desk was the fact that he would have to ask Congress to raise the National Debt by $12 billion in order to pay the bills during the first half of 1969. Congress complied as there was no other alternative. The proposed LBJ budget he inherited estimated income at $198.7 billion and expenditures at $195.3 billion. The actual spending was $196.8 billion, but revenue fell to $193.8 billion, making a deficit 6/30/70 of $2.9 billion. We are now in the fiscal year to end June 30, 1971, and revenues are estimated to be $199.1 billion, and unless huge savings are made, spending is estimated at $208.5 billion, or a possible deficit of $9.4 billion.

CONGRESS INCREASES APPROPRIATIONS AND LOWERS TAXES

And the so-called tax reform bill, it is said, will result in a reduction of taxes of about $8 billion. Against these disturbing figures, the appropriations bills as they emerge from Committee exceed the President's budget by from $350 million to $1 billion each. For instance, the 1970 Labor, Health, Education and Welfare Bill exceeded the budget by $1.1 billion; the 1971 Hospital Construction Bill by

$350 million; the 1971 Aid to Education Bill by $450 million; and, the 1971 bill for Housing, Urban Renewal, Space, Veterans, etc., by $500 million. And, while Congress was increasing spending, they put a spending ceiling on Nixon of $205.6 billion. A recent bill by Representative Ford would extend this ceiling to Congress as well. Against this backdrop of inflation, deficits and spending control, Nixon vetoed all four bills. Two were re-passed over his veto.

LOWERING THE VOTING AGE TO 18

An interesting legal development has resulted from one of the bills of nation-wide interest—the lowering of the voting age to 18. In doing so, the Congress unveiled a new method of amending the Pennsylvania State Constitution. We all thought that the only way to amend it was to call a convention, or have two separate sessions of the legislature to pass a resolution of amendment to be then voted on by the people. The U.S. Supreme Court has assumed the power to declare a Pennsylvania Constitutional provision unconstitutional, but Congress also assumed the power by declaring a provision of the Pennsylvania Constitution void. Here is the way it was done:

Article VII, Sec. 1 of our State Constitution provides: "Every citizen twenty-one years of age . . . shall be entitled to vote . . ." But Congress added a clause to the Civil Rights Act of 1970 by providing that this provision is void, (as well as similar ones in other states), as it violates the 14th Amendment of the Federal Constitution as denying 18 year olds equal protection of the laws, that is, the right to vote. Proceeding according to the Pennsylvania State Constitution, as required, Pennsylvania is already in the process of lowering the voting age to 19. This resolution has already passed the present legislature, and will be submitted to the new one in 1971, and the people will be asked to vote on it in the Fall of 1971.

This invasion of a State Constitution is a new venture for the Congress. If this newly-used method is allowed to stand, then Congress could declare that 6 year olds are being denied equal protection of the laws by being forced to go to school, thus violating the 13th Federal Amendment, the privilege against involuntary servitude.

Inasmuch as the new voting law goes into effect on January 1, 1971, the U.S. Supreme Court has been asked to pass on this Congressional invasion of states' rights before this date. 18 year olds will be registered to vote in Pennsylvania commencing December 1, 1970.

POPULATION AND CONGRESSIONAL REDISTRICTING

Many of us were disappointed when the population of Pennsylvania was reported to be 11,663,301 persons, up only 3% from 1960, as compared to the National Average of 13.6%. And, as a result of this small increase, Pennsylvania will lose two Congressmen, reducing the number from 27 to 25. There is, of course, great speculation among Congressmen as to where this loss of two will be absorbed. One target area is the City of Philadelphia, where the population is 1,926,529, a drop of 3.8% from 1960. Under the new census, a Congressional District must equal 475,000 people. Philadelphia now has five Congressmen, and if you divide 1,926,529 by 475,000, you come up with four Congressional Districts.

CENSUS REPORT ON THE 23RD DISTRICT

The population of the 23rd Congressional District has increased slightly. In 1960, the population was 429,000, and in 1970, 432,367, or an increase of 3,358 or .8%. The breakdown is as follows:

| Counties | 1960 | 1970 | Increase | Decrease | Net increase | Percentage |
|---|---|---|---|---|---|---|
| Cameron | 7,586 | 7,008 | | 578 | | 7.6 |
| Centre | 78,580 | 98,578 | 20,178 | | | 25.7 |
| Clearfield | 81,534 | 73,178 | | 8,356 | | 12.5 |
| Clinton | 37,619 | 37,981 | 362 | | | 1.0 |
| Elk | 37,328 | 37,039 | | 289 | | .8 |
| Forest | 4,485 | 4,247 | | 238 | | 5.3 |
| McKean | 54,517 | 50,895 | | 3,622 | | 6.6 |
| Potter | 16,483 | 15,730 | | 753 | | 4.5 |
| Venango | 65,295 | 60,514 | | 4,781 | | 7.3 |
| Warren | 45,582 | 47,017 | 1,435 | | | 3.1 |
| Total | 429,009 | 432,367 | 21,975 | 18,617 | 3,358 | .8 |

It is apparent from this chart that the population of the District is 42,633 less than that necessary for a Congressional District, which means that the District will require the addition of another County—from 10 counties to 11

REAPPORTIONMENT AND REDISTRICTING UNDER PRESENT LAW

The law requires that the Pennsylvania House and Senate be reapportioned in 1971 and the Congress redistricted. Who will prepare the reapportionment plan for the Pennsylvania Legislature? The new Pennsylvania Constitution, Article II, Section 17, answers this query. It provides that a five man reapportionment Commission shall file such a plan within 90 days after they are organized. The Commission consists of the Minority Leader and the Majority Leader of the House, and the same two officers in the Senate, plus a 5th person selected by these four, who shall act as Chairman.

Some say that it was intended that this Commission should also redistrict the Congress. However, a careful reading of this Constitutional provision indicates otherwise, according to the former Attorney General of Pennsylvania. This means that the Pennsylvania House and Senate will be doing Congressional redistricting by a bill duly enacted and signed by the Governor. Both political parties, as they are now campaigning, are eyeing this plan.

THE UNSOLVED QUESTION: WAGE AND PRICE CONTROLS

Shall this nation impose wage and price controls in order to stop inflation. In my recent Newsletter, I reported that 69% of the people in my District favored such controls. Since that time, Congress has passed legislation making controls possible. In the hearings on the bill before the Banking and Currency Committee, of which Committee I am a member, on the subject of wage and price controls, it was pointed out that such controls would require 250,000 employees and would cost $2 billion a year. Many of us saw in the bill that was passed some pre-election politics. To enable the President to put on controls would require at least a two-year authorization and a $2 billion appropriation, and wide discretion as to wage and price levels. The bill that passed and which the President reluctantly signed only gave the President discretionary power to control prices and wages until February 1, 1971, and provided no money to set up the organization, and only gave him the power to fix prices and wages at levels *no lower* than those prevailing May 25, 1970. In other words, the President could raise prices, not lower them.

The Republicans in the House wanting to find out the sense of Congress on the issue offered an amendment mandating an immediate freeze, and the House voted 270 to 11 against this amendment. However, perhaps the country is ahead of Congress and the President and really wants wages and prices frozen (the U.A.W. wages now being negotiated?) even though it would cost $2 billion a year. This is a serious question facing the nation.

QUESTIONNAIRE RESULTS FROM OTHER CONGRESSIONAL DISTRICTS

Some Congressmen have recently sent out questionnaires to their districts, and the results have been reported in the Congressional Record. Here are some interesting replies:

(a) Should the Constitution be amended to guarantee equal rights for women? No: 66% (Corbett, 18th District, Pennsylvania).

(b) Did you approve of President Nixon's use of ground troops in Cambodia? Yes: 77% (Corbett, 18th District, Pennsylvania); Yes: 56.9% (Rogers, 1st District, Colorado); Yes: 77.9% (Jones, 9th District, North Carolina); Yes: 89.6% (Duncan, 2nd District, Tennessee); Yes: 61% (Nation-wide Harris Poll).

(c) Do you favor abolishing the present military draft system for an all-volunteer army? No: 61.5% (Duncan, 2nd District, Tennessee); Yes: 55% (Steiger, 6th District, Wisconsin).

(d) Should the House approve the Cooper-Church amendment to restrict the use of funds and prohibit future military operations in Cambodia? No: 63% (Corbett 18th District, Pennsylvania).

(e) Do you favor continuation of draft deferments for college students? No: 58% (Bray, 6th District, Indiana); No: 69% (Steiger, 6th District, Wisconsin).

WHAT IS THE "ESTABLISHMENT" WHICH SOME SEEK TO DESTROY?

In the last few years, lawless elements in the United States have been on the increase, pursuing mob violence, drug addiction, destruction of our colleges, assassination and subversion. They want to destroy the so-called "establishment."

What is this "establishment" they seek to eliminate?

First of all, it is that venerable U.S. Constitution that guarantees to us all the freedoms we now enjoy. It provides for an elected government chosen by the people, and answerable to the people. It contains the Bill of Rights which we so readily take for granted, which guarantees:

(a) Freedom of religion, of speech, or assembly, of the press.

(b) The privilege against self-incrimination.

(c) That one is innocent until he is proven guilty.

(d) The right to be confronted by the witnesses against you.

(e) Trial by jury.

(f) Freedom from cruel and unusual punishment and excessive bail.

(g) Freedom from unreasonable searches and seizures.

(h) The right to keep and bear arms.

They also would destroy our free enterprise system which has made this nation the most prosperous in the world, with a standard of living unmatched in all history.

Gone would be our provision for free elections, coupled with freedom of thought resulting in the finest educational institutions in the world. Those who would close our schools do not realize that this would mean we would become a backward nation and all creative wonders would cease to be developed.

And, these disgruntled persons who seek to destroy our way of life as they travel up and down our highways, do they stop to think and appreciate the vast network of roads, freeways and turnpikes that our free nation has built for us and for them? How about our railroads and airways, now graced by the 747 plane? One of the guarantees of our way of life is the privilege to travel freely, from place to place, with no barriers, harassments, or inconvenience. All we ask is that you observe the rules of the road. Those liberty-destroyers would change all this, I suppose. Or do they know what they want?

The point I am making is that they, and we, should all stop and count our many blessings, as the song says: "Name them one by one."

BULLETINS, PAMPHLETS AND OTHER ITEMS AVAILABLE

As usual, I have available for distribution some interesting items, which I would be pleased to distribute as long as they last:

A bulletin listing over 300 Federal publications available.

1970 Official Pennsylvania Road Map.

Department of Agriculture new volume: "Food For Us All."

Large Map of Vietnam.

I hope you have found this Newsletter both interesting and informative.

Sincerely yours,

ALBERT W. JOHNSON.

## FUEL OIL CRISIS

## HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. ROSTENKOWSKI. Mr. Speaker, for several months now, I have been doing everything that I can in attempting to ward off the pending fuel oil crisis which so seriously threatens my city of Chicago.

Today, I had the pleasure to appear before Senator MCINTYRE'S Small Business Subcommittee which has been looking into the national fuel oil emergency. In connection with this, I include in the RECORD my introductory remarks along with the excellent statement of Mr. Byron Weil, president of Oils, Inc., of Chicago:

INTRODUCTORY

Mr. Chairman: It is a pleasure for me to be here this morning to introduce to you, Mr. Byron Weil, the President of Oils, Incorporated, of Chicago. For several months now, I have been working very closely with Byron and with other representatives of the Chicago fuel oil industry in attempting to head off the grave fuel crisis which so seriously threatens our city. With the winter months fast approaching, the supply of residual fuel oil, so necessary to the operation of the city, remains at an extremely low level.

Mr. Chairman, Chicago has become an island with an insufficient energy supply source and I am afraid that there is a strong possibility that on several occasions this year, many of our citizens will have to face Chicago's famous winter without heat.

Mr. Chairman, we have tried everything. (I am sure that Byron will go into this in greater detail.) I have taken a Special Order on the House floor. I have written several letters to the President as well as to other government officials from the Secretary of the Interior, on down. I have had several meetings with representatives of both the Administration and the domestic oil industry. We have offered what we thought were reasonable alternatives that would at least provide short-term relief to an otherwise untenable situation—unfortunately our success has been limited. During all this time, which now seems like a year, Byron Weil has been a tremendous help to me and to the other members of the Chicago delegation in the Congress. He is a concerned and knowledgeable citizen who has spent much of his time and money in attempting to alert the people of Chicago to the danger of this situation. But, Byron doesn't just talk—he acts. I can think of no one who is better qualified to explain to your Committee the seriousness of the fuel oil crisis as it pertains to the city of Chicago.

STATEMENT OF BYRON S. WEIL

Mr. Chairman: Thank you very much for the privilege of appearing before you. My name is Byron S. Weil; I am President of Oils, Inc. of Chicago, Illinois. Our company is in the business of selling heating oils in the Chicago Metropolitan area, and the bulk of our business involves the sale of residual fuel oil (No. 6 oil). I have been in the fuel business for the past 25 years. Currently, I am a member of the American Petroleum Institute, the Illinois Petroleum Marketers Association, The Chicago Oilmen's Club, the Oil Heat Marketers Association and the American Society of Lubrication Engineers.

As a marketer of heavy fuel oil, I have been concerned for nearly a year about the adequacy of supply. Last January, it became increasingly evident to many that the country was headed towards a serious residual fuel oil shortage. Many refineries which had formerly supplied residual fuel oil to customers in the Middle West either had converted or were in the process of converting to the manufacture of coke, in place of residual fuel. Economically, this was a wise decision for the refiners, as petroleum coke has a long-range market potential at a far greater return than residual fuel oil.

The useable supply of residual fuel oil was reduced even further in many areas that had enacted pollution laws regarding the sulfur content of fossil fuels. We, along with all marketers in the Chicago area, have, of course, strongly supported the effort to clean up our environment, and agree that the use of high sulfur fuels has been a contributing factor to air pollution. As the Committee may know, the City of Chicago passed a new ordinance in the Spring of 1970 reducing the permissible sulfur content of fuels used in the City and the surrounding area. As a result of the new anti-pollution laws, consumers using coal have been forced to hunt for low sulfur coals which are not readily available, or convert their burners to either gas or oil. However, gas supply has also been short; for example, Peoples Gas Company in Chicago announced last June that there was a shortage of natural gas and that they would have to curtail new installations as well as cut back supplies to existing industrial customers.

As these problems developed, Oils, Inc., along with other fuel oil marketers in the Chicago area, were also giving notice to their customers and Governmental agencies, that there would be a residual fuel oil shortage during the Winter of 1970–71.

As the dimensions of the fuel oil shortage became clear over the summer, Oils, Inc. and others in the Middle West, applied to the United States Department of the Interior, Oil Import Appeals Board, for permission to import residual fuel oil into District II. We stressed the need to act quickly, as we were aware of the East Coast's problem, as well as that of Europe, in obtaining residual fuel.

On June 12th, Oils, Inc. led a group of concerned citizens and suppliers to a meeting with Congressman Dan Rostenkowski in order to familiarize him with the problems of the Mid West regarding residual fuel oil. Congressman Rostenkowski, on June 23, wrote President Nixon informing him of our problems and requesting action on the import quotas. On July 15th, Oils, Inc. headed a group of suppliers and consumers to Washington to meet with Senators Smith and Percy, Congressman Rostenkowski, and other Members of the House, again outlining our problems. On July 24th, the Oil Import Appeals Board granted quotas to seven of sixteen Midwestern suppliers based on a percentage of their appeal. In granting these awards, the Oil Import Appeals Board made the following findings:

"1. Residual fuel oil demand in areas served by the petitioners has increased significantly due to curtailment of natural gas sales to industrial, commercial and governmental purchasers of gas. This applies to new as well as historic users.

"2. New regulations to curb air pollution in many parts of the area served by these petitioners have necessitated the use of low sulfur fuels in facilities that had formerly used high sulfur coal. To meet fuel needs in the immediate future, oil must be imported because there is a general shortage of suitable domestic fuels, such as coal, natural gas, and residual fuel oils.

"3. Neither the consumers, nor the suppliers of domestic fuels anticipated shortages of suitable fuels as evidenced by depressed market conditions during the immediately preceding several years. In turn, the depressed market conditions contributed to the severe shortages by further reducing incentive to produce these fuels.

"4. The relaxation of East Coast residual fuel oil import control, announced in mid-1967, resulted in Gulf Coast residual prices being decreased to be competitive with foreign supplies. The economics then dictated that refiners develop more profitable markets for this material. This was accomplished by building refinery units such as cokers, deasphalting units and hydrocrackers, that would utilize most of these new facilities as inputs. Construction of most of these new facilities was completed in 1969 and early 1970 coinciding in time with the sudden demand outlined above.

"The Board concludes that the foregoing combination has created shortage of residual fuel oils of the desired quality in District II and has considered the requests of each petitioner to reach determination as to whether or not an exceptional hardship is suffered attributable to the limiting factors of the Mandatory Import Program. The Board has considered the physical capacity of the petitioner, its experience, and its record of sales."

After receiving our quota of 480,000 barrels, Oils, Inc. contacted some sixty sources of supply around the world, and offered to purchase low sulfur residual fuel oil. Oils, Inc. and the other Mid-Western suppliers were unable to obtain any product as a result of our strenuous efforts.

I can assure this Committee that we will continue these efforts to secure supplies from overseas sources, but, if we are unsuccessful, I would hope provision could be made for extension of these import allocations beyond March, 1971.

We have been in contact with most of the refiners in the country on many occasions in the past several months to determine whether supplies of residual fuel oil could be offered to us for the coming Winter. Our efforts met with little success. With the thought in mind that it might be useful to the Committee's record, I request permission to insert a series of letters which I have written to oil refineries in my own search for product.

As a marketer of significant quantities of fuel oils in the Chicago area, I can assure this Committee that the crisis of No. 6 is as serious in the Mid West as it is on the East Coast. Our hospitals, schools, factories and office buildings are threatened by a lack of heat in the months ahead. This must be considered as a serious threat to the health and welfare of the community. In the Chicago area many of the large consumers of fuel, such as the Chicago Housing Authority, University of Illinois and University of Chicago, as well as various city schools and hospitals, have in recent months requested but received no bids on their residual fuel oil requirements. Some have made requests for bids

as many as three or four times with no response. In my statement before the Oil Import Appeals Board, I outlined the problems faced by some consumers in the Chicago area and ask that this statement be included in this Committee's record.

We have received innumerable requests not only from consumers but from other marketers, such as ourselves, for supplies of residual fuel oil; and I ask that some letters from these marketers also be included in your record.

We estimate that the City of Chicago will have less than 75% of the residual fuel oil required to meet this winter needs. The shortage of No. 6 oil in Chicago is expected to be a minimum of 50,000 barrels per day.

I might also add a comment regarding No. 2 fuel oil, home heating oil. While we are not major marketers of this product, we, and many of the people in the Chicago area who do sell it, feel that No. 2 fuel will also be in very short supply within the next few months. I would, therefore, urge that this Committee and the Government agencies examining the fuel oil situation in the Middle West also consider the needs of that area for No. 2 fuel oil.

There are, I believe, several steps which the Federal Government could take to bring significant relief to our area. I hope that the Oil Policy Committee and the White House Emergency Committee headed by Dr. McCracken would give serious consideration to the following:

1. Immediate adoption of a residual fuel oil incentive program for refiners in Districts I–IV. Under such a plan, domestic refineries would be encouraged to produce residual fuel oil by awarding them an import license for 1 barrel of crude oil for every barrel of low sulfur fuel oil they produce.

There are a number of small refineries in Districts I–IV with excess capacity that could produce additional amounts of residual fuel oil, if sufficient incentive were created by the Federal Government. Existence of this capacity offers a real opportunity for the Federal Government to take steps now to avoid a recurrence of a residual fuel oil crisis in subsequent winters.

Adoption of an incentive plan would, I believe, strengthen our nation's security by increasing residual refining capacity in the U.S., which, in case of a national emergency, could operate exclusively on domestic crude oil. I ask that a partial list of such refineries be included at this point in the Committee's record.

2. Increase imports of crude oil into the Middle West from Canada, so that refineries in the area can turn out more heating fuels. I would also urge clarification of the Oil Import Regulations to assure quota-free importation of crude oil which can be burned as residual fuel oil.

3. If we and other Mid West marketers are unable to utilize fully the residual fuel oil import allocation granted by the Oil Import Appeals Board, we request that these import rights be extended beyond March 31, 1971, if supply conditions warrant.

4. I would also urge immediate study of the possibility, as a long-range solution to the problems of the Mid West, of giving that area access to overseas supplies of residual fuel oil on the same basis as District I .

Before concluding, I should like to present for your record, chronology of the residual fuel oil crisis that may be useful to the Committee.

We have been very busy trying to forestall this crisis and our efforts and the efforts of other marketers in the Chicago area have been exhausting and expensive and to date, unsuccessful. However, we will continue to do everything in our power to prevent a disaster in our area in the coming Winter. We hope that Federal officials here in Washington who establish U.S. oil policy will assist us in this effort and will consider adopting the proposals I have recommended—before it is too late.

Thank you very much.

---

## HIGHWAY TRUST FUND—INDIANA NEEDS

---

## HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. HAMILTON. Mr. Speaker, Indiana highway needs and the importance of the highway trust fund in meeting those needs were clearly stated by Mr. R. H. Harrell, executive director, Indiana State Highway Commission, in a speech delivered last Thursday morning to Indiana highway constructors meeting here in Washington:

SPEECH OF R. H. HARRELL

Our planned highway programs for fiscal 1971 and 1972 were prepared on the assumption that funds from the Highway Trust Fund would be available, on an annual basis, for the construction of the Interstate and the A. B. C. Systems, in about the same amount as was provided for in fiscal year ending July 1, 1970.

Plans have little meaning unless funds are available to do the proposed work.

Federal cut-backs (16 million dollars on July 9 of this year, the fourth time since the Trust Fund law was established), the more serious proposed legislation to divert Trust Fund money for other than highway purposes, and the new apportionment factor for distribution of funds for construction of the Interstate for fiscal years 1972, 1973 and 1974, as summarized in House Document #91–317, dated April 21, 1970, all are, or will, determine to what extent we can complete the planned programs and provide for our many highway needs. I suppose we were too optimistic when we prepared this wish list.

We were proud of our progress on the completion of the Interstate. At mid year Federal Highway Administration reports showed that Indiana was 6th in the Nation in obligating 1971 Interstate Funds. Purchase of right-of-way for the Interstate has advanced to the point where uncompleted sections can be let as fast as construction funds from the Trust Fund can be made available.

All network systems are important to the citizens of our State, but at this hour, the completion of the 972 miles of the Interstate System of Freeways, exclusive of the 157 miles of the Northern Indiana Toll Road, is, in my estimation, the most critical.

Indiana has 719 miles of Interstate open to traffic, exclusive of the Toll Road, 151 miles under construction, and 107 miles yet to be placed under construction.

The total cost of Indiana's 972 miles of Interstate, when completed, will be over 1.3 billion dollars.

The remaining 107 miles are estimated to cost over 300 million dollars.

Mr. Frank Turner, Federal Highway Administrator, in a reply to a writer for the Washington Post, stated that the new Interstate System of Freeways, is preventing both deaths and injuries. He estimated that since the Interstate program was launched in 1956, these modern, safe, highways have saved more than 35,000 lives that otherwise would have been lost on older, more dangerous roads, and has prevented more than a million injuries. Further, when the entire 42,500 miles of the System are complete, late in this decade, an estimated 8,500 lives will be saved annually.

Indiana's complete Interstate network cannot all be placed under contract before mid year 1976, if funds continue at the present rate, or at the rate that no doubt will prevail under the new distribution factor that will be applied starting with the 1972 fiscal year's obligation.

The final opening date, for the Nation-wide Interstate System, will be more than two decades after the enactment of the law and at least six years later than originally estimated.

This delay has been caused by extensions authorized, added safety features, changes in geometrics, environmental considerations, cut-backs and many other related factors.

In addition to the need to complete the Interstate, the Indiana State Highway Department has 4,367 miles of primary and urban highways and 5,986 miles of secondary roads that have not had, since the end of World War II, the many critical improvements needed to make these highways safe for the traffic load they are forced to carry today.

Traffic fatalities alone, on all of Indiana's highways, are over 1,600 persons per year, and a major portion of these are occurring on the primary, urban and secondary systems of highways.

Over 1500 miles of our total primary and urban system is in immediate need of major new construction and reconstruction. Also, an equal or larger mileage of the secondary system needs similar type construction.

Studies show that over 500 major bridges need replacement either because of their age, condition or inability to safely serve today's traffic volumes.

Railroad grade separations have been another of the forgotten programs which have not moved because of the lack of sufficient funds.

I have only attempted to list our major immediate needs, and by immediate I have arbitrarily set this time span at one decade since in today's society a six year or more time span is required from the time a project is first set in motion until a project can be open to traffic.

At today's price tags these programs are estimated to cost as follows:

$300 million required in the next 6 years to complete the Interstate.

$1.5 billion required in the next 10 years to improve the Primary and Urban Federal Systems.

$1.0 billion in the next 10 years for improvements to the farm to market or Secondary System.

$100 million for major stream and river bridge replacements.

$100 million for railroad grade separation structures.

or a total price tag of 3 billion dollars in this short span of 10 years.

Now to give you an idea of the magnitude of the apparent available funds to finance these needs, should the present methods of financing continue at about the present level, and without diversion of vehicle taxes to other modes of transportation or programs:

About $85 million per year estimated to be available from the Federal Highway Trust Fund.

$60 million of this for the Interstate on a 90–10 percent matching basis. $25 million for the A.B.C. program which is matched on a 50–50 basis. This A.B.C. money is allocated to the States on the basis of one-third on State area, one-third on State population and one-third on each State's mileage of rural delivery and star routes.

$30 million per year available from Indiana's six cents motor fuel tax, which is needed to match Federal money and to take bids on miscellaneous State projects not eligible for Federal participation.

$30 million per year from Indiana's recently enacted 2 cents increase in gas tax,

restricted to the construction of Primary Roads, generally known as "killer highways".

These sources of road building funds total $145 million per year, or a little less than $1.5 billion over a ten year period.

With the ten year needs price tag set at over $3 billion, you can see Indiana will continue to drop seriously further behind in meeting our highway needs in this decade.

It has been my good fortune to have worked for the Indiana State Highway Commission for over 40 years or just a few years short of the total time we have had a State Road System in our State.

The estimates I have given you today are not altogether based on detailed studies, but are estimates that combine prior factual information with personal knowledge gained by close association with the State Highway Road System.

You, I am sure, are well acquainted with the sources of the tax levies that are collected for the Highway Trust Fund.

But you may not realize that Indiana does not get what could be considered a fair return from amounts collected from our taxpayers.

To give you an example, available records show that Indiana taxpayers contribute 173.4 million dollars of auto excise taxes to the Federal General Fund in 1968, 127.5 million dollars went into the Federal Trust Fund for highway construction. In fiscal year 1970 Indiana received authority to obligate 98 million dollars from this source.

So you can see that Indiana taxpayers are, even now under present distribution formulas, making substantial contributions to the road programs in other States—why permit other diversions.

In the opinion of Governor Whitcomb, the majority of our State Legislators and the public in general, who have not voiced that first complaint on the recent 2¢ increase in motor fuel tax, Indiana needs the continuation of the Federal Trust Fund, at least at the present level, and without periodic cutbacks or diversions of any of these funds to other than what it was intended when the law was enacted—that is for road construction.

I personally want to thank each of you for giving our Highway Department this opportunity to present this paper to you. Also, to seriously solicit your support ot see that taxes collected to build highways are retained for that purpose and without cutbacks.

## THE 60TH ANNIVERSARY OF CARNATION FARMS

### HON. LLOYD MEEDS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. MEEDS. Mr. Speaker, this year marks the 60th anniversary of Carnation Milk Farms located in north-central King County in my district. The achievements of the farms in animal husbandry have been highly successful and have contributed greatly to our agricultural prosperity. Pet lovers can take satisfaction in Carnation's continuing research and development of feline and canine nutrition.

Recently, Gov. Daniel Evans, of Washington, issued a statement commending Carnation Farms. I would also like to extend my best wishes for Carnation's future and would like to incorporate the Governor's statement in the RECORD at this point:

A STATEMENT BY THE GOVERNOR

Relative to commendations to Carnation Farms on its 60th anniversary.

Carnation Farms was purchased by Elbridge Amos Stuart in 1910 and is now celebrating its 60th anniversary. It has grown from 360 acres which were stump-ridden and often flooded, and is now 1,150 acres given over to animal research and nutrition.

The Holstein-Friesian breed and dairy industry breed has prospered over the years because of the Farms superior breeding developments. The first direct mail campaign to sell Registered Holstein Bulls to American dairy farms was begun here.

The first statue of a cow in the United States Segis Pietertje Prospect ("Possum Sweetheart") was erected in 1928 to honor this champion's milk and butter fat production. A herd of Purebred Polled Herefords are maintained whereby research and beef breeding management and nutrition have been extended.

The recent artificial insemination industry has grown from its national and international activities.

A sizeable cattery facility was recently erected to serve as a center for major feline nutrition and food acceptance research.

Friskies Research Kennels have studied the nutritional needs of dogs for nearly 40 years. Present facilities include research operations for livestock, poultry, pets, calves, rabbits and other small animals.

Now, therefore, I, Daniel J. Evans, Governor of the State of Washington convey greetings and congratulations on the milestone on its 60th anniversary, and wish the Farms continued growth and vigor in its service to animal breeding and nutrition the world over.

DANIEL J. EVANS,
*Governor.*

## CURL NAMED AFA "MAN OF THE YEAR"

### HON. JACK BRINKLEY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. BRINKLEY. Mr. Speaker, "Every Day in Middle Georgia Is Air Force Appreciation Day" is the motto of Dr. Dan Callahan of Warner Robins, Ga., president of the Middle Georgia Chapter of the Air Force Association. This attitude is reflected in the excellent civilian-military community relations at Robins Air Force Base, Ga.

That relationship is a splendid credit to Maj. Gen. A. J. Beck, commanding general at Robins Air Force Base, and to the Air Force Association.

In the AFA Profile issue of Monday, September 21, 1970, there appears the following news article which merits special attention and a well done to the individuals and units selected as superlatives:

CURL NAMED AFA "MAN OF THE YEAR"—GEORGIA WINS "TOP UNIT" TROPHY

The men, women and organizations whose efforts helped advance the goals of the U.S. Air Force during the past year will be honored today during opening ceremonies of the Air Force Association's annual meeting.

The ceremonies, keynoted by Daniel Z. Henkin, assistant secretary of defense for public affairs, will be in the Park Ballroom of the Sheraton Park Hotel. Awards will be presented by George D. Hardy, president of AFA.

Individuals and organizations and the awards they will receive are:

"AFA Man of the Year": Lester C. Curl, Southeast Regional vice president.

"AFA Unit of the Year": The Georgia State Organization (William Kelly, president).

Special Citations (Unit): Billy Mitchell Chapter, Wisconsin; Tucson Chapter, Arizona; Santa Monica Chapter, California; Richmond Chapter, Virginia.

Special Citations (Individual): Maj. Melvin Bailey, Washington, D.C.; Jack T. Gilstrap, Alabama; Maj. Gen. A. J. Beck, Georgia; Joe Higgins, California; Foreign Liaison Division, Office of the Vice Chief of Staff, USAF.

Exceptional Service Plaques (Unit): Middle Georgia Chapter, Ga., community relations; San Bernardino Area Chapter, California, unit programming; Tennessee Valley Chapter, Alabama, aerospace education; and Utah State Organization, best single program.

Exceptional Service Plaques (Individual): Will H. Bergstrom, California; Cecil Brendle, Alabama; B. L. Cockrell, Texas; A. Paul Fonda, Washington, D.C.; James Grazioso, New Jersey; William Kelly, Georgia; Robert Lawson, California; Nolan W. Manfull, Utah; Sam E. Keith, Jr., Texas; Edward Nedder, Massachusetts; Jack Price, Utah; Margaret A. Reed, Washington; Clyde Stricker, Washington, and Herbert West, Florida.

Medals of Merit: Peter Augustus III, Massachusetts; S. Samuel Boghosian, California; Noel A. Bullock, Colorado; Dr. Dan Callahan, Georgia; Jerry Cleveland, Utah; Margaret M. Foster, California; Gerald Frewer, Florida; Paul Gaillard, Nebraska; Darlene Galbraith, Utah; John Haire, Alabama; Alexander Harris, Little Rock, Ark.; Robert Hunter, Ohio; Glen Jensen, Utah; Robert Maltby, Ohio; A. D. McCall, Texas; Maj.-Gen. Frederic Miller, Florida; J. Gilbert Nettleton, Jr., New York; Dick Palen, Minnesota; Gilbert E. Petrina, Pennsylvania; William C. Rapp, New York; V. M. Rexroad, Washington, D.C.; Dr. Robert H. Saber, Florida; Robert J. Schissell, Washington, D.C.; Norman L. Scott, Michigan; Thomas W. Shoop, Colorado; Edward A. Stearn, California; Hugh W. Stewart, Arizona; Lynn S. Summers, Utah; John F. White, Massachusetts, and Clair G. Whitney, Washington.

Top Membership Winners: Middle Georgia, top chapter; Georgia, top state organization, and Southeast, top region.

## TRIBUTE TO OUR FLAG

### HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. LONG of Maryland. Mr. Speaker, one of my constituents, Mrs. Leota D. Martin, of Edgewood, Md., wrote a tribute to our flag on the occasion of Flag Day. I should like to share her well-expressed sentiments with my colleagues by including the poem in the RECORD:

TRIBUTE TO OUR FLAG

Only some stripes of Red and White
And, some stars on a ground of Blue
Only a little cotton Flag
Is it anything more to you?

Oh, yes indeed—for beneath its folds
We are safe on land and sea
It stands for America strong and brave
No matter wher'er it be.

As we pay tribute to our flag today
Of Red and White and Blue
And to our great democracy
To which our hearts are true

May God be always with us
And our Flag forever wave
Above our land of Freedom
And, the homes of all our brave.

## RHODESIA DESERVES RECOGNITION NOW

### HON. ODIN LANGEN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. LANGEN. Mr. Speaker, November 11, 1970, marks a particularly significant day. Notwithstanding the annual observation of Veterans' Day here in the United States, halfway around the world the people of Rhodesia will mark their fifth anniversary as an independent nation. Some in certain circles will attempt to pooh-pooh this occasion or to dismiss it as unfortunate. However, the time has come to face the simple fact that in spite of overwhelmingly hostile odds and anegative world public opinion, the Rhodesians do in fact exist as a completely autonomous people, and their 5 years of independence have been marked by significant economic progress, domestic peace and harmony, and a determination to work for a better tomorrow.

We who have known a traditionally warm friendship with the Rhodesian people, we who have benefited from a decisively favorable commercial relationship with that nation, and we who have set ourselves as an example to others by our self-proclaimed Declaration of Independence, have now for the past 5 years been led down a path of fruitless fantasy. We have been kidded into believing that somehow Rhodesia constitutes a "threat to world peace" and that the Rhodesians have instituted a form of government one step removed from the barbaric Dark Ages. These things are simply not true, and those who believe in such manner are sadly deluded.

However, I am not going to plead Rhodesia's moral case—that has been done many times before and simply leaves Rhodesia's critics without answer. Instead, I am merely going to state some plain, hard, unemotional facts—facts so obvious that no one should miss them. Fact No. 1—Rhodesia is moving toward her fifth anniversary as a completely autonomous state. Fact No. 2—all feeble cries notwithstanding, Great Britain exerts absolutely no sovereignty over Rhodesia and after 5 years of inconclusive activity has in reality abandoned any substantive claim to suzerainty over that former African possession. Fact No. 3—the Secretary General of the United Nations, Mr. U Thant, only recently admitted publicly that the U.N. program of economic sanctions against Rhodesia has been an utter and complete failure. And fact No. 4—both the United States and Great Britain have already gone on record in the U.N. Security Council as vetoing any stronger measures, particularly the use of armed intervention, against the people of Rhodesia.

Therefore, on the simple basis of commonsense, it is time for the United States to pull its head out of the sand and to view Rhodesia in the sunshine of reality. Accordingly, at this time I am introducing a House concurrent resolution which proposes that the United States immediately take steps to grant full diplomatic recognition and to restore full economic and social contact with Rhodesia. I call upon each Member of both the Senate and the House to join with me in introducing this legislation before his respective body, and for the prompt enactment of this resolution to aid the President in making this reasonable, necessary, and proper change in American foreign policy. For the information of my colleagues, my resolution reads as follows:

CONCURRENT RESOLUTION EXPRESSING THE SENSE OF THE CONGRESS WITH RESPECT TO SANCTIONS AGAINST RHODESIA

Whereas the constitutionally elected Government of Rhodesia, with the full support of the Council of Chiefs, declared Rhodesia's independence on November 11, 1965; and

Whereas on November 11, 1969, the Government of Rhodesia observed its fourth anniversary of continuous, effective, and peaceful control over its legal territory and population; and

Whereas Rhodesia has shown continuous economic growth and stability during almost five years while being subjected to unprecedented economic sanctions; and

Whereas the Government of Rhodesia has clearly established itself as the de jure sovereign over the legal territory and population of Rhodesia; and

Whereas Rhodesia is not hostile to the United States nor an enemy of the United States either under international law or under the laws of the United States, but rather has established a tradition of warm friendship between the people of Rhodesia and the people of the United States as evidenced by the fact that Rhodesia has fought beside the United States through two wars and the fact that there have been no wanton acts of violence against American lives or property; and

Whereas United States citizens continue to be warmly welcomed in Rhodesia as would our Government representatives; and

Whereas Rhodesia is one of the very few countries in Africa which pays her own way and receives no United States aid and that trade between our two countries before sanctions had been running two to one in our favor, all on a commercial basis with no subsidies, thereby assisting our balance of payments; and

Whereas, according to the Constitution (article I, section 8, paragraph 3), only the Congress has power to regulate commerce with foreign nations and the Executive has no legal authority to block trade except under laws which control trading with the enemy; and

Whereas the United States Government, without any authority from the Congress or the American people, has adopted and encouraged a stringent policy of economic sanctions and has broken all diplomatic and consular contacts with Rhodesia; and

Whereas these sanctions have caused the United States to lose a major source of high grade metallurgical chromite ore which is militarily and industrially vital to the security of the United States; and

Whereas the United States has become almost wholly dependent on the Soviet Union for its supply of this high grade metallurgical chromite ore; and

Whereas the United States and firms doing business therein are forced to purchase high grade metallurgical chromite ore from the Soviet Union at prices ranging as high as 100 per centum greater than that at which high grade metallurgical chromite ore produced in Rhodesia can be purchased; and

Whereas United States citizens have extensive commerical interests in Rhodesia which have been severely damaged by the arbitrary application of economic sanctions; and

Whereas such United States citizens have even been prevented from performance of valid contracts and other legal and moral obligations, to their present and future great loss; and

Whereas the economic sanctions have deprived Africans in Rhodesia and from neighboring countries of employment in occupations directly affected by the sanctions: Now, therefore, be it

*Resolved by the House of Representatives (the Senate concurring)*, That it is the sense of the Congress that the United States Government immediately cease its inhumane, imprudent, and economically and militarily disastrous policy of economic sanctions against Rhodesia; take necessary steps to restore normal trading relations; and accord full recognition and all diplomatic and consular rights attached thereto to the legal Government of Rhodesia.

## CARNEGIE-MELLON PROFESSOR CITES COMPUTER TO AID CRIMINAL JUSTICE SYSTEMS

### HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. MOORHEAD. Mr. Speaker, the Subcommittee on Economy in Government of the Joint Economic Committee, on which I serve, has had 2 days of hearings designed to focus on the most effective allocation of Federal resources to reduce the incidence of serious crime.

Witnesses have discussed ways to improve the court system, youth programs, new measures to deal with the impact of crime on small business, the need for Federal policies to deal with the alarming acts of terrorism such as bombing in our cities and on the campuses, and the functioning of the Federal Law Enforcement Assistance Agency and companion State agencies set up under the Safe Streets Act of 1968.

I am very pleased that Dr. Alfred Blumstein, director of the Urban Systems Institute at Carnegie-Mellon University, Pittsburgh, who served as Director of the Task Force on Science and Technology on President Johnson's Crime Commission agreed to testify this morning.

His testimony emphasizes the need for better collection and relation of social data to aid in finding new or alternative approaches in our criminal system. Under a $50,000 research grant from the Law Enforcement Assistance Administration, Carnegie-Mellon recently ran a training course in systems analysis for 30 planners from the Mid-Atlantic States. Dr. Blumstein cites the need for more funds for this type of effort in other areas of the country as well as a greater link between those who do the research and carry out the plans on the local level. His excellent

testimony is included for the benefit of my colleagues herewith in the RECORD:

Senator Proxmire and members of the committee, I am particularly pleased and honored at the opportunity to appear before this distinguished Committee and to contribute to your deliberations on the problems of crime and particularly the operation of the criminal justice system in the United States.

The members of this Committee know very well the frequently repeated statistics regarding the annual increases of about 10 to 15% in crime rate statistics. There may be some question about how much of this increase is due to reporting rate increases and how much is due to more crimes. There may be some question about how much is due to people becoming more criminal, and how much is due to having more people with higher criminal propensities in the population. But very few people will deny that the crime rate has seriously increased over the last decade.

In response to these trends in the crime rate—or to focus more directly on the issue of concern, the victimization rate—President Johnson's Crime Commission paid particular attention to the need to deal in an integrated way with the component parts of the criminal justice system. It is necessary to recognize that what police do has an impact on the courts, that defendants pleading guilty or convicted in the courts must be dealt with by corrections, and that the failures of corrections are subsequently visited upon the police and the society at large as offenders back on the streets committing more crimes.

This emphasis on the "systemness" of the criminal justice system was reflected in the 1968 Omnibus and Safe Streets Crime Control Act, which created state criminal justice planning agencies in each of the states, established the Law Enforcement Assistance Administration, and within it the National Institute of Law Enforcement and Criminal Justice to undertake a significant research program.

The state planning agencies were to develop plans and programs to deal with the crime problem, to foster innovation within the time-encrusted criminal justice system, and to allocate Federal resources across the total criminal justice system.

These state planning agencies are the closest approximation to "system managers" within the criminal justice system. They are the channel through which Federal block grants are routed to the states. They can thus exercise a significant influence through the $480 million Federal program, a sizeable increment of almost 10 per cent over the current six billion dollar state and local expenditures on the criminal justice system.

Unfortunately, far too few states have engaged in meaningful planning. In most cases, the state planning agencies react rather than initiate—they approve or reject grant applications generated by the existing agencies much more than they "plan" in the sense of making projections into the future and testing alternative programs against such projections. While there have been some important ideas generated at these levels, it is understandable that the inertia of the system has not been overly creative in generating change or in fostering closer interaction between the police, courts, and corrections.

In large part, these state planning agencies have been limited by the very inadequate methodology that has been available to them. We know very little in a quantitative sense about what causes crime, and about the consequences in terms of crime of the many things we try to do to control it. We try an innovative community treatment program in one jurisdiction and it proves to be a remarkable success; when it is picked up in another jurisdiction with less innovative drive than the first, the success is less than remarkable. When a new director of a police planning bureau allocates his forces efficiently and someone else tries to apply those methods in another jurisdiction, statutes or police rules and regulations prevent him from adopting those procedures. We still cannot definitively determine how much good we accomplish with better street lighting, more intensive police patrol, stiffer maximum sentencing or smaller caseloads for probation officers.

This great gap in our knowledge makes it extremely difficult to project about crime and to plan rationally the operation of the criminal justice system. These conditions should cause deep concern and should bring about a concerted effort to remedy this situation. Nevertheless, the Congress has seen fit to appropriate only $7.5 million for the National Institute of Law Enforcement and Criminal Justice, the research arm of LEAA. Thus, it is not very surprising that the state planning agencies do more grant management than planning.

Part of our efforts at Carnegie-Mellon University this past year have been devoted to developing a computer model to aid state criminal justice planners in planning for their state criminal justice systems. This computer model treats the criminal justice system as a sequence of processing stages through which crime reports, suspects, defendents, cases, charges, and offenders flow. At each of the stages in the system, the flow of offenders is characterized by "branching ratios" which depict the proportion of units processed at tht stage that flow to each of the possible output stages. Using data on the costs and resources (such as judges or prison cells or patrolmen) used at each of the stages, it becomes possible to examine the resource implications of any contemplated changes within the criminal justice system. This computer model has been developed so that it is available to any state planner and is usable at a teletype terminal at his desk from some central time-shared computer facility.

Just last week, we ran a general training course in systems analysis for key personnel of each of the states in the mid-Atlantic region of LEAA. We were all very impressed with how quickly these planners—most of whom had no technical education and most of whom had never used a computer terminal—learned to use this planning tool. Within just a few hours of operation, these people were exploring the effects on the downstream parts of the criminal justice system of a wide variety of changes. What happens if we introduce public defenders into the lower court? An important argument limiting the expansion of the use of public defenders is the cost involved. It was found, however, that greater use of public defenders reduced the workload on the superior court and reduced the number of offenders sent to corrections. These cost savings would more than compensate for the cost of the additional lawyers. This, of course, is an advantage beyond the enhancement of the quality of justice dispensed.

Similarly, if we were to speed up the processing of cases at trial by such means as introducing more judges, then we might expect to reduce the time defendants have to spend in pre-trial detention. This cost saving may well be large enough to more than pay for the additional judges assigned to the courts. Again, cost advantage is in addition to the many other social values of a speedy trial—avoiding excessive detention of the innocent and swifter punishment to the guilty.

The comments by the participants in this course reflected the considerable value of even this very preliminary system planning model. Police officials were intrigued by being forced to face the consequences of what happens eventually to the people they arrest.

All the planners were forced to consider what happens in the system when they introduce a new program like expanded use of public defenders. Are more cases nolled because of an effective defense presented? Are more cases brought to trial? Are more cases pleaded guilty in order to receive lighter sentences? In the process of making such assumptions, the system planner has a tool by which he can test the implication of a variety of assumptions regarding the system he is planning. If he finds the consequences of his assumptions unacceptable—e.g., more demand for trials will call for too many judges—either he made the wrong assumptions, or he had better revise his intended plan for the criminal justice system. Thus, a model like this provides the planner with a tool which he can use to explore a wide variety of revisions within the criminal justice system.

One of the fundamental shortcomings of our model is that it does not yet incorporate the "feedback" effects, that is, it does not tell him the reduction of crime—both due to recidivism and due to the failure of deterrents that result from his various possible actions. He must still guess at those effects, largely because the appropriate data have not been collected and organized. We hope in our future work to be able to bring in data on recidivism probabilities in order to reflect the effect of the programs on crime rates.

The saddest part of the exercise involving our criminal justice planners was their universal feeling that, while the model was exciting and the availability of the tool was particularly important, their own states did not yet have the data necessary to use it immediately. They acknowledged that the model was a particularly valuable device for identifying how to collect the data in a consistent form relevant to the planning decisions to be made, but they were most skeptical that their states would soon commit the effort to collect the data.

This is an unfortunate reflection of the status of our social data. Think of where the science of economics and the practice of business management would be today without the enormous commitments made by the United States over the past three decades for the collection of a wide variety of economic data. Think of where the physical sciences would have been were it not for the major commitments by institutions such as the National Bureau of Standards, to collect basic physical measurements. In the social sciences and particularly in dealing with crime, we are little beyond the Middle Ages in terms of our understanding. In most states, particularly those that have a "minor judiciary" or local lower courts, all the criminal action that passes through them goes virtually unnoticed by anyone other than the individual magistrate. In the United States last year, we had about 7.5 million people arrested for non-traffic offenses, a rate that has increased about 25% since 1960 and has about doubled for persons under 18 years. These arrests are reasonably well reported by the FBI.

As soon as we try to follow these arrestees through the courts and into corrections, however, we find that we lose well over 90% of these, since an average daily prison population in the U.S. is about 200,000 persons. We don't know where in the courts they drop out and for what reasons, and we have a very poor idea of how many are languishing in what form of jail. The institutionalized population in state prisons is thus only a very small portion of those who run afoul of the law.

This high dropout rate suggests that the threat of imprisonment may not be the effective deterrent force many would wish it to be. One might, for instance, run a very simple

calculation to try to measure the "expected risks and benefits" to a burglar contemplating a burglary. The average value of property stolen in a burglary is about $300. An individual who commits a burglary, on the average, has about a 1% chance of ending up in prison for that burglary. If he does go to prison, his sentence may be about three years or 1,000 days. Thus, his "expected sentence" is one per cent of 1000, or about 10 days. Thus, if he were to value his time at any less than $30 per day, then he might be quite "economically rational" to undertake the contemplated burglary. This very superficial review, of course, does not take into account the complexities of the "irrationalities" in the decision-making behavior by a potential burglar, the details of his own case (an individual with a prior prison record is much more vulnerable than one without), nor does it try to account for the wide variety of factors that he individually takes into account. It does serve to highlight, however, the fact that most offenses do not result in a direct punishment for that offense and that the deterrent threat of the criminal sanction is inherently limited.

These data also emphasize that in our determined concern to use the criminal sanction for deterrence, we see many arrests, but a very small amount of imprisonment. It may just be, for instance, that we are extending our arrest far too broadly. Our studies for the Crime Commission some years ago indicated a projection that a 10 year old boy would have about a 50% chance of being arrested some time in his life for a non-traffic offense. That was based on 1965 arrest rates, and those rates have been going up since, so that that estimate is likely to be conservative today. It may well be that making all these arrests may well reduce rather than enhance deterrence. To the extent that people are deterred by concern over the stigma of an arrest record, we reduce that concern once we give a man an arrest record. He may have less to lose the next time, and so may be less deterred. It may just be that in this respect, as well as in others, the criminal justice system operates in a counter-productive way. Furthermore, the job discrimination suffered by those who have an arrest record, particularly if his employer thinks arrest is a rare phenomenon, can be a serious hindrance to avoiding the conditions that led to his arrest in the first place. We should consider purging minor arrest records after a reasonable time so that we can renew this stigma aspect of deterrence as well as enhancing the habilitation of half of our males.

It may well be that we are blunting the criminal sanction by using it for such private behavior as gambling, prostitution, homosexuality, drunkenness, and marijuana smoking. We thereby clog the courts, the jails, and thereby weaken our ability to use these weapons against the crimes of robbery, murder and burglary, which concern us all so much more.

Consider, if you will, a theory which suggests that a society strives to keep a constant proportion of its population imprisoned. If that proportion gets too large, then the society would have to build more jails, and it may not be willing to pay that expense. Or it may not want to see so large a segment of the population identified as ultimate deviants. On the other hand, if the proportion in prison gets too small, then the society would not want to appear excessively permissive, and sends more people to prison. If that theory is correct, then with all the increase in arrests, the courts and corrections must find means of dropping people out of the system through legal technicalities, through nolles, through acquittals and dismissals, through probation or other community treatment, and through shorter sentences or earlier parole.

The evidence, in fact, does seem to indicate that the United States does have such a stable imprisonment rate (about 100–120 per 100,000 population). And we are finding more and more means to avoid imprisoning the greatly expanded number of arrested individuals. Perhaps this lies at the heart of much of the conflict between the police and the rest of the system. Perhaps people have been getting worse, or perhaps the police are merely resorting more often to the formal mechanism of arrest rather than the informal lecture many of us received as boys. Perhaps we must finally clear up our criminal laws to focus them on those issues that concern us most, and not to mock them by appearing to apply them where they are ineffective and where they may well do more harm than good.

I recognize that changing such concepts is a long, slow, difficult process. How many legislators are willing to come out "for" adultery or gambling or prostitution? And changing the relationships within the criminal justice system is similarly difficult. Our perceptions to crime and criminals seem impervious to the knowledge that most people commit crimes and most males will get arrested. The component agencies of the system still seem to be working more in conflict than in concert. The institutions within the criminal justice system have been specific targets of the entire LEAA program. Nevertheless, one would have great difficulty identifying where there have been significant positive improvements as a result of the LEAA program. We can only hope that, as the program significantly expands this year with the infusion of a half billion new dollars, that significant forces for innovation and change will be gathered. I must confess that I am not overly optimistic. How much can we expect with an investment of 0.1 per cent of criminal justice budget in research, 1/30th that which any responsible corporate executive would spend in improving his operations.

## MAKING CONGRESS MORE EFFECTIVE

### HON. SEYMOUR HALPERN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. HALPERN. Mr. Speaker, I commend to you a report by the Committee for Economic Development, entitled "Making Congress More Effective," which was released to the public today.

This report by a most prestigious organization is the result of a long study into the role and operations of the Congress. Many of its conclusions and recommendations are good, many are thought-provoking, and a few I might disagree with—but all of them are so vital to the operations of this body that I believe everyone should read this document.

At this time, I am inserting in the RECORD a summary of the conclusions and recommendations by the CED. I think you will agree that a study of the entire document is very worthwhile:

SUMMARY OF CONCLUSIONS AND RECOMMENDATIONS

Facing issues of unprecedented magnitude and scope, Congress—like most other human institutions—is reluctant to modify its long-established, habitual ways of doing business. Continuing delay in modernization of Congressional structures and procedures, however, will surely be injurious to the national interest and can lead only to further erosion in influence and effectiveness of the Legislative Branch.

Recognizing the complexities and obstacles standing in the way of change, we have limited the recommendations in this statement to proposals designed to overcome weaknesses without undertaking a complete remodeling of the present system. No further reference is made, for example, to the possible substitution of multi-member for single-member districts in the House of Representatives, or to changes that would require amendment of the Constitution.

In the following chapters we advocate significant modifications that are both pragmatic and immediately practicable, dealing with three separate though interrelated fields of action. *First*, we urge fundamental improvements in the Congressional handling of fiscal-economic decisions. *Second*, we propose readjustment of the entire committee structure and of the procedures associated with it. *Third*, we strongly support divestment by Congress of inessential and unsuitable administrative burdens, together with other measures that would strengthen public confidence in its objectivity.

The present Congressional approach to fiscal affairs is indefensible. When budget decisions are extended long past the beginning of the fiscal year for which they are intended, when there is no Congressional mechanism to tie revenues and appropriations into a coherent pattern, when no legislative procedure exists to initiate actions based on a comprehensive view of the economy, then national stability is endangered. When Congress permits its evaluation and oversight of programs to be carried out in ways that allow the continuance of obsolete programs and the wasteful management of potentially useful ones, then both the credibility and the effectiveness of the entire national government are seriously harmed. To correct these conditions we recommend that:

Means for comprehensive review of the annual budget be established and used, relating to total revenues and expenditures to the state of the economy.

Annual authorizations be discontinued; instead, authorizations should be made along programs and project lines fully funded, for minimum terms of four years.

Evaluation of program performance, in terms of objectives as well as dollars, be heavily stressed.

The federal fiscal year be changed to coincide with the calendar year, so that appropriations may always precede expenditures.

Congress establish and observe deadline dates for both authorizations and appropriations.

The committee system has the crucial role in Congressional decision making. As it now operates, however, decisions are fragmented; problems demanding a broad policy approach are handled in piecemeal fashion and hence poorly by the many autonomous committees and their innumerable subcommittees. These committees carry out much of their work in obscurity or secrecy which can be and often is maintained—even against the inquiries of other Members—in defiance of the elementary tenets of democracy. Through the assignment system that determines their makeup, and by means of restrictive procedures, committees can be dominated by small groups of Members with special interests held in common—or even by the desires of a powerful and autocratic chairman. These conditions prevent Congress from making open and effective response to urgent national needs. Therefore, we recommend:

Fewer standing committees, with broader jurisdiction for each.

Better use of joint and select committees.

More flexible subcommittee arrangements, with rotating chairmanships.

Abandonment of seniority as the sole criterion in selecting committee chairmen.[1]

Democratized procedures, with many more open hearings.[2]

Better informational and analytical resources for committees.

There is no doubt that there has been an erosion of popular respect for Congress. This is injurious to the nation as well as to Congress as an institution. Citizens are now insisting that every level and branch of government become more responsive, more open to the demands of all the people, more attuned to current priorities, and less bound by traditional approaches or endless red tape. In the face of these trends Congress has appeared to fold in upon itself. Its endless involvement with minor details of administrative management and its open and attentive solicitude for special interest groups contrast with its negative reaction to many concerns of the general public. Prompt action on several fronts is needed to restore public trust. Hence, we propose:

Relinquishment of detailed direction of all administrative functions unsuited to management by a legislative body or by any committee of such a body.

Stronger "Codes of Ethics."

Assurance of majority rule on major issues in both chambers.

Installation of modern voting procedures which would eliminate the secrecy surrounding teller, standing, and voice votes in the House of Representatives.

Thorough reform of campaign finance, with full disclosure and tax incentives for contributions.

Prohibition of committee meetings while sessions of the chamber are in progress.

Acceptance of these recommendations would do much to improve Congressional operations and to enhance the Congressional image.[3] Fortunately, there are no legal barriers to their adoption; changes in House and Senate rules, modification of outmoded customs, or statutory enactments in some few cases, would suffice. The Members can make the necessary changes whenever the majority chooses. Congress has considered and debated many of them in recent years, so far to little or no avail.[4] It is now time to correct obvious weaknesses. The defects of Congress are not congenital; its wounds are self-inflicted.

---

## WHY THERE ARE SOME SAVINGS AND LOAN REGULATORY AMENDMENTS IN THE FORTHCOMING OMNIBUS HOUSING BILL

---

### HON. LEONOR K. SULLIVAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mrs. SULLIVAN. Mr. Speaker, the omnibus housing bill on which we are to vote in the Banking and Currency Committee next week, H.R. 19436, now contains a number of amendments based on recommendations of an ad hoc Subcommittee on Home Financing Practices and Procedures which it was my privilege to head as chairman. This subcommittee had investigated conditions in inner city residential real estate transfers, primarily in the District of Columbia, and found some serious abuses involving federally insured savings and loans.

The full text of the report of the ad hoc subcommittee was printed in the CONGRESSIONAL RECORD of July 31 at pages 26880–26889.

The amendments agreed to in the Banking Committee to the omnibus housing bill last week, to carry out some of the unanimous recommendations of the ad hoc subcommittee, relate to the authority of the Federal Home Loan Bank Board to regulate conflicts of interest by officials of savings and loans; making it a Federal crime to submit false statements or claims in applications for loans from federally insured savings and loans; bringing all federally insured savings and loans in the District of Columbia under the clear authority of the Home Loan Bank Board for regulatory purposes even if they are not federally chartered; and setting up a new office of Assistant to the Secretary of the Department of Housing and Urban Development to assist nonprofit organizations to find their way through the maze of paperwork in participating in special programs of housing assistance for low-income families.

Another proposal from the ad hoc subcommittee prohibiting the use of straw parties in real estate transactions except under clearly defined circumstances has not yet been acted on in committee and may be offered on the floor instead because of the parliamentary situation in the committee on the omnibus bill, which is now ready for final action.

#### UNANIMOUS RECOMMENDATIONS OF AD HOC SUBCOMMITTEE

These five proposals were part of a series of suggestions for improvement of home financing practices made by the ad hoc subcommittee which also included Representatives HANLEY, BRASCO, and MIZE.

In our proposal for strengthening the powers of the Home Loan Bank Board in regulating conflicts of interest in insured savings and loans, we cited the importance of setting standards for appraising, as well as more effective limitations on the borrowings of any single individual from an insured savings and loan. We dealt also with the provision of goods or services to savings and loans by officers or directors of the association, or by close relatives or business associates. But the amendment does not itself try to write such standards.

Mr. Speaker, for a recent explanation as to why these reforms are needed, I submit for inclusion in the RECORD the text of a talk I gave on September 11 to the Greater St. Louis Savings and Loan League, as follows:

ADDRESS BY CONGRESSWOMAN LEONOR K. SULLIVAN, DEMOCRAT, OF ST. LOUIS, MO., MEMBER, HOUSE COMMITTEE ON BANKING AND CURRENCY, AT GREATER ST. LOUIS SAVINGS AND LOAN LEAGUE MEETING, CHESHIRE INN, ST. LOUIS, MO., FRIDAY, SEPTEMBER 11, 1970, AT 12:15 P.M.

Whenever I meet with officials of the savings and loan industry, which is often, the conversations seem to reflect what I believe the psychologists refer to as the "love-hate" relationship—they "love" me for what I have done *for* the home-building industry and for the savings and loans through my work as a ranking Member of the House Committee on Banking and Currency, and they "hate" me for some things they feel I have done *to* them, or about to do to them.

As the Committee Member who successfully offered the amendment which increased the insurance of bank deposits and savings and loan share accounts from $10,000 to $15,000 some years ago, and as the sponsor of the provision in the 1969 Act which subsequently raised those limits to $20,000, I have received many expressions of appreciation from your industry. And, as most people in the savings and loan field in Missouri know, it was a bill which I introduced about five years ago—after the problem was called to my attention by the Missouri League—which led to the enactment of the Savings and Loan Holding Company Act of 1966. And, for that, too, I have received many thanks. Also, as most of you know, I have helped to write many new provisions of the housing laws which have benefitted savings and loans, as well as home-buyers.

On the "hate" side, however, I have these possible demerits: I opposed, first in the National Commission to Study Mortgage Interest Rates, and then in the Banking Committee and in the House-Senate Conference Committee, the proposal to eliminate all ceilings on FHA-VA mortgage interest rates. I was also against the $250 million subsidy to the savings and loans contained in the Emergency Housing bill, but because of other things in the final version of the bill, I did join in getting it out of Conference with that provision in it, and supported its passage on the House Floor—but I'm not in sympathy with that particular subsidy because I think there are better ways of getting mortgage money out to the moderate income family in a manner which would be less costly to the Treasury and which would have the desirable effect of pressuring interest rates down instead of up. Nevertheless, my position on this subsidy to the savings and loans probably made some of you unhappy.

#### SOME DEFICIENCIES IN AN IMPORTANT INDUSTRY

In addition, as chairman of a special subcommittee which investigated the practices of some savings and loans in the District of Columbia which were guilty of scandalous practices in financing the predatory activities of a number of speculators in slum real estate, I raised some questions about insider-deals, connivance on fictitious straw party deals and false appraisals and other abuses, which were by no means restricted to the District of Columbia. Our Ad Hoc Subcommittee report undoubtedly was a major factor in the issuance by the Federal Home Loan Bank Board recently of proposed regulations on conflict of interest that I know the industry feels are tough.

So there is some grumbling in my direction and some of the savings and loan people have been saying to each other "Look what that Congresswoman Sullivan has done to us."

In accepting your invitation to meet with you today, I have not come here to "love" you or to "hate" you, but to discuss candidly with you what you and I, and all others who believe deeply in the vital importance of the Federally-insured savings and loans to the home financing industry in this country, can do to improve the health and strength of this great financing mechanism so that you can do an even better job for the home-buying public in the future than has been done in the past. You have been instrumental in converting the American people from a nation of renters to one of home-owners; without your industry, there would today be no such progress toward giving the

great majority of our families a financial stake—an equity—in their own housing; without your Associations the achievements of the last 25 years in the home-building field could never have been realized.

All of you here are already quite aware of the contributions of the savings and loans to these great achievements. In mentioning them now, I want to make sure *you* know that *I also* recognize those achievements and want to see them expanded.

But in taking such an interest in your work and in your worthwhile activities, I have also had occasion to learn about some of the glaring deficiencies in the savings and loan field, too. Assuming that all of you are running your own institutions with the highest degree of integrity and fairness and good practice, you must nevertheless be made aware, if you are not already, of the fact that not all of the associations are living up to their charter responsibilities and obligations.

And to the extent that some associations are bringing discredit, or even disgrace, upon the savings and loan concept, the well-run S&L's can be the innocent victims of restrictions aimed not at them but at those who do wrong.

CONFIDENCE OF INVESTORS ESSENTIAL

I am reminded of the days long ago when bank deposit insurance was first proposed and many bankers bitterly opposed government interference with their activities. But after the financial bloodbath of the Depression which destroyed many good banks as well as some which were not so good, deposit insurance became the key to public confidence in the banking system, and no bank today would have much success in attracting deposits without the government guarantee of the safety of the funds.

The insured savings and loans have also prospered over the years because of the *confidence* of depositors in the integrity of the system, particularly after scandals in Maryland and elsewhere led to vast losses of depositors' funds in savings and loans which were not part of the Federal Home Loan Bank system or insured by the Federal Savings and Loan Insurance Corporation.

Thus, even with all of the disintermediation which occurred—with all of the shopping around which took place by some investors for the top quarter-percentage point of interest on time deposits, there are nevertheless millions of Americans who have never touched their S&L savings accounts and who, in fact, added to their savings in your institutions during all of this chaotic period, because they had *complete confidence* in the safety of their funds.

This is your major stock-in-trade—your integrity. And anything which disturbs or challenges the public's confidence in the integrity of your institution is bad for this industry.

Unfortunately, some officials of some savings and loans seem to believe that the savings and loan business does us all such a favor by reason of merely existing that no one should dare exercise the right to question anything done by the people who run any savings and loans.

NOT JUST ORDINARY BUSINESSES

Well, of course, any legitimate business has a right to exist in this country and to run its affairs generally as its owners see fit. But the insured Federal savings and loans which are part of the Home Loan Bank System are not just ordinary private businesses—they are endowed with certain rights and certain obligations which are not extended to most other businesses. They are supposed to be member-owned and member-operated. But in a great many instances, this idea of mutual ownership and control is something of a fiction—the shareowners may own the assets of the association, but the professional managers of the association run the association as if it were their own private buiness. Now that the Home Loan Bank Board is proposing more membership democracy in the associations, we are told this will destroy the savings and loans—that the managers must continue to have a free hand to make all the decisions without interference from "outsiders," as in the case of a closely held family corporation.

Perhaps there are provisions of the proposed conflict-of-interest regulation issued by the Board which are unworkable or unnecessary, but I don't see how any one could object to the idea of actually notifying your members—your owners—of the annual meeting, or of any other membership meetings, instead of just having them sign a proxy card at the time of joining the association and never even knowing what it was.

When a mutually-owned association backed by the Federal Government becomes largely the extension of the business personality of one man, or of one small group of closely allied businessmen all doing business with each other and with the association and using the association primarily to further their own private business objectives, then I think the rest of us have to become deeply concerned over the legitimacy of that whole enterprise. We shouldn't have to wait for the association to get into serious financial hotwater before doing something to conserve the assets and protect the depositors and the public. With that seal on the door attesting to Federal insurance and supervision, the association is not anyone's private business preserve, to do with as he sees fit.

THE GAP IN DISTRICT OF COLUMBIA REGULATION

In Washington, there was a somewhat peculiar local situation in that most of the savings and loans, and particularly those which were in serious financial trouble, were Federally insured but not chartered. There is no local governmental regulatory agency. So, really, *nobody* was looking over their shoulders until the deals they were making with slum-area real estate speculators, in which large amounts of association funds were involved, suddenly went sour because of the consequences of tight money. And the Federal Savings and Loan Insurance Corporation found itself the embarrassed possessor of some properties you and I wouldn't in one hand and a mask to breathe through and filter out the smell. These squalid properties had been mortgaged for far more than their real value, and when tight money put the squeeze on the speculators who had used savings and loan funds to buy them up, the bottom dropped out of the whole scheme—the bubble burst—and the Federal Government was left holding the bag, or rather the bricks and mortar of some awful tenements.

More serious was the victimization of many low-income families who had purchased single-family residences at greatly inflated prices from speculators who had the inside track to savings and loan financing and who, in some instances, had actually done the "appraising" for the savings and loan from which they had borrowed the excessive mortgages.

When we checked into some of these individual loans, and were horrified by the facts we uncovered, the responsible leaders of the savings and loans industry in the District of Columbia told us they had been aware of what was going on in some of the badly-run associations, had complained about it to the Home Loan Bank System, and had urged that steps be taken to stop this kind of practice. The solution utilized by the Board was to merge one of the insured non-Federal savings and loans which had been guilty of the worst practices into a Federal institution so that the insured depositors could be protected, meanwhile having the Federal Savings and Loan Insurance Corporation take over the worst loans involved in this scandal so that the successor association would not be stuck or hurt by them. We were told that tight money had ended the schemes of the speculators, and that the cease-and-desist powers we gave the Board in 1966 could help provide leverage against future abuses of this nature by any Federally insured institutions. Perhaps so.

SOME OF THE THINGS WE FOUND IN AD HOC SUBCOMMITTEE INQUIRY

But it was a revelation to us that there are no realistic standards for the qualification of appraisers who judge the value of property on which insured savings and loans extend mortgages; there were no efforts being made to stimulate share-owner participation in the work of the institutions they presumably own; there were no restrictions on fictitious straw party deals which inflate the alleged sales price of a property; there were no real guidelines on the legitimacy of transactions between the relatives or associates of directors and the associations on whose boards the directors serve; there were altogether unrealistic limits, which were practically no limits at all, on the percentage of a savings and loan association's assets which could be lent to one individual; and there was virtually no interest on the part of most of the savings and loans in the District in lending mortgage funds directly to home-buyers in the District itself, even FHA-insured or VA-guaranteed mortgages. In the inner city area, the avenue to a savings and loan mortgage was often through the slum property speculator—he was able to obtain a loan which the individual family could not obtain in many instances from the same association, and then he transferred the mortgage to the low-income family after skimming off his substantial profit.

These were actual cases we found and documented. We were particularly appalled because we had been instrumental in developing many new programs for extending home ownership opportunities to low income families and our fear was that without adequate supervision and investigation, these programs would become new avenues for speculative windfalls. And I think you all know that this has happened to an alarming extent in some of the Section 235 programs, not only in Washington, D.C., but all over the country.

TIGHTENING CONFLICT OF INTEREST REGULATORY AUTHORITY

It was in the light of these disclosures that the Federal Home Loan Bank Board is moving now to tighten up on its own conflict of interest regulations and to ask for additional powers from Congress, including the power to make it a criminal offense to inflate fictitiously the value of a property, through fake sales or other devices, for the purpose of increasing the amount of a mortgage issued by a Federally-insured institution.

I understand that there is a great deal of unhappiness among the Federally chartered institutions over the proposed new regulations, not just the limitations placed on the directors and officers in their own business transactions with the association they run, but the requirement that members of the association be enabled in a practical manner to have some say about the policies of their associations. Either these are mutuals, as they are supposed to be, or are the private businesses of a few professional savings and loan managers. It seems to me that the stock corporations which operate in the savings and loan field have to tell their stockholders a good deal more about the structure of the company than the officials of some of the Federally chartered ones seem

to feel is necessary to tell their member-owners.

So I am curious as to what all the outcry is about. Instead of my coming here to give you a report on what some agency of government is planning to do—and you can get all of that information from the Board and your own trade association experts—I believe it might be more useful to you and more helpful to me if we could turn this into a discussion rather than a speech: you people tell me—because I am in a position to do something about it if you can convince me one way or another—you tell me what there is about this proposed conflict of interest regulation which is oppressive or destructive to the objectives of the savings and loan system.

As you may know, our Subcommittee proposed giving the Board substantially greater power in this field of issuing regulations, in order to prevent the kind of situations which developed in Washintgon and elsewhere, situations in which public confidence in the integrity of all savings and loans is inevitably jeopardized.

Your associations are too vital a part of our economy, and of the social objectives of our nation for decent housing for all families, to permit a few bad apples to contaminate public confidence in the whole system. What do we do about it?

## MARYLAND SOLDIER DIES IN VIETNAM

### HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. LONG of Maryland. Mr. Speaker, Sp4c. James M. Kozlowski, a courageous young man from Maryland, died recently in Vietnam. I should like to honor his memory by including the following article in the RECORD:

J. M. KOZLOWSKI, 21, DIES IN VIETNAM

An Army radioman from Overlea has died in Vietnam from wounds he received in the explosion of an enemy booby trap, the Department of Defense announced yesterday.

Spec. 4 James M. Kozlowski, 21, of 4100 Overlea avenue, died in a Saigon hospital on August 25 as the result of infection of a shrapnel wound in his stomach.

Specialist Kozlowski was on patrol in the Mekong Delta August 12 when he was struck by the booby trap explosion. Doctors amputated both legs and his left arm at the elbow in an attempt to save his life.

COMPLETED TRAINING

A member of Company B, 9th Infantry Division, he had been in Vietnam since April 27. He was drafted into the Army April 11, 1969.

He completed his basic training at Fort Bragg, N.C., and his advanced training at Fort Dix, N.J.

Specialist Kozlowski was born in Rosedale. After his graduation from City College in 1967, he worked as an electrician with the Baltimore Gas and Electric Company. He had planned to return to his job after completing his service in the Army.

Specialist Kozlowski is survived by his wife, the former Mary Ellingsworth; his parents, Joseph and Agnes Kozlowski, of Baltimore; three sisters, Mrs. Frances Beaver, Mrs. Connie Luzadder, and Mary Kozlowski, all of Baltimore; four brothers, Raymond Kozlowski, Robert Kozlowski, Joseph Kozlowski, all of Balimore, and Richard Kozlowski, of Virginia Beach, Va.

## TESTIMONIAL TO JUDGE ALFRED A. NOYES

### HON. GILBERT GUDE

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 23, 1970*

Mr. GUDE. Mr. Speaker, on Saturday, September 12, Judge James C. Gulotta of the Orleans Parish Juvenile Court, New Orleans, La., was guest speaker on the occasion of a testimonial dinner in Rockville, Md., in recognition of Judge Alfred A. Noyes, for juvenile causes, of the People's Court in Montgomery County, Md.

Judge Gulotta's remarks on this occasion express the deep regard and affection which we in Montgomery County hold for Judge Noyes and, therefore, I insert Judge Gulotta's remarks in the RECORD.

TESTIMONIAL TO JUDGE ALFRED A. NOYES

(Address by Judge James C. Gulotta)

Mr. Chairman, distinguished guests, distinguished judges, ladies and gentlemen, may I express to you my sincerest thanks and appreciation in honoring me by inviting me to say a few words about a person for whom the highest esteem is felt by me personally and by the National Council of Juvenile Court Judges and the National Juvenile Court Foundation.

It is fitting that we in the National Council of Juvenile Court Judges and National Juvenile Court Foundation are asked to participate in this testimonial dinner because we feel that Bud has been the pillar upon which the entire National Council has stood for many years and blossomed from a knife and fork association for judges to an outstanding judicial training organization dedicated to the improvement in the effectiveness and integrity of the judiciary, Bud Noyes organized, guided, and led this group from its inception to its present position.

Bud Noyes came to the Bench in the year 1946. He held the position of President of the National Council of Juvenile Court Judges in 1960–61. He was Chairman of the National Juvenile Court Foundation in 1967–68. He is at present a Trustee and Treasurer of the Foundation. Bud was given the Distinguished Service Award in Atlanta, 1970, by the National Council of Juvenile Court Judges as the nation's most outstanding judge who has made the greatest contributions to the Juvenile Court System and juvenile justice. Bud has published many articles for the National Council of Juvenile Court Judges and for the National Council on Crime and Delinquency.

These accomplishments are not unusual for Bud because he makes every group, every organization, and every person feel that their cause and endeavor, their aims and their purposes, are the causes to which he also is enthusiastically dedicated. While we feel that Bud belongs to us, and while I personally feel that Bud is one of my closest friends, all with whom he has become associated jealously feel that he belongs to them. You feel this tonight. He is yours to honor. But let me say that Bud Noyes has reached the pinnacle in the judiciary not only on a national level, but also on an international one to such an extent that he is the recognized leader among judges of this nation and of the world. He epitomizes to them and to us one that possesses the highest attributes in every respect that a judge could have. Bud makes me and the national judges proud that we are judges.

I say these things not casually, nor courteously, not without meaning. I say these things because I have had the opportunity as you have to work with this distinguished gentleman under stress and in delicate situations.

I came to the National Council of Juvenile Court Judges as a new judge, starry-eyed and awed by the association with elder, established, and highly regarded jurists. It took me little time to seek the wise counsel of Bud Noyes. It took me little time to observe the high regard that all judges and persons who occupy high positions have for this outstanding man. Bud is universally regarded as an outstanding astute and learned jurist.

Though a few years separated Bud from myself and though a few years of experience separated Bud from me, I immediately felt and continue to feel a close affinity to him. I felt that we are contemporaries and the most outstanding tribute that I can pay to Bud, and his are many, is that all persons, no matter what age group they find themselves, no matter what station in life fate has befallen them, Bud is their contemporary. Bud is their friend. Bud is their leader. This is true of the new judges of our organization. This is true of the older judges. All come to him to seek counsel and advice. None are turned away.

I have been the beneficiary of his wise judgment on several occasions, more than I can probably remember. I often wonder whether sometimes I should feel that I too often look to him for solutions to problems rather than solve them myself. This gentleman's ability, depth, and sound judgment comes to the forefront when the situation becomes most delicate. Just a few short weeks ago we were in Geneva, Switzerland, together at an international meeting of judges. Gathered there were representatives from just about every nation in the world. We were cognizant of our responsibility to our judges at the international meeting of judges and to our nation.

As you might expect, different concepts, different methods of doing things, as well as language barriers, led to misunderstandings and serious disagreements which, if not judiciously handled, could cause severe repercussions. Impressions of an unfavorable nature for the American jurists, for the American public official, and of America itself might have and could have resulted. The politics of the international groups was somewhat difficult for us to understand at a time when relationships between the American delegates and some of the other delegates were possibly becoming strained because we just did not understand each other's point of view. Bud, in a caucus of our judges, as usual, calmed the waters, offered solutions and courses of action, which, when adopted by us, appeared to be simple, yet were well thought out. This is his capacity to take the most complicated problem of a delicate nature and untangle it into a simplified solution. Needless to say, we, the American delegation, received more consideration from the foreign judicial delegates because of Bud's suggestion than we had ever hoped.

I could cite many examples of this gentleman's deep analytical ability and profound mind. Bud never ceases to amaze me. He never ceases to amaze others, and I am certain that he never ceases to amaze you.

I have had the opportunity and the honor to attend many testimonial dinners. None has given me more pleasure than the invitation extended to me to this one. Though Bud is highly regarded because of his forthright honesty and integrity possessed by few men and is considered a giant among judges, nevertheless he has a sense of humor and soundness and that reduces mountains of problems to avenues of progress.

More important than all of these is his

sincere desire to help persons less fortunate. His consideration for the children and people he serves is paramount. In every deliberation, Bud's primary concern is the effect that these deliberations will have upon the children who appear in his court or in any other court in our land. I have yet to feel that Bud has ever lost sight of his and our responsibility to the children who need our help and the help of all who serve the cause of juvenile justice.

In closing, may I say to you, Bud, and to your lovely wife that I hope and trust that you will enjoy your retirement and that you get to do all the things you thought and hoped you wanted to do but had little time to do. I hope and trust that we may enjoy the benefit of your continued counsel and advice.

All who know you love you, Bud, and I say with deepest affection, sincerity, and conviction that this world is a little better place because you walked by. God bless you and good night.

## CIA IN CHILE

### HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. SCHMITZ. Mr. Speaker, an interesting letter appeared in the New York Times today counseling against CIA plotting in Chile. For my colleagues who are not familiar with the background of the author of this letter, I include at this point a short sketch drawn from a staff study prepared for the Senate Internal Security Committee entitled "the Anti-Vietnam Agitation and the Teach-In Movement," 89th Congress, first session, Document No. 72, printed in 1965. Letter and sketch follow:

CHOICE IN CHILE

To the EDITOR:

A proposed Marxist, Dr. Salvador Allende, has received the plurality of votes in the recent presidential election in Chile.

It would be fitting for all adherents of free democratic elections to see to it that the C.I.A. does not repeat its past performances in Guatemala, Santo Domingo and Bolivia by endeavoring through underground intrigue—or *coup d'etat*—to nullify the democratically expressed wishes of the people of Chile.

ANTON REFREGIER.

WOODSTOCK, N.Y.

ANTON REFREGIER

Under date of May 9, 1965, the pamphlet "National Teach-In on the Vietnam War," May 15, 1965, lists Anton Refregier, artist, as a supporter. His record follows:

Anton Refregier is listed as a sponsor of the American Peace Mobilization (official program of the American People's Meeting of the American Peace Mobilization, Apr. 5, 1941). The American Peace Mobilization has been cited as Communist by the Attorney General.

Anton Refregier is listed as a sponsor of the Arists' Front To Win the War and as a supporter of the American Artists' Congress (folder, Artists Front To Win the War, mass meeting Oct. 16, 1942, Carnegie Hall). The Artists' Front To Win the War has been cited as subversive by the House Committee on Un-American Activities.

The name of Anton Refregier appears on a list of persons affiliated with the John Reed Club who signed a protest against alleged anti-Communist propaganda (New York Times, May 19, 1930). The John Reed Club has been cited as subversive by the House Committee on Un-American Activities. John Reed was a founder of the American Communist Party.

The name of Anton Refregier appears in a list of artists calling for an American Artists' Congress (Art Front, November 1935, p. 6). The American Artists' Congress has been cited as subversive by the California Committee on Un-American Activities.

The name of Anton Refregier is listed as a sponsor of the National Council of American-Soviet Friendship, Inc. (undated leaflet). The National Council of American-Soviet Friendship, Inc., has been cited as subversive by the Attorney General and the House Committee on Un-American Activities.

The name of Anton Refregier appears on a letter to the President protesting what was described as "the badgering of Communist leaders" (New Masses, Apr. 2, 1940, p. 21). New Masses has been cited as a Communist periodical by the Attorney General.

Anton Refregier is listed as a contributor to a book of drawings under the title of "Winter Soldiers" in defense of certain Communist teachers then under charges of Communist activity ("Winter Soldiers," June 17, 1941).

Anton Refregier returned in May 1965 from a visit to the Soviet Union and Communist East Europe. The Worker of May 18, 1965, page 6, announced that he was to speak about his journey at the Philadelphia Social Science Forum, which is an adjunct of the Philadelphia School of Social Science and Art, which has been cited as subversive by the Attorney General.

The signature of Anton Refregier, member of the United American Artists, appears on a letter to FDR urging help to U.S.S.R. (Daily Worker, Sept. 16, 1941, p. 7.)

The name of Anton Refregier, mural painter, appears on a list of persons requesting the President to exert his influence to end an attack on the freedom of the press with specific reference to the New Masses. (New Masses, Apr. 2, 1940, p. 21.) New Masses has been cited as a Communist periodical by the Attorney General.

# SENATE—*Friday, September 25, 1970*

The Senate met at 12 noon and was called to order by the President pro tempore (Mr. RUSSELL).

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal Father, at this moment so turbulent without and tense within, we pause in this Chamber importuning Thy vivid presence to quiet our spirits, restore our souls, clarify our minds, and direct our energies toward the completion of our task.

O God, help us to stand here in the full stature of our manhood, men created in Thy image, vested with eternal value, and destined to serve Thee. In these strenuous, wearisome, and aggravating days deliver us from all pretense and posing, from all pettiness or littleness, from all rudeness or revenge—that we may quit ourselves as men of God—full of wisdom and faith—humble servants of that kingdom which is always coming but not yet here.

Receive us and use us this day and evermore.

Through Him whose love never ceases. Amen.

## MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Leonard, one of his secretaries.

## REPORT ON RADIATION CONTROL—MESSAGE FROM THE PRESIDENT

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which, with the accompanying report, was referred to the Committee on Commerce:

*To the Congress of the United States:*

In accordance with Section 360D of the Radiation Control for Health and Safety Act of 1968 (Public Law 90–602), I am herewith transmitting to you the second annual report on the administration of this Act.

This report was prepared by the Environmental Health Service of the Department of Health, Education, and Welfare.

RICHARD NIXON.

THE WHITE HOUSE, *September 25, 1970.*

## EXECUTIVE MESSAGE REFERRED

As in executive session, the President pro tempore laid before the Senate a message from the President of the United States submitting the nomination of Daniel H. Huyett III, of Pennsylvania, to be a U.S. district judge for the Eastern District of Pennsylvania, which was referred to the Committee on the Judiciary.

## THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Thursday, September 24, 1970, be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on Public Works; the Subcommittee on Indian Affairs of the Committee on Interior and Insular Affairs; the Subcommittee on Small Business of the Committee on Banking and Currency; and the Committee on Labor and Public Welfare all be authorized to meet during the session of the Senate today.

Mr. BAYH. Mr. President, pursuant to the rather extensive discussion of my reasons on yesterday, I respectfully and with great reluctance nevertheless am required to object to the requests of the distinguished Senator from Montana.

The PRESIDENT pro tempore. Objection is heard.

## EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider nominations on the Executive Calendar.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDENT pro tempore. The nominations on the Executive Calendar will be stated.

## U.S. ARMY

The assistant legislative clerk read the nomination of Maj. Gen. John Norton, to be a lieutenant general.

The PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

## U.S. NAVY

The assistant legislative clerk proceeded to read sundry nominations in the U.S. Navy.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

## NOMINATIONS PLACED ON THE SECRETARY'S DESK—IN THE NAVY AND IN THE MARINE CORPS

The assistant legislative clerk proceeded to read sundry nominations in the Navy and in the Marine Corps which had been placed on the Secretary's desk.

The PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to, and the Senate resumed the consideration of legislative business.

## PERMISSION FOR SENATE EMPLOYEES TO TESTIFY IN FEDERAL COURT

Mr. MANSFIELD. Mr. President, on a most important and unusual matter, I send to the desk a resolution and ask for its immediate consideration.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. MANSFIELD. Mr. President, I should like to call on the distinguished Senator from Arkansas (Mr. McCLELLAN) for an explanation of the resolution.

The PRESIDENT pro tempore. The Senator from Arkansas is recognized.

Mr. McCLELLAN. Mr. President, this resolution, which has been approved by a majority of both the Committee on Government Operations and the Senate Permanent Subcommittee on Investigations, would permit certain staff employees of the subcommittee to testify in pretrial proceedings and in the trial of a civil action in U.S. District Court for the District of Columbia.

The events which resulted in the preparation of this resolution are the following:

First. In the course of its investigation this year of bombing and terrorism in the United States, the subcommittee discovered that a man named Thomas W. Sanders, the business manager and a member of the editorial board of the radical magazine Black Politics was believed to possess significant information about certain written material on the procurement and use of bombs and other terroristic weapons. On July 1, 1970, I issued a subpena, which was subsequently duly served, requiring Sanders' appearance to testify before the subcommittee.

Second. On August 3, 1970, Thomas W. Sanders filed a civil action in U.S. District Court for the District of Columbia, listing as defendants the chairman of the subcommittee, all its members, and the general counsel. The complaint seeks temporary and permanent injunctions against enforcement of the subpena and a declaratory judgment that the subpena is null and void and that Senate Resolution 308, authorizing the subcommittee's activities, is void and illegal.

Third. Also on August 3, 1970, Sanders moved for a temporary restraining order, which motion was heard and denied on that date by U.S. District Court Judge William B. Jones.

Fourth. On August 4, 1970, after Sanders had appealed to the U.S. Court of Appeals for the District of Columbia, that court stayed compliance with and enforcement of the subcommittee's subpena, pending further order of the court of appeals to allow that court an opportunity to consider plaintiff's motion more fully and further ordered that the temporary stay should not prevent the Federal district court from proceeding expeditiously to hear Sanders' application for preliminary and permanent injunctions.

Fifth. Sanders' attorneys have requested pretrial interrogatories of certain staff employees of the subcommittee, scheduled for Monday, September 28, 1970, and have issued subpenas for the appearance of those staff employees.

Sixth. On Wednesday, September 30, 1970, a hearing on Sanders' motion for a preliminary injunction is scheduled by the U.S. district court, Judge Howard F. Corcoran presiding.

Mr. President, the resolution I have submitted is appropriate because the subcommittee has no authority to permit staff employees to testify or to disclose any information obtained in the course of investigations without the permission of the Senate.

However, Mr. President, the resolution is not a routine matter. The stay of enforcement granted by Judges Fahy and Wright of the U.S. court of appeals—Judge Tamm not participating—is the first such judicial action in the subcommittee's history of investigations, covering almost 24 years, and the subcommittee believes firmly that the order of the court represents an unwarranted abridgement of one of the basic principles of our governmental system—the separation of powers among the three branches of the Federal Government. As the resolution states, the right of the Congress to investigate for legislative purposes and to compel witnesses to appear and testify has always been upheld by the Nation's courts.

With that in mind, Mr. President, I would like to call attention to the final paragraph of the resolution, as follows:

*Resolved*, That it is the sense of the Senate that the power of inquiry with process to enforce it is an essential and appropriate auxiliary to the legislative function, and that action by the courts which anticipatorily infringes upon or impedes the right of Congress to require the appearance of witnesses pursuant to its legislative powers, and thus stays contemplated Congressional action to be taken pursuant to its investigative processes violates the doctrine of separation of powers and would be an illegal and unwarranted infringement by the judicial branch upon the powers, responsibilities and duties of the legislative branch.

Mr. President, as I have stated, this is a resolution dealing with a court action in which an effort is being made to secure files, records, and documents from the Committee on Government Operations, which have not been made public, and have not yet been used or become a part of the public record. It is unprecedented for a court to undertake to do this.

Mr. President, I ask that the resolution be agreed to.

The PRESIDING OFFICER (Mr. GRAVEL). The question is on agreeing to the resolution.

The resolution (S. Res. 471) was agreed to as follows:

S. RES. 471

*Resolved*, That neither the chairman of the Senate Permanent Subcommittee on Investigations, nor any of the subcommittee's members, nor the subcommittee's general council, nor any of its staff employees are to testify to or otherwise disclose in the aforementioned civil action any specific materials or information which may be in their possession which are not matters of public record; be it further

*Resolved*, That neither the said chairman, the said members, the said general counsel, nor any staff employees are to testify to or otherwise disclose any documents, records, correspondence, memoranda, and other written or verbal information in the possession of said individuals or of the subcommittee which are not matters of public record; be it further

*Resolved*, That the chairman of the Senate Permanent Subcommittee on Investigations of the Committee on Government Operations may designate and authorize any staff employees of the said subcommittee to appear and testify at proceedings in connection with the aforementioned civil action, but that such appearance and testimony of any such

staff employees shall be limited to the contents of the public record of the open hearings of said subcommittee held in furtherance of the authority and direction given to the subcommittee under Senate Resolution 308 of the 91st Congress, second session, or to such matters relating to Senate Resolution 308 aforementioned which are matters of public record; be it further

*Resolved*, That it is the sense of the Senate that the power of inquiry with process to enforce it is an essential and appropriate auxiliary to the legislative function, and that action by the courts which anticipatorily infringes upon or impedes the right of Congress to require the appearance of witnesses pursuant to its legislative powers, and thus stays contemplated congressional action to be taken pursuant to its investigative processes violates the doctrine of separation of powers and would be an illegal and unwarranted infringement by the judicial branch upon the powers, responsibilities, and duties of the legislative branch.

The preamble was agreed to, as follows:

Whereas the case of Thomas W. Sanders versus John L. McClellan, et al., civil action numbered 2294–70, is pending in the United States District Court for the District of Columbia; and

Whereas the Senate Permanent Subcommittee on Investigations of the Committee on Government Operations has in its possession by virtue of Senate Resolution 308 of the 91st Congress, second session, certain information and evidence relating to an investigation dealing with Thomas W. Sanders and other persons; and

Whereas the aforementioned civil action numbered 2294–70 was filed in the United States District Court for the District of Columbia on August 3, 1970, at which time the plaintiff, Thomas W. Sanders, moved for a temporary order restraining the subcommittee from enforcing a subpoena ad testificandum and duces tecum issued by the Chairman of the Subcommittee and duly served upon said Thomas W. Sanders, which motion for a temporary restraining order was heard and denied by the said court; and

Whereas the plaintiff, Thomas W. Sanders, thereupon appealed to the United States Court of Appeals for the District of Columbia, which court on August 4, 1970, stayed compliance with and enforcement of the said subpoena pending further order of the Court of Appeals to allow the Court of Appeals an opportunity to consider plaintiff's motion more fully, and the United States Court of Appeals further ordered that the temporary stay should not prevent the United States District Court for the District of Columbia from proceeding expeditiously to hear plaintiff's application for preliminary and permanent injunctions; and

Whereas a hearing on plaintiff's motion for a preliminary injunction is now scheduled by the said United States District Court for September 30, 1970; and

Whereas certain staff employees of the Senate Permanent Subcommittee on Investigations have been subpoenaed by the plaintiff, by his attorneys, to appear and testify in connection with the subpoena issued by the chairman of the said subcommittee and duly served upon Thomas W. Sanders; and

Whereas the plaintiff by his attorneys, requests the chairman of the subcommittee, Senator John L. McClellan, and the members of the subcommitee, Senators Henry M. Jackson, Sam J. Ervin, Jr., Abraham Ribicoff, Lee Metcalf, Karl E. Mundt, Jacob K. Javits, Charles H. Percy, and Edward J. Gurney, and General Counsel Jerome S. Adlerman, to make certain admissions including admissions relating to their individual thoughts and philosophies on the meaning and interpretation of the First Amendment to the Constitution of the United States and upon the subject of freedom of the press generally; and

Whereas certain interrogatories addressed by the plaintiff, by his attorneys, to the defendants the chairman of the subcommittee, Senator John L. McClellan, Senators Henry M. Jackson, Sam J. Ervin, Jr., Abraham Ribicoff, Lee Metcalf, Karl E. Mundt, Jacob K. Javits, Charles H. Percy, and Edward J. Gurney, and General Counsel Jerome S. Adlerman, would require the disclosure of certain information and evidence relating to an investigation of Thomas W. Sanders and others, which information and evidence, if any, are in the files and other official records of the subcommittee; and

Whereas, for the first time in the subcommitee's history of investigations, covering almost 24 years, a United States court has seen fit to stay the subcommitee from enforcing a subpoena duly and properly served; and

Whereas the order of the court represents an unwarranted abridgement of one of the basic principles of our governmental system, the separation of powers among the three branches of the Federal Government; and

Whereas the right of the Congress to investigate for legislative purposes and to compel witnesses to appear and testify has always been upheld by the nation's courts; and

Whereas by the privilege of the Senate and by rule XXX of the Standing Rules of the Senate, information secured by staff employees of the Senate pursuant to their official duties as employees may not be revealed without the consent of the Senate.

## ORDER FOR ADJOURNMENT UNTIL 12 NOON ON MONDAY NEXT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate completes its business this afternoon, it stand in adjournment until the hour of 12 o'clock noon on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR ADJOURNMENT FROM MONDAY, SEPTEMBER 28, 1970, TO TUESDAY, SEPTEMBER 29, 1970, AT 12 NOON

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate completes its business on Monday next, September 28, 1970, it stand in adjournment until noon on Tuesday, September 29, 1970.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, it is my understanding that on Wednesday next, September 30, 1970, the Senate will convene at 10 a.m.

The PRESIDING OFFICER. The Senator is correct.

## THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of measures on the calendar to which there is no objection, beginning with Calendar No. 1224.

The PRESIDING OFFICER (Mr. GRAVEL). Without objection, it it so ordered.

## TEMPORARY EXTENSION OF FEDERAL HOUSING ADMINISTRATION'S INSURANCE AUTHORITY

The joint resolution (H.J. Res. 1366) to provide for the temporary extension of the Federal Housing Administration's insurance authority was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1206), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The resolution would provide for a temporary extension of 30 days for certain Federal Housing Administration insurance programs, which are presently under existing law, due to expire on October 1, 1970. This resolution would provide for a temporary extension of these programs until November 1, 1970.

The FHA programs which would be extended by the resolution are:

FHA title I home improvement program.

FHA general mortgage insurance authorization covering section 203 (single family sales housing) and section 207 (multi-family rental housing) and so on.

FHA section 221 program (housing for moderate income and displaced families).

FHA section 809 program (single family housing for civilians employed at certain research and development installations).

FHA section 810 program (multifamily rental housing for civilians and armed service personnel at certain research and development installations).

FHA section 1002 insurance authorization for mortgages for land development.

FHA section 1101 insurance authorization for mortgages for group practice facilities.

## AMENDMENT OF THE EXPEDITING ACT

The Senate proceeded to consider the bill (H.R. 12807) to amend the act of February 11, 1903, commonly known as the Expediting Act, and for other purposes which had been reported from the Committee on the Judiciary with amendments on page 3, line 11, after the word "of", strike out "justice; or" and insert "justice."; after line 11, strike out:

"(2) the Attorney General files in the district court a certificate stating that immediate consideration of the appeal by the Supreme Court is of general public importance in the administration of justice; or

"(3) the district judge who adjudicated the case, sua sponte, enters an order stating that immediate consideration of the appeal by the Supreme Court is of general public importance in the administration of justice.".

And in line 20, after "(1)", strike out "or (3) or a certificate pursuant to (2)".

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1214), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE AMENDMENTS

The purpose of the amendments is to provide that appeal from a final judgment in a civil antitrust action brought by the United States shall lie directly to the Supreme Court on a finding that immediate consideration of the appeal by the Supreme Court is of general public importance in the administration of justice by order of the district judge upon application of a party.

PURPOSE

The purpose of the proposed legislation, as amended, is to amend the Expediting Act so as to require that final judgments and interlocutory orders in certain civil antitrust cases if appealed, be heard by the circuit courts of appeals.

The bill would amend section 1 of the Expediting Act (15 U.S.C. 28, 49 U.S.C. 44) providing for a three district judge court in civil actions wherein the United States is the plaintiff under the Sherman or Clayton Antitrust Acts or certain sections of the Interstate Commerce Act, upon the filing by the Attorney General with the district court of a certificate that the cases are of general public importance. The proposal would eliminate the provision that a three judge court be impaneled. It would however retain the expediting procedure in single judge district courts.

The proposal would amend section 2 of the Expediting Act (15 U.S.C. 29, 49 U.S.C. 45) providing that appeal from a final judgment of a district court in any civil action brought by the United States under any of the acts covered by section 1 of the Expediting Act will lie only in the Supreme Court. Under the proposal only those cases of general public importance would be appealable directly to the Supreme Court and normal appellate review through the courts of appeals with discretionary review by the Supreme Court would be substituted therefor. An appeal shall lie directly to the Supreme Court on a finding that immediate consideration of the appeal by the Supreme Court is of general importance in the administration of justice by order of the district judge upon application of a party. The proposal also would eliminate the reference in existing law to expedition of civil cases brought by the United States under the original Interstate Commerce Act and subsequent statutes of like purpose.

STATEMENT

The Expediting Act became law in 1903, a time when the Sherman Act was relatively new and an untried method of restraining combinations and trusts. There was apprehension that the newly created system of courts of appeals, because of their supposed unfamiliarity with the new law and because of the additional time required by their procedures, would delay and frustrate the efforts to control monopolies. Responding to that concern the Attorney General recommended the expediting legislation and it became law after Congress approved it without debate.

One of the principal arguments offered in support of the proposal is to relieve the Supreme Court of the burden of hearing the numerous cases coming to it under the Expediting Act. Many civil antitrust cases require the Supreme Court to read thousands of pages of transcript from the district court. A question arises as to the adequacy of the review the Supreme Court can give to those cases in which there are voluminous trial records. Almost all the present Justices have, both in and out of Court, asked that these cases go first to the court of appeals. Some of the Justices are of the opinion that adherence to the customary appellate procedure would benefit the Supreme Court by reducing the numbers of matters presented to it. Further, having the initial appellate review in the courts of appeals would be of benefit to the litigants by refining the issues presented to the Supreme Court and also give litigants an opportunity of review of the district court decrees which are seldom reviewed by the Supreme Court under existing practice.

It is generally conceded that the existing law has permitted more expeditious determinations of civil antitrust cases but the factual situation prevalent when the law was enacted no longer obtains: dilatory practices, such as protracted delays in filing appeals, are not now available. Additionally, by permitting appellate review of preliminary injunctions more expeditious treatment of merger cases should obtain since the trial court's decision would be subject to an immediate review prior to a full-blown trial on all the issues.

The committee is of the opinion that the proposed legislation provides a suitable means of meeting the problems arising from the Expediting Act and would assure that the interest of all parties would be protected. Accordingly the committee recommends favorable consideration of H.R. 12807 with amendments.

## LAWRENCE J. NUNES

The bill (S. 708) for the relief of Lawrence J. Nunes was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 708

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (1) Lawrence J. Nunes of Pearl City, Hawaii, shall be considered for purposes of pay and other benefits to have received a temporary promotion to the position of foreman (leadingman) electrician (powerplant) at the United States Navy Public Works Center, Pearl Harbor, Hawaii, for the period from May 26, 1968, through June 21, 1968; and (2) the Secretary of the Navy shall pay to the said Lawrence J. Nunes a sum equal to the difference between the amount of the pay he received for such period and the amount to which he would have been entitled had he received such temporary promotion.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1212), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the bill is that (1) Lawrence J. Nunes of Pearl City, Hawaii, shall be considered for purposes of pay and other benefits to have received a temporary promotion to the position of foreman (leadingman) electrician (powerplant) at the U.S. Navy Public Works Center, Pearl Harbor, Hawaii, for the period from May 26, 1968, through June 21, 1968; and (2) the Secretary of the Navy shall pay to the said Lawrence J. Nunes a sum equal to the difference between the amount of the pay he received for such period and the amount to which he would have been entitled had he received such temporary promotion.

STATEMENT

The facts of the case as contained in the report of the Department of the Navy are as follows:

The records of this Department show that Mr. Nunes is still an employee of the Navy Public Works Center, Pearl Harbor, Hawaii, and during the period from May 26, 1968, to June 21, 1968, he acted as foreman (leadingman) during the absence of the regularly assigned foreman. Through administrative error, the necessary documents to accomplish his temporary promotion for this period were not initiated and processed. Under decisions of the Comptroller General, it is not possible to retroactively promote an employee. For this reason, there is no corrective action available to the Department of the Navy. It should also be noted that Mr. Nunes had previously served and been paid as a foreman (leadingman) for service from August 6, 1967, to December 3, 1967.

The committee believes that the facts of this case are meritorious and accordingly recommends favorable enactment.

## BILLS PASSED OVER

On request of Mr. MANSFIELD, and by unanimous consent, the following bills were passed over:

Calendar No. 1232, House Joint Resolution 1255, National Retailing Week; Calendar No. 1233, S. 3650, illegal transportation, use, or possession of explosives; Calendar No. 1236, S. 2348, Securities Investor Protection Act of 1970; and Calendar No. 1237, H.R. 17654, to improve operation of legislative branch.

## VETERANS' HOUSING ACT OF 1970

The bill (H.R. 16710) to amend chapter 37 of title 38, United States Code, to remove the time limitations on the use of entitlement to loan benefits, to authorize guaranteed and direct loans for the purchase of mobile homes, to authorize direct loans for certain disabled veterans and for other purposes was announced as next in order.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all after the enacting clause of H.R. 16710 be stricken and that the text of S. 3656, the Senate companion bill as reported by the committee and which is on the calendar be substituted therefor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the amendment is as follows:

That this Act may be cited as the "Veterans' Housing Act of 1970".

SEC. 2. (a) Section 1802(b) of title 38, United States Code, is amended by striking out the last sentence thereof.

(b) Section 1803 of such title is amended by striking out subsection (a) and inserting in lieu thereof the following:

"(a)(1) Any loan to a World War II or Korean conflict veteran, if made for any of the purposes, and in compliance with the provisions, specified in this chapter is automatically guaranteed by the United States in an amount not more than 60 per centum of the loan if the loan is made for any of the purposes specified in section 1810 of this title and not more than 50 per centum of the loan if the loan is for any of the purposes specified in section 1812, 1813, or 1814 of this title.

"(2) Any unused entitlement of World War II or Korean conflict veterans which expired under provisions of law in effect prior to the date of enactment of the Vet-

erans' Housing Act of 1970 is hereby restored and shall not expire until used."

(c) Subsection (b) of such section 1803 is amended by striking out "1810 and 1811" and inserting in lieu thereof "1810, 1811, and 1819".

(d) Subsection (b) of section 1804 of such title is amended by striking out "The" and inserting in lieu thereof "Subject to notice and opportunity for a hearing, the"; and subsection (d) of such section is amended by striking out "Whenever" and inserting in lieu thereof "Subject to notice and opportunity for a hearing, wherever".

(e) Section 1818 of such title is amended by striking out subsections (c), (d), and (e) and inserting in lieu thereof the following:

"(c) Notwithstanding the exception in subsection (a) of this section, entitlement derived under such subsection (a) shall include eligibility for any of the purposes specified in sections 1813 and 1815, and business loans under section 1814 of this title, if (1) the veteran previously derived entitlement to the benefits of this chapter based on service during World War II or the Korean conflict, and (2) he has not used any of his entitlement derived from such service.

"(d) Any entitlement to the benefits of this section which had not expired as of the date of enactment of the Veterans' Housing Act of 1970 and any entitlement to such benefits accruing after such date shall not expire until used."

SEC. 3. Section 1810 of title 38, United States Code, is amended by—

(1) adding the following new clause after clause (4) of subsection (a):

"(5) To refinance an existing mortgage loan which is secured of record on a dwelling or farm residence owned and occupied by him as his home. Nothing in this chapter shall preclude a veteran from paying to a lender any discount required by such lender in connection with such refinancing."; and

(2) adding at the end of that section the following new subsection:

"(d) Nothing in this chapter shall be deemed to preclude the guaranty of a loan to an eligible veteran to purchase a one-family residential unit to be owned and occupied by him as a home in a condominium housing development or project as to which the Secretary of Housing and Urban Development has issued, under section 234 of the National Housing Act, as amended (12 U.S.C. 1715y), evidence of insurance on at least one loan for the purchase of a one-family unit. The Administrator shall guarantee loans to veterans on such residential units when such loans meet those requirements of this chapter which he shall, by regulation, determine to be applicable to such loans."

SEC. 4. Section 1811 of title 38, United States Code, is amended—

(1) by striking out "1810" in subsections (a) and (b) and inserting in lieu thereof: "1810 or 1819";

(2) by striking out the second sentence of subsection (b) and inserting in lieu thereof the following: "He shall, with respect to any such area, make, or enter into commitments to make, to any veteran eligible under this title, a loan for any or all of the purposes described in section 1810(a) or 1819 of this title.";

(3) by striking out "1810 of this title" in subsections (c)(1) and (g) and inserting in lieu thereof "1810 or 1819 of this title, as appropriate";

(4) by striking out "The" in subsection (d)(2) and inserting in lieu thereof "(A) Except for any loan made under this chapter for the purposes described in section 1819 of this title, the";

(5) by inserting immediately after subsection (d)(2) (as amended by clause (4) above) the following new paragraph:

"(B) The original principal amount of any loan made under this section for the purposes described in section 1819 of this title shall not exceed the amount specified by the Administrator pursuant to subsection (d) of such section."; and

(6) by striking out subsections (h), (i), and (j) and inserting in lieu thereof the following:

"(h) The Administrator may exempt dwellings constructed through assistance provided by this section from the minimum prescribed pursuant to subsection (a) of section 1804 of this title, and with respect to such dwellings may prescribe special minimum land planning and subdivision requirements which shall be in keeping with the general housing facilities in the locality but shall require that such dwellings meet minimum requirements of structural soundness and general acceptability.

"(i) The Administrator is authorized, without regard to the provisions of subsections (a), (b), and (c) of this section, to make or enter into a commitment to make a loan to any veteran to assist the veteran in acquiring a specially adapted housing unit authorized under chapter 21 of this title, if the veteran is determined to be eligible for the benefits of such chapter 21, and is eligible for loan guaranty benefits under this chapter.

"(j)(1) If any builder or sponsor proposes to construct one or more dwellings in a housing credit shortage area, or in any area for a veteran who is determined to be eligible for assistance in acquiring a specially adapted housing unit under chapter 21 of this title, the Administrator may enter into commitment with such builder or sponsor, under which funds available for loans under this section will be reserved for a period not in excess of three months, or such longer period as the Administrator may authorize to meet the needs in any particular case, for the purpose of making loans to veterans to purchase such dwellings. Such commitment may not 'be assigned or transferred except with the written approval of the Administrator. The Administrator shall not enter into any such commitment unless such builder or sponsor pays a nonrefundable commitment fee to the Administrator in an amount determined by the Administrator, not to exceed 2 per centum of the funds reserved for such builder or sponsor.

"(2) Whenever the Administrator finds that a dwelling with respect to which funds are being reserved under this subsection has been sold, or contracted to be sold, to a veteran eligible for a direct loan under this section, the Administrator shall enter into a commitment to make the veteran a loan for the purchase of such dwelling. With respect to any loan made to an eligible veteran under this subsection, the Administrator may make advances during the construction of the dwelling, up to a maximum in advances of (A) the cost of the land plus (B) 80 per centum of the value of the construction in place."

SEC. 5. (a) Subchapter II of chapter 37 of title 38, United States Code, is amended by adding at the end thereof the following new section:

"§ 1819. Loans to purchase mobile homes and mobile home lots

"Eligibility for Loan Guaranty

"(a) Notwithstanding any other provision of this chapter, any veteran eligible for loan guaranty benefits under this chapter who has maximum home loan guaranty entitlement available for use shall be eligible for the mobile home loan guaranty benefit under this section. Use of the mobile home loan guaranty benefit provided by this section shall preclude the use of any home loan guaranty entitlement under any other section of this chapter until the mobile home loan guaranteed under this section has been paid in full or the security has been disposed of to a transferee and the Administrator, after determining that such requirements of section 1817 of this title as he determines, by regulation, to be applicable have been met, has released the veteran from all further liability to the Administrator with respect to such loan.

"Lot and Site Preparation

"(b) Subject to the limitations in subsection (d) of this section, a loan to purchase a mobile home under this section may include (or be augmented by a separate loan for) (1) an amount to finance the acquisition of a lot on which to place such home; and (2) an additional amount to pay expenses reasonably necessary for the appropriate preparation of such a lot, including, but not limited to, the installation of utility connections, sanitary facilities and paying, and the construction of a suitable pad, provided a first lien on such lot is obtained for the total loan amount.

"Automatic Guarantee of Certain Loans

"(c)(1) Any loan made to a veteran eligible under subsection (a) of this section, if made pursuant to the provisions of this chapter, by a lender of a class specified in the first sentence of section 1802(d) of this title, shall be automatically guaranteed by the Administrator if the loan is for the purpose of purchasing a new mobile home or if the loan is for the purchase of a used mobile home and such used mobile home is the security for a prior loan guaranteed under this section or is the security for a loan guaranteed or insured by another Federal agency. Any loan to be made for such purpose by a lender not specified in the first sentence of section 1802(d) of this title shall be submitted to the Administrator for approval prior to loan closing.

"Prior Approval of Certain Loans

"(2) Upon determining that a loan submitted for prior approval is eligible for guaranty under this section, the Administrator shall issue a commitment to guarantee such loan and shall thereafter guarantee the loan when made if such loan qualifies therefor in all respects.

"Payment of loan guaranty

"(3) The Administrator's guaranty shall not exceed 30 per centum of the loan, including any amount for lot acquisition and site preparation, and payment of such guaranty shall be made only after liquidation of the security for the loan and the filing of an accounting with the Administrator. In such accounting the Administrator shall allow the holder of the loan to charge against the liquidation or resale proceeds accrued unpaid interest to such cutoff date as the Administrator may establish and such costs and expenses as he determines to be reasonable and proper.

"Loan guaranty limitations

"(d)(1) The Administrator shall establish a loan maximum for each type of loan authorized by this section. In the case of a new mobile home, the Administrator may establish a maximum loan amount based on the manufacturer's invoice cost to the dealer and such other cost factors as the Administrator considers proper to take into account. In the case of a used mobile home, the Administrator shall establish a maximum loan amount based on his determination of the reasonable value of the property. In the case of any lot on which to place a mobile home financed through the assistance of this section and for the necessary site preparation, the loan amount shall not be increased by an amount in excess of the reasonable value of such lot or site preparation or both, as determined by the Administrator.

"(2) The maximum permissible loan

amount and the term for which the loan is made shall not exceed—

"(A) $10,000 for twelve years and thirty-two days in the case of a loan covering the purchase of a mobile home only, or

"(B) $15,000 (but not to exceed $5,000 for lot acquisition) for fifteen years and thirty-two days in the case of a loan covering the purchase of a mobile home and a suitable lot on which to place such home, and

such additional amount as is determined by the Administrator to be appropriate to cover the cost of necessary site preparation. Such limitations on the amount and term of any loan, however, shall not be deemed to preclude the Administrator, under regulations which he shall prescribe, from consenting to necessary advances for the protection of the security or the holder's lien, or to a reasonable extension of the term or reamortization of a loan.

"Loan guaranty requirements

"(e) No loan shall be guaranteed under this section unless—

"(1) the loan is repayable in approximately equal monthly installments;

"(2) the terms of repayment bear a proper relationship to the veteran's present and anticipated income and expenses, and the veteran is a satisfactory credit risk, taking into account the purpose of this program to make available lower cost housing to low and lower income veterans, especially those who have been recently discharged or released from active military, naval, or air service, who may not have previously established credit ratings;

"(3) the loan is secured by a first lien on the mobile home and any lot acquired or improved with the proceeds of the loan;

"(4) the amount of the loan, subject to the maximums established in subparagraph (d) of this section, is not in excess of the maximum amount prescribed by the Administrator;

"(5) the veteran certifies, in such form as the Administrator shall prescribe, that he will personally occupy the property as his home;

"(6) the mobile home is or will be placed on a site which meets specifications which the Administrator shall establish by regulation; and

"(7) the interest rate to be charged on the loan does not exceed the permissible rate established by the Administrator;

"Interest Rate

"(f) The Administrator shall establish such rate of interest for mobile home loans as he determines to be necessary in order to assure a reasonable supply of mobile home loan financing for veterans under this section.

"Restoration of Entitlement

"(g) Entitlement to the loan guaranty benefit used under this section may be restored a single time for any veteran by the Administrator provided the first loan has been repaid in full or the security has been disposed of to a transferee and the Administrator, after determining that such requirements of section 1817 of this title as he determines, by regulation, to be applicable have been met, has released the veteran from all further liability to the Administrator.

"Regulations

"(h) The Administrator shall promulgate such regulations as he determines to be necessary or appropriate in order to fully implement the provisions of this section, and such regulations shall specify which provisions in other sections of this chapter he determines should be applicable to loans guaranteed under this section. The Administrator shall have such powers and responsibilities in respect to matters arising under this section as he has in respect to loans made or guaranteed under other sections of this chapter.

"Quality Standards

"(i) No loan for the purchase of a mobile home shall be financed through the assistance of this section unless the mobile home and lot, if any, meet or exceed standards for planning, construction, and general acceptability as prescribed by the Administrator. Such standards shall be designed to encourage the maintenance and development of sites for mobile homes which will be attractive residential areas and which will be free from, and not substantially contribute to, adverse scenic or environmental conditions. Standards prescribed by the Administrator relating to scenic and environmental conditions shall be developed by the Administrator in consultation with the Secretary of Housing and Urban Development and with representatives of other appropriate Federal, State, and local agencies or instrumentalities, taking into consideration the particular or unique conditions or physical characteristics which may exist in any geographic or local area. For the purpose of assuring compliance with such standards, the Administrator shall from time to time inspect the manufacturing process of mobile homes to be sold to veterans and shall submit questionnaires to veteran owners and conduct random onsite inspections of mobile homes purchased with assistance under this chapter.

"Warranty Requirement

"(j) The Administrator shall require the manufacturer to become a warrantor of any new mobile home which is approved for purchase with financing through the assistance of this chapter and to furnish to the purchaser a written warranty in such form as the Administrator shall require. Such warranty shall include (1) a specific statement that the mobile home meets the standards prescribed by the Administrator pursuant to the provisions of subsection (i) of this section; and (2) a provision that the warrantor's liability to the purchaser or owner is limited under the warranty to instances of substantial nonconformity to such standards which become evident within one year from date of purchase and as to which the purchaser or owner gives written notice to the warrantor not later than ten days after the end of the warranty period. The warranty prescribed herein shall be in addition to, and not in derogation of, all other rights and privileges which such purchaser or owner may have under any other law or instrument and shall so provide in the warranty document.

"Authority To Deny Guaranteed or Direct Loan Financing

"(k) Subject to notice and opportunity for a hearing, the Administrator is authorized to deny guaranteed or direct loan financing in the case of mobile homes constructed by any manufacturer who refuses to permit the inspections provided for in subsection (i) of this section; or in the case of mobile homes which are determined by the Administrator not to conform to the aforesaid standards; or where the manufacturer of mobile homes fails or is unable to discharge his obligations under the warranty.

"Authority To Disapprove Mobile Homes Sites or Purchases From Certain Dealers

"(l) Subject to notice and opportunity for a hearing, the Administrator may refuse to approve as acceptable any site in a mobile home park or subdivision owned or operated by any person whose rental or sale methods, procedures, requirements, or practices are determined by the Administrator to be unfair or prejudicial to veterans renting or purchasing such sites. The Administrator may also refuse to guarantee or make direct loans for veterans to purchase mobile homes offered for sale by any dealer if substantial deficiencies have been discovered in such homes, or if he determines that there has been a failure or indicated inability of the dealer to discharge contractual liabilities to veterans, or that the type of contract of sale or methods, procedures, or practices pursued by the dealer in the marketing of such properties have been unfair or prejudicial to veterans purchasers.

"Annual Reports to Congress

"(m) The Administrator shall submit to the Congress, no later than one year after the date of enactment of the Veterans' Housing Act of 1970 and annually thereafter, a report on operations under this section, including the results of inspections and questionnaires required by subsection (i) of this section and experience with compliance with the warranty required by subsection (j) of this section.

"Applicability of Certain Provisions of Law

"(n) The provisions of section 1804(d) and section 1821 of this chapter shall be fully applicable to lenders making mobile home loans guaranteed under this section and to holders of such loans.

"Termination Date for Mobile Home Loan Program

"(o) No loans shall be guaranteed or made by the Administrator for the purposes described in the provisions of this section on and after July 1, 1975, except pursuant to commitments issued prior to such date."

(b) The table of sections at the beginning of chapter 37 of such title is amended by inserting immediately after

"1818. Veterans who serve after January 31, 1955."

the following:

"1819. Loans to purchase mobile homes and mobile home lots."

SEC. 6. Section 5 of this Act shall become effective sixty days following the date of enactment of this Act.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time and was passed.

The PRESIDING OFFICER. Without objection, the title will be appropriately amended.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that S. 3656 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

---

## HISTORY OF THE COMMITTEE ON AGRICULTURE AND FORESTRY

The resolution (S. Res. 458) authorizing the printing of a history of the Committee on Agriculture and Forestry as a Senate document was considered, and agreed to, as follows:

*Resolved,* That a brief history of the United States Senate Committee on Agriculture and Forestry and landmark agricultural legislation 1825–1970 be printed as a Senate document, and that there be printed nine thousand additional copies of such document for the use of the Committee on Agriculture and Forestry.

Mr. MANSFIELD. Mr. President, I ask

unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1222), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 458 would provide (1) that a brief history of the U.S. Senate Committee on Agriculture and Forestry and landmark agricultural legislation, 1825–1970, be printed as a Senate document, and (2) that there be printed 9,000 additional copies of such document for the use of that committee.

The printing-cost estimate, supplied by the Public Printer, is as follows:

*Printing-cost estimate*

| | |
|---|---|
| To print as a document (1,500 copies) | $1,290.45 |
| 9,000 additional copies, at $128 per thousand | 1,152.00 |
| Total estimated cost, Senate Resolution 458 | 2,442.45 |

## ADDITIONAL FUNDS FOR THE COMMITTEE ON BANKING AND CURRENCY

The resolution (S. Res. 460) authorizing the Committee on Banking and Currency to expend additional funds from the contingent fund of the Senate was considered and agreed to, as follows:

*Resolved*, That the Committee on Banking and Currency is hereby authorized to expend, from the contingent fund of the Senate, during the Ninety-first Congress, $5,000 in addition to the amount, and for the same purpose, specified in section 134(a) of the Legislative Reorganization Act approved August 2, 1946.

## ADDITIONAL EXPENDITURES BY THE COMMITTEE ON THE JUDICIARY

The resolution (S. Res. 465) authorizing additional expenditures by the Committee on the Judiciary for a study of matters pertaining to improvements in judicial machinery was considered, and agreed to, as follows:

*Resolved*, That the Committee on the Judiciary is authorized to expend from the contingent fund of the Senate $10,000, in addition to the amount, and for the same purposes and during the same period, specified in Senate Resolution 340, Ninety-first Congress, agreed to February 16, 1970, authorizing a study of matters pertaining to improvements in judicial machinery.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1223), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 465 would increase by $10,000, from $220,200 to $230,200, the limitation on expenditures by the Committee on the Judiciary for the study of matters pertaining to improvements in judicial machinery it is currently engaged in pursuant to Senate Resolution 340 of the present Congress.

Senate Resolution 340 as agreed to by the Senate on February 16, 1970, authorized the Committee on the Judiciary, or any duly authorized subcommittee thereof, to expend not to exceed $220,200 from February 1, 1970, through January 31, 1971, to examine, investigate and make a complete study of any and all matters pertaining to improvements in judiciary machinery.

The additional funds which would be authorized by Senate Resolution 465 are requested by the Committee on the Judiciary to enable it to meet the costs of the salary increase granted by Public Law 91–231, approved April 15, 1970.

## ADDITIONAL EXPENDITURE BY THE COMMITTEE ON THE JUDICIARY

The resolution (S. Res. 466) authorizing additional expenditures by the Committee on the Judiciary for a study of matters pertaining to refugees and escapees was considered and agreed to, as follows:

*Resolved*, That the Committee on the Judiciary is authorized to expend from the contingent fund of the Senate $6,000, in addition to the amount, and for the same purposes and during the same period, specified in Senate Resolution 345, Ninety-first Congress, agreed to February 16, 1970, authorizing a study of matters pertaining to refugees and escapees.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1224), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 466 would increase by $6,000, from $128,900 to $134,900, the limitation on expenditures by the Committee on the Judiciary for the study of matters pertaining to refugees and escapees it is currently engaged in pursuant to Senate Resolution 345 of the present Congress.

Senate Resolution 345 as agreed to by the Senate on February 16, 1970, authorized the Committee on the Judiciary, or any duly authorized subcommittee thereof, to expend not to exceed $128,900 from February 1, 1970, through January 31, 1971, to examine, investigate and make a complete study of any and all matters pertaining to the problems created by the flow of refugees and escapees.

The additional funds which would be authorized by Senate Resolution 466 are requested by the Committee on the Judiciary to enable it to meet the costs of the salary increase granted by Public Law 91–231, approved April 15, 1970.

## AUTHORIZATION FOR THE PRINTING OF SENATE HEARINGS ON NATIONAL SCIENCE FOUNDATION AUTHORIZATION, 1971

The resolution (S. Res. 467) authorizing the printing of additional copies of Senate hearings on National Science Foundation Authorization, 1971 was considered, and agreed to, as follows:

S. RES. 467

*Resolved*, That there be printed for the use of the Committee on Labor and Public Welfare one thousand additional copies of its hearings of the current Congress on National Science Foundation Authorization, 1971 (S. 3412, S. 3700).

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1225), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 467 would provide that there be printed for the use of the Committee on Labor and Public Welfare 1,000 additional copies of its hearings of the current Congress on National Science Foundation Authorization, 1971 (S. 3412, S. 3700).

The printing-cost estimate, supplied by the Public Printer, is as follows:

*Printing-cost estimate*

| | |
|---|---|
| Back to press, 1,000 copies | $800.80 |

## ADDITIONAL EXPENDITURES BY COMMITTEE ON COMMERCE

The resolution (S. Res. 468) authorizing additional expenditures by the Committee on Commerce was considered and agreed to, as follows:

*Resolved*, That the Committee on Commerce is hereby authorized to expend, from the contingent of the Senate, $100,000, in addition to the amount, and for the same purposes and during the same period, specified in Senate Resolution 324, Ninety-first Congress, agreed to February 16, 1970.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1226), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 468 would increase by $100,000, from $759,000 to $859,000, the limitation on expenditures by the Committee on Commerce for the study of various matters within its jurisdiction it is currently engaged in pursuant to Senate Resolution 324 of the present Congress.

Senate Resolution 324, as agreed to by the Senate on February 16, 1970, authorized the expenditure of not to exceed $759,000 by the Committee on Commerce, or any duly authorized subcommittee thereof, from February 1, 1970, through January 31, 1971, to examine, investigate, and make a complete study of any and all matters pertaining to—

(1) Interstate commerce generally, including consumer protection;
(2) Foreign commerce generally;
(3) Transportation generally;
(4) Maritime matters;
(5) Interoceanic canals;
(6) Domestic surface transportation, including pipelines and highway safety;
(7) Communications, including a complete review of national and international telecommunications and the use of communications satellites;
(8) Federal power matters;
(9) Civil aeronautics;
(10) Fisheries and wildlife;
(11) Marine sciences; and
(12) Weather services and modification, including the use of weather satellites.

## PROPOSED ADDITION TO RULE XVI OF THE STANDING RULES OF THE SENATE

The Senate proceeded to consider the resolution (S. Res. 413) proposing an addition to rule XVI of the Standing Rules of the Senate which had been reported from the Committee on Rules and Administration with an amendment on page 1, line 4, after the figure "8.", strike out "Every general appropriation bill reported by the Committee on Appropriations during any session of the Congress shall be accompanied by a report which shall identify with particularity each item of appropriation contained therein" and insert "Every report on general ap-

propriation bills filed by the Committee on Appropriations shall identify with particularity each recommended amendment which proposes an item of appropriation"; so as to make the resolution read:

S. RES. 413

*Resolved*, That Rule XVI of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"8. Every report on general appropriation bills filed by the Committee on Appropriations shall identify with particularity each recommended amendment which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session."

The amendment was agreed to.

Mr. RUSSELL. Mr. President, before the resolution is agreed to, I would like to have a brief explanation of what effect this measure has on rule XVI.

Mr. MANSFIELD. Mr. President, the Senator from Georgia will recall that we discussed this matter and that the Senator made certain suggestions that were considered by the Committee on Rules and Administration. The Senator's suggestions were incorporated in the resolution pending before the Senate.

Senate Resolution 413, as agreed to by the Committee on Rules and Administration, would amend rule XVI of the Standing Rules by adding at the end thereof the following new paragraph:

8. Every general appropriation bill reported by the Committee on Appropriations during any session of the Congress shall be accompanied by a report which shall identify with particularly each item of appropriation contained therein which is not made to carry out the provisions of an existing law. . . .

Mr. RUSSELL. Mr. President, the Senator need not read further unless he desires to. I recall the history and background.

Mr. MANSFIELD. Mr. President, this is the handiwork of the Senator from Georgia.

Mr. RUSSELL. It is a needed addition to the rules.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. CURTIS. Mr. President, the Committee on Rules and Administration considered this matter and not only adopted the recommendations of the distinguished Senator from Georgia, but was also very grateful for it.

Had he not made these recommendations for the change, I am afraid that the rule would be a little cumbersome because we would have been called upon to incorporate matters in the reports that are entirely within the jurisdiction of the House of Representatives.

Mr. MANSFIELD. Mr. President, the Senator made a very pertinent observation. That is why, as always, we seek the advice and the counsel of the distinguished Senator from Georgia, the President pro tempore of this body. Because of the Senator's suggestions, the Committee on Rules and Administration agreed to them, and justifiably so.

Mr. RUSSELL. Mr. President, I am greatly flattered by the remarks of the distinguished leader, the Senator from Montana. I can assure the Senator that I did not raise this query regarding the resolution to invite any lavish praise.

Mr. MANSFIELD. The Senator is correct. He did it deliberately so that the Senate would know what it was doing so far as this aspect of its rules is concerned.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution, as amended, was agreed to.

The title was amended so as to read:

Resolution amending rule XVI of the Standing Rules of the Senate to provide that reports on appropriation bills shall identify amendments proposing appropriations not specifically authorized by law.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1228), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 413 as referred to the Committee on Rules and Administration would amend rule XVI of the Standing Rules of the Senate by adding at the end thereof the following new paragraph:

8. Every general appropriation bill reported by the Committee on Appropriations during any session of the Congress shall be accompanied by a report which shall identify with particularity each item of appropriation contained therein which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passsed by the Senate during that session.

The purpose of Senate Resolution 413 is explained by its author, Senate Majority Leader Mike Mansfield, as follows:

I have enclosed a copy of a resolution to amend rule XVI of the Standing Rules of the Senate. It was considered a preferable course to follow rather than taking the action proposed in the Foreign Military Sales Act to prohibit expenditure of funds unless specifically authorized by law.

As you will recall during last year's debate on the Foreign Aid Appropriations Act, the question arose concerning the wisdom of appropriating funds in excess of the amount authorized in the annual authorization. The proposal contained in the Military Sales Act goes well beyond the field of foreign aid or foreign military sales. It would prohibit the expenditure of any funds that were not specifically authorized by law. That would terminate many hundreds of items that are regularly passed based upon resolution (as the gratuity to survivors of Senate employees and funds for staffs of subcommittees in the legislative branch) or by direct appropriation such as the salaries of teachers on military bases around the world.

The proposed rules change would simply amend the Senate rules to specify that the Appropriations Committee would specifically identify with particularity in its report accompanying each appropriations bill each item contained in the bill which does not have a previous authorization. This would would be a most satisfactory solution to this issue. It would be similar to the purposes of the Cordon rule that presently prescribes a more ready review to every Senator of proposed changes in law.

Upon the recommendation of Senator Richard B. Russell, chairman of the Committee on Appropriations, the Committee on Rules and Administration has amended Senate Resolution 413 to limit to amendments alone the requirement to identify with particularity in Appropriations Committee reports any items for which there are no authorization. The Rules Committee agrees as to the impracticality of embracing House items within the stipulation, especially since major House items without authorization are identified in House Appropriation Committee reports. Also, the Rules Committee points out that by its approval of Senate Resolution 413 in the amended form, it is merely seeking to formalize a procedure which has already been instituted in the Committee on Appropriations. In the judgment of the Rules Committee, however, the value to Members of the Senate of the information to be gained by such procedure warrants its formal incorporation into the standing rules.

The new paragraph which would be added to rule XVI, incorporating the amendment to Senate Resolution 413 proposed by the Committee on Rules and Administration, is as follows:

8. Every report on general appropriation bills filed by the Committee on Appropriations shall identify with particularity each recommended amendment which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session.

The Committee on Rules and Administration has also amended the title of the resolution to reflect its amendment of the text.

## ADDITIONAL COPIES OF HEARINGS ON COPYRIGHT LAW REVISION

The concurrent resolution (S. Con. Res. 81) authorizing the printing of additional copies of Senate hearings on Copyright Law Revision (S. 597, 90th Congress) was considered, and agreed to, as follows:

*Resolved by the Senate (the House of Representatives concurring)*, That there be printed for the use of the Senate Committee on the Judiciary two thousand additional copies of parts 1, 2, 3, 4, and index of the hearings before its Subcommittee on Patents, Trademarks, and Copyrights during the Ninetieth Congress on Copyright Law Revision (S. 597).

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1227), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Concurrent Resolution 81 would provide that there be printed for the use of the Senate Committee on the Judiciary 2,000 additional copies of parts 1, 2, 3, 4, and index of the hearings before its Subcommittee on Patents, Trademarks, and Copyrights during the 90th Congress on copyright law revision (S. 597).

The printing-cost estimate, supplied by the Public Printer, is as follows:

PRINTING-COST ESTIMATE

| | Back to press, first 1,000 copies | 1,000 additional copies | Subtotal |
|---|---|---|---|
| Pt. 1 | $1,796.86 | $370.29 | $2,167.15 |
| Pt. 2 | 1,681.30 | 334.72 | 2,016.02 |
| Pt. 3 | 2,167.72 | 419.57 | 2,587.29 |
| Pt. 4 | 1,912.99 | 398.43 | 2,311.42 |
| Index | 526.64 | 109.89 | 636.53 |
| Total estimated cost, Senate Concurrent Resolution 81 | | | 9,718.41 |

## PREPARATION AND PRINTING OF REVISED EDITION OF THE CONSTITUTION OF THE UNITED STATES OF AMERICA

The joint resolution (S.J. Res. 236) authorizing the preparation and printing of a revised edition of the Constitution of the United States of America—Analysis and Interpretation, of decennial revised editions thereof, and of biennial cumulative supplements to such revised editions was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Librarian of Congress shall have prepared—

(1) a hardbound revised edition of the Constitution of the United States of America—Analysis and Interpretation, published as Senate Document Numbered 39, Eighty-eighth Congress (referred to hereinafter as the "Constitution Annotated"), which shall contain annotations of decisions of the Supreme Court of the United States through the end of the October 1971 term of the Supreme Court construing provisions of the Constitution;

(2) upon the completion of each of the October 1973, October 1975, October 1977, and October 1979 terms of the Supreme Court, a cumulative pocket-part supplement to the hardbound revised edition of the Constitution Annotated prepared pursuant to clause (1), which shall contain cumulative annotations of all such decisions rendered by the Supreme Court after the end of the October 1971 term;

(3) upon the completion of the October 1981 term of the Supreme Court, and upon the completion of each tenth October term of the Supreme Court thereafter, a hardbound decennial revised edition of the Constitution Annotated, which shall contain annotations of all decisions theretofore rendered by the Supreme Court construing provisions of the Constitution; and

(4) upon the completion of the October 1983 term of the Supreme Court, and upon the completion of each subsequent October term of the Supreme Court beginning in an odd-numbered year (the final digit of which is not a 1), a cumulative pocket-part supplement to the most recent hardbound decennial revised edition of the Constitution Annotated, which shall contain cumulative annotations of all such decisions rendered by the Supreme Court which were not included in that hardbound decennial revised edition of the Constitution Annotated.

SEC. 2. All hardbound revised editions and all cumulative pocket-part supplements shall be printed as Senate documents.

SEC. 3. There shall be printed four thousand eight hundred and seventy additional copies of the hardbound revised editions prepared pursuant to clause (1) of the first edition and of all cumulative pocket-part supplements thereto, of which two thousand six hundred and thirty-four copies shall be for the use of the House of Representatives, one thousand two hundred and thirty-six copies shall be for the use of the Senate, and one thousand copies shall be for the use of the Joint Committee on Printing. All Members of the Congress, Vice Presidents of the United States, and Delegates and Resident Commissioners, newly elected subsequent to the issuance of the hardbound revised edition prepared pursuant to such clause and prior to the first hardbound decennial revised edition, who did not receive a copy of the edition prepared pursuant to such clause shall, upon timely request, receive one copy of such edition and the then current cumulative pocket-part supplement and any further supplements thereto. All Members of the Congress, Vice Presidents of the United States, and Delegates and Resident Commissioners, no longer serving after the issuance of the hardbound revised edition prepared pursuant to such clause and who received such edition, may receive one copy of each cumulative pocket-part supplement thereto upon timely request.

SEC. 4. Additional copies of each hardbound decennial revised edition and of the cumulative pocket-part supplements thereto shall be printed and distributed in accordance with the provisions of any concurrent resolution hereafter adopted with respect thereto.

SEC. 5. There are authorized to be appropriated such sums, to remain available until expended, as may be necessary to carry out the provisions of this joint resolution.

The preamble was agreed to, as follows:

Whereas the Constitution of the United States of America—Analysis and Interpretation, published in 1964 as Senate Document Numbered 39, Eighty-eighth Congress, serves a very useful purpose by supplying essential information, not only to the Members of Congress but also to the public at large;

Whereas such document contains annotations of cases decided by the Supreme Court of the United States to June 22, 1964;

Whereas many cases bearing significantly upon the analysis and interpretation of the Constitution have been decided by the Supreme Court since June 22, 1964;

Whereas the Congress, in recognition of the usefulness of this type of document, has in the last half century since 1913, ordered the preparation and printing of revised editions of such a document on six occasions at intervals of from ten to fourteen years; and

Whereas the continuing usefulness and importance of such a document will be greatly enhanced by revision at shorter intervals on a regular schedule and thus made more readily available to Members and Committees by means of pocket-part supplements: Now, therefore, be it

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-1229), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Joint Resolution 236 would authorize the preparation and printing of a revised edition of The Constitution of the United States—Analysis and Interpretation (S. Doc. 39, 88th Cong.), popularly known as The Constitution Annotated, as a Senate document. Moreover, the joint resolution would establish a permanent authority for the preparation and printing of subsequent decennial revised editions thereof, and of biennial cumulative supplements to each such revised edition.

Commencing in 1913, six such compilations of annotations of decisions rendered by the Supreme Court of the United States interpreting the provisions of the Constitution have been printed, at intervals of 10 to 13 years, as Senate documents. An interesting and informative background statement relative to those publications supplied by the Legislative Reference Service of the Library of Congress, is included at the end of this report.

The Committee on Rules and Administration, which compiles and publishes the Senate Manual, is pleased to note in that statement the fact that the Manual prior to 1915 carried citations to Supreme Court decisions following the sections of the Constitution to which they related. Only when the volume of such decisions had increased considerably, and the desirability of distinguishing by annotation the points decided by the Court was raised, did the Senate issue a separate annotated volume for the purpose.

The present edition of The Constitution Annotated, printed as Senate Document 39 of the 88th Congress, contains annotations of cases decided by the Supreme Court through June 22, 1964. Because of the importance—not only to Congress, but to all citizens—of the Supreme Court decisions since that date, the desirability of incorporating the same into a new revision of The Constitution Annotated is quite incontestable. On this point, the Committee on Rules and Administration concurs wholeheartedly with Lester S. Jayson, Director of the Legislative Reference Service, Library of Congress when he states—

"The years since 1964 have witnessed a series of Supreme Court decisions, which, because of their impact on prior constitutional interpretations, Federal-State relations, and many other areas of unusual importance, may fairly be compared to the landmark decisions of the earliest Supreme Court days."

The relevance of Mr. Jayson's observation becomes apparent when it is considered that the text of the last three revisions of The Constitution Annotated have been prepared in the department he presently heads in the Library of Congress. Moreover, he was coeditor of the present edition.

Specifically, Senate Joint Resolution would provide that the Librarian of Congress shall have prepared a revised edition of The Constitution of the United States of America—Analysis and Interpretation, published as Senate Document 39, 88th Congress, which shall contain annotations of decisions of the Supreme Court of the United States through the end of its October 1971 term, construing provisions of the Constitution. Every 10 years thence the Librarian would prepare a new revised edition of the publication incorporating the decisions rendered during that period, together with appropriate annotations.

At 2-year intervals between the revised editions the Librarian would prepare cumulative pocket-part supplements containing decisions and annotations covering such intervals.

The revised or decennial editions would be hardbound, and the cumulative supplements would be paperbound, designed to fit in a pocket in the back of the hardbound volume.

Each hardbound revised edition of the Constitution Annotated and each paperbound supplement thereto would be printed as Senate documents. By virtue of this provision, the revised editions and the supplements would be available upon request to any of the more than 1,000 libraries in the United States under the depository library system.

There would be printed 4,870 additional copies of each revised edition and of the supplements thereto, of which 2,634 copies would be for the use of the House of Representatives (six per Member), 1,236 copies for the use of the Senate (12 per Member), and 1,000 copies for the use of the Joint Committee on Printing.

Newly elected Members of Congress, upon timely request, would be supplied with one copy of the most recent decennial edition and the most recent supplement thereto. When the next decennial edition is printed they would receive the normal allotment if they are still Members. Former Members, upon timely request, would receive one copy of each cumulative supplement to the most recent revised edition they had received while still a Member.

The cost of the preparation of the first revised edition of the Constitution Annotated has been estimated by the Library

of Congress to be $110,000. The cost they supply for the first supplement thereto is estimated to be $23,000.

The Public Printer has supplied the Committee on Rules and Administration with a printing-cost estimate of $68,877.91 for production of the first revised edition. The first biennial supplement thereto is estimated to cost $2,976.66.

On the basis of the estimates supplied by the Library of Congress and the Government Printing Office the total expenditure involved in this joint resolution would amount to $178,878 for the first fully revised edition of The Constitution Annotated, and $25,976 for the first biennial supplement thereto.

The Superintendent of Documents has advised that as of June 30, 1970, his office had sold 18,516 copies of the present Constitution Annotated (S. Doc. 39, 88th Cong.) at a price of $15.50 each. His remaining stock of the document on that date amounted to 1,296 copies.

---

## CONSIDERATION OF FOUR VETERANS BILLS: S. 3656; S. 3657; S. 3785; AND H.R. 370 ON THE CALL OF THE CALENDAR

Mr. CRANSTON. Mr. President, I understand that upon the call of the calendar, the Senate is about to consider a series of veterans' bills. On September 23, I reported these bills—S. 3656, S. 3657, S. 3785, and H.R. 370—from the Committee on Labor and Public Welfare, each of them with a committee amendment in the nature of a substitute and a title amendment. Before I describe briefly the purposes of these bills, I want to express my thanks to the distinguished majority and minority leaders for their great dedication to the veterans of our Nation as shown by the speedy floor action which they have scheduled on these bills.

I also wish to thank for his great assistance and cooperation the outstanding chairman of the Committee on Labor and Public Welfare, the distinguished Senator from Texas (Mr. YARBOROUGH). Senator YARBOROUGH also serves as the ranking majority member of the Veterans' Affairs Subcommittee, which I have been privileged to chair for the last 18 months. As every Senator knows, RALPH YARBOROUGH has been a dedicated and tireless fighter for veterans' benefits. He has established a momentous record of achievement for our Nation's veterans, and those of us who have followed in his footsteps as chairman of the Veterans' Affairs Subcommittee have, indeed, been greatly challenged to live up to the example of leadership he provided as subcommittee chairman and has continued to provide as chairman of the full Labor and Public Welfare Committee.

I know that all of my colleagues on the subcommittee will miss his great energy and wisdom and that, most of all, his magnificent efforts will be missed by the 28 million veterans and their families in our Nation today.

Also most deserving of special thanks is the ranking majority member of the full Labor and Public Welfare Committee, the distinguished Senator from West Virginia (Mr. RANDOLPH). Senator RANDOLPH served as chairman of this subcommittee for almost 2 years and has always been most generous with his time and counsel in full committee consideration of our veterans legislation, as well as in consideration in the subcommittee, on which he has continued to serve.

I also wish to express my personal gratitude to the ranking minority member of the subcommittee, my fellow freshman colleague from Pennsylvania (Mr. SCHWEIKER). Senator SCHWEIKER ably assisted by the minority staff of the committee as well as his own staff, has, from the very start of our partnership on this subcommittee established a bipartisan theme. It is a great tribute to him that the four bills under consideration today now join the eight other veterans bills previously reported from the Committee on Labor and Public Welfare and unanimously passed by the Senate during this Congress in having been unanimously approved in subcommittee and unanimously approved in full committee. The four bills under consideration today were unanimously approved in subcommittee on September 15 and in full committee on September 16, and I urge that they be passed unanimously by the Senate.

I am extremely proud of this bipartisan and unanimous record, and I plan to do everything I possibly can to continue to see that the business of caring for our Nation's veterans and providing appropriate benefits for them does not become mired in partisan politics. I am confident that Senator SCHWEIKER shares my strong conviction in this regard and will continue his outstanding leadership toward the same goal.

Mr. President, I would like to briefly outline the purposes of the bills under consideration by the Senate.

### S. 3656—VETERANS HOUSING ACT OF 1970

Mr. President, I introduced S. 3656 on March 31, was honored to have been able to report it to the Senate on September 23, and very pleased to urge its passage today. The committee amendment in the nature of a substitute has been inserted in place of the original bill text to amend chapter 37 of title 38 of the United States Code to achieve the following six basic purposes:

First. To restore to World War II and Korean conflict veterans all entitlements to home loan benefits which were unused and have expired—all outstanding World War II veterans entitlements expired on July 25, 1970.

Second. To remove the future expiration dates for the guaranteed and direct home loan program for all eligible war veterans—World War II, Korean conflict, and post-Korean.

Third. To establish a guaranteed and direct loan program for mobile homes and lots to place them on.

Fourth. To eliminate the fee—one-half of 1 percent of the total loan amount—now collected only from post-Korean veterans on VA direct and guaranteed home loans.

Fifth. To extend regular guaranteed and direct home loan entitlement to refinancing of existing mortgage loans made on regular houses.

Sixth. To extend regular guaranteed and direct home loan entitlement to loans for the purchase of single family residential units in condominiums approved by FHA.

The committee substitute also repeals a few obsolete provisions of chapter 37, title 38.

Mr. President, the two main features of this bill will provide substantial assistance to Vietnam veterans, as well as all post-Korean, Korean conflict, and World War II veterans in obtaining suitable housing during this time of highest interest rates and low availability of adequate living facilities. Restoration of the home loan entitlements of more than 10.3 million World War II and Korean conflict veterans, to the extent that they had not used their entitlements before they expired, should provide them with the opportunity to select the most appropriate time for them to use their entitlements to purchase a residence. Of at least equal importance, I believe that the new mobile home loan program will be of great assistance to our returning Vietnam veterans who have been experiencing great difficulty in securing suitable living arrangements. I also wish to point out that this new mobile home loan program would, by virtue of a provision in S. 3657, as reported, be available to servicemen after 180 days of active duty service.

The committee recognized that the mobile home program would be a new one for the Veterans' Administration and that mobile homes are generally a relatively phenomenon in our society. The committee substitute, therefore, imposes very specific and major responsibilities upon the Veterans' Administration to protect the veteran purchaser, as well as the interests of the U.S. Government.

Mr. President, I ask unanimous consent that the appropriate passages of the committee report, No. 91–1230, be set forth in the RECORD at this point in order to explain in detail the purposes of S. 3656 as reported, and I urge all of my colleagues to support the bill as reported.

There being no objection, the excerpt from the report was ordered to be printed in the RECORD, as follows:

#### EXCERPT FROM REPORT NO. 91–1230

The committee substitute does not include two rather costly (total $93.2 million first full year cost) subsidy provisions (for closing costs and one point of interest for five years) which were contained in S. 3656 (section 4(b)), because the Congress has recently expressly mandated the VA, along with the FHA, to study the possibility of achieving uniformity and a reduction of closing costs and report to Congress by July 1, 1971 (P.L. 91–351, the "Emergency Home Finance Act of 1970") and in that Act also established an interest subsidy for low and middle income purchases under both FHA and VA programs.

#### REMOVAL OF HOME LOAN EXPIRATION DATES AND RESTORATION OF UNUSED EXPIRED ENTITLEMENTS

Provisions to accomplish these purposes were proposed by the administration in an April 16, 1970, transmission to the President of the Senate. These provisions were introduced on June 2, 1970, as amendment No. 672 to S. 3683 and are contained in sections 2(a), (b), and (c) of the committee substitute. In his transmittal letter, the Administrator of Veterans' Affairs supported the proposal as follows:

"Prior to July 6, 1961, World War II veterans, as well as Korean veterans, were limited in their use of VA loans benefits to a

period terminated by a fixed date. This terminal date had been extended several times so that as to World War II veterans it was then fixed at July 25, 1962, and as to Korean conflict veterans at January 31, 1965.

"Public Law 87–84, approved July 6, 1961, established a phase-out formula, gearing the entitlement period to the length of the veteran's war service and the date of his discharge, with emphasis on those who served longest and were most recently discharged. Under the formula, each veteran was given entitlement of ten years from date of separation from his last period of duty which included service in the war period, plus an additional period of one year from each three months of active duty performed during the war or conflict. Under current law (38 U.S.C. 1803), the eligibility of World War II and Korean conflict veterans cannot extend beyond July 25, 1970, and January 31, 1975, respectively.

"The foregoing entitlement formula applies also to veterans of the post-Korean period having loan entitlement under section 1818 of title 38, except that the final date within which the phase-out formula operates for that group is twenty years from the date of the veteran's separation from his last period of active duty.

"Terminal dates for the eligibility of World War II veterans have been extended several times. Extensions have been made at or just prior to the statutory cut-off dates which has created a strong climate of uncertainty for veterans and other program participants. Removal of the phase-out criteria and the group cut-off dates would eliminate the element of urgency by veterans in using their eligibility, which becomes critical in periods of credit stringency.

"Elimination of the delimiting dates on eligibility for the GI loan program would be in line with the eligibility criteria for the FHA veterans' loan program. Such a change would also simplify the administration of the VA loan programs. Further, veterans could adjust the timing of their home purchases and mortgage credit needs to coincide with favorable private market conditions, when sellers and lenders are willing to participate in the loan guaranty program. No veteran would be denied use of his entitlement because it had expired at a time when guaranteed loans were unavailable. * * *"

With respect to restoration of unused expired entitlements of World War II and Korean conflict veterans, although neither the legislation proposed by the administration nor its transmittal letter, quoted above, specifically refers to such restoration, the Administrator stated in his June 9, 1970, testimony: "We believe that the amendment removing the phasing-out and program termination provisions will have this result [restoration] without such a provision." The committee substitute spells out this restoration of entitlements in the new subsection (a)(2) added to present section 1803 by section 2(b) of the substitute. This provision would restore lost unused entitlements of more than 10.3 million WWII and Korean conflict veterans who, for various reasons, may not have been able to use their entitlements or use them fully before they expired (including the 2.1 million remaining World War II veterans whose entitlements expired on July 25, 1970). Restoration is justified to provide these veterans with equitable treatment in light of the removal of expiration dates for veterans whose entitlements have not yet expired.

GUARANTEED AND DIRECT VA LOANS FOR PURCHASE OF MOBILE HOMES AND LOTS AND SITE PREPARATION EXPENSES

A new section 1819 would be added to chapter 37 of title 38, United States Code, by sections 4(4) and 5 of the committee substitute in order to authorize the Administrator of Veterans' Affairs to guarantee or make loans for veterans to purchase mobile homes and lots to place them on as well as to pay for necessary site preparations. The addition of section 1819 would be another step by the Congress in recognizing that mobile home financing offers an effective means to meet the urgent housing needs of the Nation. About two years ago, the Congress, in the Housing and Urban Development Act of 1968 (PL 90–448), authorized Federal savings and loan associations to make mobile home loans. Last year, in the Housing and Urban Development Act of 1969 (PL 91–152), the Congress authorized the Federal Housing Administration to insure loans made on mobile homes. Thus, the new section 1819 would complement those earlier acts by the Congress.

Generally, housing for low to moderate income families is critically needed in the Nation today. Such need is especially acute in respect to young veterans of the Vietnam Era. By now there are 4.2 million such veterans in civil life, with the number projected to increase by 800,000 in the current fiscal year. In five years, the number of such veterans in civil life will be nearly 7.5 million. In late March 1970, the Committee on the Vietnam Veterans, created by the President on June 5, 1969, pointed to the urgency of finding some way to enable these veterans to acquire suitable homes on terms within their payment ability and recommended that authority be granted to VA to underwrite loans on mobile homes. The report stated:

"Cost of single family home and mortgage financing have increased in recent years to the point that low and moderate income veterans are priced out of the housing market for all practical purposes. Some way must be found to enable these veterans to purchase suitable housing on terms that are within their payment ability.

"The mobile home represents an enormous potential in meeting the housing needs of many veterans with low to moderate incomes. The increasingly higher construction cost of conventional homes is a principal factor in the sudden popularity of mobile homes. Manufacturers are able to produce these homes at relatively low price.

"Existing provisions of the VA home loan guaranty law were designed to promote real estate mortgage loans to purchase conventional type housing and do not contemplate the purchase of mobile home structures on a chattel mortgage loan basis which is the customary type of loan made to individuals purchasing mobile homes. The 30 year, 100% real estate first mortgage GI loan vehicle is not a suitable mobile home financing vehicle.

"To induce lenders to make loans available to veterans on liberal terms for the purchase of mobile homes, a special type of loan guaranty or insurance underwriting vehicle should be designed which will be attractive to lenders in terms of investment return and loss exposure. At the same time, it is essential that the Government's exposure be limited to the minimum required in order to insure an adequate supply of mobile home financing for veterans in the low and moderate income brackets."

Because of a persistent, and at times rapid, escalation of the selling prices of residential properties, especially in recent years, coupled with rates of interest on loans, the VA guaranteed home loan program now primarily serves veterans who have become well established in their working careers and have moved up the income ladder into the upper middle level or beyond. This is amply demonstrated by the $21,000 average purchase price on homes recently financed with VA guaranteed loans, entailing an average loan amount of approximately $20,500. The costs associated with the amortization of such loans, interest expense thereon, and other recurring items for taxes and insurance effectively limit the benefit to veterans who are better situated financially than most Vietnam veterans.

To redress this situation, the committee has fashioned new section 1819 so as to provide a workable plan of credit assistance for veterans whose immediate housing needs can be satisfied by the purchase of mobile homes, in respect to which associated costs average substantially less than those for conventional type housing.

The salient feature of such plan are—

The mobile home must be for permanent occupancy by the veteran as his home.

A veteran who purchases a mobile home with a VA loan under this plan will not lose his basic $12,500 guaranty entitlement for a conventional type home, which will be available to him when the mobile home loan has been paid in full, or when he sells to a purchaser acceptable to the Administrator and the purchaser assumes the mortgage obligation.

The maximum loan amount will be $10,000 for a mobile home, with an extra allowance up to $5,000 for the purchase of land on which to place the unit. The maximum loan may also be increased for the cost of reasonable and accessory site preparation.

The maximum maturity will be 12 years and 32 days, except that if the loan also will finance the purchase of real estate the maximum maturity may be 15 years and 32 days.

The Administrator will be authorized to establish an interest rate for mobile home loans at such level as will assure a reasonable supply of private credit for guaranteed loans.

The Administrator's liability under the guaranty will be limited to 30% of the loan amount, a guaranty considered consistent with the prevailing practice among private lenders as to the amount of down payment required on conventional mobile home loans.

Direct VA loans will be made in towns and rural areas determined to be mobile housing credit shortage areas.

No loans will be made after July 1, 1975.

Recognizing that mobile home financing within the VA system of credit assistance for veterans will constitute a substantial residential properties, the Committee has drawn on many of the safeguards heretofore built into the existing VA loan program and provided for their application to this new mobile homes program. For example—

The site where the mobile home will be located must be acceptable to the Administrator, including specific requirements for considering scenic and environmental factors.

The Administrator will be required to prescribe standards for planning, construction, and general acceptability of mobile homes and to inspect the manufacturing processes of mobile homes to be sold to veterans, and to make site inspections and conduct surveys of purchasers of mobile homes financed under this program.

The manufacturer will become the warrantor (for a year) to the veteran or subsequent purchaser of any new mobile home financed under this plan, with such warranty specifically providing that the mobile home meets the standards prescribed by the Administrator.

The Administrator will be authorized to suspend any manufacturer who declines to permit inspections or who produces mobile homes not in conformity with prescribed standards, and the Administrator will be authorized to suspend any person or entity whose rental or sales methods, procedures, requirements, or practices in connection with a mobile home park or subdivision are determined to be unfair or prejudicial to veterans.

There may be several parties to the transaction involving a mobile home purchase particularly where there is also a site involved. These parties may be the manufacturer of the mobile home unit, the distributor of the mobile home unit, the retailer of the mobile home unit, the rental park op-

erator, and the veteran purchaser. In addition, land may be acquired in the form of a developed site from another party or raw land may be obtained from one party with the necessary site improvements being arranged through another individual. In addition to these parties there will be the institutions and intermediaries providing or arranging the necessary financing.

The committee expects the VA to consider carefully the roles of the various parties involved in the transaction and to define clearly the nature and the proper extent of the responsibilities of each party to the veteran purchaser concerning the manufacture and construction specifications and minimum property requirements established by the VA for the protection of veteran purchasers.

The committee has provided for a July 1, 1975, program termination date in order to afford a definite time for a comprehensive review and evaluation before there is any long term commitment made by the Congress for this novel program. For the same reason, annual reports to Congress about program experience are required.

ELIMINATION OF POST-KOREAN LOAN FEE

The committee proposes (in section 2(e) of the committee substitute by repeal of subsection (d) of present section 1818) to eliminate the loan fee (set at ½ of one percent of the total loan amount) collected only from post-Korean conflict veterans. Such a fee was never and is not presently collected from World War II or Korean conflict veterans and is not considered necessary to the solvency of the loan guaranty revolving fund (under section 1824) into which it is paid. In fact, recent VA experience under that fund shows that total defaults on VA guaranteed loans have dropped by 25 percent since FY 1967, and the fund as of June 30, 1970, contained $458,981,458. In FY 1969 total receipts exceeded total payments from the fund by $1,226,503 and in FY 1970 by $16,509,662. Historically, the average net loss to the fund per year has been about $4 million per year, and, as noted above, the fund has shown a profit for the last two fiscal years. Thus, removing this discriminatory feature against Vietnam and other post-Korean veterans is a fiscally, as well as morally, sound policy.

MISCELLANEOUS

The basis for the three other substantive provisions of the committee substitute—adding to the regular VA home loan program loans for refinancing existing mortgage loans and for purchase of single-family condominiums (section 3(1) and (2) of the committee substitute) and the provision for direct VA home loans to paraplegic and quadriplegic service-connected veterans eligible for specially adapted housing assistance under chapter 21 (new subsection (i) added by section 4(6) of the committee substitute)—are adequately summarized in the Section-by-Section Analysis.

---

SECTION-BY-SECTION ANALYSIS

*Section 1.* Establishes the Act title as "The Veterans' Housing Act of 1970."

*Section 2. Subsections (a) and (b).* (1) Strike loan eligibility expiration dates for World War II and Korean conflict veterans in sections 1802(d) and 1803(a) of title 38, United States Code, relating to basic loan guaranty entitlement; and (2) Add (as a new paragraph (2) in subsection (a) of section 1803) a specific provision restoring expired entitlements of World War II and Korean conflict veterans and providing that such entitlements shall not expire until used.

*Subsection (c).* Adds an exception to section 1803(b) of title 38, United States Code, which establishes loan guaranty maximums for non-real estate loans, so that the guarantee maximum contained in the new mobile home program will apply (new section 1819 of title 38 to be added by section 5 of the committee substitute).

*Subsection (d).* Adds to present subsections (b) and (d) of section 1804, relating to builder and lender disqualifications, a requirement that such disqualifications shall be made only after notice and an opportunity for a hearing, except that suspensions can be made prior to hearing. This requirement accords with present VA regulations and conforms to a requirement in subsections (k) and (l) in the new section 1819 which section 5 of the committee substitute would add. (See analysis under those subsections, below.)

*Subsection (e).* (1) Strikes expiration of eligibility provisions for post-Korean veterans in section 1818(c) of title 38, relating to guaranteed and direct home loan entitlements of veterans serving after January 31, 1955 (also see analysis of clause (6) of section 4 of the committee substitute); (2) repeals the authority for collecting the ½-percent fee only from such post-Korean veterans (in section 1818(d) and part of 1818(e) of title 38); (3) preserves (in a new subsection (c) of present section 1818) the savings provision of section 1818(e) of title 38, which saves for World War II and Korean conflict veterans who are also post-Korean veterans the privilege of obtaining business loans and insured loans (not available to post-Korean veterans) which they would otherwise lose (4) adds (as a new subsection (d) of present section 1818) a specific provision that post-Korean veterans' entitlements shall not expire until used.

*Section 3.* Makes several amendments to section 1810 of title 38, relating to guaranteed loans for the purchase or construction of homes.

*Clause (1).* Adds a new subsection (a)(5) to permit a veteran to use his loan guaranty eligibility to refinance existing mortgage loans on dwellings or farm residences he occupies and provides that veterans using loan guarantees for such refinancing may pay points demanded by a lender which is the universal practice in refinancing. This provision will be of particular assistance to any veteran who has lost his entitlement (especially World War II veterans whose eligibility expired on July 25, 1970) and who before enactment of this bill acquired a conventional loan the terms of which permit refinancing. It will also permit a veteran to obtain a loan in excess of the existing mortgage balance, but not in excess of the reasonable value of the property as determined by the V.A.; *e.g.*, a veteran with the necessary entitlement would be able to refinance his existing mortgage loan to obtain funds for educational purposes.

*Clause (2).* Adds (in a new subsection (d)) authority for the VA to guarantee loans on condominium one-family residential units (already covered under the FHA program) once the HUD secretary has issued evidence of insurance on at least one such loan in a particular development. In recent years there have been some events bearing on the availability of housing units on the market which have tended to bring condominium apartments into greater supply: growing scarcity of land suitable for preparation as subdivisions at reasonable cost and in close proximity to central cities; rapid appreciation in the cost of building single family residences; investor emphasis on equity investment over fixed-dollar investments; changes in the preferences of prospective purchasers from single family units to apartments, probably reflecting reactions against high prices, commuting distances, and maintenance expenses.

*Section 4.* Makes several amendments to section 1811 of title 38, relating to direct VA loans to veterans in rural areas or small towns or cities where private capital is not generally available—so-called "housing credit shortage areas", to provide for direct loans for mobile homes in areas where private capital is not available.

*Clauses (1), (2) and (3).* Add to subsections (a), (b), (c) and (g) of section 1811 appropriate cross references (subsection (b) is partially rewritten) to the new section 1819 which would be added by section 5 of the committee substitute to establish the guaranteed loan program for mobile homes. The effect of these amendments and those in clauses (4) and (5), below, is to establish a direct loan program for mobile homes (and lots) in those areas where mobile home housing credit is not generally available; in effect, this would mean the Administrator's designating such an area as a "mobile housing credit shortage area."

*Clause (4).* Renders the maximum amounts for a direct loan for a regular house in subparagraph (d)(2) inapplicable to mobile home direct loans because the maximum permissible loan for a mobile home and lot for guaranty purposes is limited in the new section 1819(d)—$15,000 plus necessary site preparation expenses—to an amount which will be less than the $21,000 maximum ordinarily permitted for a veteran with full loan guaranty entitlement remaining for a regular house. The new section 1819 requires in subsection (a) that to be eligible for a mobile home loan guaranty a veteran must have maximum entitlement available, so the special formula (in subsection (d)(2) of present section 1811) for computing the maximum direct loan for a veteran with partial entitlement remaining for a regular home loan need not be made applicable to direct mobile home loans.

*Clause (5).* Establishes the mobile home direct VA loan maximum at the maximum permissible loan level in the new section 1819 (see analysis under clause (4), directly above).

*Clause (6).* Strikes subsections (h), (i), and (j) of section 1811 and inserts new subsections (h), (i), and (j). Present subsection (h) establishes a direct loan expiration date by reference to those for guaranteed loans which would be struck by section 2 of the committee substitute. In coordination with the Banking and Currency Committee which has jurisdiction over the VA direct loan program, the expiration date for the direct loan program is eliminated for World War II and Korean conflict veterans (see Banking and Currency Committee letter at the end of "Introduction"). The expiration date is eliminated for post-Korean veterans by section 2(d) of the committee substitute in striking out subsection (c) of section 1818 of title 38, in which paragraph (1)(C) contains the direct loan expiration date for post-Korean veterans.

Subsections (i)(3) and (j) of section 1811 are struck, at the request of the Veterans' Administration, since the VA terminated in 1959 its prior referral of direct loan applications to the Voluntary Home Mortgage Credit Committee (VHMCC) under paragraph (3) of subsection (i), and the existing requirement in section 1811(c)(1) that the veteran applicant show he is unable to obtain a loan from private lenders obviate the need for any such referrals. Subsection (a)(3) was added by PL 85-364 (April 1, 1958) as an amendment of section 512 of the Servicemen's Readjustment Act of 1944. Subsection (j) was added about four years after installation of the procedure involving prior VHMCC referrals of direct loan applications. The language of present subsecton (j) makes clear that its only purpose was to require timely processing of direct loan applications by VA, notwithstanding VHMCC referral of such applications.

The new subsection (h) retains the present paragraph (4) of present section (i). New subsection (i) was previously approved by the Senate on August 28, 1970, in S. 3775, reported from the Banking and Currency

Committee. It is included here, with that Committee's approval, to simplify the revisions made in section 1811 by the committee substitute (see Banking and Currency Committee letter at the end of "INTRODUCTION"). The new subsection (j) retains in pargraphs (1) and (2) the present paragraphs (1) and (2) of present subsection (i).

*Section 5.* Establishes a mobile home loan guaranty program in a new section 1819 to be added to title 38. The committee substitute provision combines features of S. 3656 and S. 3683. Generally, the program provides for a 30 percent VA guaranty on loans up to $10,000 for new or used (VA or FHA already guaranteed) mobile homes for a term of 12 years and 32 days (and $15,000 for a term of 15 years and 32 days for such loans when a lot is also purchased) plus an additional amount to cover necessary site preparation expenses to all eligible veterans with full loan entitlements, and establishes some very strong acceptability standards for construction, placement, lot condition, warranties and marketing practices, as well as responsibilities on the part of the VA to oversee the program very closely.

*Subsection (a) of new section 1819.* Provides for loan guaranty benefits for eligible veterans (World War II, Korean conflict and post-Korean) who have maximum loan guaranty entitlements available ($12,500), and permits the restoration of entitlement used for a mobile home guaranteed loan to be restored not only upon payment in full but when another purchaser acceptable to the Administrator assumes the mortgage liability. This latter restoration feature, which does not exist under the regular VA loan guaranty program, is included here because the basic purpose of the mobile home program is to provide transitional housing to a veteran unable to afford current financing terms for regular houses, or who is generally in low or lower income groups. Permitting the veteran to sell the mobile home, if he can, to a purchaser with credit satisfactory to the Administrator, who assumes mortgage liability provides some flexibility for the veteran to purchase a conventional house in several years rather than being locked in for 12 or 15 years unless he could pay off his mobile home in full. Since the VA's maximum guaranty liability for mobile homes will generally be $4500, its overall liability assumption for (or on behalf of) one veteran would be increased by a relatively small amount, and even then, the new primary debtor is subject to VA pre-approval.

*Subsection (b) of the new section 1819.* Provides for the guaranteed loan also to cover the mobile home lot, when it is being purchased rather than leased, and necessary site preparations (*e.g.*, installation of utility connections, sanitary facilities and paving and construction of a suitable pad) for a lot purchased or otherwise acquired or owned.

*Subsection (c) of the new section 1819.* (1) Provides for automatic VA guarantee of loans to be made by any Federal land bank, national bank, state bank, private bank, building and loan association, credit union, or mortgage and loan company, that is subject to examination and supervision by an agency of the United States or of any state, to be made by any state itself, or to be made by any mortgagee approved by the Secretary of HUD and designated by him as a certified agent and which is acceptable to the Administrator. This automatic guaranty means that such organizations act, in effect, as agents of the Administrator in carrying out the requirements of the new section 1819 and need not submit such loans for prior VA approval. Prior VA approval is required, however, for lenders not of the type specified above. This is the same scheme which currently obtains with respect to regular home loans (present section 1810), purchase of farm and farm equipment loans (present section 1812), purchase of business property loans (present section 1813), and loans to refinance delinquent indebtedness (present section 1814). (2) Provides for loans for used, as well as new, mobile homes when such used homes are the security for a prior VA loan guaranty or a loan guaranteed or insured by any other Federal agency. (3) Establishes a maximum loan guaranty of 30 percentum of the loan, including any amount for lot acquisition and site preparation, and a procedure for payment of such guaranty which accords with VA regulations governing other loan programs under chapter 37 of title 38.

*Subsection (d) of the new section 1819.* Establishes overall maximum loan amounts and bases for determining reasonable value of the property involved.

*Paragraph (1).* Provides for the Administrator to establish maximum loan amounts for individual loans: For a new mobile home, generally to be based on the manufacturer's invoice costs to the dealer and such other cost factors as the Administrator determines; for a used mobile home, and for any lot and necessary site preparation, to be based on the reasonable value of the property as determined by the Administrator. The authority to the Administrator to consider "other cost factors" in establishing loan amounts for new mobile homes is intended to permit the Administrator to (1) include such additional costs as dealer preparation, overhead and profit, delivery and placement, and state sales taxes, but (2) also permit the Administrator to require a modest downpayment on the part of the veteran. Such a downpayment—which would generally not exceed 10 percent—would be required by the VA for mobile homes in order to provide the veteran with some incentive to make the best bargain possible for purchase of the home and to discourage unreasonable inflation of dealer costs. The language "based on his determination of the reasonable value of the property" with respect to establishing the maximum loan amount for a used mobile home would also permit the Administrator to require such a downpayment for a used home.

*Paragraph (2).* Establishes the maximum permissible loan amount and term as $10,000 for 12 years and 32 days for purchase of a mobile home alone or $15,000 (no more than $5,000 of which is for lot acquisition) for 15 years and 32 days when purchase includes a lot, plus additional amounts as approved by the Administrator for necessary site preparation. The above maximum would not preclude the Administrator from consenting to necessary advances by the lender to the veteran for the protection of the holder's lien or to a reasonable extension of the term or reamortization of the loan. This would include, among other things, advances to permit necessary repair and improvements. The maximum would not permit the guaranteed financing of most double-wides (two attached mobile home units) which generally cost about $12,000 and up or houseboats which generally cost about $17,000. The committee suggests, however, that the VA consider the appropriateness of, first revising its regulations for the regular home loan program so as to cover appropriately constructed double-wides and, second, including permanent residence houseboats under the new mobile home program's provisions.

*Subsection (e) of the new section 1819.* Establishes seven enumerated conditions which must be satisfied before a mobile home loan can be guaranteed. These conditions, which are based in part, on those conditions established for regular home loans in present section 1810(b), are as follows:

(1) The loan provides for repayment in approximately equal monthly installments;

(2) The terms of repayment bear a proper relationship to the veteran's present and anticipated income and expenses, and the veteran is a satisfactory credit risk, taking into account the purpose of the program to make available lower cost housing to low and lower income veterans, especially those recently returned from service who may not have previously established credit ratings. The latter phrase, which is not contained in present section 1810(b)(3), is designed to make clear Congress purpose to make the mobile home program a source of decent lower cost housing for recently returned veterans without much credit experience, so that such veterans will be afforded every benefit of the doubt in determining whether they are satisfactory credit risks;

(3) The loan is secured by a first lien on the home and any lot acquired with the loan;

(4) The loan amount does not exceed the prescribed maximums;

(5) The veteran certifies that he will personally occupy the property as his home;

(6) The home site meets specifications established by the Administrator; and

(7) The interest rate does not exceed the permissible rate established by the Administrator.

*Subsection (f) of the new section 1819,* Permits the Administrator to establish an interest rate for mobile home loans as he determines necessary to assure a reasonable supply of such loan financing for veterans. The committee recognizes that in order to attract lender participation in a mobile home loan program, an interest rate—probably substantially in excess of the current maximum 8½ per cent rate applicable to the regular home loan program—must be established which is competitive with the rate prevailing in the conventional mobile home loan market.

*Subsection (g) of the new section 1819.* Permits restoration of mobile home guaranty entitlement by the Administrator if the veteran has repaid the loan in full or sold the property to a transferee acceptable to the Administrator and the transferee has assumed mortgage liability. However, such restoration of mobile home loan entitlement would be permitted only one time. The veteran is given the opportunity of transferring his liability once in order to permit him maximum flexibility to purchase a more expensive mobile home. Although restoration of entitlement under the regular home loan program is not permitted on the basis of such transfers of liability, a one-time restoration is provided for the mobile home veteran purchaser because the government's total mobile homes guaranty liability could, for all practical purposes, not exceed the maximum of $12,500 if applied to two mobile home purchases.

*Subsection (h) of the new section 1819.* Mandates the Administrator to establish regulations to implement the mobile home loan program and to specify in such regulations which of the other provisions of chapter 37 he determines to be applicable for mobile home loans. The subsection also makes clear that the Administrator possesses such powers and responsibilities with respect to the mobile home program as he has with respect to all other loans made or guaranteed under chapter 37. At the committee's request, the VA advised tentatively that if section 5 of the committee substitute is enacted as reported, the VA would likely adopt by regulations the following portions of chapter 37 of title 38, United States Code, as the committee substitute proposes to amend it:

*Portions to be adopted*

1. Section 1801.
2. Section 1802 (a), (c) through (f).
3. Section 1803(b).
4. Section 1804(d).
5. Section 1806(a).
6. Section 1811 (as applicable).
7. Section 1816(a) (except for first sentence).
8. Section 1817 (in substance).
9. Section 1818 (a) and (d).

10. Section 1820 (as applicable).
11. Section 1821.
12. Section 1823.
13. Section 1824.
14. Section 1825.
15. Section 1826.
16. Section 1827.

*Portions not to be adopted*

1. Section 1802(b).
2. Section 1803 (a), (c), and (d).
3. Section 1804 (a), (b), (c), and (e).
4. Section 1805.
5. Section 1806(b).
6. Section 1810.
7. Section 1812.
8. Section 1813.
9. Section 1814.
10. Section 1815.
11. Section 1816(a) (first sentence only) and (b).
12. Section 1818 (b) and (c).
13. Section 1822.

*Subsection (i) of the new section 1819.* Establishes the responsibility of the Administrator to prescribe minimum standards for planning, construction and general acceptability for mobile homes and lots, and specifies that such standards should encourage the development of attractive residential areas free from adverse scenic and environmental conditions and which will not substantially detract from scenic or environmental conditions in the general community. VA scenic and environmental condition regulations are required to be coordinated with those for the FHA mobile home program (and be adopted in consultation with other appropriate governmental representatives) and to provide for consideration of the variations of geographic areas insofar as environmental needs are concerned. The Committee recognizes that in rural areas veterans may wish to purchase mobile homes to be placed on lots owned or to be acquired by them and which are not part of a mobile park or subdivision. In such instances the committee does not expect the VA to require the same standards relating to scenic and environmental conditions as would be applicable to mobile home parks or developments. In cases in which such lots are within a political subdivision, local zoning ordinances may substantially accomplish the committee's objective. In cases where lots are not subject to such zoning criteria applicable to scattered lots when conventional type houses are to be constructed on such lots.

Subsection (h) also charges the Administrator with the responsibility of conducting periodic inspections of mobile home manufacturing processes and the circulation of questionnaires to veteran owners and the conduct of random on-site inspections of mobile homes purchased under this program.

*Subsection (j) of the new section 1819.* Requires the manufacturer of a new mobile home approved for purchase under this program to become a warrantor of such home and to furnish a written warranty to the veteran purchaser. The warranty must include a statement that the home meets the Administrator's minimum standards and a provision that the manufacturer's liability to the purchaser (or subsequent owner) is limited to instances of substantial non-conformity to such standards becoming evident within one year of purchase after notice by the purchaser (or subsequent owner) not later than ten days after the end of the warranty period. The subsection also continues in full force and effect any other warranties, rights and privileges established under any other law or instrument, and specifically requires the warranty document to so provide.

*Subsection (k) of the new section 1819.* Authorizes the Administrator subject to notice and an opportunity for a hearing to deny guaranteed or direct financing for mobile homes constructed by any manufacturer who declines to permit the inspections provided for in subsection (j); which the Administrator determines do not conform to his minimum standards; or where the manufacturer does not discharge his warranty obligations.

*Subsection (l) of the new section 1819.* Authorizes the Administrator, subject to notice and an opportunity for a hearing, to refuse to approve loans when marketing practices are determined to be unfair or prejudicial to veterans or with respect to dealers who have sold homes with substantial deficiencies or who have failed to discharge contractual liabilities to veterans or who have generally conducted themselves in an unfair or prejudicial way with respect to veteran purchasers. This section is generally modeled upon present section 1804(b). Further, with respect to the dealers' operations, the committee report urges the VA to disclose in its informational literature about the program, the substantial financial advantages of lot purchase rather than lot rental and to encourage dealers to point this out as well.

The notice and hearing requirements in both subsections (k) and (l) in the new section 1819, relating, respectively, to authority to deny financing with respect to certain manufacturers' homes, and to authority to disapprove certain sites and dealers because of unfair and prejudicial selling practices, accord with the Administrative Procedure Act, are probably required by the Constitution, and are consistent with VA regulations already in effect for the regular loan program—38 C.F.R. §§ 36.4331 (Disqualification of Lenders) and 36.4361 (Right of the Administrator to Refuse to Appraise Residential Properties). These amendments do not require a hearing prior to a suspension. A conforming change has been made in section 2(d) of the committee substitute to add the same language to subsections (b) and (d) of present section 1804, on which those regulations are based and which contain counterpart authorities with respect to builders and lenders in the regular program.

*Subsection (m) of the new section 1819.* Requires an annual report to the Congress on operations of the mobile home program and specifically regarding results of inspections and questionnaires and compliance with the required warranty.

*Subsection (n) of the new section 1819.* Specifically incorporates by reference the provisions of present section 1804(d) relating to the withholding of guaranteed loans to certain misfeasing lenders or holders under either this chapter or as determined by the Secretary of HUD under the National Housing Act; and present section 1821, relating to the incontestability of evidence of guarantees issued by the Administrator.

*Subsection (o) of the new section 1819.* Establishes a closing date of July 1, 1975, for this new program. It is felt that this should permit sufficient experience to make an evaluation after a little more than four years of operation.

*Section 6.* Provides that the mobile home loan program shall become effective sixty days after enactment. Other provisions of the committee substitute would be effective upon enactment.

TITLE AMENDMENT

The title is amended to account for the elimination of the closing costs and interest subsidy provisions.

COST ESTIMATE

The administration estimate for the first full year cost of the provisions in the committee substitute is $22.05 million ($3.15 million under item 2, below, has already been approved by the Senate in passing S. 3775 on August 28), broken down as follows:

*1. Removal of expiration dates and restoration of entitlements.*—It is estimated that in the first year there would be 35,000 loans closed which otherwise would not be made under the VA loan program. In 5 years, the cumulative additional loans would be 179,000. It is further estimated that the additional cost for the first year, including both administrative expenses and operational losses, would be $1.6 million, and for 5 years the additional cost would be $24 million, covering both administrative expenses and operational losses.

*2. Direct loans to veterans eligible for assistance under chapter 21.*—It is estimated that approximately 150 eligible veterans would obtain direct loans each year, at an annual administrative cost of approximately $17,500. Outlays for making such loans would be approximately $3,150,000, which would be funded from the direct loan revolving fund and subsequently recovered through loan payments.

*3. Elimination of funding fee.*—It is estimated that in the first year revenues incoming to the loan guarantee revolving fund would be reduced by $17.3 million. In 5 years, the loss of revenue is estimated at $109 million.

*4. Mobile homes.*—The cost would be minimal.

## S. 3657—VETERANS' ADVANCE EDUCATIONAL ASSISTANCE ALLOWANCE AND WORK STUDY PROGRAM ACT OF 1970

Mr. CRANSTON. Mr. President, I introduced S. 3657 on March 31, 1970, with the strong bipartisan support of 10 members of the Labor and Public Welfare Committee. Thus, I am particularly delighted to have been successful in seeing this bill through subcommittee and full committee to the point of consideration by the Senate today.

In the course of committee consideration, a committee amendment in the nature of a substitute, has been adopted in lieu of the original text of the bill as introduced. The committee substitute amends chapters 31, 34, 35, and 36 of title 38 of the United States Code to achieve the following seven purposes:

First. To provide for advance payment of the GI bill educational assistance allowance at the start of a school term and prepayment on the first of the month thereafter.

Second. To establish a student-veterans work-study program whereby needy GI bill trainees would receive a $250 advance work-study allowance for performing various services in Veterans' Administration programs.

Third. To provide that servicemen may begin to use GI bill benefits for postsecondary education and training after 180 days of active duty—they may already do so for precollege work—and to make clear that the GI bill covers courses required by the Small Business Administration in connection with minority enterprise loans.

Fourth. To correct certain provisions enacted last March in Public Law 91-219, relating to measurement of college courses for GI bill purposes, in light of information developed only after that law was enacted.

Fifth. To combine basic provisions relating to payment of allowances and general administration of the GI bill program, and contained in chapter 34, "Veterans' Educational Assistance," and chapter 35, "War Orphans' and Widows'

Educational Assistance." as applicable to both chapters 34 and 35.

Sixth. To clarify and expand action taken by the Congress on April 13, 1970, in enacting Public Law 91–230—the Elementary and Secondary Education Act Amendments of 1970—to provide for NDEA student loan cancellation based on military service; by permitting GI bill entitlement to be applied to repay prior Federal direct or guaranteed education loans, and repealing the NDEA provision.

Seventh. To accelerate the date on which GI bill allowances are increased for acquisition of dependents (originally proposed in S. 3907).

The two most significant new programs in the committee substitute are the new GI bill advance payment and prepayment systems and the new work-study program for veterans pursuing postsecondary education under the GI bill. I believe that these two new GI bill programs will offer great assistance to all veterans studying under the GI bill and also complement the new programs which were added to the GI bill in Public Law 91–219 on March 26, 1970. These two programs together should insure that GI bill trainees receive their initial educational assistance allowances at the start of the school year when their expenses are the greatest, rather than 2 or 3 months later, and that such trainees will have the opportunity to supplement their regular allowance entitlements by the $250 work-study allowance.

Mr. President, I ask unanimous consent that appropriate passages of the committee report, No. 91–1231, be set forth in the RECORD at this point in order to explain in detail the purposes of S. 3657 as reported, and I urge all of my colleagues to support the bill as reported.

There being no objection, the excerpt from the report was ordered to be printed in the RECORD, as follows:

ADVANCE EDUCATION ASSISTANCE ALLOWANCE

The present system of assisting veterans who are attending school operates as follows:

In order to establish eligibility for GI bill benefits under title 38, United States Code, a veteran must first submit an application together with proof of separation from the armed services—form DD–214—and, when dependencies are claimed, other supporting documents, to the Veterans' Administration. If these papers are in order, the VA mails the veteran a certificate of eligibility.

The veteran presents the certificate of eligibility to his college or university registrar, who verifies the veteran's actual enrollment and provides details regarding it, so certifies on the certificate of eligibility, and mails it to the VA. Upon receipt of that certification, the VA is then authorized to issue an educational assistance allowance payment to the eligible veteran, and an account for him is then established at the VA's computerized payment center in Hines, Illinois. From this point, the check should reach him within 10 to 15 days.

There are two points at which the system may in many cases break down, causing financial and emotional hardship for the veteran and his family. One is during the processing of enrollment certificates at colleges and universities, which occurs during the first month of school when the school administration has an unusually heavy registration workload anyway.

The second difficulty may occur when the Veterans' Administration receives these hundreds of thousands of enrollment certificates in the space of a few weeks. Using maximum authorized overtime—because of inadequate augmentations of staff over the last three years—the VA must process these certificates and authorize the release of the first month's educational assistance allowance payment. Prior to this past fall, it was not all uncommon for the first check to reach the collegiate veteran in mid- or late November, or even December.

In testimony in the summer of 1969 before the Veterans' Affairs Subcommittee, the VA announced the initiation of an accelerated payment procedure increasing from five to nine per month the number of check processing cycles at the Hines Data Processing Center. It was hoped that this procedure would approximately halve the timelag in getting checks out to veterans.

Unfortunately, the new system, helpful as it has been in expediting the issuance of checks by the computer, cannot rectify delays which arise before an authorization for payment can be relayed to the Hines Center. And under that system the earliest that the first check reaches the veteran in mid- or late October; and it may well not arrive until November. Even then, the first check generally covers only a partial month's payment, since the first college month is usually abbreviated. For veterans beginning a new school year, this is too little, too late.

The committee substitute seeks to overcome the delay in receipt of GI bill payments by providing (in the new section 1780(b) added by section 201 of the committee substitute) for payment of the first and second months' allowances in one lump sum in advance and prepayment on the first of the month for months thereafter (new section 1780(c)). This advance system would apply to all post-secondary courses other than those on less-than-half-time basis or by correspondence. Thus far, this is essentially the system proposed in S. 3683.

However, as proposed in S. 3657, advance payment would be made to a veteran, without any action by his educational institution, based upon receipt of evidence of eligibility, as defined in section 1652(a)(1) of title 38, United States Code (a discharge paper—form DD–214—showing that he served for at least 180 days of active duty and was discharged under conditions other than dishonorable or that he was discharged for a service-connected disability), and certification by the veteran of the basic prerequisites to eligibility under the GI bill. He would certify that he intends to enroll and has been accepted for enrollment, or has enrolled, in a specified educational institution to pursue a specified approved course of education during that school year, and the number of semester hours or equivalent he intends to pursue. Unless the local office files contain conclusive evidence contradicting the facts so certified, the VA would not be authorized to examine into the veteran's actual GI bill eligibility. Notwithstanding the advance payment made on the eligible veteran's certification, the Veterans' Administration would, as it now does, develop each case to assure entitlement and the marital and dependency status of each payee. Upon receipt of the enrollment papers from the educational institution, any necessary adjustments would be made in the educational allowance payment.

Thus, an eligible veteran would be given the advance on the basis of his good faith in truthfully certifying the above facts and intentions. There would be no time-consuming processing by the educational institutions, which is now responsible for much of the delay in processing regular GI bill payments.

The committee recognizes that this good faith certification procedure may be subject to some abuse, and that some payments may thus be made to ineligible recipients. But it is satisfied that any abuses would be small, and notes that the VA has a 95-percent record of collecting regular GI bill overpayments.

This program of advance payments at the beginning of a school year should provide a vital source of funds, at a time, when none are now available under the GI bill and when the veteran-student's needs are probably the greatest, to meet the many expenses involved in beginning a school year, as well as such living expenses and initial charges as deposits and initial payments for rent, heat or telephone. This system should thus help prevent a veteran from being placed in a precarious financial situation vis-a-vis his schooling or his personal life as a result of a delay, justified or not, in receipt of the first regular educational assistance allowance check.

And the prepayment system in new subsection 1780(c) should continue the veteran's solvency. Under the new system a veteran enrolling in college on September 15 could expect to receive by November 1 two and one-half months' allowance (one and one-half months' payment on September 1—if he applied about August 15—and one month's payment on November 1).

Although neither S. 3657 or S. 3683 originally contemplated application of the advance and prepayment of allowance procedures to war orphans, wives, and widows training under chapter 35, of title 38, United States Code, the committee substitute would make the same payment system uniformly applicable to both chapters 34 and 35 of that title.

These provisions have been closely coordinated with the Veterans' Administration which advises that they can be programmed into the computer within about 60 days of enactment. This program was generally endorsed (with a somewhat different mechanism) by the President's Committee on the Vietnam Veteran in its report submitted in late March. The report stated:

"The GI Bill provides monthly allowances for veterans enrolled in and attending approved programs of education. These payments do not begin, however, until after the veteran has enrolled, and completed each month of training. The effect of this after-the-fact method of payment can be to discourage program participation by the veteran who cannot afford the initial outlay required by most schools for prepayment of fees, tuition, books, and the necessary money for subsistence for himself and his family until the first payment is received. The intent of the program is thus jeopardized. Even for the financially more fortunate veteran, the prepayment of tuition and other costs constitutes a burden since the educational allowance is partial assistance rather than a full subsidy.

"The proposal would authorize an advance payment to help the veteran enroll in school. This would be done on an individual application basis. The amount advanced can be gradually recouped over the whole period of enrollment."

VETERANS' WORK-STUDY PROGRAM

The proposed work-study program (new section 1687 added by section 203 of the committee substitute) would enable full-time GI bill post-secondary trainees with a financial need to perform 100 hours of services needed by the VA (on campuses or at VA regional offices or medical facilities) pursuant to agreement with the VA under which the veteran then becomes entitled to receive, in advance, a work-study educational assistance allowance of $250. The committee believes that this program will be of substantial benefit to individual veterans and their families, while at the same time contributing to the improvement of the entire GI bill program through increased efficiency and speed in certificate and claims

processing and through outreach work performed by these student veterans. Work-study trainees could also perform various non-professional, badly-needed tasks in VA hospitals, especially assisting the most severely disabled patients and cleanup and general maintenance work. There seems little doubt that such services could be very effectively used in many VA medical facilities. Students would be limited to performing 100 hours of services over a semester or other enrollment period.

This program should be particularly helpful for the almost 50 percent of GI bill post-Korean trainees with families and for the 27 percent who enroll in nonpublic schools. The rate increase recently enacted in Public Law 91–219 would provide $1,575 over a full nine-month period. Although this is sufficient to cover average tuition, room and board charges at a public institution, it is far less adequate in meeting the average costs at nonpublic institutions.

One key aspect of the work-study program would be veterans performing outreach services under subchapter IV or chapter 3 of title 38 also enacted in P.L. 91–219. Using GS–12's or 13's to "pound the pavement" in search of educationally disadvantaged veterans is highly questionable on a cost-effectiveness basis. But this provision would make it possible and very economical for the VA to improve substantially its existing program of contact and outreach.

The present outreach program has not done the necessary job to reach the large numbers of high school dropouts and other educationally disadvantaged veterans who are separated from service each year. Whereas 20 percent of those separated during fiscal year 1970 were high school dropouts, only about 8 percent of that target population have been taking advantage of their education and training entitlements. In many cases, this serious lack of participation by those who desperately need to take advantage of their GI bill benefits can be remedied through more effective dissemination of information and more personalized and intensive counseling of potential trainees about the great advantages of the benefits available to them.

As was stressed in section 241(c) of the outreach services program originally passed by the Senate on October 23 (H.R. 11959), the most effective outreach worker is one with whom the potential trainee can identify most immediately and fully. Veterans who are themselves pursuing an education should fit this prescription perfectly.

In carrying out this new work-study program, the VA would be expected to establish guidelines for determining financial need and need for the services and for selecting and using the services of veterans. Appropriate guidance for determining financial need should be sought in the Office of Education's regulations for its work-study program under the Higher Education Act of 1965, as amended.

Veterans would perform such services under agreements with the Veterans' Administration. They would not be considered VA employees for purposes of Federal employment laws administered by the Civil Service Commission—such as those governing application and selection for Federal employment, retirement and other length-of-service Federal employment benefits, and Federal employment fringe benefits such as group health and life insurance programs. Also, work-study allowances, as all other GI bill allowances, would be exempt from taxation as a "payment of a benefit under any law administered by the Veterans' Administration," as provided in section 3101(a), of title 38, United States Code.

It should also be noted that several witnesses at the hearings referred to the desirability of permitting the VA to contract with colleges and universities (under its general contract authority in section 213 of title 38) to supervise veteran work-study trainees in carrying out outreach activities in a particular locale. The committee strongly endorses this idea, which would be particularly useful if applied in areas where there is no Veterans Administration Regional Office or Veterans Assistance Center.

This program differs somewhat in detail from that proposed in S. 3657 but retains the same basic concept which was endorsed by the VA. At the hearing, the Administrator of Veterans' Affairs in support in principle of the desirability of a veterans' work-study program, agreed to staff discussions to iron out program details. Those discussions produced the provisions in the committee substitute which the VA has advised is administrable for a relatively small administrative cost ($250,000). It is estimated that the services of 56,000 student-veterans might be effectively utilized in the program in the first full year of its operation.

### POST-SECONDARY IN-SERVICE EDUCATION AND SBA-TRAINING UNDER GI BILL

These two new provisions (in section 301 of the committee substitute) were contained in S. 3683 and were recommended by the President's Committee on the Vietnam Veteran. They are described in the Section-by-Section Analysis which follows.

### REVISION OF MEASUREMENT OF COURSES PROVISIONS ADDED BY P.L. 91–219

The basis for these provisions (in section 303 of the committee substitute) is described in the Section-by-Section Analysis and a July 17, 1970, letter from the Administrator of Veterans' Affairs to Senator Cranston, the Chairman of the Veterans' Affairs Subcommittee, which is set forth in the Appendix to this report.

### EXPEDITING INCREASE OF GI BILL ALLOWANCE BASED ON ACQUISITION OF DEPENDENTS

This provision (in section 305 of the committee substitute) incorporates the provisions of S. 3907. The purpose of the amendment is more fully to effectuate Congressional intent under chapters 31 and 34 with respect to the increase of an eligible veteran's GI bill allowance—either vocational rehabilitation subsistence allowance under chapter 31 or educational assistance allowance under chapter 34—by virtue of changes in dependency status. Presently, under section 3013 of title 38, United States Code, effective dates of such increases are to correspond, to the extent feasible, to those relating to awards of disability compensation under chapter 11 of that title. And section 3010(a) of title 38 provides that such claims for increased dependency compensation shall be payable no earlier than the date of application therefor. By regulation, the Veterans' Administration has required—by analogy to section 3010(b)—that proof of the dependency status be received within one year of acquisition of the dependent.

Application of this disability compensation rule deprives a veteran of receiving the increase in his GI bill allowance, which Congress intended to help him meet the additional costs of maintaining a household with a wife or child, until such time as his application for such an increase is received. If, for example, a veteran is unaware of that requirement and delays a few months in filing an application for increased allowance, he will lose the amount Congress intended him to have to meet those additional dependency expenses. Since he is burdened with those expenses from the time he actually acquires the dependents—the date of marriage, birth, or adoption generally—not from the date he applies to the VA, it seems far more reasonable in effectuating the purpose of the dependency augmentation of GI bill allowance for such increases to be payable from the date the dependency status and expenses therefor actually arise, as long as he files timely notice of such status. Timely notice of such status under the provision in the committee substitute retains the VA's regulatory determination that applications must be received within one year from the acquisition of the dependency status.

Further evidence of the illogic of the present effective date provision is a ruling of the General Counsel's office of the Veterans' Administration that if a veteran, even casually, mentions in writing to the VA before he acquires a dependent, that he plans to do so in the future, his allowance will be increased for the change in dependency status from the time it actually occurs. Although this ruling is laudable in giving the veteran every benefit of the doubt, there would seem to be no reason for distinguishing between such an advance notice case and the case in which notification is given and proof submitted two months after the dependent is acquired. In neither case can the VA take any action to increase the allowance until it receives the actual proof of dependency—the copy of birth certificate, adoption decree, or marriage certificate.

The new effective date would also more nearly accord with a number of other effective date provisions for disability compensation which yield retroactive results. For example, the effective date of an award of disability compenstaion filed to begin from the date of discharge would be retroactive to that date as long as received within one year of discharge. The same retroactive treatment is accorded a person disabled by VA medical treatment or while pursuing vocational rehabilitation under chapter 31; it is the date of the disablement or injury, not of the application, that governs in those instances. The same is generally true with respect to death compensation and dependency and indemnity compensation which are effective on the first of the month in which death occurs if application therefor is received within one year of death.

The Veterans' Administration supports this provision, although it favors extending the new effective date to increases in payments of disability compensation and pensions based on acquisition of dependents, under chapters 11 and 15 of title 38, United States Code. These programs are under the jurisdiction of the Senate Finance Committee and the VA's position has been called to that committee's attention.

### REPAYMENT OF FEDERAL EDUCATION LOANS USING GI BILL ENTITLEMENT

Under this new provision (in a new section 1688 which would be added to title 38 by section 203 of the committee substitute), a veteran would be given the option of using GI bill entitlement (earned by service after July 1, 1970) to repay, in whole or in part, an education loan—taken (after April 13, 1970) in connection with education prior to his military service—which was made or guaranteed by the Federal Government. This provision arises out the the NDEA loan cancellation provision based on military service enacted in the ESEA expansion act on April 13, 1970 (P.L. 91–230). The new provision is substantially broader in scope than the loan cancellation provision it would replace in the NDEA (see section 306 of the committee substitute). There would be no GI bill cost under this provision until at least FY 1973, and then that cost would be partially offset by NDSL loan funds not being depleted and Federal interest subsidies not paid. It is very difficult to estimate the precise cost of this provision because of the uncertainty about whether a veteran would otherwise use his full GI bill entitlement on post-service education rather than to repay a pre-service loan. However, potential repayments for the major Federal education loan programs are provided under "COST ESTIMATE," below.

To understand the genesis of this new program more fully, especially the effective

dates, it is necessary to explain in more detail the amendment in section 501 of P.L. 91–230 to provide for loan cancellation at a 12½ percent rate per year for up to four years of consecutive active military service after June 30, 1970 (that is, up to 50 percent of the total loan amount) for NDEA loans made after the date of enactment of that act, which was April 13, 1970. After this provision was enacted, considerable disenchantment with it was brought to the subcommittee's attention, principally by education groups. The two basic objections were: (1) that, in time, the cancellation provisions promised a substantial depletion of the NDSL students loan fund, and thus a reduction in NDEA loans, without a commensurate fulfillment of any of the purposes of the original loan cancellation provision— developing teachers for our country, especially for poverty areas; and (2) it unfairly discriminated against veterans who had not taken education loans or pursued education prior to service since a veteran who did take an NDEA loan could use *both* NDEA loan cancellation and GI bill entitlement earned by the same period of military service. The argument was forcefully presented: if this is really a veterans' benefit, it should be part of the GI bill.

The committee believes that no adequate basis exists for permitting acceleration of allowance to repay only loans made under the NDEA program; thus, the provision covers all Federal direct or guaranteed loans, as to which approval criteria regarding the institutions and loan terms involved have already been applied by the government. The new GI bill program effective dates are geared to those governing the NDEA cancellation provision which would be repealed retroactively by section 306 of the committee substitute so that it never really became effective (see discussion under *"Section 306."* below).

Here is how the new program would work as compared with the present NDEA loan cancellation provision (added by P.L. 91–230). Given the average NDEA total loan of about $1400, a veteran with qualifying service could, under the present provision, cancel $700 worth of such a loan after *four* years of military service. Under the proposed new section 1688 in title 38, United States Code, he could repay the full $1400, using up, at a maximum, only eight of his 36 months' GI bill entitlement ($8 \times \$175 = \$1400$), or less than one school year's entitlement. (For Higher Education Act loans, the average is $2100, so the same general analysis would apply for such loans.)

The maximum NDEA loan that any one student can receive is $10,000 (for graduate students), so that under the present loan cancellation provision, he would be able to cancel only a maximum of $5000 (for four years' service) whereas, at a minimum (if he has no dependents) GI bill accelerated entitlement could be used to pay off $6300 of the loan amount; and if he had, for example four dependents ($256 per month), he could pay off almost the full loan—$9216 ($256 \times 36$).

It thus becomes clear that virtually any veteran who took an NDEA loan after April 13, 1970, and served after July 1, 1970, would be substantially more benefited by the proposed new repayment provision than the existing loan cancellation provision; to say nothing of all those veterans with Higher Education Act loans and all other Federal direct or guaranteed education loans, which are not now eligible for similar cancellation based on military service. The only instance where a veteran with qualifying service and a qualifying NDEA loan might be somewhat worse off under the new program would be a person who had received a very high NDEA loan ($10,000), then served four consecutive years of active duty in the military and then wanted to undertake substantially more schooling (four years) for which he would like to use his full GI bill entitlement. But such a situation demonstrates very clearly the very inequity, which the new provision is designed to correct, of the NDEA loan cancellation provision based on military service: for these seems virtually no justification for the government's paying one veteran for four years of education ($6300) and and another veteran with the same service for eight year ($11,300; $6300 plus cancellation of half of a $10,000 NDEA loan).

---

SECTION-BY-SECTION ANALYSIS

*Section 1.* Establishes the Act title as the "Veterans' Advance Educational Assistance Allowance and Work-Study Program Act of 1970."

TITLE I

*Section 101.* Adds to the Vocational Rehabilitation program (section 1502 in chapter 31 of title 38), which is a special education and training program for veterans with 30 percent or more service-connected disability, a cross reference to the work-study program (which would be added in a new section 1687 in chapter 34 by section 304 of the committee substitute) for which "voc rehab" trainees would also be eligible.

*Section 102.* Increases the "voc rehab" loan to trainees from $100, established in 1943, to $200. Most trainees take advantage of this loan and increasing it is appropriate in light of the advance payment system being developed for regular GI bill trainees and the doubling of the cost of living since its enactment.

TITLE II

*Section 201.* Adds to chapter 36, "Administration of Educational Benefits," a new section 1780 dealing with payment of educational assistance allowance which applies to both chapters 34 and 35 of title 38. (References to "eligible person" in this Analysis mean an "eligible veteran" under chapter 34 and an "eligible person" under chapter 35.)

*Subsection (a) of the new section 1780.* Incorporates present sections 1681(b)(1) and (2) and 1731(b)(1) and (2), which new section 1780 is designed to replace in part, and provides the basic enrollment period for which educational assistance allowances may be paid for all programs other than correspondence and flight training.

*Subsection (b) of the new section 1780.* Blends together features of S. 3657 (section 2) and S. 3683 (section 3) to establish a new GI bill educational assistance allowance payment system under which the initial payment for an enrollment period would be made in advance. Such advances would be made generally no later than 15 days after application (but no earlier than 30 days before the term is to begin) and would be based on a good faith certificate and a discharge paper provided by the eligible person. The advance amount would be for the first full month's allowance entitlement plus the applicable fraction thereof for the first month of the enrollment period. Although the original advance payment provisions in S. 3657 and S. 3683 were not applicable to chapter 35, it has been agreed informally with the VA that the advance system should also apply to allowance payments to war orphans, wives and widows. The advance payment provisions in subsection (b) of the new section 1780 are described below:

*Paragraph (1).* States the purposes of the advance payment and the Congressional finding of the need to provide an eligible person with funds at the outset of a school term for the many expenses that conglomerate at that time.

*Paragraph (2).* Provides the timing and amount of the advance payment, as described under *"Subsection (b)"*, above. Advance payments are excluded for persons pursuing study on less than a half-time basis. (Such "less-than-half-time" veterans, by virtue of an amendment, contained in P.L. 91–219, to present section 1682(b)(2) are now eligible for a lump-sum payment in the month following the month in which the VA receives certification of enrollment. This new provision was put into effect in September, 1970. It would be extended by subsection (e) of the new section 1780, to "less-than-half-time" war orphans, wives and widows training under chapter 35.)

*Paragraph (3).* Sets forth the contents of the application for advance payments as follows:

(A) evidence of basic entitlement for the eligible person. In the case of a veteran, this is generally the DD–214 discharge certificate. For a widow or war orphan, it would be evidence of the service-connected death of the veteran. For a wife or a child, it would be evidence of the veteran's permanent and total service-connected disablement.

(B) a certificate (i) stating that the person is enrolled in (or has applied for, been accepted by and intends to enroll in) a specified school and is pursuing (or plans to pursue) a specified approved course during the school year at such school and (ii) specifying the expected enrollment date and number of semester hours (or the equivalent) to be taken.

(C) for veterans, information as to the number of dependents (as defined in present section 1652(d) of title 38) claimed. Although the VA could request submission of evidence (birth or adoption certificates) of dependency in order to have it on file and make a final dependency determination, it could not *require* submission of such evidence at the time of application for the advance. (Also see discussion under *"Subsection (c)"*, below.)

*Paragraph (4).* Provides that the information and certificate submitted by the person shall establish his eligibility for the advance unless evidence in the processing office files (including that on the computer) establishes that he is *not* eligible. In determining whether the veteran is entitled to a full-time or part-time allowance advance payment, the VA will determine whether the school in question has been certified for full- or part-time under the new measurement provision in section 1684(a) of title 38 (see discussion of the amendment to that provision discussed under *"Section 303."*, below.)

*Subsection (c) of the new section 1780.* Provides a system of prepayment of allowance after the initial advance payment, that is, on the first of the month for that month. This would mean that there might be a gap of two months from the initial payment to the second payment (e.g., if the advance payment were received on September 2, covering September and October, November's allowance would not be received until around November 1). The Administrator is also authorized to withhold the final payment in an enrollment period until he has received satisfactory proof of entitlement, enrollment, satisfactory pursuit of program, etc. Also, the last sentence of the subsection provides that a veteran who has claimed dependents for advance payment purposes shall receive an allowance, based on the number of dependents claimed, for up to sixty days or the end of the enrollment period, whichever is earlier, while he submits proof and it is adjudicated.

*Subsection (d) of the new section 1780.* Provides a system for recovery of erroneous payments of educational assistance allowances which are due to an erroneous advance allowance certificate filed with the application.

*Subsection (e) of the new section 1780.* Incorporates present section 1682(b)(2) regarding less-than-half-time veteran training and extends this lump-sum payment system to chapter 35 eligible persons also. (Also see

the discussion "*Paragraph* (2)" of subsection (b), above.)

*Subsection (f) of the new section 1780.* Incorporates present subsection (c) in both present sections 1681 (chapter 34) and 1731 (chapter 35), relating to the Administrator's authority to determine enrollment, attendance and pursuit of program.

*Section 202.* Revises section 1681 to take account of the new section 1780 and to cover directly veteran correspondence and flight training programs. The revised 1681 is described as follows:

*Subsection (a) of the revised section 1681.* Incorporates present subsection (a) with a cross reference to new section 1780 added.

*Subsection (b) of the revised section 1681.* Makes cross reference to new section 1780 for institutional (non-correspondence or flight program) training.

*Subsection (c) of the revised section 1681.* Incorporates present subsection (d)(2) insofar as it regards correspondence course training.

*Subsection (d) of the revised section 1681.* Incorporates present subsection (d)(2) insofar as it regards apprenticeship or other on-the-job training.

*Subsection (e) of the revised section 1681.* Incorporates present subsection (d)(2) insofar as it regards flight training.

*Section 203.* Establishes new sections 1687 and 1688 in chapter 34 to create two new programs: a veterans' work-study program and a repayment of prior federal education loans option under the GI bill.

WORK-STUDY PROGRAM

*Subsection (a) of the new section 1687.* Requires the payment of work-study additional educational assistance allowances to veterans pursuing on a full-time basis a "voc rehab" or regular GI bill education program when such veterans enter into a work-study agreement with the Administrator. In such an agreement the veteran undertakes to perform 100 hours of services during an enrollment period, which services are required in connection with VA preparation of papers and documents at schools or regional offices, with the outreach services program (probably performing direct contact work with eligible veterans), with provision of medical treatment in VA facilities (reading to blind or other disabled veterans, engaging in clean-up, fix-up efforts, etc.), or with any other appropriate VA activities. Advances of less than $250 are permissible for proportionately fewer hours to be worked. Also permitted are agreements for services during a period between enrollments (vacations) if the veteran has already completed one enrollment period and certifies his intention to continue during the next. The "Notwithstanding any other provision of law" provision at the outset of subsection (a) is intended to exempt work-study veterans from the strictures of federal employment laws and regulations; however, as persons performing services for the federal government, such veterans would be covered by the Federal Employees' Compensation Act for injuries or death occurring while in the performance of such services.

*Subsection (b) of the new section 1687.* Provides a system for the Administrator's collecting (or deducting from subsequent VA benefits) pro-rata amounts of the $250 work-study allowance if the Administrator determines that the veteran has not completed his work obligation by the end of the enrollment period (or earlier if the Administrator determines that the obligation will not be completed by such time).

*Subsection (c) of the new section 1687.* Requires the Administrator to conduct at least annually surveys in each geographic area in the country to determine the numbers of veteran-students whose services can be effectively utilized in the work-study program in each such area during an enrollment period. The Administrator is then charged with allocating to each VA Regional Office (VARO) a number of potential agreements which the VARO Director shall attempt to make during the enrollment period or vacation period. Each VARO is then charged with further allocating to each school in its area, at which GI bill trainees are enrolled, a pro-rata number of potential agreements based upon the total number of veterans enrolled in all such schools in that area. However, the subsection also provides that, to the maximum extent feasible, 20 percent of the allotted number of agreements in each area shall be reserved for special allotment to those schools with disproportionately high numbers of needy veteran-students. Finally, the subsection provides that if the number of allotted agreements cannot be filled by a particular school, the number of unmade potential agreements shall be reallocated to such other schools as the Administrator determines under the program regulations.

*Subsection (d) of the new section 1687.* Provides the procedure and criteria for determining which veteran-students shall be offered work-study agreements.

*Paragraph (1).* Requires the Administrator, to the maximum extent feasible, to contract with schools for them to make recommendations, within their allotted number of agreements, as to which of their student-veterans should be offered agreements. Although the final determination would be made by the VARO Director in accordance with regulations prescribed by the Administrator, it is expected that the schools' recommendations would be given great weight. It is also expected that the Administrator in issuing regulations would be guided by those of the Office of Education for its work-study program under the Higher Education Act of 1965, as amended. Paragraph (1) also specifies that the VA regulations are to include the following criteria: (A) the veteran's need to augment his allowance; (B) the availability to the veteran of transportation to the work site; (C) the veteran's motivation; (D) the particular disadvantages of veterans who are minority group members; and (E) for "voc rehab" trainees, their physical condition.

*Subsection (e) of the new section 1687.* Was added in subcommittee by an amendment proposed by Senator Schweiker to prohibit work-study agreements which would displace workers or impair existing services contracts or which would involve activities in connection with a facility used for sectarian purposes. The identical language is contained in section 444(a)(1) (A) and (C) of the Higher Education Act of 1965, as amended (42 U.S.C. 2754), and applies to the Office of Education's work-study program.

REPAYMENT OF FEDERAL EDUCATION LOANS

*Subsection (a) of the new section 1688.* Offers veterans with GI bill entitlement a new option: namely, to use accelerated GI bill allowance (earned by service after July 1, 1970, to repay, in whole or in part, Federal direct or guaranteed education loans taken prior to military service but after April 13, 1970. (The reason for these dates is explained in the discussion of this new provision under "EXPLANATION OF THE BILL," above.) Examples of the loans which could be repaid would be those under the National Defense Education Act of 1958, the Higher Education Act of 1965, the Public Health Service Act (doctors, nurses, allied health professionals), the Omnibus Crime Control and Safe Street Act (to pursue law enforcement careers), the Migration and Refugee Assistance Act (mainly to Cuban refugees), and those made from a revolving fund for individual assistance to certain American Indians. Upon application from the veteran to exercise this repayment option, his entitlement would be based on his educational assistance entitlement (under section 1661(a) of title 38) unused as of the application date.

*Subsection (b) of the new section 1688. Clause (1).* Limits applications for accelerated educational asisstance allowance to four times per veteran per loan. The four is based on the fact that under section 1672 of title 38 up to two program changes after the first program are permissible—that is, three different attempts to find the right education course. The amount of the accelerated allowance payment is also limited to that which the veteran requests; i.e., he cannot be compelled to apply for some or all his allowance entitlement to repay a loan.

*Clause (2).* Provides that the repayment amount is to be applied to unpaid principal as well as unpaid interest (which protects the veteran).

*Clause (3).* Provides that computation of the amount available for loan repayment be based on unused entitlement to which the veteran would be entitled at the time of application for a full-time course; that is, his monthly allowance (including increases for the number of dependents he has at that time) multiplied by his unused months of entitlement. For example, a veteran who completes 18 months of service and thereby fulfills his active duty military obligation, would be entitled to 36 months of GI bill entitlement, pursuant to section 1661(a) of title 38. If he had one dependent, his monthly allowance would be $205 under section 1682(a); thus his total dollar entitlement available for education loan repayment purposes would be $7,380 ($205 x 36). Any amount left over could be applied to regular GI bill monthly payments for approved courses of education.

*Subsection (c) of the new section 1688.* Requires the Administrator upon receipt of an acceleration of allowance application, to obtain from the head of the Federal department or agency involved in making or guaranteeing that loan, a certificate showing the total loan amount then outstanding. Upon approving the application, the Administrator is required to transfer to that agency head the amount requested by the veteran (up to the amount certified as outstanding). For direct loans, that agency head would transfer the repayment amount directly to the loan fund. For guaranteed loans, he would make immediate payment to the lender in question and immediately notify the school in question or any other guarantors or endorsers on the loan, of the payment.

TITLE III

*Section 301.* Adds two provisions included in S. 3683.

*Clause (1).* Provides that a serviceman may after more than 180 days of active duty service begin to use his GI bill entitlement for post-secondary training; presently, he must wait until he has served at least two years to do so. This change complements the PREP program established in P.L. 91–219, which permits a serviceman to use his GI bill entitlement for *pre*-college level study after more than 180 days of active duty. Unlike PREP, however, use of chapter 34 educational assistance entitlement to pursue post-secondary education and training would reduce overall GI bill educational assistance entitlement. The special supplementary assistance allowance in present section 1692 of title 38, United States Code (also added by P.L. 91–219), for individualized tutorial services, would be available for such active duty servicemen pursuing post-secondary education or training.

An additional effect of this amendment to section 1652(a)(2) is to make the direct and guaranteed loan entitlement in chapter 37 of title 38 available to servicemen after more than 180 days of active duty service. This new entitlement may be of particular assistance to servicemen if a mobile home

loan program is incorporated in chapter 37 as is proposed in S. 3656, being reported from the Labor and Public Welfare Committee at the same time as S. 3657.

*Clause (2).* Makes clear that a course at an educational institution required by the SBA for minority group entrepreneurs is covered under the GI bill as an approvable "program of education." Financial institutions require some training and expertise on the part of the borrower before lending money for business purposes, and the borrower's background and experience are important considerations in determining the risk involved in making the loan. Many small business ventures fail because of lack of business training. Coordinated training programs can provide the veteran with the knowledge necessary to carry on the bookkeeping, managerial, personnel, and other business functions. The new provision makes clear that a program structured to this need is to be considered a program leading to an acceptable objective under the GI bill.

*Section 302.* Amends section 1731(a) of chapter 35 in light of the new section 1780 that section 201 of the committee substitute would add. The amendment is substantially similar to that which would be made to present section 1681 by section 202 of the committee substitute.

*Section 303.* Adds a number of new provisions to chapter 36, based on present chapters 34 and 35 provisions.

*Clause (1).* Strikes present section 1786, relating to examination of records (which clause (2) would make subsection (b) of the new section 1787 which section 203 of the committee substitute would add) and adds a measurement of courses provision which incorporates present sections 1684 and 1733 with three changes: (1) The full-time college (including junior college) definition, revised in P.L. 91–219 (found after clause (3) of the present subsection (a)) is further revised so that even if a college charges full-time tuition for fewer than 12 semester hours (or the equivalent thereof), the veteran must take at least 12 such hours (or the equivalent thereof) to receive a full-time allowance. The P.L. 91–219 amendment left the minimum number of hours open-ended in such a situation. However, in a July 17, 1970, letter to the Chairman of the Subcommittee, the Administrator of Veterans Affairs advised that a nationwide survey conducted after enactment of P.L. 91–219 had indicated that, contrary to advice previously given (see page 53 of S. Rep. No. 91–487), there were very many schools charging full-time tuition for less than 12 hours, quite a few for only 7 or 8 hours per semester. (The letter and survey are set forth in the appendix to this report.) This would have had the effect of reducing part-time requirements to extremely low levels. The proposed revision would correct this.

(2) The credit/non-credit provision in the "Notwithstanding" clause in the present section 1684(a), also added by P.L. 91–219, is revised to permit any number of non-credit courses to be counted toward full- and part-time minimum requirements as long as such courses are required by the school to be taken. (This new provision is simplified and inserted at the start of clause (3) of the proposed new section 1786 in a parenthetical rather than in the same form as the present "Notwithstanding" provision.) The P.L. 91–219 amendment permitted such non-credit hours to be counted up to a number equal to the number of credit hours taken. The Administrator's July 17, 1970, letter, referred to in (1) above, also noted that the survey had discovered that many schools gave full non-credit programs and that under VA regulations in effect prior to enactment of P.L. 91–219, veterans enrolled in such programs would be able to use their full GI bill entitlement. This regulation (38 C.F.R. 21.4272(f)) had not been pointed out to the Subcommittee prior to enactment of this provision, which was intended to be a liberalization not a tightening of then present requirements regarding non-credit deficiency courses. The proposed revision would embody the VA regulation.

(3) The non-credit/credit provision is made applicable to chapter 35. The VA supports this extension of the statutory provision to reflect its practice already with respect to war orphans, wives and widows training under chapter 35.

*Clause (2).* Strikes the present section 1787, relating to false or misleading statements (which would be made subsection (d) in the new subsection), and incorporates a number of existing chapter 34, 35 and 36 provisions in this new section 1787 as follows:

*Subsection (a) of the new section 1787. Clause (1).* Incorporates clause (1) of the present sections 1685 and 1734, relating to overcharges by educational institutions.

*Clause (2).* Provides that the Administrator may disapprove a school for GI bill purposes in the future if he finds that it has altered its tuition and fee policy for veterans so substantially as to deny the benefit of the advance and prepayment of allowances system which the new section 1780 would establish. The purpose of this provision is to preserve the value of the initial advance payment for the benefit of the veteran and to discourage schools from demanding earlier payment of any substantially greater amount of tuition after the new system is enacted. (Clause (2) in present sections 1687 and 1736 is rendered unnecessary by virtue of the combination provision in chapter 36.)

*Subsection (c) of the new section 1787.* Incorporates present section 1786, relating to examination of records.

*Subsection (d) of the new section 1787.* Incorporates present section 1787, relating to false or misleading statements.

*Section 304.* Strikes out various provisions, redesignates others and amends the table of sections in present chapters 34 and 35, all necessary as a result of incorporation of provisions from these chapters in chapter 36 by other provisions of the committee substitute.

*Section 305.* Incorporates the provisions of S. 3907 to amend section 3013 of title 38, United States Code, relating to effective dates of educational benefits, to provide that a "voc rehab" or GI bill trainee who acquires a dependent shall have his GI bill allowance increased from the date he legally acquires that dependent, not when the VA receives notice of such acquisition (the present rule), as long as he gives notice within one year thereof. This new provision would be generally consistent with a number of other effective date provisions, which take effect on the happening of the event in question, for payment of disability compensation under chapter 11 of title 38.

*Section 306.* As a companion to the new section 1688, which would be added by section 203 of the committee substitute, repeals the NDEA loan cancellation-for-military-service provision added in P.L. 91–230 (see discussion of new section 1688 under "explanation of the bill", above). The effective date of the repealer is July 1, 1970, which would have the effect of precluding anyone from having acquired any benefit under that provision.

TITLE IV

*Section 401.* Establishes an effective date for the bill of the first day of the second calendar month following the month of enactment.

*Title Amendment.* The title would be amended to be more descriptive of the provisions included in the committee substitute.

COST ESTIMATE

The Veterans' Administration estimates the first full-year cost of the provisions of the committee substitute to be $31.25 million, broken down as follows:

*Work-Study Program Provision:* It is estimated that no more than 56,000 student veterans could be engaged annually under work-study agreements to serve in VA programs, resulting in a full-year cost of $14,000,000 in direct work-study allowance payments (with no adjustment for overpayments recovered because of unfulfilled agreements) and $250,000 in administrative costs.

*Active-Duty Post-Secondary Education Provision:* It is estimated that the first full-year cost would be $17,000,000 covering 39,000 servicemen using GI bill entitlements after 180 days of active duty service. Much of this initial cost would be cancelled out by commensurate reductions in use of entitlement by these servicemen after two years of active-duty service or after their discharge.

*Repayment of Education Loan Provision:* It is estimated that costs will not be entailed until the third year of operation, FY 1973, during which year they will approximate $14.7 million. Thereafter they increase yearly, and those estimates and the bases for them are set forth in the September 23, 1970, Veterans' Administration memorandum from the Chief Benefits Director to the General Counsel, which is included in the Appendix to this report.

## S. 3785—GI BILL BENEFITS FOR FAMILIES OF SERVICEMEN MISSING, CAPTURED, OR INTERNED

Mr. CRANSTON. Mr. President, this bill was introduced on April 30, 1970, by Mr. DOMINICK—for himself, Mr. COTTON, Mr. GRIFFIN, Mr. HRUSKA, and Mr. SMITH. I reported it with a committee amendment in the nature of a substitute from the Committee on Labor and Public Welfare on September 23, 1970. I regret that on the reported bill, Calendar No. 1250, the name of the Senator from Illinois (Mr. SMITH) was inadvertently omitted as a cosponsor of this bill and want to make perfectly clear for the record that Senator SMITH is a cosponsor of S. 3785 and that his name should have appeared as such on the bill as reported.

Mr. President, the committee substitute amends chapters 35 and 37 of title 38 of the United States Code to accomplish the following seven basic purposes:

First. To authorize educational benefits for children and wives of members missing or captured who are so listed for more than 90 days.

Second. To authorize home loan benefits—guaranteed or direct—to wives of such members.

Third. To terminate the entitlement to both educational and home loan benefits when the member is no longer so listed but still allow completion of the current semester or other period in an educational program.

Fourth. To deduct any educational entitlement used from any subsequent entitlement of the wife or child under chapter 35.

Fifth. To limit the period of eligibility for educational benefits to the standard GI bill 8-year period.

Sixth. To limit the wife's home loan entitlement to one loan.

Seventh. To provide that the wife's entitlement does not reduce the husband's entitlement to a home loan under chapter 37.

Mr. President, I believe that the benefits that this bill would provide to the wives and children of servicemen captured or missing would be small recompense for the grief and uncertainty that have befallen these unfortunate families. What the committee substitute does, in effect, is to give the wives and children the benefit of the doubt and not force them to defer utilization of GI bill benefits to which they would, in many instances, become entitled if their husbands or fathers were determined to be deceased. Otherwise, they are in the position of having to go on waiting and hoping and not being eligible for these benefits.

Mr. President, I ask unanimous consent that appropriate passages of the committee report, No. 91–1232, be set forth in the RECORD at this point in order to explain in detail the purposes of S. 3785 as reported, and I urge all of my colleagues to support the bill as reported.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXPLANATION OF BILL

The bill as introduced provided educational assistance for the children and home loan benefits for the wives of members of the Armed Forces who are missing in action, captured by a hostile force, or detained or interned by a foreign government or power (hereinafter referred to as members missing or captured).

The purpose of the committee substitute, which was developed in agreement with the bill's sponsor, Senator Dominick, and after technical consultation with the Veterans' Administration, is to provide educational benefits for the wives as well as children of members missing or captured and to make other changes along lines suggested by the Veterans' Administration in its report.

* * * * *

At the present time, there are approximately 1472 United States servicemen listed as missing in action, captured or interned in Southeast Asia. About 150 of these men have been missing or captured for more than four years, and more than 300 of them have been missing or captured for three and one-half years. That is longer than any U.S. serviceman was held prisoner during World War II. Because hostile forces recently generally have refused to provide information on those persons whom they hold as prisoners, the uncertainty of the fate of members listed as missing or captured is greater for longer periods of time than in prior conflicts.

Meanwhile, the families of these servicemen anxiously await to hear whether their missing father or husband is dead or captured. Many of these servicemen have sons or daughters who would be eligible for educational benefits under the War Orphans' Educational Assistance Act if it could be determined that their father was killed in action or died while being held as a prisoner by enemy forces. Without this determination they must go on waiting and hoping, and they are not eligible for these benefits. Similarly, their wives would be eligible for educational and home loan benefits as war widows, if it could be determined that their husbands were deceased.

The committee considers it unfair that these benefits are denied to these children and wives of our servicemen whose service to their country has certainly cost them their freedom and perhaps their lives. The refusal of the enemy to provide information on the fate of members missing or captured makes the uncertainty faced by these dependents particularly acute, often for long periods of time.

The educational benefits proposed to be extended to the wives and children are those presently contained in chapter 35 of title 38, "War Orphans' and Widows' Educational Assistance." The home loan benefits for wives are those of chapter 37 of title 38, United States Code. In the case of education, the benefits are those to which the children or wife would be entitled under present law if the husband/parent were deceased as a result of a service-connected condition or 100 percent service-connected disabled. The home loan benefits are those now provided widows of veterans or servicemen whose death was service-connected.

Except for extending educational benefits to children of members missing or captured, the provisions of the committee substitute are generally supported by the administration. The administration suggested extending educational benefits to the wife in order to give her a head start as head of the family toward a career in the event her husband is determined to be deceased.

The most current tabulation of the numbers of members missing or captured, their wives and children is as follows:

ARMED SERVICES MEMBERS AND THEIR DEPENDENTS WHO ARE ELIGIBLE FOR VETERANS BENEFITS UNDER S. 3785 AS OF SEPT. 14, 1970

| Service | Missing in action | Captured | Detained or interned | Total |
|---|---|---|---|---|
| Air Force | 543 | 231 | 3 | 777 |
| Army | 266 | 58 | 0 | 324 |
| Marines | 93 | 22 | 0 | 115 |
| Navy | 111 | 144 | 1 | 256 |
| Total | 1,013 | 455 | 4 | 1,472 |
| Wives of members: | | | | |
| Air Force | 412 | 196 | 3 | 611 |
| Army | 113 | 20 | 0 | 133 |
| Marines | 42 | 12 | 0 | 54 |
| Navy | 76 | 99 | 1 | 176 |
| Total wives | 643 | 327 | 4 | 974 |
| Children of members: | | | | |
| Air Force | 877 | 379 | 10 | 1,266 |
| Army | 122 | 38 | 0 | 160 |
| Marines | 82 | 26 | 0 | 108 |
| Navy | 118 | 232 | 1 | 351 |
| Total children | 1,199 | 675 | 11 | 1,885 |
| Total dependents | 1,842 | 1,002 | 15 | 2,859 |

SECTION-BY-SECTION ANALYSIS

*Section 1.*—Adds children and wives of members missing or captured to the definition of "eligible person" in section 1701(a)(1), relating to educational benefits under chapter 35 of title 38, United States Code.

*Clauses (1), (2) and (3).*—Add, as a new subclause (iii) of section 1701(a)(1)(A), a child of a member missing or captured as an eligible person for chapter 35 benefits. For purposes of this new provision, the specification of the member's status as missing in action, captured by a hostile force, or forcibly detained or interned by a foreign government or power would be based on the listing by the Secretary concerned for purposes of pay and allowances under sections 551 and 556 of title 37, United States Code. This terminology is used throughout the committee amendment. The Veterans' Administration suggested that the waiting period be consistent for all categories, rather than none for "prisoners of war" (changed to "members captured by a hostile force") and one year for the other two categories. The committee agreed that the waiting period should be the same for all three categories, and adopted a 90-day rather than a one-year waiting period, on which the administration has not commented. The committee considered a one-year waiting period unnecessarily lengthy, and believed that 90 days was a reasonable period after which it may be assumed that the member's status will not change or be determined with certainty for a considerable length of time.

*Clauses (4), (5) and (6).*—Add, as a new clause (C) of section 1701(a)(1), a wife of a member missing or captured as an eligible person for chapter 35 benefits.

*Section 2.*—Extends through the end of the current semester or like period an entitlement to education benefits which is terminated by a change in the entitling status of the member missing or captured. Another entitlement may, of course, arise automatically under a separate provision, *e.g.*, for the now widow of a member who is determined to have died from a service-connected condition.

*Clauses (1), (2) and (3).*—Add to subsection (b) of section 1711, relating to termination of eligibility, a new clause (2), which permits wives and children of members missing or captured to complete the semester or other period when the member's status changes. Present subsection (b)(2) is redesignated as (b)(3).

*Clause (4).*—Conforms a cross reference in redesignated subsection (b)(3) of section 1711, which deals with disabled persons, to the appropriate entitling provision which has been redesignated (a)(1)(D) of section 1701.

*Section 3.*—Amends section 1712 to set limits on duration of entitlement and eligibility for wives and children.

*Clause (1).*—Conforms a cross reference in subsection (b) of section 1712 to the redesignated appropriate entitling provision in section 1701(a)(1), relating to widows and wives of the disabled.

*Clause (2).*—Adds new subsections to section 1712 as follows:

*New Subsection (f).*—Establishes an eight-year limit on eligibility for educational benefits for wives of members missing or captured comparable to the limit for other eligible wives or widows in present section 1712(b).

*New Subsection (g).*—Deducts from future entitlements any entitlement used under the new entitlements so that the duration of benefits under more than one entitlement does not exceed the present 36-month limit in section 1711(a) for a wife, widow, or child.

*Section 4.*—Expands a cross reference (to the applicable entitling provision) in section 1720(b) to include the new clause (C) in subsection (a)(1) of section 1701. This permits the provision of the same educational counseling for wives of members missing or captured that other eligible wives or widows presently receive.

*Section 5.*—Extends to wives of members missing or captured the home loan benefits of chapter 37 of title 38, United States Code, as follows:

*Subsection (a).*—Adds a new paragraph (3) to subsection (a) of section 1801 in order to include such wives within the definition of "veteran." The new provision is similar to present paragraph (2) making certain widows eligible. The wife would be limited to one loan, and her unused entitlement would terminate if her husband's entitling status changed.

*Subsection (b).*—Preserves the husband's home loan entitlement under chapter 37 even if his wife uses hers while he is missing or captured. The administration suggested that the bill as introduced be changed so as not to deprive the husband of his entitlement since his needs upon return may well be very different from those of his wife before, and since he was not in any way a party to the

prior loan and thus should not himself lose benefits as a result of his wife's usage. The effect is that one family might possibly obtain three benefits under chapter 37: (1) wife obtains loan while husband is missing in action; (2) husband obtains loan upon his return, and (3) husband dies of service-connected condition and widow obtains loan.

*Title Amendment.*—Reflects the extension of educational benefits to wives, and the change in terminology from "prisoner of war" to "captured by a hostile force."

COST ESTIMATE

The administration estimates that the annual full year cost of the provisions in the committee substitute would not exceed $500,000. The educational benefits for children and for wives are each estimated at not more than $250,000 per year. The home loan provision only creates a potential liability, and would not result in any substantial increase in cost to the government.

---

## H.R. 370—THE DISABLED VETERANS AUTOMOBILE ASSISTANCE AND VETERANS FLIGHT TRAINING AND FARM COOPERATIVE PROGRAMS

Mr. CRANSTON. Mr. President, the committee substitute for this House-passed bill was reported unanimously from the Veterans' Affairs Subcommittee, and was unanimously ordered reported by the full Labor and Public Welfare Committee.

As passed by the House of Representatives, H.R. 370 would have amended chapter 39 of title 38, United States Code, by raising the disabled veterans automobile allowance from $1,600 to $2,500 and by extending the benefits of the chapter to certain disabled persons on active duty.

Title I of the committee substitute improves and expands the provisions of the House-passed bill in three respects: First, the automobile allowance is raised from $1,600 to $3,000, rather than $2,500; second, the Administrator is required to provide the necessary adaptive equipment in addition to the automobile allowance, and to continue to repair and replace such adaptive devices on one car at a time for the eligible person; and, third, veterans disabled during the Vietnam era are made subject to the same service-connection standard as is applied to veterans of World War II or the Korean conflict, rather than the more stringent so-called peacetime standard now applied for all post-Korean service. The House bill would have extended the automobile allowance to the disabled person on active duty, using the World War II-Korean conflict standard for service connection. The committee substitute incorporates a similar extension of the benefit but would base the eligibility of the disabled active duty person on the same service-connection standard as would apply to him as a veteran.

Title II of the committee substitute incorporates the provisions of S. 3689, which was introduced on April 7, 1970, by Senator YARBOROUGH, and which I was privileged to cosponsor along with seven other of our colleagues, to establish a new veterans flight training loan and farm cooperative program. Both of these new programs were adopted by the Senate on October 23, 1969, as a part of H.R. 11959—which became Public Law 91-219, the Veterans Education and Training Assistance Amendment Act of 1970—but were deleted at the insistence of the House conferees on that bill. The loan program will assist veterans in obtaining a private pilot's license in order to qualify to pursue further flight training, and improves the present farm cooperative program to stress onfarm training rather than institutional instruction. The farm program is similar to the ones previously in effect under the World War II and the Korean conflict GI bills.

Mr. President, I ask unanimous consent that the appropriate passage of the committee report, No. 91-1233, be set forth in the RECORD at this point in order to explain in detail the purposes of H.R. 370 as reported, and I urge all of my colleagues to support the bill as reported.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

TITLE I

* * * * *

The Veterans' Administration supported the concept of the House-passed bill and specifically endorsed the allowance increase to $2,500. It suggested and the committee agreed to the revision in the House-passed bill to remove the discrimination against veterans of the Vietnam era by applying the same service-connection standard to them as is applicable to World War II and Korean conflict veterans from the same service period. The Veterans' Administration also suggested and the committee agreed that the service-connection standards applicable for active duty personnel should be made consistent with those for veterans. The Veterans' Administration pointed out that the provision for extending the benefit to disabled persons on active duty as passed by the House could yield discriminatory results. A serviceman who accidentally incurred the qualifying disability as a result of military service after January 31, 1955, but whose disability was not incurred as the direct result of the performance of military duty, would be entitled to automobile assistance if his claim was paid prior to his release or discharge from service. However, if the processing of his claim were delayed until after his discharge, the more restrictive criteria of the so-called peace-time standard would be applicable and he would no longer be eligible for the benefit. The committee substitute was prepared after technical consultation with the Veterans' Administration, although the Veterans' Administration did not take positions on the committee substitute automobile allowance increase to $3,000, or on the provision of adaptive equipment in addition to the automobile allowance.

The increase in the automobile allowance to $3,000 is strongly supported by the American Legion, AMVETS, the Disabled American Veterans, the Disabled Officers Association, the Paralyzed Veterans of America, and the Veterans of Foreign Wars of the United States. Their letters of support are set forth in an appendix to this report.

When the automobile assistance program was established on August 8, 1946, the $1,600 maximum payment approximated the actual cost of many automobiles then available together with the necessary adaptive devices. The subsequent increase in the cost of living and the cost of automobiles has been considerable. Figures comparing cost of automobiles in 1946 to the cost in 1970 are not readily available. However, the National Automobile Dealers' Association has calculated the average retail selling price of new cars in 1949 as $2,080 and the average for the first 6 months of 1970 as $3,470. This is a 67 percent increase over the past 21 years, or an average annual increase of 3.2 percent. By using this average annual increase, a comparable 1946 average new car retail selling price of $1,876 is obtained. The ratio of this figure to the 1946 allowance of $1,600 calls for a current allowance equivalent of $2,965. compared to the current average retail selling price of $3,470. The committee substitute thus proposes a 1970 allowance figure rounded off to the nearest 100 at $3,000.

The committee substitute reflects the thought that adaptive equipment on automobiles for disabled veterans are in the nature of prosthetic devices, which are now provided on a continuing basis to service-connected disabled veterans as part of medical treatment. A one-time allowance for adaptive automobile equipment does not meet the continuing need of the disabled veteran (or serviceman). Thus, the committee substitute requires that such devices shall be provided on a continuing basis.

The provision of adaptive equipment and its maintenance, repair, replacement and reinstallation is strongly endorsed by the Paralyzed Veterans of America. In addition to relieving the economic burden on persons who require such equipment to operate a vehicle, another important purpose is served. The Administrator would, under the provisions of the committee substitute, establish safety and quality standards for adaptive equipment. Such safety and quality standards are already established for prosthetic devices provided by the Administrator as part of medical treatment under chapter 17, section 612(d) of title 38 United States Code. It is believed that the same capability within the Veterans' Administration Department of Medicine and Surgery can be effectively employed, with the addition of a few personnel positions, which the committee recommends, to carry out a similar quality control program for the automobile adaptive devices which the Administrator would provide under the revised chapter 39 contained in the committee substitute.

In the oversight hearings of the Subcommittee on Veterans' Affairs, regarding medical care in VA hospitals for Vietnam veterans, from November 21, 1969, to April 28, 1970, the importance of achieving mobility for the paralyzed, or otherwise seriously disabled, veteran was referred to repeatedly by representatives of the Paralyzed Veterans of America, the Blinded Veterans' Association, and by paralyzed and seriously disabled veterans themselves. A paraplegic's continuing and secure access to an automobile is very often the indispensable factor affording him an opportunity for a productive life. Public transportation is not appropriate for him in most instances. The committee strongly believes that providing this kind of assistance for veterans so seriously disabled by service-connected conditions should be considered a vital part of the Government's obligation for their rehabilitation.

The present chapter 39 is a short chapter consisting of five sections. Since the proposed changes required substantial amendment of each section, the committee substitute contains an entirely new chapter.

TITLE II

Title II of the committee substitute contains the flight training loan and farm cooperative training provisions of S. 3689, which in turn were substantially the same as those included as part of title I (sections 102(c) and 103(d)) of H.R. 11959 as passed by the Senate on October 23, 1969, but not accepted by the House conferees and originally contained in subsection (b) of section 1 of S. 338 (flight training) and S. 1998 (farm training).

The loan program which section 1 of title II would establish would give needed assistance to veterans who wish to obtain a commercial license but who are unable to pay

the approximately $1,000 cost of flight-training instruction necessary to secure a private pilot's license, possession of which is a prerequisite to pursuit of flight training under the GI bill. This is a limited loan program, and contains no cancellation or forgiveness provisions.

The beneficial features of the loan are: (1) The veteran could obtain a loan of up to $1,000 or 90 percent of the established tuition charges for a private pilot's license, at a reasonable interest rate; (2) repayment of the loan is deferred until the educational objective is attained and (3) no security is required for the loan. All of these features would encourage and assist the veteran who desires to pursue advanced flight training but is deterred from doing so because of the difficulty of securing commercial financing for the preparatory flight training. GI bill benefits are presently available under section 1677 of title 38, United States Code, for flight training, and this loan program would provide substantial assistance to a veteran who seeks a career as a commercial pilot, but does not have the resources to support private pilot training.

The farm cooperative program is similar to the one previously in effect under the Korean conflict GI bill, and stresses on-farm training rather than institutional instruction. The purpose of returning to the type of farm cooperative program which was successful in attracting 785,000 trainees under the two prior GI bill programs is to attract more veterans to farm cooperative training under the current program. Since the time when the present farm cooperative program was instituted in 1967, only 836 trainees have participated, less than one-twentieth of 1 percent of the total number of trainees under the present GI bill. The attractiveness of the prior programs is demonstrated by the much higher percentage of participation in the two prior programs—7.7 percent of the total number of trainees in those two programs.

Testimony before the subcommittee on S. 1998 indicated that there is an unmet need for young farmers, growing especially acute in light of the average high age of present farmers. For example, in Minnesota, with a projected need of 3,375 farm replacements each year, only about 1,000 students graduate yearly from agricultural schools in the State and only part of those graduates enter full-time farming. A survey by the American Vocational Association of 22 States showed unanimity for return to the World War II and Korean conflict form of farm cooperative program with combined classroom and on-farm instruction.

The new farm program proposed in the committee substitute is endorsed by the National Vocational Agricultural Teachers' Association, the National Farmers Union, and the National Grange. In addition, the State supervisors of vocational education of the following 26 States have written letters endorsing the proposed new farm program: Alabama, California, Colorado, Delaware, Florida, Georgia, Hawaii, Illinois, Kansas, Maryland, Michigan, Minnesota, Missouri, Montana, Nebraska, New Jersey, New York, North Carolina, New Mexico, Pennsylvania, South Dakota, Vermont, Virginia, Washington, Wisconsin, and Wyoming.

The administration opposed the flight-training loan program when it commented on S. 338, and when it commented on S. 1998, recommended that consideration of the farm cooperative program be deferred pending the completion of a study by the President's Committee on the Vietnam Veteran. However, the study, published in late March 1970, did not speak to farm cooperative training.

---

SECTION-BY-SECTION ANALYSIS

TITLE I

*Section 101.* Establishes the title of title I of H.R. 370 as the "Disabled Veterans' and Servicemen's Automobile Assistance Act of 1970."

*Section 102.* Reenacts a revised chapter 39 of title 38, United States Code, with a new chapter heading and table of sections, and the following new sections:

*New Section 1901.* Establishes applicable definitions for the chapter as follows:

*Subsection (1) of new section 1901.* Defines "eligible person" to include (1) persons on active duty with the same disabilities as those disabled veterans presently covered in the chapter, (2) those disabled veterans presently covered, and (3) Vietnam era veterans under the so-called "war-time" standard of service connection. The so-called "peace-time" standard of service connection is left open-ended, as it is in subsection (b) of present section 1901, and upon termination of the Vietnam era the more stringent standard would be applicable.

*Clause (a).*—Combines the periods of service, applicable standards of service connection for each, and the degree of disability now covered in subsections (a) and (b) of present section 1901.

*Clause (b).*—Includes within the definition of "eligible person" a person on active duty who is suffering from one of the disabilities specified for veterans. This is substantially the House provision (added as a new section 1906), but the committee substitute makes the service-connection standards for active duty personnel consistent with those for veterans for the same service period.

*Subsection (2) of new section 1901.* Restates the definition of "World War II" contained in present section 1901(c) in terms of an eligible person rather than a veteran.

*New section 1902.*—Establishes the type of assistance to be provided under the chapter.

*Subsection (a) of new section 1902.* (1) Restates the entitlement to an automobile allowance contained in the first clause of present section 1901(a); (2) raises the maximum allowance from $1,600 to $3,000; and (3) deletes the present language which provides that the allowance is to cover both the automobile and adaptive devices. The method of payment—to the seller under a sales contract—is derived from present section 1903.

*Subsection (b) of new section 1902.* Requires, in a new provision, the Administrator to provide eligible persons with adaptive equipment necessary for them to operate the vehicle. The standard of safety to which the automobile is to be adapted is derived from the standard now contained in the second clause of present section 1902. Rather than requiring the Administrator to insure that the person "will be licensed" to operate the vehicle, the standard is rephrased to provide that the equipment should enable the person to "satisfy applicable standards of licensure established by the State. . . ."

*Subsection (c) of new section 1902; Clause (1).*—Requires, in a new provision, the Administrator to repair, replace, or reinstall adaptive equipment for eligible persons on the automobile acquired under this chapter.

*Clause 2.*—Requires that equipment be provided, repaired, replaced, or reinstalled for any eligible person in any vehicle he may subsequently acquire. This entitles all persons who have previously obtained a vehicle under this chapter to obtain the necessary adaptive equipment and service therefor with respect to the vehicle they presently operate or may subsequently purchase.

*Subsection (d) of new section 1902.* Restates the provision contained in the last proviso of present section 1902 entitling an eligible person who cannot himself qualify to operate a vehicle to receive the allowance toward an automobile to be operated for him by another person. The reorganization of the chapter makes clear that this entitlement extends only to the automobile and not to adaptive equipment, which would obviously not be necessary in this situation.

*New section 1903.* Restates general limitations on providing assistance now contained in the present chapter.

*Subsection (a) of new section 1903.* Restates the prohibition, contained in present section 1904, against providing more than one automobile to an eligible person, and the prohibition, contained in the first clause of present section 1902, against repair, maintenance, or replacement of the automobile.

*Subsection (b) of new section 1903.* Restates the prohibition, contained in the second clause of the present section 1902, against a veteran being provided an automobile if he cannot qualify to operate it (except in cases where it is to be operated by another under subsection (d) of new section 1902).

*Subsection (c) of new section 1903.* Establishes, in a new provision, the limitation on the new entitlement to adaptive equipment that an eligible person may obtain the adaptive equipment for only one car at a time.

*Subsection (d) of new section 1903.* Requires, in a new provision, that adaptive equipment provided under this chapter must meet standards of safety and quality prescribed by the Administrator.

*Deletion of present section 1905.* Existing section 1905 states that the benefits of the chapter shall be made available to those who are eligible and who apply for the benefits in accordance with regulations prescribed by the Administrator. This section is no longer necessary, and its deletion will not affect the administration of the chapter.

TITLE II

*Section 201.*—Adds to section 1677 of chapter 34 of title 38, United States Code, a new subsection (c) containing a new private pilot's license loan program. The loan program would assist veterans who wish to pursue flight training under the GI bill but who are unable to pay the up-to-$1,000 cost of flight training necessary to secure the private pilot's license, which under section 1677 (a)(1) is a prerequisite to qualifying for flight training educational assistance under chapter 34.

*Paragraph (1) of new subsection (c).* Authorizes direct loans to veterans wishing to obtain training for a private pilot's license with a view toward pursuing flight training under the GI bill (section 1677 of chapter 34) such as training for a commercial pilot's license.

*Paragraph (2) of new subsection (c).* Limits the loan to $1,000 or 90 percent of the established tuition charges for the flight training course, and provides that the interest rate shall be established by the Administrator at not to exceed 6 percent per year.

*Paragraph (3) of new subsection (c).* Requires repayment of the loan within 3 years after certain dates set as follows: (A) 1 year after the loan is made if the veteran does not obtain a private pilot's license; (B) 1 year after obtaining a private pilot's license if he fails to undertake commercial pilot's training; (C) immediately upon his failure to complete commercial training within 18 months; or (D) 1 year after he has completed commercial training. This provision is modified to correct an omission in the version in H.R. 11959 as it passed the Senate.

*Section 202.—Subsection (a).* Establishes the new farm cooperative program as a substitute for the present program in subsection (d) of section 1682.

*New subsection (d).* Replaces the present highly academically oriented farm cooperative program with a program similar to that existing under the Korean conflict GI bill. The new farm cooperative program would stress supervised work experience on a farm or other agricultural establishment and require less classwork. Presently, full-time farm cooperative training requires a minimum of 12 clock hours of classwork a week for 44 weeks of any period of 12 consecutive months. The new program would lower the requirement to a minimum of 200 hours per year, with at least 8 hours each month.

*Paragraph (1) of new subsection (d).* Establishes the basic farm cooperative education assistance allowance, now contained in paragraph (2) of the present subsection, eliminating allowances for part-time training which would no longer be necessary under the new type of program. The allowance for farm cooperative training would be established at the same level as is presently provided for other types of cooperative training under paragraph (1) of subsection (a) of the present section. The new farm cooperative rates for veterans with dependents would be $2 higher than presently in the farm cooperative program in paragraph (2) of the present subsection.

*Paragraph (2) of new subsection (d).* Establishes standards for approval of a farm cooperative training program by State approving agencies.

*Subsection (b).*—Establishes the effective date of the farm cooperative training program and contains a saving provision for those enrolled in existing farm training programs.

TITLE AMENDMENT

Reflects the changes in H.R. 370 made by the committee substitute: title I—extension of benefits to certain Vietnam veterans and provision of a continuing entitlement to receive adaptive equipment—and by title II—addition of the flight training loan and farm cooperative programs to the bill.

COST ESTIMATE

The first full year cost of the provisions of the committee substitute is $20 million, including $6.8 million for the automobile assistance in title I, $11.4 million for the flight training loan program, and $1.8 million for the farm cooperative program of title II.

Mr. CRANSTON. Mr. President, I very much hope that we will be able to iron out whatever differences may exist between us and the House Committee on Veterans' Affairs with respect to these bills and secure the enactment of all of them before the adjournment of this Congress. In closing, I wish to note my appreciation for the special contribution made to the work of the Veterans' Affairs Subcommittee in preparing the amendments to these four bills by Hugh Evans of the Office of Legislative Counsel and by all of those in the Veterans' Administration who so graciously offered their time and expertise in providing technical assistance to us.

---

## VETERANS' ADVANCE EDUCATIONAL ASSISTANCE ALLOWANCE AND WORK-STUDY PROGRAM ACT OF 1970

The Senate proceeded to consider the bill (S. 3657) to amend chapter 34 of title 38, United States Code, to authorize advance educational assistance allowance payments to eligible veterans at the beginning of any school year to assist such veterans in meeting educational and living expenses during the first 2 months of school, and to establish a veterans' work-study program through cancellation of such advance payment repayment obligations under certain circumstances which had been reported from the Committee on Labor and Public Welfare with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Veterans' Advance Educational Assistance Allowance and Work-Study Program Act of 1970".

TITLE I—INCREASE IN THE AMOUNTS OF LOANS TO AND ELIGIBILITY FOR WORK-STUDY PROGRAM OF DISABLED VETERANS ENROLLED IN VOCATIONAL REHABILITATION

SEC. 101. Section 1502 of title 38, United States Code, is amended by adding at the end thereof a new subsection (d) as follows:

"(d) Veterans pursuing a program of vocational rehabilitation training under the provisions of this chapter shall also be eligible, where feasible, for participation in the work-study program provided by section 1687 of this title."

SEC. 102. Section 1507 of title 38, United States Code, is amended by striking out "$100" in the first sentence thereof and inserting in lieu thereof "$200".

TITLE II—ADVANCE PAYMENT OF EDUCATIONAL ASSISTANCE ALLOWANCE AND WORK-STUDY PROGRAM

SEC. 201. Subchapter II of chapter 36 of title 38, United States Code, is amended by inserting immediately before section 1781 the following new section:

"§ 1780. Payment of educational assistance allowances

"Period for Which Payment May Be Made

"(a) Payment of educational assistance allowances to eligible veterans or persons pursuing a program of education, other than correspondence or flight, in an educational institution under chapter 34 or 35 of this title shall be paid as provided in this section and, as applicable, in section 1682 or section 1732 of this title. Such payments shall be paid only for the period of such veterans' or persons' enrollment, but no amount shall be paid—

"(1) to any eligible veteran or person enrolled in a course which leads to a standard college degree for any period when such veteran or person is not pursuing his course in accordance with the regularly established policies and regulations of the educational institution and the requirements of this chapter or of chapter 34 or 35 of this title; or

"(2) to any eligible veteran or person enrolled in a course which does not lead to a standard college degree for any day of absence in excess of thirty days in a twelve-month period, not counting as absences weekends or legal holidays established by Federal or State law (or in the case of the Republic of the Philippines law) during which the institution is not regularly in session.

"Advanced Payment of Initial Educational Assistance Allowance

"(b)(1) The authorization of an educational assistance allowance advance payment provided in this subsection is based upon a finding by the Congress that eligible veterans and persons need additional funds at the beginning of a school term to meet the expenses of books, travel, deposits and payments for living quarters, the initial installment of tuition, and other special expenses which are concentrated at the beginning of a school term.

"(2) Subject to the provisions of this subsection, and under regulations which the Administrator shall prescribe, an eligible veteran or person shall be paid an educational assistance allowance advance payment. Such advance payment, except in unusual or extraordinary cases, shall be made within fifteen days after receipt of application therefor submitted by the eligible veteran or person pursuant to paragraph (3) of this subsection, but in no event earlier than thirty days prior to the date on which pursuit of his program of education is to commence and shall be made in an amount equivalent to the educational assistance allowance for the month or fraction thereof in which pursuit of the program will commence, plus the educational assistance allowance for the succeeding month. In no event shall an educational assistance allowance advance payment be made under this subsection to an eligible veteran or person intending to pursue a program of education on less than a half-time basis.

"(3) The application to the Administrator for advance payment shall include—

"(A) evidence showing (i) such veteran to be an 'eligible veteran' as defined in section 1652(a)(1) of chapter 34 of this title, or (ii) such person to be an 'eligible person' as defined in section 1701(a)(1) of chapter 35 of this title,

"(B) a certificate by the eligible veteran or person (i) stating that he is enrolled, or has applied for, been accepted by and intends to enroll, in a specified educational institution and is pursuing, or plans to pursue, a specified approved course of education during such school year at such educational institution, (ii) specifying the expected date of enrollment if he has not yet enrolled in an educational institution, and (iii) specifying the number of semester hours (or equivalent) or clock hours he is pursuing, or intends to pursue, and

"(C) in the case of an eligible veteran, information as to the number of persons he claims as dependents (as defined in section 1652(d) of this title).

"(4) For purposes of the Administrator's determination whether any veteran or person is eligible for an advance payment under this section, the evidence and information submitted by such veteran or person pursuant to paragraph (3) of this subsection shall establish his eligibility unless there is evidence in his file in the processing office establishing that he is ineligible for such advance payment.

"Prepayment of Subsequent Educational Assistance Allowance

"(c) Except as provided in subsection (e) of this section, subsequent payments of educational assistance allowance to an eligible veteran or person shall be prepaid each month, subject to such reports and proof of enrollment in and satisfactory pursuit of such programs as the Administrator may require. The Administrator may withhold the final payment of a period of enrollment until such proof is received and the amount of the final payment appropriately adjusted. In the case of an eligible veteran who submitted an application showing one or more dependents, but who does not submit evidence, acceptable to the Administrator pursuant to regulations he shall prescribe, of such dependents, the amount of the educational assistance allowance shall reflect the assumed existence of such dependents during a reasonable period to allow the veteran to furnish such proof, but such period shall not extend beyond sixty days or the end of the enrollment period, whichever is the earlier.

"Recovery of Erroneous Payments

"(d) If an eligible veteran or person fails to enroll in a course for which an educational assistance allowance advance payment is made, the amount of such payment and any amount of subsequent payments which, in whole or in part, are due to erroneous information furnished in the certificate referred to in subsection (b)(3)(B) of this section, shall become an overpayment and shall constitute a liability of such veteran or person to the United States and may be recovered, unless waived pursuant to section

3102 of this title, from any benefit otherwise due him under any law administered by the Veterans' Administration or may be recovered in the same manner as any other debt due the United States.

"Payments for 'Less Than Half-Time' Training

"(e) Payment of the educational assistance allowance computed under section 1682(b)(1) of this title for an individual pursuing a program of education while on active duty, or under section 1682(b)(2) or 1732(a)(2) of this title for an individual pursuing a program of education on a less than half-time basis may, and the educational assistance allowance computed under section 1696(b) of this title shall, be made in an amount computed for the entire quarter, semester, or term during the month immediately following the month in which certification is received from the educational institution that such individual has enrolled in and is pursuing a program at such institution.

"Determination of Enrollment, Pursuit, and Attendance

"(f) The Administrator may, pursuant to regulations which he shall prescribe, determine enrollment in, pursuit of, and attendance at, any program of education or course by an eligible veteran or person for any period for which he receives an educational assistance allowance under this chapter for pursuing such program or course."

SEC. 202. Section 1681 of title 38, United States Code, is amended to read as follows:

"§ 1681. Educational assistance allowance

"General

"(a) The Administrator shall, in accordance with the applicable provisions of this section and section 1780 of this title, pay to each eligible veteran who is pursuing a program of education under this chapter an educational assistance allowance to meet, in part, the expenses of his subsistence, tuition, fees, supplies, books, equipment, and other educational costs.

"Institutional Training

"(b) The educational assistance allowance of an eligible veteran pursuing a program of education, other than correspondence or flight, at an educational institution shall be paid as provided in section 1780 of this title.

"Correspondence Training Certifications

"(c) No educational assistance allowance shall be paid to an eligible veteran enrolled in and pursuing a program of education exclusively by correspondence until the Administrator shall have received—

"(1) from the eligible veteran a certificate as to the number of lessons actually completed by the veteran and serviced by the educational institution; and

"(2) from the educational institution, a certification, or an endorsement on the veteran's certificate, as to the number of lessons completed by the veteran and serviced by the institution.

"Apprenticeship and Other On-Job Training

"(d) No educational assistance allowance shall be paid to an eligible veteran enrolled in and pursuing a program of apprenticeship or other training on the job until the Administrator shall have received—

"(1) from the eligible veteran a certification as to his actual attendance during such period; and

"(2) from the educational institution, a certification, or an endorsement on the veteran's certificate, that such veteran was enrolled in and pursuing a program of apprenticeship or other training on the job during such period.

"Flight Training

"(e) No educational assistance allowance for any month shall be paid to an eligible veteran who is pursuing a program of education consisting exclusively of flight training until the Administrator shall have received a certification from the eligible veteran and the institution as to actual flight training received by, and the cost thereof, to the veteran during that month."

SEC. 203. Subchapter IV of chapter 34 of title 38, United States Code, is amended by deleting section 1687 in its entirety and inserting in lieu thereof the following:

"WORK-STUDY PROGRAM

"§ 1687. Work-study additional educational assistance allowance; advances to eligible veterans

"(a) Notwithstanding any other provision of law, the Administrator shall pay a work-study additional educational assistance allowance (hereafter referred to as 'work-study allowance') to any veteran pursuing on a full-time basis a course of vocational rehabilitation under chapter 31 of this title, or a program of education under this chapter, who enters into an agreement with the Administrator to perform services under the work-study program established by this section. Such allowance shall be paid in advance in the amount of $250 in return for such veteran's agreement to perform services, aggregating one hundred hours during a semester or other applicable enrollment period, required in connection with (1) the preparation and processing of necessary papers and other documents at educational institutions or regional offices or facilities of the Veterans' Administration, (2) the outreach services program under subchapter IV of chapter 3 of this title, (3) the provision of hospital and domiciliary care and medical treatment under chapter 17 of this title, or (4) any other activity of the Veterans' Administration as the Administrator shall determine appropriate. Advances of lesser amounts may be made in return for agreements to perform services for periods of less than one hundred hours, the amount of such advance to be prorated on the basis of the amount of a full advance. The Administrator may enter into a work-study agreement with a veteran who has satisfactorily pursued his courses during at least one enrollment period for the performance of services during a period between enrollments if such veteran certifies his intention to continue the pursuit of the program during the next enrollment period.

"(b) If an eligible veteran, after having received in advance a work-study allowance under subsection (a) of this section, fails to fulfill his work obligation under the agreement for any reason, the amount due (based upon the pro rata portion of the work obligation which the veteran did not complete) as computed by the Administrator shall be considered an overpayment and shall become due and payable at the end of the enrollment period or at such time prior thereto when the Administrator determines that such obligation will not be completed prior to the end of the enrollment period. Any such amount due may be recovered from any benefit otherwise due the veteran under any law administered by the Veterans' Administration or shall, unless waived pursuant to section 3102 of this title, constitute a liability of such veteran to the United States and be recovered in the same manner as any other debt due the United States.

"(c) In order to carry out the purposes of this section and to determine the number of veterans whose services the Veterans' Administration can effectively utilize and the types of services required to be performed by such veterans, the Administrator shall, at least once each year, conduct a survey to determine the numbers of veteran-students whose services under the work-study program can effectively be utilized during an enrollment period in each geographic area where Veterans' Administration activities are conducted. Based upon the results of such survey, the Administrator shall allocate to each Veterans' Administration regional office the number of agreements under subsection (a) of this section which the head of that office shall attempt to make during such enrollment period or periods prior to the next such survey. Each regional office shall further allocate to each educational institution, at which eligible veterans are enrolled pursuant to this chapter, within its area the number of such potential agreements based upon the ratio of the number of veterans enrolled in such institution to the total number of veterans enrolled in all such institutions in the regional area, except that, to the maximum extent feasible, 20 per centum of the allocated number of agreements shall be reserved for special allocation to those institutions with a substantially higher proportion of needy veteran-students than generally prevails at other institutions within such area. If the total number of agreements allocated to any educational institution cannot be filled by such institution, the number of such unmade potential agreements shall be reallocated to such other educational institution or institutions in the regional office area as the Administrator shall determine in accordance with regulations he shall prescribe.

"(d)(1) The Administrator shall, to the maximum extent feasible, enter into agreements with educational institutions under which such institutions will recommend, within their number of allocated agreements, which particular veteran-students enrolled in such institutions should be offered work-study agreements under this section.

"(2) The determination of which eligible veteran-students shall be offered work-study agreements shall be made in accordance with regulations prescribed by the Administrator. Such regulations shall include, but not be limited to, the following criteria—

"(A) the need of the veteran to augment his educational assistance allowance;

"(B) the availability to the veteran of transportation to the place where his services are to be performed;

"(C) the motivation of the veteran;

"(D) in the case of veterans who are members of a minority group, the disadvantages incurred by members of such group, and

"(E) in the case of a disabled veteran pursuing a course of vocational rehabilitation under chapter 31 of this title, the compatability of the work assignment to the veteran's physical condition.

"(e) No work-study agreement shall be entered into under this section which would—

"(1) result in the displacement of employed workers or impair existing contracts for services, or

"(2) involve the construction, operation, or maintenance of so much of any facility as is used or is to be used for sectarian instruction or as a place for religious worship.

"§ 1688. Repayment of Federal education loan

"(a) An eligible veteran who is obligated to repay an education loan made on or after April 13, 1970, pursuant to title II of the National Defense Education Act of 1958, part B of title IV of the Higher Education Act of 1965, part C of title VII and part B of title VIII of the Public Health Service Act, the Omnibus Crime Control and Safe Streets Act of 1968, the Migration and Refugee Assistance Act, or from the revolving fund established by section 10 of the Act of June 18, 1934 (48 Stat. 986; 25 U.S.C. 470), or any other education loan made, insured, or guaranteed on or after April 13, 1970, under any Federal program, for education pursued prior to his performance of active duty service, may make application to the Administrator to accelerate payment of the educational assistance allowance for the pur-

pose of paying off or reducing his indebtedness for such loan. Accelerated payment of educational assistance allowance under this section shall be made on the basis of unused educational entitlement, determined in accordance with section 1661(a) of this title, earned for the performance of active duty performed after June 30, 1970. The application shall contain such information as the Administrator may by regulation prescribe.

"(b) Any payment of an accelerated allowance shall—

"(1) be made no more than four times per veteran for each loan made or guaranteed under any provision of law referred to in subsection (a) of this section, and be made in an amount which the eligible veteran, within the educational benefits available to him, determines is most advantageous to him;

"(2) be applied to both principal and interest remaining unpaid at the time the payment is made; and

"(3) be charged to any unused entitlement which the eligible veteran has remaining under section 1661(a) of this title for active duty performed after June 30, 1970, at the rate of educational assistance allowance to which he would be entitled, as computed under section 1682(a) of this title, at the time of application if he were pursuing an approved course of education on a full-time basis.

"(c) The Administrator, upon receipt of an application made pursuant to subsection (a) of this section, shall obtain a certification from the head of the Federal department or agency involved in making or guaranteeing the loan in question as to the total amount of the principal and interest outstanding on the loan. Upon approval of the application, the Administrator shall transfer to such department or agency head the amount determined by the eligible veteran under subsection (b) of this section and still outstanding on the loan or loans in question. In the case of loans federally guaranteed, directly or indirectly, the agency or department head in question shall make immediate payment to the lender of the full amount transferred to him and shall immediately send notice of such payment to the educational institution in question and other guarantors or endorsers on the loan."

TITLE III—MISCELLANEOUS AMENDMENTS TO THE VETERANS AND WAR ORPHANS AND WIDOWS EDUCATIONAL ASSISTANCE PROGRAMS

SEC. 301. Section 1652 of title 38, United States Code, is amended by—

(1) striking out "at least two years" in subsection (a)(2) and inserting in lieu thereof "more than one hundred and eighty days"; and

(2) by adding at the end of subsection (b) a new sentence as follows: "Such term also means any unit course or subject, or combination of courses or subjects, pursued by an eligible veteran at an educational institution, required by the Administrator of the Small Business Administration as a condition to obtaining financial assistance under the provisions of 402(a) of the Economic Opportunity Act of 1964 (42 U.S.C. 2902(a))."

SEC. 302. (a) Section 1731 of title 38, United States Code, is amended by—

(1) inserting in subsection (a) immediately after the word "shall" the following: ", in accordance with the provisions of section 1780 of this title,";

(2) deleting subsections (b), (c), and (e) in their entirety; and

(3) redesignating subsection (d) as subsection (b).

(b) Section 1735 (hereinafter redesignated as section 1733) is amended by striking out "1737" where it appears therein and inserting in lieu thereof "1734".

SEC. 303. Subchapter II of chapter 36 of title 38, United States Code, is amended by—

(1) striking out section 1786 in its entirety and inserting in lieu thereof the following:

"§ 1786. Measurement of courses

"(a) For the purposes of this chapter, chapter 34, and chapter 35 of this title—

"(1) an institutional trade or technical course offered on a clock-hour basis below the college level, involving shop practice as an integral part thereof, shall be considered a full-time course when a minimum of thirty hours per week of attendance is required with no more than two and one-half hours of rest periods per week allowed;

"(2) an institutional course offered on a clock-hour basis below the college level in which theoretical or classroom instruction predominates shall be considered a full-time course when a minimum of twenty-five hours per week net of instruction (which may include customary intervals not to exceed ten minutes between hours of instruction) is required; and

"(3) an institutional undergraduate course offered by a college or university on a quarter- or semester-hour basis shall be considered a full-time course when a minimum of fourteen semester hours or the equivalent thereof, for which credit is granted toward a standard college degree (including those for which no credit is granted but which are required to be taken to correct an educational deficiency), is required, except that where such college or university certifies, upon the request of the Administrator, that (A) full-time tuition is charged to all undergraduate students carrying a minimum of less than fourteen such semester hours or the equivalent thereof, or (B) all undergraduate students carrying a minimum of less than fourteen such semester hours or the equivalent thereof, are considered to be pursuing a full-time course for other administrative purposes, then such an institutional undergraduate course offered by such college or university with such minimum number of such semester hours shall be considered a full-time course, but in the event such minimum number of semester hours is less than twelve semester hours or the equivalent thereof, then twelve semester hours or the equivalent thereof shall be considered a full-time course.

"(b) For the purpose of this chapter and chapter 34 of this title, an academic high school course requiring sixteen units for a full course shall be considered a full-time course when a minimum of four units per year is required. For the purpose of this subsection, a unit is defined to be not less than one hundred and twenty sixty-minute hours or their equivalent of study in any subject in one academic year.

"(c) The Administrator shall define part-time training in the case of the types of courses referred to in subsection (a), and shall define full-time and part-time training in the case of all other types of courses pursued under chapter 34 or 35 of this title."

(2) striking out section 1787 in its entirety and inserting in lieu thereof the following:

"§ 1787. Overcharges by educational institutions; discontinuance of allowances; examination of records; false or misleading statements

"Overcharges by Educational Institutions

"(a) If the Administrator finds that an educational institution has—

"(1) charged or received from any eligible veteran or person pursuing a program of education under chapter 34 or 35 of this title any amount for any course in excess of the charges for tuition and fees which such institution requires similarly circumstanced students not receiving assistance under such chapters who are enrolled in the same course to pay, or

"(2) instituted, after the effective date of section 1780 of this title, a policy or practice with respect to the payment of tuition, fees, or other charges in the case of eligible veterans and the Administrator finds that the effect of such policy or practice substantially denies to veterans the benefits of the advance and prepayment allowances under such section,

he may disapprove such educational institution for the enrollment of any eligible veteran or person not already enrolled therein under chapter 31, 34, or 35 of this title.

"Discontinuance of Allowances

"(b) The Administrator may discontinue the educational assistance allowance of any eligible veteran or person if he finds that the program of education or any course in which the eligible veteran or person is enrolled fails to meet any of the requirements of this chapter or chapter 34 or 35 of this title, or if he finds that the educational institution offering such program or course has violated any provision of this chapter or chapter 34 or 35, or fails to meet any of the requirements of such chapters.

"Examination of Records

"(c) The records and accounts of educational institutions pertaining to eligible veterans or persons who received educational assistance under chapter 31, 34, or 35 of this title shall be available for examination by duly authorized representatives of the Government.

"False or Misleading Statements

"(d) Whenever the Administrator finds that an educational claim, or that a veteran or person, with the complicity of an educational institution, has submitted such a claim, he shall make a complete report of the facts of the case to the appropriate State approving agency and, where deemed advisable, to the Attorney General of the United States for appropriate action."

SEC. 304. (a) Chapter 34 of title 38, United States Code, is amended by—

(1) striking out in section 1677(b) in the second sentence thereof all after "certification" down to the period at the end thereof and inserting in lieu thereof "as required by section 1681(e) of this title";

(2) striking out in section 1682(b)(2) the last sentence in its entirety; and

(3) striking out section 1684 and 1685 in their entirety.

(b) Chapter 35 of title 38, United States Code, is amended by—

(1) striking out sections 1733, 1734, and 1736 in their entirety;

(2) redesignating section 1735 as section 1733; and

(3) redesignating section 1737 as section 1734.

(c) The table of sections at the beginning of chapter 34 is amended by—

(1) striking out:

"1684. Measurement of courses.
"1685. Overcharges by educational institutions.";

(2) striking out:

"1687. Discontinuance of allowances.";

and inserting in lieu thereof

"WORK-STUDY PROGRAM

"1687. Work-study additional assistance allowance; advances to eligible veterans.
"1688. Repayment of Federal education loans.".

(d) The table of sections at the beginning of chapter 35 is amended by—

(1) striking out:

"1733. Measurement of courses.
"1734. Overcharges by educational institutions.
"1736. Discontinuance of allowances.";

(2) redesignating

"1735. Approval of courses."

as

"1733. Approval of courses.";

and

(3) redesignating

"1737. Specialized vocational training courses."

as

"1734. Specialized vocational training courses.".

(e) The table of sections at the beginning of chapter 36 is amended by—

(1) inserting immediately before

"1781. Limitations on educational assistance."

the following:

"1780. Payment of educational assistance allowances.";

and

(2) striking out:

"1786. Examination of records.
"1787. False and misleading statements.";

and inserting in lieu thereof

"1786. Measurements of courses.
"1787. Overcharges by educational institutions; discontinuance of allowances; examination of records; false or misleading statements.";

SEC. 305. Section 3013 of title 38, United States Code, is amended by deleting the period at the end thereof and inserting the following: "; except that the effective date of an increase in the award of subsistence allowance under chapter 31 of this title, or of educational assistance allowance or training assistance allowance under chapter 34 of this title, by reason of marriage or the birth or adoption of a child, shall be the date of such event if proof thereof is received within one year from the date of such marriage, birth, or adoption."

SEC. 306. (a) Section 501(a) of Public Law 91–230 (84 Stat. 174) is amended by striking out "Section 205(a)(3)" and inserting in lieu thereof "Section 205(b)(3)".

(b) Effective June 30, 1970, section 205(b)(3) of the National Defense Education Act of 1958 (20 U.S.C. 425(b)(3)) (as amended by subsection (a) of this section) is amended—

(1) by striking out "(A)" where it appears after "(plus interest)";

(2) by striking out "(i)", "(ii)", and "(iii)" wherever they appear therein and inserting in lieu thereof "(A)", "(B)", and "(C)", respectively; and

(3) by striking out ", and (B) shall be canceled for service after June 30, 1970, as a member of the Armed Forces of the United States at the rate of 12½ per centum of the total amount of such loan plus interest thereon for each year of consecutive service".

TITLE IV—EFFECTIVE DATE

SEC. 401. This Act shall become effective on the first day of the second calendar month following the month in which enacted.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend chapters 31, 34, 35, and 36 of title 38, United States Code, in order to make improvements in the vocational rehabilitation and educational programs under such chapters; to authorize an advance initial payment and prepayment of the educational assistance allowance to eligible veterans and persons pursuing a program of education under chapters 34 and 35 of such title; to establish a work-study program and work-study additional educational assistance allowance for certain eligible veterans; and for other purposes."

## BENEFITS TO WIVES OF MEMBERS OF THE ARMED FORCES WHO ARE MISSING IN ACTION OR PRISONERS OF WAR

The Senate proceeded to consider the bill (S. 3785) to amend title 38, United States Code, to authorize educational assistance and home loan benefits to wives of members of the Armed Forces who are missing in action or prisoners of war which had been reported from the Committee on Labor and Public Welfare with an amendment to strike out all after the enacting clause and insert:

That section 1701(a)(1) of title 38, United States Code, is amended by—

(1) striking out the word "or" at the end of subclause (i) of clause (A);

(2) striking out the period at the end of subclause (ii) of clause (A) and inserting in lieu thereof ", or"; and

(3) inserting a new subclause (iii) at the end of clause (A) to read as follows:

"(iii) at the time of application for benefits under this chapter is a member of the Armed Forces serving on active duty listed, pursuant to section 556 of title 37, United States Code, and regulations issued thereunder, by the Secretary concerned in one or more of the following categories and has been so listed for a total of more than ninety days: (A) missing in action, (B) captured in line of duty by a hostile force, or (C) forcibly detained or interned in line of duty by a foreign government or power.";

(4) striking out the word "or" at the end of clause "(B)";

(5) redesignating clause "(C)" as clause "(D)"; and

(6) inserting a new clause "(C)" to read as follows:

"(C) the wife of any member of the Armed Forces serving on active duty who, at the time of application for benefits under this chapter is listed, pursuant to section 556 of title 37, United States Code, and regulations issued thereunder, by the Secretary concerned in one or more of the following categories and has been so listed for a total of more than ninety days: (i) missing in action, (ii) captured in line of duty by a hostile force, or (iii) forcibly detained or interned in line of duty by a foreign government or power; or".

SEC. 2. Section 1711(b) of title 38, United States Code, is amended by—

(1) striking out the word "or" at the end of paragraph (1);

(2) redesignating paragraph "(2) as paragraph "(3)"; and

(3) inserting a new paragraph (2) to read as follows:

"(2) the parent or spouse from whom eligibility is derived based upon the provisions of section 1701(a)(1)(A)(iii) or 1701(a)(1)(C) of this title is no longer listed in one of the categories specified therein, or"; and

(4) striking out "1701(a)(1)(C)" in redesignated paragraph (3) and inserting in lieu thereof "1701(a)(1)(D)".

SEC. 3. Section 1712 of title 38, United States Code, is amended by—

(1) striking out "1701(a)(1)(B) or (C)" in subsection (b) and inserting in lieu thereof "1701(a)(1)(B) or (D)"; and

(2) adding at the end thereof the following new subsections:

"(f) No person made eligible by section 1701(a)(1)(C) of this title may be afforded educational assistance under this chapter beyond eight years after the date on which her spouse was listed by the Secretary concerned in one of the categories referred to in such section or the date of enactment of this subsection, whichever last occurs.

"(g) Any entitlement used by any eligible person as a result of eligibility under the provisions of section 1701(a)(1)(A)(iii) or 1701(a)(1)(C) of this title shall be deducted from any entitlement to which they may subsequently become entitled under the provisions of this chapter."

SEC. 4. Section 1720(b) of title 38, United States Code, is amended by striking out "section 1701(a)(1)(B) or (C)" and inserting in lieu thereof "section 1701(a)(1)(B), (C), or (D)".

SEC. 5. (a) Section 1801(a) of title 38, United States Code, is amended by adding a new paragraph as follows:

"(3) The term 'veteran' also includes, for purposes of home loans, the wife of any member of the Armed Forces serving on active duty who is listed, pursuant to section 556 of title 37, United States Code, and regulations issued thereunder, by the Secretary concerned in one or more of the following categories and has been so listed for a total of more than ninety days: (A) missing in action, (B) captured in line of duty by a hostile force, or (C) forcibly detained or interned in line of duty by a foreign government or power. The active duty of her husband shall be deemed to have been active duty by such wife for the purposes of this chapter. The loan eligibility of such wife under this paragraph shall be limited to one loan guaranteed or made for the acquisition of a home, and entitlement to such loan shall terminate automatically, if not used, upon receipt by such wife of official notice that her husband is no longer listed in one of the categories specified in the first sentence of this paragraph."

(b) Section 1802 of such title is amended by adding at the end thereof a new subsection as follows:

"(g) A veteran's entitlement under this chapter shall not be reduced by any entitlement used by his wife which was based upon the provisions of paragraph (3) of section 1801(a) of this title."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend title 38, United States Code, to authorize educational assistance to wives and children, and home loan benefits to wives, of members of the Armed Forces who are missing in action, captured by a hostile force, or interned by a foreign government or power."

## ASSISTANCE FOR DISABLED VETERANS

The Senate proceeded to consider the bill (H.R. 370) to amend chapter 39 of title 38, United States Code, to increase the amounts allowed for the purchase of specially equipped automobiles for disabled veterans, and to extend benefits under such chapter to certain persons on active duty which had been reported from the Committee on Labor and Public Welfare with an amendment to strike out all after the enacting clause and insert:

TITLE I—AUTOMOBILE ASSISTANCE FOR DISABLED VETERANS AND SERVICEMEN

SEC. 101. This title may be cited as the "Disabled Veterans' and Servicemen's Automobile Assistance Act of 1970".

SEC. 102. Chapter 39 of title 38, United States Code, is amended to read as follows:

"Chapter 39.—AUTOMOBILES AND ADAPTIVE EQUIPMENT FOR CERTAIN DISABLED VETERANS AND MEMBERS OF THE ARMED FORCES

"Sec.
"1901. Definitions.
"1902. Assistance for providing automobile and adaptive equipment.
"1903. Limitations on assistance.

"§ 1901. Definitions

"For purposes of this chapter—

"(1) The term 'eligible person' means—

"(A) any veteran entitled to compensation under chapter 11 of this title for any of the disabilities described in subclause (i), (ii), or

(iii) below, if the disability is the result of an injury incurred or disease contracted in or aggravated by active military, naval, or air service during World War II, the Korean conflict, or the Vietnam era; or if the disability is the result of an injury incurred or disease contracted in or aggravated by any other active military, naval, or air service performed after January 31, 1955, and the injury was incurred or the disease was contracted in line of duty as a direct result of the performance of military duty:

"(i) The loss or permanent loss of use of one or both feet;

"(ii) The loss or permanent loss of use of one or both hands;

"(iii) The permanent impairment of vision of both eyes of the following status: central visual acuity of 20/200 or less in the better eye, with corrective glasses, or central visual acuity of more than 20/200 if there is a field defect in which the peripheral field has contracted to such an extent that the widest diameter of visual field subtends an angular distance no greater than twenty degrees in the better eye; or

"(B) any member of the Armed Forces serving on active duty who is suffering from any disability described in subclause (i), (ii), or (iii) of clause (A) of this paragraph if such disability is the result of an injury incurred or disease contracted in or aggravated by active military, naval, or air service during World War II, the Korean conflict, or the Vietnam era; or if such disability is the result of an injury incurred or disease contracted in or aggravated by any other active military, naval, or air service performed after January 31, 1955, and the injury was incurred or the disease was contracted in line of duty as a direct result of the performance of military duty.

"(2) The term 'World War II' includes, in the case of any eligible person, any period of continuous service performed by him after December 31, 1946, and before July 26, 1947, if such period began before January 1, 1947.

"§ 1902. Assistance for providing automobile and adaptive equipment

"(a) The Administrator, under regulations which he shall prescribe, shall provide or assist in providing an automobile or other conveyance to each eligible person by paying the total purchase price of the automobile or other conveyance or $3,000, whichever is the lesser, to the seller from whom the eligible person is purchasing under a sales agreement between the seller and the eligible person.

"(b) The Administrator, under regulations which he shall prescribe, shall provide each eligible person the adaptive equipment deemed necessary to insure that the eligible person will be able to operate the automobile or other conveyance in a manner consistent with his own safety and the safety of others and so as to satisfy the applicable standards of licensure established by the State of his residency or other proper licensing authority.

"(c) In accordance with regulations which he shall prescribe, the Administrator shall (1) repair, replace, or reinstall adaptive equipment deemed necessary for the operation of an automobile or other conveyance acquired in accordance with the provisions of this chapter, and (2) provide, repair, replace, or reinstall such adaptive equipment for any automobile or other conveyance which an eligible person may subsequently have acquired.

"(d) If an eligible person cannot qualify to operate an automobile or other conveyance, the Administrator shall provide or assist in providing an automobile or other conveyance to such a person, as provided in subsection (a) of this section, if the automobile or other conveyance is to be operated for the eligible person by another person.

"§ 1903. Limitations on assistance

"(a) No eligible person shall be entitled to receive more than one automobile or other conveyance under the provisions of this chapter, and no payment shall be made under this chapter for the repair, maintenance, or replacement of an automobile or other conveyance.

"(b) Except as provided in subsection (d) of section 1902 of this title, no eligible person shall be provided an automobile or other conveyance under this chapter until it is established to the satisfaction of the Administrator, in accordance with regulations he shall prescribe, that the eligible person will be able to operate the automobile or other conveyance in a manner consistent with his own safety and the safety of others and will satisfy the applicable standards of licensure to operate the automobile or other conveyance established by the State of his residency or other proper licensing authority.

"(c) An eligible person shall not be entitled to adaptive equipment under this chapter for more than one automobile or other conveyance at any one time.

"(d) Adaptive equipment shall not be provided under this chapter unless it conforms to minimum standards of safety and quality prescribed by the Administrator."

TITLE II—FLIGHT TRAINING AND FARM COOPERATIVE TRAINING

SEC. 201. Section 1677 of title 38, United States Code, is amended by adding at the end thereof a new subsection as follows:

"(c)(1) In any case in which a veteran wishes to pursue a course in flight training under this section but does not possess a valid private pilot's license and has not satisfactorily completed the number of hours of flight instruction required for a private pilot's license, the Administrator is authorized to make a direct loan to such veteran to pursue the flight training required for a private pilot's license.

"(2) Loans made under this subsection may be made in any amount not exceeding $1,000 or 90 per centum of the established charges for tuition and fees which similarly circumstanced non-veterans enrolled in the same flight training course are required to pay, whichever amount is less; and such loans shall bear interest at a rate determined by the Administrator, but not to exceed 6 per centum per annum.

"(3) Loans made under this section shall be repayable in equal monthly installments over a period of time not to exceed three years commencing—

"(A) upon the failure of the eligible veteran to obtain a private pilot's license within one year after the loan is made,

"(B) upon the failure of the eligible veteran to enter upon a course of training under subsection (a) of this section within one year after obtaining a private pilot's license,

"(C) upon failure to complete satisfactorily such a course of training within eighteen months after enrollment in a course of training under subsection (a) of this section, or

"(D) one year after the veteran has completed his course of training under subsection (a) of this section.

"(4) Loans made under this section shall be made upon such other terms and conditions as may be prescribed by the Administrator."

SEC. 202. (a) Section 1682(d) of title 38, United States Code is amended to read as follows:

"(d)(1) An eligible veteran who is enrolled in a 'farm cooperative' training program which provides for institutional and on-farm training and which has been approved by the appropriate State approving agency in accordance with the provisions of paragraph (2) of this subsection shall be eligible to receive an educational assistance allowance as follows: $141 per month if he has no dependents; $167 per month if he has one dependent; $192 per month if he has two dependents; and $10 per month for each dependent in excess of two.

"(2) The State approving agency may approve a farm cooperative training course when it satisfies the following requirements:

"(A) The course combines organized group instruction in agricultural and related subjects of at least two hundred hours per year (and of at least eight hours each month) at an educational institution, with supervised work experience on a farm or other agricultural establishment; and the course provides for not less than one hundred hours of individual instruction per year, at least fifty hours of which shall be on a farm or other agricultural establishment (with at least two visits by the instructor to such farm or establishment each month). Such individual instruction shall be given by the instructor responsible for the veterans' institutional instruction and shall include instruction and home study assignments in the preparation of budgets, inventories, and statements showing the production, use on the farm, and sale of crops, livestock, and livestock products.

"(B) The course is developed with due consideration to the size and character of the farm or other agricultural establishment on which the eligible veteran will receive his supervised work experience and to the need of such eligible veteran, in the type of farming for which he is training for proficiency in planning, producing, marketing, farm mechanics, conservation of resources, food conservation, farm financing, farming management, and the keeping of farm and home accounts.

"(C) The farm or other agricultural establishment on which the veteran is to receive his supervised work experience shall be of a size and character which will permit instruction in all aspects of the management of the farm or other agricultural establishment of the type for which the eligible veteran is being trained, and will provide the eligible veteran an opportunity to apply the major portion of the farm practices taught in the group instruction part of the course.

"(D) Provision shall be made for certification by the institution and the veteran that the training offered does not repeat or duplicate training previously received by the veteran.

"(E) The institutional on-farm training meets such other fair and reasonable standards as may be established by the State approving agency."

(b) The amendments made by subsection (a) of this section shall become effective on the first day of the second calendar month following the month in which this Act is enacted; but any veteran enrolled in a farm cooperative course under section 1682(d) of title 38, United States Code, prior to such effective date may continue in such course to the end of the current academic year under the same terms and conditions that were in effect prior to the effective date of the amendments made by subsection (a) of this section.

Mr. YARBOROUGH. Mr. President, the bill that we are considering today, H.R. 370, incorporates in title II my bill, S. 3689, which establishes two new veterans' education programs which are designed to expand the benefits and opportunities for veterans to participate in flight training and farm cooperative training under the cold war GI Bill. Both of these programs are urgently needed if veterans are to have the opportunity to pursue careers in agriculture and commercial flying.

I. LOAN PROGRAM TO ASSIST VETERANS IN OBTAINING A PRIVATE PILOTS LICENSE

Mr. President, with the ever-increasing volume of air travel in the world, there is a pressing need for commercial pilots.

There are many veterans who are interested in pursuing a career in commercial aviation but are unable to finance the cost of obtaining a private pilot's license which is a necessary prerequisite to obtaining a commercial license. Under the present flight training program, a veteran can receive financial assistance in obtaining his commercial license; however, it is up to him to pay the cost of his private license. Many veterans simply cannot afford private pilot's license training. Furthermore, the high interest rates that banks presently charge make it practically impossible for a veteran to obtain a loan to pay for this training.

The bill that we have before us today will provide a way for veterans who are seriously interested in flying to finance their private pilot's training. This bill establishes a low-interest loan program, the principal features of which are:

First, a veteran wishing to pursue a course in flight training could obtain from the Veterans' Administration a direct loan in an amount not to exceed $1,000 or 90 percent of the cost of tuition and fees of a private pilot's license training program;

Second, such loans shall bear interest at the rate of 6 percent per year; and

Third, such loans shall be repayable in equal monthly installments over a period not to exceed 3 years. These payments shall commence within 1 year after the veteran obtains his private pilot's license. In the event the veteran, after receiving the loan, fails to enroll in a flight training program or fails to satisfactorily complete his training, the payments shall begin immediately.

This loan program is designed to aid the young veteran who is serious about flying. It is not a giveaway program which would encourage the taking of flight training for amusement. It is a serious decision for a young man to undertake a $1,000 obligation, and I frankly believe that only serious young men will use this program.

II. VETERANS FARM COOPERATIVE TRAINING PROGRAM

Mr. President, the second program established in title II of H.R. 370 was also part of my bill, S. 3689. This portion of the bill establishes a farm cooperative training program for veterans similar to the one created by the Korean GI bill. Instead of emphasizing only classroom work, this new program strikes a proper balance between classroom instruction and on-the-farm training and will be a more attractive and workable program than the one presently in operation.

Experience during the last few years has clearly demonstrated that the present veterans farm training program has failed to encourage young veterans to pursue a career in farming. Since the enactment of the present program in 1967, only approximately 400 veterans have taken farm training in contrast to 785,000 veterans who participated in the farm training programs provided under the World War II and Korean conflict GI bill.

The causes of the poor participation by veterans in farm training are: First, the low allowance rates, and second, the unrealistic requirements of the present program. With the passage in this Congress of H.R. 11959, as amended by the Senate, Congress made substantial progress toward eliminating the first cause by raising the allowance rates by 35 percent. However, this is only a partial solution. For this program to be successful, it is essential that the farm training program be revised to meet the needs of the young veteran who is struggling to start his farm and support his family. The present farm training program does meet these needs.

The most objectionable feature of the present farm training program is that it put too much emphasis on classroom work and not enough on actual on-the-farm training. Under the present program, a veteran is required to take a minimum of 12 classroom hours of instruction each week for 44 weeks of any 12-month period. There is no provision for on-the-farm training. It is almost impossible for a veteran who is trying to work and support his family to carry this heavy a weekly classroom workload.

To correct the objectionable features of the present veterans farm training program, this bill makes the following significant changes:

First, the classroom instruction requirement is lowered to a minimum of 200 hours per year, with a minimum of 8 classroom hours each month;

Second, the individual on-the-farm instruction which was a major part of the farm training program under the Korean conflict GI bill is reinstated. The bill would require not less than 100 hours of individual instruction each year, at least 50 hours of such shall actually be on the farm; and

Third, it eliminates the onerous requirement of the Korean program that the veterans own or control a farm to take the training.

Mr. President, this new farm training program has gained the strong support of such respected farm organizations as the National Farmers Union, the National Grange, and also is supported by the American Vocation Association and the National Vocational Agricultural Teachers Association. In addition to the support this program which I have worked for has received from these farm organizations and vocational groups, it has also received the support of State agricultural education experts in 26 States. These authorities in the field of agricultural training are all united in their belief that, first, the present farm training program is not effective; second, the farm training program that I have proposed is a practical and workable program; and third, there are many veterans who would take training under a new practical program. Mr. President, I ask unanimous consent that the letters of support I received from these State agricultural education authorities be printed in the RECORD.

Mr. President, the future of farming as a vocation in the United States is dependent on whether young men choose to make it their life's work. Unless we have strong farm-training programs such as the one before us today, farming as a family vocation is doomed to fade into history. This bill will be a great step forward toward revitalizing rural America.

In conclusion, Mr. President, I wish to commend the able junior Senator from California (Senator CRANSTON), for his work as chairman of the Veterans Affairs Subcommittee for his work on this bill. I urge all of my colleagues to give this bill their full support.

I ask unanimous consent that the attached letters from State vocational educational agencies be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF EDUCATION,
*Montgomery, Ala., July 14, 1970.*

HON. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: Thank you for your recent letter concerning your proposed Legislation for the veterans farm training program. I appreciate the opportunity to give you our views on the needs for such Legislation.

First, may I say that it has been most unfortunate that recent Legislation has been such that it has not been at all practical for our farm veterans to participate in additional programs. We feel that the rural veterans deserve a practical program and one that they can profit from just as much as those in other areas. I would also like to make the following comments concerning veterans' education:

1. Too much emphasis has been placed on classroom instruction and not enough on farm instruction. We believe that 200 hours of classroom instruction and 100 hours on farm instruction per year is sufficient for any young man who wants to farm.

2. It is a definite need for a practical farm training program of this type in Alabama.

3. I would estimate that from 10 to 15 per cent of the young men being drafted into service would enroll in the farm training program provided the requirements are practical for the situation.

4. We do not feel that the present farm training program is practical in any way, form or fashion. Too much time is required for classroom instruction and, therefore, not enough time is left for him to farm or make a living.

We all appreciate your efforts in providing Legislation for our farm veterans and you have our full support.

Sincerely yours,

T. L. FAULKNER,
*State Supervisor, Vocational Agricultural Education.*

---

DEPARTMENT OF EDUCATION,
*Sacramento, Calif., July 3, 1970.*

HON. RALPH W. YARBOROUGH,
*Chairman, Committee on Labor and Public Welfare, U.S. Senate, Washington, D.C.*

DEAR SENATOR YARBOROUGH: I have your letter of June 22 concerning the veterans' farm training program.

I concur with your judgment that the current lack of interest is a result of too much emphasis on classroom work. I also agree that there is need for a comprehensive and workable program. The present one is of no value because it is just a regular junior college or four-year college program.

I have reviewed S. 3689 and the testimony in the *Congressional Record* and believe the bill is sufficiently broad to allow us to provide practical on-the-job training in agricultural and agriculturally-related occupations. A conservative estimate of the California veterans who might participate would be 2,500 to 3,000.

If I may provide additional information or assistance, please let me know.

Sincerely your,

DONALD E. WILSON,
*Chief, Bureau of Agricultural Education.*

---

STATE BOARD FOR COMMUNITY COLLEGES AND OCCUPATIONAL EDUCATION,
*Denver, Colo., July 29, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: I appreciate your interest and concern for the veterans farm training program. In answer to your questions:

1. I believe that a program should be available for a veteran who wishes to receive training.

2. The veteran's approving is also housed with the State Board for Occupational Education and they have had about six inquiries in the past year from veterans who desire training, but none are in training.

3. I do not believe that the present program is effective because the arrangements for cooperative training were unrealistic due to too much institutional time and not enough on-the-job management training.

It is quite evident that the bill is unsatisfactory if we only have interest in the training from six veterans in Colorado.

I believe that S. 3689 will reinstate the on-the-farm training and offer a quality program.

Thank you for your support of vocational education.

Sincerely,

DARRELL ANDERSON,
*Supervisor, Agriculture Education.*

---

DEPARTMENT OF PUBLIC INSTRUCTION,
*Dover, Del., July 16, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: Responding to the questions in your letter, I have the following comments:

(1) I do feel that there is a need for a Veterans' Training Program in the agricultural field. I believe that this should cover more than production farming. As the wording of the bill does stipulate either a farm or other agricultural establishment, it is clear that this stipulation is met.

(2) I have no real basis on which to answer your second question. I do feel that there will be the possibility of organizing on a county basis, at least two, and possibly three, Veteran Training Centers, each of which should anticipate an enrollment of not less than twenty-five to thirty veterans.

(3) The present Veterans' Training Program has not been given an opportunity for any experience here in Delaware. There have been no programs operated. I do agree with you, though, that under the present legislation, the number of class hours would not have permitted satisfactory enrollments. Consequently, I feel that the present program would not be effective. My last direct contact with veterans' training programs was early in the '50's, at which time I was very much impressed with the results obtained in the several programs which I directed.

(4) A copy of the Bill, which you have sent to me, seems to cover the situation very well. I am concerned with the stipulations which you have made on page 4, lines 11, 12, and 13. I feel that these stipulations are probably excessively restrictive. I would suggest that, at least in our part of the country, agriculture has so changed that many services, without which the farms cannot operate, are being provided by off-the-farm related agricultural businesses. Many of the job opportunities for veterans, would therefore be in such of these businesses as might deal with services which the specific veteran either has experience in, or would wish to be trained in. I would, therefore, like to see the stipulations as to what would be included in the proposed instruction, broadened to provide for the types of activities which would be inherrent in related agricultural business services.

I thank you very much for your interest in this area of instruction, and hope that if I may be of further service, you will advise me as to what is needed.

Sincerely,

FREDRIC E. MYER,
*State Supervisor, Agricultural Education.*

---

DEPARTMENT OF EDUCATION,
*Tallahassee, Fla., June 29, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: This will reply to your letter of June 17, 1970 concerning the veterans farm training program.

I have discussed this matter with G. C. Norman, a member of our staff who was state supervisor of a large veterans on-the-farm training program following World War II, and the ideas expressed below represent our best judgment.

We agree with your reasoning as to why participation in the present program is small and that there is a need for the type of program described in S. 3689. As to the number of veterans who would participate in this program in Florida, we hesitate to give a definite figure. Our considered estimate is about one-thousand.

We feel that the present program is too institutionalized and that having the veteran pay the training agency out of his allowance is one of the main causes of low enrollment. We believe that it would improve your bill to spell out the amount and the manner in which the training agency will be reimbursed.

Please let me know if further assistance or information is needed from this office.

Sincerely yours,

T. L. BARRINEAU,
*Administrator, Agricultural Education.*

---

DEPARTMENT OF EDUCATION,
*Atlanta, Ga., July 20, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: May I apologize for having waited this late to answer your letter concerning the Bill which you have submitted—"S. 3689" projecting a practical farm training program for veterans. I had delayed answering in order that I might talk with the district supervisors concerning this matter.

After having discussed the matter, it is our considered opinion that your Bill does spell out a more practical type of training program for veterans interested in farming. After World War II, I worked for several years with the Veterans Farm Training Program. I am impressed that what you are spelling out in your Bill somewhat parallels what we agreed on in the program back then. We feel this is a sound approach. As a matter of fact, we feel this is the only approach to a veterans on-farm training program.

I am sorry that we are not able to give you specific information concerning demand and interest for this program in our state. We do feel there are a good number of veterans, if such a program were offered, who would be interested. We hope to make a little survey with reference to this in the better agricultural sections of our state. We definitely feel there is a need for such a program.

We thank you very much for your interest in this type of practical training for young veterans in agriculture. If we can be of service to you, please call on us.

Sincerely,

J. L. BRANCH,
*State Supervisor, Agricultural Education.*

---

DEPARTMENT OF EDUCATION,
*Honolulu, Hawaii, July 1, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: Receipt of your letter dated June 16, 1970 concerning Senate Bill 3689 is acknowledged.

We have made available through our Young Farmer Program provisions for training veterans but have not had any request for training by veterans from the Veterans' Administration Office in Honolulu.

The following are my *personal views* on your four questions:

1. There is a need for agriculture and related field training for returning veterans. The Bill should cover more than farming per se—agribusiness, ornamental horticulture farm services and supplies, and some areas of occupations in which veterans might be interested.

2. The construction and tourist industries of Hawaii have influenced both high school students and veterans to seek training in these fields. As stated earlier, there has been no request for agriculture training by the Veterans' Administration.

3. It is only six months since I took on this assignment as Program Specialist. I have no comments on this question.

4. S.B. 3689 could be strengthened by including more coverage of related fields of agriculture. The number of farmers each year is decreasing while related fields of agriculture are expanding.

The proposed elimination of the requirement that a veteran own or control the farm on which training is taken may be a boost to those who wish to farm but not meet the stipulations in the existing law.

Your interest in improving agriculture is appreciated.

With kindest regards,

Sincerely yours,

THOMAS G. HATAKEYAMA,
*Program Specialist Agricultural Education.*

---

BOARD OF VOCATIONAL EDUCATION AND REHABILITATION,
*Springfield, Ill., June 30, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: Thank you for your letter concerning the need for farm training as proposed in S. 3689.

There is a need for farm training that includes classroom instruction of 200 hours per year coupled with an individual on-farm instruction. In response to an earlier request we estimated that 1500 men would avail themselves of such a program in Illinois this year.

The present veterans farm training program is not meeting the needs of the young men on the farm which I believe has too much class work and not enough on-farm laboratory experience.

There is need for such a program that would have similar hours for off-farm agriculture training. Those young people involved in the feed, fertilizer, seed and other jobs related to farming need such practical instruction. Also statistics show that three out of four of those involved in agriculture are engaged in the off-farm jobs. They need help also.

May I compliment you for your interest in the welfare of this important segment of our economy.

Sincerely,

G. DONAVON COIL,
*Advisor, Illinois Association FFA.*

---

KANSAS STATE EDUCATION BUILDING,
*Topeka, Kans., July 2, 1970.*

RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: This is in regard to your letter of June 16 in regard to the

veterans farm training bill. I have suggested change for this bill already several times but it had no effect. Now in answer to your questions.

Number one: There is a need for a farm training program such as the one proposed in S. 3689.

Number two: In my opinion there would be two or three thousand veterans in our state who would participate in such a program as the one proposed in S. 3689. We had over 15 thousand veterans in the institutional on-farm-training program following world war II. Two years after the program was closed out 85% of the veterans were still on their farms. We considered that an excellent record.

In answer to question three: Do I believe that the present veterans farm program is effective? The answer is, "no, as we do not have a single program in operation in the state." The reason is largely because of the highly academic type of program, which requires entirely too much time in the classroom. It looks as though we didn't learn a thing from the good experience we went through in the late forty's and fifty's.

As to question four: S. 3689 looks better to me than anything I've seen proposed since the institutional on-farm-program.

Sincerely yours,

C. C. EUSTACE,
*State Supervisor, Agricultural Education.*

---

MARYLAND STATE DEPARTMENT OF EDUCATION,
*Baltimore, Md. June 26, 1970.*

Senator RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

TO THE HONORABLE SENATOR YARBOROUGH: I am very pleased to hear that you have a keen interest in improving the agricultural veterans work training program. The original bill was written so that it required, as you suggested, too much inclass training and consumed too much time of an individual for the amount of assistance he received for his efforts.

There is no doubt in my mind that there is a need for an agricultural training program for returning soldiers from Viet Nam. I personally would liked to have seen not only an aspect of farm training in agriculture, but included training for technical agriculturalists in the area of agri-business, agri-services, and horticultural endeavors.

In Maryland, we are finding keen interest of our youth in this area since employment opportunities are great in rural and semi-rural areas. This facet of agri-business and service program would be conducted very similar to the 1945 on-the-job training bill and would work most efficiently. After all, these particular people support the man who is in the process of producing our food and fiber within our country.

Whoever wrote the original bill, I believe had in mind that it would not be a successful program and as a result it did fail. The image of agriculture by some people appears to be that agriculture is a thing of the past and has very little employment significance.

As a supervisor of Vocational Agricultural Education, I can see that some of the legislation of HEW has done to many programs of vocational agriculture within many states. Perhaps these people think that other programs will feed our population in the future.

Again I repeat, I appreciate your sincere efforts and would be delighted to answer any further questions relative to this bill.

Sincerely,

GLENN W. LEWIS,
*State Supervisor of Agricultural Education.*

DEPARTMENT OF EDUCATION,
*Lansing, Mich., June 26, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: I appreciated very much receiving your letter pertaining to proposed legislation for an educational program for veterans planning to farm.

Senate Bill No. 3689 which you enclosed with your letter, is very similar to the Veterans' On-Farm Bill passed following World War II and the Korean War. We had several thousand veterans trained under this Bill and felt it was rather satisfactory.

In answer to the questions you have raised, I wish to offer the following:

1. There is a definite need for a farm training program such as the one you propose in Senate Bill No. 3689 in Michigan. It is estimated there is a need for replacements of fifteen hundred farm operators per year. The average age of our present farm operators is fifty-six and it is anticipated many of those will retire by the time they reach sixty-five or earlier. The above figures are based on the anticipated number of full-time farm operators expected in Michigan by 1980.

2. I am not certain how many veterans in Michigan would participate in the program as outlined in Senate Bill 3689, however you can see from my above statement that there is an opportunity for persons employed as farmers in Michigan. I checked with our branch of the Educational Services dealing with veterans and find that at the present time we have no veterans who are enrolled in a farm program seeking qualifications for a high school diploma. We have only twenty-one veterans who are enrolled in our community colleges under a farm program and only three of these are actually planning to farm. The other seventeen are involved in preparing for agricultural occupations other than farming.

3. I think it is obvious from the few number of veterans on agricultural training programs in Michigan that the current legislation is not effective. There are a number of reasons for this.

(a) Under the present farm training veterans are required to attend 528 hours of classroom instruction covering a period of forty-four weeks of each year. This amount of classroom instruction is not compatible with the operation of a farm and, therefore, is impossible for veterans interested to enroll in this type of a program.

(b) There is no provision for on-the-job instruction. This is an essential part of the program and under the present legislation helps to make the veterans' on-farm training program less attractive.

(c) Michigan institutions for providing veterans' training in farming are somewhat limited and the distance which veterans must travel to avail themselves of the training is quite often too great to interest them.

4. In the way of suggestions for strengthening Senate Bill No. 3689, I would like to have you consider:

(a) The need to provide finances for setting up training programs within reasonable driving distance of the veteran's farm operation in order that he may more readily participate in the program.

(b) In view of the opportunities for increasing employment in off-farm occupations, you might consider the possibility of broadening Senate Bill No. 3689 to include training in this important area.

We are very much interested in the veterans' program as it relates to agriculture and will appreciate being kept informed as to any new developments.

Sincerely,

CLIFFORD G. HASLICK,
*Acting Supervisor, Agricultural Education.*

DEPARTMENT OF AGRICULTURAL EDUCATION,
*St. Paul, Minn., July 21, 1970.*

Senator RALPH W. YARBOROUGH,
*Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: I read with interest Senate file 3689 which you introduced on April 7 to the Senate. The amendments which you suggest should make it possible for veterans to actively engage in education for farming.

Provisions for on-farm instruction and the reduction in the amount of classroom instruction required per week are two key features. The previous provision of twelve hours of classroom instruction was simply not compatible with active engagement in farming. Having taught in the I.O.F.T. program following WWII and the Korean conflict, the similar provisions which your bill provides appear to me to be highly desirable and workable in local programs.

Studies of our farm management education program have shown on-farm instruction to be of high value to the participants. Farmers consider it one of the most valuable features of instruction since it allows them to carry classroom and group instruction to the application phase on their own farm. Instructors who have attempted to operate programs with very limited on-farm instruction have, for the most part, been unsuccessful.

If veterans have not shown a high interest in the present veterans training programs for farmers, I suggest that it is not a lack of interest in education, but rather an incompatibility with the organization of the program. Several surveys in Minnesota communities have revealed large numbers of veterans (40–80 men in some counties) who are anxious to participate in programs such as those described in your bill, but have been reluctant to participate under the present provisions.

We are convinced that the form of education provided by your bill pays big dividends. Under separate cover is a copy of a USOE supported research study on the investment effects of education in agriculture. I think the benefit-cost ratio of this type of instruction is worthy of consideration.

Sincerely,

EDGAR PERSONS,
*Associate Professor, Agricultural Education Department.*

---

DEPARTMENT OF EDUCATION,
*St. Paul, Minn., June 26, 1970.*

Hon. RALPH YARBOROUGH,
*Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: Mr. Barduson has given me your letter relative to the Veterans Training Act. I will comment on the major features of your bill.

We are in agreement with your first point on lowering the classroom requirement to 200 hours per year or a minimum of 8 classroom hours per month. We heartily endorse point 2 on the reinstatement of individual on-farm instruction.

We do not agree with point 3. We feel that to be effective and avoid criticism of training more farmers than are needed, the trainee must have control of, or own the farm.

In answer to question #1, there were in Minnesota on January 1, 1969, 5,286 veterans wanting farm cooperative training. We have one program in operation, with 2 others approved. The only limiting factor is the lack of qualified teaching personnel. I am enclosing a copy of a report compiled by the late G. R. Cochran, State Supervisor, Agriculture Education, which answers questions 1 and 2.

I submit the following in answer to question 3. First, we do not feel the program is effective because of the unrealistic classroom requirements, the lack of supervised

on-farm instruction which is the guts of any program of vocational education in agriculture. Another lack of effectiveness is that the program does not require farm management records and a business analysis and, this is not a comprehensive program.

With these changes, I would heartily endorse the immediate passage of 3689.

Our Minnesota Ag Unit and Mr. Robert Van Tries, Assistant Commissioner, have worked hard with our own Minnesota people involved and have met several times with our Minnesota Congressmen in Washington on this very matter. Thus we sincerely appreciate your efforts.

My sincere thanks to you and your co-colleagues for sponsoring this important and much needed legislation. If additional information is needed, we shall attempt to supply it.

Sincerely,

PAUL M. DAY,
*State Supervisor, Agriculture Education.*

---

FARM COOPERATIVE TRAINING

*1. Minnesota has a potential of 5,286+ veterans that want farm cooperative training as soon as the law is modified to permit a workable program.

2. The Alexandria Area Vocational-Technical School now has 23 students enrolled in an operating program.

*3. We have specific requests from 11 other schools with enrollments of 35+ veterans in each school.

4. Farmers are older today in proportion to 10 years ago. Therefore, training replacements today is more urgent than it was during the Korean War.

5. Veterans with entitlement who wish to farm (backbone of free enterprise) should have the opportunity of participating in an effective, workable program of class, laboratory and on-farm instruction.

*6. An effective "on-the-farm training" program could be modeled after the proven and successful Minnesota Farm Management Program that has been in operation for over 10 years and the U.S. Office of Education uses it as the model for the Nation. This is a combination of class, group and individual on-farm instruction.

*7. Earlier veterans farm training programs were successful. A comprehensive study was made of 2,286 Korean veterans enrolled for 2 years in 1954–56. This study concerned itself with *tenure, financial status,* and *social outcomes* of the I.O.F.T. program under Public Law 550. In 1960 a follow-up study of 3,179 veterans was made of those who completed I.O.F. training. These studies indicate the following significant:

(1) *83.77%* of trainees were farming in 1960.

(2) *3.4%* were in agriculture related occupations.

(3) The gain in net worth from 1954 to 1956 was from *$15,183.00* to *$24,106.00,* a gain of *58.7%*. (per farm)

(4) The gain in farm capital from 1954 to 1956 was from *$18,676.00* to *$28,693.00*. (per farm)

(5) The veterans indicated in many instances that their training was responsible for their rapid financial progress.

(6) These studies show that there is a real financial return from farm training and that the trainees remain in the occupation.

(7) One of the many favorable social outcomes was that the veterans gained a favorable impression of the value of an education and became better supporters of education for their children.

STATE DEPARTMENT OF EDUCATION,
*Jefferson City, Mo., June 25, 1970.*

Sen. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: I received your letter of June 16 relative to the Farm Veterans Training Program. Let me express to you our sincere appreciation for the interest which you have in and the work which you have done to develop a workable and a sound program for the farm veterans who have returned and who will be returning from the Vietnam War.

The three provisions which you have mentioned in your letter which are included in Senate Bill 3689 would certainly provide for a sound educational program for the farm veterans. The law under which these programs are now operated limits the attendance by virtue of the twelve hours per week in class requirement. It is impossible to develop an effective program without on-farm supervision and instruction.

I am sure that those of us in Missouri who have worked with a farm training program and who are now working in the field of vocational agriculture would agree that it should not be necessary for the veteran to own or have the farm under his control for him to benefit from the program. We would, of course, hope most of these men would have the opportunity to manage their own operation but feel sure this may be physically impossible in some cases.

The bill which you have introduced would certainly receive support from the vocational agriculture people in Missouri and I am sure it would receive the support of all agricultural people in the AVA. We would be glad to support this bill and certainly hope it receives the attention of the entire Congress.

Very truly yours,

CARL M. HUMPHREY,
*Director, Agricultural Education.*

OFFICE OF THE STATE SUPERINTENDENT,
*Helena, Mont., July 1, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: Your letter about your efforts to improve the lot of the veteran who is interested in agricultural education is appreciated. I hope the legislation you are sponsoring will become a law. For too long the young man who would like to enter the field of agriculture has been discriminated against in his efforts to obtain equal training opportunity with the veteran who goes on to college or into other types of training.

To be eligible the requirements under the present law of farm ownership or control, an unrealistic number of classroom hours of instruction which is virtually the same as for full time college training makes it completely impractical for these young men to get into a training program.

The veteran who may inquire is told of the requirements and he immediately sees how impossible the prospects are.

There is, I believe, a need for this type of training program in Montana as I've had a number of inquiries from veterans. The V.A. regional office at Fort Harrison indicates their enquiries have been relatively few and attribute this to the unrealistic eligibility requirements.

If the program would be closely patterned after the IOFT program following WWII I would expect several hundred trainees to be enrolled.

The present program is completely ineffective.

As I read S. 3689 it would overcome the objections to the present law, many veterans would be eligible for a realistic training program, and many of the present inequities would be remedied.

Thank you, Senator, for your efforts on behalf of veterans and agriculture education.

Sincerely,

BASIL C. ASHCRAFT,
*Supervisor, Agriculture Education.*

---

DEPARTMENT OF EDUCATION,
*Lincoln, Nebr., July 2, 1970.*

Hon. RALPH YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: Your letter and information concerning the Veterans' On-farm program was received on June 29, and in reply to your questions, the following statements have been prepared.

1. There is a need for the farm training program such as you have proposed in S–3689.

2. How many veterans would participate? We have 8,608 veterans from the Vietnam war in agricultural employment here in Nebraska. The discharge rate is about 4,000 per year for Nebraska. It has been estimated that approximately 8% of our labor force here in Nebraska is composed of Vietnam veterans. A sizable percent of these would be young men hoping and planning to farm or ranch.

3. The present Farm Veterans' program is not practical in terms of time requirements. It lacks flexibility and creates hardships during certain times of the year.

4. S–3689 would be satisfactory as written and an improvement over the present plan, and would aid in followup and instruction geared to the individual needs.

Sincerely,

B. E. GINGERY,
*Administrative Director Agricultural Education.*

---

DEPARTMENT OF EDUCATION,
*Trenton, N.J., July 28, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate, Washington, D.C.*

MY DEAR SENATOR YARBOROUGH: Thank you for seeking my opinion on Senate Bill 3689.

I shall give you my personal opinions. I have also spoken to two of my excellent instructors and suggested that they also write to you. Both are World War II veterans and both taught veteran classes under P.L. 346. Mr. Louis Gombosi and Mr. John Stump, both of Newton, can give you a viewpoint from the instructors stand point as well as a veterans'.

I am in complete agreement with you. A full college program would indeed take so much of the trainees time that full time active participation in farm management and operations would be impossible. Most of the agricultural college graduates in New Jersey do not return to farming.

What is true in New Jersey is true in other States as evidenced by their testimony.

After World War II hundreds of students were enrolled in G.I. "Institutional on the Farm Training". It was impossible to get enough certified agricultural instructors. Retired *successful* farmers were employed as teachers' aids to help with visitation and individual on farm instruction. They attended all classes so that they were informed and participated in class discussions.

These older *successful* men contributed stability to the young and impetuous recently released veterans. Two of my aids were directors in their local bank and knew farm finance and credit. Others were connected with Production Credit. In some cases it was almost a father and son relationship.

The World War II G.I. Bill (P.L. 346) was good legislation—it worked and produced results. Its greatest fault was many veterans became farm owners before they were enrolled for training. We could have helped them to secure better farms or a better price had we been permitted to help them before they became owners. Some acquired poor farms.

Being from New Jersey, the most populous state, I cannot close without saying "Farm Training" should be interpreted to include agricultural education in a broad sense. Nursery work, floriculture, recreational conservation and other agriculturally related jobs should be covered in the new bill.

I hope I have contributed to your efforts and look forward to your success.

Respectfully yours,

GEORGE W. LANGE,
*Director, Agricultural Education.*

P.S.—I am sorry that you had to wait so long for my reply, but this is a one-man operation (we are understaffed), and your letter arrived at the end of the fiscal year approvals.

---

THE STATE EDUCATION DEPARTMENT,
*Albany, N.Y., June 29, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: This is to answer your recent letter addressed to Dr. Noakes, Chief of this bureau. As I have been delegated the direct responsibility for adult programs in agriculture, I will try to answer your letter to the best of my ability.

To answer your questions directly:

1. We definitely believe there is a need for such a program as proposed in S–3689.

2. It is only an opinion, but I believe there would be in the neighborhood of 200 to 500 young men interested in such a training program in this state. This admittedly is considerable less than were enrolled for the on farm program following World War 2, but I believe it is realistic.

3. We believe that the present veterans farm training program is completely ineffective. To our knowledge, not a single person is enrolled in any such program in this state and we have no indication that any will be started. Two years ago we had a number of inquiries regarding such courses but apparently the current program fails completely to meet the needs of this group. We have had no inquiries whatsoever for such a program for at least a year. None of our teachers of agriculture are interested in participating under the current law.

4. I have one very definite opinion as to how S–3689 could be strengthened. I taught a full-time advanced veteran class for two years and the beginning class part-time for two years following World War 2. While the results were excellent, there was general agreement by all concerned that time requirements were excessive and resulted in a considerable waste of time and money. My suggestion would be that the time allocation for on-farm instruction be made quite flexible. Some veterans need considerable such instruction and some need relatively little. I see no objection to a maximum and minimum, but it is unrealistic to think that each person has the same needs. I know of no reason why the allowance to the veterans could not be made flexible on the basis of his actual hours of instruction both class and individual. I do add that it is our belief that on-farm instruction is most important as a part of this course and support wholeheartedly your view that ownership of a farm should not be a requirement for enrollment.

It is most gratifying to know that you have such an active interest in the welfare of these young men. So far, we have seen very little concern for them.

Furthermore, I again express what I am sure is the feeling of all vocational teachers, the very great appreciation for the continued active support you have given all phases of vocational education.

Sincerely,

FRANK T. VAUGHN,
*Associate in Agricultural Education.*

---

DEPARTMENT OF EDUCATION,
*Santa Fe, N. Mex., June 30, 1970.*

Sen. RALPH W. YARBOROUGH,
*U.S. Senate, Washington, D.C.*

DEAR SENATOR YARBOROUGH: This will acknowledge receipt of your letter in regard to my opinion of Senate Bill 3689.

(1) in sparsely populated areas like New Mexico there is not enough concentration of trainees in one area to warrant a class for farm training, unless there were two or more in an area in which we had a Vocational Agriculture Department where the teacher could spend extra time in the training program at night, after school and on Saturday. I think the amendments to the act are an improvement in the program and will make it more practical than it was before.

(2) we would possibly have somewhere in the neighborhood of 150 to 200 students in New Mexico who would participate in such a program in which they would not have to own or operate the farm or ranch, but could have a cooperative work agreement for placement on a farm or ranch.

(3) the present farm training program is so rigid in the number of hours that have to be spent in the institutional classroom that a trainee could not work on a farm and make a living as we would like for them to do.

(4) I think you have done an excellent job of improving the Veterans Farm Training Program through the amendments in Senate Bill 3689. I hope that you will be able to get the amendments passed in this session of Congress.

I was really shocked to hear of the death of your friend and my friend, George Hurt, longtime Vocational Agriculture Educator from Texas.

Sincerely yours,

L. C. DALTON, *State Supervisor,*
*Agriculture Education.*

DEPARTMENT OF PUBLIC INSTRUCTION,
*Raleigh, N.C., July 7, 1970.*

Hon. RALPH W. YARBOROUGH,
*Senator, U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: I have your recent letter relative to the Veterans Farm Training Program. May I say in the beginning I appreciate your interest and efforts in behalf of this program.

Listed below are the questions which you raised and my answers based upon observations and visits with teachers of agriculture and others concerned with the program.

Question: Do you think there is a need for a training program such as the one proposed in S. 3689?

Answer: I feel there is a definite need for this type program. Many veterans in North Carolina have expressed an interest and desire an opportunity to enroll in a program of this nature. Unfortunately, at the present time we have only four schools conducting a program.

Question: In your opinion, how many veterans in your state would participate in a program such as the one proposed in S. 3689?

Answer: Soon after Public Law 90–77 was enacted, we conducted a survey among the teachers of agriculture in the State to determine the possible number of eligible veterans who might be interested in enrolling in the program. Information which we received indicated there might be approximately 3000 eligible and interested veterans. We have not conducted a more recent survey; therefore, we are not familiar as to what the situation is at this time.

Question: Do you feel that the present veterans farm training program is effective? If not, could you explain why.

Answer: I do not feel that the present program is designed to be as effective as it could be for those eligible, or those enrolled. The requirements that an enrollee must attain class for a minimum of twelve hours per week is the major problem. Also no provision is made in Public Law 90–77 for on-the-job instruction which is contrary to our philosophy in vocational education. I think the provisions contained in S. 3689 will make a much more effective program and will involve many times as many veterans as are currently enrolled.

Question: Do you have any suggestions as to how S. 3689 can be strengthened or do you have any criticism of it?

Answer: It appears to me that S. 3689 will provide for an effective program. I do not have any criticism of its provisions.

I trust that something will be done in the near future to change the program so that more veterans will take advantage of this opportunity.

Again, your interest and efforts are appreciated.

Sincerely,

V. B. HAIRR,
*Chief Consultant Occupational Programs.*

---

DEPARTMENT OF PUBLIC INSTRUCTION,
*Harrisburg, Pa., June 25, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: Your letter of June 16, 1970, with Bill S. 3689 and the Congressional Record of April 7, 1970, reached me today.

I thank you for sending this material to me and for drawing the whole matter to my attention. Pennsylvania had tremendous success with Institutional On-Farm Training following World War II. We were most proud of what we had accomplished.

I am going to write you again after I have had a chance to study S. 3689. At that time I will answer the four questions which you have raised.

The present veterans farm training program in our state is not as effective as it used to be. The biggest reason for this has been that the program was taken completely out of the hands of Vocational Agriculture.

Sincerely yours,

JAMES C. FINK,
*State Supervisor,*
*Agricultural Education.*

---

DIVISION OF VOCATIONAL AND TECHNICAL EDUCATION,
*Pierre, S. Dak., June 30, 1970*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR: I very much appreciate your letter concerning Senate Bill 3689 whereby it is the intent to provide on-farm instruction as well as classroom instruction for veterans who wish to take this type of training.

I am convinced that in South Dakota this would mean a greater number of veterans would be able to take and benefit by this instruction who otherwise cannot find the time to do so. It is my opinion that about 1,000 veterans would take advantage of the opportunity. This is an estimate of about 25 per class with about forty programs.

The problem with the present farm training program is that these are young men who are getting established in farming and cannot find the means or time to devote to twelve hours classroom instruction per week and still operate the farm efficiently.

I am in agreement that Senate Bill 3689 would do much to make the program more popular and beneficial. Thank you again for your interest in Vocational Agriculture.

Sincerely yours,

E. W. GUSTAFSON,
*State Supervisor, Agricultural Education.*

---

DEPARTMENT OF EDUCATION,
*Montpelier, Vt., July 6, 1970.*

Hon. RALPH W. YARBOROUGH,
*Member of the Senate,*
*Washington, D.C.*

MY DEAR MR. YARBOROUGH: I wish to thank you for your recent letter and concur with your statements therein. The people in Agriculture Education have been trying for a number of years to have the laws changed or amended to allow veterans farm training programs. What is needed is a program similar to the one established after the Korean War.

I understand in the present G.I. bill a veteran must sign up with an on-going program. I do not believe any state has a program in Agriculture Education in operation that will allow veterans to pursue a career in agriculture and continue his present job status.

I commend you for your stand in this regard and urge you to continue to have the present law changed or amended.

I have had a few requests for Veteran Farm-Training Programs for Vermont. Undoubtedly several others would be interested if the program could be offered similar to the one after the Korean War.

Sincerely yours,

JULIAN M. CARTER,
*State Consultant, Agricultural Education.*

---

STATE BOARD OF EDUCATION,
*Richmond, Va., July 6, 1970.*

Hon. RALPH YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR MR. YARBOROUGH: Thank you for your letter of June 16 and a copy of Senate Bill S. 3689 relating to the Veterans Farm Cooperative Training Program.

We, too, have been disturbed by the lack of participation of veterans in the farm cooperative training program. We also believe that the lack of interest in the present program is due primarily to the great amount of emphasis placed on classroom work and not enough on actual on-farm instruction. We believe there will be more intrest in the program as you have outlined in the provisions of S. 3689.

We, therefore, hope to give you our responses to the four questions asked in your letter.

1. Yes—We believe that the program proposed in S. 3689 will provide much more flexibility to the program. We particularly like the provision for minimum monthly requirements rather than weekly. Under the old bill the required hours of instruction by the week made it difficult for young farmers to carry on a farming program and meet the minimum requirements for weekly class instructions.

2. In our opinion, a large number of veterans in our state, perhaps 1,000, would participate in the farm training program if appropriate modifications are made as proposed in S 3689.

3. As stated above we do not believe that the present veterans farm training program is effective. The main reason being the twelve hours requirement per week for classroom instruction.

4. We believe that the farm training program proposed in S 3689 is a good one. The main problem as we see it is the need for sufficient number of veterans to be enrolled in order to justify the employment of a full-time instructor. This will not be a problem in localities having a large number of veterans interested in the cooperative farm training program. It may be a problem in localities where there are only a few interested veterans.

We greatly appreciate the interest and support you have given to the veterans training program. Kindly let us know if we can be of further assistance to you.

Sincerely yours,

JULIAN M. CAMPBELL,
*Supervisor, Agricultural Education.*

---

COORDINATING COUNCIL FOR OCCUPATIONAL EDUCATION,
*Olympia, Wash., June 30, 1970.*

Hon. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: Thank you for your interest in agriculture. Those of us who work in the field of agriculture truly appreciate the support, work and efforts that people like yourself devote to our business.

In response to your letter of June 16 pertaining to veterans training programs in agriculture, I have consulted the Director of our Veterans program and obtained the policies which it operates under in the State of Washington. Your first question pertaining to need for farm training programs could be answered, I think, by saying yes. At the present time we do not have anyone enrolled in such a program and I feel the main reason is because of the nature of the policy regulating this type of activity. If you will note page 3 of the materials that I am including, you will see that it states the veteran must be directly involved with agriculture which relates to cultivating the soil. This is only a small part of agriculture today, and for a program to be successful it must include agribusiness and let farm experience be replaced by an approved agribusiness establishment. In our vocational agriculture secondary program we are witnessing good growth in the agribusiness area. Our program would be "dead on the vine" if we still had it related only to the farm. I would encourage you to work towards getting changes made in this part of the control of this program.

I think your proposal for S. 3689 is a good one and is heading in the right direction. I would give my support for it.

I will look forward to hearing more about changes that take place in relation to the veterans' program. Best wishes.

Sincerely,

JAY WOOD,
*Program Director, Agricultural Education.*

---

BOARD OF VOCATIONAL, TECHNICAL AND ADULT EDUCATION,
*Madison, Wis., June 29, 1970.*

Senator RALPH W. YARBOROUGH,
*Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: Mr. Aebischer referred your letter to me. I am Chairman of the Committee on Veteran Farm Training so far as the National Association of Vocational Agriculture Teachers is concerned.

Your thinking that veterans are not receiving a realistic type of training is shared by myself. We do not have a large number participating in the program which has been initiated in Wisconsin. Although two of these programs are in existence, we expect to be operating in three additional districts by January 1, 1970.

Difficulties encountered in trying to initiate a program under the current law include a lack of interest on the part of veterans in attending class 12 hours a week. There is also difficulty in hiring competent instructors. It requires a great deal more finesse to conduct a 528 hour per year program than it does to conduct a 200 hour per year program of classroom instruction. For this reason we have gone so far as to hire men with a PhD degree to offer courses in sufficient depth to attract veterans.

There are concerns regarding your proposed bill. While I am very much in favor of this bill, and have supported a similar proposal for the last several years, it is expensive. I am not sure how many districts could afford the cost of hiring one instructor to offer 50 hours of individual on-the-farm instruction per trainee per year. This would probably mean 30–35 enrollees in this person's class. We have a program involving on-the-farm instruction, however we say the instructors should enroll a maximum of 90 people and offer considerable less on-the-farm instruction. Probably an additional factor must be considered in developing support for this bill from administrators. The Veterans Administration will of necessity need to subsidize the instructor's salary in order to develop enthusiasm among administrators for initiating such a program. It costs us approximately $14,000 per year, in addition to mileage, to employ one instructor. If the mileage is figured at $1,000 we would have a training program costing $15,000 for 35 farmers. This cost per enrollee is not out of line, however our formula for reimbursement of costs to districts would make this program more expensive than if a district hired a man to teach in a classroom. Our reimbursement policy is such that we reimburse for individual on-the-farm instruction at a rate of 10 hours for one hour of instruction. It requires 620 hours to equal one full-time student equivalency. We would reimburse at the rate of approximately $175 for this one full-time student equivalency. If an instructor teaches one student in a class for 22.5 hours per week for two semesters, 34 weeks, it is counted as a full-time student equivalent and because it is full-time training the reimbursement from state funds is approximately $350.

I believe there is a need for farm training such as the one proposed in S. 3689. My basis for believing there is a need is based on the rapidity with which our full-time young and adult farmer program is growing in Wisconsin. We have hired as many men as were qualified and who indicated an interest in teaching in this program the last two years. Our teaching staff has gone from 23 to

about 45. Our enrollment increased from 1,300 to 2,400 and we expect it to be nearly 3,500 during the 1970–71 school year. Our program does not require nearly as much classroom instruction, but it does indicate that farmers are interested in improving their education.

My estimate of veterans in the state who would participate in the program such as the one proposed in S. 3689 is possibly more valid than it was a year ago. I believe the number would be somewhere between 900 and 1000. This is based on the number who have enrolled in our programs, the number the veterans services officers have indicated were veterans, and the number who have indicated an interest in enrolling in programs yet to be established.

The present Veteran's Farm Training program is effective. The veterans who are enrolled in it indicate enthusiasm for this type of training, however it is difficult to sell this program to many veterans. For example, we have 83 veterans enrolled in District 3. During the early talking stages of this program the Veterans Service Officers estimated there were at least 150 veterans who would avail themselves to this type of training. Either the veterans were not interested in this training, or the veterans simply did not exist in the community. Their reason for non-existence may very well have been due to off farm migration.

The present S. 3689 could be strengthened by a provision for subsidizing the instructor's salary. I believe this made the training program after World War II effective. The instructors were paid a flat salary, and were encouraged to maintain relatively low enrollments per instructor. This allowed the instructor to spend considerable time in individual on-the-farm instruction. The Korean conflict veterans paid their instructor's salary out of their benefits. Speaking only for Wisconsin, this is not possible under our Vocational laws. We cannot charge excess registration fees. Our only charges above a standard registration fee are for consumable materials. For this reason a veteran may enroll for 528 hours of classroom instruction at the very modest figure of $10 per year.

Please keep me informed as to the progress of this bill. In my travels throughout Wisconsin, I have seen much benefit from the World War II bill and the Korean bill. Agriculture is our largest income producer in Wisconsin, and it is my hope we can keep it viable for many years to come.

I, and I am sure I speak for the rest of the committee, very much appreciate your efforts on our behalf.

Sincerely,

DOYLE BEYL,
*Supervisor, Vocational Agriculture.*

---

WYOMING STATE APPROVAL AGENCY,
*July 7, 1970.*

Sen. RALPH W. YARBOROUGH,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR YARBOROUGH: Following are answers to questions in your letter of June 16, 1970, to Mr. Percy Kirk, State Director, Agricultural Education:

(1) Yes, there is a need for farm training programs as proposed in S. 3689.

(2) I have been in this position since December of 1969 and there has been only one veteran who participated in the farm cooperative training program.

(3) No, I do not feel this training program is effective. It might be helpful to have a provision to pay instructors for night classes. This might alleviate getting to day classes for the trainee and the instructor could adapt advanced courses that might not fit his regular day time students. Also, I wonder if it is pointed out to the returning veteran the availability of this particular program upon release from the armed service.

(4) See Number 3 above.

Very truly yours,

LYLE S. MCIRVIN,
*Consultant, Veterans Education.*

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read: "An act to amend chapter 39 of title 38, United States Code, to increase the amount allowed for the purchase of specially equipped automobiles for disabled veterans, to extend benefits under such chapter to certain persons on active duty and to Vietnam era veterans, and to provide for provision and replacement of adaptive equipment and continuing repair, maintenance, and installation thereof, and to amend chapter 34 of such title to authorize the Administrator of Veterans' Affairs to make loans to veterans to help meet the expenses of obtaining a private pilot's license where such veterans intend to pursue a flight training program under such chapter, and to improve the farm cooperative training program authorized under such chapter, and for other purposes."

## NATIONAL CLOWN WEEK

Mr. MANSFIELD. Mr. President, I understand it is appropriate at this time to call up Calendar No. 1133, House Joint Resolution 236, having to do with the designation of the week of August 1 through August 7 as "National Clown Week."

I ask unanimous consent that the Senate proceed to the consideration of the joint resolution.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The LEGISLATIVE CLERK. A joint resolution (H.J. Res. 236) authorizing and requesting the President of the United States to issue a proclamation designating the week of August 1 through August 7 as "National Clown Week."

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the joint resolution, which had been reported from the Committee on the Judiciary with an amendment: On page 1, line 5, after "August 7,", insert "1971".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The joint resolution is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the joint resolution.

The amendment was ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution (H.J. Res. 236) was read the third time and passed.

The title was amended, so as to read: "Joint resolution authorizing and requesting the President of the United States to issue a proclamation designating the week of August 1 through August 7, 1971 as 'National Clown Week'."

Mr. MANSFIELD. Mr. President, I thank the Senate for the consideration of the measures on the calendar and I thank the Senator from Indiana for his understanding.

## CLOTURE MOTION

Mr. MANSFIELD. Mr. President, I send to the desk a cloture motion and ask that it be read.

The PRESIDING OFFICER. Under rule XXII, the clerk will state the motion.

The legislative clerk read the cloture motion, as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close the debate upon the pending resolution of the Senator from Indiana (Mr. BAYH)—proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States.

Mike Mansfield, Clifford P. Case, Charles McC. Mathias, Jr., Charles H. Percy, Edmund S. Muskie, George D. Aiken, Lee Metcalf, Walter F. Mondale, Edward M. Kennedy, Joseph D. Tydings, William Proxmire, Birch Bayh, Hugh Scott, Philip A. Hart, Fred Harris, Richard S. Schweiker, Mike Gravel.

Mr. MANSFIELD. Mr. President, for the information of the Senate, and especially the Democratic Members of the Senate, it is the intention of the majority leader to send out telegrams today to all Democratic Members and to ask them to be present at 1 o'clock on Tuesday. Hopefully, they will be here on Monday as well. This will be a telltale vote.

I think that every Member of the Senate, regardless of their feelings on this subject, should be on hand. Every Mem of the Senate on this side of the aisle will be notified and hopefully, unless they are physically incapacitated, will be present at that time to vote on this momentous occasion.

Mr. SCOTT. Mr. President, if the Senator will yield, I will undertake to notify, either by wire or by inside mail, all Senators of the pendency of the vote on cloture at 1 o'clock next Tuesday.

## ORDER OF BUSINESS

Mr. SCOTT. Mr. President, may I inquire of the distinguished majority leader what he has in mind with respect to the business before the Senate following the vote on cloture.

Mr. MANSFIELD. Mr. President, we have a number of matters which will be taken up, but the decision on what to do following the vote on cloture will not be made until after the vote is announced. At that time I intend to consult with the distinguished minority leader, so that an agreed upon course of action may be adopted.

Mr. SCOTT. Mr. President, I thank the Senator.

Mr. BAYH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAYH. Mr. President, according to the rules of the Senate, after the cloture vote is taken perhaps it would be helpful to the Senate to define the rules at this time as to what happens if the vote succeeds and what happens if the vote fails as far as the pending order of business is concerned.

The PRESIDING OFFICER. If the cloture vote succeeds, the Senate will then proceed under the cloture rule. If the cloture motion fails, it will then be up to the Senate to decide what it wants to do relative to the resolution.

## ORDER FOR PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, to clear the record, I ask unanimous consent that, at the conclusion of the 15 minutes allocated to the distinguished Senator from Pennsylvania—and he shall have the full 15 minutes if he needs it—there be a period for the transaction of routine morning business with a time limitation on statements not to exceed 3 minutes on each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH. Mr. President, I do not wish to detract from the statement of the Senator from Pennsylvania or to diminish his time, but from the standpoint of consistency the Senator from Indiana would like to observe that the majority leader had suggested to the Senator from Indiana before the session that certain items on the unanimous-consent calendar were going to be considered. I think inasmuch as the Senator from Indiana only yesterday prohibited the consideration of other business, I should make the record unequivocally clear that the Senator from Indiana is not trying to play favorites or discriminate against some of his colleagues. For a clear distinction can be made between legislation that has the unanimous consent of the Senate and the general agreement of all parties, and on which there would be no debate under the Senate rules. The Senator from Indiana feels we should dispose of the pending order of business. That is why I did not object to the request of the Senator from Montana.

I thank the Senator for yielding.

## SOCIAL SECURITY AMENDMENTS OF 1970—AMENDMENT

AMENDMENT NO. 949

Mr. SCHWEIKER. Mr. President, I submit an amendment to H.R. 17550, a bill to amend the Social Security Act to provide increases in benefits, to improve computation methods, and to raise the earnings base under the old-age, survivors, and disability insurance system, and for other purposes, and ask that it be appropriately referred.

The PRESIDING OFFICER. The amendment will be received and printed, and will be appropriately referred.

The amendment was referred to the Committee on Finance.

Mr. SCHWEIKER. Mr. President, I have long felt that our social security system should be reformed, and an amendment be added which would give an exemption from the social security employment tax on wages for religious groups opposed to insurance.

I cite the Amish as an example of people who desire and should be afforded this social security exemption.

In 1965, the first form of relief was granted the Amish. Although the Internal Revenue Code was amended to provide an exemption from self-employment tax, if a person could show he is a member of a recognized religious sect which follows the practice of making provisions for its dependent members; I now ask that this exemption be extended from self-employment tax to those who work for others and oppose for religious reasons, payment of social security employment tax on wages.

As part of their religion, the Amish refuse any form of relief or what they call government handouts. They oppose all forms of social security, including old-age pensions.

Regarding it not as a tax but rather as a policy premium in a national insurance system, the Amish are opposed to participation, because of their conscientious objection to all forms of insurance. This belief is embodied in the Dordrecht confessions, which predates our Constitution. Its doctrine of the church as the visible communion of the saints may be taken as the implicit ground for rejection of insurance in the sense that the Congregation of God's people are expected to live by faith and trust in providence. Otherwise it counsels obedience to the state which is why the Amish have no objection to the payment of taxes.

Forcing people such as the Amish to pay tax which is a form of insurance, directly opposed by the tenets of their faith is an impingement on the religious rights of any group, no matter how small.

It is difficult for me to understand why we have not been ready to permit religious groups to conscientiously object to economic regulations when we rightfully recognize their right to object to the military service.

I feel strongly that this Government must not ride roughshod over the religious rights of a minority. Such is the case under present law.

In 1961, the Federal Government seized three horses belonging to an Amish farmer in Pennsylvania and sold them at public auction to obtain money for social security payments which the man refused to make because of his religious convictions.

It was about this time that I began my effort to assist the Amish people to get relief for participating in the social security program to which they are opposed on religious grounds. In 1961 and again in 1963, I introduced a bill in the House which would have provided an exemption from participation in the Federal old-age and survivors insurance program for those whose religious doctrines forbid participation in such a program.

In 1964, there was social security legislation in Congress. Since the House was operating under a closed rule, I was unable to introduce an amendment to the 1964 social security law. However, the Senate version of the bill contained such an amendment. The House-Senate conference committee then had to decide whether to use the House version of the bill which had no provision for the Amish exemption or the Senate version which included the Senate amendment. I wrote letters to all Congressmen and personally talked to the House members of the conference committee, urging them to accept the Senate version for the Amish. Fortunately, the Treasury Department as well as the Justice Department rendered legal opinions saying that the old order Amish exemption met all constitutional requirements and was a matter of legislative policy.

Finally, the conferees agreed to accept the Senate Amish amendment for which I was very pleased.

Unfortunately, the bill died in the conference committee because of the dispute over medicare. It did, however, lay the groundwork for the first relief granted to the Amish.

On July 30, 1965, Congress amended the Internal Revenue Code allowing a person to apply for exemption from self-employment tax if he is a member of a recognized religious sect which follows the practice of making reasonable provision for its dependent members.

We must now take this one step further. I ask that we extend the provision allowing an exemption from social security tax on wages, when they work for others, not just from self-employment tax for those religiously opposed to insurance.

Specifically, my amendment provides that any member of a recognized religious sect—and there are other sects which have the same objection, such as the Amish, which I might mention specifically—in existence since at least 1950, who can show that he is an adherent of established teachings which cause him to be conscientiously opposed to acceptance of social security benefits, may file an application to waive such benefits and be exempt from social security tax.

The applicant would submit evidence to substantiate his membership in the sect and his adherence to its teachings, and would be asked to show that it has been the practice of the sect to make provision for the care of its elderly or dependent members.

In addition, the employer would continue to pay into the social security fund. Thus, eliminating any chance that such an amendment would make one employee more desirable than another. The objective here obviously, is not to make one group of people more desirable employees than another, but instead to assist those who object to social security coverage because it directly

opposes the basic religious tenets of their faith. Since the employer would continue to pay into the social security fund, the exempted employee would offer no financial advantage over the nonexempted employee.

In this way my amendment would not discriminate against one person or another and make it more advantageous for one employer to hire one person as against another employee.

I ask unanimous consent that this amendment be printed in the RECORD and that additional material regarding the beliefs of the Amish people on social security and a letter I received in 1965 from the Treasury Department on the constitutionality of this exemption be printed at this point in the RECORD.

There being no objection, the amendment and material were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 949

On page 73, after line 22, insert the following:

"EXEMPTION FROM TAX ON WAGES FOR RELIGIOUS GROUPS OPPOSED TO INSURANCE

"SEC. 126. (a) Section 3121 of the Internal Revenue Code of 1954 (relating to definitions under the Federal Insurance Contributions Act) is amended by adding at the end thereof the following new subsection:

"'(r) SERVICE EXCLUDED UNDER ELECTION MADE BY MEMBERS OF CERTAIN RELIGIOUS FAITHS.—

"(1) EXEMPTION.—Any individual may file an application (in such form and manner, and with such official, as may be prescribed by regulations under this chapter) for an exemption from the tax imposed by section 3101 if he is a member of a recognized religious sect or division thereof and is an adherent of established tenets or teachings of such sect or division by reason of which he is conscientiously opposed to acceptance of the benefits of any private or public insurance which makes payments in the event of death, disability, old-age, retirement or makes payments toward the cost of, or provides services for, medical care (including the benefits of any insurance system established by the Social Security Act). Such exemption may be granted only if the application contains or is accompanied by—

"'(A) such evidence of suoh individual's membership in, and adherence to the tenets or teachings of, the sect or division thereof as the Secretary or his delegate may require for purposes of determining such individual's compliance with the preceding sentence, and

"'(B) his waiver of all benefits and other payments under titles II and XVIII of the Social Security Act on the basis of his wages and self-employment income as well as all such benefits and other payments to him on the basis of the wages and self-employment income of any other person,

and only if the Secretary of Health, Education, and Welfare finds that—

"'(C) such sect or division thereof has the established tenets or teachings referred to in the preceding sentence,

"'(D) it is the practice, and has been for a period of time which he deems to be substantial, for members of such sect or division thereof to make provision for their dependent members which in his judgment is reasonable in view of their general level of living, and

"'(E) such sect or division thereof has been in existence at all times since December 31, 1950.

An exemption may not be granted to any individual if any benefit or other payment referred to in subparagraph (B) became payable (or, but for section 203 or 222(b) of the Social Security Act, would have become payable) at or before the time of the filing of such waiver.

"'(2) Time for filing application.—An application under this subsection may be filed at any time.

"'(3) Period for which exemption effective.—An exemption granted to any individual pursuant to this subsection shall apply with respect to service performed by such individual during the period—

"'(A) commencing with the first day of the calendar year in which such exemption is granted; and

"'(B) ending at the end of the calendar year in which the Secretary determines that (i) such individual has ceased to meet the requirements of the first sentence of paragraph (1), or (ii) the sect or division thereof of which such individual is a member has ceased to meet the requirements of subparagraph (C) or (D) of paragraph (1).

"'(4) Application by fiduciaries or survivors.— If an individual, who has received wages with respect to employment during any calendar year, dies prior to the end of such year without having filed application for exemption pursuant to this subsection, such an application may be filed with respect to such individual not later than April 15 of the following calendar year by a fiduciary acting for such individual's estate or by such individual's survivor (within the meaning of section 205(c)(1)(C) of the Social Security Act). Any exemption granted as a result of any such application shall be effective only for the calendar year in which such individual died.'

"(b) Section 202(v) of the Social Security Act is amended to read as follows:

"'(v) (1) Notwithstanding any other provisions of this title (other than paragraph (2) of this subsection), in the case of any individual who files a waiver pursuant to section 1402(h) or 3121(r) of the Internal Revenue Code of 1954, and is granted a tax exemption thereunder, no benefits or other payments shall be payable under this title to him, no payments shall be made on his behalf under part A of title XVIII, and no benefits or other payments under this title shall be payable on the basis of his wages and self-employment income to any other person, after the filing of such waiver.

"'(2) If, in the case of any individual who has filed a waiver pursuant to section 1402(h) or 3121(r) of the Internal Revenue Code of 1954, on and after the date that there is no longer a tax exemption effective with respect to such individual as a result of any such waiver, any such waiver shall cease to be applicable in the case of benefits and other payments under this title and part A of title XVIII to the extent based on his wages and self-employment for periods after which any such tax exemption ceases to be effective with respect to him.'

"(c) Section 210 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"'EXEMPTION FROM EMPLOYMENT OF SERVICE PERFORMED BY MEMBERS OF CERTAIN RELIGIOUS FAITHS

"'(p) Notwithstanding the provisions of subsection (a), the term "employment" shall not include any service performed by any individual during a period with respect to which a tax exemption granted under section 3121(r) of the Internal Revenue Code of 1954 is applicable to such individual.'"

REQUEST OF THE OLD ORDER AMISH FOR EXEMPTION FROM THE SOCIAL SECURITY SELF-EMPLOYMENT TAX

BACKGROUND OF THE PROBLEM

The following background information indicates the basic nature of the social security program, the general character of religious objections to participation in social security, and the present situation of the Old Order Amish in relation to social security.

*Compulsory nature of social security*

The social security program is designed to provide old-age, survivors, and disability insurance protection for American families, regardless of family size, income, or other factors. Under this program workers (and their employers) and the self-employed contribute while working so that the contributor and his family may have a continuing income when earnings cease or are greatly reduced because of retirement in old-age, long-term disability, or death. About 9 out of 10 working people and their families are covered under the program.

Social security can carry out its purpose only under conditions of compulsory coverage. Compulsory coverage assures that there will be a given distribution of what might be called poor risks—those who will get considerably more than they pay in—and good risks. Under a voluntary program, there would be an unduly high proportion of poor risks. Many people could predict with reasonable certainty whether or not they would get a large return on their contributions and those choosing coverage would generally be the ones who could expect to receive benefit bargains. This would increase the cost of the program for all who participate. Those given a choice as to coverage would have an unfair advantage over those workers and employers whose coverage would continue to be on a compulsory basis and who would have to help bear the increased cost arising from the individual voluntary coverage. Moreover, under individual voluntary coverage, many who need social security protection most would not participate. Many low income workers would choose not to pay the contributions because of the press of day-to-day financial problems, although in the long run social security protection would be especially valuable to such workers and their families.

Individual voluntary coverage is now provided under social security only in respect to services performed in the exercise of the ministry (including the performance of the duties of a Christian Science practitioner). The exclusion from coverage of such services (where coverage is not elected) is not a personal exclusion but an occupational exclusion. Thus, a minister who engages in any employment or self-employment other than the exercise of the ministry—whether or not he elects coverage of his ministerial services—is covered on the same basis as all other persons. Once a minister elects coverage of his services in the ministry, the election is irrevocable and, once the time for election passes, a minister who has not elected coverage may no longer do so.

*Religious objections to coverage under social security*

Representatives of those divisions of the Amish Mennonites generally classed as Old Order Amish (with some 19,000 adult members) have objected to social security taxes on grounds that social security is a form of insurance, and that their participation in an insurance program would show mistrust in the providence and care of God to meet future needs. This basis for objection is shared by the Old Order Mennonites (about 5,000 members) by at least some of the followers of Father Divine (some 300,000 members), and by an unknown number of small sects, such as the Hutterites (a Mennonite group with 2,300 members, who practice communal living) and the division of the Plymouth Brethren known as Exclusives.

Another religious basis for opposing participation in social security is adherence to a principle of separatism—the belief that one's

sect or group should keep apart from all other persons. The Old Order Amish, for example, place great importance on the scriptural admonition: "Be ye not unequally yoked together with unbelievers: for what fellowship hath righteousness with unrighteousness? and what communion hath light with darkness?" Separatism is also a cardinal principle of some groups which have not indicated their attitudes toward social security: for example, the Black Muslims, perhaps the prime exponents of separatism, and Jehovah's Witnesses, with 287,000 members in the United States, all of whom are held by the sect to be ministers. There would seem to be considerable doubt that participation in social security is compatible with the belief of Jehovah's Witnesses that the end of the world is close at hand—1984, at latest—and objections to social security have been received from individual members from time to time.

Each of the above-mentioned groups has come into conflict with Federal or State law on questions other than social security. All oppose compulsory military service, and there have been various other conflicts with State or local laws, such as the refusal of the Old Order Amish to permit their children to attend school beyond the 8th grade, and the refusal of Jehovah's Witnesses and the Black Muslims to salute the flag.

The Christian Science Church opposed provision of disability benefits under social security on religious grounds.

*Old Order Amish*

The 19,000 Old Order Amish Mennonites live in about 270 communities in 19 States. The communities are known as church districts; however, there are no meeting houses and worship is conducted in private homes. Each community is headed by a bishop. There is no hierarchy above the bishops and no formal organization among the various communities. Thus each bishop is able to interpret doctrine independently of views held in other communities.

Amish who do not belong to old order groups—e.g., a category known as Beachy Amish—have adopted relatively modern ways of living, and are apparently not opposed to social security. There continue to be cleavages in which Old Order Amish communities, or segments of communities, split off to adopt more modern ways of living. One-third or more of the offspring of Old Order Amish parents do not continue in the sect. As in virtually any group there are marginal members, some of whom eventually become separated from the sect. The Amish strive continually to maintain their communities against worldly temptations; an effective means of maintenance has been their stand against high school education and their doctrine of shunning,[1] with its grave economic implications for individuals who are so ill equipped to prosper outside the community.

The Old Order Amish relate practically every detail of their way of living to religious beliefs, which in turn are based on literal interpretation of scriptural texts. The Old Order Amish attempt to pursue a life similar in its course to that of the German peasant of perhaps the 17th or 18th century. The farm way of life is justified on religious grounds because being "in the country" separates the group from more worldly, less firm followers of Scripture. Consideration has been given to the use of nonmechanized farming methods as one way of differentiating (in proposed legislation) the Old Order Amish from other religious objectors to social security. But even among the Old Order Amish there have been various concessions to the changing times. For example, though a tractor may not be used in the field, it is permissible to use a tractor to furnish belt power. The Old Order Amish farmer is generally allowed to have one- or two-cylinder gasoline motors for his farm operations. The Old Order Amish make a significant distinction between owning and merely using modern conveniences. For example, in some communities it is permissible to have electric current and appliances in a mortgaged home but not after the mortgage is paid off. A significant distinction is also made between members of the sect and those who are members of the Amish community but not members of the sect—for example, Amish youngsters, who do not become members of the Old Order Amish until they are baptized (which usually occurs in their later teens). A case has been described in which a young man deferred baptism for a period of time so as to enable continued ownership of an automobile and a tractor, with which he not only provides transportation for his numerous family and neighbors but also works his father's large farm and many of his neighbors.[2]

*History of the problem*

The problem of the Old Order Amish with social security dates mainly from 1955 when coverage of self-employed farm operators began. (However, some members of the sect who take employment in town have been covered as far back as 1937.) Although the law does not require that social security benefits must be accepted, the Old Order Amish bishops assert that required payment of social security taxes obliges their members to participate in the social security program—an insurance program—and thus to act contrary to their religious beliefs. Though the social security tax provisions are not included with the benefit provisions in the Social Security Act, but are part of the Internal Revenue Code, the bishops seem to look upon the social security taxes as in the nature of a personal premium paid for insurance. The bishops believe that their members should pay other types of taxes, pursuant to the scriptural admonition to "render unto Caesar the things that are Caesar's." In general, the creed of the sect (also held by some other groups) dictates that members should obey civil laws except where they "militate against the law, will, and commandments of God."[3]

The religious objection to the insurance principle is not clear cut. For example, the Old Order Amish make systematic arrangements for protection against property loss from fire, storm, and other causes, under which, after a loss occurs, members contribute labor and make a monetary contribution related to their net worth. One such group arrangement, known as the Amish Mutual Fire Insurance Association of Atglen, Pa., was organized by the Old Order Amish of Lancaster County in 1875 and was licensed as an insurance company in Maryland and Pennsylvania. The Old Order Amish do not consider this type of arrangement to be insurance because there is no advance funding. Liability insurance is apparently not considered to be contrary to their religious beliefs—a conclusion based on the view that liability insurance provides indemnity not to the insured but to the party suffering damages. It seems clear, however, that the Old Order Amish are strongly opposed to life insurance even though the survivors, not the insured, are protected under it.[4]

There is no question, of course, as to the sincerity of the assertion of the Old Order Amish bishops that participation in social security is contrary to their religious beliefs, and a number of the Amish farmers carry out this objection to the point of open refusal to pay social security taxes and active resistance to the execution by the Government of liens on their bank account to satisfy unpaid taxes. During many discussions with representatives of the Social Security Administration, the bishops have consistently refused to consider any compromise solution short of exclusion from social security coverage. On the other hand, a number of individual members of the sect have claimed old-age insurance benefits under social security when they became eligible for such benefits. It appears that at least some of the Old Order Amish—particularly, younger members—are undergoing a change in attitude toward social security and are coming to regard it as a good thing. This is quite consistent with their increasing acceptance of various innovations of the 20th century.

As noted, the problem of those Old Order Amish who actively resist social security coverage is related mainly (though not entirely) to the social security self-employment tax.[5] The enforcement problem was thrust on the national scene when one Amishman, Valentine Y. Byler, of New Wilmington, Pa., who had no bank account, could not be persuaded to pay his tax for the years 1956–59. In the spring of 1961 the Government seized three of his six plow horses, sold them at public auction, and applied the proceeds against his outstanding liability. After consultation with an attorney who had become interested in civil liberties cases, Mr. Byler brought suit on the grounds of infringement of the freedom of religion guaranteed under the first amendment.

Given assurance that the constitutionality of the tax would be tested in court, and that the statute of limitations on collection of taxes would be waived by the Amish, the Commissioner of Internal Revenue agreed in October 1961, to suspend all forceful collection of tax until the issue was resolved in court. On January 21, 1963, the suit was dismissed with prejudice on motion of the plaintiffs, Mr. and Mrs. Byler. (This action was apparently based on religious objections to participating in litigation, and was taken without consultation with the plaintiff's attorney.) As an alternative course, Old Order Amish bishops appealed to the Congress and

[1] "Amish Society," by John A. Hostetler, p. 144.

[2] "Our Amish Neighbors," by William I. Schreiber, p. 77.

[3] "The Dordrecht Confession (1632)." In reference to civil government, this confession also directs believers "faithfully to pay it custom, tax, and tribute." One article of the confession forbids defense by force.

[4] The first reference to insurance in basic documents related to Amish religious background appears in "Christian Fundamentals," adopted by the Mennonite General Conference in 1921, which states that "life insurance is inconsistent with filial trust in the providence and care of our heavenly Father." A more recent commentary, in "The Mennonite Encyclopedia," explains: "This refers to commercial life insurance only. The (Mennonite) brotherhood has a growing awareness of its obligation to make systematic provision for the economic needs of its members including financial assistance for the widows and orphans in event of serious incapacity or death."

[5] The self-employment tax rate is now 5.4 percent, and is applicable to the first $4,800 of annual net earnings from self-employment. Virtually all self-employment, except self-employment as a doctor of medicine, is compulsorily covered under social security for any year in which an individual has annual net earnings of at least $400 from self-employment. The current social security tax rate for employers and employees is 3⅝ percent each.

bills were introduced during the 87th Congress to exempt them from the tax. The Treasury Department and the Department of Health, Education, and Welfare pointed out objections to these bills on administrative and precedent grounds. During consideration by the 87th Congress of H.R. 10606, the Public Welfare Amendments of 1962, one of these bills (S. 2031) was adopted as a Senate amendment but was dropped in conference. Appended is a list of bills which have been introduced in the 88th Congress for the purpose of permitting exclusion from social security on grounds of religion or conscience, or to make coverage voluntary for self-employed farmers.

Although the suit to test the constitutionality of the self-employment tax as it applies to the Old Order Amish was never tried, the moratorium on the collection of tax has not been terminated by the Internal Revenue Service. According to the most recent report of the Service, there are some 1,500 delinquent Amish accounts, the delinquencies ranging for the most part for periods from 1 to 3 years and involving nearly $250,000 in tax liabilities.

The moratorium was intended as a temporary measure. Since tax liabilities are not satisfied but only postponed by this moratorium, it cannot be extended for too long a period of time. The 6-year period of limitation on collection of tax will expire this year in some cases. Some Old Order Amish have already indicated that they would not sign waivers to extend the collection period. The Government, therefore, in these cases soon will be forced to take action for the collection of taxes due from these individuals or else allow its collection rights to lapse.

---

TREASURY DEPARTMENT,
*Washington, August 12, 1964.*

HON. RICHARD S. SCHWEIKER,
*House of Representatives,*
*Washington, D.C.*

DEAR MR. SCHWEIKER: I am enclosing herewith the opinion of Mr. Berlin, the General Counsel of the Treasury Department, relating to the constitutionality of optional exemption of members of a certain religious faith from the social security self-employment tax or optional recovery of the tax paid.

Sincerely yours,

STANLEY S. SURREY,
*Assistant Secretary.*

---

THE GENERAL COUNSEL OF THE TREASURY,
*Washington, D.C., August 6, 1964.*

CONSTITUTIONALITY OF OPTIONAL EXEMPTION OF MEMBERS OF A CERTAIN RELIGIOUS FAITH FROM THE SOCIAL SECURITY SELF-EMPLOYMENT TAX OR OPTIONAL RECOVERY OF THE TAX PAID

Legislation has been proposed in the present and the previous Congress to provide optional exemption from the social security self-employment tax for "a member or adherent of a recognized religious faith whose established tenets or teachings are such that he cannot in good conscience without violating his faith accept the benefits of insurance," upon a finding by the Secretary of Health, Education, and Welfare that his application for exemption was made in good faith and that the members of such religious faith make adequate provision for elderly members to prevent their becoming public wards.[1] Senators CLARK and SCOTT, among the chief proponents of this legislation, have explained that the faith in question is that of those Amish Mennonites who are known as the plain people or Old Order Amish who live in relative independence and isolation in rural communities and adhere strictly to many literal biblical injunctions, including reliance on divine providence for their care. The consistency and sincerity of the sect is attested to by the refusal of most of their members to accept social security benefits or pay the self-employment tax.

In the consideration of these bills in Congress the question was raised as to whether the proposed exemption would be constitutional and the views of the Treasury Department were requested. This opinion is in response to that request. Since then, additional leigslative proposals, including an alternative proposal of relief for the Amish in the form of tax recovery in place of tax exemption, have been discussed in a joint statement by the Treasury Department and the Department of Health, Education and Welfare, entitled "Request of the Old Order Amish for Exemption from the Social Security Self-Employment Tax," which was transmitted to interested Members of Congress by a joint letter dated July 20, 1964. In connection with the earlier request, it is also appropriate to consider the constitutionality of these proposals, as well as the constitutionality of the various limitations included, or suggested for inclusion, in the definition of the faith whose members or adherents would be eligible for exemption. The joint statement referred to above reviews the religious tenets and modes of life of these Amish and provides an extended analysis of the social security system and the possible effects of an exemption. I will not, therefore, in this opinion cover any of this factual material. A copy of this joint statement is attached hereto.

*Conclusion on tax exemption and tax recovery*

My conclusion, based upon a review of the principles of constitutional law, is that there is no valid constitutional objection to the proposed exemption and that the question of exemption is one of public policy for Congress to determine. After discussion of the grounds for this conclusion I will review in the latter part of this opinion the constitutionality of various proposed additional limitations upon the exemption.

This conclusion concerning tax exemption comprehends any provision by Congress for tax recovery, since tax exemption is the most complete relief that could be given. In the subsequent discussion, therefore, the constitutional conclusions with respect to the requirements of uniformity, of the first amendment, and of due process should be read as also extending to a provision for tax recovery.

Congress and the States have provided for the recovery of taxes in various situations where for reasons of public policy the legislature has determined this to be appropriate. I have found no constitutional challenge of these provisions. For example, 26 U.S.C. 6420 provides for refund of the gasoline taxes paid for gasoline used for farming purposes. A similar provision in the Virginia Code, section 58–715 (Supp. 1964), includes refunds for gasoline used for public or nonsectarian school buses. Title 26 U.S.C. 6418 provides for refund of the Federal tax on sugar manufactured in the United States to those who use such sugar as livestock feed or in the distillation of alcohol.

If members of the designated religious faith were permitted to choose to recover in monthly installments the amount, and only the amount, of the social security taxes they have paid, they would be under a limitation which operated to their disadvantage as compared with other social security taxpayers to whom an indefinite amount of social security recovery would be available in the form of insurance. Consequently, it would seem that no other social security taxpayer would be in a position to claim that the tax recovery allowed to the Amish in any way discriminated against his or added to his tax burden.

1. The requirement of uniformity: The Constitution provides in article I, section 8, clause 1: "The Congress shall have power to lay and collect taxes, duties, imposts, and excise, to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts and excise shall be uniform throughout the United States; * * *." This canon of uniformity has been long established to be a requirement of geographical uniformity only *Knowlton* v. *Moore,* 178 U.S. 41 (1900); *Brushaber* v. *Union P. Co.,* 240 U.S. 1 (1916); *Fernandez* v. *Wiener,* 326 U.S. 340 (1945). Insofar as uniformity may be required as an element of reasonableness under the due process clause, the problems are dealt with in my discussion of the application of that clause.

2. The first amendment: The proposed exemption, if allowed, would represent a determination by Congress that an accommodation of the self-employment tax law to prevent offense to religious scruples against insurance would not be contrary to public policy. The first amendment provides that "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; * * *." The question is whether an exemption from the social security tax would be constitutional as an accommodation or mitigation of a general requirement in order to permit the free exercise of a religion or whether it would be an "aid" to the specified religion at the expense of other religions and therefore be an unconstitutional establishment of religion.

It is my conclusion that the proposed exemption would in all probability be held to be a valid accommodation of the general law to permit religious liberty under the free exercise clause. The subsidiary question whether the definition of the persons exempted may be a reasonable classification under the due process clause is discussed in a subsequent part of this opinion. I base my conclusion on the following decisions of Federal and State course, particularly the Supreme Court, which interpret the first amendment to permit accommodations to religious beliefs. This discussion will be followed by an analysis of those cases which hold that certain government action is a violation of the establishment clause, in order to make clear that this exemption would not be an establishment of religion.

The classic example of the application of the free exercise clause is the series of cases which have upheld congressional exemption of conscientious objectors from military service. The validity of this exemption was first established by the *Selective Draft Law Cases,* 245 U.S. 366 (1919) upholding the exemption in the draft law of members of religious sects "whose tenets prohibited the moral right to engage in war." The Solicitor General had argued (p. 374) that this exemption did not establish such religions but simply aided their free exercise. The court considered that the Congressional authority to provide such exemption was so obvious that it need not argue the point (p. 389–390).

The present Universal Military Training and Service Act enacted June 24, 1948, c. 625, 62 Stat. 604, as amended, in section 6(j), 50 U.S.C. App. 456(j), exempts from combatant training and service in the Armed Forces a person "who by reason of religious training and belief, is conscientiously opposed to participation in war in any form." This exemption continues to be recognized as constitutional under the free exercise clause. *Clark* v. *United States,* 236 F. 2d 13 (9th Cir. 1956), cert. denied, 352 U.S. 882 (1956); *United States* v. *Jakobson,* 325 F. 2d

[1] S. 294, 88th Cong.; H.R. 10606, 87th Cong., among others.

409 (2d Cir. 1963), cert, granted 32 L.W. 3385, May 5, 1964. Certiorari was granted in the Jakobson case and in two other conscientious objector cases,[2] apparently in order to reconcile the conflict between the second and ninth circuits as to whether the statutory definition of "religious training and belief" as being a "belief in a relation to a Supreme Being" may constitutionally be applied to exclude a conscientious objector whose belief is based on humanistic principles. This conflict is one essentially concerned with reasonable classification of an exemption under the due process clause, discussed below. It does not concern the constitutional right of Congress to exempt conscientious ojectors under the free exercise clause.

In the Jakobson case the second circuit faced the problem whether "making exemption from military service turn on religious training and belief as stated in section 6(j) aids religions, and more particularly religions based on a belief in the existence of God" (p. 414) and thereby conflicts with the holding in *Torcaso* v. *Watkins*, 367 U.S. 488 (1961). There it was determined that Maryland could not require an oath affirming a belief in God as a prerequisite to becoming a notary public. The Jakobson court concluded that "the important distinction seems to us to be that, in contrast to Maryland's notary public oath, Congress enacted this statute, in mitigation of what we assume to be the constitutionally permissible course of denying exemptions to all objectors, for the very purpose of protecting 'the free exercise' of religion by those whose religious beliefs were incompatible with military service which Congress had the right to require" (pp. 414–415).

An exemption identical with that in the 1948 military training act was specifically included in section 387(a) of the Immigration and Naturalization Act of June 27, 1952, c. 477, 66 Stat. 163, 258, 8 U.S.C. 1448(a). This statutory exemption followed the decision of the Supreme Court in *Girouard* v. *United States*, 328 U.S. 61 (1946) ruling that the naturalization law need not be, and should not be, interpreted to exclude an alien who would not promise to bear arms because of religious scruples. Justice Douglas, for the majority, reaffirming principles enunciated in earlier dissents by Justices Hughes and Holmes, said, "The struggle for religious liberty has through the centuries been an effort to accommodate the demands of the state to the conscience of the individual" (p. 68).

The general exemption from taxation of religious groups, activities and property is another example of the exercise by legislatures of the constitutional authority to make exemptions to aid in the free exercise of religion, which continues to be upheld against contentions that the exemption operates to establish the religions thus benefitted.[3] Under this exemption a unique religious doctrine may make an activity of one religious group exempt as having a religious purpose which would not be exempt when carried on by other groups not holding to that doctrine.[4] The exemption from taxation of religious activities and occupations is incorporated into the Social Security Act itself which provides optional exemptions for ministers, Christian Science practitioners, employees of religious organizations and members of religious orders (26 U.S.C. 1402 (c) and (e) and 3121(b)(8)).

A further illustration of the principle that a legislature may accommodate particular religious beliefs without violating the first amendment is the case of *Zorach* v. *Clauson* 343 U.S. 306 (1952). Here the Supreme Court held that the New York Legislature did not violate the establishment clause by authorizing public schools to release children 1 hour early every week for religious instruction off the school grounds. It said:

"When the State encourages religious instruction or cooperates with religious authorities by adjusting the schedule of public events to sectarian needs, it follows the best of our traditions. For it then respects the religious nature of our people and accommodates the public service to their spiritual needs" (pp. 313–314).

The distinction between *Zorach and McCollum* v. *Board of Education*, 333 U.S. 203 (1948) well illustrates the distinction between the two first amendment clauses for in McCollum the released time plan was held unconstitutional as an establishment of religion as classrooms and the force of the school were used in that plan.

The most important case, for our purposes, is the recent Supreme Court decision in *Sherbert* v. *Verner*, 374 U.S. 398 (1963). In this case the Court required South Carolina to accommodate the requirements of its unemployment compensation law to the religious scruples of an adherent of a particular sect, the Seventh-day Adventists. In three separate opinions the members of the Court balanced the demands of the free exercise clause against the prohibitions of the establishment clause. The opinion and the concurring opinion determined that the denial of unemployment benefits to a person unavailable for suitable work on Saturday because, being an Adventist she could not for religious beliefs work on Saturday, was a restriction on the free exercise of her religion and, therefore, unconstitutional. The dissenting opinion contended that the accommodation of Adventists was a question of policy for the legislature and that while the legislature could constitutionally exempt the Adventist from the requirements for eligibility placed upon all other persons the legislature was not required to do so. Consequently, the full Court apparently would agree that Congress could constitutionally make an exemption from the general requirements of taxation and compulsory insurance of persons who because of religious scruples are unwilling to accept social security insurance. It is solely the constitutional ability of Congress to make this exemption to which this opinion is addressed.

The reasoning in the Sherbert case needs to be examined as it bears upon the power of Congress in this area. The principle of accommodation of a general law to a particular religious scruple is the same in this situation as in Sherbert though the facts differ in that in the Sherbert case the accommodation was for the purpose of enabling the Adventist to receive welfare benefits and in the Amish situation the accommodation would be for the purpose of exempting the Amish from benefits as well as from taxation for these benefits.

First, the Court says that while "the consequences of such a disqualification to religious principles and practices may be only an indirect result of welfare legislation" and that no criminal sanctions compel work on Saturday, the indirect discrimination is nevertheless a burden on the free exercise of the Adventist's religion. It requires her to abandon her religious precept or forgo a welfare benefit generally available (pp. 403, 404). In the social security situation the employment tax is supported by civil and criminal sanctions of assessed penalties and fine, imprisonment and forfeiture, so that the justification for congressional relief is even clearer.

Second, the court points out that while the State may not discriminate invidiously between religions the accommodations required to be allowed to the Adventist would not be discriminatory but rather would remove a discrimination based upon her religion, since the law does not disqualify persons who do not work on Sundays (at 406). An exemption for those sects which cannot in good conscience accept the insurance for which they are taxed would not be an invidious discrimination against other religions which have no such scruple and whose members are therefore able to accept the insurance for which they are taxed.

Third, the court points out that the administrative problems concerned and the possibility of spurious claims do not justify a restriction on the free exercise of religion (at 407).

Then the court concludes (at 409) that its holding does not foster the "establishment" of the Seventh-day Adventist religion in South Carolina for the extension of unemployment benefits to Adventists is not like the involvement of religions with secular institutions which the establishment clause is designed to forestall as shown in its decision announced the same day, *School District of Abington Township* v. *Schempp*, 374 U.S. 203 (June 17, 1963). In fact the Sherbert ruling reversed the State court ruling that allowance for the religious obligation of the Adventist would be an unconstitutional discrimination in her favor. See *Sherbert* v. *Verner*, 240 S.C. 286, 125 S.E. 2d 737, 746 (1962).

In the Schempp and its companion case, *Murray* v. *Curlett*, decided with the same opinion, the court found that the States were establishing religion in their public schools by requiring Bible reading and the recitation of prayers therein. These decisions are developments of the prior term's opinion in *Engel* v. *Vitale*, 370 U.S. 421 (1962) holding that the requirement of recitation in the public schools of a State-authored prayer was a violation of the establishment clause which prohibits Government from placing its "power, prestige, and financial support * * * behind a particular religious belief" (p. 431). In the Schempp case the court develops the idea that Government must remain "neutral," a term derived from the 5-to-4 decision in *Everson* v. *Board of Education*, 330 U.S. 1 (1947). In its context in the several Establishment cases this term means an inability of the State to use its powers to require religious observances or to use public funds for the support of religious institutions. None of the holdings applies the establishment clause to forbid the granting of an exemption from Government coercion of a secular action to accommodate religious scruples under the free exercise clause. The latter clause is predicated, says the Schempp court, on Government coercion which impinges on religious practice, 374 U.S. at 223. The distinction between these two historic lines of decisions has permitted the Schempp case to be decided consistently with the Sherbert case on the same day.

In sum, then, an exemption removes a handicap to the free exercise of a particular religion placed upon it by force of Government; it is not a requirement by the Government that the particular religion be prac-

[2] *United States* v. *Seeger*, 326 F. 2d 846 (2d Cir. 1964), and the *Jakobson* case, compared with *Peter* v. *United States*, 324 F. 2d 173 (9th Cir. 1963). The *Peter* case followed *Etcheverry* v. *United States*, 320 F. 2d 873 (9th Cir. 1963) on which certiorari was denied, 375 U.S. 320 (1963). The influence of the 2d circuit against the definition is shown in *MacMurray* v. *United States*, 330, F. 2d 928 (9th Cir. 1964).

[3] *Swallow* v. *United States*, 325 F. 2d 97 (10th cir. 1963); *General Finance Corp.* v. *Archetto* (R.I. 1961) 176 A. 2d 73, appeal dismissed, 369 U.S. 423 (1962); *Fellowship of Humanity* v. *County of Alameda*, 315 P. 2d 394 (Cal. Dist. Ct. App. 1957); *Lundberg* v. *County of Alameda*, 298 P. 2d 1(Cal. 1956), appeal dismissed, sub. nom., *Heisey* v. *County of Alameda*, 352 U.S. 921 (1956).

ticed or observed or supported by nonadherents.

The meaning of the Sherbert case is made unmistakable in its application by the court in the recent case. *In re Jension,* 375 U.S. 14 (1963). Here the court "in the light of *Sherbert* v. *Verner*" vacated the judgment of the Minnesota Supreme Court in *In re Jenison,* 265 Minn. 96, 120 N.W. 2d 515 (1963). The Minnesota court had held a person selected for jury duty in contempt of court for refusing to serve on the jury because of a religious belief based upon the biblical injunction against judging other persons. The Minnesota court had reasoned that jury duty, being a primary duty of all citizens, was superior to a religious belief deemed by the court contrary to public order, citing *Reynolds* v. *United States,* 98 U.S. 145 (1878) which held that Congress could prohibit polygamy as a violation of the social order.

Since the Supreme Court has now held that Government must accommodate even the highest duties of citizens to sincere religious scruples, it is probable that it would hold that Congress may accommodate the religious scruple against insurance by allowing for such a scruple an optional exemption, or a lesser form of relief, from social security taxation and benefits.

3. The due process clause: Under the due process clause of the fifth amendment tax statutes must provide reasonable classifications of the subjects taxed or regulated and reasonable exemptions, if exemptions are provided. But, as has been firmly established by the Supreme Court, particularly in cases upholding the various exemptions provided in the Social Security Act and State unemployment compensation acts (*Carmichael* v. *Southern Coal Co.,* 301 U.S. 495 (1937); *Steward Machine Company* v. *Davis,* 301 U.S. 543 (1937); *Helvering* v. *Davis,* 301 U.S. 619 (1937)), the outer bounds of what is a reasonable tax or exemption classification allow a wider play of legislative judgment than many other areas of the law where the "reasonable" standard is applied. In these cases the court assured legislatures that they had the widest powers of selection and classification in taxing some at one rate, others at another and exempting others altogether, where distinctions were based upon "considerations of policy and practical convenience."

Claims of discriminatory treatment under social security continue to be rejected as not "patently arbitrary." *Flemming* v. *Nestor,* 363 U.S. 603, 611 (1960). Recently, *Smart* v. *United States,* 222 F. Supp. 65 (S.D.N.Y. 1963), upheld a higher tax on (American) employees of the United Nations, as the means employed bore a substantial and logical relation to the objective; and *Lesson* v. *Celebreze,* 225 F. Supp. 527 (E.D.N.Y. 1963), accepted differences in dependency determination for children of a deceased mother from that for children of a deceased father, based on family support experience. See also *Cape Shore Fish Co.* v. *United States,* 330 F. 2d 961 (Ct. Cl. 1964), and *Abney* v. *Campbell,* 206 F. 2d 836 (5th Cir. 1953) on fishing vessel employment differences and on domestic service differences respectively.

The requirement that exemptions have a reasonable basis applies as well to exemptions based upon religious scruples provided by Congress in conformity with the first amendment. In a nontax area this requirement has been recently reviewed in the second circuit decisions, pending review in the Supreme Court, on the reasonableness of the selective service definition of religious training and belief as being confined to belief in a Supreme Being. *United States* v. *Jakobson,* 325 F. 2d 409 (2d Cir. 1963) and *United States* v. *Seeger,* 326 F. 2d 846 (2d Cir. 1964); certiorari granted in both cases, 32 L.W. 3385, May 5, 1964. In these cases the court determined that an exemption from bearing arms based on religious belief was a constitutional accommodation of religion, but that a restriction of the definition of religion to a Supreme Being was too narrow in view of its conclusion that a conscience sincerely compelled to refrain from bearing arms because of a "mystical force of 'Godness'" or a "compulsion to follow the paths of 'goodness'" might be religious in nature (Seeger, p. 853). In other words, at least in the second circuit, the exemption on the grounds of religious objection must reach all who have sincere objections which could be interpreted as religious in nature.

In the social security situation, however, a classification may be as limited as circumstances require, as indicated in the Smart and other cases, supra.

In fact the Social Security Act and its amendments have characteristically carved out exemptions which are as narrow as required by the sociological facts, including differences among vocations and religious attitudes. Thus, for example, lawyers are covered by the self-employment tax, ministers, including Christian Science practitioners, are optionally covered, but doctors and persons who have taken the vow of poverty as a member of a religious order are completely exempted (26 U.S.C. 1402 (c) and (e), and 42 U.S.C. 411(c) (4) and (5)). When the self-employment tax was passed in 1950 the act excluded the performance of service by a minister of a church or a member of a religious order or by a Christian Science practitioner in the exercise of their callings, in order to avoid impairment of religious liberty (Senate Finance Committee hearings on H.R. 6000, 81st Cong., Jan. 17, 1950, pt. 1, pp. 1 and 3). The exemption was made optional in the 1954 amendment of the act for these classes of persons except the mendicant orders. These exemptions have not been challenged.

The reason for the present proposal to exempt members of religious sects, as such, is solely that they have a religious objection to receiving insurance. Accordingly, a classification of such sects for exemption purposes, with appropriate safeguards, would reach all those whom Congress would have a reasonable ground to exempt and would, therefore, not be arbitrary nor violative of due process.

This conclusion is the basis of the opinion of the staff of the Joint Committee on Internal Revenue Taxation and that of the American Law Division of the Library of Congress provided to Senator CLARK under dates of November 9, 1962, and September 19, 1962, respectively. These opinions conclude that the proposed exemption would be constitutional as it would apply to all those who fall within the classification and that the classification is reasonable, 109 CONGRESSIONAL RECORD, 463, 464 (1963). A copy of these opinions as reproduced in the CONGRESSIONAL RECORD is attached.

Since, therefore, Congress may exempt those members of a religious faith who have scruples against receiving insurance, the next question is what practical safeguards Congress may designate to assure that only those who come within the policy of the exemption obtain the exemption, without imposing arbitrary limitations.

*Limitations on the exemption*

The joint statement by the Treasury Department and the Department of Health, Education, and Welfare reviewing the problems created by the proposed exemption for the Amish contains in section 3 suggested additional limitations upon the exemption. These limitations are proposed as possible means to protect the social security system from an unintended extension of exemptions from compulsory insurance which would weaken and dilute it. The extensions of the exemption might occur, according to this joint statement, either through the formation of additional faiths claiming opposition to acceptance of benefits as one of their tenets or through the redefinition by various existing separatist groups of their tenets to include such opposition.

I shall consider each of these proposed additional limitations, designated "a" through "e," to determine whether the limitation may be considered by the courts to be a reasonable classification and consistent with the due process clause. I shall also suggest a limitation, designated "f," which was not among those proposed but which may be found to limit the exemption reasonably and realistically to the groups which Congress intends to accommodate by this exemption.

(a) An explicit limitation of the exemption to the old order Amish: This limitation would probably be considered arbitrary since the designation of one sect to the exclusion of other sects having the same scruple would be inconsistent with the congressional policy of removing the Government coercion of belief which constitutes the denial of the free exercise of religion. It would also probably constitute an invalid preference of one particular faith over those which were similarly situated. The facts presented to Congress indicate that they may be certain other sects of the Amish and possibly other religious groups who have the same religious scruple which is now being coerced. Furthermore, the exemption of a single named group will be held to be arbitrary [5] unless the relation to the public good is clearly demonstrable.[6]

(b) Limitation to members of a sect, excluding adherents who are not members; and (c) limitation to members of sects who "take care of their own": These limitations are being considered together since at least some of the bills before Congress provide that a necessary condition of exemption is a finding by the Secretary of Health, Education, and Welfare that the sect makes provision for its elderly "members." This condition would probably be considered a necessary and proper public policy consideration and, therefore, a reasonable condition upon which to base eligibility for exemption. The purpose of Congress in this legislation would be to assure the fulfillment of the welfare purpose of social security while relaxing that feature of social security which impinges on the free exercise of religion. Moreover, since individuals can seldom guarantee their own future against deprivation and need, it would be reasonable for Congress to provide that to qualify for an exemption a person must be a member of a sect which shares the religious commitment, both with respect to refusing State insurance and providing for that sect's welfare. Consequently, since the sect aspect is essential, it would seem reasonable to limit the qualification for exemption to persons who are members of a qualifying sect. As said by Justices Black and Douglas in *Board of Education* v. *Barnette,* 319 U.S. 624, 643 (1943): "No well-ordered society can leave to the individuals an absolute right to make final decisions, unassailable by the State, as to everything they will or will not do."

(d) Limitation to sects which require members to follow the occupation of farming as a matter of religious principle: This limitation, as phrased, would not be appro-

---

[5] *Eyers Woolen Co.* v. *Gilsum,* 84 N.H. 1, 146 *Baltimore,* 289 U.S. 36 (1933).

[6] *William* v. *Mayor and City Council of* Atl. 511 (1929); *Baltimore* v. *Starr Methodist Protestant Church,* 106 Md. 281, 67 Atl. 261 (1907). priate on the basis of the facts given in the joint statement. It is there stated that "most old-order Amish communities permit members to make their living as self-employed carpenters or masons" (p. 9). The possibility of limiting the exemption to sects which are established in farming communities for religious reasons is suggested and discussed below.

(e) Limitation to religious groups which were established before 1935: Any limitation which designates a cutoff date would generally be less reasonable than one which on its face shows some relationship to the public purpose of the statute. For example, a requirement that the sect shall have demonstrated over a period of years its ability to take care of its own members would probably be more acceptable as a classification. The text of certain of the legislative proposals already contain this principle in that they refer to the sect to be exempted as one which is "established." I would see no reason why the extent or the test of establishment might not be specifically spelled out. There is some authority that a "classification which draws a line in favor of existing businesses as against those later entering the field will be upheld if any reasonable and substantial basis can be found to justify the classification." *Del Mar Canning Co.* v. *Payne*, 29 Cal. 2d 380, 175 P. 2d 231, 232 (1946). The circumstances justifying such a discrimination must provide substantial reason. *Mayflower Farms* v. *Ten Eyck*, 297 U.S. 266 (1936). It is probable that the unusual situation of the Amish with respect to social security would be considered a substantial reason for a limitation of the classification to established sects.

(f) Limitation to sect established in farming communities for religious reasons: The faith, the members of which are to be exempted, might be described not only as one whose established tenets would be violated by the acceptance of insurance, and one which provides for elderly and dependent members, but as one which for religious reasons is established in farming communities. These limitations might be reasonable if Congress found after sufficient inquiry that they were necessary to assure that the exemption would be confined to sects which were religiously motivated and responsible, and to assure that the welfare purpose of social security would be fulfilled. Congress might reasonably find that the restriction of the exemption to those sects established in farming communities would be justified on the ground that such a sect could be more certainly relied upon to identify and provide for its dependent and elderly members than those in the mobile and transient urban environment. Conversely, the limitation would have the effect of excluding sects which subsequently organize for the purpose of exemption from social security, as it is unlikely that these would or could establish themselves in farming communities for religious or other reasons. The limitation would exclude other present separatist groups whose principles might, but do not specifically, include refusal of social security benefits. Legislation which distinguishes farming situations from others because of sociological and economic differences has taken many forms and has been accepted by the courts. See, for example, *Tigner* v. *Texas*, 310 U.S. 141 (1940), rehearing denied, 310 U.S. 659 (1940).

G. D'ANDELOT BELIN,
*General Counsel.*

Mr. SCHWEIKER. Mr. President, I yield back the remainder of my time and suggest the absence of a quorum——

Mr. MANSFIELD. Mr. President, will the Senator withhold that request?

Mr. SCHWEIKER. Yes.

## ART ON THE FLATHEAD RESERVATION, MONT.

Mr. MANSFIELD. Mr. President, I had the privilege this morning of meeting in my office with Thomas J. Collins, director of the University of Montana Foundation, which has with it a Divison of Indian Services, and Michele de Santene, who did some work as a member of the faculty at the University of Montana among the Flathead Indians; to be more accurate, the Salish and the Kootenais.

During the course of this she came into contact with the Flathead people, found that there was a great reservoir of artistic talent, recognized, of course, the relationship between the Flatheads and the French of an earlier day, the voyageurs, the traders, and the coming of the Jesuit priests who did so much good not only up in what is now the Flathead country but what was originally the Flathead country down in the Bitter Root Valley south of Missoula.

Because of the interest shown by Miss de Santene, because of the talents which she unearthed among the Flathead people, I ask unanimous consent that a story entitled "Indian Art—Signed Big and Bold," by Jessie Ash Arndt, in the Christian Science Monitor of February 17, 1970, be incorporated at this point in the RECORD.

Mr. President, before permission is granted to have the story printed, let me say I understand some of these young people, such as Alameda Addison, have extremely fine talent, if not outstanding capability.

May I say that I am personally pleased that such consideration is being given to the Flatheads. I would hope that the same type of interest would be displayed for the Crows, the Northern Cheyennes, the Assiniboines, the Sioux, the Gros-Ventres, the Chippewa-Crees, and the Blackfeet.

The PRESIDING OFFICER. Without objection, the request of the Senator from Montana is granted.

The article is as follows:

INDIAN ART—SIGNED BIG AND BOLD

(By Jessie Ash Arndt)

Michèle de Santène was conscious of an oppressive silence, except for the sound of her own voice and an occasional giggle, half-stifled behind a hand.

It was the first day of an art course for the Salish-Kootenai Indians of the Flathead Reservation near Missoula, Mont. As she met their silent, curious gaze and knew how carefully she was being measured, she thought of the warning that she might not find it easy to communicate with these shy, rather aloof people.

She told them she had come because painting gave her an inner joy and she wanted to share it with them. No response.

This class, she explained, was not like one in accounting or a scientific subject, where you always had to be on hand; they were free to come and go. More than half sauntered out. They stayed away for about 10 minutes, then cautiously returned. She made no comment. They were satisfied.

By the end of the first three hours, they had accepted her.

From childhood Miss de Santène, a native of Nice, France, had loved Indian lore. When her husband, Dr. Oscar Sachs, of New York, was invited to do research last summer at the Pharmaceutical Laboratory of the University of Montana Foundation at Deerlodge she was invited, as an artist of international note, to teach art at the university.

As in the days of her childhood when she wouldn't play "cowboys and Indians" unless she could be the Indian, she declined, but said she would like to teach at the Flathead Reservation. Her only stipulation was that talented students be chosen for the course.

Thomas J. Collins, director of the University of Montana Foundation, with its Division of Indian Services, welcomed the idea. With the cooperation of the Billings area office of the Bureau of Indian Affairs (BIA) the 30 talented students were selected from villages all across the reservation, covering nearly a 200-mile area. Miss de Santène found them all above average in creative ability, but not necessarily in educational background. Their ages ranged from five years to 30, but most were teenagers.

Money from the foundation bought art supplies which she selected: oil pastel, magic markers, oil paint, canvases, and an abundance of paper. The students were free to choose whichever they wanted to use, and to take home with them a good two-months supply at the close of the course.

Although Miss de Santène could have returned each evening to the resort hotel where her husband and daughters, Carina and Tammy, were staying, she chose instead to occupy a crude cabin adjacent to the lodge which served as dormitory, dining hall, and art studio for the students, "so they would feel I was one of them."

The lodge, located and rented by the foundation, was one enormous room, where all but four or five of the young artists bedded down in sleeping bags at night. The others, living near enough, went home to sleep. In the morning the floor was cleared, art materials came out, and the class was under way.

On the second morning she was greeted by the blare of rock 'n' roll from the record player when she entered the lodge, but she made no comment. As she worked with the students as individuals, the noise would not prevent communication. When she wanted to speak to the class briefly, they willingly turned it off for a minute or two.

But she noted that after an hour there would be an interval when no one stopped work long enough to put on another record. The second hour found students so absorbed it was forgotten and quiet prevailed for the rest of the day's class. Although part of the afternoon was for swimming and other recreation, many returned to their painting.

She provided nothing for them to sketch. There were no assignments. She was there to encourage their own creative talent. Their first work for her she called "please-the-teacher" efforts. Then subjects from their own environment began to appear: an Indian head, a tepee, a totem (not native to them, but of which they knew). This was what she wanted.

An exhibition of their first pictures showed shy, small signatures.

"If you're part of something, you sign it big and bold," she told them.

Big, bold names identified their later work.

Through the foundation, the three adults in the class have been accepted for an art course at the university and special provision has been made for Saturday instruction for Alameda Addison, still in grammar school, whom Miss de Santène regards as having "not mere talent, but genius."

Some of Alameda's pictures, which she sent to the Galerie Duncan in Paris, where her own work is exhibited, received special note in an article by Claire Alma, well-known Paris art critic. Miss de Santène hopes later to bring Alameda to New York

to be with her own two daughters and pursue her art.

Miss de Santène continues to criticize the work of all of the students who send it to her, and at Christmas she replenished art supplies for all of them. She and her husband and daughters expect to return to Montana next summer, and she hopes to conduct another course on the reservation, where she can now count on friends to welcome her.

Mr. SCHWEIKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ERVIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON MOBILE TRADE FAIR ACTIVITIES

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report on mobile trade fair activities, for the fiscal year ended June 30, 1970 (with an accompanying report); to the Committee on Commerce.

REPORT OF COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on management of federally financed research by the University of Michigan—A Case Study, dated September 25, 1970 (with an accompanying report); to the Committee on Government Operations.

## EXECUTIVE REPORT OF A COMMITTEE

As in executive session, the following favorable report of a nomination was submitted:

By Mr. YARBOROUGH, from the committee on Labor and Public Welfare:

Malcolm R. Lovell, Jr., of Michigan, to be an Assistant Secretary of Labor.

## BILLS INTRODUCED

Bills were introduced, read the first time and, by unanimous consent, the second time, and referred as follows:

By Mr. YARBOROUGH:

S. 4397. A bill authorizing the Secretary of Agriculture to carry out a program for flood prevention and other purposes in the Lower Rio Grande Basin, Texas, to enhance and stabilize the agricultural economy of the area; to the Committee on Agriculture and Forestry.

S. 4398. A bill to authorize a program providing two academic years of post-secondary education for all citizens of the United States prior to reaching the age of 26; to the Committee on Labor and Public Welfare.

(The remarks of Mr. YARBOROUGH when he introduced the bills appear below under the appropriate heading.)

By Mr. BAYH:

S. 4399. A bill for the relief of Maria Grazia Iaccarino; to the Committee on the Judiciary.

## S. 4397—INTRODUCTION OF A BILL PERTAINING TO FLOOD PREVENTION IN THE LOWER RIO GRANDE BASIN OF TEXAS

Mr. YARBOROUGH. Mr. President, I introduce, for appropriate reference a bill authorizing the Secretary of Agriculture to carry out a program for flood prevention and other purposes in the Lower Rio Grande Basin of Texas, to enhance and stabilize the agricultural economy of the area.

This bill would provide for the implementation of recommendations contained in a report prepared by the Soil Conservation Service made in July of 1969. This report entitled "Comprehensive Study and Plan of Development—Lower Rio Grande Basin, Texas" is the product of an intensive 4-year examination of the Rio Grande Valley's serious flooding and drainage problems.

The people of south Texas, and particularly those engaged in trying to make a living off the land have always been at the mercy of natural disasters. It seems that every year we hear that another devastating hurricane has destroyed the life and livelihood of many of these hardy people. The winds wreak unimaginable havoc, but the aftermath of severe flooding ususally poses a threat of equal magnitude to the farms and communities of the Rio Grande Basin. Perhaps we do not yet possess the technology to control or harness the winds of a full-blown hurricane, but we do have the ability and responsiblity to do something about the flooding whether it is generated by a hurricane or not.

For example, the implementation of the provisions contained in this bill would have prevented the severe flood damages which occurred early this past summer in Willacy County located at the southern tip of Texas. Between 14 and 17 inches of rain fell on the county during a single 2-week period. It is estimated that 13,000 acres of grain sorghum and cotton were completely destroyed, and another 10,000 acres suffered at least a 50-percent loss. Altogether, 23,000 acres of crops in the county were either severely damaged or destroyed, and the local economy experienced a loss of over $3 million.

This bill would authorize $84,805,000 to be appropriated for the purpose of watershed protection and flood prevention in Willacy, Hidalgo, and Cameron Counties. We cannot continue to ignore the severity of the problem in this area through an inadequate, piecemeal program. The agricultural economy of the Rio Grande Basin requires that we implement a concerted, comprehensive attack on the problems of flooding.

My bill is a companion to a similar measure offered in the House by Congressman DE LA GARZA.

Mr. President, I ask unanimous consent that the bill which I have introduced be printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. GRAVEL). The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 4397) authorizing the Secretary of Agriculture to carry out a program for flood prevention and other purposes in the Lower Rio Grande Basin, Tex., to enhance and stabilize the agricultural economy of the area, introduced by Mr. YARBOROUGH, was received, read twice by its title, referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

S. 4397

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Congress recognizes that flood problems of the Lower Rio Grande Basin, in Willacy, Hidalgo, and Cameron Counties, Texas, are of such a magnitude and interdependence that such problems must be treated on a basin-wide basis and such area exceeds that authorized to be treated under the Watershed Protection and Flood Prevention Act (Public Law 83–566), hereinafter referred to as Public Law 83–566, and it is the intent of Congress to provide with respect to such area for the cooperation by the United States with the State of Texas and its political subdivisions, soil and water conservation districts, flood prevention and control districts, and other local public agencies, for the purpose of preventing erosion, floodwater and sediment damages, and to provide for the conservation, development, utilization, and disposal of water, and thereby preserve, protect, and enhance the Nation's soil and water resources, the quality of the environment, and provide for the general welfare.

SEC. 2. The Secretary of Agriculture is hereby authorized and directed to carry out the plan for flood prevention, and the conservation, development, utilization and disposal of water (Phases I, II, III) substantially in accordance with the recommendations therefore contained in the Comprehensive Study and Plan of Development, Lower Rio Grande Basin, Texas, dated July 1969, prepared by the United States Department of Agriculture in cooperation with the Texas Water Development Board, the Texas State Soil and Water Conservation Board, and the Texas Water Rights Commission, a copy of which is on file with the appropriate Committee of the House of Representatives and the Library of Congress, at an estimated Federal cost hereunder of $84,805,000, which amount is hereby authorized to be appropriated.

SEC. 3. The Secretary of Agriculture is directed to utilize, to the extent feasible, ongoing programs in the carrying out of Phase III of the plan herein authorized: *Provided,* That the Secretary shall be authorized to provide financial and other assistance for accelerating the installation of land treatment measures for runoff and waterflow retardation and the control and prevention of erosion, floodwater, and sediment damages, and to cooperate with farmers and ranchers, and other landowners, operators, and occupiers in the installation of soil and water conservation practices and measures, including changes in cropping systems and land uses, needed to conserve and develop the soil, water, woodland, wildlife, and recreation resources of farm and other lands within the area included in subwatershed plans and as provided in such subwatershed plans, such assistance to be comparable to the assistance provided for planning and installing similar practices and measures under Public Law 83–566, as amended, or as may hereafter be amended, and other existing national programs: *Provided further,* That the portion of the costs of such practices and measures needed to protect structural works of improvement installed with Federal assistance

should be that part determined by the Secretary to be necessary and appropriate to effectuate the timely installation of such practices and measures.

SEC. 4. Prior to participation in the installation of the structural works of improvement on non-Federal lands, cooperating non-Federal entities shall furnish assurances satisfactory to the Secretary of Agriculture that an adequate land treatment program is being or will be installed to provide necessary protection to the watershed lands and planned structural measures; that such entities will acquire all land rights needed in connection with the installation of such works of improvement and in such acquisition there may be used such Federal cost-sharing assistance as may be available under other Federal programs; and that such entities will operate and maintain all upstream structural works of improvement on non-Federal lands, after installation, in accordance with the provisions for non-Federal participation described herein or as may be required under other similar Federal programs.

SEC. 5. Except as herein otherwise provided, the provisions of the Watershed Protection and Flood Prevention Act (Public Law 83–566) shall apply to the furnishing of assistance hereunder.

---

## S. 4398—INTRODUCTION OF POST-SECONDARY ACT OF 1970

Mr. YARBOROUGH. Mr. President, I introduce, for appropriate reference, a bill entitled "The Postsecondary Act of 1970," to extend the concept of free public education in America beyond the high school years to embrace 2 additional years of postsecondary education. This bill provides for a system of educational assistance allowances to be paid directly to eligible students, amounting to $2,000 for each academic year of full-time study for maximum of 2 years. It also provides for cost-of-instruction allowances to be paid to the institutions involved. Eligible persons would be those legally authorized and accredited institutions offering not less than 2 years of postsecondary work. These would include not only academic institutions, per se, but also technical institutes and vocational schools.

Mr. President, we have come a long way in our efforts as a nation to give each individual an equal chance when it comes to educational opportunity, but we have not progressed far enough along that road. Thomas Jefferson believed that a free and prosperous people must be intelligent and educated, but he was unable to demand more than 3 years of free schooling for the people of his day and age, though he believed more was needed. Jefferson also thought that basic free education was the means to discover the finest talent in the general population, rich and poor, that might be drawn out for professional education and leadership positions.

By 1850, the battle for acceptance of the idea of free public education through the elementary grades had been won. By 1900, free public education through high school years was generally accepted by our citizens. These two steps in educating all of our youth were regarded as a natural right, a provision of society made in the interest of an enlightened citizenship and a more economically efficient and productive working force. This type of education was accepted because society itself demanded it for its protection and stability. Youth received this social opportunity so that youth might in turn render a greater social obligation.

Now I ask that this same general principle be extended to the 14th year as the new minimum level of free public education as the right of all citizens who can accept it with profit. This right to a free publicly supported education through the 14th year already exists in one of our States, California, and it is provided for in the original constitution of another State, Indiana. It is time now, I suggest, to extend this principle across the country on a nationwide basis, on the ground that it is in the interest of the public welfare of this country to provide higher educational opportunities for every citizen, to the extent of his capacity.

The need for this extended educational opportunity is virtually self-evident in our society. We are in a situation where less than half—46 percent, according to the U.S. Office of Education—of our young people of college age are receiving any postsecondary education. Of those who do attend college, 50 percent drop out and do not obtain degrees. Most of this attrition comes in the critical first 2 years, and it is well known that one of the major reasons for dropping out of college, or for the failure of many qualified high school graduates to attend college in the first place, is the lack of adequate financial resources on the part of the potential student. This bill would answer that need, by making funds available for all students, however disadvantaged, to support those first 2 years.

Who would benefit from this legislation? The most disadvantaged group, the young, poor, unskilled, undereducated residents of our rural areas and our urban slums and ghettos would have new doors of opportunity opened to them, to obtain the skill, training, or education needed to pursue worthwhile, meaningful careers in life. We are beset with a strange paradox in our present-day society, Mr. President, wherein we have widespread unemployment on the part of the poor, unskilled, undereducated youth while at the same time there are unfilled jobs in many of our professions.

It is also pertinent to note that the latest report of the President's Commission on Violence in America attributes the highest incidence of crime to the young, poor, unskilled, undereducated persons in our big-city ghettos; those for whom life seems to hold no promise, even at an early age. This bill, then, holds promise to fulfill both the needs of our youth, the most valuable commodity we have, and of society itself, which is badly in need of trained, skilled, educated people. Mr. President, I would like to offer this quote from Thomas Wolfe as a concluding thought: "So then, to every man his chance." Can we do less than to give to these young people their chance in life, and also benefit our society greatly at the same time?

I ask unanimous consent that this bill be printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. GRAVEL). The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 4398) to authorize a program providing 2 academic years of post-secondary education for all citizens of the United States prior to reaching the age of 26, introduced by Mr. YARBOROUGH, was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

S. 4398

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Post Secondary Education Act of 1970."

STATEMENT OF PURPOSE

SEC. 2. The purpose of this Act is to extend the concept of the free public school system to two years of post-secondary education.

DEFINITIONS

SEC. 3. For the purpose of this Act the term—

(1) "Commissioner" means the United States Commissioner of Education;

(2) "eligible person" means a citizen of the United States.

(3) "eligible institution" means an education institution, whether or not such institution is a nonprofit institution, which (a) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (b) is legally authorized to provide a program of education beyond secondary education, (c) provides an education program for which it awards a bachelor's degree or provides not less than a two-year program which is acceptable for full credit toward such a degree, and (d) is accredited by a nationally recognized accrediting agency or association or, if not so accredited, in an institution whose credits are accepted, on transfer, by not less than three institutions which are so accredited, for credit on the same basis as if transferred from an institution so accredited, or which is a business or trade school or technical or vocational institution which meets the provisions of clauses (a), (b), and (d), except that if the Commissioner determines there is no nationally recognized accrediting agency or association qualified to accredit any category of such institutions, he shall appoint an advisory committee, composed of persons specially qualified to evaluate training provided by such institutions, which shall prescribe the standards of content, scope, and quality which must be met in order to qualify such institutions as meeting this definition and shall also determine whether particular institutions meet such standards;

(4) "program of education" means any curriculum or any combination of unit courses or subjects pursued at an eligible institution which is generally accepted as necessary to fulfill requirements for the attainment of a predetermined and identified educational, professional, or vocational objective, and includes any curriculum of unit courses or subjects pursued at an eligible institution which fulfill requirements for the attainment of more than one predetermined and identified educational, professional, or vocational objective if all the objectives pursued are generally recognized as being reasonably related to a single career field.

AUTHORIZATION

SEC. 4. (a) The Commissioner is authorized to pay an education assistance allowance

determined pursuant to subsection (b) to an eligible person who (1) has been accepted for enrollment in a program of education at an eligible institution, or, in the case of an eligible person already attending a program of education at such institution, is in good standing there as determined by the institution, and (2) is carrying at least one-half of the normal full-time course of study, as determined by the institution.

(b) An education assistance allowance for the purpose of this Act shall be paid at the rate of $2,000 for each complete academic year of full-time study, and—

(1) shall not be paid for more than two such years or an equivalent thereof in part-time study;

(2) shall be ratably reduced in the case of less than full-time study;

(3) shall be terminated on the date on which the recipient completes two such academic years of study;

(4) shall be paid only if the recipient is maintaining good standing in the program of education which he is pursuing, according to the regularly prescribed standards and practices of the institution which he is attending; and

(5) may be paid in such installments and may be subject to such adjustments (including withholding) as the Commissioner deems necessary for the purpose of this Act.

APPLICATIONS

SEC. 5. Applications for education assistance allowances pursuant to this Act shall be made at such time and in such manner, and shall contain or be supported by such information, as may be prescribed by the Commissioner.

COST OF INSTRUCTION ALLOWANCES

SEC. 6. The Commissioner shall pay a cost of instruction allowance to each eligible institution on account of the attendance at such institution of an eligible person while receiving an education assistance allowance pursuant to this Act. Such cost of instruction allowance shall be paid at the rate per academic year of full-time instruction of an amount equal to $1,000 less the tuition charge for such year, adjusted for less than full-time attendance.

PROHIBITION

SEC. 7. Nothing contained in this Act shall be construed to authorize any department, agency, officer, or employee of the United States to exercise any direction, supervision, or control over the curriculum, program of instruction, administration, or personnel of any educational institution.

AUTHORIZATION

SEC. 8. There are authorized to be appropriated such amounts as may be necessary to carry out the provisions of this Act.

## ADDITIONAL COSPONSORS OF BILLS

S. 4039

At the request of the Senator from Nevada (Mr. BIBLE), the Senator from Utah (Mr. MOSS) was added as a cosponsor of S. 4039, to amend the Internal Revenue Code of 1954 to provide income tax simplification, reform, and relief for small business.

S. 4348

At the request of the Senator from Pennsylvania (Mr. SCHWEIKER) the names of the Senator from Connecticut (Mr. DODD), the Senator from Wyoming (Mr. HANSEN), the Senator from Vermont (Mr. PROUTY), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Alaska (Mr. STEVENS), and the Senator from North Dakota (Mr. YOUNG) were added as cosponsors of S. 4348, to make assaults on policemen, judges, and firemen a Federal crime.

## SENATE RESOLUTION 471—ORIGINAL RESOLUTION REPORTED RELATING TO PERMISSION FOR SENATE EMPLOYEES TO TESTIFY IN FEDERAL COURT

Mr. McCLELLAN, from the Committee on Government Operations, reported an original resolution (S. Res. 471) relating to permission for Senate employees to testify in Federal Court, which was considered and agreed to.

(The remarks of Mr. MCCLELLAN when the resolution was agreed to appear earlier in the RECORD under the appropriate heading.)

## SENATE RESOLUTION 472—SUBMISSION OF A RESOLUTION TO PROVIDE ADDITIONAL FUNDS FOR THE COMMITTEE ON PUBLIC WORKS

Mr. BYRD of West Virginia (for Mr. RANDOLPH) submitted a resolution (S. Res. 472); which was referred to the Committee on Rules and Administration, as follows:

S. RES. 472

*Resolved*, That the Committee on Public Works is hereby authorized to expend, from the contingent fund of the Senate, $60,000, in addition to the amount, and for the same purposes and during the same period, specified in Senate Resolution 326, Ninety-first Congress, agreed to February 16, 1970.

## AMENDMENT OF OMNIBUS CRIME CONTROL AND SAFE STREETS ACT OF 1968—AMENDMENT

AMENDMENT NO. 948

Mr. KENNEDY. Mr. President, I am today submitting the Urban Crime Amendment to H.R. 17825 which will be considered by the Senate on Tuesday.

This amendment would add a new section to the Safe Streets Act which would leave the present State block grant and Federal discretionary grant provisions intact, but would authorize, in addition, a system of block grants to urban areas. The need for this provision is clear. The testimony in our hearings showed that despite the fact that Congress was prepared to authorize and appropriate an amount around the $1 billion level for Law Enforcement Assistance Activities and despite the urgent need for, and ability of the high crime urban areas to expand effectively such an amount, neither the Federal Office of Law Enforcement Assistance nor the State planning agencies, which distribute the block grants, were adequately geared up to handle that level of funding. Thus the request was only for $480 million and the House authorization was for only $650 million.

My amendment provides the urban areas with significant additional funds based on a population formula, without adding substantially to the administrative burden of the State or Federal agencies. It assumes that we can have the same kind of faith in the local governments as the act places in the State governments, and thus it allows the funds to be used at the discretion of the grantee for a long and broad—although not unlimited—list of proven and urgently needed innovations or improvements in law enforcement and criminal justice. After suitable opportunity for public and SPA consideration and comment, the urban jurisdiction would merely file its plans for making eligible expenditures from its block grants, and it then would receive an amount of $5 per capita if adequate appropriations are provided. Based on the 1960 census, this would provide some $260 million to about 140 cities in 50 States, District of Columbia, and Puerto Rico, covering the 52 million people, one-fourth of our population, who live in the highest crime areas. The authorization in the amendment is set at $290 million to allow additional amounts for eligible counties and for population growth.

If we are to take the war on crime seriously, then we cannot ask our cities to wait another 2 or 3 years until the Federal and State bureaucracies are ready to handle the amounts Congress is prepared to invest in crime control. This amendment will avoid that delay by providing for a 3-year interim alternate route for the funds to get directly to the urban areas, after which time this route can be terminated if the other routes become adequate.

The PRESIDING OFFICER (Mr. GRAVEL). The amendment will be received and printed, and will lie on the table.

## SOCIAL SECURITY AMENDMENTS OF 1970—AMENDMENT

AMENDMENT NO. 949

Mr. SCHWEIKER submitted an amendment, intended to be proposed by him, to the bill (H.R. 17550) to amend the Social Security Act to provide increases in benefits, to improve computation methods, and to raise the earnings base under the old-age, survivors, and disability insurance system, to make improvements in the medicare, medicaid, and maternal and child health programs with emphasis upon improvements in the operating effectiveness of such programs, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

(The remarks of Mr. SCHWEIKER when he submitted the amendment appear earlier in the RECORD under the appropriate heading.)

## FAMILY ASSISTANCE ACT OF 1970—AMENDMENTS

AMENDMENT NO. 950

Mr. ANDERSON. Mr. President, I am submitting an amendment today to H.R. 16311, designed to restrict the scope of the welfare bill presently before the Committee on Finance.

Mr. President, on June 30, the chairman of the House Appropriations Committee, the Honorable GEORGE MAHON, informed the House of Representatives that our Federal budgetary situation is deteriorating. The administration estimates that in the fiscal year which just

ended, there was a deficit of $11 billion in the Federal fund budget. During the current fiscal year, a further deficit of $10 billion is expected. This means a 2-year deficit of $21 billion. It is little wonder that Mr. MAHON characterized the budgetary situation as deteriorating.

Unfortunately, there seems to be little hope that the next fiscal year, fiscal year 1972, will see a balanced budget. Recently, the Committee on Finance had before it representatives of the Treasury Department and the Budget Bureau defending the need to increase the public debt limit. As my colleagues know, this limit has had to be raised substantially because of the 2-year, $21 billion deficit that I have already described. In executive session on the debt limit bill, Treasury Under Secretary Volcker made a gloomy prediction. He told the committee that "it would take a miracle" for the administration not to have to come back for a further increase in the $395 billion debt limitation next June. This means, Mr. President, that the administration expects and anticipates that it will be submitting a Federal fund budget in the red again next January.

One of the major reasons I am sure that the administration anticipates another deficit year is due to their expectation that the Congress will enact the administration welfare bill currently pending before the Committee on Finance. This bill would increase the number of welfare recipients from 10 million to 24 million, and would add at least $4 billion to Federal welfare costs in the first year. I can only wonder how the President can justify to himself vetoing a congressional appropriation bill for the Department of Health, Education, and Welfare as being too costly and vetoing a bill to extend the Hill-Burton Hospital construction program as being too costly—while at the same time asking the Congress to more than double the welfare rolls.

The amendment I am submitting today, Mr. President, will allow us to make some needed improvements in the welfare program, while at the same time restricting the expansion of welfare. First, the effect of my amendment will generally be to limit eligibility of families for welfare to the kinds of families eligible for welfare under present law. These are families in which the father is dead, absent, incapacitated or, at State option, unemployed. Under present Health, Education, and Welfare regulations, unemployment is defined as working less than 35 hours in most States extending aid to families with an unemployed father. Under my amendment, unemployment would be defined in the law as having less than 10 hours of employment and earnings of less than $20 in a week.

My amendment would strengthen and improve certain work incentive features of the law by disregarding a portion of earnings for purposes of determining eligibility of families for welfare. This will make some families eligible for welfare who are not now eligible, families headed by mothers who work. My amendment retains the features of the administration bill requiring States to guarantee a minimum monthly income of $110 to aged, blind, and disabled persons. However, under my amendment, the States would define blindness and disability for welfare purposes, as they do now, rather than the Secretary, as proposed by the administration.

Mr. President, we all agree that there is a need to improve the present welfare programs. It is not necesary, however, to more than double our welfare rolls under the guise of "welfare reform." Our budgetary situation is serious, and I believe this is a time for fiscal responsibility rather than largesse.

Mr. President, I ask unanimous consent that the text of my amendment be printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. MATHIAS). The amendment will be received and printed, and will be appropriately referred; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 950) was referred to the Committee on Finance, as follows:

AMENDMENT NO. 950

On page 7, between lines 14 and 15, insert the following:

"Exclusion of Certain Families

"(f) Notwithstanding any other provision of this part, no family shall be paid a family assistance benefit under this part for any period during which there is present the male parent of any child or children in such family unless (A) such parent is incapacitated or (B) such parent is unemployed and the agreement entered into pursuant to part E by the State in which such family resides provides supplementary payments to families described in clause (B) of section 451.

"Unemployed Male Parent

"(g) For purposes of subsection (f) of this section and clause (B) of section 451, the male parent of any child or children shall be considered to be unemployed for any week if—

"(1) during such week, he is employed for less than 10 hours and earns less than $20; and

"(2) is not eligible, for such week, to receive unemployment compensation under any Federal or State unemployment compensation law."

On page 12, line 4, strike out "A parent" and insert in lieu thereof "subject to the preceding sentence, a parent".

On page 23, line 15, immediately after "part," insert the following: "(A) to any family other than a family in which the male parent of the child or children is present and is not incapacitated, or (B) at the option of the State,".

On page 27, beginning with the word "other" on line 15, strike out all through "unemployed" on line 18, and insert in lieu thereof "described in clause (A) or (B) of section 451 (as the case may be under such agreement)".

On page 56, lines 18 to 21, strike out "and if it included assistance to dependent children of unemployed fathers pursuant to section 407 as it was in effect prior to such enactment".

On page 65, line 17, insert "and" immediately after "institutions;".

On page 65, line 24, strike out "related; and" and insert in lieu thereof "related.".

On page 66, strike out lines 1 through 5.

On page 67, line 9, insert "and" immediately after "State;".

On page 67, line 14, strike out "aid;" and insert in lieu thereof "aid.".

On page 67, strike out lines 15 through 21.

On page 84, line 5, strike out "made." and insert in lieu thereof "made.' ".

On page 84, strike out lines 6 through 8.

On page 85, strike out lines 10 through 25.

On page 94, lines 17 and 18, strike out "as defined by the Secretary in accordance with section 160(b)(4)".

## ADDITIONAL COSPONSORS OF AMENDMENTS

AMENDMENT NO. 905, TO SENATE JOINT RESOLUTION 1

At the request of the Senator from Massachusetts (Mr. KENNEDY), the Senator from South Dakota (Mr. MCGOVERN) was added as a cosponsor of amendment No. 905, to Senate Joint Resolution 1.

AMENDMENT NO. 915, TO H.R. 17604

At the request of the Senator from New York (Mr. GOODELL), the Senator from Texas (Mr. YARBOROUGH) was added as a cosponsor of amendment No. 915, to H.R. 17604.

AMENDMENT NO. 932, TO S. 4268

Mr. WILLIAMS of New Jersey. Mr. President, on Tuesday, September 22, 1970, Senator PERCY and I sponsored amendment No. 932 to S. 4268 for the purpose of permitting the Export-Import Bank of the United States to grant long-term low-interest loans to Israel for the purchase of defense articles and defense services. I ask unanimous consent that the names of the Senator from New Jersey (Mr. CASE) and the Senator from South Dakota (Mr. MCGOVERN) be added as cosponsors of amendment No. 932 to S. 4268.

The PRESIDING OFFICER (Mr. GRAVEL). Without objection, it is so ordered.

## ADDITIONAL STATEMENTS OF SENATORS

### SERMON BY REV. DR. EDWARD L. R. ELSON AT U.S. MILITARY ACADEMY, WEST POINT, N.Y.

Mr. BYRD of West Virginia. Mr. President, all of us in the Senate are well aware of, and admire, the articulate and thoughtful manner in which our beloved Chaplain, Dr. Edward L. R. Elson, in his regular invocations for this body, pinpoints our basic needs and calls upon Almighty God for the guidance which only He can give as we struggle with the often overwhelming problems confronting us. We feel privileged to enjoy Dr. Elson's ministry. However, the time allotted to him, as the result of the Senate's pressing duties, is very short. I know that we would benefit immeasurably, were we to have the opportunity to hear him at greater length. Consequently, I am pleased to ask unanimous consent to have printed in the RECORD the text of Dr. Elson's sermon when he spoke as guest preacher of the three services in the U.S. Military Academy at West Point, on September 20, 1970.

There being no objection, the sermon was ordered to be printed in the RECORD, as follows:

THE BOOK COMES ALIVE

(A sermon by the Reverend Edward L. R. Elson, S.T.D., Minister of the National Presbyterian Church and Chaplain of the United States Senate, in the Cadet Chapel, U.S. Military Academy, West Point, N.Y., on the occasion of the presentation of Bibles to the members of the fourth class by the American Tract Society, Sunday, September 20, 1970)

"I will not forget thy word." Psalm 119:16b.

The pioneer American faced the frontier and the future with three instruments in his hands. He carried an axe, a gun, and a book. With the axe he felled the trees, built his home, his school, his church. With the gun he hunted game for his table, pelts for his livelihood and protected himself from predatory forces of the wilderness. His book was the authority for his worship, the text book for his education and the guide to the erection of his political institutions.

Today's American no longer carries the axe and the gun. His axe has become his vast industrial empire. His gun has become the arsenal of the free world. His book and the person revealed in it is still alive and the pervasive influence in American life.

George Washington began the practice of laying hands on the Holy Bible as the President takes the oath of office.

Thomas Jefferson compiled passages of his own and they are still published as the "Jefferson Bible."

A graduate of this institution, President Ulysses S. Grant, declared, "Hold fast to the Bible as the sheet anchor of your liberties. Write its precepts in your hearts and practice them in your lives. To the influence of this Book we are indebted for all the progress made in true civilization and to this Book we look as our guide in the future."

Another graduate of this Academy, during his convalescence from his first heart attack, Dwight D. Eisenhower, invited me to his Gettysburg farmhouse to dedicate it with the reading of the scriptures and with prayer. Shortly after lunch he stood in a parade-rest stance in front of the fireplace and remarked, "We were both brought up on daily family prayers and reading from the Bible. During our Army days we lived in twenty-two different quarters. This is our first home. We have talked about a dedication service. It is fitting now that our pastor should lead us in this dedication by the use of the words of scripture and prayer." President Eisenhower was thoroughly familiar with the content of the scriptures.

When a British monarch is crowned, the Archbishop of Canterbury takes a volume and places it in the new King's or Queen's hands and says:

"We present this Book, the most valuable thing that this world affords. Here is wisdom, the Royal Law; these are the oracles of God."

Sir Walter Scott once declared, "There is but one book." That book of course is the Bible, a veritable library of sixty-six separate books, thirty-nine in the Old Testament and twenty-seven in the New Testament.

The Book was not only the source of worship and education but was the guide to the founding our our political institutions, as former Chief Justice Earl Warren points out:

"I believe no one can read the history of our country without realizing that the Good Book and the Spirit of the Savior have from the beginning been our guiding geniuses. . . . I believe the entire Bill of Rights came into being because of the knowledge our forefathers had of the Bible and their belief in it. Freedom of belief, of expression, of assembly, of petition; the dignity of the individual, the sanctity of the home, equal justice under law, and the reservation of powers in the people. . . . I like to believe we are living today in the spirit of the Christian religion. I like also to believe that as long as we do so, no great harm can come to our country."

How fortunate we are that the scriptures we have today are more accurate, more reliable, and more interesting than at any time in history. Archeology, ancient manuscripts, the discovery of the Dead Sea Scrolls, and techniques of language research have put our generation closer to original sources than any other generation in all history. And we may rejoice that the Bible, or some part of it, is now available in the languages spoken by ninety-seven per cent of the world population.

We are not the only people of a Book, for the Moslems have their Koran—but we are uniquely the people of this Book—the Holy Bible.

What a book this is. It is a library containing books by different authors, known and unknown, books of varying literary quality and widely divergent spiritual values. Law and prophecy are here, together with ancient wisdom, literature, and poetry. Here we listen to the thunders roll and mark the lightning flash as the Law is given at Sinai, and a motley crowd of nomads are welded into a nation under the glow of an incandescent faith. We hear the sound of "running history" as we observe the footsteps of God making broad His path in the history of the chosen people. We see the panorama take shape before our eyes. We catch the melodies of the singers as they break forth into triumphant praise before the mighty acts of God, or rise from the depths in plaintive tones as men bow before the chastening of a righteous God. The seraphic eloquence of Isaiah lifts us, and the passionate pleadings of Jeremiah grip our hearts and we catch visions of faroff things yet to be. The stern tirades and cutting invectives of the shepherd Amos from Tekoa, and the dull moanings of Hosea's broken heart—together with the rapturous visions of Ezekiel—stir our emotions.

Where will you find poetry to match the words of the shepherd's psalm—especially as strength for a soldier:

"Though I walk through the valley of the shadow of death, I will fear no evil; for thou art with me. . . .

"Thou preparest a table before me in the presence of mine enemies; thou anointest my head with oil (healing); my cup runneth over.

"Surely goodness and mercy shall follow me all the days of my life and I will dwell in the house of the Lord forever."

Or consider the 46th Psalm written during the siege of Jerusalem by the Armies of Sennacherib in the year 701 B.C.:

"God is our refuge and strength, a very present help in trouble."

"He maketh wars to cease unto the end of the earth; (God is the peacemaker; he has his own timetable.) he breaketh the bow, (the ancient rifle) and cutteth the spear in sunder: (the ancient rocket) he burneth the chariot in the fire." (the earliest tank).

Then amid the tumult the writer calls out: "Be still, and know that I am God; . . ."

Or the poetry that rises in the New Testament:

"Now we see through a glass, darkly; but then face to face: now I know in part: but then shall I know even as also I am known.

"And now abideth faith, hope, charity, these three; but the greatest of these is charity."

Or think of all the wisdom and wit packed into the Proverbs with such passages as you find in chapter 12, verse 23:

"A prudent man concealeth knowledge: but the heart of fools proclaimeth foolishness."

Where is there better music than in the Magnificat when Mary sings: "My soul doth magnify the Lord, and my spirit hath rejoiced in God my Saviour."

Or let the voices of the congregation or choir be caught up in the words of Venite: "O come let us sing unto the Lord. Let us heartily rejoice in the strength of our salvation. Let us come before His presence with thanksgiving; and show ourselves glad in Him with songs."

There are many acts and many scenes in the Bible but the supreme actor is God—making Himself known, revealing His laws, incarnating Himself in the Saviour, guiding, disciplining, and empowering His own people.

The Bible is not an object of worship—that is bibliolatry, nor is it a talisman or good luck charm—but it is the record of the God whom we worship and His dealing with man. It contains the enduring truths about God, about man, his redemption, and his ultimate destiny. The Bible is not a scientific manual but it is the chief source book for the queen of sciences—theology—"the science of God."

Look at some ways the Bible may profitably be read today:

1. Read the Bible as literature, for it is the supreme work of literary art. No other document bound in one volume contains such a wide variety of literary forms in such high quality as does the Bible. Considered solely as literature, it takes its place among the classics and merits the attention of all men in every generation.

2. Read the Bible as history. It is history. It is His story. It does not contain all history but the history it does contain is trustworthy as a record of God's redemptive acts for man's salvation. It is a book of sacred history—the history of how salvation and new life have entered into the life of man.

3. Read the Bible for its biographies. One of the proofs that it is the Word of God is that it is so true to life. The Bible portrays man as he really is and as he ought to become. It reveals man in the depth of his sin and the majesty of his manhood. How deeply a person can become absorbed in the career of Abraham or Moses—of Amos or John the Baptist—or Saint Paul. For drama, is there anything to equal Samson and Delilah? There is Delilah—beautiful and sensuous, seducing the mighty Samson until he yields his secret and in the end loses his power because he withdraws his dedication to God. Today's screen portrayals, with all their vivid intimacies, produces nothing more explicit than you will find in the Bible. Read the Bible for its biographies revealing man in his sin and folly, and in his redemption and rise to the heights of moral and spiritual grandeur.

4. Read the Bible as the inspired Word of God. God is a person and in the Bible He is communicating with persons. Spiritual things are spiritually discerned. The Book is understood when the reader approaches it with reverent and believing heart. Get beyond the words to The Word. *Hear* what God is saying. *See* what God is doing through this Book. And in the end its message will find permanent lodgment in the heart, expression in daily life, and become a lamp that will light the pathway through the generations. Comprehension of the Bible comes when the Holy Spirit, who is the author of its message, is present in the mind and heart of the reader. Come to it in the mood of worship and prayer. Learn to worship God in the Bible way.

5. Read the Bible because it contains the truth about Jesus Christ. It is His only authentic biography. Read it because you find Him in it. Jesus knew and used the Scriptures.

As a boy in the Temple He astounded the

rabbis with His knowledge of the Bible. To launch His public career He went into the synagogue at Nazareth and stood up before the congregation, opened the scriptures to the prophecy of Isaiah and read:

"The spirit of the Lord is upon me, because He hath anointed me to preach the gospel to the poor. He has sent me to heal the broken-hearted, to preach deliverance to the captives, and recovering of the sight to the blind, to set at liberty them that are bruised, to preach the acceptable year of the Lord."

Then: "He closed the book and gave it again to the minister, and sat down. And the eyes of all them that were in the Synagogue were fastened on him."

With these words from the 61st chapter of Isaiah, he set out upon his radiant mission. Whenever he preached or taught he drew on the ancient Hebrew scriptures. Whenever religious experts and synagogue lawyers, the scribes and the pharisees, tried to trap him in their frequent debates, he would say, "Does not the Scripture say . . .?" and then go on to drive home his point.

Then when he came to his suffering on the cross and faced the ultimate question, crying out "My God—Why?" he drew upon the Scripture, and after declaring "It is finished!"—his very last words were a paraphrase of the 31st Psalm, verse 5: "Father, into Thy hands I commend my spirit."

If Jesus found the words of holy Scripture to be a central source of power for His life, how much more do we on the lower levels of life, struggling to follow in His footsteps, need the wisdom and the strength which come from the knowledge of His Holy Word.

Let us pray, in the words of the Book of Common Prayer:

"Blessed Lord, who hast caused all holy Scriptures to be written for our learning: Grant that we may in such wise hear them, read, mark, learn and inwardly digest them, that by patience, and comfort of Thy holy Word, we may embrace and ever hold fast the blessed hope of everlasting life, which Thou hast given us in our Saviour Jesus Christ." Amen.

## GOLDEN JUBILEE OF HISTADRUT—ADDRESS BY SENATOR HUGHES

Mr. CRANSTON. Mr. President, the Senator from Iowa (Mr. HUGHES) made a significant speech on the Middle East recently in Minneapolis. I believe this is a particularly appropriate time to bring the remarks of my distinguished and good friend to the attention of the Senate.

I ask unanimous consent that his speech be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR HAROLD E. HUGHES, MINNESOTA TRADE UNION COUNCIL FOR HISTADRUT, HISTADRUT GOLDEN JUBILEE CELEBRATION, AUGUST 23, 1970

I am addicted to a modern American proverb, the origin of which is unknown.

It goes like this: "There is no solution; seek it lovingly."

As we work to preserve the way of life we prize and the country we love, we have no guarantee that we will be successful.

We have only faith that we will hand down to our children a heritage and not a holocaust.

But this is a mystery of life that all generations have shared.

If your house or your neighbor's house is on fire, you do your best to put it out. You don't stop to figure the odds.

It has always been this way. Suppose the ragged men at Valley Forge had stopped to figure the odds. We would be listening to Queen Elizabeth on television, not President Nixon.

The same individual qualities of faith and courage and staying power that brought us through then are still legal tender.

And we are not without examples, in this country and abroad, today.

Tonight we celebrate the 50th Golden Jubilee Year of Histadrut, the Labor Union of Israel.

In paying tribute to Histadrut, we honor the working men and women of the world everywhere, and we salute a nation that is a profile in courage and initiative, the nation that made the desert bloom.

No action you members of the Trade Union Council could take would be more beautifully appropriate than to build a memorial in Israel named for Walter Reuther.

Walter Reuther, like Golda Meir and Moshe Dayan, is a symbol of the value of a single individual in a mass world.

It was my privilege to have a long telephone visit with Walter on the Friday afternoon before his tragic and untimely death.

As always, I got sparks from what this Great American had to say—the kind of sparks that make you move ahead to bigger objectives and forget about the odds.

My personal impression of Walter Reuther was one of sudden sunlight and quick lightning. Within him were the contrasts of greatness. He was the toughest of fighters against injustice, and at the same time a compassionate worker and a prophetic planner for human betterment.

What you are doing to help Israel is magnificently consistent with what Reuther stood for. Building schools and hospitals, caring for children, improving the lot of working people—these are direct routes to a better world.

The work of Histadrut teaches us a lesson which should be heeded in all of American foreign policy. Building a nation requires more than building an army. However necessary certain defense measures may be, they do not, by themselves, aid the long-term growth or development of a nation.

Israel has made enormous social progress, despite its necessarily high budgets for defense. Its people have attained a literacy rate of 90 percent, which is three times the rate of their Arab neighbors. Compared with the United States, Israel has as many hospitals and 50 percent more doctors per capita, and Israelis have a greater life expectancy than Americans.

Israel's progress contrasts sharply with most of the Arab states, who lag far behind in medical facilities, literacy, and life expectancy, and where the military factions rest on shifting sands and on the backs of subsistence farmers.

America's long-range goal is to bring economic and social progress to all of the Middle East. But those developments require peace, and peace today is in short supply.

The Middle East is now on the verge of renewed fighting. The situation is changing daily, but there can be no doubt that it is volatile.

The conflicts in the Middle East are many and varied, as you all know. Sometimes, however, I think we focus too much on the East/West or Arab-Israeli aspects of the situation and ignore other profound divisions in the area. The Arab countries are themselves divided along many lines: rich and poor, stable and unstable, radical and conservative, actively belligerent and passively hostile.

These many lines of conflict make any settlement much harder to achieve. What Egypt might accept, Syria might well reject; what Jordan would favor, the guerrillas would likely oppose. Such facts make any real "solution" almost impossible. For a long time to come we will probably be faced with deeply rooted tensions, suspicions, and disagreements.

These problems have been with us for many years. What is new this year—and particularly disturbing—is the rapid increase of Soviet military involvement in the area. The Soviet Navy has become active in the Mediterranean and now has major base facilities at Alexandria. The Russians are sending in 15 to 20 thousand military advisers. These men have increased their role from merely training Egyptian forces to manning the Surface-to-Air Missile sites (the SAMs) and recently even to flying planes against Israeli aircraft.

The Russians seem to be repeating in Egypt our own myopic slide into Vietnam. They haven't learned that a little military involvement is a dangerous thing.

The more deeply involved the Russians get—for whatever reasons—the more likely they will feel compelled to stay. Rather than helping the Egyptians, the Russians might come to view the conflict as a test of their prestige. They might take us to the brink of a world war in order to avoid being viewed as a "pitiful, helpless giant."

Soviet involvement is not the only cause of increased tensions in the Middle East, but it is a major and inescapable one. All sides must tread carefully, for the slightest rumblings now could set off a war like nitroglycerin.

We all know that if the Soviet Union were not so deeply involved, especially with its own armed forces, the Middle East would be much more stable. We all know that the Israelis can defend themselves heroically, magnificently, and Heaven knows, successfully. And we all know that lasting peace will come to the Middle East only when outside forces stop trying to foment revolutions within the nations of the area.

American policy toward the Middle East has followed a sound and steady course for the past two decades. Historically, we have supported Israel and its right to exist and be recognized as an equal among nations. We have supported international restraints on the conflict in the area. We have offered friendship and development assistance to all willing nations.

This policy is based on our moral and spiritual commitment to Israel, on the belief in the rule of law rather than force, and on friendship to all who reciprocate it.

The United States does not want to inflame tensions or widen divisions in the Middle East. We would all prefer the nations of the area to work together peacefully and productively.

There is no reason to change this policy. It still serves true American interests. Those interests are not simply economic investments, but include our word as a nation and our respect for basic principles of international law.

Our choice is not between oil and Israeli survival—and it must never be posed that way. We can have both if we base our relations with the countries of the Middle East on the principles of mutual respect, national integrity and survival, and freedom of exchange in ideas and goods.

The Middle East is an arena of great conflict and, potentially, a major war. Although there are some superficial similarities to the troubles in Indochina, the situations are fundamentally different.

In both regions, it is true, there are external powers deeply and destructively involved. Both conflicts spring from intense ethnic antagonisms and contests for control of territory.

But Israel is a different and much better ally.

Israel has a democratic government which reflects the political forces within the nation and which is responsive to the needs of the people. The Government in Saigon is not democratic, is not representative of the political groups in the country, and is far from responsive to the needs of the people.

Israel is fighting for its survival in a hostile environment, but it asks only American diplomatic support and sales of military equipment. While Israel makes such sacrifices for its defense, the Saigon generals demand continued American sacrifices of blood and treasure. Some of our so-called allies even demand bonus payments to fight on our side.

The Israelis are strong and independent; the Saigon government demands a veto on our actions.

The Israelis are willing to take substantial risks for peace. No nation in the Middle East wants peace more. But the Saigon generals are so fearful of peace that they put its advocates in jail.

The Middle East conflict is different from the one in Indochina in other respects as well. There are defined borders and visible front lines around Israel. In Indochina there are the ambiguities of areas, ruled by one group in the daytime and another at night.

The outside powers involved in the Middle East recognize their mutual interest in preserving peace. In Southeast Asia, some nations see more to be gained by continuing war.

As a result of these differences, the American stake in the outcome is much greater in the Middle East than in Southeast Asia. American withdrawal from Indochina would force the various political factions to reach some kind of accommodation. But the withdrawal of U.S. support for Israel would leave that valiant country naked prey to armies bent on genocide.

The situations are different—as different as night and day; or as right and wrong.

Two weeks ago the chances for peace suddenly brightened. Israel and Egypt agreed to begin indirect talks on a political settlement. Those talks were to be freed from military pressures by a cease-fire lasting at least 90 days. During the cease-fire, neither was to extend or improve its military position along the Suez Canal.

The basis for a settlement now exists. The Israelis have removed the roadblocks to an agreement which troubled the Arabs most. In particular, Israel now has agreed to consider withdrawal from some of the territories occupied during the 1967 war. In return, of course, Israel demands full recognition of its right to exist within secure borders. Israel has also shown a willingness to make some final settlement with the Palestinian Arabs.

The Arabs—or at least some Arab leaders some of the time—have spoken as if they could accept recognition of Israel and its legitimate security needs. They must also, of course, agree to control their own populations to prevent raids against Israel.

I do not say that the chances for a lasting settlement now are good. But the cease-fire and talks are a necessary and welcome first step.

Where we go from here depends on how well we handle the present crisis over the cease-fire.

Let us first remember one major fact: If this crisis goes unresolved much longer, all-out war is the likely result.

The prelude to the 1967 war showed that Israel cannot wait for the other side to strike first. Its margin of survival is too small.

And since Israel defense rests on the entire population, the nation cannot remain long in a state of mobilization. We have to act soon before fears and suspicions destroy the present opportunity to move a little closer to a lasting peace.

Our major problem today is how to preserve the cease-fire and achieve productive talks. But talks will never be successful in an atmosphere of uncertainty over compliance with the cease-fire agreement. Full compliance is absolutely essential in order to preserve peace in the Middle East.

But what are the facts? The Israelis say that the Egyptians and Russians are moving missiles toward the Suez Canal; the State Department says that American evidence is "not conclusive."

I don't know what the truth is. I wish I did. What have we bought with these billions of dollars for electronic devices, U–2 planes, and reconnaissance satellites?

If this were Vietnam, I am sure that our government would have released full-color photographs and detailed analyses of the number of one and two humped camels near the Suez Canal.

Instead of clearcut evidence either way, the State Department says that it will examine the Israeli evidence and then communicate privately.

This kind of secrecy and evasiveness are unacceptable. The American people deserve to know the truth.

Perhaps the evidence is truly ambiguous, but if there is honest disagreement, we should discuss it candidly.

It is imperative that we be open and unequivocal about our policy in order to avoid misunderstanding and miscalculation.

If the Egyptians are violating the agreement, we must do all within our diplomatic power to insure compliance. And we must stand ready to provide Israel with whatever is necessary to maintain its military security along the Canal.

Whatever we do must be done openly, leaving the Soviet Union with no doubts about our determination to get full compliance with the agreement and, at the same time, leaving the Israelis with no doubts about our firm support for their right to live within secure borders.

Those who love Israel and are committed to the support of her sovereignty and security both within her borders and elsewhere, can only pray for peace for their brave little country.

Man for man, no nation was ever abler or more determined to defend herself. But the fatal arithmetic of 3 million Israelis surrounded by 50 million Arabs must make it apparent to anyone what would happen over the long run to this gallant people if this fighting goes on as it has been going this past year.

I completely agree with Dayan that we "bear a heavy responsibility," since we initiated the cease-fire, and the Israelis agreed to it only after we informed them that the Soviets would abide by the stand-still.

I agree with the long-standing Israeli position that eventually Israel and Egypt must negotiate, themselves, directly or indirectly.

In the meantime, in the steps leading up to this, it is essential that we do not take too arbitrary, conventional, or simplistic an approach.

Negotiation that is not focused on the realities would be futile. Negotiation simultaneously on all of the diverse and widely conflicting aims of the various Arab nations would be predestined to failure.

The cease-fire is a start, but only a start. It must be validated; this is our burden, as I see it.

The stakes are too high, the risks are too great, to resolve these disputes over violations on the basis of aerial photographs that can be interpreted in different ways.

Analysis of photographs takes too long. It would be tragic if the chances for peace were lost now because intelligence estimates arrived too late to enable us to move quickly to expose and rectify any violations.

The only way to get adequate answers to our questions and satisfactory proof on the different allegations is to make direct inspections of military installations within the truce zone. In the present climate of suspicion, the only groups likely to be acceptable in such a role are joint Soviet-American inspection teams. Unless we both assume the responsibility for maintaining an effective cease-fire and standstill truce, the last chance for peace may slip away.

Senator Cranston of California and I proposed such joint inspection teams in a letter to Secretary of State Rogers. Last Friday, we wrote in part:

"We urge you to move forcefully now to take what we believe would be a dramatic and effective means of maintaining the ceasefire and standstill by urging the Soviet Union join with us in establishing joint inspection teams to patrol along both sides of the line. These teams, sent along the ground and in small observation planes, would enable us to detect ceasefire violations almost as soon as they occur. Indeed if we had had such teams when the ceasefire went into effect, the earlier violations could have been exposed and corrected. Moreover, the presence of such teams would have a sobering effect upon local commanders who might otherwise be tempted to improve their tactical positions during this period.

"If we and the Soviets act now it will enable Ambassador Jarring to move ahead with his diplomatic efforts and lessen the danger of a return to the expensive and costly bloodletting along this front. More importantly, joint inspection teams would reassure both parties that their military positions would not be jeopardized while the talks are going on. Hopefully as the talks proceed and the prospects for peace improve it may be possible for American-Soviet inspection teams to be replaced by Egyptian-Isareli teams."

Such inspection teams might be difficult to establish—and their task certainly would not be easy. These teams are not meant to be permanent, but would operate only until other effective steps could be found to preserve the cease-fire. All sides would benefit from this insurance against violations.

In this complex situation, there must be an unconquerable search within the realistic context of the negotiable issues for the hidden keys, the unexpected symbols that might get the wheels truly moving . . . however slowly.

Recently the Egyptians returned to Israel a wounded pilot who had been shot down during an August 3rd raid on Egyptian positions along the Suez Canal.

Maybe this was plainly and simply a public relations ploy.

But whatever it was, it was a human being restored to his people and a humane deed, even if not for all of the right reasons.

I have been as concerned as any American about the treatment of our prisoners of war in the hands of the North Vietnamese. But I have also contended that our best assurance of decent treatment of our prisoners of war is for our government to use its influence on behalf of humane treatment for all prisoners, including those taken by ourselves and the South Vietnamese forces.

A week ago last Tuesday, more than 100,000 Jews gathered at the Wailing Wall Jerusalem to begin their lamentations over the destruction of the Temple, according to the Rabbinical calendar, 1,900 years ago.

For the benefit of these people who have suffered so much through the centuries; for the benefit of the Arabs and Arab refugees who, except for the blind revolutionaries, must also long for peace; for the benefit of peace-seeking people all over the world; our government must act decisively, fairly, and imaginatively to open up new options for peace in the Mideast.

---

## THE SUPERSONIC TRANSPORT

Mr. SCOTT. Mr. President, the Senate Appropriations Subcommittee on Transportation will soon be marking up the bill for the Department of Transportation. The most controversial item in that measure calls for expenditure

of $289 million for a continuation of the prototype development of the supersonic transport.

Like many other Senators, I have been disturbed by the questions raised about the environmental impact that a fleet of SST's would have. I am also concerned about the possibility that the private financial sources in this country might not wish to put up the funds necessary to finance production of these aircraft. At the same time, however, I recognize that we are well along with the development of prototype aircraft, having spent over $700 million on the project. Therefore, failure to proceed with the prototype on the basis of the questions raised would mean defaulting on a potentially viable market without adequate knowledge of all the factors involved.

In this frame of mind, I invite the Senate's attention to the article on this subject written by Henry C. Wallich, published in Newsweek of September 21, 1970. In my view, it is a clear statement of the situation we face. Mr. Wallich also shares the concerns of many about this aircraft; but as he says in the article:

> It seems clear that the U.S. has little to gain and much to lose from terminating the SST project. We shall have to build.

He correctly identifies the issue. It is not, as the opponents of the SST would have us believe, the question of whether or not SST's will be flying in the 1970's. It is, rather, whether there should be an American SST flying in the 1970's. The only way we can keep that option open is to proceed with the development of the prototype.

This does not mean, however, that we must commit ourselves at this time to production of this aircraft. Indeed, it would be foolish to do so before we are sure of two things—first, the environmental impact that a fleet of SST's would have, and second, the commercial viability of the design itself. It is the environmental question about which we have heard so much in the past few months. So let me outline the current environmental research and development program that is now being conducted to study the supersonic transport.

The pending request for appropriations to continue work on the SST totals approximately $290 million. Of that request, over $12 million will be spent by private industry for environmental research. Independently of the total request for funds, the prime contractors will spend over $3 million to study the associated environmental problems.

In addition, the administration is embarking upon a massive 3-year, $27 million environmental research program to study the supersonic transport. During the current fiscal year alone, the Department of Transportation will be spending over $2.5 million on environmental problems. The National Aeronautics and Space Administration will be allocated nearly $4.4 million for similar study. And the Air Force will be conducting its own studies with a separate appropriation of $1.3 million. It is important to note that all of this coordinated environmental research will be devoted only to the study of the SST and its effect on the environment, and I urge its continuation but on an even greater scale. I, therefore, urge that an additional $5 million be appropriated this year for continued environmental research on the SST.

During the course of the administration's 3-year SST environmental research program, attention will be focused on three major anticipated problems: Noise, radiation, and weather modification. All of the resources of the Federal Government and private industry must continue to be brought to bear upon the problem of noise suppression, reduction and control. Radiation research must continue to be conducted at high altitudes to make the necessary determinations. Weather modification research must continue to be conducted on all phases of weather and climatological problems. Clearly, this administration must continue to spend a great deal of money and expend a great deal of effort to find out just what kinds of environmental problems we might expect with a fleet of SST's. In my own study of the SST and its development to date, I noted with great interest that President Kennedy, who initiated this program in 1963, never mentioned the effort that would have to be made to determine the environmental impact of the SST, although I am certain that many people in Government were well aware of the problem at that time. I mention this only to demonstrate our deep concern, 7 years and two Presidents later, over these important environmental considerations. The Nixon administration has wisely separated the building of the prototype from the possible production of the commercial fleet. What we are engaged in here, therefore, is primarily research and development; and we are in no way committed to proceed with production if that research indicates that it would be environmentally dangerous or uneconomical, in any way, to proceed with commercial production. This fact is well known to the Department of Transportation and others charged with administering the program, but it is still unnoticed by the public at large. The kinds of objections being raised in the mail I and other Senators are receiving on the subject makes that very clear.

I think we in Congress have a responsibility, therefore, to go beyond simply repeating the assurances the administration has made to the effect that construction of the prototype does not commit us to production. We need positive and straightforward language which will assure the American public that the SST will be compatible with the protection of our environment or it will not be allowed to fly. We need to support the research on environmental matters connected with the SST which the administration is conducting, research which will bring the completion of the prototype total close to $30 million. I urge that it be made abundantly clear in the language of the act itself that commercial flights will not be permitted to commence unless adequate environmental research has assured that there will be no environmental dangers inflicted upon the American public by a commercial fleet of SST's. I also urge that the language of the bill be written to make it clear that no public funds appropriated by Congress will go for the production subsidy. For my part, I will not support the production phase of the SST unless the essential environmental problems are solved following completion of the prototype phase. That is why I am urging continued appropriation for the prototype to determine whether or not we can solve these critical problems.

I am not a member of the subcommittee and, therefore, will rely upon those capable and distinguished Senators who are to wrestle with the problem. However, I urge them to include in the language of the bill the kinds of assurances I have discussed and which, in my view, the American people need if they are to give support to this program.

I ask unanimous consent that Mr. Wallich's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE SST

Congress is now debating whether to appropriate $290 million to build two prototypes of the Boeing supersonic transport. If by voting down this appropriation we could ground all supersonic flights, I would favor terminating the project. The nuisance that the plane will cause to man at rest or at work outweighs its convenience to man on the wing. Sideline noise at the airport, takeoff roar nearby, sonic boom wherever it goes at full speed, will make the plane a prime nuisance. Disturbance to the upper atmosphere is a remote but serious threat. The traveler's gain in time is unimpressive particularly when measured portal to portal instead of from end of departure delay to beginning of arrival stack. Rarely will so many be bothered on any day to save so little time for so few.

Some of the SST's opponents, with engaging parochialism, talk as if Congress, by denying the money, could keep all such planes from being built. Unfortunately, Congress cannot. The Franco-British Concorde—as well as the Russian TU-144—is already flying. If the Concorde proves technically and commercially viable, the only remaining question is whether the various nuisances are to be produced by their plane or ours. We cannot escape.

It is futile to argue that we can have peace and quiet by simply denying the Concorde the right to land here. What we can have is a nasty argument with a number of friends and allies. We keep out their Concordes, they keep out our jumbo jets. Since we use more airports abroad than others use here, we probably are at the short end of the stick. The eventual outcome is foreseeable: a compromise involving some noise abatement, presumably no supersonic flights over land, but all the rest pretty much as programed.

WILL CONCORDE FLY?

The question therefore is whether the Concorde will turn out to be viable. Before the plane lifted off the ground, some skepticism was in order. But now that its tests have begun, these fears or hopes are beginning to fade. The plane has not yet shown that it can do its promised top speed, because the tests have not yet reached that phase. Reports have it that the Concorde is "gaining weight," i.e., that the designers are having to reduce its payload. But reduced commercial viability can probably be made up by come-

ons to the purchasers. A Concorde II, moreover, is said already to have entered the thinking stage. Seven American airlines and nine foreign ones are now lining up to buy Concordes. The Japanese and the Dutch are reported to be dickering with the Russians for the TU-144 plus some preferential air routes.

If the SST is not built, the consequences for the U.S. balance of payments will be pretty dramatic. The U.S. now is a strong exporter of planes. If the Concorde takes over the world market, we shall become a heavy net importer. The supposed stimulation of tourism, which has played a role in balance-of-payments calculations, I do not consider worth counting. I doubt that many tourists will pay premium fare for a chance to meet their maker at Mach 2.7. But even without tourism, the annual damage to the balance of payments, conservatively estimated, would be of the order of $1 billion till 1985, and with some imagination this can be parlayed above $3 billion.

WE MUST BUILD

It seems clear that the U.S. has little to gain and much to lose from terminating the SST project. We shall have to build. Nevertheless, the U.S. is not without options. We can rush to build the SST now, as is being proposed, or we can delay in order to let technology catch up with the plane, which is said to be rather ahead of our tested capabilities. Evidence of that are the big design changes which the plane has suffered since Boeing nosed out Lockheed for the contract. The SST even now is almost twice as big and almost half again as fast as the Concorde. But the plane will ultimately fly faster if built with more deliberate speed.

If such delay leads to more even sharing of the world airplane market, this would not be a total disaster. The British—less so the French—need exports too. If they can sell some Concordes, we may have to lend them less money next time there is need to stabilize the pound. But the decision whether to proceed posthaste with a commercial SST or simply continue development work is not yet upon us. The issue now is whether to keep our options by building the prototypes, or drop out altogether. Clearly we must build

## DIRECT POPULAR ELECTION OF THE PRESIDENT

Mr. SPARKMAN. Mr. President, I cannot think of any issue that we have debated in recent years that so profoundly affects the American way of life, and the future stability of this Nation, as this proposal for direct election of the President and Vice President of the United States.

I am opposed to the resolution for many reasons. While I realize that the electoral college system has its defects—it is not perfect—these defects can be eliminated by a constitutional amendment which would reform, not abolish the present presidential election process. I favor electoral reform but not the present proposal.

In a word, I see no justification for dismantling completely a system which has served this Nation so well down through the years.

Mr. President, I am much persuaded by the views of those joining in the minority report from the Judiciary Committee. I was particularly persuaded by the view that the electoral-vote system, operating as it has down through the years, makes it necessary for a successful candidate for the Presidency to put together, not just a majority, but a broadly based majority, both geographically and philosophically. The system encourages moderation. It encourages compromise and conciliation, and it discourages extremism. We often hear it said of present-day Americans that we are becoming polarized, and I believe that this is alarmingly true. The polarization of political thought in this country contributes significantly to the difficult times in which we live. This is not a time to discard entirely a basic working part of a political system that has brought us through the difficult—indeed perilous—times of the past.

In all this time the electoral college has been assailed vociferously from all sides. It has been condemned as a "tool" of every imaginable interest. Conservatives have attacked it for producing liberal Presidents; liberals have attacked it for producing conservative Presidents. It has been assailed as favoring both major political parties, and all sections of the country, at one time or another.

But the fact remains that the electoral college has provided us with an extraordinary number of outstanding men in the White House who have entered the office with a solid demonstration of public support and have governed the Nation honorably and well.

To quote from the minority views of members of the Judiciary Committee who opposed the Bayh amendment:

It [the electoral college] has given us men who, by and large, have been free from the corrupting influence of faction precisely bebause their method of election forces them to understand the public good as something more than the sum of the interests of their friends.

It has given us Presidents who have been for the most part independent of Congress and the States, but well aware of the powers and prerogatives of both.

I am still quoting the minority report:

In short the electoral college, in conjunction with the party system which grew up in response to it, now produces . . . an energetic and independent and yet responsible and limited Chief Executive. Thus, it will not do to say that the electoral college is antiquated or outmoded; no more viable institution, nor a more salutary one, will be found today.

The minority report goes on to say that the abolition of this proven mechanism and the substitution of direct election of the President would destroy the two-party system, radicalize public opinion, endanger minority rights and undermine the federal system by removing the States as States from the electoral process.

I hold with these views.

Mr. President, the phrase "direct election" is both appealing and deceptive in its simplicity. There is little wonder that the polls that have been taken nationally show a large majority of Americans in favor of "direct election." I am quite confident that if a national poll were taken on the proposition "Do you believe that our political system should provide protection for minorities against the majority," you would get equally large percentages in the affirmative column. I would hope that this debate in the Senate—and with the help of the press it will be so—I would hope that this debate will bring home to the American people the dangers that accompany tampering with a proven, workable system. There is much talk about how it might not have worked in such-and-such a year if so-and-so had happened, but the truth is that it not only works, but it has done a good job of providing this country with distinguished leadership down through the years.

In his first inaugural address, President Thomas Jefferson declared:

The will of the majority is in all cases to prevail, but that will, to be rightful, must be reasonable.

By "reasonable majorities" Jefferson meant those which would be disinclined or unable to interfere with the rights of others. Accordingly, in this debate on electoral reform, the crucial question is whether one method of election is better than another at creating reasonable majorities.

In other words, one method might be better in obtaining a strictly numerical majority, at the price of failing to safeguard minorities, while another might protect minorities very well indeed, but at the price of frustrating a truly reasonable majority.

In presidential elections, the electoral college seeks the ideal approach to a reasonable majority by attempting to strike a golden mean: that is, numerical majorities which are moderate in character. It grants a certain preference to numbers, in this case greater representation for the more populous States.

But it denies, quite properly, that numbers alone should be the exclusive criterion, hence minimum representation for the least populous States. In other words, the electoral college attempts to satisfy qualitative, as well as quantitative goals.

These goals include the strengthening of the Federal system by giving the States as States a say in the selection and election of Presidents. Another goal is the desirability of representing certain interests whose only drawback is the lack of great numbers. A third is the desirability of imposing institutional restraints upon the abuse of power in the office of the Chief Executive.

I do not think anyone would deny that our two-party system has done an indispensable job in promoting the dual purpose of American politics: majority rule with minority rights.

Since both parties face the same requirements in all States, an electoral majority, when it does emerge, is both geographically dispersed and ideologically moderate. The victorious party is therefore capable of governing in the best interests of the great majority of the people. The electoral college, in sum, produces truly competitive, State based, moderate political parties.

One of the gravest dangers of the direct election to the American political system is the runoff election, with its encouragement of splinter parties. With a runoff, it is not only possible, but probable, that many candidates will enter the presidential race. The consequences of this are not pleasant to consider.

Prof. Alexander Bickel of Yale Law School declared in this connection—I quote him:

I think it altogether probable that under a system of popular election the situation would be as follows: the runoff would be, not an occasional occurrence, but the typical event. The major party nomination would count for much less than it does now—and might even eventually begin to count against a candidate. There would be little inducement to unity in each party at or following conventions. Coalitions would be formed not at conventions, but during the period between the general election and the runoff. All in all, the dominant positions of the two major parties would not be sustainable.

This sort of unstructured, volatile, multiparty politics may look more open. So it would be—infinitely more open to demagogues, to quick-cure medicine men, and to fascists of left and right. It would offer, no doubt, all kinds of opportunities for blowing off steam and for standing up uncompromisingly for this or that cause, or passionately for one or another prejudice. But people who think that our democracy would become more participatory fool themselves. Weaker, yes. More participatory in real sense, no.

While men continue to take varying positions on issues, compromise and coalition remain unavoidable. The only question is when and how coalitions are formed and compromises take place. Coalitions are now formed chiefly in the two-party conventions, which are relatively open and accessible and can certainly be made more so. In a multiparty system, the task of building coalitions will be relegated to a handful of candidates and their managers in the period between the election and the run-off. The net result will simply be that the task will be performed less openly, and that there will be less access to the process. Governments will be weaker, less stable and less capable than our governments are now of taking clear and coherent actions. Where multi-party systems have been tried, they have been found costly in just these ways, and they have scarcely yielded the ultimate in participatory democracy or good government. Nor have they lasted.

Under the American party system, our political parties are essentially State-dominated. The so-called "national" parties are, in fact, coalitions of State parties, and the State parties, in turn, are coalitions of county and local party organizations. Thus, the major parties are organized from the grassroots up, which enables them to accommodate a wide diversity of competing interests at the State and local level, and helps to keep elected officials responsive to State and local needs.

The thing that brings all these party units together is the campaign, every 4 years, to capture the Presidency. The role of the States as States is paramount in this procedure. And this structure of the political parties reinforces the power of the States as members of the Union.

The minority report of the Judiciary Committee—which I quoted earlier—states in this connection:

The most obvious symbol of the State orientation of the major parties is the national convention. Delegates come to the conventions as representatives of their States, and voting power is allocated in proportion to electoral vote strength. The direct election of President, of course, would destroy the utility of having delegates selected or votes distributed in this manner.

There would be no reason whatsoever for the States as such to be represented; delegates would most likely represent interest groups.

Let me again refer to the minority report—quoting:

The electoral college asks, in effect, "Who is the choice from Texas." "California." And so on. In so doing, the electoral college shores up the power of the States of the Union. The commonly voiced argument that the Presidency is a "national" office and therefore demands a "national" constituency ignores a most important fact.

For the term "National," as applied to the United States, must include the most distinctive feature of our Constitution, a Constitution which established—in the words of Mr. Justice Chase—"an indestructible union of indestructible States."

Some people may have lamented that phrase, but none can deny its impact and significance. Nor can any proposal to change the presidential election system ignore it, without upsetting the entire balance of the Constitution. The Senate should weigh this carefully before voting to make any changes in the presidential election.

The Senate also should be careful to preserve those institutions that are essential to the maintenance of political equality. Paramount among these, certainly, is the federal system.

Mr. Theodore White, author and political analyst, has testified that the direct election would drastically change the nature of our presidential campaigns. He declared:

Our Presidential campaigns right now are balanced in each party to bring a compromise, to eliminate the extremes of both sides, and create a man who has at least the gift of unifying his party and thereafter the nation.

Once you go to the plebiscite (direct) form of vote, you get the more romantic, the more eloquent and the more extreme politicians, plus their hacks and TV agents polarizing the nation rather than bringing it together.

The same authority, Theodore White, added:

If States are abolished as voting units, TV becomes absolutely dominant. Campaign strategy changes from delicately assembling a winning coalition of States and becomes a media effort to capture the largest share of the national "vote market."

Instead of courting regional party leaders by compromise, candidates will reply on media masters. Issues will be shaped in national TV studios, and the heaviest swat will go to the candidate who raises the most money to buy the best time and the most "creative" TV talent.

Let me just add one word regarding the possibility of contested elections if our present system were abolished. Ernest Brown, professor of law at Harvard stated that under a direct election of President—and I quote him—"the mere fact of contest is a disaster." He added:

Close elections lead to contests. And with direct election, the contest would be nationwide. Every ballot box, every voting machine, would be subject to contest.

It is easy to see how the uncertainties surrounding a recount, to determine the outcome of a close presidential election, could paralyze the Nation. The mechanical aspects of a sizeable recount would be dangerous enough. However, if legal questions concerning voter qualifications and other matters were raised, as they surely would be raised, the period of the recount would be nothing short of chaotic, as the minority report of the Judiciary Committee warned.

Under the present system, the popular vote in most States most of the time is insulated against challenge and recount. Professor Brown testified regarding this:

The present system insulates the States. When the vote is counted by the States, the area of the contest is kept local.

Prof. Charles Black of Yale Law School, commenting on the same subject, testified:

We now have a compartmentalization of the recount problem, like the compartmentalization of a ship. If it springs a leak in one part, that part is sealed off from the others. The recount problem is an infrequent incident, because very often the State in which fraud is charged or error is charged will be one which, on inspection of the electoral totals, does not matter anyway.

Mr. President, we hear a great deal these days about participatory politics. There is the legitimate concern in the country that groups of citizens—whether because of race or age or whatever—may not feel that they have an opportunity to participate in the governmental process. I certainly feel that our system of government should provide the opportunity for all citizens to be involved. In my opinion, the direct election method proposed by Senate Joint Resolution 1 will be a step in the wrong direction. My feeling in this regard is shared by Theodore White, and he expressed it this way in testimony to the Senate Judiciary Committee:

Finally, in politics, I believe there are things that are more important than statistics and vote counting. There are communities. We live in a world of communities which have been balanced and put together by our federalized American system. I believe it is good and right that when somebody goes to the polls in Boston, Mass., he feels he is doing something about the Massachusetts vote, and when the Tar Heel from North Carolina goes to the polls he feels he is doing something for North Carolina.

I would not want to strip this sense of identity from the great historic communities of the United States of America in which each man feels he has a role to play in the larger role of his community for a role which makes him just one more digit, one of those electronic figures that will come cascading in at 70 to 80 million votes in a 6-hour period some November night in which he has no identity whatsoever.

Mr. President, the United States is a big country, with diverse regions and peoples and politics. It is no accident that we remain a strong and basically unified nation.

The system of Government under which we have lived and prospered for nearly 200 years has provided our Nation with strong and effective leadership while preserving the blessings of liberty for our millions of people. No other system of government has ever done so much.

All who have engaged in this debate agree that no system of electing the President and Vice President is perfect. I certainly agree that the electoral-vote system is not perfect. The fact remains, however, that it is the only system of any that has been proposed that has actually worked for almost 200 years.

I remember several years ago when my alma mater, the University of Alabama, had a very fine football season. In fact, I think that they had won every game that year. When they were not selected as the

No. 1 football team in the country, our coach, "Bear" Bryant, was asked for his comment, and he said "winning ought to count for something."

Mr. President, I feel very much that way about the electoral-vote system. Working ought to count for something, and the system has worked for about 200 years. If it needs some improvement, then let us get about the business of improving it. But let us not entirely discard a basic part of the system in favor of an untried and drastically different method.

## A LETTER FROM PRESIDENT NIXON TO DR. JAMES McCAIN, PRESIDENT OF KANSAS STATE UNIVERSITY

Mr. DOLE. Mr. President, I have with me a copy of a letter written by President Nixon to Dr. James A. McCain, president of Kansas State University.

Dr. McCain is one of the outstanding college presidents in America. He became president of Kansas State College on July 1, 1950. Since then, Dr. McCain has guided Kansas State to its present full university stature with an enrollment of more than 14,000 students.

During times of great turmoil and disruption on many of our university campuses, Kansas State University, with the leadership of Dr. McCain, has remained strong and responsive.

Kansas State, now comprised of seven internal colleges and a growing graduate school, is not isolated. The student body includes young people from every State in this Nation and international students representing some 50 foreign nations. These students are just as aware on the national situation as any other student body in America.

President Nixon's visit to Kansas State University on September 16, and the university communities' response, proved that the overwhelming majority of young Americans—regardless of their political or ideological views—are respectful and responsive to words of reason.

I ask unanimous consent that President Nixon's letter to Dr. McCain be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
*Washington, D.C., September 18, 1970.*

Dr. JAMES A. McCAIN,
*President, Kansas State University,*
*Manhattan, Kans.*

DEAR PRESIDENT McCAIN: The tremendous reception that your university community gave me when I delivered the Landon Lecture on Wednesday was of course immensely heartening to me personally. But it was even more heartening because of its broader implications—implications that go beyond the occasion, and beyond Kansas State University itself.

Your students demonstrated dramatically that the mindless disrupters are not the voice of America's youth, and not the voice of the academic community. They showed that decency and courtesy are still cherished. By their example, and by their massive response to the few who did attempt to disrupt the meeting, they showed that there is a responsible majority and that it, too, has a voice.

I know that at Kansas State, as at our other colleges and universities, there are many and diverse views about the great issues that confront our country today. But these are questions about which rational people can argue rationally. Only those who fear the process of reason have cause to shout down those they disagree with.

What impressed me most at Kansas State was the willingness of the students to listen, and their determination to be allowed to listen. It is this determination that will restore our nation's colleges and universities as citadels of the honest search for truth.

The example set by the overwhelming majority at Kansas State will give heart and hope to those elsewhere who are equally determined to be allowed to listen. Their example will hasten the day when leaders in public life once more can routinely appear on college campuses, to meet with students, to discuss the great issues with them, to listen and be listened to—and when it will cease to be news that they are able to do so. It will hasten the day when respect for the rule of reason rather than the rule of force is once more recognized, in all of our great educational institutions, as the first prerequisite of academic life.

I am most grateful for your own gracious comments about the occasion. I hope you will also pass on to your students my gratitude for their warm reception, my appreciation of their courtesy, and my deep respect for the understanding they displayed of what a great university is all about.

With every good wish,
Sincerely,

RICHARD NIXON.

## RETIREMENT OF JOHN S. FORSYTHE

Mr. CRANSTON. Mr. President on September 15, a truly great public servant retired from the service of the Senate. John S. Forsythe was a committee counsel's counsel. He spent 19 of the past 21 years as the top lawyer, first, for the House Education and Labor Committee, and then and until September 15 for the Labor and Public Welfare Committee. It was in this latter capacity that I came to know and respect Jack Forsythe and greatly value his counsel.

During my 18 freshman months in the Senate and in service on the Labor and Public Welfare Committee, Jack has been of the greatest assistance to me and my staff. He is a man of his word, wise in the ways of the Hill, its committees and the world. He never was anything less than generous with his time and good counsel. He made my job as chairman of the Subcommittee on Veterans' Affairs a great deal easier and was most cooperative on a number of amendments I was able to succeed in offering to various bills in the full committee.

I know that all in the Senate who know Jack are saddened by his departure. Yet, we all wish him well in his new work and hope for him and his wife a somewhat more leisurely pace than the hectic one he always maintained on the Hill.

## THE BRAVE PEOPLE

Mr. CURTIS. Mr. President, for the past 5 years and more Americans have been held imprisoned by the North Vietnamese and denied even the most basic rights provided for by the Geneva Convention on war prisoners. The Government of North Vietnam is a signatory to these Geneva agreements but has consistently flouted the letter and spirit of the international accord.

Americans are being fed less than minimum diets and their wounds are often unattended by any medical personnel. They have been beaten and tortured and held up to open public ridicule.

They are even denied the right to communicate with their families and to receive mail and messages direct from their homes.

In spite of this the men have held up well. They have not broken. They have not succumbed to the enemy's pressure to use them as propaganda against their country. And here at home the families of these men, although deeply concerned and in mental turmoil, have held up remarkably against the pressure from the radical leftists who coax and cajole them to allow themselves to be used for anti-American propaganda purposes.

We can be proud of the record of these brave people, both those in prison and those who wait for the prisoners' release. We can do no less than support them at every step in the long battle to get the men released and returned to their homes. Liberty-loving individuals throughout the world should not still their voices until these men are released.

## PRESIDENT'S COMMISSION ON OBSCENITY AND PORNOGRAPHY

Mr. DOLE. Mr. President, since the Gathings investigation in 1952, Congress has held numerous hearings on the effect of pornography on the individual and American life. The increasing proliferation of obscene literature has been documented; its marring effect on the dignity of the individual has been exposed; and its stain on the very moral fiber of this Nation has been shown. From these hearings, Congress saw that the traffic in obscenity was a matter of national concern. It was recognized that a thorough investigation to determine relationships between pornographic materials and antisocial behavior was needed. It was hoped that such an investigation could serve as the basis for recommendation of means to curtail the proliferation of pornographic materials.

To this end, Congress passed and the President, on October 3, 1967, signed Public Law 90–100, creating the Commission on Obscenity and Pornography.

Next week this Commission will submit its report to the President and to Congress. And I must say that many concerned individuals look forward to its publication with some apprehension. The news media have recently detailed indications of the majority report's contents and if these reports are accurate, the report will be a disgrace to the American public which has spent nearly $2 million to support the Commission's operations.

The Commission's preliminary draft was released to the press and indicated findings that pornography has no relation to crime or sexual deviancy, that there is no consensus as to its potential for harm to the public and that all local, State, and Federal laws against pornog-

raphy which affect adults should be repealed. Such conclusions are reprehensible, a monumental fiasco to the mandate given by Congress. They call for investigation of the Commission's operations. Such an investigation would find numerous irregularities, including evidence to show:

First. That at the first meeting, at the behest of Chairman Lockhard, the Commission adopted a secrecy pact, thus denying to Congress and the American public, information regarding their meetings, their studies, their records, and any other part of their work.

Second. That certain studies for "technical reports" were contracted without their full knowledge of the whole Commission and that certain of these technical reports as completed were unavailable to some members of the Commission.

Third. That the Commission's structure did not allow equal and thus effective imput for all Commission members.

Fourth. That Commissioners Hill, Link, and Keating were granted insufficient time, and inadequate space and resources with which to file their minority views.

Fifth. That the four panel reports: Legal, effects, traffic, and positive approaches lack adequate scientific studies and documentation, and that the conclusions are often not warranted by the facts.

Especially disturbing is the fact that the Commission virtually ignored numerous congressional investigations into pornography.

In 1969, President Nixon called for a citizens' crusade against the obscene, and asked for stronger legislation against the intrusion of sex-oriented advertising into the home. This week, the Senate heeded that call and unanimously passed the strongest antipornography bill in our Nation's history. But the tone and content of the majority recommendations of this Commission are in fundamental opposition to our action.

Mr. President, in the light of the irregularities in operation and the runaway nature of the report of the President's Commission on Obscenity and Pornography, I ask for a full investigation of it from its inception in January 1968. A first step in this direction can be taken very simply through a reading of the testimony of Commissioners Link, Hill, and Cline on Wednesday before the Senate Subcommittee on Juvenile Delinquency.

---

## ADDRESS BY ROBERT T. MURPHY, CIVIL AERONAUTICS BOARD

Mr. HANSEN. Mr. President, on August 25, the Honorable Robert T. Murphy, a member of the Civil Aeronautics Board appeared in Casper, Wyo., to address the Governor's Transportation Conference.

Mr. Murphy's appearance in Wyoming did much to restore the faith of the people of our State in the Federal Government's role in transportation. In the past several years, Wyoming, a State in which transcontinental transportation was pioneered, has suffered a great decline in the quality and quantity of air service. It is particularly distressing to our people because the economy and growth of Wyoming are tied to the ability to provide adequate and reliable transportation throughout the State.

Air transportation is very popular because of the vast distance between Wyoming's population centers. Mr. Murphy made it obvious to the people of Wyoming that at least one member of the Civil Aeronautics Board was vitally interested in the problems faced by sparsely populated States such as Wyoming and is working on a solution.

Mr. Murphy pointed out the need for adequate Federal subsidies and described the revision of the class rate which is now taking place and which is designed to insure that Federal subsidies will be spent by local carriers for improved service to our communities and will not be frittered away by them on facilities and equipment to compete with other airlines in the big city markets already saturated with service. He also discussed in detail the progress and difficulties which might result from use of air commuter carriers.

Mr. President, in Casper, Mr. Murphy said:

> I believe there is emerging today a whole new reason for fostering and strengthening air service to smaller communities which did not exist before.

I call it the demographic or ecological factor. In my view, if we could make it more possible for the residents of small communities to enjoy the best of both worlds, that is, the good life of the small town or city, and yet have available to them whenever they wished the social, cultural, and economic advantages of the large metropolis, we might be able to retard the surging migration to the great cities. My view is that regular, efficient air services at reasonable rates between the small towns and the great metropolis might reverse the tendency of our people to huddle in ever-increasing numbers on the fringes of our great cities with the resultant problems of air pollution, water pollution, urban plight and all the rest.

Mr. President, this statement has great significance and there is much to be learned from Mr. Murphy's address to the Governor's Transportation Conference. Senators from States suffering with problems similar to Wyoming's will find the article interesting in that it provides possible solutions to the problems presently being faced by such States. Senators from large, populous States should direct their attention to this speech because as long as the problems of the rural areas of this Nation are ignored, the political and social problems of our urban areas will be multiplied.

Mr. President, I ask unanimous consent that the address of the Honorable Robert T. Murphy before the Governor's Transportation Conference in Casper, Wyo., on August 25 be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE HONORABLE ROBERT T. MURPHY

It is a distinct privilege to join my old friend, Marv Stevenson, your able State Director of Aviation, here at the Governor's Transportation Conference in Wyoming. I was particularly pleased to find a number of old acquaintances such as Jerry Brooder, Jack Slichter and Dick Fitzgerald pooling their respective talents and experience at the very worthwhile panel discussion which took place this afternoon. As far as I am concerned it is always good to have a reason for returning to Wyoming and particularly to be able to share some views with the outstanding air transport experts who have gathered here at the invitation of Governor Stanley K. Hathaway.

The Governor has asked me to speak to you tonight on the problems confronting the local service airlines in providing service to rural areas of the United States and to explore with you the possibilities for providing third level commuter airline service particularly to some of the growing Wyoming communities which do not presently have air service. All of us on the Board are deeply concerned, of course, over the decline in air service to the small communities and together with our staff we have been grappling with the problem on a day-to-day basis in an effort to come up with some kind of solution which will preserve scheduled airline service to rural America without unduly draining the Federal Treasury.

I realize in discussing the problems of service to small communities with a Wyoming audience that I am speaking to experts and that there is little need to lay much background. You, in these Western states, live with small traffic points and know the problems which small communities and the airlines face in trying to maintain adequate air service. We have letters from Senator McGee, Senator Hansen and from Congressman Wold, pointing out only too clearly the problems of isolation and economic restraint which will befall your communities if air service is curtailed. I might point out that I am somewhat of an expert in this field myself since my own area of the country, New England, has experienced drastic curtailment of service by certificated airlines in recent months and years. Probably the most lucid and enlightening discussions of this whole matter occurred recently in the hearings held by the Senate Aviation Subcommittee, first in the West and later in Washington. Testimony before that committee by the communities, the airlines and our Board clearly portrayed the scope of the problem and brought out some of the constructive thinking which is being done to resolve it. I would like to give you my thoughts tonight about some of the plans which we are considering at the Board and which I expect to support in the months to come.

The starting point for any consideration of improved service to your communities is the Federal Aviation Act and, particularly, the provision which states that the carriers providing service which the Board has found to be required by the public convenience and necessity are entitled to such Federal payments as they may need "under honest, economic and efficient management, to maintain and continue the development of air transportation to the extent and of the character and quality required for the commerce of the United States, the postal service and the national defense." Mindful of that injunction by the statute, the Board has allocated subsidy through the years at levels sufficient to develop a thriving local transport industry serving America's smaller cities. Beginning about the middle sixties, the Board and the industry for various reasons undertook a program aimed at tapering down the annual subsidy payments of the local carriers year by year. From a high of $70 million of subsidy paid to the local service carriers in 1963, we had driven the amounts down until the Board's subsidy request for the present fiscal year was below $30 million. We accompanied this by route proceedings in which we tried to strengthen the local service carriers by awarding them

authorizations to operate in larger and longer traffic markets in the hope that the profits there would cross-subsidize service to smaller communities. We allowed them to overfly many smaller traffic points and generally strengthened their route structures. As we reduced the subsidies, however, the local carriers were disposing of their older, smaller propeller and piston aircraft and acquiring larger and more expensive jet equipment. The cost of borrowing money and wage costs also began to mount, traffic growth slowed, and the subsidy needs of the local carriers increased instead of decreasing as we had hoped. By 1969 the nine remaining local service carriers had a subsidy need of nearly $76 million but we paid them only $36 million under the so-called class rate formulas then in effect. This, of course, left them far short of their revenue requirements and resulted in substantial losses in recent periods. Unfortunately, the brunt of these losses has fallen on the small, low traffic points as the carriers have sought to stem the flow by curtailing or eliminating service to these low traffic and frequently isolated points.

In my view, the time has come to remedy this situation. The services of the local service carriers, particularly to the rural areas, must be maintained and we have the means to do so. Beginning early this year, the Civil Aeronautics Board puts its staff to work on a crash program to review the subsidy needs of the local service carriers for the present fiscal year. We have now found, as the result of this review, that as a group the local carriers will need a total of roughly $58 million in Federal subsidy to provide their certificated services for the fiscal year ending June 30, 1971. The Board had previously requested only $30 million for this period. We now know that this will leave them $28 million short of actual need. The additional money must be made available. Most of the local carriers are experiencing staggering financial losses, collectively and individually. This cannot continue. They must have the revenues to pay their employees, pay for financing their equipment and, hopefully, make some small profit so they can remain in existence. The stakes are high, particularly in the rural areas such as those in Wyoming where the breakdown of air service would cut off the life blood of the state. So the money must come from somewhere. There is little that can be done insofar as fares are concerned. I frankly believe we are bumping against the ceiling of public tolerance and patience in fare levels already and there is little more that can be squeezed from the traveling public in these isolated areas to keep the system going.

Additional subsidy is therefore the only answer at the present time. I do not consider that increasing subsidy now will be a retrograde step. Our previous efforts to curtail these Federal expenditures were well intentioned but subsidy at those levels simply will not meet the air service needs of 1970. The $58 million total subsidy which our staff found to be the minimum required has no fat in it. We have wrung out of the estimate many of the expenses incurred by the local carriers including some parts of executives' salaries and the costs of providing unnecessary services and we have taken full account of the revenues from the recent fare increases and other sources. In my view, therefore, the answer is clear and unmistakable and I would support a request from the Board to appropriate $58 million to sustain the local service operations during this fiscal year. I fear that any lesser amount would jeopardize the ability of these airlines already struggling under massive financial burdens to maintain the minimum required service. Only by making this money available can we avoid more and more urgent requests for abandonment and curtailment of services by these carriers at smaller traffic points.

I would like to digress here briefly to mention a view I have expressed in the past with regard to the importance of maintaining air service to these communities. I believe there is emerging today a whole new reason for fostering and strengthening air service to smaller communities which did not exist before. I call it the demographic or ecological factor. In my view, if we could make it more possible for the residents of small communities to enjoy the best of both worlds, that is, the good life of the small town or city, and yet have available to them whenever they wished the social, cultural and economic advantages of the large metropolis, we might be able to retard the surging migration to the great cities. My view is that regular, efficient air service at reasonable rates between the small towns and the great metropolis might reverse the tendecy of our people to huddle in ever-increasing numbers on the fringes of our great cities with the resultant problems of air pollution, water pollution, urban blight and all the rest. I believe, in short, that an overall review of our national priorities might suggest that the maintenance and expansion of air service to smaller communities is entitled to greater consideration and a greater share of our financial resources than it is now receiving. An additional $28 million in subsidy would be a small price to pay for such benefits.

What will we do at the Board with this additional subsidy money if it is appropriated? In other words, you might properly ask, can you at CAB assure that this money be spent by the local carriers for improved service to our communities or will it be frittered away by them on more powerful, faster and luxurious jet aircraft to compete with other airlines in the big city markets already saturated with service. I think that we at the Board are capable of preventing that and can make sure that the additional money is used for the vital task of serving small communities.

As you know, the Board determines the amount of subsidy to be paid on the basis of a so-called "class rate" under which the amount of subsidy paid is related roughly to the amount of service performed in subsidy-eligible markets. We are now in the process of studying means of revising the class rate formula. It is my hope and expectation, and it will be our goal in revising the rates, to find a formula whereby the amount of subsidy will be tied more closely and identifiably to the service provided by these carriers to small communities which have below average traffic density. We must provide positive subsidy incentive to the carriers to maintain an adequate volume of transportation to smaller communities. To do this, I think we can tie the new formula payments to such factors as (1) the size of the community served in terms of passenger boardings and level of service and (2) to the degree of isolation of the particular community, including the availability of alternative common carrier transportation, access to interstate highway systems and distance from primary communities of interest. I would hope that the new formula which we develop could be graduated so as to pay the highest rates of subsidy for service to communities with the lowest passenger boardings and the greatest isolation, with a reducing rate as these factors improve. Obviously, of course, other factors affecting subsidy need will also have to be considered when the final formula is adopted. As you can imagine, the development of an equitable and effective formula based on these considerations will be difficult, but I believe it can be done.

This brings me to the next point which Governor Hathaway asked me to discuss, namely, the matter of substitution of third level commuter airlines for the services of scheduled certificated carriers. Many of you are familiar with the program of some of the local carriers of suspending service at certain low traffic points in reliance upon substitute service to be provided by commuter airlines. When I last counted these substitutions before leaving Washington, I found that we had approved 54 such arrangements and 12 more were pending. By far the greatest number of commuter carrier substitutions have been made in the East primarily by Allegheny, Mohawk, Eastern and Northeast Airlines. However, there are a number in the West also. One of the earliest was the substitution of Combs Airways for certain of Frontier's service between Cody and Billings in 1968. In April this year we authorized Frontier to suspend services temporarily between eight Montana points in favor of Apache Airlines. Earlier this month we authorized the suspension of service by Frontier at two Kansas points in reliance upon the services of a commuter line.

These substitution arrangements take several different forms. Under what I would call the most sophisticated form, the certificated carrier enters into an agreement with a commuter line to underwrite a certain number of daily flights by the latter for a term of years and to authorize the commuter to use the certificated carrier's colors and its name in providing the service. Examples of this are the Allegheny Commuters which operate now in 15 markets and the Mohawk Commuter which operates mainly in New York State. The certificated carrier agrees to provide reservation, ticketing and other services for the taxi operator at a specified fee. The agreement between the carriers and the suspension of the services by the certificated carriers are then approved by the Civil Aeronautics Board subject to the condition that, if the agreed number of services are not provided by the commuter airline, the certificated carrier will be required to step back in and provide the service itself. There are a number of variations of this arrangement. In some cases, the certificated carrier merely enters an agreement allowing the commuter line to use its name and colors and provides various services on behalf of the commuter without providing any financial guarantee. In other cases, the certificated carrier is authorized to merely suspend its service without any agreement with a commuter airline but on the basis of evidence that commuter service is being performed. In all cases, however, when the Board authorizes suspension by the certificated carrier, it conditions the suspension upon the maintenance of a given level of service by an air taxi operator.

There are many obvious benefits to these arrangements. The certificated carrier can save a great deal of expense by overflying these small traffic points with its large aircraft. The Federal Government saves some subsidy. The cities get more frequent and better timed schedules from the commuter airline than the certificated carrier was able to provide. The commuter carrier gains the benefit of using the certificated carrier's name and other facilities to increase its traffic in the markets. In many cases the substitution arrangements have produced dramatic increases in the traffic carried in the markets served.

But all is not rosy in these substitution areas and to be realistic we must recognize the drawbacks. First off, the American public has generally become accustomed to flying in large stable aircraft and there have been some indications of concern about flying in smaller aircraft. The Board does not regulate the economics of the substitute carriers. Whether they will be able to operate efficiently and profitably in these markets where the certificated carriers could not survive remains to be seen. For example, in Bowling Green, Kentucky, Reading, Pennsylvania

and Waycross, Georgia, the commuters substituting for Eastern Air Lines have had difficulty maintaining the level of service specified by the Board with the financial contributions provided by Eastern. There are problems of assuring that a traveler, when he buys a ticket, is aware that part of his transportation will be performed by a commuter airline with small aircraft and not by a certificated carrier. The problem is most acute when the commuter is using the name and colors of the certificated carrier. Thus, while air taxi substitutions appear to be very desirable and practical solutions at many small points, they may not be the solution everywhere. The service problems of each city are different and the characteristics of each city must be understood and the air service tailored to each city's requirements.

To date, the Board has made no specific policy declaration as to the types of markets in which it will permit these substitutions but rather is developing a policy on a case-by-case basis. One thing, however, is of primary importance to me whenever a new replacement service is proposed to the Board and that is whether the community involved is willing to accept the substitution. Without that willingness and the cooperation and understanding of the community, I see little future for this program. Moreover, while I have every hope and expectation that these substitutions will benefit the certificated carriers financially, it is too early to determine how successful they have been in this regard. I seriously doubt, however, that commuter carrier substitutions alone will permit any major reduction in the subsidy requirements of the local service carriers in the immediate future. Even under the most optimistic assumptions I believe that Federal subsidy at sufficient levels will be required to keep the scheduled airline services operating into smaller communities for the foreseeable future.

The final point which Governor Hathaway asked me to discuss is the possibility of service by third level carriers to some of the growing Wyoming communities that do not presently have air service. In dealing with this question we have to look at it from two viewpoints; *without* subsidy and *with* subsidy. Let us first look at the matter without Federal subsidy. When a market develops to such size that it warrants service with small aircraft, I believe that enterprising operators will soon discover and develop it. This is happening all over the country. There is no lack of authority from the Civil Aeronautics Board for air taxi operators to conduct such service. We have already authorized them to fly aircraft weighing less than 12,500 pounds on a scheduled or nonscheduled basis between any points in the United States. Part 298 of our regulations, which grants this authority by exemption, requires only that these carriers comply with certain liability insurance and reporting requirements and the safety regulations of the Federal Aviation Administration. There are no tariff or accounting obligations and no minimum service requirements. The Board has deliberately refrained from imposing such demands upon these small operators in the hope that by withholding the heavy hand of regulation we could enable them to grow and prosper in an atmosphere of economic freedom. I believe the results have shown the wisdom of the Board's action. There are now literally hundreds of air taxi operators in business throughout the country. I have no current information on those now operating within Wyoming but my last information showed four commuter lines serving five Wyoming points with scheduled air taxi service.

As I indicated, the air taxi operators are currently limited to operations with aircraft below 12,500 pounds. These includes the Beech 99 and the Twin Otter. The Board recently instituted a rule making proceeding to take another look at this weight limitation to see if it should be raised or if some other standard should be used, such as the number of seats in the aircraft. It may be that larger, more comfortable equipment by the commuter carriers would enable them to meet the service needs of your cities without impinging on the certificated carriers. However, there are many ramifications to this problem and the Board is far from reaching any decision on it. One interesting fact, however, is that some of the commuter carriers today are operating equipment which will carry 15 to 19 passengers. This is very near the capacity of the old DC–3 which served small communities all over the nation for two decades.

But you might rightly say that all of this relates only to unsubsidized service voluntarily instituted by commuter carriers on their own initiative. What about the small Wyoming communities where no taxi operator has yet come forward to provide scheduled service despite all of the authority the Board has granted—can't Federal subsidy be paid for that service?

We at the Board have taken the position that under the law, subsidy cannot be paid directly to a carrier unless it holds a certificate granted by the Board after a hearing in which we find that the service is required by the public convenience and necessity. In that case, the carrier comes under an affirmative statutory duty to provide the certificated service. Such a certificate is both a benefit and a burden to the holder. While it might permit the payment of subsidy to him if a need is found and afford protection against competition, it also imposes service requirements, tariff obligations, and other duties. I personally fear that it will be difficult to find new markets in this country with sufficient traffic to support a viable operation by a commuter carrier operating under the obligations imposed by a certificate of public convenience and necessity. Therefore, I do not see much hope at this time for any direct subsidy to commuter carriers for service to points which are not presently certificated on the routes of any airline.

This is not to say, however, that there is no way that Federal subsidy can be used to help these commuter airlines. It may be possible to pay it to them indirectly through the certificated carrier when the commuter performs substituted service on the routes of a certificated carrier. While this is one of the questions which we are still exploring at the Board at the present time, I personally see no legal reason why the Board could not consider financial aid paid by a subsidized certificated carrier as part of the legitimate expenses of the certificated carrier. I can see several very valid arguments for financing such aid through the certificated carrier. When that carrier suspends service, there is a subsidy saving. Why should not some of the subsidy thus saved be passed on to the commuter airline? The latter would undoubtedly need less subsidy to provide the service than the local carrier so that the United States Treasury would benefit. At the same time the community would be receiving improved service. I think, therefore, that if this program of small carrier substitutions is to continue, we will soon have to face up to the anomaly of asking commuter airlines to do *without* subsidy what the local service airlines have failed to do *with* subsidy. I believe, therefore, that we will have to give early consideration to this possibility of routing subsidy through the local service carriers to the commuter carriers for certificated routes. As in all things, there are problems here too. In many cases there is no agreement between the certificated carrier and any particular commuter carrier. In addition, some of the certificated carriers now using commuter carriers to serve their routes, have long been off subsidy and I am afraid the Board would have to think long and hard before putting them back on subsidy as a device for indirectly subsidizing the services of the substitute commuter line.

In closing, I would like to say that while I share your distress over the decline in air service to your cities, it is refreshing to be here with so many people who appreciate the importance of air transportation. It is good to be out here in Wyoming where people look up at a silver airplane tucking its wheels up into its belly as it climbs skyward and see it as a mark of progress rather than simply a source of air pollution. Out here, the contrails of a jet airplane are signs of growth and not symbols of ecological decay. We must combine our efforts to bring air service to the communities where it is needed and wanted. I would like to think that we have made a good beginning at this Conference here in Casper.

---

## STATEMENT BY HUBERT H. HUMPHREY ON EQUAL RIGHTS AMENDMENT

Mr. MONDALE. Mr. President, this body is now considering an equal rights amendment to insure, at long last, that American women will enjoy the full and equal role in our society which is so clearly their right.

Hubert H. Humphrey, Democratic candidate for the Senate from Minnesota, has made a compelling statement in support of this amendment. I ask unanimous consent that the statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY HUBERT H. HUMPHREY

Wednesday, August 26, marks the fiftieth anniversary of the extension of the franchise to women, and Congress is currently considering legislation which would add another significant chapter to the struggle for women's rights.

I support the Equal Rights Amendment now pending in the Senate. The case for the amendment is clear. The stage has been set since 1920, the year the 19th amendment gave women the vote. Since that time, women have worked to achieve full participation in all facets of American society, and it is time—past time—to welcome their full and equal participation. We can ill afford to do without the energies and abilities of half our population. Just as we have fought to protect the rights of our minorities, we must apply the American tradition of civil liberty to women.

Opponents cite several drawbacks to passage of the measure. However, I feel that the advantages which would accrue to women would far outweigh any disadvantages which could result from enactment of this legislation. Some oppose the amendment because they feel that many of the protective labor laws relating to women may no longer be effective. Those laws which relate exclusively to women, such as work before and after childbirth, will, no doubt, be treated as bona fide physical exceptions.

However, other laws which have related to women, such as restrictions on weightlifting, have been found by the Equal Employment Opportunity Commission to discriminate against women in violation of Title VII of the 1964 Civil Rights Act. Further labor laws, such as minimum wage, overtime compensation, equal pay, fair employment practices, hours of work, rest periods, and so on, must continue to protect all workers alike, and must not be allowed to discriminate against women in the working force.

Another possible effect noted by opponents of the amendment is the eligibility of women for the draft. First, it should be noted that there is a movement in Congress and the administration to establish a volunteer Army. In the event of enactment of this proposal, women would be accepted for military service on the same volunteer basis as men. It has been pointed out by some that military service offers to men opportunities for in-service educational and vocational advancement which may not be available to women of lower economic status. And the additional benefits of military service, such as government-financed education through the GI Bill and Veterans pensions could be extended to women who wished to serve.

Should the volunteer Army fail to become a reality, and should women become eligible for conscription, they would first face physical requirements, and, should they be inducted, would be placed in positions commensurate with their abilities. It must be noted that women in the Armed Forces are serving in Southeast Asia at present in the fields of communications and medicine, for example.

Some opponents cite Title VII of the 1964 Civil Rights Act as evidence that the amendment is unnecessary. However, Title VII concerns itself with equal employment in private business alone. The Equal Rights Amendment expressly states that, "Equality under the law shall not be denied or abridged by the United States or by any State on account of sex." It would prohibit discrimination by government on the basis of sex.

Many factors have combined to bring about a change in the role of women in our society. Not the least of these is economic necessity. More and more women have felt it necessary to work outside the home to help their husbands in support of their families in an ever-inflating economic environment. And as women have entered the business world, they have become increasingly aware that opportunities for advancement have been limited. Increasing availability of education to women has spurred the desire for intellectual challenge and responsible involvement in the workings of society, and the whirlwind pace of technological advancement has freed modern women from many of the chores which formerly consumed the bulk of their time.

There can be no doubt that women have the intellectual capacity to fill positions of authority. Eleanor Roosevelt ranks among the greatest and best loved diplomats and public servants of this century. Helen Keller was an exemplar of intellectual courage and emotional stamina who was respected by all who knew her or knew of her. And the list goes on and on. Women today serve in the judiciary, in business, in science, in law, in journalism, in education, and in government. And where they serve, they serve splendidly. But they are too few. Women constitute a majority of the population of this country, yet the percentage of women in jobs of authority falls very short of a fair representation of this majority.

Women in the more advanced industrial countries of Western Europe, particularly the Scandinavian countries, the Soviet Union and other countries of Eastern Europe are playing an even more significant role in all areas of the political, social, and economic structure. Surely, the United States, which has long prided itself upon equal rights and equal opportunities should be in the forefront of the movement for maximum participation of women in our national life. One of the untapped resources of this country is woman power. We need them in science, medicine, engineering, politics, education—in all endeavors.

The last fifty years have brought about substantial advances in the position of women in the United States. Yet an alert and responsible democracy cannot rest solely on past accomplishments. The Equal Rights Amendment offers us an opportunity to effect another phase in the progressive unfolding of America's promise of equality for all citizens.

## OUR YOUNG PEOPLE

Mr. HANSEN. Mr. President, it was my very real honor this morning to attend a breakfast in this city which was part of the activities of the 1970 meeting of the Distributive Education Clubs of America.

This group, known as DECA, includes an outstanding girl from Wyoming, Miss Charlotte Dudley, who is one of the group's national officers. Miss Dudley is serving as western region vice president for the organization.

DECA is interested in marketing, merchandising, and management and I was pleased to accept the invitation of Mr. Keiji G. Okano of Cheyenne, Wyo., to attend the breakfast meeting. Mr. Okano is State director of the Wyoming Department of Education's distributive and health occupations and cooperative education programing division.

Craig J. Wilson of Minnesota is serving as president of DECA's junior collegiate division. He gave a most outstanding address at the breakfast session and I commend him for the great job he did; it was a message with a message and one that will stay with me for a long, long time.

National president of DECA's high school division this year is David Colburn of South Carolina. This young man helped preside at the breakfast meeting today and gave a most outstanding speech.

Mr. President, may I say that I thoroughly enjoyed the opportunity to meet these young people.

I came away more convinced than ever that our country's future is in good hands. As I have said on the floor of the Senate on other occasions, our young Americans are determined and decent and dedicated.

Because of the impact of David's message—one that I believe should be shared with my colleagues—I ask unanimous consent that David's address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

### DECA—WHAT IT IS—WHAT IT DOES

#### WHAT IS DE?

Distributive Education identifies a program of instruction which teaches marketing, merchandising and management.

#### WHAT IS DECA?

DECA identifies the Program of Youth Activity relating to DE—Distributive Education Clubs of America—and is designed to develop future leaders for marketing and distribution.

DECA is the only national youth organization operating in the nation's schools to attract young people to careers in marketing and distribution.

#### DECA AND THE STUDENT

DE students have common objectives and interests in that each is studying for a specific career objective. DECA activities have a tremendous psychological effect upon the attitudes of students and many have no other opportunity to participate in social activities of the school or to develop responsibilities of citizenship.

DECA members learn to serve as leaders and followers, and have opportunity for state and national recognition that they would not have otherwise.

#### DECA AND THE SCHOOL

DECA Chapter activities are always school-centered, thus contributing to the school's purpose of preparing well-adjusted, employable citizens. Chapter activities serve the Teacher-Coordinator as a teaching tool by creating interest in all phases of marketing and distribution study, and serve as an avenue of expression for individual talent.

The Chapter is the "show window" for student achievement and progress, and is the public relations arm of the DE instructional program. It attracts students to the DE program who are interested in marketing management and distribution careers and assists in subject matter presentation.

#### DECA AND THE COMMUNITY

DECA members have made numerous studies and surveys to aid the economic development of their own community. Individual and group marketing projects continue to encourage this type of contribution.

Many businesses favor hiring DE students because of their interest in training and their related school study of that particular business. Many leaders in business and government have praised the DECA program for its civic-related activities.

#### DECA AND THE NATION

DE instruction and DECA activity constantly emphasize America's system of competition and private enterprise. Self-help among students is the rule rather than the exception, and DECA leaders give constant encouragement to continued education.

History has proven that whenever a nation's channels of distribution fail to function, that nation is shortlived. As DECA attracts more of our nation's youth to study marketing and distribution, the total DE program becomes a vital necessity to our national security.

#### NATIONAL DECA WEEK

The purposes of National DECA Week are to call attention to the Distributive Education program, to enhance the educational facilities of your school, and to highlight the activities of DECA. The date is set annually by the Board of Directors, and has traditionally been held to coincide with *American Education Week*. Promotional materials are made available to Chapters and State Associations at a nominal cost.

#### THE DECA CREED

I believe in the future which I am planning for myself in the field of distribution, and in the opportunities which my vocation offers.

I believe in fulfilling the highest measure of service to my vocation, my fellow beings, my country and my God—that by so doing, I will be rewarded with personal satisfaction and material wealth.

I believe in the democratic philosophies of private enterprise and competition, and in the freedoms of this nation—that these philosophies allow for the fullest development of my individual abilities.

I believe that by doing my best to live according to these high principles, I will be of greater service both to myself and to mankind.

I have a story which I would like to relate to you. Please listen carefully.

After the takeover, they told me that the words they scrawled above the entrance to the Capitol simply read, "We Hate Your Country." They also told me that there really wasn't much left of what was once the greatest city in the world. It seems that they

had managed to reach this city without any difficulty whatsoever.

I came to the conclusion that somewhere along the line, something went wrong somewhere.

At first, I couldn't believe that corruption and wickedness had actually been allowed to breed among the highest levels of a once economically stable government.

They did it all across the nation, so I'm told—everything went to pieces—total confusion.

My history professor told me that it would never had happened if only there had existed some driving force, some motivating concern, of the young people themselves, for their great nation and its philosophies.

After all of the worrying and debating about maintaining that essential balance of power, we ended up destroying our own selves.

This is a nightmare; however, it could realistically happen except for one factor—the youth of today will not allow this nightmare to exist.

So you may ask: What is today's youth doing to show their concern for the direction of this nation?

125,000 young members of the Distributive Education Club of America have a creed in which they believe. It's called the DECA Creed. Listen to what it says along with my own interpretations.

VERSE 1

Nowadays you don't hear too many persons saying "I believe in the future." We of DECA believe in the future, not only our future but also our country's as well. We're concerned about our country's economic future and in effect, we are planning for futures in the field of distribution. We are also aware that our respective vocations will open the door to unlimited opportunities for us. The fact is that we are the future leaders in marketing and distribution.

VERSE 2

How much are we willing to give? We of DECA are going to put everything we have into life for the purpose of attaining our objectives. What we get out of life is the end results of our input. Our input is measured by the services we, in fact, render to our own vocation, our fellow man, our country, and our God. In the same sense, our rewards are measured by the personal satisfaction which we obtain from giving of our selves. Along with this comes material wealth.

VERSE 3

We of DECA are acutely aware of the importance of private enterprise and competition to our nation's wellbeing. Not only do we acquire an understanding but also we develop a respect for these philosophies. What can we say about freedom? Freeedom was acquired by our forefathers and ever since that time it has persevered because Americans valued it enough as far as to sacrifice their lives for it. DECA believes in the American system because under this system, each of us has the chance to fully develop our own individual talents and abilities. This is what America is all about. America is government of the people, by the people, and for the people.

We of DECA respect the lawmakers of this nation's government for displaying the competence and leadership desperately needed during such critical and trying times.

VERSE 4

This speaks for itself. The 125,000 members of the Distributive Education Club of America are, in fact, young crusaders.

We are flag raisers—not burners; patriots—not anarchists; freedom lovers—not draft card burners; and also

We are potential business leaders—not dead weights.

This is our creed. We live by its philosophies and yet, it is basically a guideline in which all mankind should believe.

There is no need for fear of a nightmare because, standing in the path of the present undermining forces, is a brick wall composed of 100,000 dedicated young people. There are other brick walls present also. However, we still need more support; we need support for this nation's lawmakers, by the powers needed in determining the directions this country needs to take.

If you are really concerned about today's youth and this country's future, you will lend a helping hand. We of DECA need your personal and legislative support, and, needless to say, this country needs DECA and thousands more like us.

Yes, we believe in the future.

DAVID COLBURN,
*President, Distributive Education Clubs of America, South Carolina.*

## THE THREAT OF PROTECTIONISM TO MINNESOTA AGRICULTURE

Mr. MONDALE. Mr. President, the American farmer is the most productive in the world. He feeds and clothes over 200 million of the most prosperous people in the world, and still exports $6½ billion worth of food and fiber to other nations.

Our Minnesota farmers earn more than all but four other States in the Union, and we are the tenth leading exporter of agricultural products to the rest of the world. Exports of Minnesota dairy products, flour, soybeans, feed grains, wheat and other produce this year alone will bring jobs to at least 30,000 Minnesotans and over $235 million into the State.

Anything which threatens the ability of Minnesota farmers to sell to the rest of the world is an economic step backward and a grave threat to our leading industry and to the economy of our entire State.

Today we see, for the first time since the end of the Second World War, a wave of economic isolationism—a mistaken but growing loss of confidence in the productivity of the American economy—and a clear reversal of America's past leadership in promoting open, expanded trade among free world nations. Till now, we have met the responsibility of world economic supremacy by leading the way toward a reduction of artificial trade barriers among nations. While lesser economies have often feared our productivity and have resisted open trade and world competition, we have tried to expand world economic markets, confident in our productivity and technological superiority, and relying on our consistently favorable balance of trade to cover our enormous economic commitments abroad.

No one would claim that we should or even could pursue a policy of totally free trade—oblivious to the trade policies of other nations, to subsidized imports and the threat of foreign dumping, to our domestic economic and agricultural policies, to the demands of national security, or to the need to assist businesses and workers whose livelihoods may be lost to foreign competition through no fault of their own. All of these factors and special needs are recognized by the legislation and the programs by which we now trade.

I have no doubt that existing legislation can be strengthened. A new comprehensive trade bill, in fact, is needed as soon as reasonably possible in order to set the general direction for United States and world trade policies in the years ahead.

But these special needs can well be met—and our position of responsibility as the world's leading trader maintained—within a policy which continues to advocate open trade and the progressive reduction by all nations of shortsighted artificial trade barriers.

The trade legislation emerging from the U.S. House of Representatives goes far beyond any concept of "fair protection." It is a Pandora's box of protectionism which openly invites higher prices to the American consumer and serious retaliation against our major exporting industries. It is a patently political bill which may promise "protection," but which will assuredly deliver retaliation, economic isolationism and a serious setback to world trade negotiations.

No industry is more threatened by retaliatory protectionism than U.S. agriculture. In particular danger are wheat, soybeans, and feed grains, the exports of which account for some 8 percent of Minnesota agricultural cash income, and which together brought over $142 million into the State in 1968.

Soybean exports alone will earn almost $76 million for Minnesota farmers this year. The absence of trade barriers on soybeans, particularly into Europe, has been a major factor in the phenomenal growth of these exports. However, should the United States enact protective quotas, injuring European exports to us and diverting Japanese exports into the European market, retaliation is invitable. The Common Market, which now buys a half a billion dollars worth of American soybeans yearly, has threatened to levy a consumption tax upon our exports which could mean $10 to $12 million in lost sales to Minnesota farmers alone.

Wheat and feed grain sales, already restricted by the Common Market variable import levies, are also extremely vulnerable to further retaliation. Although current indications suggest some improvement this year, these sales have been declining drastically. Feed grain exports last year were at their lowest level since 1963, and wheat exports were at their lowest in a decade. In a single year, then, due at least in part to Common Market levies, Minnesota lost somewhere around $20 million worth of exports.

The message is clear. Neither Minnesota nor the rest of this Nation can afford the inevitable trade war which would result if protectionist trade legislation passes the Congress this year. Trade is worth $750,000,000 and perhaps 70,000 jobs to our State. We cannot allow this to be sacrificed to a politically expedient but potentially disastrous piece of protectionist trade legislation.

The way to full employment, a stable and growing domestic economy, and a healthy balance of payments lies not in a shortsighted restriction of imports but in

an aggressive expansion of exports. We are the leading exporting nation in the world. We will export this year some $40 billion worth of American goods to the rest of the world—a healthy $3 billion or so more than we will import.

This means direct employment for at least 4 million Americans.

It means we can finance our overseas commitments and meet our responsibilities abroad.

It means that the American consumer gets the benefit of the finest goods at the lowest possible prices.

We cannot, of course, sacrifice the American worker in competition with foreign imports any more than we can sacrifice the farmer and the worker whose livelihood depends upon exports.

We must help the industries which are struggling in competition with goods produced abroad. We must—and our existing trade agreements and trade legislation recognizes this need—provide adjustment assistance, retraining, and other aid to textile, shoe, and other industries which may not be competing successfully with overseas goods.

But this assistance does not have to turn the clock back on American trade policies.

The Japanese are aggressive competitors but they are a $1 billion customer of American agricultural exports, purchasing more soybeans, wheat, and feed grains than any other nation. I believe that we should work toward a reduction of Japanese trade barriers and toward voluntary agreements to ease the domestic impact on industries where Japan is more productive and competitive. But a wholesale erection of quota barriers places the entire burden of this problem on the American exporter, farmer, consumer, and on the overwhelming majority of American businesses and workers whose magnificient productivity is the envy—and fear—of the rest of the world.

For their sake; for the sake of economic cooperation and competition throughout the world; and the particular sake of the Minnesota farmer, I urge the Senate and the administration to retreat from the brink of a disastrous trade war and work toward the expansion—not the constriction—of American exports.

## GENOCIDE CONVENTION IS CONSISTENT WITH THE CONSTITUTION AND LAWS OF THE UNITED STATES

Mr. PROXMIRE. Mr. President, one of the major arguments used by the opponents of the Genocide Convention is that it is not consistent with the Constitution and laws of the United States. In this regard, I invite the attention of the Senate to a section of the report issued by the section of individual rights and responsibilities of the American Bar Association. Section IV of the report, which recommended that the United States ratify the Convention on the Prevention and Punishment of the Crime of Genocide, is entitled "The Genocide Convention Is in All Respects Consistent With the Constitution, the Laws, and the Ideals of the United States."

I ask unanimous consent that section IV of the report by the section of individual rights and responsibilities of the American Bar Association be printed in the RECORD.

There being no objection, section IV was ordered to be printed in the RECORD, as follows:

IV. THE GENOCIDE CONVENTION IS IN ALL RESPECTS CONSISTENT WITH THE CONSTITUTION, THE LAWS, AND THE IDEALS OF THE UNITED STATES

A. THE GENERAL OBJECTIONS TO THE GENOCIDE CONVENTION MADE IN 1949–50 ARE WHOLLY OBSOLETE TODAY

The opposition to the Genocide treaty at the Senate hearings twenty years ago centered around three main points.[36] First, a general opposition to the "new concept" of government action by treaties. During the next two decades, the United States has entered into some 4,000 international agreements, without any noticeable diminution of its sovereign independence, nor any noticeable debasement of its standards to an international average. That treaties are the modern means of developing international law, just as statutes are the modern means of developing state and federal law, has been noted earlier, and hardly requires demonstration. If some felt nervous or cautious in 1949 about stepping on the new ground of multilateral treaties, including treaties affecting individuals, that fear is no longer justified. On the contrary, the only concern a United States citizen should have is that his country not be left out as the documents and issues of the new international law are drafted, debated, interpreted and applied.[37]

Second, the opposition expressed the fear that by treaties in general, and by the Genocide Convention in particular, Article 2(7) of the United Nations Charter, dealing with matters "essentially within the domestic jurisdiction of states" was being undercut. In the words of the ABA Special Committee,[38] "Shall we be governed in internal affairs by treaty law or by laws passed by Congress with a constitutional basis?" Again the answer has already been given. Article 2(7) is is no way undercut by the Genocide Convention. Domestic matters are as out of bounds for the United Nations as ever. The only effect of the Genocide Convention is to say that the issues specified in Articles II and III cover not merely one country, but all countries. If the United States wants (1) to take a complete handsoff attitude if genocide should occur somewhere in the world; or (2) to foster, shield, or protect the commission of genocide within the nation's borders, then it should certainly not join the Convention. If neither of these attitudes is real, then the argument has no appeal whatever.

Third, the opposition, focusing on certain enigmatic language of Justice Holmes in *Missouri* v. *Holland*[39] considered that the Genocide Convention might be the opening wedge in a drive to exceed the legislative powers of the Congress vis-a-vis the states through use of the treaty power. Whatever theoretical merit there might have been with respect to this point, discussed for nearly ten years in the context of the proposed Bricker Amendment,[40] it has no relevance to the Genocide Convention. No one could have any doubt about the right of the Congress to prohibit genocide. Quite apart from the treaty power, the Constitution expressly grants to the Congress the power "to define and punish Piracies and Felonies committed on the high seas and Offences against the Law of the Nation."[41] And if anyone suspected that the Genocide Convention might be used to justify federal legislation in the field of civil rights, the events since 1949 have shown that the United States Constitution as currently understood is quite adequate to sustain any civil rights legislation likely to be proposed and passed, and certainly more ample to coverage than any authority possibly derived from the Genocide Convention.

It is conceivable that a claim could have been made that depriving a racial group—say Negroes or American Indians—of the right to vote or the right to enjoy public accommodations is comprehended within Article II (b) of the Genocide Convention related to "mental harm". But this thought is hardly more than conceivable: as we have seen, the whole thrust of the convention and its origin suggest quite different goals; moreover, Article II (b) like all of the definitions of the crime of genocide, is governed by the phrase "with intent to destroy", which would not seem to apply to even the most extreme segregationist measures which may be tolerated by statute law in the United States.[42] At all events the barring of school segregation, which was accomplished without any statute,[43] the passage of the Civil Rights Acts of 1957[44] and 1964[45] and the Voting Rights Act of 1965[46] all sustained by the Supreme Court, show that blocking the Genocide Convention has given and will give no comfort to opponents of federal enforcement of rights of minorities, while ratification of the Convention will add no powers to those the Federal Government possesses.

Unconnected to the state-federal relation in the United States, the objection was also made in 1949–50 that the Convention undertakes to define a crime for which there would be punishment under federal law, without concurrence by the House of Representatives. This is simply a misunderstanding resulting from a confusion about what is and what is not a "self-executing" treaty. In fact, ratification of the Convention would obligate the United States internationally to pass the necessary implementing legislation, making the crimes specified punishable under United States law. Failure by the Congress to enact the implementing legislation would leave the United States in breach of an international obligation, but in such eventuality no one could be tried in the United States for a crime not specified in the Criminal Code. It is certain that no one can be accused of or tried for the crime of genocide in the United States until legislation making genocide a crime has been adopted in accordance with our domestic procedure for passage of a law.

B. THE SPECIFIC OBJECTIONS RAISED TO THE GENOCIDE CONVENTION ARE NOT MERITORIOUS

In addition to the general objections to the Genocide Convention discussed above, a number of particular criticisms relating to the text of the Convention were made by opponents in 1949-50.[49] These are not of a dimension sufficient, singly or together, to warrant non-ratification.

*"As such"*

Why, it was asked, did Article II refer to the destruction of a national, ethnical, racial, or religious group *as such*? Does this not create an ambiguity? The answer is perhaps it does, but so would the phrase without these words. Conceivably, an edict to kill all restaurant owners might be a subterfuge to kill, say, all Chinese within a country. In such an event, the words "as such" would give a possible technical defense to the authors of the deed. But that possibility seems very remote. In the past, genocide has not usually been disguised. It has been part of a deliberate, public, and political or religious campaign. Rome set out to destroy the Carthaginians; Islam set out to destroy Christians; Hitler set out to destroy the Jews, *as such*.

Footnotes at end of article.

*"In whole or in part"*

What did the addition of the words "in whole or in part" signify for the crime of genocide? Did it mean, in the words of one opponent, "driving five Chinamen out of town"?[50] The answer, again, is quite simple, and indeed, appears in the drafting history of the Convention itself.[51] The object of adding the words "in part" was to preclude an argument that international destruction, say, of half or two thirds of the Jews of Rumania was not comprehended in the crime of genocide.

In the context of this Convention, there can be no doubt about the distinction between intent to destroy a national, ethnical or racial or religious group and intent to destroy some individuals belonging to that group. Nothing in the history of the United States since the early Indian wars quite adds up to genocide within the meaning of this convention. If any race riot, lynching, or comparable event ever grew to the scale approaching genocide as defined in the Convention, the international obligation would surely add nothing to the determination of our own state and federal authorities to bring the perpetrators to full justice.

*"Mental harm"*

The thrust of the objection to this phrase, apparently, was that the critics did not understand it. As more facts of tortures both in Asia and in Eastern Europe during World War II have come out, as we have come to know about brain-washing in North Korea of our own soldiers, and in Eastern Europe of various political and religious leaders including for instance Cardinal Mindszenty, the objection to including mental harm along with bodily harm would seem to disappear.

*"The place of trial"*

One criticism of the Convention arose out of the possibility that, under Article VI, a person accused of genocide could be tried by an international penal tribunal, possibly without trial by jury and other safeguards to which a United States citizen is entitled under the Constitution. Again, the answer is simple. No such tribunal has been established.[52] If one were established, parties to the Genocide Convention would have the option whether to accept its jurisdiction or not. For the United States, that option would have to be independently exercised through the Treaty Power, that is only with the advice and consent of the Senate by a two-thirds vote.

*"Direct and public incitement"*

The question is raised whether Article III (c) of the Convention, in prohibiting "direct and public incitement" to commit genocide is contrary to the First Amendment's guarantee of free speech. The scope of the free speech protection in the United States Constitution has been subject to various interpretations through the years, particularly as it conflicts with public order.[53] Thus it is not possible to state categorically that a given statement is or is not protected free speech, as against prescribed criminal activity. Our best judgment, for reasons spelled out below, is that any activity sufficient to support conviction for violation of Article III(c) of the Convention would fall outside of the First Amendment's protection. But the case need not rest there.

Assuming the above judgment were wrong and an activity prohibited by the Convention were held to be protected by the First Amendment, the conviction would simply be reversed. Nothing in the development of the treaty power suggests any other result. Indeed, in *Missouri v. Holland*,[54] the case most often cited as pointing the way toward expanded use of the treaty power, Justice Holmes specifically limited his speculation to "some invisible radiation from the general terms of the Tenth Amendment," [relating to reserved powers of the states] and not to "prohibitory words to be found in the Constitution," such as the First Amendment. Thus reversal of a conviction on free speech grounds would be perfectly within the powers of the Supreme Court (or indeed a lower court), notwithstanding anything in the Convention. Indeed, the Convention itself only requires (in Article V) that states undertake to enact, "in accordance with their respective Constitution" the necessary legislation to give effect to the Convention. If a portion of the implementing legislation were declared unconstitutional, generally or as applied to a given defendant, there would be no breach of the obligation under the treaty.

If the above possibility were very strong (and if incitement to genocide were the major provision of the Convention), there might be some cause for hesitation about the Convention.[55] In fact, it appears that Article III (c) is drawn precisely to satisfy the prevailing interpretations of the First Amendment to the United States Constitution.

Mr. Justice Holmes stated the argument in favor of the constitutionality of a provision such as Article III (c) in speaking for the Supreme Court in *Frohwerk v. United States*,[56] decided just after World War I.

"We think it necessary to add to what has been said in Schenk v. United States * * * [57] that the first amendment, while prohibiting legislation against free speech as such, cannot have been, and obviously was not intended to give immunity for every possible use of language. We venture to believe that neither Hamilton nor Madison, nor any other competent person then or later, ever supposed that to make criminal the counseling of murder within the jurisdiction of Congress would be an unconstitutional interference with free speech."

The same thought was expressed thirty years later in a case involving an injunction against peaceful picketing to induce violation of a state law concerning trade.[58]

"It has rarely been suggested that the constitutional freedom for speech and press extends its immunity to speech or writing used as an integral part of conduct in violation of a valid criminal statute. We reject the contention now."

It is worth pointing out that the author of that opinion, for a unanimous court, was Mr. Justice Black, surely a justice sensitive to violations of the First Amendment.

It is, of course, not easy to distinguish in all cases between permissible and impermissible expression, or between condemnation of a racial, religious, or ethnic group and intent to destroy such a group. The distinctions drawn by the Supreme Court in this area—for example, between *Chaplinsky v. New Hampshire*,[59] *Terminiello v. City of Chicago* [60] and *Feiner v. New York* [61] are not easy. If a person were arrested and prosecuted for inciting to genocide, doubtless the factual issues would be scrutinized with great care. The dividing line was expressed best, perhaps, by Mr. Justice Brandeis in his famous concurrence in *Whitney v. California*.[62]

"* * * even advocacy of violation, however reprehensible morally, is not justification for denying free speech *where advocacy falls short of incitement* and there is nothing to indicate the advocacy would be immediately acted on. The wide divergence between advocacy and incitement, between preparational attempt, between assembling and conspiracy, must be borne in mind." (Emphasis supplied.)

In its most recent decision in the free speech area, the Supreme Court, while discrediting *Whitney v. California*, appears to have reaffirmed the distinction drawn by Justice Brandeis in his concurrence. Reversing the conviction of a Ku Klux Klan member who staged a "rally" for television reporters, the Court said: [63]

"* * * the constitutional guarantees of free speech and free press do not permit a State to forbid or prescribe advocacy of the use of force or of law violation except *where such advocacy is directed to inciting or producing imminent lawless action and is likely to incite or produce such action.*" (Emphasis supplied.)

However hard it is in practice to draw the distinctions between advocacy and incitement, it is clear that in the definition of the crime, the Genocide Convention has drawn them correctly by these standards.

In short, the particular criticisms of the text of the Convention are the sort of objections that can be made to the text of many documents. Singly or together, they do not provide reason to reject the Convention.

FOOTNOTES

[36] See *Senate Hearings* (1950) 154–230.

[37] This point, in the context of the growth of international law in the post-war period, is developed by Bernard G. Segal, President of the ABA, in a recent address to the World Peace Through Law Conference, Bangkok, Thailand, September 1969.

## CONCLUSION OF MORNING BUSINESS

Mr. MANSFIELD. Mr. President, is there further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

## DIRECT POPULAR ELECTION OF THE PRESIDENT AND THE VICE PRESIDENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the unfinished business be laid before the Senate and that, when that is done, the distinguished Senator from North Carolina (Mr. ERVIN) be recognized.

The PRESIDING OFFICER. Without objection, it is so ordered.

The unfinished business will be stated by title.

The assistant legislative clerk read Senate Joint Resolution 1 by title, as follows:

A joint resolution proposing an amendment to the Constitution of the United States relating to the election of the President and the Vice President.

The Senate resumed the consideration of the joint resolution.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. ERVIN. Mr. President, I wish to speak in behalf of the most precious possession of the American people. The most precious possession of the American people is not the broad expanse of our lands which run from the Atlantic Ocean on the east halfway across the Pacific to Hawaii on the west, and from the Canadian border to the Gulf of Mexico and our neighbor, the country of Mexico, on the south. The greatest possession of our country is not our material wealth. It is not the great Armed Forces which protect our national security in a very precarious world. The greatest resource of our country does not consist of our institutions of higher learning.

The greatest possession of our country is an old document which was penned in Philadelphia in 1787, and under which this country has enjoyed substantially the same system of government for 181 years, while other systems of government have perished and vanished from the face of the earth.

Senate Joint Resolution 1 proposes the most drastic assault on this precious possession of the American people, the Constitution of the United States, that has ever been proposed in the history of this Nation. The Constitution was brought into being by 13 separate and independent States, sparsely settled and lying along the Atlantic seaboard.

We have a proposal here, in Senate Joint Resolution 1, which would destroy, in large measure, the federal system of government which was created by the drafting and the ratification by these 13 States of the Constitution of the United States.

Make no mistake, when we destroy the function of the States in the election of the President and Vice President of the United States, we strike a mortal blow at the federal system of government, which has endured for 181 years, and which has even weathered the efforts of the man for whom Senate Joint Resolution No. 1 ought to be named—George Wallace.

It is just as logical, Mr. President, to say that since all the Members of the U.S. Senate and all the Members of the House of Representatives are Federal legislators and participate in the making of laws for all the 200 and more million Americans, they ought to be chosen in a single election precinct embracing the 50 States and the District of Columbia.

We are told by advocates of this proposal that Senate Joint Resolution 1 undertakes to make every man's vote, within 50 States and the District of Columbia, count exactly the same. I assert, without fear of successful contradiction, that proposal has an effect that only 40 percent of the people who vote in the United States should select the President, and that the votes of the other 60 percent should be disregarded, if they happened to be cast for candidates other than the one who receives 40 percent of the vote.

In short, Senate Joint Resolution 1 proposes that we have a 40-percent President. That is what it comes down to. Despite the great wisdom of the proponents of Senate Joint Resolution 1, the Senator from North Carolina is constrained to say that the men who wrote the Constitution were wiser than they are; consequently, the drafters of the Constitution proposed that no man should ever be elected President of the United States unless he receives a majority of all the electoral votes of all the States of the Union. They did not want our country to have a 40-percent President.

When all is said, Senate Joint Resolution 1 proposes that we have a minority President. That is exactly what it provides. It provides that we shall have a 40 percent President.

We have a lot of wise men in North Carolina, the State I have the honor to represent, in part, in the U.S. Senate. Incidentally, North Carolina was one of the 13 States which brought the United States of America into existence and which ratified the original Constitution of the United States. I am proud to be able to say that one of my direct ancestors, Reuben Wood, a North Carolina lawyer, had the honor of being a member of the North Carolina constitutional convention which ratified the Constitution of the United States, and that he voted in favor of its ratification.

We have, as I said a moment ago, many wise men residing in the State of North Carolina, and one of those wise men is the editor of the Durham, N.C., Morning Herald. In one of his editorials, which appeared in that great newspaper on Sunday, September 13, 1970, he correctly diagnoses Senate Joint Resolution 1.

The editorial is entitled "Providing Election by Minority," and it reads as follows:

As the Senate debates the proposed constitutional amendment to provide for the direct election of President and vice president, it is well to remember that direct election is not the only alternative to the present system of election. Therefore enactment of this amendment is not the only way in which reform of the current system can be accomplished. The Senate debate will undoubtedly explore at length and in detail the merits and demerits of direct election.

I digress at this point to say that the distinguished Senator from Indiana does not seem to want this question debated at length, because he supports a proposal which would gag the Senators who happen to disagree with his views. But I certainly express the hope which is voiced in this editorial that Senate debate will flow at length. The editorial then details the merits and demerits of direct election.

I resume the reading of the editorial:

Much has been made of the possibility of electing a President through the electoral college who receives a minority popular vote. This has happened only three times in the history of the Republic, when John Quincy Adams was elected by the House of Representatives in 1825, when Rutherford B. Hayes was chosen by the electoral commission—not college—in 1877, and when Benjamin Harrison received a majority of the electoral vote in 1888 after failing to receive a majority of the popular vote.

What advocates of the direct election amendment either fail to realize or fail to point out is that the amendment they advocate actually provides for the election of a minority President. If a candidate receiving a plurality of the popular vote gets as much as 40 percent of the popular vote, he would become under the proposed amendment, President. Thus the Nation would have in fact a minority President. The present system prevents that by requiring a majority in the electoral college, which is a nationally representative body.

The provision for election by a 40 percent popular vote is a serious weakness in the direct election amendment, for it makes legitimate a situation which can prove destructive of republican government and the democratic system, election by a minority. In times of crisis, particularly, there would be grave danger that a minority President would not receive national acceptance, with all the implications that would have for government.

The provision which makes possible the election of a minority President, with no recourse or validation by a national majority, is a sufficiently serious flaw in the proposed amendment to justify the Senate in defeating it.

The Senator from North Carolina finds himself in full agreement with the view expressed by the editor of the Durham Morning Herald, that the provision of Senate Joint Resolution 1 which makes possible the election of a minority President, with no recourse or validation by a national majority, is a sufficiently serious flaw in the proposed amendment to justify the Senate in defeating it.

The Senator from North Carolina is strongly opposed to this Nation having a 40-percent President. The Senator from North Carolina is opposed to this Nation having a 40-percent President because a 40-percent President is not likely to have the support of more than 40 percent of the people of this Nation when he is inaugurated, and is likely to suffer a decrease from month to month thereafter, until he reaches the tragic point where he has far less than 40 percent of the support of the Nation.

I do not think that this Nation can endure as a great nation of the earth if it accepts the proposition that henceforth and hereafter, despite the fact that in prior years we have had great men such as George Washington, Thomas Jefferson, Andrew Jackson, Abraham Lincoln, Grover Cleveland, Woodrow Wilson, Franklin D. Roosevelt, Harry S. Truman, and Jack Kennedy, we are not going to have a hundred percent President, as these men were, but are going to have only a 40-percent President, instead of a majority President.

I understand that the pending business is the Tydings-Griffin amendment. Before I discuss that amendment, I should like to read to the Senate a statement made about the Constitution of the United States, which would be drastically affected if Congress should be so foolish as to submit Senate Joint Resolution 1 to the people of this land as a proposed amendment to the Constitution and if the people of this land should so far take leave of their intelligence as to ratify it as a part of the Constitution. Frankly, I do not believe that the people of this land would be foolish enough to ratify Senate Joint Resolution 1 if it should be submitted to them.

I say that for this reason: It appears from the hearings held on April 15, 16, and 17, 1970, that the legislators of 34 of the States ought to be bored for the simples, as we would say in North Carolina, if they would consent to the ratification of a proposed constitutional amendment which would not only substantially destroy the federal system of government which the Constitution was ordained to establish, but also would rob their own constituents of a substantial part of the voice they now have under the Constitution, in the selection of a President and a Vice President.

Frankly, if I thought that the big States of this Union had a monopoly upon the wisdom of this country, I might be so foolish as to support Senate Joint Resolution 1. But I have noticed that much of the wisdom of this Nation comes from the smaller States.

I have observed that when Moses wanted to know what to do about the problems which confronted him and the Hebrews of his day, instead of going to some great center of population such as Jerusalem or Babylon or Nineveh or Tyre or Sidon, he went out into the wilderness and meditated and deliberated and came to wise decisions.

Senate Joint Resolution 1 proposes that Presidents, in effect, be selected by a few of the largest States in this Union; and those who advocate it, whether they so recognize or not, are seeking to take away from 34 of the States a substantial part of their voice, under the existing Constitution, in the selection of a President and a Vice President for this great land of ours.

I say by way of illustration to our Presiding Officer, who has the honor to represent, in part, in this body one of the newer States of the Union, that Senate Joint Resolution 1 would reduce to 33 percent or less the voice which his State, Alaska, now has in the selection of a President and a Vice President. The Senator from North Carolina does not know, of course, how our Presiding Officer feels about this matter; but the Senator from North Carolina would say that he cannot comprehend how our Presiding Officer could favor Senate Joint Resolution 1 unless he reached the conclusion that the people of States like New York, California, Pennsylvania, Illinois, Ohio, and Michigan are more capable of selecting a President than are the people of the State of Alaska, which he has the honor, in part, to represent.

On page 20 of the hearings before the Senate Committee on the Judiciary, held April 15, 16, and 17 of this year, is a list of States which would lose substantial portions of their voices—their power, if you please—in the selection of a President and a Vice President of the United States if Congress should pass and submit to the States Senate Joint Resolution 1 for ratification, and if three-fourths of the States were to ratify it. Those States are: Texas, my own State of North Carolina, Virginia, Georgia, Tennessee, Maryland, Louisiana, Alabama, Iowa, Kentucky, Oklahoma, South Carolina, Kansas, West Virginia, Mississippi, Colorado, Arkansas, Nebraska, Arizona, Utah, Maine, Rhode Island, New Mexico, New Hampshire, Idaho, South Dakota, Montana, North Dakota, Hawaii, Delaware, Vermont, Nevada, Wyoming, and Alaska. This is also true with respect to the District of Columbia.

It is to be noted that among the States that would be deprived of a substantial part of their voice and power in the selection of the President are seven of the original 13 States which brought our Constitution into existence: North Carolina, Virginia, Georgia, Maryland, South Carolina, Rhode Island, and Delaware.

I happen to entertain the view that notwithstanding that some of these 34 States are relatively small, their people are just as wise, when it comes to selecting a President or a Vice President, as are the people who happen to live in States having great centers of population, such as New York, California, Pennsylvania, Illinois, Ohio, and Michigan.

To be sure, some Senators from some of the smaller States may support Senate Joint Resolution 1. I am not saying that they will. But I do not believe that the legislators of 34 States are going to vote for a constitutional amendment which would rob their people, in many cases, of two-thirds of their power to participate in the selection of a President. I say that because none of the legislators who would vote on the question of ratification in the States have served in Washington; therefore, they have never been exposed to the virulent disease which has its habitat on the banks of the Potomac River and is known as "Potomac fever."

Potomac fever has a very peculiar effect on those who succumb to it. The chief effect is that it induces in their minds a belief that the people who sent them here do not really have sufficient intelligence to manage their own governmental affairs and that they should be deprived of just as much political power as possible. Sometimes this disease takes the form of causing one to believe that there is more wisdom in the heavily populated sections of the country than there is out in the wide open spaces, where people can look up to the heavens and see the stars at night. I say this because during the First World War there was a division from Brooklyn, N.Y., which was said never to have seen a dark night until they got to the Western Front because the artificial illumination of Brooklyn had been around them to such an extent that they did not really know what darkness was. When there is no darkness, there is no good opportunity to go out and meditate under the stars, which are poetically called the forget-me-nots of angels.

The Senator from North Carolina thinks that even though Congress should be so foolish as to submit Senate Joint Resolution 1 to the States for ratification, it is inconceivable that the 34 States which would lose their power under Senate Joint Resolution 1 would be so foolish as to vote to deprive themselves of the power which the present Constitution gives to them.

One of the great constitutional scholars of the United States is a professor in the Yale Law School, Prof. Charles Black, who was originally from the great State of Texas and who has been rendering great service to our Nation by instructing law students at Yale Law School for some years.

He appeared before the Senate Judiciary Committee in the hearings in April. He testified in substance that if Senate Joint Resolution 1 should become a part of the Constitution, it would be the most radical provision that has ever been placed in the Constitution of the United States.

I cannot refrain from contrasting the attitude toward our present Constitution exhibited by Professor Black and that of our good friend, the Senator from Indiana, who says in effect that unless we accept Senate Joint Resolution 1 as an amendment to our Constitution, our country is going to experience chaos and ruin tomorrow, or at least in the next election.

While the Senator from Indiana deplores splinter parties and third, fourth,

fifth, sixth, and seventh parties in one breath, he demands in the next breath that we submit to the States a proposed constitutional amendment calculated to destroy the two-party system which has made our Constitution operate and which would encourage a proliferation of third, fourth, fifth, sixth, and seventh party candidates.

I would commend to the consideration of the Senate these words which were spoken by Prof. Charles Black of the law school of Yale University before the Senate Judiciary Committee in April of this year. I read from pages 140 and 141 of the record of those hearings:

But if I may be permitted a reminiscence which, though personal, I believe is entirely to the point on the present issue, I spent last summer instructing foreign law graduate students in the Constitution of the United States, teaching a course in constitutional law to young people already lawyers in their own countries, who were to go out after the summer to the many different American law schools and pursue their studies of American law and reside for the year in the United States. I told them, at the beginning of the course, "We have nothing to show you here in the way of antiquities. We will show you a house that was built in 1810 and you will laugh when we tell you it is an old house, you will laugh behind your hands, because you look at the Arch of Titus every morning when you walk to work. We have in fact only one antiquity that is worth your attention. That is the Constitution of the United States."

"It was put into effect when Napoleon Bonaparte was a young comer. And as the other countries of the world, almost without exception, have rolled through one constitutional revolution after another, this thing has stood there in substantially its present form, has accommodated a whole continent and now reached out to the islands of the Pacific and brought them into a political structure of obvious solidity and strength. It is our antiquity. It is what we have to show you instead of the cathedral at Chartres," I told them, "so let's get to work studying it."

I approach this question with that kind of bias. I approach this question with the feeling, which I believe to be validated historically as well as any can be, that the Constitution of the United States is an almost miraculously successful document, and that any change in its structure is to be approached with every presumption against it. It is often said that the electoral college system is antiquated. This is used as a sort of prerogative term for it. "Antiquated" means that it has lasted a long, long time. I do not find that an epithet of opprobrium at all. I like antiquated constitutions. They are the best kind.

So I want to approach this from that point of view. I think that none of the difficulties that I or Mr. Bickel or Mr. Brown or others see in these proposed changes can be proved up to the hilt. These are prophecies. These are suggestions of possible trouble. Some of them seem very convincing. Some of them seem almost inevitable to me.

But I do not think that it is up to the opposition to this proposal to establish beyond a doubt what will happen in the future. We are dealing with a system which has been brilliantly successful, the whole solar system, as the late President, then Senator Kennedy, called it, of the allocation of power in the United States. It is up to those who would effect a major and radical change in it to dispel very positively the doubts as to the wisdom of that change.

And it is with that conception of where the burden of argumentation lies that I proceed to say what I have to say.

After this very eloquent statement at the outset of his testimony, Professor Black proceeded to demolish in a most effective manner the proposal now embodied in Senate Joint Resolution 1.

I say this, and I say it with hesitation, but I say it with a firm conviction, that I do not believe the Senate should vote on Senate Joint Resolution 1 until every Senator has read the statement of Professor Black and the statements made by Alexander M. Bickel, Theodore H. White, and the secretaries of state of Louisiana and New York, who testified together before the Senate Judiciary Committee.

While Senate Joint Resolution 1 professes to leave to the States the power to prescribe the qualifications for voting, Senate Joint Resolution 1 would require the virtual annihilation of the States as viable entities in the selection of President and Vice President, and would require the passage of laws which would concentrate the complete control of the presidential and vice-presidential elections in the Federal Government in Washington. This may be something that is desirable to those who are victims of Potomac fever, but it is not desirable to those, like myself, who believe that any good system of government should be kept as near to the people as possible, and who believe that no government sitting on the banks of the Potomac River has sufficient wisdom to solve all of the problems which confront public officials and the people at local levels.

The pending business before the Senate is the Tydings-Griffin amendment. The authors of this amendment recognize very wisely that Senate Joint Resolution 1 is unwise and extremely unwise in one particular; namely, in that it provides for a runoff election in the event that 40 percent of the people voting in the United States are unable to pick a 40-percent President in the first election. So the authors of the Tydings-Griffin amendment seek to abolish the runoff election which will have to be held, as I have said, if 40 percent of the voters do not all vote for a 40-percent President in the first election.

Strange to say, they return in part to the wisdom of the electoral college, the electoral vote system which now prevails under the present Constitution. The Tydings-Griffin amendment appears at first blush to be an improvement over Senate Joint Resolution 1. I say "at first blush" because upon analysis it appears that all of the objections which can be voiced against Senate Joint Resolution 1 apply to the Tydings-Griffin amendment insofar as the first election is concerned.

To make the first election operate Congress would have to transfer the entire control over presidential and vice-presidential elections from the States and various voting precincts of the States to the National Government. They would have to abolish all State and local election officials as far as their ultimate powers were concerned and supersede them with national election officials.

As far as the Tydings-Griffin amendment is concerned, it would still leave the chief vices of Senate Joint Resolution 1 in existence insofar as the first election is concerned. It would still provide for the election, not of a majority President, but of a 40-percent President. It would still provide that the 184,000 separate election precincts—think of it, 184,000—now existing in the 50 States and the District of Columbia would be converted into one great big election precinct in which 60 or 70 million people would vote and in which a majority of one vote, whether it was coerced or purchased, or freely cast would determine who would be President or Vice President of the United States, provided that one vote was cast with the 40 percent of the people rather than with the 60 percent.

Mr. President, under the Griffin-Tydings amendment, you would still have the temptation to chicanery that appears in every close election. History shows that we had two such elections recently, the election of 1960 and the election of 1968. All of these close elections would invite controversy, would invite charges and countercharges of fraud and miscounting of votes, and the breaking down of voting machines, such as occurred on a large scale over in the State of Maryland during a recent primary.

Under that first election this country could go weeks and weeks and months and months without a President of the United States. I say that because the President has a definite term of office. It ends on a particular day. Unlike the case with respect to many public offices, he does not remain in office until his successor is chosen and qualified. This is made clear by the 20th amendment to the Constitution. Section 1 of the 20th amendment to the Constitution provides as follows:

AMENDMENT [XX]

SECTION 1. The terms of the President and Vice-President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

Under the 20th amendment, come noon on January 20, the term of the incumbent President ends, stops short, and the term of his successor begins. The incumbent President cannot serve 1 second constitutionally beyond noon on the 20th day of January next succeeding the most recent presidential election.

So what is going to be the situation if there is established a system of direct election where every fraud committed in any one of the 184,000 election precincts and where every miscount of every vote cast by millions of people in 184,000 election precincts and where every breakdown of a voting machine in any one of the 184,000 election precincts may be litigated and controverted and made the subject of charges and countercharges, and where the truth as to who was elected President can be clouded with doubt and uncertainty and controversy and litigation for weeks and weeks and months and months.

So the situation is made possible, both by Senate Joint Resolution 1 in its original form and the Tydings-Griffin proposal in respect to the first election, that we can have noon, January 20, come around without knowing who has been elected President, and the outgoing President to go out of office and there is no successor to take his place.

What does that mean in practical effect? It means we do not have a President who has been elected even by 40 percent of the people. It means we have a period when we do not have a President for whom any person has voted.

The Constitution, insofar as the 20th amendment is concerned, recognized that danger even in such a relatively foolproof thing as the electoral college system. So there is a provision to take care of that situation. There was put in section 3 of the 20th amendment the following language:

If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice-President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice-President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice-President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice-President shall have qualified.

Senate Joint Resolution 1 and the Tydings-Griffin proposal both present a very substantial danger that we will have the situation envisaged by the 22d amendment where, noon of January 20 following a general election comes around, with nobody having been chosen President or Vice President.

I digress to note that some of the contingencies covered by section 3 of this amendment cannot possibly come into being, even though this would provide some way out of the quandary if they did come into being, because Senate Joint Resolution 1 says that every voter has to vote for a President and Vice President who have joined themselves together on the ticket. A voter has to vote for both of them. Consequently, if we cannot tell who has been elected President, we cannot tell who has been elected Vice President. So instead of insuring, as the distinguished Senator from Indiana has become so accustomed to asserting, that we will have a President who is the choice of the greater number of voters—that is, 40 percent of them—we will have to have an interim President to be selected in some manner yet undetermined, who has not been voted for by a single human being casting a vote in any one of the 184,000 precincts.

It may be months and months during which we will have an acting President, for whom nobody has voted, serving as the head of the administration of this country.

That is not only a real possibility under Senate Joint Resolution 1 and under the Tydings-Griffin amendment, but I venture to assert that it is a probability. We have had cases where Presidents have received only a scant plurality of the popular votes over the opposing candidates. If one vote were cast in each of the 184,000 precincts as a result of fraud, or if one vote were miscounted in each of the 184,000 precincts, or if voting machines should break down in any area of the Nation, there would be a real probability that in close elections, when January 20 came around, we would not have anybody who had been identified as the President-elect or the Vice-President-elect, who could take office and supplant the retiring President leaving office as the Constitution requires at noon on that day.

Why should the Senate or the people be asked to abandon a system which has stood this country in good stead for 181 years, and invite troubles of this kind?

Why should we abandon the system of our Constitution which has endured for 181 years, and brought the highest degree of happiness and prosperity to a people, for such an untried thing like Senate Joint Resolution 1 or the Tydings-Griffin amendment, which may plunge this country into chaos, and is likely to do so, in respect to every close election such as those we had in 1960 and 1968?

I wish to read an article from the New Republic of September 26, 1970, entitled "Direct Election of the President."

This article was written by one of the greatest constitutional scholars of this country, Alexander M. Bickel, of the law school of Yale University, who appeared before the Senate Judiciary Committee and made a most cogent statement regarding the evils of the direct election proposal as embodied in Senate Joint Resolution 1.

The article from the New Republic reads as follows:

DIRECT ELECTION OF THE PRESIDENT

(By Alexander M. Bickel)

Though last week it narrowly rejected a move to limit debate on the proposal to abolish the electoral college and substitute direct popular election of the President, which was passed in the House by better than the required two-thirds majority, the Senate is moving toward decision.

Whether the necessary vote can be repeated there, and Senator Birch Bayh (D, Ind.) hopes it can, may depend on whether the Senate first attaches to the proposal for direct election an amendment put forward by Joseph Tydings, the Maryland Democrat, and Robert Griffin of Michigan, the assistant Republican floor leader. An amendment such as this to a proposed Constitutional amendment needs the support of only a simple majority for passage.

The direct election proposal as approved by the House provides that the winner of the popular vote by no less than 40 percent becomes President. If no one gets 40 percent, there is a run-off popular election between the two top candidates. Such a system, as I have several times pointed out in these pages, would invite multiple candidacies, and run a heavy risk of ending the dominance of two major parties in our politics, and one need not be a die-hard Democrat or die-hard Republican to appreciate the consequences of that. In order to minimize this risk, the Tydings-Griffin amendment would eliminate the run-off and provide instead that if no one gets 40 percent of the national vote, the vote is to be retabulated by states, the way it is now, and if the winner of a nation-wide popular plurality, by whatever margin, also has a majority in the electoral college, he becomes President. If he doesn't—which is to say, if nobody in the run-off has an electoral college majority, or if the loser of the popular vote has it—then a joint session of Congress shall elect a President by majority vote of the representatives and senators, each casting one ballot.

Reinserting the electoral college in the Tydings-Griffin fashion would very likely deter multiple candidacies almost as effectively as the electoral college now deters them, since only a candidate with sufficient regional strength to garner an electoral college vote could hope to gain anything by running. What he would hope to gain would be deadlock, giving him a chance to bargain in the congressional joint-session run-off. A candidate whose strength is spread more or less evenly across the country won't count for much in the electoral college, and can't entertain such hopes. Under the proposal as passed in the House, any candidate, and a number of them in the aggregate, can very well hope to produce deadlock by simply preventing anyone from getting 40 percent, and thereby driving the election into the popular run-off, with opportunities to trade support open to all.

The Tydings-Griffin amendment is thus an improvement over the popular election proposal endorsed by the House. But it is not addressed to and does not touch two other serious defects of that proposal. Direct popular election, which would be the norm under Tydings-Griffin as much as under the House proposal, would deprive cohesive, balance-of-power groups in the large industrial states of the special leverage they now have in Presidential politics. The blacks are such a group, whose influence would be diminished, and it is a wonder that liberal and civil rights organizations have supported, or at least not opposed, popular election. There are exceptions, of course, most notably Rep. William Clay, the black, Democratic congressman from Missouri, who has argued cogently against popular election, both in the House and in Senate hearings.

Any so-called Southern strategy in Presidential politics is at best a very risky business now, depending entirely on the delicate acrobatic trick of pursuing politics that attract, without quite satisfying, the South; that have appeal to ethnic and economic groups in the North and West also, and yet do not repel other groups there. Under popular election, a full-fledged Southern strategy will become a realistic possibility. Groups that will be repelled (ie, the blacks) can go hang. Who will need to carry New York or Michigan? Enough to get millions of votes there, which can be added to the large majorities on the Border, in the South, in Southern California and in solid Republican country in the middle!

The electoral college forces a Presidential candidate to think distributively; he must keep the whole country in mind, which includes combinations of small states too, and put together a national coalition. Hence strategicaly placed groups count heavily—and the blacks are, of course, not the only such group. Popular election will make other strategies possible.

Popular election—again, whether under the original House passed proposal, or under the Tydings-Griffin amendment—is capable also of producing in a close race horrors of vote counting and recounting, and of charges and counter-charges of fraud, with consequent litigation and endless delay. The electoral college system counts by states, focuses the closeness of the race on one or a few states—the result in most is plainly beyond doubt, however narrow the national margin of victory—and insulates recounts and other difficulties within those states. That is why our national elections, even the closest ones, have always been almost instantly decisive.

Those of us who sat anxiously before our TV sets through the night of November 5 in 1968 should try to imagine what it would feel like to sit there on and off for weeks.

The direct election proposal may well be called a political tower of babel.

Mr. ERVIN. Mr. President, John F. Kennedy once said with respect to the electoral system:

It is not only the unit vote for the Presidency we are talking about, but a whole solar system of governmental power. If it is proposed to change the balance of power of one of the elements of the system, it is necessary to consider the others.

We do not know for certain what the effects of direct election will be on the various institutions that make up our political system, but history and political analysis can point out some of the more obvious dangers and probabilities. It is not, however, for the opponents to prove beyond a shadow of a doubt that these political disasters will occur. The burden is on those who would change our political institutions to show that their plan is safe—that it will not create political instability and a breakdown of our constitutional system.

At this point I would like to discuss the probable effects direct election will have on one of our most enduring political institutions—the two-party system. As our Nation has grown from a small collection of colonies hovering along the Atlantic Ocean into a vast, densely populated continental expanse, so has our diversity and range of interests. Accommodation and compromise have become absolutely essential features for the effective governing of the 200 million people who now constitute the American citizenry. Our two-party system has long served as a unique instrument of this accommodation and compromise.

As Prof. Alexander M. Bickel of Yale Law School describes it:

The monopoly of power enjoyed by the two major parties would not likely survive the demise of the electoral college. Now, the dominance of two major parties enables us to achieve a politics of coalition and accommodation rather than of ideological and charismatic fragmentation, governments that are moderate, and a regime that is stable. Without forgetting that of all the mysteries of government the two-party system is perhaps the deepest, one can safely assert that each major party exerts centripetal force; that it ties to itself the ambitions and interests of men who compete for power, discouraging individual forays and hence the sharply defined ideological or emotional stance; that it makes, indeed, for a climate inhospitable to demagogues; and that it provides by its very continuous existence a measure of guidance to the marginally interested voter who is eminently capable of casting his ballot by more irrelevant criteria. The system, in sum, does not altogether take mind out of politics, but it does tend to ensure that there are few irreconcilable losers, and that the winners can govern, even though—or perhaps because—there are equally few total victories.

Largely, because of the stability and strength of our two major parties, ideological fragmentation—the plague of many a democracy—has been avoided in America. The programs of minor parties seeking reform in the economic, political, and social order of our country have commonly been absorbed and advanced by the two major parties as they each attempt to build a winning national coalition.

Mr. President, it is my firm belief that our two-party system has been nurtured and protected by the manner in which we elect the President.

The electoral college system requires that a presidential candidacy, to be successful, secure broad, nationwide support. Minor-party presidential candidates and political reform parties have learned their political history well enough to understand that without sufficient strength to fashion broad-scale State electoral victories they have no chance of affecting, much less winning, a presidential election. As a consequence of this well-understood political reality, minor-party presidential candidacies have been few and far between and never successful.

The particular feature of the present system primarily responsible for discouraging third-party candidates is the unit rule. Though not constitutionally required, from an early date in the Nation's history "pledged electors" have traditionally cast their votes for the presidential candidate receiving the largest number of popular votes in the State. By awarding to the winner of a plurality in the State the State's entire electoral vote, the present system requires that any presidential contender, to have significant effect upon the outcome, secure sufficient popular support in States with enough electoral votes to affect the electoral college decision. As a corollary to this, it offers no hope of success to a candidate whose considerable and intense support is scattered around the country.

With few exceptions, only candidates with a strong enough regional base to capture State electoral votes have seriously challenged the two-party domination of presidential politics. The reasons are spelled out in the statistics of past presidential elections. In 1912 there were two important minor-party candidates. Theodore Roosevelt broke away from the Republican Party and received 4,127,788 popular votes to 6,301,254 for the winner, Woodrow Wilson. Wilson won 435 electoral votes and Roosevelt captured 88. But in reality, in 1912, it was Taft, the regular Republican nominee, who was the true third-party candidate, and he got only eight electoral votes although he had 23 percent of the popular vote. Eugene Debs received 901,255 popular votes out of the total vote of approximately 15,000,000. He won no electoral votes. Again in 1920, despite the fact that Debs won almost 1,000,000 popular votes out of 26,000,000 cast, he had no electoral votes. Senator La Follette, breaking away from the Republican Party in 1924, won 4,832,532 popular votes, more than one-half the popular total for the losing Democratic nominee, Davis. Nevertheless, while Davis' vote was translated into 136 electoral votes. La Follette received a meager 13. Finally, in 1948, Henry Wallace received a popular vote of 1,157,326 out of approximately 49,000,000 votes cast. He, too, won no electoral votes. By contrast and in the same election, STROM THURMOND, the States' Rights Party candidate, received a similar popular vote of 1,176,125 but was able to capture 39 electoral votes because of the regional concentration of his popular support.

These lessons of history must have been particularly persuasive in the presidential election of 1968. Richard N. Goodwin described the impact of the electoral college on the temptations of many antiwar critics in 1968 to mount a fourth party drive for the White House. In an article appearing in the Washington Post, of October 6, 1969, Goodwin stated that recognition of the extreme difficulty in winning any electoral votes despite the prospect of a large popular vote was the primary reason that he and others of similar political views did not challenge the major party presidential candidates. The effect of a "peace candidacy" would most likely have been, in Goodwin's judgment, a further enhancement of the election prospects of the Republican candidate. As Goodwin himself suggests, the encouragement that direct election would give to minor party candidates could not come at a worse time than now, "when the tendency to political fragmentation and ideological division is reaching new heights."

Similarly, the appeals to Wallace supporters not to waste their vote—by Republicans in the South and by Democrats in the North—significantly lowered the popular vote for Wallace in 1968. His appeal was running consistently at about 20 percent of the vote in September of 1968. But his final vote percentage was 13.6 percent. The decrease is generally attributed to the drives by both major parties to persuade voters that a vote for Governor Wallace was a wasted vote since the Governor could not gain sufficient electoral votes to affect the results of the election.

These examples of history prove two things about the present system. First, for the important third-party candidates without a regional base—Taft and Debs in 1912, Debs again in 1920, and Henry Wallace in 1948—no matter what their popular vote strength, they made no impact on the electoral college race. They did not deadlock it. They did not serve as power brokers. While their candidacies no doubt had a political impact, they were no threat to political stability and they did not shake the structure of our electoral system.

Second, the regionally based candidates—notably STROM THURMOND in 1948 and George Wallace in 1968—won proportionally more electoral votes in relation to their popular appeal. Yet even so, this group, too, did not pose a threat to the stability of our electoral system. It is worth something to note that in 1912, with four candidates in the field, the worry was what Teddy Roosevelt was doing to the Republican Party, not what he was doing to the electoral system. Yet, in 1968, when Wallace got 47 electoral votes, compared to Roosevelt's 88 in 1912, the scare talk was all about the imminent destruction of our election institutions.

I digress there to say that that is the theme song of the distinguished Senator from Indiana (Mr. BAYH) in his advocacy of Senate Joint Resolution 1.

In summary, history and logic teach us that the present system discourages

third-party candidates who do not have a regional base of support. And in the rare times when candidates with a regional base do run, their impact on the race has been restricted to political influence only. They do not register significantly in the electoral vote.

Quite in contrast with the support which our present electoral college system provides for the two-party tradition, in my judgment the proposal for direct popular election harbors dangerous threats to this great American tradition.

Direct election of the President will enable third-party candidates to run more easily for the presidency. Adoption of direct election will necessitate the enactment by Congress of uniform standards for entitlement of candidates to a place on the ballot in every State. This will allow every minority party candidate to run nationwide rather than as a State, regional, or limited area candidate. It will permit votes to be drawn from all sectors of the Nation by each minority candidate. Governor Wallace secured a place on the ballot in each State in 1968, but only after several law suits and a decision by the Supreme Court. Under the existing law in a number of States, Governor Wallace's party, as well as other minor-party candidates, will have to field candidates in 1970 in order to secure a place on the ballot in those States for 1972. If such candidates do not file for office in these States in 1970, their respective parties will have to file as new parties in 1972. Such obstacles to Mr. Wallace's party and other minor parties will be eliminated under direct election plan.

The upshot of direct election and the inevitable national legislation on eligibility for the ballot will result in an unknown number of splinter parties—local, regional, and ideological.

Some of the arguments used in favor of direct election support this analysis. Proponents of direct election have argued that the unit rule of the present system bolsters the continued existence of one-party States. I would add parentheticall-y that the era of the one-party State appears to be ending. The theory is that supporters of the weaker party in a one-party State become so discouraged at being unable to carry the State for their party's standard bearer, that real competition for the State's electoral votes ceases to exist. Direct election would change this situation, according to its proponents, because even the weaker major party would now have an incentive to get every possible vote in the one-party State. Accepting for arguments' sake the assumptions of this theory, it should be obvious that voters who have been reluctant to support third-party candidates in the past, because of the slim likelihood of carrying their State, would now support with undaunted enthusiasm their real choices for President. The same factors which would change one-party States to two-party States will also change two-party States into three-, four-, or more, party States. These other parties may include a one-issue peace party, a States-rights party, a black-power party, an urban party, a women's liberation party, or innumerable other such presidential parties which would undoubtedly offer themselves to the voters under a system of direct election. The public confusion and fragmentation likely to surround this bartering and begging for votes will seriously undermine the integrity of the presidential election.

A few illustrations of the encouragement which direct election will give to minor-party candidates will point to the dangerous potential of direct election. If the aggregate of votes cast for minor-party candidates is very large, as may very well be the case under direct election, the third-highest popular vote candidate will have great influence.

We should remember that the total vote of all the third-party candidates need only amount to about 25 percent for the direct election process to be deadlocked. If the two major candidates split the remaining 75 percent of the vote closely, then no President can be elected. To avoid the deadlock, one major candidate must achieve a 40- to 35-percent plurality. This would be highly unusual even in an ordinary election.

Supporters of direct election seem to assume that Wallace will forever be the strongest third-party candidate. If that is so, and there is no reason to believe that it is so, every vote that every minor party candidate secures would be a boost to Wallace's bargaining strength, even those votes cast for candidates at the opposite end of the ideological spectrum. Wallace attained a September 1968 popularity of at least 20 percent. He might well have done much better under direct election, since the "wasted vote" argument used so effectively against him would not apply.

It does not take much imagination to transform the 1968 election into a direct election nightmare. Wallace with his 20 percent, Senator McCarthy and others totaling better than 5 percent, and Nixon and Humphrey maintaining the seven-tenths percent difference between them. Wallace, as the leading third-party candidate, would have held the balance of power. The "might-have-beens" we hear from direct election supporters are a lot more probable under their plan, than under the electoral system we have.

Supporters of direct election do not seem to understand the extent to which the existing system discourages minor-party presidential candidates. It cannot be stressed too often that not since our two-party sysem developed has a minor-party candidate forced an election into the House of Representatives. No third-party candidate has ever been able to bargain with his electoral votes for concessions from major party candidates.

There is another influence that direct election will have, which is of concern to all those who value the stability that our two-party system has given this country. When we think of third-party candidates, we generally think first of the vegetarians and prohibitionists. Next we think of independent political movements which nominated candidates for the Presidency on their own. Rarely have we had a third-party candidate who ran first for the nomination of a major party, and then elected to go his own way after his loss of the nomination. A familiar example of this type of candidacy is Teddy Roosevelt's "Bull Moose" campaign.

With the advent of direct election and uniform national eligibility rules, however, we should ponder the effect on the two major parties and their nomination process. Imagine a contest in a Republican or Democratic convention between two evenly matched strong candidates, each with broad national following. To avoid a deadlock, the party chooses a darkhorse.

Or imagine that same race, with one candidate being able to secure the nomination just barely over his opponent. As a third example, consider a three-, four-, or five-way race between candidates of relatively equal strengths. Finally, consider a contest with one clear leader, but with another candidate who inspires a devoted, but relatively small following.

Now, under the existing system the losers, with more or less grace, have acceded to the wishes of the party convention and retired from the contest. The influences upon them to do this are many—party loyalty, lack of party or-organization, et cetera. But one of the strongest influences is that within a main party nomination, an aspirant to the White House is under terrific handicaps in getting himself on the ballot nationally to have a fighting chance at victory.

The ease with which third-party candidacies can be mounted under direct election applies to the losers of party nominations as well as it does to single-issue candidates. The pressures on the convention loser to enter the race as an independent will be great. The question put to him by his supporters will be: "If we have a peace candidate, a black-power candidate, a conservative candidate, and an urban candidate, why should the people not be able to vote for a man who has 40 percent of his party behind him, and who lost the party nomination by only a hair. With all these minor candidates, you can win in the runoff if you can get over 30 percent of the vote."

"And," they will be quick to add, "do not worry about being disciplined by the party. Even if you lose, the party would not dare ignore a strong leader with the 25 percent popular vote we know you can get."

Now, no one can predict what the response will be to such blandishments. But the issue will be clear to the loser of the party nomination: party loyalty versus a chance at the White House. I would not want to bet that the losing candidate could resist the lure of the White House every time. We remember that in 1968 in both parties there were two strong candidates in addition to the eventual nominees. It is profitable to speculate on what the situation might have been in November 1968 if direct election had given these forces an opportunity to pursue their goals after the conventions.

This is not idle speculation. One of the consequences of direct election may well be that the nomination by a major party convention will lose its meaning when it

no longer is the most important waystation on the road to the Presidency. It may turn out, as some have speculated and as is suggested by New York's recent political history, that selection by a party convention may even be a handicap to a candidate. It may leave him open to charges of being the choice of the party "bosses," as opposed to his opponent, who won a few more primaries in the spring and who is the "choice of the people."

The major party presidential nomination is the linchpin of the national two-party system. Remove that linchpin—by removing the necessity for the losers of the party nomination to withdraw from the race—and we threaten to unhinge the entire national two-party structure. Without the unifying force of the party nomination and presidential campaign, the Republicans of Nebraska may have little in common with Republicans of Florida or New York. Democrats of California may have little to do with those of North Carolina or Illinois. When the party nomination no longer is the force which unifies the 50 State parties, who knows what the consequences will be for our two-party institution. Will Congress itself be able to maintain its two-party character in the face of this fragmentation? No one knows. One thing is certain, however, and that is that we cannot assume that the present political system will remain intact when we change so important an element as the Presidential electoral system. What seems as firm and as enduring as the Rock of Gibraltar may have the permanence of a rope of sand after 4, 8, 12, or 20 years of the direct election system.

Mr. President, I respectfully submit that proponents of direct election have completely failed to carry the burden with respect to the dangers the direct election poses for our two-party system. They propose to abandon a system which has worked well for almost 200 years, no small achievement for a human institution. In its place they propose a method of electing the President which, according to almost every respected observer of our political process, poses a great threat to the survival of our great two-party tradition.

Time and time again, one-issue, ideologically oriented candidates file for State offices with no purpose other than to establish a bargaining position in the final showdown for a narrow cause or to punish a candidate who has refused to accede to the special demands of a narrow interest group. The runoff primary has been typically bitter, divisive, and cynical. The two remaining contenders are tempted to pay a very high price for the support of the defeated candidates who hold the balance of power in the runoff. I shudder to think what our presidential campaigns would become under the pressures of a popular runoff. It is my sincere belief that the legitimacy of any President will be seriously undermined if he is subjected to the conditions and consequences of fighting his way through a runoff.

The period of indecision between the first election and the runoff is in itself a great danger to political stability. In the case of very close presidential elections, where the country is evenly and perhaps intensely divided, it is important that any system for electing the President be swift and sure in its designation of a winner. The direct election proposal provides for anything but this swift and sure designation. For several weeks or even months after the November election, the country will be in doubt as to its next President. Certainly, in times of great stress and bitter political division, such delay and doubt would of itself constitute a serious national crisis.

Mr. President, a number of distinguished observers of our political system have pointed out the dangers of the runoff provision.

Prof. Ernest Brown of Harvard Law School reminded the Judiciary Committee in the course of his testimony that:

> At a time when the country suffers from sharp divisions, we should be cautious lest, though with the best of intentions, we encourage further division and discourage coalition.

Also testifying before the Judiciary Committee concerning the dangers of a popular runoff was Prof. Alexander Bickel of Yale Law School. Professor Bickel observed:

> I think it altogether probable that under a system of popular election the situation would be as follows: the runoff would be, not an occasional occurrence, but the typical event. The major party nomination would count for much less than it does now—and might even eventually begin to count against a candidate. There would be little inducement to unity in each party at or following conventions. Coalitions would be formed not at conventions, but during the period between the general election and the runoff. All in all, the dominant positions of the two major parties would not be sustainable.

The distinguished Senator from Maryland (Mr. TYDINGS) has offered an amendment to Senate Joint Resolution 1 which would eliminate the runoff. In remarks before the Judiciary Committee Senator TYDINGS warned that:

> The maneuvering and dealing in a runoff race of the two surviving candidates would certainly be intense as they desperately wooed the disappointed followers of the third-party candidates. If experience under the French electoral system is any guide, the runoff makes the first election a test of bargaining strength, leads to a further ideological hardening, and creates an atmosphere of shameless deals preceding the runoff.

The runoff provision is not the only reason which leads me to oppose Senate Joint Resolution 1. However, the likely consequences on our political institutions and traditions of the runoff provision are so dangerous that it alone warrants the rejection of Senate Joint Resolution 1.

It would be a gross error to think that these defects and dangers will all disappear if we do some patchwork on the runoff procedure. Senators GRIFFIN and TYDINGS, alarmed by the disastrous consequences of the second direct runoff election provided for in Senate Joint Resolution 1, have offered an amendment to eliminate that provision. While I share the concern of my two distinguished colleagues concerning the effects of a runoff election on our political process, I do not share their belief that its elimination cures the direct election proposal of its fundamental weaknesses as a method for electing the President.

The Griffin-Tydings amendment provides that if the leading candidate fails to reach a 40 percent plurality, he will still be President if he secures a majority of the electoral votes, automatically allocated to the candidates according to the unit rule system. If the plurality winner secures neither 40 percent of the popular vote nor a majority of the electoral votes, the election of the President is then thrown into a special joint session of the new Congress where each Congressman and Senator shall have one vote to cast between the two candidates receiving the highest popular vote total. The Griffin-Tydings amendment is designed to eliminate the development of splinter parties, so universally expected as a consequence of the runoff provision of Senate Joint Resolution 1. In my judgment, this well-meaning amendment will not accomplish its purported objective.

In the first instance, the sponsors of the runoff elimination amendment have underestimated the full impact of the direct election proposal on our two-party system. Minor-party Presidential candidacies are undertaken for reasons other than any serious intention of capturing the Presidency. The "spoiler" candidate is one example of candidacies which will quite likely appear if direct election is instituted, with or without a runoff provision. It is not a matter of loose imagination to contemplate the possibility of a bitterly disappointed presidential aspirant, rejected by his party convention, mounting a third party effort which would alone, or in combination with other minor-party candidacies, deny 40 percent of the vote to any candidate and possibly send the election to a joint session of Congress.

In addition to the "spoiler" candidate, the "ideologue" candidate will be encouraged to enter a direct election contest, with or without a runoff. The ability to amass and register a national vote total on behalf of some specific cause or to demonstrate the strength of a certain bloc vote will be an almost irresistible temptation to certain groups of voters. Under our present system, such efforts are discouraged because their State totals are lost forever unless sufficiently large to carry a State for the splinter Presidential candidate.

It will be very attractive for a women's liberation candidate, a states-rights candidate, a Black Power candidate, an urban candidate, a motherhood candidate, a secessionist candidate, an environmentalist candidate, or other such legitimate or illegitimate minor-party candidates to enter a presidential contest for the sole purpose of registering a national total on election eve to demonstrate the political potency of his—or her—cause or group. Whatever else may result from such a fragmentation of the electorate, a stable and effective method of electing the President will not.

Finally, there is the third type of third-party candidate—the loser of a major party nomination who makes a serious bid for the Presidency. Teddy

Roosevelt's Bull Moose campaign is the classic example of such a serious major party "renegade" candidacy.

Should "spoiler" candidates and "ideologue" candidates and "renegade" candidates become a regular and significant part of presidential politics, as I believe is likely under direct election even without the runoff, we would face the prospect of having our Presidents routinely elected by a joint session of Congress. The possiblity that Congress would regularly select the President must give us great concern. One of the most important principles incorporated in our Constitution is the doctrine of separation of powers. It is not an abstract theory. Its importance lies in its practical consequence of preventing the concentration of total political power in any one governmental institution. While at times I have believed it is the executive branch which has most exceeded the proper limits of power established by the Constitution, I would never favor the creation of a mechanism which might subject the Presidency to a position of eternal dependence on the Congress. Because of the failure of the Griffin-Tydings amendment to eliminate the likelihood of third-party presidential candidacies under a system of direct election, there is a great possibility that no candidate will be sufficiently strong to win the Presidency as a result of the popular election and that the Congress in special session will emerge as the body before which a presidential aspirant must bow—not the American people.

The proponents of direct election have sought to use the splinter-party problem for their own ends. For some time they have pointed to the 1968 candidacy of George Wallace and have tried to raise the specter of a 1972 candidacy as a goad to action on their proposal. One thing ought to be made clear about this argument. Whatever happens on the direct election proposal, it will have no effect on the 1972 election. To be pertinent in 1972, this constitutional change must go into effect by April 15, 1971—a bare half-year away. There is no practical likelihood that the required number of States could ratify this amendment in the short weeks between now and the April time-limit. Therefore, all the scare talk about George Wallace is disingenuous, to say the least.

Direct election opponents of the electoral college have tried to use Wallace's hairbreadth victory over Albert Brewer in the Alabama gubernatorial primary to scare the American people into believing a constitutional crisis lurks around the corner. They have argued that should Governor Wallace run as a candidate for the Presidency in 1972, he could win enough electoral votes in Southern and Border States to deny a majority to either of the majority party candidates. He could thus stalemate the election and exact a high price from a major party candidate for his support. On the other hand, they have asserted that if direct election is in effect in 1972, Governor Wallace's power to affect the presidential election would be greatly diminished if not entirely eliminated. They apparently assume that it is unlikely that Wallace can secure a sufficiently large percentage of the popular vote to deprive a major party candidate of the 40 percent popular vote necessary to avoid a runoff under the direct election proposal.

In light of this 13th-hour scare tactic of direct-election supporters, I would suggest that the plan for direct election now be designated as the "Bye-Bye Wallace" amendment.

I seriously question an approach to constitutional reform which is based, however slightly, upon the short-term political expediency of hindering one potential candidate's campaign for office. Whether George Wallace's campaign or other minority-party or independent presidential candidacies are good for the country at this particular time in our history is a subject of considerable debate and disagreement. I personally believe that ideologically oriented one-issue parties do not contribute to wise public policies and orderly government. Indeed, one of the great benefits of the present electoral college system is its discouraging impact on minor-party presidential candidacies.

Quite apart, however, from one's personal view of the consequences of minor-party presidential candidates, I trust that the Senate will not embrace the proposition that the presence of one or more particular presidential hopefuls in one particular presidential election, with the theoretical possibility of causing an electoral college deadlock, justifies abolishing a process for electing our President which has been tried and proved over two centuries of experience. It is no reason for substituting a system whose consequences are at best unpredictable and, at worst, disastrous for our constitutional framework and political stability.

In discussing the third-party issue, it is worth repeating that never since the development of our two-party system has a minor-party candidate or a combination of minor-party candidates forced the election of the President into the House of Representatives. Never has a minor-party candidate been able to bargain with his few electoral votes in return for substantial concessions from the ultimate winner. Nevertheless, we are told—on the basis of authoritative crystal-balling—that the political situation in 1972 will bring about a constitutional crisis if we do not turn to direct election of the President.

I recognize that the existing system is not perfect. That is beyond the capacity of man. But it has functioned more than adequately in giving the nation outstanding national leadership, orderly transfer of power, and stable government. In the process we have developed political institutions, traditions, and balances which have contributed mightily to the harmony, the stability, and the integrity of our system of government.

Now we are being told, "Throw all that away and leap with us into the void." We should take this action, it is urged, because of the remote possibility that the experience of a long unbroken series of presidential elections will be shattered by one candidate in one presidential election. Surely George Wallace could do no greater harm than to be the motivation for such a dangerous experiment with our constitutional system.

I am no seer capable of revealing future events. On the one hand, I hear claims that the political situation in 1972 will be such that a candidate who receives 46 electoral votes in five States plus one additional electoral vote in another State in 1968 will increase that total in 1972 and prevent any major-party candidate from receiving an electoral vote majority. On the other hand, I hear predictions that this candidate will have greater difficulty in securing support in 1972 and may not be able to mount a campaign at all.

One thing I do know. No one can state affirmatively what the political situation will be like in 1972. Even if they could, I would have grave reservations about rushing into a fundamental constitutional change because of allegations of one possible aberration in an otherwise workable system.

I am distressed about the use of George Wallace's alleged presidential ambitions for 1972 as a basis for adopting direct election.

Fundamental constitutional changes should not be used as a device to achieve short-run political objectives. But I am also of the opinion that proponents of direct election are mistaken in their assessment of George Wallace's political fate as it is related to their proposal for direct election. In my judgment, the proposal for direct election makes it much easier for Mr. Wallace, and for any other minor-party presidential candidate, to exercise significant influence over the ultimate resolution of a presidential election.

Mr. President, it is my firm belief that the direct election plan bodes serious ill for our constitutional system. I have tried to outline at some length the effects I see in our national two-party system. How direct election will affect State and local politics, the relationship between Congress and the Presidency, the governing ability of the President during his term, the balance of strength among the various political forces in our country—these are other questions which deserve serious thought by Members of the Senate. We can only speculate on these questions, but that does not mean we are raising "fanciful" issues. Direct election is unknown. It is untried. We must speculate on its consequences before we cast aside political institutions which have developed over the course of this Nation's history.

When this debate opened, the distinguished Senator from Indiana (Mr. BAYH) who has led the fight for direct election, acknowledged:

> The burden in this debate will be on those of us supporting direct popular election—as it rightly should.

Mr. President, I respectfully submit that proponents of direct election have completely failed to carry the burden with respect to the dangers the direct election poses for our two-party system. They propose to abandon a system which has worked well for almost 200 years, no small achievement for a human institu-

tion. In its place they propose a method of electing the President which, according to almost every respected observer of our political process, poses a great threat to the survival of our great two-party tradition.

I have come to the same conclusion as that of Prof. Charles Black, of Yale Law School, that "a case can be made for the proposition that this amendment, if it passes, will be the most deeply radical amendment which has ever entered the Constitution of the United States." Consequently, I cannot be satisfied at the effort made thus far by the proponents of direct election to persuade us that we are only securing an equal vote for every Presidential elector. What we are doing is tampering with a fundamental American political institution. I trust that the Senate will hold the distinguished Senator from Indiana and others who advocate such a radical departure from our constitutional and political heritage to their duty to carry the burden of proof.

(The following colloquy, which occurred during the delivery of the address by Senator ERVIN, is printed in the RECORD at this point by unanimous consent.)

Mr. ALLEN. Mr. President, I want to commend the distinguished, able, and eminent Senator from North Carolina for his most logical and persuasive argument against Senate Joint Resolution 1. The junior Senator from Alabama notes here—and he is delighted that the Senator from Indiana has come into the Chamber again, because he might wish to make a comment or two about this resolution which might be of interest to the distinguished Senator.

The junior Senator from Alabama notes that section 7 of Senate Joint Resolution 1 provides that "this article shall take effect 1 year after the 15th day of April following ratification," which, it would seem to the junior Senator from Alabama, would mean that if this resolution is not submitted by a two-thirds vote of each House of Congress, and then ratified by the legislatures of 38 States, by April 15 of 1971—which is a physical impossibility, the junior Senator from Alabama submits—then the procedure for the election of the President and Vice President of the United States provided by this resolution could not take effect and be applicable until the 1976 elections; and the junior Senator from Alabama also is mindful, and I am sure that all Members of the Senate are mindful, that we have on the calendar many important bills and resolutions that need action by the Senate.

The Senate is now in the second day of what the junior Senator from Alabama characterizes as the Bayh filibuster, because the Senator from Indiana has seen fit to grind the proceedings of the Senate to a halt with respect to all matters other than the resolution under consideration, it being a resolution that could not become effective until 1976. As the junior Senator from Alabama understands it, a filibusterer could be defined as a person in a legislative body who obstructs or impedes the normal flow of legislation or legislative action, by parliamentary devices and rules, all within the Senator's rights.

Would it occur to the distinguished Senator from North Carolina that it would be much more desirable, much more in the interest of the country, that the Senate proceed to the consideration of these important bills that need action now, rather than to continue the Bayh filibuster and insist on the wasting of time on a measure that could not become effective until 1976? Especially, the junior Senator from Alabama would like to point out, since the Senate itself has been known to change its position in this regard and the distinguished Senator from Indiana has been known to change from advocating the automatic electoral plan rather than the direct plan, and the Senate and the distinguished Senator from Indiana might change their minds a number of times between now and 1976.

Mr. ERVIN. That is certainly to be hoped. I think the Senator from Indiana has a real fear about what he thinks is going to happen in 1976. He reminds me of the little girl, a very small girl, about 7 years old, who was weeping as if her heart would break. Some kindly gentleman came along and saw her, and asked her, "What is causing you all this grief?"

The little girl said, "I just got to thinking that I might grow up and be a grown lady, and I might get married, and I might have a little daughter of my age, and my little daughter might die."

She said, "That is what was causing me to weep."

I think the distinguished Senator from Indiana is like the little girl; he is just weeping in anticipation of what he feels may happen in 1976 if we do not have a constitutional amendment that permits a 40-percent President to be elected instead of a majority President, as under the present system.

I can understand why people like the little girl and the Senator from Indiana can conjure up imaginary ghosts that really frighten them. But I am convinced that the distinguished Senator from Indiana is concerned about what he fears may happen in 1976.

Mr. BAYH. Mr. President, will the Senator yield, since he made a personal reference to me?

Mr. ALLEN. The Senator from North Carolina has the floor.

Mr. ERVIN. Mr. President, I will do so with great pleasure, with the understanding that anything that transpires between the Senator from Indiana and myself by way of colloquy, questions, or observations shall not deprive me of my right to the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAYH. I have just one brief observation to my friend from North Carolina and my friend from Alabama. I have sat here for 2 days now and heard this same hypothesis proposed repeatedly. Having worked side by side with my friend from North Carolina on the Senate Judiciary Committee, I never cease to be amazed, amused, and stimulated by some of the stories of the Senator from North Carolina.

I am sure that when our grandchildren read the last 5 minutes of debate that has transpired with respect to this constitutional issue, it will go down as one of the intellectual high spots of this generation.

Mr. ERVIN. Well, it is nice to have something intellectual in connection with the debate on such an unintellectual proposition as Senate Joint Resolution 1. [Laughter.]

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. ERVIN. Mr. President, I yield to the Senator from Nebraska on exactly the same terms I yielded to the Senator from Indiana: with the understanding that anything that transpires between the Senator and myself by way of colloquy, questions, or observations shall not deprive me of my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, I would like to ask the distinguished Senator from North Carolina a question or two about Senate Joint Resolution 1.

Were I from a very populous State, a State which mathematically might gain by changing the method of counting the votes for the President, there would still be some features of Senate Joint Resolution 1 that, in my opinion, are very disturbing, and I should like to ask the Senator about them.

The joint resolution provides that if no candidates for President and Vice President get the required number of votes, there shall be a runoff election. My question is this: How long, in the Senator's opinion, would it take to go through all the processes of arriving at the decision that there should be a runoff from the first election, then preparing for the second campaign, having the campaign, holding the election, the process of counting, tabulation, and checking, disputes, and so on? How long would it take?

Mr. ERVIN. Mr. President, I think it would take months and months; and, in the case of close elections such as we had in 1960 and in 1968, and such as we have had on other occasions in this country, if we are going to have two elections in 1 year, since the Constitution provides that the President shall take office on the 20th of January next following the general election, I think we ought to have the general election a year and 10 days before he is to take office, so that we will be in a position to get two elections crowded in, and two campaigns, and all that goes with it, if we are going to have Senate Joint Resolution 1.

Mr. CURTIS. Does the distinguished Senator think it would be a good idea, in this day and age of tremendous world happenings, the electronic age, the space age, for this Government to go for months without a final decision being made as to the selection of an individual for President to lead this country, to speak to the foreign nations, and to give us leadership on domestic matters?

Mr. ERVIN. I think that would be the worst calamity that could befall the Nation. I alluded to it a moment ago in discussing the 20th amendment. I pointed out that an incumbent President's term expires at noon on January 20, and he

cannot remain in office a second thereafter. If we do not have somebody to take his place, we have a situation in which Congress would have to make a provision for electing some man, who has not been voted for by anybody, to act as President, until it could be determined, after months and months, who has been elected, if anybody. I think it would be better to have a 40-percent President ready to take office at noon on the 20th of January than it would to go through the period where we would have no President whatever, merely an acting President.

Mr. CURTIS. Is it not true, also, that one election, a campaign for one election, has created problems for the candidates and the parties from the standpoint of the tremendous cost involved?

Mr. ERVIN. The cost of holding a presidential election has become astronomical.

Mr. CURTIS. What would happen to that cost if we were to switch from the system we have always had, with the House of Representatives standing by to decide a contest, to having a runoff? Would the costs of campaigning in the election of a President increase?

Mr. ERVIN. There is no question that they would be multiplied severalfold, and the good Lord knows that they are too high now.

Mr. CURTIS. Another matter that we hear discussed at election time—and I am sure that anyone in political life is fully aware of it and disturbed by it—is the tremendous burden placed upon a candidate for President. He is expected to visit every State. He must speak out on many issues. He has to travel night and day, at rapid speeds. I think it is true that our present system of campaigning is not only almost cruel and inhuman upon the candidates, but also, conceivably could actually jeopardize their health and thereby jeopardize their ability to perform. What would happen in reference to that problem if it should occur that we would have to have two elections or a runoff?

Mr. ERVIN. I think that it would virtually wreck the health of the most physically perfect human being we could imagine, especially, if as our friends the proponents of Senate Joint Resolution 1 say, this amendment would cause the candidates to campaign with as equal vigor in the small States as they do in the large States. I have some difficulty in accepting that proposition, because I think that when a person goes quail hunting, he goes where the most quail are, if he can find out. I think the candidates would ignore the smaller States, to the advantage of the larger States. I think the burden of campaigning through two presidential election campaigns would be intolerable.

Mr. CURTIS. In that connection, my tabulation indicates that under our present system of counting the votes for President, the State of Alaska has fifty-five one hundredths of 1 percent of the voting power. Should we go to a method of electing the President as described in Senate Joint Resolution 1, based upon the returns of 1968, the State of Alaska would have eleven one-hundredths of 1 percent of the voting.

That is down to one-fifth of what it is.

There is a question in my mind as to whether or not candidates for President would give very much attention to the State of Alaska. After all, it is an extremely important State in the Union. It is important from the standpoint of needed natural resources. It is important from the standpoint of foreign affairs. It is important from the standpoint of national defense.

Would the distinguished Senator from North Carolina agree with me that it is in the public interest and in the interests of all 50 States that a President or a potential President go to Alaska and be acquainted with its problems and its importance in the field of national defense and natural resources?

Mr. ERVIN. I think it is essential, if he is going to perform the duties of his office in an efficient manner.

Mr. CURTIS. I cannot think of a State that has a more strategic place from the standpoint of natural resources, national defense, and foreign affairs. Yet, its voting strength would be cut to 20 percent of what it is now.

Mr. BAYH. Mr. President, will the Senator yield to permit me to propound a question to the distinguished Senator from Nebraska, without losing his right to the floor?

Mr. ERVIN. I yield very reluctantly, because I have a great deal to say on this subject, and I do not know whether I can say it, if those who want to gag me are successful next Tuesday. Nevertheless, I yield to my genial friend the Senator from Indiana to put a question to my good friend the Senator from Nebraska, with the understanding that by so doing I do not lose my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAYH. I appreciate that. I want the record to show that I in no way want to gag the Senator from North Carolina. In fact, I have hardly been able to sleep at night during the last week, ever since the Senator informed us in colloquy the other day that he has a speech to make.

Mr. ERVIN. Mr. President, I am not surprised to learn that my friend the Senator from Indiana has a guilty conscience which troubles his sleeping.

Mr. BAYH. The question I want to propound to the Senator from Nebraska is this: I share his concern for the State of Alaska. There are two matters upon which I thought the Senator might want to elaborate.

Perhaps he might care to offer his judgment as to whether the Senators from Alaska would be in a better position to determine whether the people of that State would be jeopardized by being given the opportunity to vote for their President directly. I bring this matter to the Senator's attention because both Senators from Alaska—the State about which he is so concerned—have suggested that they are prepared to vote on the direct election plan and to support it. It is rather inconsistent that if a State is jeopardized, the Senators who represent the people of Alaska should not be concerned.

Another question: Perhaps the Senator would explain why, if Alaska's importance is of paramount concern to candidates for the Presidency, no presidential candidate since 1960 has gone to Alaska during the campaign, soliciting the support of citizens of Alaska.

Theodore White said, in recounting the 1960 election, that one of the reasons to which he attributes the defeat of the present President in 1960 was that he took time to go to Alaska when he should have been spending that time in Illinois, Ohio, and some of the other States.

Mr. CURTIS. I would be happy to comment.

In regard to the first question, I cannot comment, nor do I think it would be proper for me to say anything that would question the judgment or the motives or the opinion arrived at of any other Senator. So I have no comment as to what the position of the Senators from Alaska or any other State might be.

As to the fact that candidates for President have not visited Alaska, I think that is part of the overall problem that no candidate ever finds enough time to go everywhere he would like. So, in the opinion of the junior Senator from Nebraska, the questions the Senator raises do not go to the merits of the problem at all. The questions the Senator raises do not explain the deficiencies of Senate Joint Resolution 1.

Mr. BAYH. The Senator has been very kind. I do not wish further to interrupt the Senator from North Carolina, but anyone who will read the RECORD can judge whether the questions propounded by the Senator from Indiana to the Senator from Nebraska go to the merits. I appreciate his giving me the courtesy of providing these answers.

Mr. CURTIS. Mr. President, will the Senator from North Carolina yield further?

Mr. ERVIN. Yes, I yield, on the same conditions.

Mr. CURTIS. I thank the Senator from North Carolina.

Mr. President, Senate Joint Resolution 1 proposes, instead of counting the votes by States, that we determine the total of the popular vote as to how they voted for the various candidates. If I read Senate Joint Resolution 1 correctly, and I have followed the comments of its chief sponsor, it also provides that the States shall determine the qualifications of the electors in general. Are those two propositions inconsistent and impractical?

Mr. ERVIN. They are absolutely irreconcilable.

Mr. CURTIS. Would the Senator please elaborate on that?

Mr. ERVIN. If we are going to have a fair system and count all the votes in a precinct that covers 50 States and the District of Columbia, the people who participate in an election in that great big precinct should have the same qualifications for voting; otherwise, the system is inherently unfair, because if we have one State that allows 18- or 17-year-olds to vote, and other States do not, we are putting the latter at a disadvantage. We

are inviting the States to extend qualifications to incompetents, those clearly incompetent to cast votes, in order to increase their power. Aside from being inherently unfair, it is impractical, because it tempts the State to grant the franchise to persons, without regard to whether they are really qualified to vote with wisdom, in order to increase their power.

Mr. CURTIS. Would it not also mean that the courts in a State, in determining contests or other actions to enforce the right to register and vote, would be interpreting the laws differently from many other parts of the Nation?

Mr. ERVIN. Oh, yes; which would certainly add to the confusion.

Mr. CURTIS. Would it be practical in a State, whether it be Indiana, North Carolina, or Nebraska, to provide certain rules in electing a Governor, where each county in the State could determine the qualifications of the voters?

Mr. ERVIN. That would be applying exactly the same system to the counties of a State that Senate Joint Resolution 1 would undertake to apply to the States.

Mr. CURTIS. It would be both unfair and very confusing, would it not?

Mr. ERVIN. Yes.

Mr. CURTIS. Would the provision that a candidate could be declared elected President without having a majority vote be a new departure for the United States?

Mr. ERVIN. Yes, because it has been the constitutional law of the Nation, ever since the time when George Washington was first elected President of the United States, that the President should be a majority President and not a 40-percent President.

Mr. CURTIS. Does the Senator feel that any officeholder, be he President or an officeholder in an office of lesser importance, has disadvantages and problems that he must assume in that office with less than a majority vote?

Mr. ERVIN. Yes. I think in all probability that a 40-percent President would start out at his inauguration with only 40 percent of the support of the people. As he acts in the succeeding weeks and months, his support is likely to decrease rather than increase, so that we would wind up with a 40-percent President having about 20-percent support. That would certainly be a handicap to the functioning of a great country like the United States of America.

Not only would he be at best a 40-percent President but, unfortunately, millions of Americans do not go to the polls, which is unfortunate, but under Senate Joint Resolution 1, a 40-percent President could possibly be elected because of absentees at the polling places by 25 to 35 percent of the vote, so that instead of having a 40-percent President we might have a 25-percent to a 35-percent President.

Mr. CURTIS. We have heard a great deal about the one-man, one-vote. If Senate Joint Resolution 1 should become a part of the Constitution, we could have a situation where 60 percent of the voters were opposed to candidate A, but candidate A could be elected President; is that not correct?

Mr. ERVIN. Oh, yes. That is exactly what is stated in substance in an editorial in the Durham Morning Herald, which I read into the RECORD this morning. This editorial pointed out that what Senate Joint Resolution 1 would do would actually provide for the election of a minority President. In other words, under Senate Joint Resolution 1, we would count 40 percent of the votes and we would throw away the other 60 percent of the votes. That is what we would do.

Mr. CURTIS. I think it is clear that the President and the Vice President are the only two public officials elected by the entire country, so that we have no other government offices to turn to as to how they do it. I should like to ask the distinguished Senator from North Carolina, how do important organizations who operate throughout the entire country, elect their president? Say, for instance, the U.S. Chamber of Commerce, the League of Women Voters, or the AFL–CIO, and so forth.

Mr. ERVIN. I was very much intrigued by the fact that the Senator from Indiana laid great stress on the fact that some official body in the chamber of commerce, some official body of the American Bar Association, some official body of the League of Women Voters, and some official body of the AFL–CIO support the direct election as proposed in Senate Joint Resolution 1. All these organizations, of course, are acting within their rights. They remind me of the doctor who prescribes medicine for his patient but does not take it himself.

The U.S. Chamber of Commerce does not elect its president by a vote of its members. Its president is elected by its board of directors and, strange to say, the board of directors elects members of the board of directors, subject to the limitation that members of the board of directors are eligible for reelection after a specified time and that 10 of the 25 board members elected annually must be elected from 10 designated sections of the country. Hence, the U.S. Chamber of Commerce, in its own method of electing its president, goes as far away from direct election by the vote of its members as it is humanly possible to do.

The same thing is true with respect to each of these other organizations. I have mentioned previously the fact that I happen to be a member of the chamber of commerce in my hometown. No one ever allowed me to vote for any president of the National Chamber of Commerce. Moreover, I have never been polled on how I stand on Senate Joint Resolution 1.

Mr. CURTIS. Mr. President, did the Senator ever vote for a president of the American Bar Association?

Mr. ERVIN. No. I started paying dues to the American Bar Association about the time I was a little boy, long before the chlorophyll went out of my hair. They never asked me for my opinion on any proposition. They never gave me a chance to vote for the president of the American Bar Association.

There are thousands and thousands of lawyers belonging to the American Bar Association and the only ones who get to make recommendations concerning governmental matters are the members of the house of delegates, composed of a small minority of the membership. They undertake to speak for all the members.

Mr. President, I have been receiving a tremendous amount of mail on Senate Joint Resolution 1 from people who tell me they are members of the chamber of commerce and members of the American Bar Association.

Virtually all of them tell me they do not favor it. A small handful of people professing to represent the chamber of commerce and the American Bar Association endorse the measure.

Mr. CURTIS. Mr. President, I think that is very true. The record has not been encumbered by recommendations from those organizations supporting the recommendations of the organizations.

Mr. ERVIN. Mr. President, I am just as wary of the recommendations of an organization which ignores its own members in the conduct of its affairs as I am of a physician who undertakes to write a prescription for others which he is not willing to take himself.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. ERVIN. I am glad to yield to the Senator from Alabama.

Mr. SPARKMAN. Mr. President, I have listened with interest to what the Senator has had to say. I enjoyed his discussion of the runoff proposal. To me, that proposal has seemed absolutely unworkable. Of course, the amendment to which the Senator refers would abolish that, but would provide that in case one of the candidates does not win, the election would go to Congress as a whole. Is that correct?

Mr. ERVIN. Yes.

Mr. SPARKMAN. Instead of to the House of Representatives, as in the past. Thinking back, I am rather horrified at the thought of an election of the President and Vice President having to be decided in either house of Congress, or in the two houses sitting as one body.

Mr. ERVIN. If the Senator will pardon the interruption, he might well be dismayed by that because of the close election between Samuel J. Tilden and Rutherford B. Hayes.

Mr. SPARKMAN. Congress sidestepped that election.

Mr. ERVIN. Congress side-stepped the matter by appointing an electoral commission, and the electoral commission had for consideration many charges of fraud and corruption, especially in the States of Louisiana, Florida, and South Carolina. Finally the decision was made in favor of the Republican candidate, Rutherford B. Hayes, by a strict party vote of the members of the commission, indicating the danger that the Senator apprehends.

Mr. SPARKMAN. That was made in spite of the fact Tilden only lacked one electoral vote, and they had to decide every single electoral vote in the disputed States should have gone to Hayes.

Mr. ERVIN. Without saying anything to detract from the gentlemen who composed that commission, their action gives rise to the suspicion that all of them,

whether they were Republicans or Democrats, were like the billy goat that had already voted, before they were placed on the commission.

Mr. SPARKMAN. I think that is the only instance since the adoption of the 12th amendment. We did have one in the case of Jefferson-Burr. Stories have come down through the years of the trading and maneuvering that was done both in that election and in connection with this electoral commission.

As the Senator pointed out, the very fact that the electoral commission in deciding Hayes-Tilden voted a strictly party vote gives us cause for alarm with reference to second elections in either House of Congress. If we can work out a plan whereby the election will be definitely settled on election day we will all be happier.

Mr. ERVIN. It is just as Professor Bickel indicated in the article I read. We may have to sit before our television sets for weeks and weeks in the event Senate Joint Resolution 1 becomes part of the Constitution to find out who was actually elected President, if we can do it even then.

Mr. SPARKMAN. That is certainly correct. There is another matter that concerns me greatly about this proposal. Our present system—and I am not talking about the system that was established by the 12th amendment, because all that did was to spell out what the Constitution provided—was set up, if my recollection of history is correct, as part of the great compromise between the small States and the large States.

Mr. ERVIN. It has been truly said by well-versed historians that that was the compromise which made the creation of the United States possible.

Mr. SPARKMAN. And it is a compromise which made two Houses of Congress part of our system. A great many persons wanted only one House, the House that was elected frequently by the people. Another group wanted also a Senate. Finally they agreed upon a Senate by giving each State two Senators, and House Members according to the population, with the proviso that every State, regardless of population, would have at least one Representative. Is that correct?

Mr. ERVIN. That is correct.

Mr. SPARKMAN. Then, when the electoral college system was worked out, it provided that each State should have the same number of electors as the combination of House Members and Senators. That gave a little weighted advantage to the small States. In other words, it was something the smaller States were looking forward to in order to give them somewhat of an even break in this union of sovereign States.

Mr. ERVIN. That was the reason smaller States were willing to come into the Union. As a matter of simple justice, no one can seriously object to giving a little extra protection to those who are weak as against those who are strong. The strong do not need protection, they can protect themselves, but the weak cannot.

Mr. SPARKMAN. It was pillared by the agreement worked out by our forebears to distribute that degree of equity. That should be taken into consideration and it should be remembered that this effort completely revokes that agreement. I think we can say it was an agreement worked out by the founders who set up this system of government. Is that correct?

Mr. ERVIN. There is no question about that. It is a matter of absolute truth that Senate Joint Resolution 1 destroys the Federal system of government ordained by the Constitution insofar as the selection of President and Vice President is concerned.

Mr. SPARKMAN. And agreed to by the sovereign States after they had been assured of that protection.

Mr. ERVIN. Yes. In other words, the proponents of this amendment want to establish the same system of election which was established in Germany after the First World War, when they made the President of Germany elective by direct vote, and wound up with Hitler as the Fuhrer and the Second World War as the consequence.

Mr. SPARKMAN. Let me say I have long favored some kind of electoral college reform. When I was in the House I became a supporter of the Lodge-Gossett resolution, as it was known then. I supported it in the Senate. I introduced it at different times. I believe the Senator from North Carolina introduced it in the last Congress.

Mr. ERVIN. Yes. The distinguished Senator from Alabama and the Senator from North Carolina on several occasions have cosponsored an amendment of that character.

Mr. SPARKMAN. Yes. I have always felt that I would be glad to support that kind of reform because it does not change the essential protection of giving the States that which the Constitution originally intended.

The Senator will remember that several years ago our friend from South Dakota (Mr. MUNDT) introduced a proposal whereby the President and Vice President would be elected by district, with two from the State at large. I opposed it at that time. My principal fear was that it would lead to gerrymandering of districts in order to get partisan advantage. But after the Supreme Court's decision on one-man, one-vote, I thought that decision pretty well eliminated that objection to it. I am a cosponsor now with the Senator from North Carolina of the proportional representation within the States. I believe he and I are both on the Mundt resolution also—

Mr. ERVIN. I did not cosponsor the Mundt resolution.

Mr. SPARKMAN. I did.

Mr. ERVIN. However, I would certainly agree with the distinguished Senator from Alabama that there are three methods of reform far preferable to Senate Joint Resolution 1, in that they reach the serious objections to our present system without placing the future of this country in the chaotic condition that Senate Joint Resolution 1 would.

Mr. SPARKMAN. Would it be too strong to say, without tearing up our Constitution?

Mr. ERVIN. That is right, or the mainspring of the Constitution.

Mr. SPARKMAN. I would gladly support either of the other two plans, but I cannot support this plan for the reasons the Senator from North Carolina has stated.

Mr. ERVIN. I agree with the Senator from Alabama.

There are three other plans proposed. One is the one that was so long advocated by our distinguished friend from South Dakota, KARL MUNDT, which is called the district plan. Then there is another one called the Katzenbach plan. The other is the proportional voting plan.

Any one of them would be a substantial reform without involving the chaos which Senate Joint Resolution 1 would invite.

As a matter of fact, I have an amendment, which I shall call up at the proper time, to the Tydings-Griffin amendment. I intend to offer my amendment to amendment No. 711 to Senate Joint Resolution 1. That is the Tydings-Griffin amendment.

My amendment would provide, in lieu of the language proposed to be inserted by amendment No. 711, that the Senate should insert the following:

That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution only if ratified by three-fourths of the legislatures of the several States within seven years from the date of its submission by the Congress:

This is the proposed amendment:

"ARTICLE —

"SECTION 1. The executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice President, chosen for the same term, be elected as provided in this Constitution.

"The office of elector of the President and Vice President, as established by section 1 of article II of this Constitution and the twelfth and twenty-third articles of amendment to this Constitution, is hereby abolished."

That would do away with the possibility of a defaulting or unfaithful elector.

I continue to read from my proposed amendment of the Griffin-Tydings amendment:

The President and Vice President shall be elected by the people of the several States and the district constituting the seat of Government of the United States. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature, except that the legislature of any State may prescribe lesser qualifications with respect to residence therein. The electors in such district shall have such qualifications as the Congress may prescribe. The places and manner of holding such election in each State shall be prescribed by the legislature thereof; but the Congress may at any time by law make or alter such regulations. The place and manner of holding such election in such district shall be prescribed by the Congress. Congress shall determine the time of such election, which shall be the same throughout the United States. Until otherwise determined by the Congress, such election shall be held on the Tuesday next after the first Monday in November of the year preceding the year in which the regular term of the President is to begin. Each State shall be entitled to a number of electoral votes equal to the whole number of Senators and Representatives to which such State may be entitled in the Congress. Such district shall be entitled to a

number of electoral votes equal to the whole number of Senators and Representatives in Congress to which such district would be entitled if it were a State, but in no event more than the least populous State.

"Within forty-five days after such election, or at such time as Congress shall direct, the official custodian of the election returns of each State and such district shall make distinct lists of all persons for whom votes were cast for President and the number of votes for each, and the total vote of the electors of the State or the district for all persons for President, which lists he shall sign and certify and transmit sealed to the seat of the Government of the United States, directed to the President of the Senate. On the 6th day of January following the election, unless the Congress by law appoints a different day not earlier than the 4th day of January and not later than the 10th day of January, the President of the Senate shall, in the presence of the Senate and House of Representatives, open all certificates and the votes shall then be counted. Each person for whom votes were cast for President in each State and such district shall be credited with such proportion of the electoral votes thereof as he received of the total vote of the electors therein for President. In making the computation, fractional numbers less than one one-thousandth shall be disregarded. The person having the greatest number of electoral votes for President shall be President, if such number be a majority of the whole number of electoral votes. If no person has a majority of the whole number of electoral votes, then from the persons having the two greatest numbers of electoral votes for President, the Senate and the House of Representatives sitting in joint session shall choose immediately, by ballot, the President. A majority of the votes of the combined authorized membership of the Senate and the House of Representatives shall be necessary for a choice.

"The Vice President shall be likewise elected, at the same time and in the same manner and subject to the same provisions, as the President, but no person constitutionally ineligible for the office of President shall be eligible to that of Vice President of the United States.

"The Congress may by law provide for the case of the death of any of the persons from whom the Senate and the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of death of any of the persons from whom the Senate and the House of Representatives may choose a Vice President whenever the right of choice shall have devolved upon them. The Congress shall have power to enforce this article by appropriate legislation.

"SEC. 2. This article shall take effect on the 10th day of February next after one year shall have elapsed following its ratification."

This amendment which I have prepared to the Tydings-Griffin amendment—that is, amendment 711—embodies the proportional voting plan. It has many advantages over Senate Joint Resolution 1. It retains the federal system ordained by the Constitution. It keeps the States as viable constitutional entities in the selection of the President and the Vice President. It abolishes the faithless elector by abolishing his office. It provides for a fair distribution of the popular vote. It gives every citizen the right to vote in his own State, directly for President and Vice President. It provides that the candidates for these offices shall receive a proportion of the electoral vote in each State corresponding to their popular vote in the State. It does away with the present method of electing a President in case no one receives a majority of the electoral vote.

I might state, by way of digression, that one advantage about this proposal is that it provides for the election of a majority President—not a 40-percent President but a majority President—and it provides that in the event no candidate for the Presidency receives a majority of all the electoral votes, the Senate and the House of Representatives, sitting in joint session, shall select the President from among the two candidates receiving the highest electoral vote, and that, in making such selection, a majority of the Senators and Representatives in this joint session shall determine the choice.

This would reform every objectionable provision of our present system, preserve the federal system of government, and at the same time keep the Nation from fleeing to the chaos which a direct election of the Presidents, as envisioned by Senate Joint Resolution 1, would produce.

I join the Senator from Alabama in saying that I would prefer this method of electing a President over any other suggestion. However, I could vote with good grace for the so-called Katzenbach plan, or for the so-called district plan, because both of those plans would provide some needed reforms without inviting the chaos which Senate Joint Resolution 1 invites.

Now I wish to call attention to another editorial which appeared in the Durham Morning Herald, of Durham, N.C., on September 16, 1970. I mentioned the fact that this newspaper has an exceedingly wise editor, who has a capacity to analyze and clearly reveal the merits and the demerits of different proposals on various subjects of a governmental nature.

This editorial is entitled "Direct Election Splinter Boon," and reads as follows:

As senators debate the proposed amendment to provide for the direct election of President and vice president, they should consider the impact of such an election upon the political structure of the country.

A major motivation for promoting the direct election amendment at this time is the threat the Wallace third party in 1968 raised for throwing the election into the House of Representatives (together with the action of the Republican elector in North Carolina's Second District in casting his vote, not in accordance with the popular vote plurality in North Carolina for Nixon, but for Wallace).

I digress to note that the great ghost which my good friend the Senator from Indiana sees, and which prompts him to advocate Senate Joint Resolution 1, is the specter of George Wallace. For that reason, I have been so bold as to venture the suggestion that Senate Joint Resolution 1 should be called the George Wallace amendment. I do this because George Wallace inspired this amendment, or at least he is the man who fueled the enthusiasm of my good friend from Indiana for Senate Joint Resolution 1.

I resume reading from the editorial:

The prospect of throwing an election into the House of Representatives is an alluring temptation to third-party hopefuls. But it does not work. Not since 1824 has an election been decided by the House, and then there was only one party, but four aspirants for the presidency. The Electoral College system is really the deterrent to third-party hopes of preventing the election of a major party nominee by the College. For the system is so structured that a third party nominee must win in enough states to prevent either of the other nominees from getting a majority of the electoral vote. And this is extremely difficult to do.

On the other hand, direct election offers greater encouragement to third parties than does the electoral system. Under the proposed amendment, a third party's effort would be directed toward preventing the nominees of other parties from getting 40 per cent of the popular vote. This with only 21 percent of the popular vote, a third party nominee could conceivably force a runoff election (provided the rest of the vote was about evenly split between two others, neither getting 40 per cent). Such a situation would put the third party in a position to bargain with the intent of gaining the objectives of a relatively small minority in turn for delivering its votes to the candidate it might enable to win.

While it is true that only once in the history of presidential elections (since accurate figures for the popular vote are available) has any nominee failed to get as much as 40 per cent of the vote, that one exception shows the circumstances which would make such a situation possible. That was the election of 1860, in a politically badly splintered nation, when Lincoln received 39.8 per cent of the popular vote.

But direct election of Presidents would not merely encourage the development of a third party but also the development of other parties. Ideologically there were four parties in 1968 (as there had been with four candidates 20 years earlier), but only three major candidates, since Senator McCarthy chose not to run after failing to get the Democratic nomination. Had there been no Electoral College, there would have been greater encouragement to him to run on a fourth party ticket.

The outlook, then, in the event the direct election amendment is passed, is the splintering or fragmentation of the political organization of the nation, with all the dangers for immoblizing government, in the event no party commanded a congressional majority or a majority in the popular election of a President, as the experience of France, with its multiplicity of parties, shows.

Not only is the Electoral College a more democratic method of electing a President, as noted in these columns Tuesday, but it is a much more politically stabilizing influence than direct elections would be.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. ERVIN. Yes, I am delighted to yield. The Senator from Indiana asked me to yield first.

Mr. HANSEN. The Senator from Indiana is not present.

Mr. ERVIN. I yield to the Senator from Wyoming.

Mr. HANSEN. Mr. President, I was present in the Senate Chamber when the Senator from North Carolina asked unanimous consent that various committees might be able to meet today. As Senators know, there was objection to that unanimous consent request.

I would like to observe that I attended a hearing of the Subcommittee on Indian Affairs of the Interior and Insular Affairs Committee of the Senate this morning. Present at that hearing were members of Indians from the United States. There is interest in the package of bills

that has been sent up to the Hill by the administration, which calls for important legislative reforms in the manner by which we shall deal with Indian problems.

The point I want to make is that it became my very sad duty to apprise the distinguished chairman of that subcommittee, the Senator from South Dakota (Mr. McGOVERN), that we would not be able to hear numerous witnesses, who have come great distances, at great expense, this afternoon. I think that is most unfortunate. It will impose further financial burdens on them. It will require them to stay over, unless it could be that in an informal way they might be able to make their point to the Senator from South Dakota, though I certainly do not countenance that sort of hearing. I think these people, interested as they are in their problems, deserve better treatment than that. I think they deserve to be heard. I think the hearings should be formal. I think reporters should be present to take down what has been said, questions that might be raised, responses that might be given.

I understand that this whole situation came about despite the objections of the Democratic Policy Committee to the manner in which we are now forced to proceed, with the exception being taken by the Senator from Indiana. I have great respect for him. I am not trying to criticize him, but I do think the Senate should be aware of what can happen when one person, despite the recommendations of his colleagues, decides that he will force the Senate to dispense with all other business. He ought to know that it can result in considerable inconvenience and considerable expense being visited upon people who have come a long way. I am told that representatives of various tribes were there from Alaska.

It certainly causes me great anguish that we would be forced, as was the distinguished Senator from South Dakota, to apprise those present that no more formal hearings could be continued this afternoon.

I thank my distinguished colleague from North Carolina.

Mr. ERVIN. I thank the distinguished Senator from Wyoming. Those associated with me have been criticized on the floor of the Senate by some because we exercised the right, under the Senate rules, to insist that we be given an adequate opportunity to point out the inequities in Senate Joint Resolution 1. We have that right under the Senate rules.

I will have to say, just by way of explanation of the action of the distinguished Senator from Indiana, he has the right to assume the exercise of powers which ordinarily belong to the majority leader of the Senate as to whether committees shall meet or how legislation shall flow in the Senate.

I am somewhat at a loss to understand why we should be criticized for exercising our rights under the rules, and why he should be extolled for exercising his rights under the rules.

If we abuse our rights, there is a remedy which can be applied by the Senate. That is, a two-thirds majority can silence us, can gag us. And there is a remedy for the action of the Senator from Indiana. The majority leader could move to lay aside Senate Joint Resolution 1 and, by a majority vote, that resolution could be laid aside, and then the Senate could go on with its other affairs.

I think every Senator is entitled to exercise any of his rights under the Senate rules. As one who loves his country and venerates the Constitution, I insist that those of us who are opposed to throwing on to the scrapheap of history a method of selecting our President which has worked well for 181 years, and given us some great presidential leaders, have a right to speak our piece. I believe we have a duty to our country to do it.

I do not believe such a drastic change in the Constitution should be made possible by a Congress of the United States in a harried and hurried atmosphere such as necessarily prevails in Congress at this time.

Mr. BYRD of West Virginia. Mr. President, what I am about to say, I say assuring the able Senator from North Carolina that I do not misunderstand his remarks, and that I am fully aware that he meant no criticism of the majority leader in what he has just said.

Mr. ERVIN. Oh, no.

Mr. BYRD of West Virginia. But I think it ought to be stated for the RECORD, in the absence of the majority leader, that he did give his word to Senators, following the vote on the motion to invoke cloture a few days ago, that there would be opportunity for further debate, and that after a period of time, there would be a second cloture motion introduced by him.

Having given his word—and he is a man of his word, and is so recognized by all Senators—the majority leader, I am sure, felt that it would not be incumbent upon him to move to table Senate Joint Resolution 1 until such time as a second cloture motion had been introduced and, under rule XXII, had run its course and been voted down, if that is the verdict of the Senate.

What he will do following the verdict of next Tuesday awaits to be seen. But I do feel that it ought to be said that the majority leader, being a man of his word, and having indicated that he would not move at this time to table Senate Joint Resolution 1, proceeded as he has done.

Mr. ERVIN. Mr. President, if the Senator will pardon me, I did not mean to suggest that the majority leader should move to table Senate Joint Resolution 1. What I was trying to say was that as Senators who believe in unlimited debate as the only method by which serious issues can be illuminated, we are insisting on our rights under the Senate rules. My distinguished friend from Indiana and I are both exercising privileges under the rules of the Senate. I did not say this in the spirit of criticism; I was striving to point out this fact.

The rules of the Senate secure to any Senator the right to speak until two-thirds of the Senators think he has abused the right. Then he can be silenced or gagged. That right is the remedy for the abuse of that right. I was suggesting also that there is a remedy available to the majority leader if any individual Senator assumes the power to exercise, in effect, the powers of the leadership, by objecting to committee meetings and the consideration of particular bills; I certainly did not mean to make any suggestion to the majority leader as to what he should do in the exercise of his authority. That is a matter for him, not me. I have the deepest affection and the most profound admiration for the majority leader, and certainly did not intend any criticism of him in saying these things.

Mr. BYRD of West Virginia. Mr. President, I am aware of that. I am sure of it. I understood the distinguished Senator very clearly, and I understood the spirit in which he made his statement. He would be the last to speak critically of the leader. But I thought that, in protection of the Senator himself as well as the majority leader, I should say what I have said.

Mr. ERVIN. I appreciate that, because I would not want my remarks to be misconstrued by anyone, and the Senator from West Virginia, I think has made certain that they will not be misunderstood or misconstrued.

Mr. BYRD of West Virginia. That has been my intention.

(This marks the end of the colloquy which occurred during the delivery of the address by Senator ERVIN and which by unanimous consent was ordered to be printed in the RECORD at the conclusion of the address.)

## THE VISIT OF VICE PRESIDENT KY

Mr. THURMOND. Mr. President, there has been an extraordinary amount of debate over the question of whether the Vice President of our ally, South Vietnam, should be made welcome when he comes to this country to speak before the March for Victory.

I do not understand why there should be any hesitancy or doubt over his presence in this country. This is not the leader of the Communist nation coming in false colors of peace nor is he a neutralist who refuses to do anything which advances the cause of peace and freedom.

I notice that Vice President AGNEW has said:

> I have steadfastly refused to take any active part in dissuading him. I think to some extent it is an unofficial visit and what he accomplishes or does not accomplish is being grossly overplayed. We do have free speech in this country and I think it would be improper to forbid or repress his appearance.

I commend Vice President AGNEW for his courage in taking this stand even though he indicates he may not agree with Vice President Ky. I certainly will not take any part either in dissuading Vice President Ky's visit.

He is the second ranking elected official of a country which is fighting gallantly for the freedom of the West.

Can it be possible that our values are so inverted and our sense of moral decency so devastated that the very word "victory" is treated in some quarters as

an obscenity? Have we sunk so low that it is impossible for rational discourse to consider the possibility of winning against an enemy?

I would like to make my own position clear. I have always believed that a rapid military victory was the way to avoid escalation and to avoid the needless slaughter of thousands of Americans and South Vietnamese. A quick military victory would have been the humane way to avoid unnecessary killing and suffering on the part of the civilian population. For reasons known only to the civilians who proposed new doctrines on conducting the war, the Johnson administration chose to adopt a no-win policy until the events reached a point of no return. President Nixon promised to end the Vietnam war in an honorable manner and adopted the policy of Vietnamization. For the first time we trusted our allies to have the tools of war and to bear the responsibility for it. The results have been unqualified success. Much of this success must be attributed to the quality of leadership and courage of the Vice President of the Republic of Vietnam.

I do not pretend that I am in agreement with all of Mr. Ky's political philosophies or his past statements, or that I will necessarily agree with what he has to say to the American people. But we have never made total agreement a prerequisite for listening to the voice of foreign leaders. Even now, President Nixon is planning a trip to speak with Tito of Yugoslavia, a Communist responsible for many brutal murders and for the extinction of freedom in his country. I am sure that the President feels that his visit is not necessarily an endorsement of communism in Yugoslavia. Why should we feel, therefore, that a man who represents freedom in Southeast Asia will have anything to say in our country that is against the broad interest of the West? Vice President Ky may indeed bring criticism, but criticism has never been lacking on all sides of this question.

Mr. President, two distinguished columnists and observers of the American scene have written on this matter pointing out the strange contradictions of those who are opposed to Vice President Ky's speech in Washington. The first of these is David Lawrence, writing in the Washington Evening Star on September 22, in which he says that Ky is entitled to address the rally.

Mr. President, I ask unanimous consent to have this column be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. THURMOND. Another outstanding columnist is Maj. General Thomas A. Lane, former Commissioner for the District of Columbia. General Lane asks:

> Wouldn't you suppose that one of the leaders of a gallant ally fighting side by side with us in Vietnam would receive a warm welcome in Washington?

He points out that the political left has promoted a guilt complex about our actions. I do not believe that we should surrender to the mythology of the left.

Mr. President, I ask unanimous consent to have General Lane's column of September 29 be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

EXHIBIT 1

KY ENTITLED TO ADDRESS RALLY

(By David Lawrence)

President Thieu of South Vietnam has given his righthand man—Vice President Nguyen Cao Ky—permission to visit the United States and speak at a "private" rally to be held on the Monument Grounds south of the White House on Oct. 3.

Some senators who happen to be supporters of President Nixon's policies in Vietnam have been worried about the plan of Ky to make a speech at the "March for Victory" demonstration in Washington because it might stir up ill feelings. The Rev. Carl McIntire, a minister who has been delivering broadcasts over many radio stations for the last seven years, made a trip to Saigon to invite Ky and has been enthusiastic about the idea. He thinks it would be a good thing for the American people to hear from the South Vietnamese leader. Mr. McIntire headed a march in Washington last April and is helping to organize the rally on Oct. 3. He says:

"Vice President Ky will be another Agnew. Possibly he will out-Agnew Agnew."

But the real question is why there are such undercurrents of apprehension and a lot of misgivings hereabouts concerning Ky's visit. In a nation which is dedicated to the principles of free speech, it should be possible for leaders from foreign nations to come here and express themselves to the American people without difficulty.

In the last two years many Americans, in and out of Congress, have criticized the Saigon government and accused it of corruption and other errors. Presumably the South Vietnamese are entitled to give their rebuttal. Perhaps they will not get "equal time," because a good deal of the adverse comment has consumed hours on television. The Congressional Record contains pages of criticism and innuendo about the South Vietnamese from critics in Congress.

Pressure, of course, has been exerted in the last few days to try to persuade Ky to give up his trip on the theory that it might embarrass the administration and Congress. No officials here concede that any such action has been taken, but several senators have openly urged that Ky remain home to avoid trouble.

There have been a great number of anti-war demonstrations around the country, including Washington, in the last two years, and the McIntire idea is to hold a "March for Victory" rally in the national capital. Presumably the presence of the vice president of the South Vietnamese government will add publicly to the occasion. Arrangements have been made also for Ky to appear before the House Armed Services Committee on an informal basis.

What has given rise to apprehension is not what Ky might say, but the possibility that anti-war activists might carry on a competing demonstration and that a riot might result which would be embarrassing. But certainly an official of any country is entitled to come to the United States and speak to the American people at any time, especially when there are controversies going on and prominent members of Congress are uttering criticisms about other governments without a corresponding opportunity for spokesmen from a foreign land to be present to give their side of the argument.

Ky speaks excellent English and is looked upon as a likely candidate for the presidency of his country in the election next year. So the trip to America may indeed have some bearing on a desire to build up his political prestige for the future. His purpose also is to help assure the American people that South Vietnam is not going to crumble and give in to the Communists but instead will make every effort to carry on the fight against the Hanoi government. He will have an opportunity to explain the effectiveness of the "Vietnamization" program and his conviction that, with the withdrawal of American troops, the South Vietnamese will be able to protect themselves against the aggressors from the north and from internal enemies.

Ky is the personal representative of President Thieu at the peace talks in Paris and is planning to stop there on his way to the United States. He is expected to arrive in Washington on October 1 and address the rally on Saturday, Oct. 3.

---

EXHIBIT 2

KY VISIT EVOKES SCHIZOID RESPONSE

The sick condition of the American psyche is illustrated in the reaction of public figures to the visit of Vice President Nguyen Cao Ky of the Republic of Vietnam. Mr. Ky has accepted an invitation to address a Washington Rally for Victory in Vietnam on October 3rd. U.S. Senators of both political parties have suggested that Vice President Ky should stay home.

Wouldn't you suppose that one of the leaders of a gallant ally fighting side by side with us in Vietnam would receive a warm welcome in Washington? What kind of an alliance is this? What would the American people have thought if Senators of South Vietnam had told Vice President Agnew to stay home before his recent visit to Saigon? The people of Vietnam have always given our leaders a generous welcome. That is expected of allies.

Let it be clear whom Vice President Ky represents. The people of South Vietnam are fighting for survival against the aggression of world communism. Before President Nixon took office, we and they were each suffering about 200 killed in battle weekly. Now we are withdrawing and they are taking the brunt of the battle. Our killed in action has dropped to about 70 weekly; theirs has increased to about 340 weekly. President Nixon has not reduced the scale of warfare one bit; he has simply transferred the load to our small ally.

Because South Vietnam has one-twelfth our population, its casualty rate is about sixty times as great as ours. It is as though the United States were having 4000 killed in action each week. South Vietnamese leaders know that they must win the war to put an end to the killing. Negotiation is a snare and a delusion.

American performance in Vietnam is a story of brave fighting men sacrificed by tragically inept political leadership. The Republic of Vietnam has had better leadership. Vietnamese leaders from President Diem to President Thieu have all wanted to carry the war to the enemy; they have submitted to a war of attrition only under U.S. political compulsion.

Our political Left has promoted a guilt complex about our bombing of the enemy; but no element of our political spectrum has told the people about the tragic sacrifices which American restraint has imposed on the people of South Vietnam. If the truth were grasped, our people would have a better sense of the great obligation of restitution which we owe to our injured ally. American policy has injured us too; but that injury is self-inflicted. Our ally has accepted but has never approved the policy.

Vice President Ky is a particular hero of the Vietnamese people. In 1967, after

American policy had virtually paralysed the government of South Vietnam, Air Vice Marshal Ky accepted the office of Premier, quelled the subversive activities of rioting factions and restored order in the country. He guided the country through the adoption of a new Constitution and the election of a new government. Then, working with President Thieu in the new government, he has contributed to the growing strength and unity of his people. By every rule of courtesy and decency, our government should welcome Vice President Ky with generous tributes to his leadership.

It is obvious that the United States is in precipitate retreat; but are we also determined to keep our ally from winning? President Thieu and the people of South Vietnam have not forsaken the goal of victory. Are we going to support them or are we going to oppose them? Which side of this war are we on?

The attitude of our Senators lends credibility to the communist boast that they will defeat the United Sates as they defeated France in 1954—through control of public information on the home front. Their response to this visit of a truly great allied leader bespeaks a meanness of spirit which ill becomes America. We the people are called to repudiate our leaders and give Vice President Ky a hero's welcome.

## THE NATION'S COAL SUPPLY AND THE COAL CAR SHORTAGE

Mr. COOPER. Mr. President, on August 25, I introduced Senate Resolution 457, cosponsored by Senators RANDOLPH, BAKER, BYRD of West Virginia, BYRD of Virginia, COOK, JORDAN, SPONG, SPARKMAN, SCOTT, THURMOND, GRIFFIN, MAGNUSON, GORE, and SCHWEIKER, authorizing the Committee on Interior and Insular Affairs to conduct a study and investigation concerning the present shortage of coal in the United States. One of the causes for our Nation's coal shortage—a cause specified in the resolution and one which the committee is directed to investigate—is the lack of an adequate and available number of coal cars for loading and transporting coal.

Kentucky ranks second in coal production in the United States—with major fields in eastern and western Kentucky. The shortage of coal cars in eastern Kentucky—the largest producing area—has been acute during the past year and is a substantial contributing factor to the Nation's coal shortage. The car shortage has been accelerated by an increased demand of foreign purchasers of coal for export. As a result, a substantial number of coal cars have been standing idle at eastern parts awaiting loading on freighters. I am informed that a practice has developed on the part of some shippers of shipping coal to eastern ports in the Hampton Roads-Norfolk and Lambert's Point, Va., area without firm contracts for export, but on speculation of negotiating "spot" sales with foreign buyers. Coal cars carrying coal for these "spot" sales remain idle at the ports awaiting buyers during the period of negotiation, and also during the period subsequent when arrangements must be made to obtain vessels for shipment of the coal abroad.

On August 28, 1970, the Norfolk & Western and the Chesapeake & Ohio Railroads, the country's major coal carriers, announced that they would embargo coal cars moving coal to U.S. ports for export unless the shipper had received a permit to ship specified amounts of coal to these ports. I am informed that under this plan a shipper, in order to obtain a permit for the use of coal cars, must demonstrate that he has a firm contract for the sale of his coal to a foreign purchaser, and that he has engaged a vessel which is en route to the port to load the coal.

Upon being informed of the announcement by the Norfolk & Western and Chesapeake & Ohio Railroads on August 28, I wired the Louisville & Nashville Railroad, the chief coal carrier in eastern Kentucky, to consider adopting a similar program in shipments of coal to Lambert's Point, Va., for export. I was pleased to receive a reply by Mr. Philip Lanier, vice president and counsel of the L. & N., that the L. & N. would institute a similar "permit" system to Lambert's Point, in connecting with the Norfolk & Western.

I am pleased to note that in his letter dated August 31, Mr. Lanier states that the L. & N. has been urging since early in 1970 such a cooperative effort by coal carriers.

After the inauguration of this program by the L. & N. and its connecting carrier, the N. & W., at Lambert's Point, I requested the staff of the Interstate Commerce Commission to furnish me with a report on the results.

I am informed that this "permit" system will provide an estimated 2,000 additional coal cars on a weekly basis to the N. & W. and L. & N. combined and, of this total amount, some 400 cars will be additional cars for loading by the L. & N.

I have received a report from officials of the L. & N. confirming the above results. In the month of August, the L. & N. sent 2,288 coal cars to Lambert's Point. From September 1 to September 23, the L. & N. has sent a substantially reduced number—376—to Lambert's Point. The present estimate is that the L. & N. will probably send about 500 cars to Lambert's Point for the month of September, some 1,700 cars less than the month of August, resulting in approximately 400 additional L. & N. cars on a weekly basis that will be made available for loading in eastern Kentucky by the adoption of this "permit" system.

I have also contacted officials of the Chesapeake & Ohio and the Norfolk & Western Railways asking if they would be willing to supply me with information concerning the results of their programs inaugurating the "permit" system to eastern ports, inasmuch as these results affect not only Kentucky coal operations but also the coal operations in the neighboring States of Virginia, West Virginia, and Tennessee.

While I have addressed myself primarily to the car situation in eastern Kentucky in connection with my correspondence with the Louisville & Nashville Railway, I intend—and I know that all of the cosponsors of Senate Resolution 547 intend—that every effort shall be directed to securing increased shipments of coal for domestic use so as to meet the needs of our utilities and general consumers. The proposed investigation into the causes of the shortages in the production and distribution of coal is a complex matter, and it seems to me that the speediest improvement that could be made to reduce the shortage is in the area of making more coal cars available for loading coal.

The shortage of rail cars is not a new problem—it has been a persistent one since World War II—so severe at times that it has been necessary for Presidents to appoint an official in the executive department to expedite and allocate the existing supply of rail cars on a priority basis to meet the Nation's defense needs including the allocation of coal cars. This procedure may be required again. I am pleased to note that the Louisville & Nashville has adopted its present program and I hope and expect that I can report similar progress from other major coal carriers.

Mr. President, I ask unanimous consent that the article appearing in the Wall Street Journal of August 28, reporting the inauguration of the permit system by the C. & O. and N. & W., together with correspondence I have had with the L. & N. in this matter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Aug. 28, 1970]

N. & W. AND C. & O. LIMIT RAIL CARS AVAILABLE FOR MOVING COAL TO U.S. PORTS FOR EXPORT

NEW YORK.—Two railroad systems said that, effective Monday, they will restrict the number of rail cars they make available for movement of coal to U.S. ports for export.

The Norfolk & Western and the Chesapeake & Ohio railways and the Baltimore & Ohio Railroad, which is over 90%-controlled by the C&O, said they would require "permits" for the hopper cars that move coal to the piers.

An "acute shortage" of rail coal cars has developed within the past two weeks, according to an official of Pittston Co., a leading coal producer. He said this has resulted from a combination of factors. Coal mines had their annual vacations in July, and many bulk ocean vessels, taking advantage of the currently high charter rates to move oil, have temporarily left the coal movement trade.

This has meant that many coal cars have been held up in port areas awaiting ships, he said. Further, many coal cars have been stalled at mine areas because of continued wildcat strikes in Kentucky, West Virginia, Virginia and Ohio. The Pittston official believes, however, that the coal car problem could be over in about three weeks.

There are also trade source reports that the Nixon Administration has been privately warning the railroads that it may have to embargo export coal to assure enough cars to move the coal to domestic utility plants, which are reporting low coal reserves for their generating needs.

The N&W-C&O plan would involve issuing permits for coal cars only when the arrival of coal trains at Newport News and Norfolk, Va., export piers coincided with the arrival of ocean vessels there. This will free more coal cars for movement of coal to domestic utilities and steel plants, the railroads said.

John P. Fishwick, N&W's president, said that after his road determines the number of coal cars already at Norfolk awaiting ships and the number of cars in en route to Norfolk, the N&W will "permit" the number of cars that exporters can ship. Gregory S. DeVine, president of the C&O, said that road will employ a like system.

Many millions of tons of coal are exported via the Hampton Roads-Norfolk piers annually, and this is a major revenue source for the nation's two leading coal carriers—the N&W and the C&O. Pittston Co.'s spokesman says that about 30% to 40% of its annual production goes abroad.

Currently, the N&W is dumping coal onto ships in Norfolk at the rate of about 1,200 carloads daily. This requires a "bank" of between 16,000 and 18,000 coal cars in the immediate port area to feed the coal unloading system. Even if the schedules of dumping were ideally smooth, an N&W spokesman said, the road would need 14,000 coal cars in the port area. The N&W has 68,000 coal cars.

The C&O and B&O together own about 76,000 coal hopper cars, and they're currently building an additional 3,600.

One major coal company said it doesn't expect the permit system to affect the concern because most of its export coal to Japanese and European steel manufacturers is sold on a long-contract basis. Thus, this company doesn't anticipate any trouble getting permits, since it can order a specific number of cars, dovetailed with ship arrivals. But it contends that dealers in "spot" coal exports on a more speculative basis could be affected.

Railroads last previously used the permit system in 1955, when a spate of adverse weather disrupted ocean vessel schedules. But they kept the system for about 2½ years when they found it afforded them more effective use of their coal car fleet without the need of building more cars at that time, an industry source says.

Permits were also used during World War I, when there was a shortage of both cars and coal.

Power companies have recently been complaining about the dwindling supply of steam coal they need to generate electricity. Yesterday Duke Power Co., Charlotte, N.C., said it had acquired two coal mines in Kentucky and agreed to the joint financing of an unidentified third mine in an effort to guarantee coal supplies. Price wasn't disclosed.

---

AUGUST 28, 1970.

Mr. WILLIAM H. KENDALL,
*President, Louisville & Nashville Railroad, Louisville, Ky.:*

I receive complaints almost daily from small coal operators in eastern Kentucky concerning the serious shortage of coal cars. I further understand that many coal cars of the L&N are tied up at Lambert's Point, Virginia, awaiting trans-shipment of coal for export.

I note the Norfolk and Western and the Chesapeake and Ohio railroads announced today that they were limiting coal cars available for moving coal to U.S. ports for export. In view of the serious shortage of cars in eastern Kentucky, could not the L&N adopt a similar program for limiting coal cars available for moving coal to Lambert's Point? I would appreciate very much your immediate consideration of this matter.

JOHN SHERMAN COOPER,
*U.S. Senator.*

---

LOUISVILLE & NASHVILLE RAILROAD CO.,
*Louisville, Ky., August 31, 1970.*

Hon. JOHN SHERMAN COOPER,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR COOPER: Mr. Kendall is absent at the present time and I am replying, for him, to your telegram of August 28 in which you comment upon the action of the Norfolk & Western and of the Chesapeake & Ohio Railroads in limiting coal cars available for moving coal to U.S. ports for export. You inquire if L&N cannot adopt a similar program for limiting coal cars available for moving coal to Lamberts Point, Virginia.

The program placed into effect by the Norfolk & Western has the very practical effect of doing precisely what you request L&N to do. L&N has received telegraphic notice from Norfolk & Western of its actions and, as a result, L&N will only deliver to Norfolk & Western cars from L&N coal fields which can move to Lamberts Point, be dumped and returned with the expedition which Norfolk & Western intends to accomplish through the inauguration of the permit system.

Because Mr. Kendall and I both know of the great interest which you have in this hopper car situation, I would like to expand this letter to give you some history of L&N's actions in this particular matter of export coal.

Being much concerned earlier this year about the great delays which were being experienced in the turnaround of L&N hopper cars moving from Eastern Kentucky to Lamberts Point on the N&W and to Newport News on the C&O, L&N explored—in January and February—the possibility of instituting a permit system such as the N&W and the C&O have now announced. This system would have applied to movements to Lamberts Point and Newport News. We did not institute the permit system at that time because Norfolk & Western would not agree to it.

We did, therefore, announce, effective April 1, 1970, cancellation of Eastern Kentucky rates on coal to Lamberts Point and Newport News. The cancellation as to the Newport News rates went into effect and no coal has moved from Eastern Kentucky mines on L&N to Newport News since that time. As to the cancellation of rates via L&N to Lamberts Point, protests were entered by Norfolk & Western, Blue Diamond Coal Company, Forreston Coal Company (of New York), which buys from small coal operators as well as large, Maryland Coal & Coke Company, which buys from small operators, Pathfork Harlan Coal Company, a small operator, and Coal Exporters Association of the United States. These firms filed with the Interstate Commerce Commission petitions for suspension of our cancellation of rates and because of the opposition, L&N withdrew its cancellation notice. As a practical matter, the cancellation would not have become effective in view of the opposition of the connecting line, *i.e.*, the Norfolk & Western.

We are, as you will understand from the foregoing, very pleased at the action of Norfolk & Western in now imposing a permit system.

Very truly yours,

PHILIP M. LANIER.

Mr. COOPER. Mr. President, in conclusion, I note that the Interstate Commerce Commission, on June 16, 1970, issued Service Order 1043, effective June 21, 1970, under its emergency powers. Basically, the order requires that all coal cars owned by the Louisville & Nashville, the Chesapeake & Ohio, Norfolk & Western, and other coal carriers, when made empty at an off-line point be immediately returned empty, without intervening loading, to the owning railroad. This order has been helpful to the above carriers in expediting the return of cars. The conditions set forth in the preamble of Service Order 1043 are as critical today as they were on June 16, when the order was adopted. The preamble states:

*It appearing,* That an acute shortage of hopper cars exists in certain sections of the country; that shippers are being deprived of hopper cars required for loading coal, resulting in an emergency, forcing curtailment of their operations, and thus creating great economic loss and reduced employment of their personnel; that coal stockpiles of several utility companies are being depleted; that hopper cars, after being unloaded, are being appropriated and being retained in services for which they have not been designated by the car owners; that present regulations and practices with respect to the use, supply, control, movement, distribution, exchange, interchange, and return of hopper cars are ineffective. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

Service Order 1043 is scheduled to expire next week on September 30.

Mr. President, because of the continuing serious car shortage in eastern Kentucky, Virginia, West Virginia, and Tennessee, I have urged the Commission to give further consideration in continuing Service Order 1043 in effect without modification or other conditions which would tend to reduce its effectiveness. I am pleased to report that I have just been informed that the Commission today has directed that Service Order 1043 continue in effect without modification to December 31.

Mr. President, I ask unanimous consent to have a copy of Service Order 1043 printed in the RECORD.

There being no objection, Service Order 1043 was ordered to be printed in the RECORD, as follows:

SERVICE ORDER NO. 1043.—REGULATIONS FOR RETURN OF HOPPER CARS

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 16th day of June, 1970.

*It appearing,* That an acute shortage of hopper cars exists in certain sections of the country; that shippers are being deprived of hopper cars required for loading coal, resulting in an emergency, forcing curtailment of their operations, and thus creating great economic loss and reduced employment of their personnel; that coal stock piles of several utility companies are being depleted; that hopper cars, after being unloaded, are being appropriated and being retained in services for which they have not been designated by the car owners; that present regulations and practices with respect to the use, supply, control, movement, distribution, exchange, interchange, and return of hopper cars are ineffective. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

*It is ordered,* That:

§ 1033.1043 REGULATIONS FOR RETURN OF HOPPER CARS

(a) Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:

(1) Exclude from all loading hopper cars owned by The Baltimore and Ohio Railroad Company, The Chesapeake and Ohio Railway Company, the Louisville and Nashville Railroad Company, the Norfolk and Western Railway Company, and the Penn Central Transportation Company and return empty to the owning line, either direct or via the reverse of the service route.

(2) Carriers named in paragraph (1) above are prohibited from loading all hopper cars foreign to their lines and must return such

cars to the owner, either direct or via the reverse of the service route.

(b) For the purpose of improving car utilization and the efficiency of railroad operations, or alleviating inequities or hardships, modifications may be authorized by the Chief Transportation Officer of the car owner. Such modifications must be confirmed in writing to W. H. Van Slyke, Chairman, Car Service Division, Association of American Railroads, Washington, D.C., for submission to R. D. Pfahler, Director, Bureau of Operations, Interstate Commerce Commission.

(c) No common carrier by railroad subject to the Interstate Commerce Act shall accept any hopper car offered for movement loaded contrary to the provisions of paragraphs (a) and (b) of this order.

(d) The term "hopper cars," as used in this order, means freight cars having a mechanical designation "HD", "HM", "HK" or "HT" in the Official Railway Equipment Register, I.C.C. R.E.R. No. 375, issued by E. J. McFarland, or reissues thereof.

(e) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(f) *Effective date.* This order shall become effective at 12:01 a.m., June 21, 1970.

(g) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., September 30, 1970, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15 and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15 and 17(2). Interprets or applies Secs. 1(10–17), 15(4) and 17(2), 40 Stat. 101, as amended 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4) and 17(2)).

*It is further ordered,* That a copy of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

H. NEIL GARSON,
*Secretary.*

## ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS ON MONDAY NEXT

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that, on Monday next, immediately following the prayer and disposition of the Journal, and any unobjected-to items on the calendar, there be a period for the transaction of routine morning business, with statements therein limited to 3 minutes.

The PRESIDING OFFICER (Mr. COOK). Without objection, it is so ordered.

## ELECTORAL REFORM

Mr. BAYH. Mr. President, the Senator from Indiana would like to make a brief observation, if he may, at the risk of prolonging the session of the Senate today. I do so only because as debate has proceeded here, the Senator from Indiana has been the target of several observations by his colleagues. And they were fully within their right to make these observations. But here we are at 4 p.m., with the cloture motion having been laid before the Senate today and the vote to be taken 1 hour after we come in on the second day, which means that we have only 1 full day.

Inasmuch as the Senator from Indiana has been criticized on the one hand for causing the Senate to sit here and debate this matter, and criticized on the other hand for permitting other business to be laid down, thus denying us the opportunity for debate, I would suggest, as I have before, that it is my judgment that the proponents of vitally necessary electoral reform have made their case.

With all due respect to my colleagues I would suggest that if there is to be further attention drawn to the fact that insufficient time has not been available for debate, perhaps now would be a good time, at 4 p.m., with the afternoon still young, for this kind of discussion to continue.

The PRESIDING OFFICER. What is the pleasure of the Senate?

Mr. HARRIS. Mr. President, could I say, briefly, that I commend the distinguished Senator from Indiana for trying to get to a vote on this basic question in regard to the American political system.

If one studies the political history of the United States, he will find that the general trend has been toward greater popular control of government by the people themselves. It has been a good trend.

In my own State of Oklahoma, the first two Senators ever elected to the Senate were Robert L. Owen and Thomas P. Gore. Senator Thomas P. Gore was blind. He came from my hometown of Lawton.

At the time of statehood for Oklahoma, in the election of 1907, Senator Gore actually ran third, but a gentlemen's agreement has been reached at the Constitutional Convention, that there would be one Senator to represent the first two Senators ever elected by Oklahoma from eastern Oklahoma and the other from western Oklahoma. Therefore, despite the fact that Senator Gore ran third in the preferential primary, he was chosen as one of the two Senators, since he was the only one of the three top men who came from western Oklahoma.

The reason he could be elected the way he was elected, although he ran third in the preferential primary, was that the people themselves directly did not elect Senators. Senators were elected by State legislatures. The State Legislature of Oklahoma thereafter abided by the gentleman's agreement which had been made at the Constitutional Convention. They discarded the poor fellow who ran second, whose name I cannot recall as of now, and sent Robert Owen and Thomas Gore, the men who ran first and third, to the Senate.

Well, I have listened here for the past few days about how, if we allow the people's will to govern, it will destroy the parties, and that all sorts of other bad things will then ensue.

Mr. President, from my own knowledge of the history of my State, I can say that while those same arguments were entered in Oklahoma against the popular election of Senators, it has not proved to be a well-founded fear.

I can say, as a former national chairman of one of the two principal political parties in this country, I do not fear that the political system in America is so weak that to allow the people to express their will will destroy it. I would say, if that will destroy it, then perhaps it is destroyed already. Thus, I think that if we are going to err, we should err on the side of the people, as we did many years ago in Oklahoma, and as we did many years ago in many States, in the Union, by allowing the people the right to vote and to have their wishes directly—not indirectly through all sorts of devious mechanisms, but directly have their wishes effect the Government and the decisions which it makes.

Accordingly, I am greatly pleased to stand with the distinguished Senator from Indiana, the distinguished Senator from Tennessee (Mr. BAKER), and others, for getting up to vote this matter of direct election of the President and Vice President of the United States.

I think that the distinguished Senator from Indiana need make no apology—of course he need not—for availing himself of the rules of the Senate. He is doing nothing other than what every one should do; namely, require those who would stretch to the last measure the rules of this body, in order to prevent the will of this body from being effected to stand up and take whatever time it requires to read the calendar of business, or whatever is done to take up Senators' time to prevent a vote, and requiring them to do that.

I do not fault the Senator from Indiana for that. I honor him for it, and I believe that the country will honor him for it as well.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADJOURNMENT TO NOON MONDAY, SEPTEMBER 28, 1970

Mr. BYRD of West Virginia. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 12 o'clock noon on Monday next.

The motion was agreed to; and (at 4 o'clock and 13 minutes p.m.) the Senate adjourned until Monday, September 28, 1970, at 12 noon.

## NOMINATIONS

Executive nominations received by the Senate September 25, 1970:

U. S. DISTRICT COURT

Daniel H. Huyett, III, of Pennsylvania, to be a U.S. district judge for the eastern district of Pennsylvania, vice a new position created under Public Law 91–272 approved June 2, 1970.

## CONFIRMATIONS

Executive nominations confirmed by the Senate September 25, 1970:

U.S. ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by

the President under subsection (a) of section 3066, in grade as follows:

*To be lieutenant general*

Maj. Gen. John Norton, [redacted], U.S. Army.

U.S. NAVY

Adm. Ephraim P. Holmes, U.S. Navy, for appointment to the grade of admiral on the retired list, pursuant to the provisions of title 10, United States Code, section 5233.

Vice Adm. Charles K. Duncan, U.S. Navy, having been designated for commands and other duties determined by the President to be within the contemplation of title 10, United States Code, section 5231, for appointment to the grade of admiral while so serving.

IN THE NAVY

The nominations beginning Richard C. Adams, to be captain, and ending Tanya Zatzariny, to be lieutenant commander, which nominations were received by the Senate and appeared in the Congressional Record on Sept. 14, 1970;

The nominations beginning Carl A. Armstrong, Jr., to be lieutenant, and ending Richard D. Webb, to be lieutenant, which nominations were received by the Senate and appeared in the Congressional Record on Sept. 14, 1970; and

The nominations beginning Herman C. Abelein, to be captain, and ending Muriel J. Lewis, to be captain, which nominations were received by the Senate and appeared in the Congressional Record on Sept. 14, 1970.

IN THE MARINE CORPS

The nominations beginning James W. Abraham, to be colonel, and ending Arnold G. Ziegler, to be colonel, which nominations were received by the Senate and appeared in the Congressional Record on Aug. 24, 1970;

The following-named temporary disability retired officer for reappointment to the grade of first lieutenant in the Marine Corps, subject to the qualifications therefor as provided by law:

Stevens, Arnold T., [redacted] USMC.

The nominations beginning Arthur R. Anderson, Jr., to be lieutenant colonel, and ending James R. Ziemann, to be lieutenant colonel, which nominations were received by the Senate and appeared in the Congressional Record on Sept. 16, 1970.

# EXTENSIONS OF REMARKS

## MEN OF MEDICINE MEET THE CHALLENGE—ADDRESS BY SENATOR RANDOLPH

### HON. JOHN SHERMAN COOPER

OF KENTUCKY

IN THE SENATE OF THE UNITED STATES

*Friday, September 25, 1970*

Mr. COOPER. Mr. President, one of the great challenges of the 1970's is the provision of adequate medical care at a reasonable cost. I consider that our Nation's doctors are acutely aware of this difficult problem.

On Monday, September 21, members of the Kentucky Educational Medical Action Committee met in Louisville and, I am informed, sought to define the physician's role in society and Government and the Government's role in medicine. The keynote speaker for the occasion was Senator JENNINGS RANDOLPH, the senior Senator from West Virginia, chairman of the Committee on Public Works and who as ranking majority member of the Committee on Labor and Public Welfare has been a leader in the field of health legislation during his service in the House and Senate. Senator RANDOLPH is uniquely qualified to discuss health legislation and the role of the Government. His grasp of the interplay of public interest and congressional action in the fields of health, education, and the environment is broad and profound.

Mr. President, I ask unanimous consent that Senator RANDOLPH's address to the Kentucky Educational Medical Action Committee be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

MEN OF MEDICINE MEET THE CHALLENGE

(By Senator JENNINGS RANDOLPH)

Our American society stands as a symbol of success to virtually every other nation.

We have achieved unparalled prosperity. We have made affluence obtainable to our people to an extent unknown in recorded history.

Our ability to produce material prosperity is a goal actively sought by all the world's developing nations.

But America is not the historic America of our forefathers' dream. . . . of a prosperous people living in freedom. The historic America was a land of hope and promise and example—not a land of civil disorder and mass misery and battered cities. Our greatest responsibility today is to our historic American heritage . . . a land of plenty and promise and good purpose.

It is freely acknowledged that the society we have built contained the seeds of its own destruction. Today, for the first time in our nation's history, we face a tragic prospect—the cities of the richest nation on earth may soon be uninhabitable.

Americans are rightfully alarmed about the continued survival of a good society. Americans have looked beyond our shores for threats to our survival. We have concerned ourselves with world-wide aggression and colonization carried forward by Communism. We have agonized over nuclear proliferation and the possibility of nuclear war. We have earmarked more than half of our nation's wealth for a military defense system designed to deter any and all aggressors.

Threats continue to exist. They cannot be dismissed.

Yet, it seems to me as we begin the 1970s, that the greatest threat to our civilization looms not from external aggression . . . but from weakness within our own society.

As citizens and as members of one of the largest single groups of individual taxpayers—I know you share with me the concern that has been building in recent years—concern for the future of the United States.

Most of our political leaders, government specialists, educators and businessmen appear to be in agreement. The predominately urban society we have created represents the greatest threat to our continued existence. It is a threat perhaps far more immediate than any from outside.

The urban environment we have created is polluted, noisy and ugly. It is an environment that cannot be allowed to continue.

We must eliminate air and water pollution, dispose of our solid wastes more effectively, make our streets safe from criminals and homes and schools safe from vandals . . . conserve our resources, improve transportation and eliminate urban blight and unplanned suburban sprawl.

We must create central cities that make it possible for our urban dwellers to live rather than to exist. We must enhance and provide access for our rural areas to make them more attractive for development.

Our population is approximately 209 million. Approximately 130 million—or two-thirds of all Americans—live in urban areas. In another generation, our nation's urban population will double to some 250 million. Three out of every four Americans will live in urban areas.

I am convinced that our economic prosperity cannot be preserved if most of our nation's people are clustered in a dozen major megalopolitan environments rapidly becoming uninhabitable.

One of the leading functions of the private sector must be to cooperate with all levels of government to reverse this trend. The cliche—"the only proper business of business is business"—has been changed.

Today's business and professional men and women acknowledge and accept their social responsibilities and increasingly involve themselves in the solution of social problems.

Considerable public debate has been focused on corporate social responsibility.

You are concerned with involvement of the medical profession in government . . . and the involvement of government in the medical field.

The question of the business or professional man and his political role is an old one. The debate began with the founding of our republic.

Jefferson at first took the negative side. He wanted a nation of small farmers. He wrote "While we have land to labor, let us never wish to see our citizens occupied at work-bench or twirling a distaff."

Hamilton took the other side. He wrote the "Report on Manufacturers" arguing that the interests of the new country "would be advanced, rather than injured, by the due encouragement of manufacturers."

This basic level demonstrated the different views held by the founding fathers. But there was a question of fear—fear of economic wealth and potential political power of businessmen.

Henry Wallich in his book, "The Cost of Freedom," wrote that "Throughout American history, liberals and conservatives alike have feared and sought to guard against concentration of power."

In those beginning days the equation seemed simple. Daniel Webster spoke for many when he observed: "Power naturally and necessarily follows property. . . ." To which John Taylor echoed: "As power follows wealth, the majority must have wealth or lose power."

Despite the fear of the businessman's potential political power, he was allowed a place at the national table. In 1805 President Jefferson said, apparently in some surprise, "As yet our manufacturers are as much at their ease, as independent, and as moral as, our agricultural inhabitants." And, by 1816, he dropped even this hedge. Jefferson said: "Experience has taught me that manufacturers are now as necessary to our independence as to comfort."

If we substitute the words business, or service industry, or lawyer or doctor, we begin to see that anti-establishment feelings are not new.

Some of you may not think of yourselves as allied with the businessman because of your primary mission as healer, but it is axiomatic that there can be no physical

health without economic health. Emerson wrote: "The first wealth is health."

American science and technology have achieved significant accomplishments toward the betterment of people. But we have seen some shameful failures in the area of human needs.

We have learned to wipe out scarcity—but we do not know how, or we do not want to provide opportunities, to distribute the abundance.

We have reached that stage where man and machine are no longer coupled to lift a heavy load. In many cases, we no longer need the man, as machines can do the job.

We are on the threshold of becoming a nation of leisure. Yet we have inadequate schools and curricula to teach our citizens how to fashion this new-found leisure to worthwhile use.

Farmers are fleeing fields as fewer workers raise huge surpluses of foodstuffs while one-fifth of our citzens are suffering malnutrition or living on inadequate diets.

Medical science transplants kidneys and works the miracle of open heart surgery while millions of our citizens cannot afford an anual physical examination.

Man's greatest problem in the decades ahead will not be the H-Bomb or the population explosion. It will be the question of how much change the human being can accept, absorb and assimilate—and the rate at which he can take it.

Senator Kennedy, in introducing the Health Security Act on August 27, referred to health care in America as "the fastest growing failing business in the nation." Senator Yarborough, Chairman of our Labor and Public Welfare Committee, contends that it is not simply a matter of money in changing our system of health care. Some authorities estimate that $13 billion of the $63 billion we spend on health care each year is wasted. One of the reasons cited is that hospital overuse runs more than 25 percent of the beds.

The lessons of medicare and medicaid should teach us that the system needs to be changed so as to provide the motivation for better care at a more reasonable cost—not the motivation to provide more health care whether needed or not.

America has tried to be good to the underdog. When the aged on fixed incomes could no longer cope with rising medical costs, we provided medicare. Then we turned to the poor and provided medicaid. Between these groups, the average American worker and taxpayer finds himself increasingly squeezed to pay his own medical bills.

No longer can the average private health insurance policy cover the gaps in medical care, because such insurance coverage continues to emphasize the payment of expenses related to being in a hospital. Practically no emphasis is placed on diagnostic or preventive health care. At the same time, 36.3 million Americans were without any health insurance coverage according to a 1968 survey by the National Center for Health Statistics.

Proponents of the National Health insurance proposal describe it as an idea whose time has come. Supporters of Representative Griffiths' bill say the same words. I'm sure that many of you feel that way about the "Medicredit" concept embodied in the bill introduced by Representatives Fulton and Broyhill.

The important fact is that leaders in both government and the health industry are agreed that time has come for a change. Just as the "Ma and Pa" store is being replaced by the supermarket, sole practice in medicine must inevitably give way to consolidated clinic and group practice if the health industry is to remain efficient and viable.

At the risk of embarrassing Howard Cook, I tell you that the American Medical Association has been most efficient in making its views known on Capitol Hill. In some cases the views have seemed to be contrary to the mainstream of public expression.

I feel that after a dozen years of discussion over various proposals for a national health system, Congress will look long and hard at any legislation involving sweeping change. It will depend on you for advice and counsel, for without your consent and cooperation there can be no valid change.

This is the challenge to you in your political involvement. Congress is not the enemy; you are a vital part of government and a sound segment of our society. We turn to you for help in assuring the survival of this society. In the past, you men of medicine have produced many miracles. I ask you now for one more. I urge you to give serious and objective consideration to how we can best assure a fair and equitable system of adequate health care for all Americans. The ancient proverb tells us: "He who has health has hope, and he who has hope has everything."

## AIRPLANE HIJACKERS

### HON. STROM THURMOND

OF SOUTH CAROLINA

IN THE SENATE OF THE UNITED STATES

*Friday, September 25, 1970*

Mr. THURMOND. Mr. President, an editorial column entitled, "U.N. Force Could Arrest Hijackers," appeared in the September 16, 1970, issue of the Florence Morning News in Florence, S.C., under the byline of Columnist David Lawrence.

Mr. Lawrence reports that there is every reason to believe that the hijacking of five airplanes and kidnaping of several hundred passengers was designed by Palestinian elements to frighten those governments which have started to engage in the peace parleys.

Mr. Lawrence accurately charges that the bulk of the weapons the Palestinians are using in their rebellion comes from Russia, the Communist East European bloc, and Red China.

Mr. President, in my judgment, these air pirates should be arrested and punished as common felons. I agree with Mr. Lawrence that air piracy has become a serious threat to air travel. All nations of the world should work together in finding a way to make our airlines safe from criminal interference.

Mr. President, I ask unanimous consent that this article be printed in the Extensions of Remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.N. FORCE COULD ARREST HIJACKERS

WASHINGTON.—There is every reason to believe that the hijacking of five airplanes and the detention of several hundred passengers with threats of execution was part of a deliberate plan to influence the current negotiations designed to settle the future relationships of the Mideast countries. While most of the prisoners were released, as the planes were blown up, about 40 were held as hostages. The whole operation was intended by Palestinian elements to frighten those governments which have started to engage in the "peace" parleys.

For the "Palestinian commandos" are comprised of several organizations, some of them peaceful. While only one group handled the hijacked prisoners and destroyed the planes, all the refugees from Palestine who are concentrated in different parts of Jordan and Lebanon have been worried about what's going to happen to them in the coming Mideast "settlements," if there are any.

"U.S. News & World Report," in its current issue, quotes an expert in the Mideast as follows:

"Palestinians had to demonstrate dramatically—yes, ruthlessly—their conviction that the only way for them to recover Palestine is by fighting, not negotiating. As the commandos see it, nobody else, but themselves is either capable or willing to do that fighting."

But where are these Palestinians getting the money for their rebellion? The bulk of the weapons for their arsenal has been coming from Russia, the Communist East European bloc and Red China. Funds are being supplied by the rulers of some of the oil-producing countries in the Arab world.

What influence will these factors have on the making of peace in the area? Israel is well aware of what is going on and is doubtless anxious that the British and American governments likewise take into account that the situation is more complex than it appears on the surface.

For one thing, the western countries whose citizens were seized and brought to a desert in Jordan by Palestinian bandits—operating under instructions from the revolutionary organizations—cannot ignore what has happened and fail to insist on the punishment of the air pirates. Compensation must be demanded for the destruction of the planes and warning proclaimed that further occurrences of this kind will not be tolerated.

The problem is obviously one for the United Nations to handle. A sharply worded resolution which would arrange for the sending, if necessary, of an international military force to the Jordan area to arrest those guilty of the hijacking is essential. Israel and Egypt will hardly be able to conduct peace negotiations unless the kidnaping has been firmly dealt with and the principal governments of the world have agreed to take action in event of a repetition. Also, the remaining hostages must be immediately released without harm and pledges given that there will be no more such incidents. If these are not forthcoming some of the airports in the Middle East probably will be cut off, and it would not be surprising if even more severe steps have to be taken.

President Nixon and Secretary of State Rogers are not announcing their next move in the hope that the Palestinian commando chiefs will recognize the dangers they face and release the prisoners. Until this is done, punitive action may be delayed, but if the prisoners aren't freed, pressure of other kinds may be applied and the active cooperation of the governments of Egypt, Jordan and other Mideast countries sought.

Although only citizens of the United States and a few other countries were involved in the incidents this time, air piracy has become such a serious threat to air travel that all the nations of the world have a deep interest in finding a way to discourage interference.

## MAN'S INHUMANITY TO MAN—HOW LONG?

### HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks: "How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadistically practicing spiritual and mental genocide on over 1,500 American prisoners of war and their families.

How long?

## BUSINESS DEVELOPMENT SEMINAR

### HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. GAYDOS. Mr. Speaker, on many occasions the Federal Government and its various agencies have been the target of severe criticism for being cold, impersonal and unfeeling creations of a bureaucracy, bent only on extracting their pound of flesh from the American public. This criticism may have been warranted at times, but certainly not in all cases. Too often the sincere and earnest efforts of men who lead these departments and who seek to help their fellow Americans go unrecognized.

For example, Mr. Speaker, late last spring Mr. Lewis E. Conman, Director of the U.S. Department of Commerce division in Pittsburgh, came to my office with a unique proposal. He wanted to help the small businessman and manufacturer in the Mon-Yough Valley of the 20th Congressional District in Pennsylvania. He knew they faced a multitude of problems today, many of them seemingly insurmountable. He was deeply concerned over their plight and he wanted to help. He wanted to bring the services, facilities, abilities, and experience of Federal experts directly to the small and troubled businessman. He felt personal consultation with Federal specialists from various fields could well make the difference between a profit or a loss for the individual and the community.

The seminar, Mr. Conman explained, would be the first of its kind in Pennsylvania and it would be followed by smaller spin-off sessions with community leaders or business organizations. It would, he felt, trigger similar seminars throughout the State. How right he was. The potential benefits to be derived from such a meeting were so great that before we held our initial seminar, there were several others put on the planning boards.

Mr. Conman graciously asked if I would care to cosponsor this first Government-to-people seminar, and I readily agreed to the request. He secured the Federal experts while I, working with the cooperation of several chambers of commerce, explained the purpose of the seminar to the business community. Our "business development seminar" was held Friday, September 18, in West Mifflin, and, from all reports, it proved to be successful. Within a day or two my office was receiving inquiries as to when and where the next one would be held.

Mr. Speaker, I would like to commend Mr. Conman and the others who participated in this program. It was a coordinated effort to show the public their Government is, indeed, interested and concerned about their welfare. It was an attempt to restore public trust and confidence in the Government. These qualities, I fear, are lacking among too many Americans today.

I take great pleasure, Mr. Speaker, in singling out for recognition by my colleagues and the public the men who worked so diligently to make this seminar a success. From the Federal Government there were: Mr. Conman and William Bradley from the Department of Commerce; Joseph Sambolt from the Department of Labor; Charles Conley from the Small Business Administration; Edward G. Coll, postmaster for the city of Pittsburgh; and H. Alan Long, director of the Internal Revenue Service in the Pittsburgh district.

In addition to what they have already done, these men have volunteered to participate in any spin-off seminars which may be conducted by business groups, industrial organizations, or by individual communities.

Mr. Speaker, I also would like to commend the representatives from the various chambers of commerce which cosponsored the initial seminar: Arthur Parker, of the Mon-Yough Chamber; Robert Mehaffey, of the Duquesne-West Mifflin Chamber; Mrs. Roberta Smith, of the South Side Chamber; William Tindall, of the Steel Valley Chamber; Karl Kraft and William Casey, of the 15th Ward Chamber; and Mrs. Dorothy Bell and William Pardini, of the Braddock Chamber.

## BRAKES ON THE DIRECT-VOTE PLAN

### HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. DERWINSKI. Mr. Speaker, as I pause to insert into the RECORD an editorial from the Monday, September 21, Chicago Today, I note that the other body is still involved in debate on the constitutional amendment which would provide for direct vote for President. Having voted against the measure when it was stampeded through the House, I am pleased to note that many of the Senators are showing proper concern over the adverse consequences of this proposal. The editorial I place into the RECORD at this time makes the point well:

BRAKES ON THE DIRECT-VOTE PLAN

The Senate's failure to cut off debate on the proposal for direct popular election of Presidents has probably doomed the proposal for this year. That's fine with us. The sweeping plan to scrap the electoral college and substitute direct popular voting—in which only the totals of individual votes would count—needs all the study and debate it can get, and another year of study won't hurt.

The direct-vote idea has a rough, appealing simplicity. But it could lead to far messier complications—for instance, endless recounts of Presidential ballots—than the present system. In our view, the direct vote would sacrifice every other consideration in favor of a score-board simplicity in which nothing counted but totals—as the voters were just so many million units facing an either/or choice.

Election issues are not as simple as that. Presidential campaigns should not be based solely on running up quantities of votes, as tho they were pinball games. Such things as minority representation, regional needs, the quality of ideas and issues, count too.

The electoral system, clumsy as it is, keeps these elements in perspective, and it shouldn't be junked till someone finds a system that is not only simpler but better.

## DOLLARS FOUND FOR DRONES

### HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. MOORHEAD. Mr. Speaker, a recent editorial in the Pittsburgh Post-Gazette illustrates the questionable sense of economic priorities that the Nixon administration displays.

The House and Senate have approved a $400,000 budget for the Subversive Activities Control Board, whose function many of us in Congress have tried for the past decade to determine. This budget item received no threatened veto from the Nixon administration. Does this mean that this do-nothing sop to right-wing extremism is more important to this Nation's welfare than education or housing bills?

Granted the amount of money for this "useless appendage of government," as the Post-Gazette calls the SACB, is much smaller than the money in the HUD appropriations bill or the hospital construction bill, however, if Mr. Nixon is truly interested in economy in Government, here was as good a place as any to start. In fact it was a better budget item to trim than most.

But as long as there are substantial elements who look under their beds at night for Joseph Stalin, there will always be a Subversive Activities Control Board.

I only hope that some evening when one of these "patriots" checks under his bed for Joe Stalin, he finds him. I will have no doubts then where the encounter took place.

The editorial follows:

DOLLARS FOUND FOR DRONES

Sandwiched between the Soldiers' Home and Tariff Commission listings on page 658 of the 1970 Congressional Directory is an agency known as the Subversive Activities Control Board. Its mission is to do nothing, and its obscure members who are paid $36,000 a year surely merit Sen. William Proxmire's description as the "highest-paid group of bench warmers in the government."

The board was created 20 years ago, ostensibly with the "power" to designate organizations as Communist-front units. But as a result of repeated federal court decisions, the SACB is barred from publishing the names of persons identified as members of the Communist party, or, in fact, from doing anything. Attorney General John Mitchell says he will remedy that by giving the board some cases to handle, a promise that is far from reassuring to those who value due process of law.

In fact, the SACB serves as a comfortable refuge for those beached by the ebb and flow of Washington political tides. One member is Otto F. Otepka, a former State Department security officer, whose demotion for an alleged security breach within his department

became a cause celebre among right-wing groups who, of course, saw it as the work of subversives.

On another occasion, possibly for repayment for past services, possibly for laughs, former President Lyndon Johnson appointed the 29-year-old husband of a former secretary to the board. Patronage jobs at $36,000 a year, especially when the jobs entail no work at all, have some utility to a president, presumably.

Despite this staggering record of do-nothingism and mediocrity, the board was given Senate approval for an operating budget of $401,400. In light of the crocodile tears shed by the Nixon administration over a budget situation which necessitated cuts in education and domestic welfare programs, it is strange that the White House did not give serious thought to cutting out this useless appendage of government.

Defending the board's appropriation, Sen. John L. McClellan declared: "There's never been a time when there's been so much bombing, so much rioting, so much subversion as now."

So, what has the Subversive Activities Control Board been doing for the past 20 years—besides drawing paychecks?

## THE INITIATIVE THAT WENT WRONG

### HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. OTTINGER. Mr. Speaker, an excellent editorial by Tom Wicker in the September 22 New York Times analyzes the reasons for Israel's recent withdrawal from the Mideast peace talks and points cogently to the weakness of the American response to evidence of Soviet-Egyptian violation of the truce terms. Mr. Wicker makes it clear that our deep obligation to help Israel maintain its self-sufficiency is more imperative than ever, and I include the full text of his article for the benefit of my colleagues:

THE INITIATIVE THAT WENT WRONG

(By Tom Wicker)

WASHINGTON, Sept. 21—The remarkable Mrs. Meir has now departed and much of the strain in Israeli-American relations seems to have been eased. But that does not mean that the substantive damage of the summer has been rectified or that the dangers it brought have been removed. Instead, the American "initiative" that opened the period in June has been reduced to a tenuous cease-fire across the Suez Canal, and the situation in general appears more threatening than ever.

After Mrs. Meir's visit, it is possible to see a bit more clearly what happened in these confusing months. In the first place, it is now known that Israel never had any belief at all that the American proposals would lead to a negotiated settlement (and it has even less confidence in them now). Mrs. Meir's Government agreed only under the most intense American pressures, the most telling of which was what the Israelis thought was a tacit American threat to provide no more of the Phantom jets Israel believes vital to its security.

This coincided with the advent of Soviet pilots over Suez, and the loss by the Israelis of Phantoms that suddenly seemed irreplaceable. Hence, against its inclination, the Israeli Government entered the cease-fire, only to find the Soviets and Egyptians immediately taking advantage of it to improve their missile defenses. When the United States disputed whether these violations had occurred, that meant to the Israelis that Washington was so committed to its peace plan that it "preferred not to see" the new missile sites or their military significance. Ultimately, the United States had to concede the violations—which meant that either the Israelis had been right about American motives, or that American monitoring of the cease-fire had been inadequate, or both.

Mrs. Meir, therefore, was on solid moral, political and military ground when she insisted here that Israel would not enter peace talks until the missiles had been "rolled back" to the original cease-fire line. American officials, from President Nixon down, do not appear even to have argued the point with any conviction.

It is nevertheless apparent that the missile sites are not likely to be rolled back, short of a military attack eastward across the canal. But since Mrs. Meir went home expressing herself as reasonably satisfied with her visit, no doubt she took away an understanding that there would be enough new American planes and other hardware to cope with the new military situation on the Suez.

So, militarily, at best, this dangerous situation may soon be stabilized—but at a distinctly higher level of tension and potential violence than was the case last June. The net effect is of one more lethal round in the arms buildup on both sides of the canal, and perhaps a greater likelihood that a crossing will be attempted from one side or the other.

The Egyptians, so far from appearing more tractable, as might have been thought last June, appear to have seized a quick military opportunity. The Soviets, then widely hailed as more conciliatory for their attitude in the Middle East and at the SALT talks, now appear as ruthless and unprincipled as ever (to the obscene glee of this country's cold warriors).

Moreover, the Soviet power position in the Middle East has been enhanced. (When Mr. Nixon invaded Cambodia last spring, one of the reasons Administration sources gave was that such a power play would dispel any notion that the President could be trifled with or pushed around. The Soviets apparently did not get the message.)

As for the United States, it failed to sustain its assurances that Israel would not suffer military disadvantage by the cease-fire, thus appearing to the Israelis to have risked their vital interests, as well as endangering the credibility of future assurances; now Washington can redeem that situation only by the kind of arms shipments it had hoped to avoid in the first place.

Thus, Mrs. Meir may have been "feeling better" as she flew home, but it could hardly have been because she was reconciled to all that happened. Rather, she seemed to be relieved that things may have stopped getting worse.

## NEWS CENSORSHIP AGAIN SUPPRESSES COMMUNIST ACTIVITY

### HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. RARICK. Mr. Speaker, Wednesday, September 23, the House of Representatives, by a vote of 337 to 14—with 78 not voting—passed House Resolution 1220, certifying to the U.S. Attorney for the District of Columbia that Arnold S. Johnson had declined to be sworn and refused to testify before the congressional Committee on Internal Security and thereby asking for criminal action as our laws provide.

Who is Arnold Johnson?

According to Chairman ICHORD—page 33270, CONGRESSIONAL RECORD September 23, 1970—Arnold Johnson is more than a New Mobe leader; he is a national legislative director for the Communist Party, U.S.A.

Following Johnson's refusal to be sworn before the congressional committee and offer testimony which could well bear on saving American lives in Vietnam, if not on ending the war, Johnson held a press conference and among other charges and whitewash, said, in a prepared news release:

I am a member of the Steering Committee of New Mobilization as a representative of the Communist Party USA.

Which membership he said he had held since 1936. He also stated:

Yes, I am proud of my Communist Party Membership.

Additionally, last month, before Wednesday's vote, Johnson dispatched letters to attendees of a Milwaukee peace conference, addressing them "Dear Friends in the Peace Movement," appealing for their help in visiting and writing Congressmen to vote "No" on the contempt resolution. Interestingly enough, this brazen appeal was on the letterhead of the Communist Party U.S.A.

Strangely enough, there has been little news interest shown in the Johnson contempt of Congress matter. The mass American people are unaware of the action or the vote in Congress, although short articles in the two local Washington papers barely mentioned "New Mobe Man Cited by House for Contempt." Communism was played down.

A dual standard of reporting, when one recalls the earlier actions, for example, on holding officers of the Ku Klux Klan in contempt in 1966, for refusing to produce certain papers as ordered by the committee subpena.

In that particular case, the American people were supplied with generous news coverage. The vote was 344 to 28, with 60 not voting—CONGRESSIONAL RECORD, volume 112, part 2, page 1763.

It is strange indeed that with the Bolshevist Communist menace threatening the entire free world—with over 50,000 American boys already dead in Southeast Asia fighting Communist imperialism—with a reported crisis in the Middle East receiving much news reporting as being Communist instigated—the action of Congress on investigating internal Communist activity and threatened turmoil is of paramount importance to all our people, and worthy of detailed news coverage.

Are we to assume that the press can be entrusted with censorship over who are the enemies of the American people?

Mr. Speaker, I include a statement by Arnold Johnson, a copy of the August 24 letter from Arnold Johnson, and two press releases:

WHY I REFUSE TO TESTIFY BEFORE THE HOUSE INTERNAL SECURITY COMMITTEE

(By Arnold Johnson)

In addition to the legal grounds presented by my attorney, John Abt, in his motion to quash the subpoena and to cancel this hearing, I refused to be sworn and to testify before this House Committee on Internal Security today because I will not lend myself to any of the purposes of the Committee. These hearings are obviously calculated to intimidate and subvert the peace movement at a time when the role of the peace movement and the New Mobilization Committee is more urgent than ever before and has been made ever more important by the Nixon-Agnew escalation of the war from Vietnam to Cambodia, Laos and Thailand, and all Indo-China. This escalates the threat of world war and nuclear holocaust. That course of disaster must be reversed. That is the area of criminal violence, of imperialist aggression, of brutal atrocities that calls for an escalation of the peace movement!

At this same time, the repression within our country and the constitutional crisis has been intensified with the killings at Kent, Augusta and Jackson; and the earlier murder and jailings of Black Panthers and other black Americans. That is where the genocidal violence is at in this country, and this House Committee fails to investigate the source of that violence.

The New Mobilization Committee and the peace movement, in massive demonstration on November 15, gave expression to the desire of the majority of the American people to end the war in Vietnam, to end racism, repression and poverty at home, to give peace a chance. That is all a matter of wide public knowledge. I am a member of the Steering Committee of New Mobilization as a representative of the Communist Party, U.S.A. That is also a matter of public knowledge. There are some 100 or more persons on the Steering Committee representing all sectors of the peace movement and a wide diversity of political opinion. I have been active in the peace movement in this country for some 44 years and hold that my membership in the Communist Party since 1936 has only served to strengthen my devotion and dedication to the struggle for peace and democracy, freedom and social progress. I also hold that these objectives will be better guaranteed when this country changes from capitalism to socialism. Yes, I am proud of my Communist Party membership. I am confident that the peace movement and the interests of the American people will be best served by my refusal to testify at this hearing and by the abolition of the successor committee to the discredited House Un-American Activities Committee.

---

NEW YORK, N.Y.,
*August 24, 1970.*

DEAR FRIEND IN THE PEACE MOVEMENT: This letter is being sent to all who attended the recent Milwaukee peace conference.

On August 13, five of the nine members of the House Internal Security Committee, voted to recommend that the U.S. Congress cite me for contempt because on June 11, when under subpoena to appear before the committee, I refused to be sworn and to testify before that present version of the Un-American Committee (HUAC) and challenged its right to subpoena me or anyone else in the New Mobilization Committee. My reasons for refusing to testify and for challenging the committee's authority are expressed in the enclosed statement which I issued at that time. Thus far I am the first and only member of the New Mobe to be subpoenaed. I believe my stand is valid and can halt the committee in its campaign against the peace movement. Therefore this is not a personal issue.

The House Committee plans to ask Congress to cite for contempt, when Congress returns on September 9. Any serious debate by a number of Congressmen can convince the Congress to reject the H.I.S.C. recommendation. I want to urge that these days be used to visit your Congressman when he or she is at home, and to send letters to her or him at House Office Building, Washington, D.C.—urging "Vote No" on the request to cite. This is a time when the H.I.S.C. should be abolished. That will be a blow to repression and will give more strength to the peace movement.

I would appreciate any comment.

Sincerely yours,

ARNOLD JOHNSON.

---

[From the Washington Post, Sept. 24, 1970]

PROSECUTION SOUGHT

The House voted 337 to 14 to seek the contempt-of-Congress prosecution of Arnold S. Johnson, public relations director of the U.S. Communist Party, for refusing to answer questions about the New Mobilization Committee to End the War in Vietnam.

Now the Justice Department will present a federal grand jury with the charge, which originated in the House Internal Security Committee.

Rep. ——— (D.-N.Y.) wondered whether the action would intimidate anitiwar activity. But ——— (R.-Ohio) said it intended simply "to uphold the dignity of the House."

---

[From the Evening Star, Sept. 24, 1970]

NEW MOBE MAN CITED BY HOUSE FOR CONTEMPT

Arnold S. Johnson, a member of the New Mobilization Against the War in Vietnam who refused to be sworn in to testify before the House Internal Security Committee in June, has been cited for contempt of Congress.

Voting 337 to 14 yesterday the House sent the case to the U.S. District Court.

HISC Chairman Richard H. Ichord of Missouri called Johnson's defiance a "clear, open and patent" violation of law. Johnson contended HISC had no authority to investigate the New Mobe.

Ichord said Johnson also is publicity director of the Communist party, USA. Conviction of contempt carries a maximum penalty of a $1,000 and a year in jail.

---

## PRESIDENT NIXON'S SPEECH AT KANSAS STATE UNIVERSITY

---

### HON. JOE SKUBITZ

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1970*

Mr. SKUBITZ. Mr. Speaker, President Nixon's speech at Manhattan, Kans., may go down as a historical landmark in which the President suggested a wise course for administrators, faculty members, and students to pursue on our college campuses.

His appearance on September 16 at Kansas State University clearly demonstrated that clear-thinking students could understand what the President was trying to say.

The students at Kansas State demonstrated in the finest tradition of the State what proper behavior should be. The fine conduct of the vast majority so overshadowed the conduct of a confused few. It was heartwarming to watch the President plunge into the crowd after his speech and to receive such a warm reception. This is a credit to both the Kansas State University students and the President. The Manhattan appearance proved that the President could go to the American student and properly be received if the President spoke clearly and honestly and if the student would be honest in his response.

Many of my colleagues have commented on the President's speech. Many millions of Americans who viewed the speech and who may have a chance to see the speech again on television can testify to the President's well-stated case and the sincere reception of the students.

The President came right to the point when he said:

The time has come for us to recognize that violence and terror have no place in a free society.

His speech was a model of self-restraint and decency.

The President was correct when he warned that those people who bomb, who ambush policemen, who hijack airplanes, who hold their passengers hostage "all share in common not only a contempt for human life but also a contempt for those elemental decencies on which a free society rests."

He was also correct when he called an end "to passive acquiescence, or even fawning approval" of violence.

The President said—

What corrodes a society even more deeply than violence is the acceptance of violence, the condoning of terror, excusing of inhuman acts in a misguided effort to accommodate the community's standards to those of the violent few.

Several of my colleagues have placed excerpts of the President's speech into the CONGRESSIONAL RECORD. Because I thought the President's words on Vietnam were so important and which appear in the complete text, I would like to insert into the RECORD the complete text.

Also many of the fine editors in my district have made some excellent comments on the President's speech. Thus, I insert some of these editorials and also an excellent editorial comment from radio station WIBN in Topeka:

REMARKS OF THE PRESIDENT

Governor Landon, President McCain, Senator Pearson, Senator Dole, all of the distinguished guests on the platform, and all the distinguished guests in this audience for this Landon Lecture Series:

I want to express first on behalf of both Mrs. Nixon and myself our warm appreciation for your welcome. It is good to be on the campus of one of America's great universities. And for the benefit of our television audience, I should explain this tie. We were flying out to Kansas on Air Force One and Senator Pearson, Senator Dole, the Members of the Congressional Delegation and others presented this tie to me and said, "You must wear it when you speak at Kansas State."

So, I put it on. Then the television director for today saw it and said, "You can't wear that tie." I said, "Why not?" He said, "Because purple doesn't go with a blue suit."

All I can say is I am proud to wear the purple of Kansas State.

I also want to thank those who made the arrangements for this meeting for having as the waiting room before we came into the auditorium here, the dressing room for the Kansas State basketball team. It is nice to be in a room with a winner, believe me.

At this great university, in this very distinguished company, I cannot help but think

about the twists of fate—and of how we learn from them.

I think of the fans of Wildcat football here today who have known what it is to lose—and then who have known what it is to win.

I think back to 1936. You were not born then. But I think then, when Governor Landon—who already knew what it was to win—the only winner among governors on the Republican side in 1934—a man who knew what it was to win up to that time, learned what it was like to lose.

And I think, too, of some of the moments of my own career: as a football player who spent most of his time on the bench; as a candidate who knew the great satisfaction of winning—and then as a candidate to learn what it is to lose.

Having won some and lost some, I know—as you know—that winning is a lot more fun.

But I also know that defeat or adversity can react on a person in different ways.

He can give up; he can complain about "a world he never made"; or he can search the lessons of defeat and find the inspiration for another try, or a new career, or a richer understanding of the world and of life itself.

When Alf Landon lost to Franklin Roosevelt in 1936, he was not a man to waste his life in brooding over what might have been. In the 34 years since then, the world has been transformed. And enriched by his experience, Alf Landon has continued to grow with the world—until now he is one of the great elder statesmen of America, a man whose wisdom and common sense, and whose outspoken concern for the welfare of this nation, have inspired and aided generations that have come thereafter.

We applaud him and commend him today for that distinguished career.

Or in a completely different field, but related, take Kansas State and its football team.

As some of you may have noted, I am somewhat of a football buff. Just three years ago, the Wildcats had a dismal seven-year record of eight wins and 60 losses. But there was a dogged spirit here, a determination, a readiness to learn new ways—and when Vince Gibson came to the campus it was that spirit, that determination, that "Purple Pride" that he helped translate into the Purple Power of today.

As for myself, I doubt that I would be President today if I had not learned from the lessons of defeat in 1960 and 1962—and I hope that I can be a better President because of those lessons.

I cite these examples not only to suggest that we here today have something in common—but also because this pattern of playing by the rules, of losing some and winning some, of accepting the verdict and having another chance, is fundamental to the whole structure on which our liberty rests.

There are those who protest that if the verdict of democracy goes against them, democracy is at fault, the system is at fault—who say that if they don't get their way the answer is to burn a bus or bomb a building.

Yet we can maintain a free society only if we recognize that in a free society no one can win all the time. No one can have his own way all the time, and no one is right all the time.

Whether in a campaign, a football game, or in debate on the great issues of the day, the answers to "losing one" is not a rush to the barricades but a study of why, and then a careful rebuilding—or perhaps even a careful re-examination of whether the other fellow may have been right after all.

When Palestinian guerrillas hijacked four airliners in flight, they brought to 250 the number of aircraft seized since the skyjacking era began in 1961. And as they held their hundreds of passengers hostage under threat of murder, they sent shock-waves of alarm around the world to the spreading disease of violence and terror and its use as a political tactic.

That same cancerous disease has been spreading all over the world and here in the United States.

We saw it three weeks ago in the vicious bombing at the University of Wisconsin. One man lost his life, four were injured and years of painstaking research by a score of others was destroyed.

We have seen it in other bombings and burnings on our campuses, and in our cities; in the wanton shootings of policemen, in the attacks on school buses, in the destruction of offices, the seizure and harassment of college officials, the use of force and coercion to bar students and teachers from classrooms, and even to close down whole schools.

Consider just a few items in the news:

—A courtroom spectator pulls out a gun. He halts the trial, gives arms to the defendant, takes the judge and four other hostages, moves to a waiting getaway van—and in the gunfight that follows four die, including the judge.

—A man walks into the guardhouse of a city park and pumps five bullets into a police sergeant sitting quietly at his desk.

—A Noble Prize winner working on a cancer cure returns to the cages of his experimental rats and mice to find them vandalized, with some of the animals running loose, some thrown out of windows into the sea, hundreds missing.

Just think, years of research which could have provided some progress to bring a cure to this dread disease destroyed without reason.

A police patrolman responds to an anonymous emergency call that reported a woman screaming. He arrives at the address. He finds the house deserted but a suitcase is left behind. He bends over to examine it. It explodes, blows off his head and wounds seven others.

These acts of viciousness all took place not in some other country, but in the United States, and in the last five weeks.

America at its best has stood steadfastly for the rule of law among nations. But we cannot stand successfully for the rule of law abroad unless we respect the rule of law at home. A nation that condones blackmail and terror at home can hardly stand as the example in putting an end to international piracies or tensions that could explode into war abroad.

The time has come for us to recognize that violence and terror have no place in a free society, whatever the purported cause or perpetrators may be. And this is the fundamental lesson for us to remember. In a system like ours, which provides the means for peaceful change, no cause justifies violence in the name of change.

Those who bomb universities, ambush policemen, who hijack airplanes and hold their passengers hostages, all share in common not only a contempt for human life, but also the contempt for those elemental decencies on which a free society rests—and they deserve the contempt of every American who values those decencies.

Those decencies, those self-restraints, those patterns of mutual respect for the rights and feelings of one another, the willingness to listen to somebody else, without trying to shout him down, those patterns of mutual respect for the rights and the feelings of one another—these are what we must preserve if freedom itself is to be preserved.

There have always been among us those who would chose violence or intimidation to get what they wanted. Their existence is not new. What is new is their numbers, and the extent of the passive acquiescence, or even fawning approval, that in some fashionable circles has become the mark of being "with it".

Commenting on the bombing three weeks ago at the University of Wisconsin, the Wisconsin State Journal recently said:

"It isn't just the radicals who set the bomb in a lighted, occupied building who are guilty. The blood is on the hands of anyone who has encouraged them, anyone who has talked recklessly of 'revolution,' anyone who has chided with mild disparagement the violence of extremists while hinting that the cause is right all the same."

What corrodes a society even more deeply than violence itself if the acceptance of violence, the condoning of terror, the excusing of inhuman acts as misguided efforts to accommodate the community's standards to those of the violent few.

When this happens, the community sacrifices more than its calm and more even than its safety. It loses its integrity and corrupts its soul.

Nowhere should the rule of reason be more respected, more jealously guarded, than in the halls of our great universities.

It is the rule of reason that is the most important.

Yet we all know that in some of the great universities small bands of destructionists have been allowed to impose their own rule of arbitrary force.

Because of this, we today face the greatest crisis in the history of American education.

In times past we have had crises in education. I remember them. We faced shortages of class rooms, shortages of teachers, shortages that could always be made up, however, by appropriating more money.

These material shortages are nothing compared to the crisis of the spirit which rocks hundreds of campuses across the country today. And because of this, to put it bluntly, today higher education in America risks losing that essential support it has had since the beginning of this country—the support of the American people.

America, and Americans, from the time of our foundation, and particularly those that did not have the opportunity to go to a great college or university, has been proud of our enormous strides in higher education. They have supported it.

The number of students in college today has doubled in the past ten years. But at a time when the quality of education is going dramatically up, its quality is massively threatened by assaults which terrorize faculty, students and university and college administrators alike.

It is time for the responsible university and college administrators, faculty and student leaders to stand up and be counted. We must remember only they can save higher education in America. It cannot be saved by Government.

If we turn only to Government to save it, then Government will move in and run the colleges and universities, and so the place to save it is here among those, the faculty, the Administrators, the student leaders. To attempt to blame Government for all the woes of the universities is rather the fashion these days. But, really, it is to seek an excuse, not a reason, for their troubles.

Listen to this: If the war were to end today, if the environment were cleaned up tomorrow morning, and all the other problems for which Government has the responsibility were solved tomorrow afternoon—the moral and spiritual crisis in the universities would still exist.

The destructive activists of our universities and colleges are a small minority. But their voices have been allowed—

My text at this point reads: The voices of the small minority have been allowed to drown out the responsible majority. That may be true in some places, but not at Kansas State.

As a result, there is a growing, dangerous attitude among millions of people that all

youth are like those who appear night after night on the television screen shouting obscenities making threats or engaging in destructive and illegal acts.

One of the greatest disservices that the disrupters have done in fact is precisely that, to reflect unfairly on those millions of students, like those in this room, who do go to college for an education, who do study, who do respect the rules, and who go on to make constructive contributions to peaceful change and progress in this country.

But let us understand exactly where we are. I would not for one moment call for a dull, passive conformity on the part of our university and college students, or an acceptance of the world as it is. The great strength of this nation is that our young people, the young people like those in this room, in generation after generation, give the nation new ideas, new directions, new energy.

I do not call for a conformity in which the young simply ape the old or in which we freeze the faults that we have. We must be honest enough to find what is right and to change what is wrong in America.

But at the same time we must take an uncompromising stand against those who reject the rules of civilized conduct and of respect for others—those who would destroy what is right in our society and whose actions would do nothing to right what is wrong.

Automatic conformity with the older generation—and I say this as one of the older generation—automatic conformity with the older generation is wrong. At the same time, it is just as wrong to fall into a slavish conformity with those who falsely claim to be the leaders of the new generation, out of fear that it would be unpopular—or considered square—not to follow their lead.

It would be a tragedy for the young generation simply to pursue the policies of the past, and it would be just as great a tragedy for the new generation to become simply parrots for the slogans of protest, uniformly chanting the same few phrases—and often with the same four letter words.

Let us take one example—one example that deeply troubles, and I understand why it does deeply trouble, many of our young people today: The war in Vietnam. We know the slogans. I have heard them often. Most of them simply say end the war.

There is no difference between Americans on that. All of us want to end the war. And we are ending this war.

Ending the war is not the issue. We have been in four wars in this century. We ended World War I. We ended World War II. We ended Korea. The great question is how we end a war and what kind of a peace we achieve.

If it was a peace now that would encourage those who would engage in aggression and would thereby lead to a bigger and more terrible war later, it would be peace at too great a price.

As we look back over the 20th century, as we look at that whole record of this century, only 70 years, we in America have not yet in this whole century been able to enjoy even one full generation of peace.

So, the whole thrust, the whole purpose of this Administration's foreign policy—whether it is Vietnam, or the Middle East, or in Europe, or in our relations with the developing countries or with the Communist powers—is to meet our responsibilities in such a way that at last we can have what we have not had in this century: A full generation of peace. I believe we can have it.

That is why, in Vietnam, we are carrying out a policy that will end the war. It will do it in a way that will contribute to a just and a lasting peace in the Pacific, in Vietnam, and, we trust, also in the world.

There are those who say that this is the worst of times in which to live.

What self pitying nonsense that is.

I am perhaps more aware of the problems this nation has at home and abroad than most of you. But we in America, I say proudly today, have a great deal to be proud of—and a great deal to be hopeful about for the future.

Let us open our eyes. Let's look around us. We see, as we look at the whole sweep of history, that for the first time in the whole history of man, it is becoming possible here in America to do things that nobody even dreamed could be done, even 50 years ago.

We see a natural environment, true, that has been damaged by careless misuses of technology. But we also see that that same technology gives us the ability, the ability to clean up that environment, to restore the clean air, the clean water, the open spaces, that are our rightful heritage. And I pledge we can do that and shall do it.

I know the fashionable line among some: Wouldn't it be great to live in a country that didn't have all these problems of material progress?

Not at all. I have been to them. I have seen them. And I simply would like to say to you that great as our problems are as a result of our material progress, we can do things, do things for ourselves and for others that need to be done, and we must see it in that way.

Look at our nation. We are rich, and sometimes that is condemned because wealth can sometimes be used improperly. But because of our wealth, it means that today we in America cannot just talk about, but can plan for a program in which everyone in this nation, willing and able to work, can earn a decent living, and so that we can care for those who are not able to do so on some basis.

We see a nation that now has the capacity to make enormous strides in these years just ahead, in health care, in education, in the creative use of our increasing time.

We see a nation poised to progress more in the next five years, in a material sense, than it did in the last 50 years.

We see that because of our wealth, because of our freedom, because of this much maligned system of ours, we can go on to develop those great qualities of the spirit that only decades ago were still buried by the weight of drudgery, and that in 75 percent of the world today are still buried by the weight of drudgery.

We see that we can do this in America, lift that weight of drudgery, allow the developments of the qualities of the spirit, and we can do it not just for an elite class, not just for the few, but for the many. All this can happen in America. The question is how shall we use this great opportunity? Shall we toss it away in mindless disruption and terror? Shall we let it wither away in despair? Or shall we prepare ourselves, as you are preparing yourselves, and shall we conduct ourselves in a way that we will be looked back upon as the beginning of the brightest chapter ever in the unfolding of the American dream.

Making its promise real requires an atmosphere of reason, of tolerance, and of common courtesy, with that basic regard for the rights and feelings of others that is the mark of any civilized society.

It requires that the members of the academic community rise firmly in defense of the pursuit of truth—that they defend it as zealously today against threats from within as they have in the past defended it against threats from without.

It requires that the idealism of the young—and indeed, the idealism of all ages—be focused on what can be done within the framework of a free society, recognizing that its structures of rights and responsibilities is complex and fragile and as precious as freedom itself.

The true idealist pursues what his heart says is right in a way that his head says will work.

Idealism lies in the respect each shows for the rights of others. Despite all the difficulties, all divisions, all troubles that we have had, we can look to the future, I believe, with pride and with confidence. I speak here today on the campus of a great university, and I recall one of the great sons of Kansas, Dwight David Eisenhower. I recall the eloquent address he made at London's famous Guildhall immediately after victory in Europe.

On that day, the huge assemblage of all the leading dignitaries in Britain were there to honor him.

In his few remarks, one of the most eloquent speeches in the history of English eloquence, he said very simply, "I come from the heart of America."

Now, 25 years later, as I speak in the heart of America, I can truly say to you here today you are the heart of America—and the heart of America is strong. The heart of America is good. The heart of America is sound. It will give us—you will give us—the sound and responsible leadership that the great promise of America calls for—and in doing so, you will give my generation what it most fervently hopes for: The knowledge that your generation will see that promise of the American dream fulfilled.

---

[From the Caney Chronicle, Sept. 17, 1970]

PURPLE PRIDE

President Nixon spoke at Kansas State University at noon today and I went home to catch his talk on TV. I am glad I did.

A handful of radicals, occupying rear seats, tried to shout down the President at several intervals. They received, I believe, an education in Americanism—not only by the President—but by the thousands of Kansas State University students and faculty members who arose after almost every anti-Nixon outburst to give the President roaring and sustained ovations.

I was completely enraptured by what I saw and beheld. Frankly, in late years, I have become suspect of our two great universities, K.U. and Kansas State. But no longer am I worried about Kansas State.

As the camera zeroed in on the youthful listeners you became aware of their intense concentration upon the President's words. They leaned forward and sat almost motionless.

But they jumped to their feet, roaring approval, at such Nixon expressions as the following:

"We cannot stand for the rule of law abroad unless we observe law at home."

"Violence has no place in a free society no matter what the cause."

"The willingness to listen to somebody else without trying to shout him down—those patterns of mutual respect must be wanted by all of us."

But the remark made by the President that obtained most support from his audience followed some shouting from the back of the room.

Said Nixon:

"It is time for responsible students, faculty members and administrators to stand up and be counted."

Then he continued: "Sometimes it seems that the activists, the small minority, are the only voices coming from the campuses. That may be true in some universities. but not at Kansas State."

As of 12:30 today noon I put aside all worries about the student body at Kansas State. K-Staters have Purple Pride not only for their football team but for the America all of us love and want to keep intact.—HKG.

[From the Chanute Tribune, Sept. 17, 1970]

WARMLY RECEIVED

It took the President of the United States, but they finally found someone at Kansas State more popular as a speaker than football coach Vince Gibson.

Despite cat-calls from a group of approximately 30, Richard Nixon learned quickly Wednesday that he was in friendly territory when the 15,500 repeatedly shouted their approval.

And well they might have. For a start, the President called Kansas State a great university. And those kind words were preceded by an explanation on nation-wide television of why he was wearing a Purple Pride necktie with a blue suit. And mixed in freely were words noting that two losers have risen from the ashes together—Richard Nixon from political defeat and Kansas State from gridiron ignominy.

The repeated spectacle of the President playing the crowd's cheers of approval against the hooting ignoramuses at the back tended to obscure a plain-spoken repetition of themes that have been field tested by Spiro Agnew:

There are no places in a free society for violence and terror.

In a system that provides means for peaceful change, no cause justifies violence in the name of change.

At Manhattan Wednesday, these words were met with wave after wave of roared approval. Richard Nixon knew that they would be; this foreknowledge is why he chose Kansas State for a rare campus visit.

One might speculate at the reception had he not swaddled himself in Purple Pride, the better to be embraced.

Nonetheless the rally to praise the values cherished in Middle America came off as planned, and the President can surely forgive us the fewer than 30 among more than 15,000 who displayed boorish ways.

Richard Nixon came to praise Alf Landon, and he did. With a virtuoso performance that shows he knows the fears and hopes of Middle America.

---

[From the Coffeyville Journal, Sept. 18, 1970]

THEY STOOD UP AND CHEERED

Thousands of students cheered President Nixon at Kansas State University Wednesday while a handful of protestors attempted to heckle him. It was a dramatic illustration of the fact that troubles on America's campuses are the work of a small minority.

The fact that they are few does not make them any less a threat to orderly educational processes, but the public should understand that the so-called militants represent less than one percent of the nation's students.

Kansas State University may not be typical of all universities in the nation, but it can't be much different from others in the Middle West, including Kansas University at Lawrence which is catching so much criticism from its alumni and others.

K-State has been lucky in that its burnings happened some time ago when such events were still rightly looked upon as the work of a few mentally disturbed or distorted individuals. Today some unthinking members of the public seem to believe that burnings and bombings on campuses are condoned by faculty and administrators.

President Nixon had some pertinent things to say at Manhattan. One of the most important was this:

"The time has come for us to recognize that violence and terror have no place in a free society, whoever the perpetrators and whatever their purported cause. In a system that provides the means for peaceful change, no cause justifies violence in the name of change."

The students cheered this mightily for all of us.

He pointed out that higher education in America can not be saved by government, but must be saved by college administrators, faculty, and student leaders.

The President's experience at Kansas State was a heartening one. It must have raised his spirits and his confidence in the responsible students of our land. And just as importantly, those who watched or read about it know now that the great majority of students are not radicals at Kansas State. If they think about it they must realize that the same thing is true, with minor percentage changes, at other American universities.

The radicals have had their day in the public view. As the President said, now is the time for the others to stand up and be counted.

We think they'll do that very thing in the long run.

---

[From the Emporia Gazette, Sept. 18, 1970]

COMMENTS ON NIXON'S SPEECH

President Nixon's speech at Kansas State University drew comments from nearly every daily newspaper editor in the state this week. Most of the comments about the speech were favorable, but there were a few sour notes too.

Here is a sampling:

Topeka State Journal, "Just how accurate the President was when he warned that Americans may decrease their support of higher education undoubtedly will be demonstrated in legislatures throughout the land in upcoming sessions that will be considering appropriations for state colleges and universities."

Manhattan Mercury, "Although the occasion was primarily to deliver a lecture on the increasingly prestigious Landon Series in honor of the widely respected elder statesman and former governor, Alf M. Landon, the two other thrusts of the appearance cannot be ignored. Without any attempt to assign priority, they must be listed as: (1) a major attempt on the part of Nixon to establish better and more direct communications with the campus community, and (2) to work whatever political wonders possible for Republicans in Kansas . . ."

Russell Daily News, "Alf Landon remains Kansas' most deserving—and least recognized—citizen. And we believe it is time that the people join in a belated effort to see that this Kansan is, at last, duly honored."

Hutchinson News, "The show has become greater than the substance. In other words, it has become more newsworthy at such affairs these days to review the audience than to review the speaker's content, even when the speaker is the President of the United States . . ."

Wichita Eagle, "The President made statements that should be made, and by and large, students and faculty extended the courtesy and respect due the President of the United States, or any speaker for that matter . . ."

Iola Register, "We suspect (the students') response was a good deal more thoughtful than it was naive. We think it entirely possible that our young people, along with their elders, have had their bellies full of violence—either in word or deed—and are ready to applaud the condemnation of nihilism and anarchy . . ."

Lawrence Journal-World, "Unfortunately, Kansas University has been left far behind in this field, and only by asking some of the Kansas State Speakers to stop by Lawrence on their return trip from Manhattan to the Kansas City airport have school officials been able to corral several of the Kansas State speakers for an appearance at K. U."

Hays Daily News, "The Nixon administration billed the speech as nonpolitical. Hogwash. No President can speak without politics."

University Daily Kansan, ". . . The various Kansas politicos, who in this election year hunger for any campaign boost, all claimed some hand in finally securing that political Kewpie doll for their constituents. . . . If nothing else, Nixon's visit will have added to the prestige of Kansas and Kansas State University, but the ludicrousness of the situation has cast a rainy-day pall over whatever plaudits were gained from the presidential sortie."

Of course the Republican candidates in Kansas were glad to be seen with President Nixon when he came in for the speech at K. S. U. (So was Governor Robert Docking, no doubt.) But the Landon Lecture Series should not be branded as a partisan political rally. Other speakers in the series have included Robert Kennedy, Hubert Humphrey, Nelson Rockefeller, Bishop Fulton J. Sheen, and George Romney. Future speakers in the series will be Robert S. McNamara and Earl Warren.

That is hardly a list of conservative Republicans.

---

[From the Independence Daily Reporter, Sept. 17, 1970]

SHAMEFUL BEHAVIOR INEXCUSABLE

Kansans everywhere, with the obvious exception of the radical and liberal New Left, must have felt keenly embarrassed at the heckling by a minority of dissident Kansas State University students of President Richard M. Nixon when he spoke at Ahearn Field House on the K-State campus Wednesday. Ironically, the text of his address to kickoff the Landon Lecture Series honoring Alfred M. Landon, former governor, 1936 GOP presidential candidate and former citizen of Independence, was on the prevailing campus disorder in this county.

The overwhelming majority of the 16 thousand attending the event many times interrupted Nixon with thunderous applause. Only a handful of rebels high in the balcony frequently heckled the President with shouts of "End the War" with some obscenities and vulgarities thrown in for good measure, rising to give the clenched-fist salute of international communism and hoisting a banner reading "How many more will you kill?" The placard was hauled down and tossed away by plainsclothes security men.

Knowing of the dissident students' preoccupation with outrageous behavior, K-State authorities made an attempt to appease them by providing two areas on campus for the demonstrators to do their thing. Signs and banners were banned from the field house but were smuggled in any way by the radicals of the liberal New Left.

At one point Nixon departed from his text to acknowledge the cheers which had drowned out the handful of hecklers during his speech.

"My text reads: The voices of the small minority have been allowed to drown out the voices of the responsible majority," the President said at one point ignoring the sporadic heckling. "That may be true in some places, but not at Kansas State," he continued lifting his voice as the vast majority of the students and others attending gave him a standing ovation.

Nixon appropriately pointed out higher education in this country today is on trial as never before, fast losing that essential support it has had since the beginning of this country—"the support of the American people."

"It is time for responsible university and college administrators, faculty and student leaders to stand up and be counted. Only they can save higher education in America. To attempt to blame government for all the woes of the universities is to seek an excuse, not a reason for the troubles," the President said.

"If the Vietnam war were ended today, the environment cleaned up tomorrow and all

other problems in the realm of government responsibility were solved," Nixon said, "the moral and spiritual crisis in the universities would still exist."

Like the Communists and other subversives have done for years, the student radicals of the liberal New Left are using the United States Constitution to their advantage. They abuse the right to peaceably assemble and petition, and of free speech and press at every turn. The underprivileged perhaps could be excused for such disgraceful behavior but for others it is inexcusable. Even the collegiate press, both underground and otherwise, gets carried away with printing vulgarities and obscenities. The underground press might be overlooked on the basis it is not intended for general public consumption but for the weak, often drug-laden minds of the mental cripples. But the official campus publications can never be forgiven for their poor taste.

It is unfortunate the millions watching on nationwide, network television President Nixon's appearance in Kansas at Kansas State University Wednesday should be given such an unfavorable impression as the result of the outlandish behavior of a few who have no business being in any college or university as students in the first place.

But happily, the overwhelming majority did Kansas and Kansas State proud.

---

[From the Iola Register]

Emerson Lynn, in the Iola Register, agreed that Nixon had nothing new to say. But, said Lynn, "Such overwhelming student enthusiasm for a public official was new and must have surprised a good number across the nation.

". . . Does the K-State response mean the administration has won over the students, that campus violence is on the decline and that extremism—even in defense of the right—is a thing of past? Probably not. . . . We suspect (the) response was a good deal more thoughtful than it was naive . . . We think it entirely possible that our young people, along with their elders, have had their bellies full of violence . . . and are ready to applaud the condemnation of nihilism and anarchy . . . After going on an emotional binge which started about the time of President Kennedy's assassination, perhaps we are headed back to rationalism . . . (The) response was convincing and enormously encouraging. It was an hour full of promise for the nation."

---

[From the Parsons Sun, Sept. 17, 1970]

GOOD SHOW

President Nixon came to Kansas and staged a good show.

He put down a handful of student hecklers, real boors without the decency to display respect either for the office of the presidency or the man who currently occupies it.

It was a clean, quick knockout and really no contest at all. The microscopic minority at Manhattan was outmatched and outwitted. It would have done better to have stayed at home on Nixon's day in Kansas.

The President talked reason. No rational person can quarrel with his evaluation of violence and terror as practiced by a heedless few in our society. His homilies pleased the immediate audience and doubtlessly fell on receptive ears beyond.

Left unanswered is the status of relations between the President and the campus in general.

There is no doubt that Kansas State University is typical of Kansas. That's not the question. Rather it is whether Kansas is typical of the nation in its political and social attitudes, for plainly the state has been at odds with the majority for most of a generation.

The President came off well on a politically-antiseptic campus. He might not do as well among the ivy in other regions, which says something about the lack of political sophistication and wisdom of his young critics, however sincere their views.

Until and unless the student majorities succeed in disassociating themselves irrevocably from the unthinking few and send the motley street crowd packing, there will be political points to be made in labeling the campus as a festering source of iniquity.

Aroused public emotions will exceed the carefully-measured distinctions laid down by a President when they are pursued with more vigor and vinegar by lesser lights in the public arena.

Those on the campus, students and faculty alike, who wish to escape such a fate must learn there are several ways of skinning political cats and indeed the least effective route is by making one's self obnoxious and odious. Patience, a luxury they can afford because most have full lives ahead, can be one of the most useful tools.

If, as one suspects, the differences between the campus and the President center more on a personality conflict than on issues, all of this becomes doubly true because Mr. Nixon has succeeded in defusing some of the throbbing problems he inherited 20 months ago—all but economic, and it is of the least direct concern in affluent academic surroundings.

---

A GREAT WEEK FOR KANSAS

This was a great week for Kansas. On Wednesday, President Richard M. Nixon flew to Manhattan to speak at the Landon Lecture Series at Ahearn Fieldhouse at Kansas State University. Perhaps no event in history has reaped so much good publicity nor done so much for the image of Kansas and its youth. The President spoke on "Order in Our Society."

When a couple of dozen creepy kids who had no common courtesy for the office of the President nor the 15,500 who came to listen to the President began shouting, it was obvious they were really in the minority—by a ratio of about 500 to 1—and about as effective as a raindrop in the ocean. The response of the K-State students was overwhelming. With coverage on all three national television networks and a number of independent stations, the radio networks, and numerous big city daily newspapers from coast to coast, it was indeed a bright day in America and in Kansas—for clearly the K-State students supported the concept of working within the system to bring about change.

What impressed us was the response around the country. KSU President, Dr. James A. McCain, received telegrams from all over America applauding K-State and its students. In New York City the next day, I visited with several people. Everyone brought up the Nixon speech at K-State. They commented on the "good-looking students," the well-behaved, respectful crowd, and the enthusiasm. Indeed, all three major New York TV stations featured lengthy stories on the late evening newscasts and one New York station re-ran the entire speech Wednesday night. The NEW YORK TIMES was most complimentary of K-State and termed it Nixon's finest performance.

So . . . it was a great day for Kansas and especially Kansas State for it showed again that here in the heartland of America are the really great people of our country—the ones whose background and up-bringing give them a really fine understanding of what life in America is all about.

To the Kansas Congressional delegation—especially Bob Dole—a vote of thanks for urging the President to come to Kansas State.

To Kansas Governor Robert Docking—a salute for the non-partisan way in which he welcomed the President to Kansas.

To Alf Landon—thanks for giving K-State the vehicle through which it has been possible to attract men of great distinction to Kansas State.

But a special vote of thanks goes to K-State's President, Dr. James A. McCain. It was Dr. McCain who envisioned the Landon Lecture Series. His idea of having Governor Landon invite men of both parties to come to K-State has given Kansas State a *real* place in history.

Indeed . . . the Landon Lecture Series has made a great university even greater and on Wednesday showed America on national television that in Kansas . . . the people make the difference.

---

## DR. C. J. "SHORTY" ALDERSON

---

## HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. PICKLE. Mr. Speaker, probably every man in this body can think back upon his early years to some person who greatly shaped his thinking and his character. Dr. C. J. "Shorty" Alderson was just such a person for many young men in Texas.

Although he started out to be a lawyer, several generations of Texans knew Dr. Alderson best as a coach and as a teacher. His teaching spanned just about every phase of physical and health education known to man, and it is questionable if he had many peers at it.

He had a way with words such that many men now in their 60's can still recite pep talks he gave them as schoolboys. He had the knack of instilling in his young charges a fierce competitive spirit in line with the highest ideals of sportsmanship. Tough as nails, and never one to put on a show, he always attacked each situation with top enthusiasm and an amazing incisiveness that never failed to bring out the best in those he taught.

He was the University of Texas' first swimming coach, and it was there that I came under his tutelage. Swimming and water safety were among the many fields in which he was especially adept. One Austinite recalls that when he was 16 he was entered in the breaststroke in a city meet. He knew little about the event and called upon Dr. Alderson for some quick coaching. Alderson schooled him in the then-revolutionary butterfly stroke for just 1 hour, and the fellow ran away from the orthodox swimmers and took a whole second off the city record.

"Shorty" Alderson pursued knowledge with the same energy. During his lifetime he chalked up a bachelor of arts degree, a bachelor of law, and a masters in sociology at the University of Texas, and a masters in physical education and a doctorate in the same field at Columbia. At last count, over a decade ago, he had at least 388 hours of university credit.

He has had a great impact on college football rules in an advisory capacity. He officiated at well over 800 football games, and whenever some discrepancy or need for clarification arose, the chairman of the rules committee was sure to hear from him.

He had the knack of bridging the so-called generation gap, a knack which lasted all his long life. And despite his age and position as professor emeritus at the University of Texas, he was still going at top speed until the final day of his life, earlier this month, when a heart attack and car accident combined to stop him at the age of 82.

Mr. Speaker, Dr. Alderson is gone, but, as is the case in the finest of teachers, the energy, the competitive spirit, and the high ideals of this man have been passed on to countless younger men.

I pause today before my colleagues of this great legislative body to honor him, and I include an eloquent article by Lou Maysel in the Austin-American in the RECORD. It is as follows:

ALDERSON'S LIFE UNBELIEVABLY FULL

Wednesday would have been his wedding anniversary, but the day was a sad one. Instead of celebrating the date with him, his friends attended his funeral.

Saddened though they were by his death, friends of Dr. C. J. "Shorty" Alderson all speak in wonderment of the full and rich life he lived before a heart attack and car accident claimed him a few weeks short of his 82nd birthday.

Alderson's diverse attainments and posts he's held are such that they boggle the mind. They would seem to be the accumulation of three lifetimes, or more.

And despite his age and position as professor emeritus of the department of physical and health education at the University of Texas, he was still whirling like a dervish until his final day of life.

"I'm busier since I've retired than I was when I was teaching," Alderson told a friend recently.

Alderson's teaching spanned just about every phase of physical and health education known to man, and it's questionable if he had many peers at it.

Alderson had a way of bridging the so-called generation gap, and two of his one-time pupils put him up as the best teacher they ever had.

"I think I took every course he taught at the University because he, in my estimation, was the greatest teacher I've had," said Bobby McLean, who is principal at both Andrews and Winn Elementary Schools.

"There's no question about that. He was the greatest teacher of any person I've ever had teach me anything," claims Tex Mayhall, the owner of a local hearing-aid firm. Mayhall's statement wasn't prompted by any thoughts of eulogy. It's one he's voiced to this listener before.

HIS PHYSICAL VIGOR WAS AMAZING

Clyde Littlefield, under whom Alderson served as freshman football and track coach from 1927–34, speaks of him the same way.

"He was a great instructor," Littlefield said. "Why, he even taught dancing."

Not only taught it, but he was ready to dance all night, especially if it was good old-fashioned square dancing. Tales of his physical vigor may sound exaggerated, but McLean and Mayhall, both over 30 years his junior, claim they aren't.

"I've talked to folks who lived around him, and nobody cut his grass or weeded his yard but him," McLean said.

Mayhall recalls seeing Alderson, who learned the blacksmith's trade as a youngster at Hillsboro, chop down eight- and 10-inch trees with a couple of swings with his own well-sharpened axe after he was 70. And only a few years ago Alderson came out to Mayhall's place and put on an amazing bit of horsemanship.

The time finally came a few years back for Alderson to give up active football officiating. During his long career at it, he handled well over 800 games. The exact count isn't available, but you can bet Alderson knew exactly how many it was.

His last game was thought to have been a Blinn Junior College-Southwest Texas State B-team game at Brenham in which he was involved in an embarrassing episode. SWT had a quarterback who was slick at running the belly series and when he ran the play on one occasion, the referee blew his whistle when the fullback got stopped.

Up stepped Alderson, who was the umpire, and while he was reaching into the pileup for the ball, there was the quarterback scooting around end for a touchdown that had to be called back.

HIGHLY REGARDED AS RULES EXPERT

Despite that one unhappy play, Alderson was held in high regard in the football officiating game, both as a rules expert and a tutor and supervisor of officials. This latter capacity is one in which he would have served again this fall with the Austin chapter of the football officials.

He also has had an impact on the college rules in an advisory capacity through the years, and whenever some discrepancy or need for clarification arose, the chairman of the rules committee was sure to hear from Alderson.

His work with football rules also included helping to write the original rules for six-man football in 1937 and helping write touch football rules for women at UT.

Alderson came to the University of Texas in 1912 to study law already branded with his nickname, which was placed on him by someone when he was playing shortstop for Hillsboro High School.

Alderson followed through on that goal and started to practice law after getting his degree in 1922. But business was slow and he went to Calvert as an intermediate grades principal and coach of all sports.

He returned to Austin as a junior high instructor the following year and continued what is an amazing academic record. In addition to degrees in bachelor of arts, law and masters in sociology at UT, he added a master's in physical education and a doctor's in the same field at Columbia.

During his pursuit for knowledge, he at one time had 388 hours of university credit. That count, however, is at least a decade old and the figure may have gone higher.

HE WAS MAN OF MANY, VARIED WORDS

The declamation champion at UT in 1914, Alderson had a way with words of all kinds.

"He had a great command of English words, including cuss words," McLean recalled. McLean claims he enjoyed drawing Alderson out because Shorty was so great at putting him down.

"I saw you in the cradle two hours after you were born," Alderson liked to tell McLean. "You were red and wrinkly and you haven't improved a bit in looks in 45 years. You're still as ugly as you were then."

It was all in jest, of course. Alderson actually was a very gracious and courtly person, but he didn't affect many airs.

Billy Gilstrap, then a UT assistant football coach, remembers the time he had a prospect visiting. He took the prospect around to visit some professors and when he spotted Alderson's car outside his house, Gilstrap decided to include him on the tour.

Alderson shouted down the stairs for Gilstrap to come on up. There was Alderson buck naked lying on his bed reading.

When he saw Gilstrap had company, he jumped up and shook hands warmly with the prospect and his father but never once made a move to put on any clothing. Needless to say, the prospect was impressed—and not unfavorably since he came to Texas.

LIFE DEVOTED TO WORKING WITH YOUNG

Littlefield, Mayhall and McLean all speak of Alderson's dedication of his life to working with young people. He obviously had contact with many through his teaching and coaching, which included a stint as UT's first swimming coach in 1932–34.

Swimming and water safety were among the many fields in which he was especially adept. McLean recalls when he was 16 he was entered in the breaststroke in a city interparks meet. He knew little about the event and called upon Alderson for some quick coaching.

Alderson schooled him in the then-revolutionary butterfly stroke for an hour and McLean ran away from the orthodox breaststrokers and took a whole second off the city record.

Mayhall recalls vividly his first association with Alderson when he was a struggling football aspirant with the lowly Austin High Goldshirts. Alderson once stopped practice and shouted, "Damn it, that's the way to do it, Mayhall!"

Alderson didn't stop with that. He turned the interlude into a pep talk that made such a vivid impression on Mayhall he can recite practically all of it today.

Alderson's friends figured he would be a life-long bachelor, but he fooled them. Finally in 1959 at the age of 70, after retiring from the University, he took himself a bride—Dr. Mary E. Buice, an assistant professor of physical and health education.

McLean and Mayhall served as the ushers but Alderson had no best man. When the apparent oversight was called to his attention, he told them, "There ain't no better man than me."

And though he was kidding, he may have been right.

---

## PRISONER OF WAR WEEK

---

## HON. JAMES G. FULTON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 24, 1970*

Mr. FULTON of Pennsylvania. Mr. Speaker, it is a pleasure to place in the RECORD this excellent proclamation by the Governor of the Commonwealth of Pennsylvania, Raymond P. Shafer, to set aside September 27 to October 3, 1970, as "Prisoner of War Week," a time for further and renewed reflection, prayer, and action on behalf of our captured servicemen in Southeast Asia.

The special designation of this week has come about through the good work of a particularly courageous and devoted organization of our citizens, the National League of Families of American Prisoners in Southeast Asia. On Tuesday, September 22, I was privileged to welcome several western Pennsylvania members of the league in my Washington office for extensive discussion of the plight of our American prisoners of war. Since I have maintained a sustained and active interest in the situation of our U.S. prisoners of war, as a U.S. Congressman and former U.S. Navy serviceman, I heartily commend action on all levels of government showing such concern.

Governor Shafer's proclamation follows:

PRISONER OF WAR WEEK: SEPTEMBER 27–OCTOBER 3, 1970

It is a matter of deep concern to every citizen of Pennsylvania and of the United States that our American Servicemen who are prisoners of war in Southeast Asia are not treated in the true spirit of the Geneva Convention.

The National League of Families of American Prisoners in Southeast Asia are setting aside September 27–October 3, 1970, as a week during which all citizens are urged to pay special tribute to those brave men who, in the service of their County, are known to be in the hands of the enemy or missing in action.

All officials in our cities and municipalities are asked to join their fellow citizens in demanding that the government of North Viet Nam abide by the provisions of the Geneva Convention of 1954 and to: provide the United States Government with a complete list of all American prisoners; release the sick and wounded; see that all prisoners receive a proper diet and medical care; allow impartial inspection to be made of all prison facilities and permit a free flow of mail between the prisoners and their families.

Therefore, I, Raymond P. Shafer, Governor of the Commonwealth of Pennsylvania, do hereby proclaim September 27-October 3, 1970, as Prisoner of War Week in Pennsylvania, and urge all citizens to cooperate in this worthy effort to persuade Hanoi that these men are remembered by their fellow citizens. Furthermore, I urge that special prayers be offered in all churches and synagogues during this week in behalf of these brave men and their families.

Given under my hand and the Great Seal of the State, at the City of Harrisburg, this third day of September, in the year of our Lord one thousand nine hundred and seventy, and of the Commonwealth the one hundred and ninety-fifth.

RAYMOND P. SHAFER,
*Governor.*

# HOUSE OF REPRESENTATIVES—*Monday, September 28, 1970*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

*We are laborers together with God.* 1 Corinthians 3: 9.

O Lord, our God, we thank Thee for the gift of another day and pray that through all its hours we may live with Thee as we labor for the life of this land of liberty. Strengthen us that we may stand steady in this shaken world and amid constant change keep our faith firm with a growing trust and a deepening confidence.

Deliver us from petty concerns about ourselves, place us in the center of great needs, and open our hearts to all that we may share the glory of our human endeavors and the goal of our human energies. Reveal the heights above us that we may be mindful of Thy presence in the common routine of daily living and so bless us that we may work with integrity for the good of our fellow men. Let the gentle power of the Great Spirit be our strength in all we think and say and do; for Thine is the kingdom and the power and the glory forever. Amen.

## THE JOURNAL

The Journal of the proceedings of Thursday, September 24, 1970, was read and approved.

## MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Leonard, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and a joint resolution of the House of the following titles:

On September 22, 1970:

H.R. 18725. An act to establish a Commission on the Organization of the Government of the District of Columbia and to provide for a Delegate to the House of Representatives from the District of Columbia.

On September 23, 1970:

H.R. 16539. An act to amend the National Aeronautics and Space Act of 1958 to provide that the Secretary of Transportation shall be a member of the National Aeronautics and Space Council.

On September 25, 1970:

H.R. 11060. An act for the relief of Victor L. Ashley;

H.R. 16968. An act to increase the contribution by the Federal Government to the cost of health benefits insurance, and for other purposes;

H.R. 17613. An act to provide for the designation of the Veterans' Administration facility at Bonham, Tex.; and

H.J. Res. 1247. Joint resolution to amend section 19(e) of the Securities Exchange Act of 1934.

## MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 1366. Joint resolution to provide for the temporary extension of the Federal Housing Administration's insurance authority.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills and a joint resolution of the House of the following titles:

H.R. 370. An act to amend chapter 39 of title 39, United States Code, to increase the amount allowed for the purchase of specially equipped automobiles for disabled veterans, and to extend benefits under such chapter to certain persons on active duty;

H.R. 12807. An act to amend the Act of February 11, 1903, commonly known as the Expediting Act, and for other purposes;

H.R. 16710. An act to amend chapter 37 of title 38, United States Code, to remove the time limitation on the use of entitlement to loan benefits, to authorize guaranteed and direct loans for the purchase of mobile homes, to authorize direct loans for certain disabled veterans, and for other purposes; and

H.J. Res. 236. Joint resolution authorizing and requesting the President of the United States to issue a proclamation designating the week of August 1 through August 7 as "National Clown Week."

The message also announced that the Senate had passed bills, joint resolutions, and concurrent resolutions of the following titles, in which the concurrence of the House is requested:

S. 708. An act for the relief of Lawrence J. Nunes;

S. 3657. An act to amend chapters 31, 34, 35, and 36 of title 38, United States Code, in order to make improvements in the vocational rehabilitation and educational programs under such chapters; to authorize an advance initial payment and prepayment of the educational assistance allowance to eligible veterans and persons pursuing a program of education under chapters 34 and 35 of such title; to establish a work-study program and work-study additional educational assistance allowance for certain eligible veterans; and for other purposes;

S. 3785. An act to amend title 38, United States Code, to authorize educational assistance to wives and children, and home loan benefits to wives of members of the Armed Forces who are missing in action, captured by a hostile force, or interned by a foreign government or power;

S. 4368. An act to extend and amend laws relating to housing and urban development, and for other purposes;

S.J. Res. 236. Joint resolution authorizing the preparation and printing of a revised edition of the Constitution of the United States of America—Analysis and Interpretation, of decennial revised editions thereof, and of biennial cumulative supplements to such revised editions; and

S. Con. Res. 81. Concurrent resolution authorizing the printing of additional copies of Senate hearings on Copyright Law Revision (S. 591, Ninetieth Congress).

## PRESIDENT'S COMMISSION ON CAMPUS VIOLENCE

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, this past weekend the people of America were exposed to the report of the President's Commission on Campus Violence. I have read the summary and analyses of the report by various columnists. I also heard the report discussed by three of the Commission members on national television yesterday.

Mr. Speaker, this report is about as useful as a fur coat on the equator. It appears to be a 300-page plus example of mediocrity and whitewash. There is no telling how much of the taxpayers' money was spent for this Commission to run around the country for 3 months to become so-called experts on campus violence. Judging from public statements made by some of the Commission members, I would say they had already reached their final conclusions the day they were appointed.

I hope President Nixon will accord the Commission report its proper status by placing it in file 13.

## ANOTHER CUBAN CRISIS

(Mr. SIKES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIKES. Mr. Speaker, another crisis which may be just as ominous as the one involving Russian missiles has now been uncovered. The development of a naval base in Cuba, which is intended as an operating facility for Rus-

sian submarines, requires immediate and forceful action by the U.S. Government.

Missiles are dangerous, but so are submarines, and submarines can escape scrutiny and can be a threat for long periods to a much broader segment of the United States. Submarines are equally a threat to surface shipping and to our own submarine fleet. We learned during World War II that submarine bases are extremely difficult to knock out. From every standpoint we are confronted with a dangerous situation which America dares not ignore. It is time to insist upon the strongest protests from the U.S. Government and we should make it clear that we are prepared to take sterner measures if they are required.

We have known about the potential for the development of a submarine base in Cuba for years. Undoubtedly the Russians have bided their time and they now feel that the agitation in this country for peace at any price in Southeast Asia will also cause our Government to mute vigorous protests against the Russian action in Cuba. This must not be the case. If a Russian submarine base right under our nose in the Western Hemisphere becomes an actuality, the Russians will have accomplished more to isolate the United States defensively and diplomatically than by any other single action of the decade.

## THE PITTSBURGH PIRATES CLINCH EASTERN DIVISION CHAMPIONSHIP

(Mr. MOORHEAD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORHEAD. Mr. Speaker, over this past weekend an event of great national importance took place in the 14th Congressional District. The Pittsburgh Pirates, playing with great skill and courage under the leadership of Manager Danny Murtaugh in their new Three Rivers Stadium, clinched the Eastern Division championship in the National Basebal League. Ten years ago, under the same leadership, the Pirates became the world champions, and I am confident that they are going to repeat that this year. I am sure that the gentleman from North Carolina (Mr. MIZELL), a great member of that 1960 team, joins me in saying to the 1970 team—"Beat 'em Bucs."

## WHO IS SITTING ON CRIME BILLS?

(Mr. DEVINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DEVINE. Mr. Speaker, when is the majority party going to show the same concern about killings in America that they are showing about battle deaths in Vietnam? I note that the Democrats are busy participating in all kinds of rallies to end the war—but at the same time they are sitting on President Nixon's anticrime package that would help end the killing on America's streets.

Last week, there were 52 casualties in the war in Vietnam. An average of 280 murders are committed in the United States each week—some 14,590 during 1969—with FBI statistics indicating that crime is continuing to increase. The American people deserve an all-out war on crime here at home to make our streets safer, to end the fear and terror that stalks the land.

President Nixon is winding down the war in Vietnam. He has sought to wind up the war on crime here at home. But, despite a recent flurry of activity due to members of our party and the President putting the spotlight on our horrendous crime problem, the major portion of the President's anticrime legislation has not been acted on over the past year and one-half while murder, rape, robbery, and assaults continue in our streets.

I note that the leadership of the majority party has announced a lameduck session and a slowdown on legislation—if that is possible. Perhaps the 91st will go down in history as the zombie Congress—meanwhile, crime marches on.

## COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
*September 28, 1970.*

The Honorable the SPEAKER,
*U.S. House of Representatives.*

DEAR SIR: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 12:05 p.m. on Friday, September 25, 1970, said to contain a message from the President wherein he transmits to the Congress the second annual report of the Radiation Control for Health and Safety Act of 1968 (P.L. 90–602).

With kind regards, I am,
Sincerely,

W. PAT JENNINGS,
*Clerk, U.S. House of Representatives.*

## SECOND ANNUAL REPORT OF RADIATION CONTROL FOR HEALTH AND SAFETY ACT OF 1968—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 91–390)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Interstate and Foreign Commerce and ordered to be printed:

*To the Congress of the United States:*

In accordance with Section 360D of the Radiation Control for Health and Safety Act of 1968 (Public Law 90–602), I am herewith transmitting to you the second annual report on the administration of this Act.

This report was prepared by the Environmental Health Service of the Department of Health, Education, and Welfare.

RICHARD NIXON.

THE WHITE HOUSE, *September 25, 1970.*

## REPORT ON SALARIES OF OFFICERS AND EMPLOYEES OF ORGANIZATIONS FUNDED UNDER ECONOMIC OPPORTUNITY ACT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 91–391)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Education and Labor and ordered to be printed:

*To the Congress of the United States:*

I hereby submit the report on salaries of officers and employees of organizations funded under the Economic Opportunity Act that is required by Section 610–1(b) of the Economic Opportunity Act as amended in 1966. The report was prepared by the Office of Economic Opportunity and covers the fiscal year that ended on June 30, 1970.

RICHARD NIXON.

THE WHITE HOUSE, *September 28, 1970.*

## CONFERENCE REPORT ON S. 2264, COMMUNICABLE DISEASE CONTROL AMENDMENTS OF 1970

Mr. STAGGERS. Mr. Speaker, I call up the conference report on the bill (S. 2264) to amend the Public Health Service Act to provide authorization for grants for communicable disease control and vaccination assistance, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of September 23, 1970.)

The SPEAKER. The gentleman from West Virginia is recognized for 1 hour.

## CALL OF THE HOUSE

Mr. HALL. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 316]

| | | |
|---|---|---|
| Adair | Bolling | Chisholm |
| Adams | Bow | Clark |
| Anderson, Calif. | Brasco | Clay |
| Andrews, N. Dak. | Bray | Conyers |
| Aspinall | Brock | Cramer |
| Beall, Md. | Brooks | Crane |
| Betts | Buchanan | Daddario |
| Biaggi | Burton, Utah | Dawson |
| Biester | Bush | de la Garza |
| Blackburn | Button | Dennis |

| Kazen | Pirnie | Wilson, Bob |
| Keith | Podell | Wold |
| Kleppe | Powell | Wright |
| Landgrebe | Pryor, Ark. | Zablocki |
| Landrum | Purcell | Zwach |

The SPEAKER. On this rollcall 286 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

## APPOINTMENT OF CONFEREES ON H.R. 6778, AMENDING BANK HOLDING COMPANY ACT OF 1956

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6778) to amend the Bank Holding Company Act of 1956, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. GROSS. Mr. Speaker, reserving the right to object, may I ask the gentleman from Texas if this bill has anything to do with secret bank accounts in foreign countries, legislation about which has been approved by the House?

Mr. PATMAN. No, but we have the same request for it after this request.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection, and I thank the gentleman from Texas.

The SPEAKER. Is there objection to the request of the gentleman from Texas? The Chair hears none, and appoints the following conferees: Messrs. PATMAN and BARRETT, Mrs. SULLIVAN, and Messrs. REUSS, WIDNALL, JOHNSON of Pennsylvania, and STANTON.

## REQUEST FOR APPOINTMENT OF CONFEREES ON H.R. 15073, AMENDING FEDERAL DEPOSIT INSURANCE ACT

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 15073) to amend the Federal Deposit Insurance Act to require insured banks to maintain certain records, to require that certain transactions in U.S. currency be reported to the Department of the Treasury, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. GROSS. Mr. Speaker, reserving the right to object, let me ask the gentleman if this bill carries two or three amendments added by the Senate that are totally ungermane?

Mr. PATMAN. Mr. Speaker, I am not familiar with the amendments, but I understand there were three amendments attached to the bill.

Mr. GROSS. Mr. Speaker, I object.

Mr. PATMAN. Mr. Speaker, will the gentleman from Iowa withhold the objection for a moment?

Mr. GROSS. Mr. Speaker, I will withhold the objection.

Mr. PATMAN. Mr. Speaker, may I suggest that the three amendments, although they are not related, the Senate has the right under the rules to attach them, under a rule which I do not necessarily approve of, including the urban mass transit bill and two other bills.

Of course, the House position always has been to respect the rules and to not recognize the right of the other body to attach unrelated matters. This will have to be ironed out in conference.

Mr. GROSS. In the absence of a rule to the contrary, the other body has every right to do anything it wants with a bill sent to it by the House. Under the rules of the House, we must deal with germane amendments.

I am left no other recourse but to make it as difficult as possible, so long as these three nongermane amendments are attached to this bill, to put it through the House. It is high time the House spent some time in an effort to head off the other body from sending bills here with not one but a multiplicity of ungermane amendments.

Mr. Speaker, I do object.

The SPEAKER. Objection is heard.

## CONFERENCE REPORT ON S. 2264, COMMUNICABLE DISEASE CONTROL AMENDMENTS OF 1970

The SPEAKER. The gentleman from West Virginia (Mr. STAGGERS), is recognized for 1 hour on the conference report.

Mr. STAGGERS. Mr. Speaker, I yield myself such time as I may consume.

This conference report covers the Communicable Disease Control Amendments of 1970, the bill which passed the House by a rollcall vote of 312 to 1 on September 10.

We went to conference with the Senate, and after some consultation with the Senate they finally agreed to accept the House version of the bill in every respect, so we bring back to the House the exact bill which was passed by the House on September 10 by an overwhelming majority.

I do not believe I need to explain the bill, for it was explained very well at that time. The vote showed that it certainly met with the approval of the Members of the House.

At this time, Mr. Speaker, I want to pay tribute to a group of men who have worked hard for the betterment of the health of America—the members of our Subcommittee on Public Health and Welfare.

I refer particularly to the gentleman from Oklahoma (Mr. JARMAN), who is the chairman of the Subcommittee on Public Health and Welfare; and also to the gentleman from Florida (Mr. ROGERS); to the gentleman from Virginia (Mr. SATTERFIELD); to the gentleman from Maine (Mr. KYROS); to the gentleman from North Carolina (Mr. PREYER); to the gentleman from Minnesota (Mr. NELSEN); to the gentleman from Kentucky (Mr. CARTER); to the gentleman from Kansas (Mr. SKUBITZ); and to the gentleman from New York (Mr. HASTINGS).

These gentlemen have worked as hard as I have ever seen any subcommittee work in the Congress of the United States during my 22 years as a Member of this House. They have been in almost continuous session day after day working on health bills which affect all America. They have brought many good and great bills to the floor for the betterment of the health of the people of this land.

Mr. Speaker, during this Congress this subcommittee has held hearings covering hundreds of bills. Among the measures which they have considered which have passed the House are the drug legislation (H.R. 18583) which just passed the House last week, on which they held 11 days of hearings and 37 executive sessions morning, afternoon, and night. We have in conference now six measures from that subcommittee, S. 3586 relating to the training of allied health professionals: H.R. 18110 covering comprehensive health planning; H.R. 17570, the heart disease, cancer, stroke, and kidney disease amendments; and S. 2846, developmental disabilities services and facilities; H.R. 17255, the clear air amendment of 1970, as well as S. 2005, the Resource Recovery Act of 1970.

In addition, they have reported numerous other measures to the House, such as H.R. 10138, Public Health Service commissioned officer retirement benefits; H.R. 11102, the Hill-Burton Act extension; H.R. 11702, providing assistance to medical libraries; H.R. 14086, the community mental health centers amendments; H.R. 13448 providing for exchange of the Public Health Service Hospital at New Orleans; H.R. 15961, licensing of biological products; H.R. 14733, extending the agricultural migrant workers health programs; and H.R. 14790, providing for formula grants to schools of public health.

The subcommittee has also held oversight hearings covering the Food and Drug Administration; nutrition problems; and radiation safety standards. Their record is one of which each member of that subcommittee can justly be proud.

I should like to say that I, for one, appreciate the work they have done, and

I am sure every Member of the House does also. I am certain that every American would be grateful to them, if they knew of the work they had done. The bipartisan, or I should rather say nonpartisan, way it has worked has also been outstanding. On the drug bill (H.R. 18583), the members disagreed on only one item—no-knock. Otherwise, every bill reported from that subcommittee has been unanimously reported, with the unanimous support of the subcommittee members for every provision in the bill.

I just want to pay tribute to this subcommittee for the great work it has done.

Mr. Speaker, to return to the conference report before us, this is the same bill as the one which passed the House on September 10. I recommend that the conference report be agreed to by the House.

Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. SPRINGER).

Mr. SPRINGER. Mr. Speaker, the conference report which comes back today for a vote is the House version of the bill. There have been no changes in the conference at all. For those who have asked me about this, I want to explain that this is the House version which comes back from conference, and it is the House bill.

The Senate has not asked for nor imposed any amendments on the bill, and for that reason you have before you the same bill which you voted on in August.

Mr. PRICE of Illinois. Mr. Speaker, communicable disease remains a problem although it is not beyond our resources to control. We have the medical knowledge to eliminate many of the contagious diseases that still plague the health of the Nation. It is our responsibility to put this knowledge to use by approving the pending bill authorizing a 3-year program of project grants to State and local governments.

History has shown the dramatic role Government funds can play in combatting disease. Between 1955 and 1957, Government assistance radically reduced the incidence of polio, but after the cutback in Federal aid in 1957, polio epidemics once again occurred. This clearly evidences the value of large-scale Government financing in this area.

I find it quite distressing that while both measles and German measles can be prevented with the use of a vaccine, the number of cases of measles is increasing yearly and a major German measles epidemic has been predicted for 1970–71. Even more distressing, however, is the fact that the incidence of venereal disease has been steadily increasing for years, and as yet there are no grant funds specifically for the control of gonorrhea.

It is evident, therefore, that control programs in many areas have recently been underfunded or even nonexistent. There can be no doubt then as to the value of this legislation. As stated, the purpose of the bill before us is to authorize appropriations for a communicable disease control program designed so as to contribute to national protection against diseases that are susceptible to vaccination or to control programs. Communicable diseases are a needless threat. This bill, if passed, will provide the means for their control. I, therefore, urge the adoption of H.R. 11913.

Mr. STAGGERS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on the conference report.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ROGERS of Florida. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas, 292, nays 2, not voting 135, as follows:

[Roll No. 317]

Mr. Miller of California with Mr. Gubser.
Mr. Olsen with Mr. Johnson of Pennsylvania.
Mr. Galifianakis with Mr. Brock.
Mr. Edwards of Louisiana with Mr. Foreman.
Mr. Cabell with Mr. Zwach.
Mr. Casey with Mr. Rousselot.
Mr. Aspinall with Mr. Weicher.
Mr. Murphy of New York with Mr. Mize.
Mr. Nedzi with Mr. Minshall.
Mr. Purcell with Mr. Blackburn.
Mr. Griffin with Mr. Esch.
Mr. Fulton of Tennessee with Mr. Teague of California.
Mr. Fisher with Mr. Snyder.
Mr. Tunney with Mr. Conyers.
Mr. McCarthy with Mr. Powell.
Mr. Lowenstein with Mr. Diggs.
Mr. Pucinski with Mr. Nix.
Mr. Rees with Mrs. Chisholm.
Mr. Anderson of California with Bob Wilson.
Mr. Adams with Mr. Burton of Utah.
Mr. Celler with Mr. Betts.
Mr. Hagan with Mr. Dennis.
Mr. Dent with Mr. Adair.
Mr. Friedel with Mr. Beall of Maryland.
Mr. Stubblefield with Mr. Andrews of North Dakota.
Mr. Green of Pennsylvania with Mr. Fish.
Mr. Hathaway with Mr. Bow.
Mr. Gettys with Mr. Bray.
Mr. Gallagher with Mr. Sandman.
Mr. Moss with Mr. Reid of New York.
Mr. Minish with Mr. Halpern.
Mr. Henderson with Mr. Thompson of Georgia.
Mr. Watts with Mr. Michel.
Mr. Wright with Mr. Landgrebe.
Mr. Zablocki with Mr. Buchanan.
Mr. Leggett with Mr. Talcott.
Mr. Biaggi with Mr. Martin of Nebraska.
Mr. Boland with Mr. Schadeberg.
Mr. Helstoski with Mr. Hastings.
Mr. Dulski with Mr. Mathias.
Mr. Rosenthal with Mr. Stokes.
Mr. Gray with Mr. Cederberg.
Mr. Stephens with Mr. McClure.
Mr. Stratton with Mr. Button.
Mrs. Hansen of Washington with Mr. Symington.
Mr. Melcher with Mr. Meeds.
Mr. Udall with Mr. Podell.
Mr. Roe with Mr. Shipley.
Mr. William D. Ford with Mr. Feighan.
Mr. Mollohan with Mr. de la Garza.
Mr. Hungate with Mr. Kazen.
Mr. Farbstein with Mr. Dawson.
Mr. Landrum with Mr. Scheuer.

The result of the vote was announced as above recorded.

The doors were opened.

A motion to reconsider was laid on the table.

---

## CONFERENCE REPORT ON S. 3558, PUBLIC BROADCASTING FINANCING ACT OF 1970

Mr. STAGGERS. Mr. Speaker, I call up the conference report on the bill (S. 3558) to amend the Communications Act of 1934 to provide continued financing for the Corporation for Public Broadcasting, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of September 23, 1970.)

Mr. STAGGERS (during the reading). Mr. Speaker, I ask unanimous consent that the statement of the managers be considered as read.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The SPEAKER. The gentleman from West Virginia is recognized for 1 hour.

Mr. STAGGERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, under the conference report on S. 3558 appropriations are authorized for the Corporation for Public Broadcasting for fiscal years 1971 and 1972. For each year, an outright appropriation of not more than $30 million is authorized. Not more than $5 million is additionally authorized each year to match grants, donations, bequests, and other contributions to the Corporation from non-Federal sources.

The issues between the two Houses were simple and clear cut, so I shall not take much time discussing trem.

The Senate passed a 3-year open end authorization for the Corporation and added a provision requiring public broadcast stations receiving grants from the Corporation to keep records of their programs involving controversial issues of public importance. I should note that the administration requested the 3-year open end authorization for the Corporation.

We on the committee have been disturbed about the delay in getting up a permanent plan for financing the Corporation. We also have a policy against open end authorizations. So we cut the authorization down to 1 year, fiscal year 1971, so that we could maintain closer oversight of the progress in getting up a permanent financing plan for the Corporation. Our appropriation ceiling for 1971 has been adopted for both years covered by the conference report.

The provisions in the Senate bill requiring recordings and other records were not the subject of hearings in either House. Those provisions are not included in the conference report. The conferees agreed however, that there should be hearings in the next session on legislation requiring all broadcast stations to keep recordings of their programs involving controversial issues of public importance. I am having such legislation prepared for introduction.

Mr. Speaker, this is a good conference report and I trust that it will be adopted by the House.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I am happy to yield to the gentleman from Iowa.

Mr. GROSS. I regret, I must say to the gentleman, that the House capitulated to the other body on the extension of 1 year. Quite a point was made, as I recall, when the bill was before the House, that the House committee would review this program next year. To extend it another year will not be helpful in that respect.

In other words, the adoption of this conference report means it will go on for an addtional year, with perhaps not too much scrutiny. I regret to see that the additional 1-year extension was given.

Mr. STAGGERS. If the gentleman will permit me to explain, we are well into the present fiscal year and if the authorization were not for 2 fiscal years we would be right back working on another authorization for CPB at the start of next year instead of looking into the question of a permanent plan for financing the Corporation. This provision will give us a little time.

We were very adamant in refusing to go over to 3 years. This will give the administration a little more time to come up with its suggestions for a permanent plan for financing the Corporation. We did close the open-end authorization.

We believe the conference report is a good compromise, and about the best we could do with the Senate under the circumstances.

Mr. BROYHILL of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield such time as he may consume to the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL of North Carolina. I thank the gentleman for yielding.

Mr. Speaker, I want to reiterate what the chairman already has said, that this is essentially the same bill that passed the House of Representatives recently.

The other body, of course, was insistent on having 3 years, and they did make the point to us that we would have to be right back in here in January or February to hold hearings on the program again, and that another year would give us some more time. For that reason we did compromise on this particular point.

This is a good program and I believe we should continue it. We will soon be looking into this program again. We will be holding hearings on it either late next year or early the following year. I am sure all the members of the subcommittee and of the committee will be looking over the program, and talking to those who are responsible for it in the administration. We will be having conferences and talking to those who have the responsibility for running the program; that is, the Public Broadcasting Corporation.

We are going to be keeping a very close eye on the program as a whole.

I urge my colleagues to support the conference report.

Mr. STAGGERS. I thank the gentleman from North Carolina (Mr. BROYHILL). He has been very helpful, as were all of the conferees, in working out the compromise. Particularly the chairman of the Subcommittee on Communication and Power of our committee, the gentleman from Massachusetts (Mr. MACDONALD).

At this time, Mr. Speaker, I would like to compliment that subcommittee. They have worked exceedingly hard on many bills during this Congress under their very able chairman.

They are: the gentleman from Massachusetts (Mr. MACDONALD), the chairman of the subcommittee; the gentleman from California (Mr. VAN DEERLIN); the gentleman from Pennsylvania (Mr. ROONEY); the gentleman from New York (Mr. OTTINGER); the gentleman from Rhode Island (Mr. TIERNAN); the gentleman from North Carolina (Mr. BROYHILL); the gentleman from Michigan (Mr. HARVEY); the gentleman from Colo-

rado (Mr. BROTZMAN); and the gentleman from Ohio (Mr. BROWN).

I compliment each of those gentlemen for the job he has done on this subcommittee. It has been hard work and time-consuming, but they have worked right along without pause or complaint. I want to give them my thanks, and I think each Member of the House owes them a vote of thanks, also, for the work they have done.

At this time, Mr. Speaker, I yield to the chairman of the subcommittee, the gentleman from Massachusetts (Mr. MACDONALD).

Mr. MACDONALD of Massachusetts. Mr. Speaker, I thank the chairman for the very gracious remarks he has made concerning our subcommittee.

Without taking much more time of the body, I would just like to say that because we receded a little bit on the time for the financing of this program, the permanent financing aspect of the bill, only means that the subcommittee, and I am sure the full committee, will be very diligent in overseeing that a permanent financing program that the gentleman from Iowa (Mr. GROSS) suggested should be undertaken. The subcommittee feels that the gentleman is very accurate in his statement. The full committee also feels so. We compromised only because there would be a difference of maybe 6 or 7 months before the program came up again. I can assure the gentleman from Iowa that we are going to be very diligent in seeing to it that a reasonable type of permanent financing is advanced both by the Corporation and by the administration.

The conference report before us today, on the bill S. 3558, extension of financing for the Corporation for Public Broadcasting, will permit continuation of the Corporation's successful program of aid to local educational broadcasting systems.

The Corporation was established by the Public Broadcasting Act of 1967, and under the initial concept operating funds for the first years of operations have been provided by direct appropriations in slowing increasing amounts. The initial concept also called for the development of a system of permanent financing that would provide Federal funds without dependence on the annual appropriation process. This remains the intent of the Committee on Interstate and Foreign Commerce, the Congress, and the other governmental bodies involved in the creation and support of the public broadcasting system.

The objective of a long-range financing plan is to provide insulation from direct or indirect political pressures, however well intended, that might compromise the Corporation's programing in the minds of viewers and listeners.

But it has been recognized that development of permanent financing is a complex and difficult task, requiring a high degree of coordination among the executive and legislative branches and the public broadcasting community. Accordingly, in order to yield immediate benefits from the Corporation, to develop expertise in public broadcasting operation, and to gain better insights through practical experience on the volume of funds that will be needed in the future, direct appropriations have been necessary.

The present legislation extends the authorization for the Corporation through the next fiscal year, 1972. The legislation also provides for appropriations in the current fiscal year, 1971. The House, in consideration of the committee bill, H.R. 17982, approved a $30 million authorization for fiscal 1971. In addition, another $5 million was authorized for appropriation of matching funds, to be dependent on amounts received as contributions to the Corporation from non-Federal sources.

The Senate had passed authorizing legislation with no fixed amounts for the next 3 fiscal years. The Senate also approved an amendment requiring educational stations to keep tapes of all public-issue programing for later inspection by interested parties. For my own part, I have no objection to broadcasting stations keeping records of broadcast material. But it was noted that neither body had held hearings on the proposal, and that, as written, such a law would single out noncommercial stations while placing no similar obligation on commercial stations. Also, the cost burden of such a step, which would fall most heavily on low-budget operations, would most probably be very high.

The conference managers agreed to eliminate the Senate amendment on keeping recordings, but also agreed that hearings on a measure that would apply across the board to all stations should be held next session.

The Senate managers pointed out that the provision of only 1 year's authorization as voted by the House would be followed in a matter of months by the necessity of considering similar legislation for the coming fiscal year. Accordingly, they urged that a second year's authorization be added. The House conferees agreed to the request, which is set at the same level as the authorization for the present fiscal year—that is $30 million for direct appropriations and $5 million in matching appropriations.

Both sides agreed that the extension of the authorization to the second year did not diminish in any way the insistence on the part of the House committee that work on permanent financing should go forward with all possible speed. Limiting the authorization to 1 year was designed as a means of insuring very close committee oversight over the development of permanent financing. The addition of a second-year authorization, because the appropriations process for that year is already almost upon us, will not in any way dilute the committee's insistence that work on permanent financing must be pressed vigorously.

In our committee report, we noted that it would probably be necessary to make further direct appropriations, even though progress was being made on long-range financing. Permanent financing will involve complex legislation that cannot be put in place overnight. In the meantime the Corporation for Public Broadcasting can continue to expand on the successful beginning it has already achieved by means of direct appropriation funding as provided for in this conference report.

Mr. Speaker, I urge the adoption of the report.

Mr. STAGGERS. Mr. Speaker, I yield whatever time he may require to the ranking minority member, the gentleman from Illinois (Mr. SPRINGER), who has been helpful, as always, in every way.

Mr. SPRINGER. Mr. Speaker, I would like to explain that we did go over this when the bill was before the House before. The budget figure was $22.5 million plus $2.5 million in matching grants. There was a great deal of argument in the committee as to what should be done. Finally we had the budget people come down and they agreed to this figure of $30 million plus $5 million in matching grants. So what is contained in this conference report and in the original bill meets with the approval of the Bureau of the Budget.

Mr. SCHMITZ. Mr. Speaker, once again I want to state my strong opposition to this legislation. As I pointed out at the time of its original passage September 10, the stated purposes and activities of the Corporation for Public Broadcasting read like a blueprint for a Government propaganda network. Coupled with the growing restrictions by the Federal Communications Commission on the program content of private broadcasters—of which the recent FCC decision to remove station WXUR in Media, Pa., from the air for alleged violations of the "fairness doctrine" such as failing to give equal time to opponents of victory in Vietnam, is the latest and worst example—this brings us closer to outright control of the communications media by those able to influence the Federal Government in their favor.

Government broadcasting is fundamentally inimical to freedom. Every advanced totalitarian state provides for full government control of the communications media. As everyone should know by now, Federal funding means Federal control. There should be no federally funded broadcasting network. Consequently, funding for the Corporation for Public Broadcasting should be ablished, not continued.

Mr. STAGGERS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

---

## ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair has been informed and understands that the original papers on the next conference report have not been messaged over to the House as yet. They will be here shortly.

The Chair will recognize the gentleman from California (Mr. HOLIFIELD) in connection with the first reorganization plan, and if the papers arrive between consideration of the first and second reorganization plans, the Chair will recognize the gentleman from West Virginia at that time.

## DISAPPROVING REORGANIZATION PLAN NO. 3 OF 1970—TO ESTABLISH AN ENVIRONMENTAL PROTECTION AGENCY AS AN INDEPENDENT ENTITY OF GOVERNMENT

Mr. HOLIFIELD. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of House Resolution 1209, to disapprove Reorganization Plan No. 3; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate on the resolution may continue, not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Illinois (Mr. ERLENBORN) and myself.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from California

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of House Resolution 1209, with Mr. ANDREWS of Alabama in the chair.

The Clerk read the title of the resolution.

By unanimous consent, the first reading of the resolution was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement the gentleman from California (Mr. HOLIFIELD) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. ERLENBORN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. HOLIFIELD).

Mr. HOLIFIELD. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I want to try to explain this resolution in as brief time as possible, the President's Reorganization Plan No. 3.

Mr. Chairman, House Resolution 1209 would disapprove Reorganization Plan No. 3 of 1970 submitted to Congress by President Nixon on July 9. The plan will create an Environmental Protection Agency.

In accordance with the Reorganization Act of 1949, if a disapproval resolution is voted favorably by either the House or the Senate within 60 days, barring adjournments for more than 3 days, a reorganization plan will not go into effect. Under the rules of the House, reorganization plans and disapproval resolutions thereon are referred to the Committee on Government Operations. In this instance Reorganization Plan No. 3 was assigned to the subcommittee chaired by the gentleman from Minnesota who held extensive hearings. Subsequently, when the disapproval resolution was filed the full committee voted to report it to the House with the recommendation that the resolution not be agreed to, thereby supporting the reorganization plan. I might say this action was by a near-unanimous vote. The committee report and the printed hearings have been sent to every Member of the House.

ENVIRONMENTAL PROTECTION AGENCY

Reorganization Plan No. 3 would establish an Environmental Protection Agency as a new independent entity in the Government. It would have a status comparable to other independent units such as the Atomic Energy Commission, General Services Administration, and Veterans' Administration which are not parts of a department.

The EPA will bring together the following agencies and functions now located elsewhere in the Government:

First, the Federal Water Quality Administration, now in the Department of the Interior—you will recall we transferred this agency to Interior from HEW by reorganization plan in 1966;

Second, the National Air Pollution Control Administration, now in the Department of Health, Education, and Welfare; parts of the Environmental Control Administration—Bureaus of Solid Waste Management, Water Hygiene, and a portion of the Bureau of Radiological Health—also from HEW;

Third, the pesticides research and standard-setting program of the Food and Drug Administration, HEW;

Fourth, the pesticides registration authority of the Department of Agriculture;

Fifth, authority to perform general ecological research, from the Council on Environmental Quality; certain pesticide research authorities of the Department of the Interior;

Sixth, the environmental radiation protection standard-setting function of the Atomic Energy Commission; and

Seventh, the functions of the Federal Radiation Council.

The Environmental Protection Agency will have a budget for fiscal 1971 of approximately $1.4 billion, mostly for water pollution efforts and over 5,600 personnel.

STATED ADVANTAGES

The President tells us the creation of the new agency will have the following advantages:

It will upgrade the effectiveness of the Federal Government's major pollution control programs.

It will provide a central focus for an evaluation of all pollution-related activities of the Government.

It will serve to upgrade the importance of environmental consideration and pollution programs within the Federal Government, and over a period of time tend to have a similar effect on program priorities within state and local governments.

It will clarify industry responsibility by providing consistent standards and a single enforcement agency.

State and local pollution control agencies will be able to look to one Federal agency for all their financial support and technical assistance.

It will insulate pollution abatement standard-setting from the promotional interests of other departments.

Since no new program or funding is proposed, I would conclude that the essence of this plan is to bring these scattered functions together under one roof for whatever benefits such coordination will produce in the overall environmental effort.

This idea apparently originated with the President's Advisory Council on Executive Organization, headed by Roy L. Ash and other well-known businessmen. The plan was supported by most of the witnesses who appeared. It was opposed by Congressman JOHN DINGELL and reservations were expressed by a number of farm organizations who prefer that pesticide registration remain in the Department of Agriculture. Mr. DINGELL will state his objections to you during this debate.

As you will note from our report, we took cognizance of the criticisms that were made. We recognized that this was a rather small step forward in the needed coordination of our many environmental programs. Also, the distinction between the work of the new Environmental Protection Agency and the Council on Environmental Quality was not made very clear.

Furthermore, the plan does set up a superstructure of high-level, high-salaried administrators in the agency even though we hear much talk from the administration about the need for economy. The President only recently undertook to lecture the Congress about spending.

Nevertheless, the environment is a matter of great public concern now and the committee felt that this plan, even though subject to some criticism should be allowed to become law.

That concludes my explanatory statement, Mr. Chairman.

I might say that in view of the fact that we have before us a resolution of disapproval that if you are in favor of the plan your vote should be "on" on the resolution of disapproval. If you are against the plan, your vote should be "yes" on the resolution of disapproval.

The committee with almost unanimous action advises that a "no" vote be given on the resolution of disapproval.

Mr. GROSS. Mr. Chairman, would the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Iowa.

Mr. GROSS. Mr. Chairman, I thank the gentleman for yielding.

Will the gentleman state how many employees will be transferred out of other agencies to this new Environmental Protection Agency?

Mr. HOLIFIELD. The estimate given to us by the administration was 5,600.

Mr. GROSS. It was 5,600?

Mr. HOLIFIELD. That is correct.

Mr. GROSS. Do I understand correctly that about 2,500 of these will come from the Department of the Interior?

Mr. HOLIFIELD. I believe that is about the breakdown. You see, we put the water and air pollution acts in the Department of the Interior, and they have many employees working on these programs. Their functions will be transferred over into this environmental agency, and along with the functions will go the personnel records of this agency pertaining to these subject matters.

Mr. GROSS. And this requires the establishment of an Environmental Protection Agency?

Mr. HOLIFIELD. The Environmental Protection Agency is established by the President's plan. This, of course, is a procedure authorized by the Reorganization Act, and he may group together related functions into a new agency. He cannot abolish functions and he cannot expand functions. That has to be done by statute. But he can move them over, like moving checkers over on a checker board into one group.

Mr. GROSS. Who is going to administer this new agency?

Mr. HOLIFIELD. That will be the President's decision, of course—and the gentleman may have some control over that—but I do not.

Mr. GROSS. Not very much, I will say to the gentleman, if any.

Mr. HOLIFIELD. The President has not announced who the Administrator will be.

Mr. GROSS. But there will be an Administrator; is that correct?

Mr. HOLIFIELD. There will be one Administrator. These are administrative positions. There will be one Administrator, a Deputy Administrator and five Assistant Administrators. The Administrator is at level No. 2 which is $42,500 annual salary. The Deputy Administrator is at level No. 3 which is $40,000 annually and the five Assistant Administrators are at level No. 4 which is $38,000 each.

Mr. GROSS. That is five Assistant Administrators at $38,000 each?

Mr. HOLIFIELD. That is right.

May I say that the total, the way I figure it, is $357,000 annually for these new administrative positions.

Mr. GROSS. There are these new administrative positions—but that does not include clerical help, office space, and so on and so forth?

Will this require a new building? They are going up so fast around here that I am led to believe that all of these new creations require new buildings.

Mr. HOLIFIELD. I cannot answer that question. The bodies that are going to be in this new agency now occupy office space so that I would not see the necessity for additional office space. They may be grouped differently in different buildings. But the increase in personnel that is contemplated at this time is, so far as I can tell, only seven people.

Mr. GROSS. I call the gentleman's attention to page 102 of the hearings of the subcommittee where Mr. Lanigan of the committee staff, the general counsel, pointed out that the Federal Water Pollution Control Administration, which transferred from HEW to the Department of Interior, provided for an additional Assistant Secretary of the Interior.

Then Mr. Lanigan said that he saw no provision in Reorganization Plan No. 3 either for the transfer of this Assistant Secretary to the new agency or for the abolition of his job.

Mr. Lanigan asked:

Was it contemplated that this additional Assistant Secretary will remain in the Interior Department?

The result of this questioning added up to the answer that this question would be disposed of in hearings on Reorganization Plan No. 4; that is the fate of this Assistant Secretary.

I have read as carefully as I could the hearings on Reorganization Plan No. 4 and I can find no disposition of this Assistant Secretary. I wonder where he is going to go?

Mr. HOLIFIELD. I suppose that following former procedure, if a secretarial function in Interior is transferred over to the new agency, that any person who takes that place would be appointed and that the old Secretary would either be dismissed or appointed to a new agency somewhere else.

Mr. GROSS. But no evidence was submitted to your committee as to whether he was going to be used as an administrator on any other job?

Mr. HOLIFIELD. The only evidence submitted to our committee was that there were going to be seven new places.

Mr. GROSS. I am sure the gentleman knows the question that is in my mind and that is, Will this reorganization plan merely result in more empire building?

Mr. HOLIFIELD. I think it will result in the concentration of the different functions into one entity. The President says that this is the way to do it and the committee has decided to go along.

I will reserve the balance of my time and let our colleague, the gentleman from Illinois (Mr. ERLENBORN) further expiate on that problem.

Mr. Chairman I include the following letters referring to Reorganization Plan No. 3:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON GOVERNMENT OPERATIONS,
*Washington, D.C., August 5, 1970.*

Hon. GEORGE P. SHULTZ,
*Director, Office of Management and Budget, Executive Office of the President, Washington, D.C.*

DEAR MR. SHULTZ: During the past several weeks of our subcommittee hearings on Reorganization Plan No. 3, there has been testimony and discussion relating to the proposed transfer of all Federal Radiation Council functions to the Environmental Protection Agency. I do not believe that there has been adequate coverage concerning what the administration proposes with respect to present ongoing study projects being conducted by the FRC.

Specifically, this committee would like to know what is planned concerning completion of the FRC study and report on radon exposures in the uranium mining industry, and the comprehensive review of the radiation protection guides which I, in my capacity as chairman of the Joint Committee on Atomic Energy, requested in my March 20 letter to Chairman Finch (copy attached). Please indicate the expected schedule for the completion of these FRC efforts.

The committee would also like to know how similar multidiscipline studies concerning guides or standards for radiation exposure would be carried out under the newly proposed organization.

Your cooperation in this matter is appreciated.

Sincerely yours,

CHET HOLIFIELD,
*Acting Chairman.*

---

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
*Washington, D.C., September 15, 1970.*

Hon. CHET HOLIFIELD,
*Acting Chairman, Committee on Government Operations, House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: This is in reply to your letter of August 5 asking for further information about the administration's plans with respect to ongoing projects being conducted by the Federal Radiation Council after the transfer of its functions to the Environmental Protection Agency proposed under Reorganization Plan No. 3.

The overall intent of the administration under the plan was described by Russell Train, Roy Ash, and other executive branch witnesses when they appeared before Mr. Blatnik's subcommittee on July 22 and 23. With regard to your specific questions:

(1) The review of radon daughter exposures in uranium mining will be completed under the supervision of the Interagency Review Group on Uranium Mining, which was set up by Secretary Finch, acting as Chairman of the FRC. The Surgeon General, USPHS, was directed to chair the group. The conclusions and recommendations of this Interagency Review Group are expected to be available in time for the administration to act on the change of the standard previously recommended before the effective date of January 1, 1971.

(2) The plan for review of FRC basic guidelines recommended by Chairman Finch is attached for your information. The projected time for the review of approximately 2 years was proposed by the National Academy of Sciences and supported by the FRC staff and working group. The FRC accepted the recommendations, and instructed the staff and working group to plan the Council's program accordingly.

(3) The administration has acted to insure that the ongoing programs in the functions and organizations being transferred to EPA are continued without interruption. The review of basic guidelines is already underway. The contracts with NAS and NCRP shown in the plan are in the process of being executed for fiscal year 1971. The transfer of functions will not affect the orderly progress of completing the study.

As to future multidiscipline studies concerning guides or standards for radiation exposure, we believe EPA will utilize the pattern and operational procedures already established under the FRC, and will use basically the same sources of expert advice, including critical non-Federal sources. Thus, EPA will be:

(1) Making full use of expertise available in other Government agencies;

(2) Utilizing NAS for advice on the biological effects of radiation;

(3) Utilizing the expertise in the NCRP for advice in respect to basic standards as well as advice on the most appropriate dosimetry models to be used in connection with the development of secondary standards; and

(4) Creating special task forces including experts from the Government and non-Government sectors as needed in special cases.

With the transfer of FRC to EPA under the Reorganization Plan, EPA will, of course, be bound by the existing statutory requirements to consult with the NAS, NCRP, and other qualified experts in the fields of biology, medicine, and health physics.

Sincerely,

GEORGE P. SHULTZ,
*Director.*

Mr. ERLENBORN. Mr. Chairman, I yield such time as she may consume to the gentlewoman from New Jersey (Mrs. DWYER).

Mrs. DWYER. Mr. Chairman, I rise in opposition to House Resolution 1209 and urge that Reorganization Plan No. 3 of 1970 be allowed to become effective.

The net result of our Federal environmental protection effort to date is a structure incapable of coordinated and effective action in dealing with pollution. Having developed piecemeal, the environmentally related activities of Government are now scattered among a number

of departments and agencies and are incapable of a concerted attack upon our pollution problems.

I have long crusaded for a more effective allocation of the resources of Government and I know of no area where reorganization is more essential than in pollution control.

Many agency missions for environmental protection have been designed without regard to the interrelatedness of the sources of air, water, and land pollution.

Reorganization Plan No. 3 would not only make possible comprehensive research, standard setting, and consistent and effective policy formulation, but would simplify intergovernmental relations. State and local governments, as well as industry, should thereby be spared some of the frustrations of dealing with a number of different agencies.

Overhauling the cumbrous machinery of Government is a task of awesome proportions and cannot be accomplished in one fell swoop. The President has redeemed his campaign pledge "to set in motion a searching, fundamental reappraisal of our whole structure of government" and is proceeding systematically and thoroughly.

The President has established environmental quality as a priority objective of this administration; Congress has long been committed to the same goal; and the public shares the same commitment. In such a climate, and in face of the need it would be unthinkable to reject this reorganization plan.

The President must be permitted not only to gain economy and efficiency in Government, but to give Government the ability to meet priority needs and thus restore the quality of life.

Admittedly, Reorganization Plan No. 3 is not the last word, nor is it intended to be. But I agree with the President that it is a sound and significant beginning toward the ultimate objective of maximizing the effective coordination and functioning of the Nation's environmental and resource protection activities.

Therefore, I urge this body to vote "no" on House Resolution 1209 and thus allow Reorganization Plan No. 3 of 1970 to become effective.

Mr. ERLENBORN. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, of the many reorganization plans that have been referred to the Committee on Government Operations and debated in this body since I became a Member of Congress, none has been more in keeping with the letter and the spirit of the Reorganization Act of 1949, as amended and now codified at 5 U.S.C. 901–913, than Reorganization Plan No. 3 of 1970.

Not only is it needed to promote the better execution of the laws, the more effective management of the executive branch and of its agencies and functions, and the expeditious administration of the public business, but it is deliberately designed to increase the efficiency of the operations of the Government to the fullest extent practicable.

The present fragmentation of pollution control programs among several agencies of Government no longer serves the public interest. The unified system that is the environment must be matched by a corresponding interrelatedness of governmental responsibilities to protect that environment.

No matter how much additional funds we appropriate to restore and preserve the quality of our environment much of our investment will be wasted unless we remedy the fractured structure that currently inhibits effective use of funds and people.

No single agency is presently responsible for developing the integrated research, standard setting, and assistance necessary to develop and carry out a comprehensive program of pollution control.

The President has made a compelling case for proposing a separate new agency, rather than placing environmental protection activities in an existing department. Because each department's view of environmental questions is affected by its own primary mission, its objectivity as an impartial standard setter for other departments could be called into question. A strong independent agency is needed.

The Environmental Protection Agency would bring together in a single organization the major Federal pollution control programs now existing in four separate agencies and one interagency council.

The plan would combine functions carried out by the Federal Water Quality Administration—FWQA—now in the Department of the Interior; the National Air Pollution Control Administration—NAPCA—parts of the Environmental Control Administration—ECA—and the pesticides research and regulatory programs of the Food and Drug Administration, all presently located in HEW; the pesticides registration and related authority of the Department of Agriculture; the environmental radiation protection standard-setting function of the AEC; the functions of the Federal Radiation Council; some of the pesticides research conducted by the Bureau of Commercial Fisheries; and authority to conduct ecological systems research, now vested in the Council on Environmental Quality.

Thus, the new agency would include only those programs or functions necessary for it to carry out its mission of integrated policymaking and pollution control. The standard-setting function is a critical one and although only a handful of programs are being transferred, they represent an authority that can exert a great deal of leverage in improving environmental quality.

In view of this carefully worked out answer to a demonstrated need, it is difficult to understand the opposition to the plan culminating in the resolution of disapproval before us today. Nevertheless, opposition has been expressed and it deserves an answer.

The arguments that I have heard advanced against this plan are basically three in number, first, that it does not go far enough in coordinating the environmental protection activities of Government; second, that it goes too far in coordinating the environmental protection activities of Government, and finally, that the coordination of the environmental activities of Government should have been accomplished in some other place and under some other name.

The first two arguments tend to cancel each other out and are a tribute to the balance with which the proposed organizational structure is designed. The third defies argument because there is no profit in disputing differences concerning tastes.

Substantial or not, these arguments merit examination in somewhat more detail. As to the argument that the plan does not go far enough in coordinating the environmental protection activities of Government there is no question but what environmental factors exist in practically all operating programs of the Federal Government. Some of them should probably be included in this new agency and undoubtedly, at some later time, will be. That fact, however, should not militate against this very meaningful and significant plan to consolidate basic efforts to determine tolerance levels and standards for major forms of pollution affecting the general environment, to enforce those standards and to provide assistance in alleviating pollution problems.

Resistance to the separation of responsibilities for regulating the environmental effects of a particular activity from the responsibilities for promoting or developing a particular resource or activity gives rise to the second argument I mentioned earlier that the plan goes too far. While the problem is one of Federal organization subject to more than one solution, there is a growing public concern over the vesting of promotional and regulatory powers in the same agency of Government. The Department of Agriculture's regulation of pesticides and the Atomic Energy Commission's regulation of radiation levels were cited as examples having a potential for conflict of interest. Vesting these regulatory functions in an independent Environmental Protection Agency should allay any fears that special interests will prevail over the interest of the public at large.

Moreover, it should be noted that pursuant to the reorganization provisions of 5 U.S.C. 901–913, a reorganization plan cannot create any new authorities or functions. The functions of the new Environmental Protection Agency, at the outset, will be those of its constituent parts. However, those functions will be better coordinated and performed.

Finally, a word about the view that the coordination of the environmental activities of Government should have been accomplished in some other place and under some other name. Alternative proposals have ranged from maintaining the status quo to a super Department of Environment and Natural Resources. However, the vast, overwhelming majority feel that reorganization is needed and the pulling together of environmental protection functions of the Federal Government in one agency is needed if we are to get the job done that has to be done. The only question is what sort of reorganization? What the administration has done in this case is to pursue the right and only politi-

cally feasible course. Politics is often the art of the possible. Perhaps this plan does not go as far as it should, but I believe it goes as far as it can. Logically, a case could be made for including, for example, the civil functions of the Corps of Engineers, the Forest Service, and other entrenched bureaucracies in a Department of Environment and Natural Resources, but how far would such a reorganization plan get in this Congress? While Reorganization Plan No. 3 may be only a first step in a direction that has to be traveled, it is the maximum that can be accomplished now. It is the optimum compromise between discretion and bold imaginativeness and I commend the administration for its genius in devising a plan to increase the efficiency of the operations of the Government to the fullest extent practicable.

Therefore, I urge this body to vote "no" on House Resolution 1209 and thus allow Reorganization Plan No. 3 of 1970 to become effective.

One last comment. I would like to repeat what the gentleman from California (Mr. HOLIFIELD) has said about the double negative aspect of the vote on this proposition. The President's Reorganization Plan No. 3 will become law unless a resolution of disapproval is adopted. The Committee on Government Operations almost unanimously has recommended this resolution of disapproval, which we are considering today, not be adopted. So to allow this plan to go into effect and to allow the environmental protection agency to become law, we are recommending that Members vote "no" on the resolution of disapproval.

Mr. HALL. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Missouri.

Mr. HALL. Mr. Chairman, I appreciate the gentleman yielding.

Mr. Chairman, I only have two questions. First, is it not true that if we simply had failed to bring the resolution up, with almost unanimous agreement of the committee that it be defeated and a "no" vote be cast in order to allow the Presidential reorganization plan to go through, the reorganization plan within 60 to 90 days would have gone through and have had the effect of law anyway, under the existing Reorganization Act?

Mr. ERLENBORN. The gentleman is correct. If no action is taken on the resolution of disapproval, the reorganization plan becomes law automatically at the expiration of 60 days as provided in the statute, so I think it is testimony to the fairmindedness of the acting chairman of our committee, the gentleman from California (Mr. HOLIFIELD) that he saw that this matter was scheduled, so the House could have an opportunity to vote one way or the other. If we had done nothing, the plan would have become law just by operation of the law.

Mr. HALL. My comment was toward avoiding another double negative situation.

But, Mr. Chairman, my second question and what I originally rose for was to ask the gentleman if he would care to expound a little further on just how this new consolidated agency would interface with the new Assistant Secretary of Defense for Health and Environmental Measures which was created by this body.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. ERLENBORN. Mr. Chairman, I yield myself 5 additional minutes.

Mr. HALL. As the gentleman may know, this body created the Assistant Secretary of Defense for health matters and, presumably by Presidential agreement with the Secretary of Defense, "environmental affairs," was added. I believe it is a very excellent thing.

Would this agency have any control over that function of the Department of Defense on which so much has been expended in order to clear up pollution of the air and waters and solid waste and everything else so recently in various posts, camps, and stations, under the military construction authorization and appropriations?

Mr. ERLENBORN. To answer the gentleman in the context he asked the question, the answer is "No," that this agency would have no control over the Department of Defense or the Assistant Secretary, because the reorganization plan by law cannot create any new functions. We can only transfer to a newly created agency functions already existing. But it will provide a place where the major pollution control activities of the Government will be administered under one head, and, therefore, will provide better liaison with the Department of Defense and other departments of Government.

Mr. HALL. Mr. Chairman, knowing the Assistant Secretary of Defense for health and environmental matters, I am sure he will coordinate with this agency. I intend to vote "no" for this resolution and allow the reorganization to proceed, even though in principle I disapprove of vetoes in reverse.

It is my understanding that the U.S. House of Representatives will today be asked to disapprove President Nixon's Reorganization Plan No. 3, establishing an Environmental Protection Agency. This Member will be happy to give his full support to a bringing together of the many Federal programs into an independent agency. My constituency in the beautiful Ozarks of Missouri is populated by Americans who deplore pollution and other attacks on our natural resources and our recreational areas. They have trouble knowing where to turn in their desire to solve their problems at the proper local levels.

Being one of only three physicians in the U.S. Congress, I am especially aware of the health hazards that are presenting themselves as the pollution problem grows in size. I am pleased to know that my own medical association, the American Medical Association, has pledged its support to the President's program.

There follows a letter addressed to the President and signed by Walter C. Bornemeier, M.D., president of the American Medical Association:

AMERICAN MEDICAL ASSOCIATION,
*Chicago, Ill., July 27, 1970.*

The PRESIDENT,
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: We in the medical profession have long been concerned about the health problems generated by man's interaction with his environment. The need for affirmative action by all segments of our society is immediate and great. We are extremely pleased to see that you are continuing to put the Federal House in order so that the government's environmentally-related activities can be organized rationally and systematically.

We wish to lend our fullest support to your recent reorganization plan establishing the environmental protection agency. We applaud your decision to bring together previously scattered Federal programs into one coherent and independent agency. This action will undoubtedly impart to the programs concerned a degree of public visibility that is so necessary for adequate funding and responsive administration. Then, too, this major step forward will enhance the status of these programs by providing that the head of the agency will report directly to you.

We are fully aware of the many and difficult problems that the country faces in attempting to control and to reduce environmental pollution. We, therefore, congratulate you on this progressive action which will rationalize these governmental research and enforcement programs. Please be assured that the medical profession—always active in the fight against environmental pollution—will continue to do its share.

Respectfully yours,
WALTER C. BORNEMEIER, M.D.

Mr. KYL. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Iowa.

Mr. KYL. Of course, there is an overwhelming temptation to vote for the establishment of anything that will coordinate efforts in the field of environmental control, but did the committee contemplate the possible results, for instance, on item No. 4, the pesticides research and standard-setting program of the Food and Drug Administration in the Department of Health, Education, and Welfare? It occurs to me if we set up a new bureau in a new department to do this kind of work we are going to have to buy all of the equipment which exists in the other agency, and hire an additional set of people to do this work, because HEW now does work of many different kinds in chemical research and toxic research and so on.

Are we merely creating a whole new office to do the same job that this other office has been doing but at the same time leaving the old office sufficient work to keep all of its personnel and all the equipment.

Mr. ERLENBORN. I believe the only way I could answer the gentleman would be to say that those people who are identified with this particular program—that is, the standard setting and pesticides research—are now in HEW, and the facilities and equipment utilized in that program will be physically transferred to the new agency. To what extent they may be physically interrelated with other research I cannot answer offhand.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I am happy to yield to the gentleman from California.

Mr. HOLIFIELD. On page 103 of the hearings, I will say to my colleague, there is testimony by the Honorable J. Phil Campbell, Under Secretary of the Department of Agriculture, who was accompanied by Dr. George W. Irving, Administrator of the Agricultural Research Service. He appeared and he did testify on this matter, and testified in favor of this transfer.

Mr. ERLENBORN. I thank the gentleman for his contribution.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I am happy to yield to the gentleman from Iowa.

Mr. GROSS. I hope that this reorganization will work, but very frankly, I am dubious, I will say to the gentleman, for the reason that I was here when the Department of Defense was created. Others were here at that time and they will recall that we were told the Department of Defense would be lean and hungry. It seems to me that we were told there would be about 150 additional employees over there.

I suspect that there are 10,000 to 20,000 now in the Department of Defense. Just another layer of fat, in my opinion, has been added to the administration of the military establishment of this country. After all these years there is still little commonality of information on purchasing. There are secretaries, assistant secretaries, and deputy secretaries all over the place. I do not have the faintest idea of what the administration of the Department of Defense is costing. I am sure it is the biggest one of the reorganizations in terms of personnel and in terms of cost to the public. It would be fine if these reorganization plans did what you say they will do in these hearings and in the report; that is, create efficiency and economy, but they just do not do it. I hope, if this resolution is approved, that this will be the first one that will provide for commonality in the matter of information and efficiency and economy in Government. If it does, it will be the first since I have been a Member of Congress.

Mr. ERLENBORN. I thank the gentleman, and I join in his hope.

Mr. HOLIFIELD. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Chairman, a few years ago my colleague, JOHN MOSS, and I came into to the well to speak against a proposal to create an Airways Modernization Board. We pointed out at that time that bill created an out-house, a shed, a temporary structure, where a major edifice was needed. Within 2 years of that time, my colleagues who were here then will recall, the Congress responded by unanimously passing the legislation that created the Federal Aeronautics Administration. In the passage of the legislation which created the FAA the very arguments were used that we had made against the Airways Modernization Board.

Today we have a similar situation before us. The Administration would have you believe that this proposal combines all of the environmental protection activities in the Federal Government in one agency. Let me tell you that is not so. Programs in the Department of Agriculture dealing with water and sewerage, programs in the Department of HUD making major grants to cities for the construction of water and sewage facilities are not transferred, and none of the environmentally directed activities in the Department of Defense or the Department of Transportation are transferred to the new agency. As a matter of fact, they are immune and exempt from this reorganization plan. One must ask why agencies which have so much to do with environmental protection of the quality of our environment have been completely passed over. The answer is that it was probably just too big and too much of a political question for the Administration to take over. It is said that this is going to result in efficiency. As a matter of fact, let me tell my colleagues that there is nothing further from the truth than that. The answer is that this proposal is going to give us first of all better than a year and probably at least 2 years wherein practically nothing will be done about environmental protection by the agencies.

My friend from Iowa pointed out some of the circumstances. First of all, they have to select the bureaucrats; second of all, they have to review all of the policies; third of all, they have to get themselves an appropriation so that they can get the proper building and properly decorated offices, and then they have to get good-looking secretaries and follow that up by kicking out all of the people who made life hard for the polluters, so that they can satisfy the polluters and their big campaign contributors. That is what will happen. You have 2 years when nothing will happen while the Nation is riven by concern over the pollution of our environment and the destruction of environmental quality in this Nation. After they have their limousines and their secretaries, their draperies and their rugs and their new offices and office furniture selected, they will begin to settle down and produce efficiency experts in their agency. They will have to bring in all of these people from the agencies where they are, and they will move them around in order to try to get matters going forward again. This will go on until a new administration comes in and starts the reorganization all over again.

So that you do not think I am being partisan, I want you to know that I intend to oppose this if another administration tries to do the same thing.

We have gone this route before when we have moved water pollution from the Department of Health, Education, and Welfare to the Department of the Interior, and if any of you watched what transpired at that time, you will know that these delays and wastes are exactly what takes place.

And, what you wind up with really is not less people doing more effective work, but more people doing a great deal less. That is what is going to transpire here. There will be a lot more bureaucrats drawing higher salaries, with more secretaries and limousines and fancy office furniture, but doing less work. While the so-called efficiency experts who will be around the Department having responsibility for this program, there will be two, three, four, or five people doing the work that can be done by one person.

Mr. KYL. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I shall be happy to yield to the gentleman from Iowa.

Mr. KYL. I will say, first, that the gentleman from Michigan puts himself in jeopardy, because there will be those who will be quick to pounce upon his words as indicating that he is an enemy of environmental control.

Mr. DINGELL. Well, of course, I am not. I am very much in favor of workable programs which will strengthen our laws against environmental pollution. I would point out that I have worked hard to make our antipollution and environmental programs effective devices.

Mr. KYL. Mr. Chairman, if the gentleman will yield further, I agree with the gentleman to this extent: If we are going to reorganize all of our resources into one agency or department, we should go all the way.

Mr. DINGELL. The distinguished gentleman from Iowa is entirely correct.

Mr. KYL. It is like having one agency running one part of a program under one set of rules and another handling a different part of the program under another set of rules.

We ought to also take the military portions of this problem and put them under a broad heading if we are to have total environmental control.

Mr. Chairman, I would feel better about Reorganization Plan No. 3 if we could pull together all of these agencies because I believe we might be fragmenting as the gentleman indicates.

Mr. DINGELL. I thank my friend for his valuable contribution.

Mr. Chairman, what is needed is a program of a major emphasis, a major edifice. Also, so that my colleagues will know—and I will insert it in the RECORD at the proper time—there is legislation pending to create a Department of Natural Resources and Environmental Quality so that we will know that the affairs of Government are being upgraded and not downgraded and that a large number of agencies having direct standard-making responsibility will not be totally ignored.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. HOLIFIELD. Mr. Chairman, I yield the gentleman 3 additional minutes.

Mr. DINGELL. But I think it has to be recognized that they could be totally or easily ignoring many agencies having responsibility in this area but we are effectively discrediting the old agencies and we will have Assistant Secretaries and Under Secretaries speaking on behalf of pollution abatement which will be carried out by an Administrator.

Mr. Chairman, we are told that this is going to be like NASA. But there is a difference. NASA has been successful for two reasons. They have had the strongest kind of policy support from the Hill and the administration and we have given them the funds with which to do the job. We have supported them completely so that they could do the job. That is the reason that NASA has been successful.

Mr. Chairman, I have no doubt but what within a very short period of time this issue will be back before us and we will be called upon to recognize the warning I give you today that the program is not going to work because a major attack upon environmental pollution is required by an independent agency with the necessary funds and with the ability to do the job. If this reorganization plan goes into effect we have only today set up something temporarily which in my opinion will be clearly and plainly counterproductive.

Mr. Chairman, in my remarks before the Committee on Government Operations I cited the book "Peter Principle." One of the things discussed there was the situation where you have a major problem which outrages everyone. But for good or bad reasons, it is inexpedient to attack the problem directly. We have here such a nasty problem and a highly political one. In this case, we will be utilizing the Peter's Placebo, appearing to do something when in fact we are really going after an altogether different problem, attacking something else and not in fact doing anything at all about the main problem. But it just looks like you are doing something. That is what the Reorganization Plan No. 3 is all about today.

It is something which is going to accomplish nothing and which will not work, but it gives the appearance of doing, so that the malcontents in the audience may be convinced there is something that is going to happen. But I will promise my colleagues one thing, and that is that this is not going to make progress, it is counterproductive. I would urge my colleagues that this program should be rejected. I believe we should do something about this area, but not on a take-it-or-leave-it basis, or swallow-it-whole-or-nothing basis, as under this kind of a proceeding, but rather this should be done through legislation where together, all the people of the Nation, the persons interested in conservation as well as even the polluters, would be permitted to come forward and to make suggestions so that we could have a careful study and review of the whole situation which would in the end answer a lot of unanswered questions that are before us. Although there is not enough time, I would simply point out to my colleagues that this piece of legislation is so fraught with unanswered questions that on that basis alone, apart from the lack of wisdom and apart from the lack of effectiveness it should be summarily rejected.

The legislation to which I referred earlier is H.R. 19195, to establish a Department of Environmental Quality, which I cosponsored with my friend the gentleman from California (Mr. Moss) the text of which follows:

H.R. 19195

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Department of Environmental Quality Act".

DECLARATION OF PURPOSE

SEC. 2. (a) The Congress hereby declares that—

(1) the public health, general welfare, and economic growth and stability of the Nation is dependent on the continued availability of unpolluted air and water—our irreplaceable resources; and

(2) high-density urbanization, industrial development and expansion, population growth and concentrations, resource exploitation, and new and expanding technological advances, together with the lack of adequate consideration given by public and private agencies and individuals to the impact of these activities on the total environment, has resulted in mounting dangers to the public health and welfare and our environment.

(b)(1) The Congress therefore finds that the establishment of a Department of Environmental Quality is necessary in the public interest and to protect the public health; to assure the coordinated, effective protection and enhancement of the quality of the environment; to facilitate a coordinated, effective attack on the pollutants which debase the air we breathe, the water we drink and use for recreation and agricultural purposes, and the land that supplies our food and supports our wildlife; to encourage and foster cooperation of Federal, State, and local agencies and foreign governments and private organizations and agencies and individuals toward the prompt achievement of the national environmental quality protection and enhancement objectives set forth in this Act and many other statutes; to stimulate technological advances in pollution control and prevention and environmental protection and enhancement; to provide general leadership nationally and internationally in the identification and solution of environmental problems; and to develop, further define, and to recommend to the President and the Congress new and improved programs, including the adequate financing of such programs and existing programs, and to accomplish these objectives with full and appropriate consideration of the need to encourage the growth and development of the Nation, to improve the daily lives of all of the people of the Nation, and to preserve our national security.

(2) It is hereby declared to be the national policy that the prevention of air and water pollution and the protection and enhancement of the total environment in productive harmony with the social, economic, and other requirements of present and future generations of Americans is in the paramount interest of the United States.

ESTABLISHMENT OF DEPARTMENT

SEC. 3. (a) There is hereby established at the seat of Government an executive department to be known as the Department of Environmental Quality (hereafter referred to in this Act as the "Department"). There shall be at the head of the Department a Secretary of Environmental Quality (hereafter referred to in this Act as the "Secretary"), who shall be appointed by the President, by and with the advice and consent of the Senate.

(b) There shall be in the Department an Under Secretary, who shall be appointed by the President, by and with the advice and consent of the Senate. The Under Secretary (or, during the absence or disability of the Under Secretary, or in the event of a vacancy in the office of Under Secretary, an Assistant Secretary or the General Counsel, determined according to such order as the Secretary shall prescribe) shall act for, and exercise the powers of the Secretary, during the absence or disability of the Secretary or in the event of a vacancy in the office of Secretary. The Under Secretary shall perform such functions, powers, and duties as the Secretary shall prescribe from time to time.

(c) There shall be in the Department three Assistant Secretaries and a General Counsel who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall perform such functions, powers, and duties as the Secretary shall prescribe from time to time. The Assistant Secretaries shall be: for air and water pollution control; for environmental protection; and for international affairs.

(d) There shall be in the Department an Assistant Secretary for Administration, who shall be appointed, with the approval of the President, by the Secretary under the classified civil service who shall perform such functions, powers, and duties as the Secretary shall prescribe from time to time.

(e) There is hereby established within the Department a Federal Water Quality Control Administration; a National Air Quality Control Administration; and an Environmental Protection Administration. Each of these components shall be headed by an Administrator. In the case of each Administration, there shall be five Deputy Administrators appointed by the Secretary: for Research and Development; for Loans and Grants; for Standards and Regulations Development and Intergovernmental Coordination; for Enforcement; and for Administration and Public Information. The Administrators shall be appointed by the President, by and with the advice and consent of the Senate.

(f) In addition to such functions, powers, and duties specified in this Act to be carried out by the Administrators, they shall carry out such other functions, powers, and duties as the Secretary may prescribe. The Administrators shall report to the Secretary through the applicable Assistant Secretary and the Under Secretary. Each Deputy Administrator (according to such order as the appropriate Administrator shall prescribe) shall act for, and exercise the duties of, the appropriate Administrator during his absence or disability. Each Administrator shall prescribe the functions, powers, and duties of each of his Deputy Administrators.

(g) The functions, powers, and duties as are specified in this Act to be carried out by an Administrator shall not be transferred elsewhere in the Department unless specifically provided for by reorganization plan submitted pursuant to provisions of chapter 9 of title 5, United States Code, or by Act of Congress enacted after the effective date of this Act.

TRANSFERS TO DEPARTMENT

SEC. 4. There are hereby transferred to the Secretary to be administered by him through the Administrator of the Federal Water Quality Control Administration all functions, powers, and duties of the Secretary of the Interior and other offices and officers of the Department of the Interior administered:

(1) by him or by the Federal Water Quality Administration pursuant to (A) the Federal Water Pollution Control Act, as amended, (B) Reorganization Plan Numbered 2 of 1966 (80 Stat. 1608), and (C) section 169(d) (1) (B) and (3) of the Internal Revenue Code of 1954, as amended, but shall not include the functions of the Bureau of Reclamation under section 3(b)(1) of the Federal Water Pollution Control Act, as amended; and

(2) by the Water Resources Division of the Geological Survey, including, but not limited to, the water monitoring functions of the Geological Survey.

(b) There are hereby transferred to the Secretary to be administered by him through such Administrator all functions, powers, and duties of the:

(1) Secretary of Agriculture administered by him through the Farmers Home Adminis-

tration insofar as such functions, powers, and duties relate to water and sewer facilities; and

(2) Secretary of Housing and Urban Development, the Secretary of Commerce, and the Appalachian Regional Commission insofar as such functions, powers, and duties relate to water and sewer facilities.

(c) (1) There are hereby transferred to the Secretary to be administered by him through the Administrator of the National Air Quality Control Administration all functions, powers, and duties of the Secretary of Health, Education, and Welfare under the Clean Air Act, as amended, and section 169(d) (1) (B) and (3) of the Internal Revenue Code of 1954, as amended.

(2) There are hereby transferred to the Secretary to be administered by him the Air Quality Advisory Board established by section 110 of the Clean Air Act, as amended.

(d) There are hereby transferred to the Secretary to be administered by him through the Administrator of the Environmental Protection Administration all functions, powers, and duties of the:

(1) Secretary of the Interior (A) under the Act of August 1, 1958, as amended (16 U.S.C. 742d–1), relating to studies of effects of insecticides, herbicides, fungicides, and pesticides, (B) which are administered by him through the Gulf Breeze Biological Laboratory, and (C) which are administered by him through the Bureau of Mines insofar as such functions, powers, and duties relate to solid waste management;

(2) Secretary of Health, Education, and Welfare which are administered by him through the Bureau of Solid Waste Management, the Bureau of Water Hygiene, and the Bureau of Radiological Health and which are vested in him for establishing tolerances for pesticide chemicals under the Federal Food, Drug, and Cosmetic Act, as amended (21 U.S.C. 346, 346a, and 348) together with authority, in connection with the functions transferred, (A) to monitor compliance with the tolerances and the effectiveness of surveillance and enforcement, and (B) to provide technical assistance to the States and conduct research under the Federal Food, Drug, and Cosmetic Act, as amended, and the Public Health Service Act, as amended, except that those functions, powers, and duties carried out by the Environmental Control Administration of the Environmental Health Service through the Bureau of Community Environmental Management, the Bureau of Occupational Safety and Health, and the Bureau of Radiological Health, are not so transferred insofar as those functions, powers, and duties carried out by the latter Bureau pertain solely to (A) regulation of radiation from consumer products, including electronic product radiation, (B) radiation as used in the healing arts, (C) occupational exposures to radiation, and (D) research, technical assistance, and training related to such clauses (A), (B), and (C);

(3) Secretary of Agriculture (A) under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 U.S.C. 135–135k), under section 408(1) of the Federal Food, Drug, and Cosmetic Act, as amended (21 U.S.C. 346a(1)), and (B) which are administered through the Environmental Quality Branch of the Plant Protection Division of the Agricultural Research Service;

(4) Secretary of Transportation with respect to, and being administered by him, through the Office of Noise Abatement;

(5) Federal Radiation Council under section 274 of the Act of August 1, 1946, as amended (42 U.S.C. 2021(h)); and

(6) Atomic Energy Commission under the Atomic Energy Act of 1954, as amended, which are administered through the Division of Radiation Protection Standards, to the extent that such functions, powers, and duties consist of establishing and enforcing environmental standards and safeguards for the protection of the general environment from radioactive material which standards are defined to mean: limits on radiation exposures or levels, or concentrations of or quantities of radioactive material, in the general environment outside the boundaries of locations under the control of persons possessing or using radioactive material.

(e) The Secretary, in administering the programs transferred under this section, shall coordinate his activities with those of the departments and agencies which administer such programs prior to the effective date of this Act.

(f) Within one hundred and eighty days after the effective date of this Act, the President may transfer to the Secretary any function of any other agency or office or part thereof if the President determines that such function relates to functions transferred to the Secretary under this section.

ADMINISTRATIVE PROVISIONS

SEC. 5. (a) In addition to the authority contained in any other Act which is transferred to, and vested in, the Secretary, he or any other officer of the Department may, subject to the civil service and classification laws, select, appoint, employ, and fix the compensation of such officers and employees, including investigators, attorneys, and hearing examiners, as are necessary to carry out the provisions of this Act and to prescribe their authority and duties.

(b) The Secretary may obtain services as authorized by section 3109 of title 5 of the United States Code, but at rates not to exceed $100 per diem for individuals unless otherwise specified in an appropriation Act.

(c) (1) Except where this Act vests in any administration, agency, or board, specific functions, powers, and duties, the Secretary may, in addition to the authority to delegate and redelegate contained in any other Act in the exercise of the functions transferred to or vested in the Secretary in this Act, delegate any of his residual functions, powers, and duties to such officers and employees of the Department as he may designate, may authorize such successive redelegations of such functions, powers, and duties as he may deem desirable, and may make such rules and regulations as may be necessary to carry out his functions, powers, and duties.

(2) In addition to the authority to delegate and redelegate contained in any other Act, in the exercise of the functions transferred to or specified by this Act to be carried out by any officer in the Department, such officer may delegate any of such functions, powers, and duties to such other officers and employees of the Department as he may designate; may authorize such successive redelegations of such functions, powers, and duties as he deems desirable; and may make such rules and regulations as may be necessary to carry out such functions, powers and duties.

(d) The Secretary is authorized to establish a working capital fund, to be available without fiscal year limitation, for expenses necessary for the maintenance and operation of such common administrative services as he shall find to be desirable in the interest of economy and efficiency in the Department, including such services as a central supply service for stationery and other supplies and equipment for which adequate stocks may be maintained to meet in whole or in part the requirements of the Department and its agencies; central messenger, mail, telephone, and other communications services; office space, central services for document reproduction, and for graphics and visual aids; and a central library service. The capital of the fund shall consist of any appropriations made for the purpose of providing capital (which appropriations are hereby authorized) and the fair and reasonable value of such stocks of supplies, equipment, and other assets and inventories on order as the Secretary may transfer to the fund, less the related liabilities and unpaid obligations. Such funds shall be reimbursed in advance from available funds of agencies and offices in the Department, or from other sources, for supplies and services at rates which will approximate the expense of operation, including the accrual of annual leave and the depreciation of equipment. The fund shall also be credited with receipts from sale or exchange of property and receipts in payment for loss or damage to property owned by the fund. There shall be covered into the United States Treasury as miscellaneous receipts any surplus found in the fund (all assets, liabilities, and prior losses considered) above the amounts transferred or appropriated to establish and maintain said fund.

(e) The Secretary shall cause a seal of office to be made for the Department of such device as he shall approve, and judicial notice shall be taken of such seal.

(f) In addition to the authority contained in any other Act which is transferred and vested in the Secretary, he or any other officer of the Department, as necessary and when not otherwise available, is authorized to provide for, construct, or maintain the following for employees and their dependents stationed at remote localities:

(1) emergency medical services and supplies;

(2) food and other subsistence supplies;

(3) messing facilities;

(4) motion picture equipment and film for recreation and training;

(5) reimbursement for food, clothing, medicine, and other supplies furnished by such employees in emergencies for the temporary relief of distressed persons; and

(6) living and working quarters and facilities.

The furnishing of medical treatment under clause (1) and the furnishing of services and supplies under clauses (2) and (3) of this subsection shall be at prices reflecting reasonable value, as determined by the Secretary, and the proceeds therefrom shall be credited to the appropriation from which the expenditure was made.

(g) (1) The Secretary is authorized to accept, hold, administer, and utilize gifts and bequests of property, both real and personal, for the purpose of aiding or facilitating the work of the Department. Gifts and bequests of money and the proceeds from sales of other property received as gifts or bequests shall be deposited in the Treasury in a separate fund and shall be disbursed upon order of the Secretary for carrying out the missions of the Department. Property accepted pursuant to this paragraph, and the proceeds thereof, shall be used as nearly as possible in accordance with the terms of the gift or bequest.

(2) For the purpose of Federal income, estate, and gift taxes, property accepted under paragraph (1) shall be considered as a gift or bequest to or for use of the United States.

(h) The Secretary is authorized to appoint, without regard to the civil service laws, such advisory committees as shall be appropriate for the purpose of consultation with, and advice to, the Department in performance of its functions. Such committees shall include members who are drawn from the general public and environmental organizations. Members of such committees, other than those regularly employed by the Federal Government, while attending meetings of such committees or otherwise serving at the request of the Secretary, may be paid compensation at rates not exceeding those authorized for individuals under subsection (b) of this section, and while so serving away from their homes or regular places of business, may be allowed travel expenses, includ-

ing per diem in lieu of subsistence as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

(i) (1) The Secretary is authorized to enter into contracts with educational institutions, public or private agencies or organizations, or persons for the conduct of scientific or technological research into any aspect of the problems related to the programs of the Department which are authorized by statute.

(2) The Secretary shall require a showing that the institutions, agencies, organizations, or persons with which he expects to enter into contracts pursuant to this subsection have the capability of doing effective work. He shall furnish such advice and assistance as he believes will best carry out the mission of the Department, participate in coordinating all research initiated under this subsection, indicate the lines of inquiry which seem to him most important, and encourage and assist in the establishment and maintenance of cooperation by and between the institutions, agencies, organizations, or persons and between them and other research organizations, the Department, and other Federal agencies.

(3) The Secretary may from time to time disseminate in the form of reports or publications to public or private agencies or organizations, or individuals, such information as he deems pertinent on the research carried out pursuant to this section.

(4) Nothing contained in this subsection is intended to amend, modify, or repeal any provisions of law administered by the Department which authorize the making of contracts for research.

(j) No research, demonstrations, or experiments shall, after the effective date of this Act, be carried out, contracted for, sponsored, cosponsored, or authorized under authority of the Act or any other law transferred to, and vested in, the Secretary, unless all information, uses, products, processes, patents, and other developments resulting from such research, demonstrations, or experiments will (with such exception and limitation, if any, as the Secretary may find to be necessary in the public interest) be available to the general public.

(k) (1) So much of the personnel, property, records, and unexpended balances of appropriations, allocations, and other funds employed, used, held, available, or to be made available in connection with the functions transferred to the Secretary or the Department by this Act as the Director of the Office of Management and Budget shall determine shall be transferred to the agency at such time or times as the Director shall direct.

(2) Such further measures and dispositions as the Director of the Office of Management and Budget shall deem to be necessary in order to effectuate the transfers referred to in paragraph (1) of this subsection shall be carried out in such manner as he shall direct and by such agencies as he shall designate.

(l) The Administrators appointed under this Act shall be compensated at the rate now or hereafter provided for level V of the Executive Schedule pay rates (5 U.S.C. 5314) and the Deputy Administrators appointed under this Act shall be compensated at the rate now or hereafter provided for level V of the Executive Schedule pay rates (5 U.S.C. 5315).

ANNUAL REPORT

SEC. 6. The Secretary shall, as soon as practicable after the end of each fiscal year, make a report in writing to the President and to the Congress on the activities of the Department during the preceding fiscal year.

SAVINGS PROVISIONS

SEC. 7. (a) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective—

(A) under any provision of law amended by this Act, or

(B) in the exercise of duties, powers, or functions which are transferred under this Act, by (i) any department or agency, any functions of which are transferred by this Act, or (ii) any court of competent jurisdiction, and

(2) which are in effect at the time this Act takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Secretary, Administrators, Board, or General Counsel (in the exercise of any authority respectively vested in them by this Act), by any court of competent jurisdiction, or by operation of law.

(b) The provisions of this Act shall not affect any proceedings pending at the time this section takes effect before any department or agency (or component thereof), functions of which are transferred by this Act; but such proceedings, to the extent that they relate to functions so transferred, shall be continued before the Department. Such proceedings to the extent they do not relate to functions so transferred, shall be continued before the Department or agency before which they were pending at the time of such transfer. In either case orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Secretary, Administrators, Board, or General Counsel (in the exercise of any authority respectively vested in them by this Act), by a court of competent jurisdiction, or by operation of law.

(c) (1) Except as provided in paragraph (2)—

(A) the provisions of this Act shall not affect suits commenced prior to the date this section takes effect, and

(B) in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this Act had not been enacted.

No suit, action, or other proceedings commenced by or against any officer in his official capacity as an officer of any department or agency, functions of which are transferred by this Act, shall abate by reason of the enactment of this Act. No cause of action by or against any department or agency, functions of which are transferred by this Act, or by or against any officer thereof in his official capacity shall abate by reason of the enactment of this Act. Causes of actions, suits, actions, or other proceedings may be asserted by or against the United States or such official of the Department as may be appropriate and, in any litigation pending when this section takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this subsection.

(2) If before the date on which this Act takes effect, any department or agency, or officer thereof in his official capacity, is a party to a suit, and under this Act—

(A) such department or agency is transferred to the Secretary, or

(B) any function of such department, agency, or officer is transferred to the Secretary,

then such suit shall be continued by the Secretary (except in the case of a suit not involving functions transferred to the Secretary, in which case the suit shall be continued by the department, agency, or officer which was a party to the suit prior to the effective date of this Act).

(d) With respect to any function, power, or duty transferred by this Act and exercised after the effective date of this Act, reference in any other Federal law to any department or agency, officer or office so transferred or functions of which are so transferred or functions of which are so transferred shall be deemed to mean the officer or agency in which this Act vests such function after such transfer.

SEPARABILITY

SEC. 8. If any provision of this Act or the application thereof to any person or circumstances is held invalid, the remainder of this Act, and the application of such provision to other persons or circumstances shall not be affected thereby.

CODIFICATION

SEC. 9. The Secretary is directed to submit to the Congress within two years from the effective date of this Act, a proposed codification of all laws that contain the powers duties, and functions transferred to or vested in the Secretary or the Department by this Act.

EFFECTIVE DATE; INITIAL APPOINTMENT OF OFFICERS

SEC. 10. (a) This Act shall take effect ninety days after the Secretary first takes office, or on such prior date after enactment of this Act as the President shall prescribe and publish in the Federal Register.

(b) Any of the officers provided for in this Act may (notwithstanding subsection (a)) be appointed in the manner provided for in this Act, at any time after the date of enactment of this Act. Such officers shall be compensated from the date they first take office, at the rates provided for in this Act. Such compensation and related expenses of their offices shall be paid from funds available for the functions to be transferred to the Department pursuant to this Act.

CONFORMING AMENDMENTS TO OTHER LAWS

SEC. 11. (a) Section 19(d)(1) of title 3, United States Code, as amended, is hereby amended by striking out the period at the end thereof and inserting a comma and the following: "Secretary of Environmental Quality.".

(b) Section 101 of title 5 of the United States Code, as amended, is amended by inserting at the end the following:

"The Department of Environmental Quality."

(c) The amendment made by subsection (b) of this section shall not be construed to make applicable to the Department any provision of law inconsistent with this Act.

(d) Subchapter II (relating to Executive Schedule pay rates) of chapter 53 of title 5 of the United States Code, as amended, is amended as follows:

(1) Section 5312 is amended by adding at the end thereof the following:

"(13) Secretary of Environmental Quality."

(2) Section 5313 is amended by adding at the end thereof the following:

"(21) Under Secretary of Environmental Quality."

(3) Section 5314 is amended by adding at the end thereof the following:

"(55) Administrator, Federal Water Quality Control Administration.

"(56) Administrator, National Air Quality Control Administration.

"(57) Administrator, Environmental Protection Administration."

(4) Section 5315 is amended by adding at the end thereof the following:

"(93) Assistant Secretaries of Environmental Quality (3)."

(5) Section 5316 is amended by adding at the end thereof the following:

"(130) Assistant Secretary for Administration, Department of Environmental Quality.

"(131) General Counsel, Department of Environmental Quality.

"(132) Deputy Administrators, Department of Environmental Quality (15)."

(6) Section 5317 is amended by striking

out in the note thereunder "Commissioner, Federal Water Pollution Control Administration, Department of the Interior."

ABOLITIONS

SEC. 12. Subject to the provisions of section 10 of this Act, the following, exclusive of any functions, are hereby abolished:

(1) The Federal Water Quality Administration in the Department of the Interior (33 U.S.C. 466–1); and

(2) The Federal Radiation Council (73 Stat. 690; 42 U.S.C. 2021(h)).

The CHAIRMAN. The time of the gentleman has expired.

Mr. ERLENBORN. Mr. Chairman, I yield 1 additional minute to the gentleman from Michigan.

Mr. DINGELL. I thank the gentleman for yielding me the additional time.

Mr. KYL. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Iowa.

Mr. KYL. Since the gentleman has commented on the other side of this coin, I would like to ask this question:

What legislative committee of the Congress will now be responsible for the authorization to cover the acts contemplated in this measure?

Mr. DINGELL. I would say this, that the different statutes and the different functions which are transferred over to administer the new agency will probably remain in the existing committee structure of the Congress. I doubt very much if that would be particularly impaired. But I would urge on my colleagues that we would be far better off to do this by legislation which would come out of the same committee that has given us this outrage, and this abomination, and give to the Members who oppose it an opportunity to amend it in a calm, serene, and deliberate fashion.

Mr. KYL. I thank the gentleman.

Mr. DINGELL. I yield back the balance of my time.

Mr. ERLENBORN. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. DON H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Chairman, I wonder if I could have the attention of the gentleman from California (Mr. HOLIFIELD), the chairman of the committee, to further discuss the comments that have been made by the gentleman from Michigan (Mr. DINGELL), since this relates to the question of committee jurisdiction over the legislation.

Does the gentleman see any changes in the jurisdictional control by the committees that now handle environmental quality programs as proposed by the Executive and/or our colleagues?

For instance, in our case, in the Rivers and Harbors Committee, we have been handling, routinely, the water pollution and water quality legislation. Will this remain under the jurisdiction of the Committee on Rivers and Harbors?

Mr. HOLIFIELD. Mr. Chairman, in my opinion the statutes that have created these entities will remain in the jurisdictional control of the committees that created them. There is no place that I know of in the plan where the statutes are transferred, the functions under the statutes are transferred.

I would also like to answer a question here that was asked me by the gentlewoman from Washington (Mrs. HANSEN) who unfortunately cannot be here today, but who asked me by phone. She was particularly concerned about the control of the appropriations for the Bureau of Commercial Fisheries being taken away from her subcommittee on appropriations. My answer to her was that in my opinion the control of the assignment of appropriations jurisdictions would still remain in the chairman of the Committee on Appropriations, and I can see nothing in this plan that would cause her jurisdictional control on appropriations for the Bureau of Commercial Fisheries to be transferred. And that would apply to all other statutes and all other commissions.

Mr. DON H. CLAUSEN. I thank the gentleman for his response because I think it is important to make this legislative history at this point, because there will be lots of people asking that question.

Mr. HOLIFIELD. I think that that is a good question, and I have answered it to the best of my knowledge on the subject matter. Previous reorganization plans did not transfer statutory control out of the jurisdiction of the committees, nor the appropriation committees or committee chairmen.

Mr. DON H. CLAUSEN. I think that by and large most people tend to agree that a committee that works in a given field tends to develop substantially more expertise than would other committees, so that is quite natural and understandable, and is the reason for my concern in this matter, and the reason for the question.

Mr. HOLIFIELD. The establishment of a new department, like the Department of Transportation, for instance, is by regular statute. That is a different situation than obtains in a reorganization plan.

Mr. DON H. CLAUSEN. I thank the gentleman for his response.

Mr. ANDERSON of Illinois. Mr. Chairman, I rise in strong opposition to House Resolution 1209 to disapprove Reorganization Plan No. 3 of 1970. This bold and sweeping reform plan advanced by President Nixon would bring under the roof of a new Environmental Protection Agency a myriad of Government activities for the purpose of waging an all-out coordinated attack on air, land, and water pollution.

In his message to the Congress on July 9, 1970, President Nixon explained the need for a new central agency to deal with the environment in these terms:

Our National Government today is not structured to make a coordinated attack on the pollutants which debase the air we breathe, the water we drink, and the land that grows our food. Indeed, the present governmental structure for dealing with environmental pollution often defies effective and concerted action. Despite its complexity, for pollution control purposes the environment must be perceived as a single, interrelated system. Present assignments of departmental responsibilities do not reflect this interrelatedness.

Simply speaking, Reorganization Plan No. 3 recognizes the inadequacies of the current proliferation of pollution functions within the Federal Government, and seeks to rectify them by bringing together these scattered components under the umbrella of a new Environmental Protection Agency. The principal roles and functions of this new agency, EPA, would include the establishment and enforcement of environmental protection standards, conducting research on the adverse effects of pollution and methods and equipment for controlling it, assisting others in combatting pollution through grants and technical assistance, and working closely with the Council on Environmental Quality in formulating new policies for environmental protection.

Mr. Chairman, I realize that there is some opposition to this new reorganization plan for various reasons. There are those who question the need for both an Environmental Protection Agency and a Council on Environmental Quality, suggesting that there might be a duplication of responsibiiities and functions. I think the President handled this question quite well in his message by pointing out that the Council will continue to serve in an advisory capacity to the President on broad policy questions, while the Agency will serve as the actual operating arm of the Federal Government in our overall efforts to combat pollution and protect the environment.

There are others who criticize this plan on the grounds that it is not as comprehensive or all-inclusive as it should be. Many of these critics favor instead a Department of the Environment or a Department of Natural Resources, or a combination of the two. While this proposal may have some merit and should not be rejected out of hand, I firmly believe that we should think twice before creating a new super-bureaucracy along the lines of HEW which every Secretary to date has, in frustration, referred to as an unmanageable monster. Such a proposal could well prove to be counterproductive if it turned out that we had assigned the vital mission of managing the environment to an unmanageable monster.

For these reasons, I strongly support the creation of an Environmental Protection Agency as embodied in Reorganization Plan No. 3. In this proposal we have a realistic and manageable approach to environmental protection. In this proposal we have an agency with clearly delineated duties, responsibilities, and authority. And in this proposal we have what I feel is the best possible approach to waging the type of coordinated attack on pollution which is so necessary if we are to preserve, protect, and restore our environment.

Finally, Mr. Chairman, in this proposal I think we have the embodiment of what we are striving for in both a decade of reform and a decade of the environment.

Mr. DERWINSKI. Mr. Chairman, it is elementary commonsense to coordinate all Federal programs related to curbing pollution and its causes. Therefore, I support Reorganization Plan No. 3, which would form a new Environmental Protection Agency.

Mr. Chairman, I personally assign extremely high priority to the battle

against pollution and believe that we are taking a constructive step this afternoon in supporting Reorganization Plan No. 3.

Mr. BLATNIK. Mr. Chairman, I think it is important that we take note of certain aspects of Reorganization Plan No. 3, which, to my mind, causes it to be found wanting. The plan sets up an Environmental Protection Agency, a very high sounding title that I am afraid may give a misleading impression to the public of just what this new agency can do. There is no doubt that we need a greater focus within the Government on the problems of our environment. This is one of the most important issues of the times. I favor a meaningful reorganization of environmental activities—but this plan does not provide it.

First of all the plan is extremely limited in scope. It takes the largest and most effective program that we have—water pollution abatement—and adds to it air pollution and a few other less significant activities—in terms of dollars being spent—and implies that this agency will control the environment. We all know that there is much more involved in the environment than this.

Meaningful environmental protection surely includes the water and sewer programs now in the Department of Housing and Urban Development. But they should be in this plan. Unfortunately, EPA, as constituted is not adequate even to administer the water program which itself is underfunded and barely holding the line in relationship to the need.

How about aircraft noise? This is a major problem of the environment; but it is not in the plan. It is still in the Department of Transportation. What about oil spills? What about the management of our public lands and forests? What about the environmental pollution caused by the numerous Federal installations spread throughout the land?

Why are all of these important and pertinent programs left out of this widely heralded Environmental Protection Agency? Frankly, I cannot understand why a so-called reorganization to improve our attack on environmental problems would take just the minimum step, as this does, instead of bringing together a significant number of these activities.

Could it be in the way this plan was developed? As I understand it, the plan was prepared by the President's Advisory Council. But I have not been able to find out who was consulted in its drafting. Certainly, those of us in the House who have labored for so many years to develop environmental programs, and who have gained considerable experience in this field were not consulted. If we had been, I think a far better reorganization plan than plan No. 3 could have been put together. I do not wish to criticize the Advisory Council but there must have been poor staff work along the line.

Even this limited plan could well cause confusion in its administration. We have not been given a clear understanding of the distinction between the new EPA and the Council on Environmental Quality. We were told that the Council makes governmentwide policy and EPA will be an operating agency for the programs which will be assigned to it. But I must say this is rather unusual in the Government for one agency to make policy and for another to carry it out. I suspect that considerable confusion will arise over the respective roles of these two groups.

The task of a proper reorganization is so great that it should be undertaken by legislation rather than by a reorganization plan. To follow through on this, a bill has already been introduced by several of my colleagues Congressmen Moss, DINGELL, REUSS and myself—H.R. 19195—which provides a basis for our work. This is preliminary effort and the subcommittee will begin a detailed consideration of this legislation, obtaining all of the necessary background materials and information. I have directed our staff to draw upon all sources and accumulate a complete study of knowledge.

I believe, in this way, that an organization which will truly contribute to the solution of our environmental problems can be produced.

I have tried to make my criticism of plan No. 3 in a positive manner and call upon all Members, industry groups, and interested citizens for their thoughts and suggestions.

The text of H.R. 19195, which creates a Department of Environmental Quality, follows:

H.R. 19195

A bill to establish a Department of Environmental Quality, and for other purposes

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Department of Environmental Quality Act".

DECLARATION OF PURPOSE

SEC. 2. (a) The Congress hereby declares that—

(1) the public health, general welfare, and economic growth and stability of the Nation is dependent on the continued availability of unpolluted air and water—our irreplaceable resources; and

(2) high-density urbanization, industrial development and expansion, population growth and concentrations, resource exploitation, and new and expanding technological advances, together with the lack of adequate consideration given by public and private agencies and individuals to the impact of these activities on the total environment, has resulted in mounting dangers to the public health and welfare and our environment.

(b) (1) The Congress therefore finds that the establishment of a Department of Environmental Quality is necessary in the public interest and to protect the public health; to assure the coordinated, effective protection and enhancement of the quality of the environment; to facilitate a coordinated, effective attack on the pollutants which debase the air we breathe, the water we drink and use for recreation and agricultural purposes, and the land that supplies our food and supports our wildlife; to encourage and foster cooperation of Federal, State, and local agencies and foreign governments and private organizations and agencies and individuals toward the prompt achievement of the national environmental quality protection and enhancement objectives set forth in this Act and many other statutes; to stimulate technological advances in pollution control and prevention and environmental protection and enhancement; to provide general leadership nationally and internationally in the identification and solution of environmental problems; and to develop, further define, and to recommend to the President and the Congress new and improved programs, including the adequate financing of such programs and existing programs, and to accomplish these objectives with full and appropriate consideration of the need to encourage the growth and development of the Nation, to improve the daily lives of all of the people of the Nation, and to preserve our national security.

(2) It is hereby declared to be the national policy that the prevention of air and water pollution and the protection and enhancement of the total environment in productive harmony with the social, economic, and other requirements of present and future generations of Americans is in the paramount interest of the United States.

ESTABLISHMENT OF DEPARTMENT

SEC. 3. (a) There is hereby established at the seat of Government an executive department to be known as the Department of Environmental Quality (hereafter referred to in this Act as the "Department"). There shall be at the head of the Department a Secretary of Environmental Quality (hereafter referred to in this Act as the "Secretary"), who shall be appointed by the President, by and with the advice and consent of the Senate.

(b) There shall be in the Department an Under Secretary, who shall be appointed by the President, by and with the advice and consent of the Senate. The Under Secretary (or, during the absence or disability of the Under Secretary, or in the event of a vacancy in the office of Under Secretary, an Assistant Secretary or the General Counsel, determined according to such order as the Secretary shall prescribe) shall act for, and exercise the powers of the Secretary, during the absence or disability of the Secretary or in the event of a vacancy in the office of Secretary. The Under Secretary shall perform such functions, powers, and duties as the Secretary shall prescribed from time to time.

(c) There shall be in the Department three Assistant Secretaries and a General Counsel who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall perform such functions, powers, and duties as the Secretary shall prescribe from time to time. The Assistant Secretaries shall be: for air and water pollution control; for environmental protection; and for international affairs.

(d) There shall be in the Department an Assistant Secretary for Administration, who shall be appointed, with the approval of the President, by the Secretary under the classified civil service who shall perform such functions, powers, and duties as the Secretary shall prescribe from time to time.

(e) There is hereby established within the Department a Federal Water Quality Control Administration; a National Air Quality Control Administration; and an Environmental Protection Administration. Each of these components shall be headed by an Administrator. In the case of each Administration, there shall be five Deputy Administrators appointed by the Secretary: for Research and Development; for Loans and Grants; for Standards and Regulations Development and Intergovernmental Coordination; for Enforcement; and for Administration and Public Information. The Administrators shall be appointed by the President, by and with the advice and consent of the Senate.

(f) In addition to such functions, powers, and duties specified in this Act to be carried out by the Administrators, they shall carry out such other functions, powers, and duties as the Secretary may prescribe. The Administrators shall report to the Secretary through the applicable Assistant Secretary and the Under Secretary. Each Deputy Administrator (according to such order as the appropriate Administrator shall prescribe) shall act for, and exercise the duties of, the

appropriate Administrator during his absence or disability. Each Administrator shall prescribe the functions, powers, and duties of each of his Deputy Administrators.

(g) The functions, powers, and duties as are specified in this Act to be carried out by an Administrator shall not be transferred elsewhere in the Department unless specifically provided for by reorganization plan submitted pursuant to provisions of chapter 9 of title 5, United States Code, or by Act of Congress enacted after the effective date of this Act.

TRANSFER TO DEPARTMENT

SEC. 4. There are hereby transferred to the Secretary to be administered by him through the Administrator of the Federal Water Quality Control Administration all functions, powers, and duties of the Secretary of the Interior and other offices and officers of the Department of the Interior administered:

(1) by him or by the Federal Water Quality Administration pursuant to (A) the Federal Water Pollution Control Act, as amended, (B) Reorganization Plan Numbered 2 of 1966 (80 Stat. 1608), and (C) section 169(d)(1)(B) and (3) of the Internal Revenue Code of 1954, as amended, but shall not include the functions of the Bureau of Reclamation under section 3(b)(1) of the Federal Water Pollution Control Act, as amended; and

(2) by the Water Resources Division of the Geological Survey, including, but not limited to, the water monitoring functions of the Geological Survey.

(b) There are hereby transferred to the Secretary to be administered by him through such Administrator all functions, powers, and duties of the:

(1) Secretary of Agriculture administered by him through the Farmers Home Administration insofar as such functions, powers, and duties relate to water and sewer facilities; and

(2) Secretary of Housing and Urban Development, the Secretary of Commerce, and the Appalachian Regional Commission insofar as such functions, powers, and duties relate to water and sewer facilities.

(c)(1) There are hereby transferred to the Secretary to be administered by him through the Administrator of the National Air Quality Control Administration all functions, powers, and duties of the Secretary of Health, Education, and Welfare under the Clean Air Act, as amended, and section 169(d)(1)(B) and (3) of the Internal Revenue Code of 1954, as amended.

(2) There are hereby transferred to the Secretary to be administered by him the Air Quality Advisory Board established by section 110 of the Clean Air Act, as amended.

(d) There are hereby transferred to the Secretary to be administered by him through the Administrator of the Environmental Protection Administration all functions, powers, and duties of the:

(1) Secretary of the Interior (A) under the Act of August 1, 1958, as amended (16 U.S.C. 742d–1), relating to studies of effects of insecticides, herbicides, fungicides, and pesticides, (B) which are administered by him through the Gulf Breeze Biological Laboratory, and (C) which are administered by him through the Bureau of Mines insofar as such functions, powers, and duties relate to solid waste management;

(2) Secretary of Health, Education, and Welfare which are administered by him through the Bureau of Solid Waste Management, the Bureau of Water Hygiene, and the Bureau of Radiological Health and which are vested in him for establishing tolerances for pesticide chemicals under the Federal Food, Drug, and Cosmetic Act, as amended (21 U.S.C. 346, 346a, and 349) together with authority, in connection with the functions transferred, (A) to monitor compliance with the tolerances and the effectiveness of surveillance and enforcement, and (B) to provide technical assistance to the States and conduct research under the Federal Food, Drug, and Cosmetic Act, as amended, and the Public Health Service Act, as amended, except that those functions, powers, and duties carried out by the Environmental Control Administration of the Environmental Health Service through the Bureau of Community Environmental Management, the Bureau of Occupational Safety and Health, and the Bureau of Radiological Health, are not so transferred insofar as those functions, powers, and duties carried out by the latter Bureau pertain solely to (A) regulation of radiation from consumer products, including electronic product radiation, (B) radiation as used in the hearing arts, (C) occupational exposures to radiation, and (D) research, technical assistance, and training related to such clauses (A), (B), and (C);

(3) Secretary of Agriculture (A) under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 U.S.C. 135–135k), under section 408(l) of the Federal Food, Drug, and Cosmetic Act, as amended (21 U.S.C. 346a(l)), and (B) which are administered through the Environmental Quality Branch of the Plant Protection Division of the Agricultural Research Service;

(4) Secretary of Transportation with respect to, and being administered by him, through the Office of Noise Abatement;

(5) Federal Radiation Council under section 274 of the Act of August 1, 1946, as amended (42 U.S.C. 2021(h)); and

(6) Atomic Energy Commission under the Atomic Energy Act of 1954, as amended, which are administered through the Division of Radiation Protection Standards, to the extent that such functions, powers, and duties consist of establishing and enforcing environmental standards and safeguards for the protection of the general environment from radioactive material which standards are defined to mean: limits on radiation exposures or levels, or concentrations of or quantities of radioactive material, in the general environment outside the boundaries of locations under the control of persons possessing or using radioactive material.

(e) The Secretary, in administering the programs transferred under this section, shall coordinate his activities with those of the departments and agencies which administer such programs prior to the effective date of this Act.

(f) Within one hundred and eighty days after the effective date of this Act, the President may transfer to the Secretary any function of any other agency or office or part thereof if the President determines that such function relates to functions transferred to the Secretary under this section.

ADMINISTRATIVE PROVISIONS

SEC. 5. (a) In addition to the authority contained in any other Act which is transferred to, and vested in, the Secretary, he or any other officer of the Department may, subject to the civil service and classification laws, select, appoint, employ, and fix the compensation of such officers and employees, including investigators, attorneys, and hearing examiners, as are necessary to carry out the provisions of this Act and to prescribe their authority and duties.

(b) The Secretary may obtain services as authorized by section 3109 of title 5 of the United States Code, but at rates not to exceed $100 per diem for individuals unless otherwise specified in an appropriation Act.

(c)(1) Except where this Act vests in any administration, agency, or board, specific functions, powers, and duties, the Secretary may, in addition to the authority to delegate and redelegate contained in any other Act in the exercise of the functions transferred to or vested in the Secretary in this Act, delegate any of his residual functions, powers, and duties to such officers and employees of the Department as he may designate, may authorize such successive redelegations of such functions, powers, and duties as he may deem desirable, and may make such rules and regulations as may be necessary to carry out his functions, powers, and duties.

(2) In addition to the authority to delegate and redelegate contained in any other Act, in the exercise of the functions transferred to or specified by this Act to be carried out by any officer in the Department, such officer may delegate any of such functions, powers, and duties to such other officers and employees of the Department as he may designate; may authorize such successive redelegations of such functions, powers, and duties as he deems desirable; and may make such rules and regulations as may be necessary to carry out such functions, powers, and duties.

(d) The Secretary is authorized to establish a working capital fund, to be available without fiscal year limitation, for expenses necessary for the maintenance and operation of such common administrative services as he shall find to be desirable in the interest of economy and efficiency in the Department, including such services as a central supply service for stationery and other supplies and equipment for which adequate stocks may be maintained to meet in whole or in part the requirements of the Department and its agencies; central messenger, mail, telephone, and other communications services; office space, central services for document reproduction, and for graphics and visual aids; and a central library service. The capital of the fund shall consist of any appropriations made for the purpose of providing capital (which appropriations are hereby authorized) and the fair and reasonable value of such stocks of supplies, equipment, and other assets and inventories on order as the Secretary may transfer to the fund, less the related liabilities and unpaid obligations. Such funds shall be reimbursed in advance from available funds of agencies and offices in the Department, or from other sources, for supplies and services at rates which will approximate the expense of operation, including the accrual of annual leave and the depreciation of equipment. The fund shall also be credited with receipts from sale or exchange of property and receipts in payment for loss or damage to property owned by the fund. There shall be covered into the United States Treasury as miscellaneous receipts any surplus found in the fund (all assets, liabilities, and prior losses considered) above the amounts transferred or appropriated to establish and maintain said fund.

(e) The Secretary shall cause a seal of office to be made for the Department of such device as he shall approve, and judicial notice shall be taken of such seal.

(f) In addition to the authority contained in any other Act which is transferred and vested in the Secretary, he or any other officer of the Department, as necessary and when not otherwise available, is authorized to provide for, construct, or maintain the following for employees and their dependents stationed at remote localities:

(1) emergency medical services and supplies;

(2) food and other subsistence supplies;

(3) messing facilities;

(4) motion picture equipment and film for recreation and training;

(5) reimbursement for food, clothing, medicine, and other supplies furnished by such employees in emergencies for the temporary relief of distressed persons; and

(6) living and working quarters and facilities.

The furnishing of medical treatment under clause (1) and the furnishing of services and supplies under clauses (2) and (3) of this subsection shall be at prices reflecting rea-

sonable value, as determined by the Secretary, and the proceeds therefrom shall be credited to the appropriation from which the expenditure was made.

(g)(1) The Secretary is authorized to accept, hold, administer, and utilize gifts and bequests of property, both real and personal, for the purpose of aiding or facilitating the work of the Department. Gifts and bequests of money and the proceeds from sales of other property received as gifts or bequests shall be deposited in the Treasury in a separate fund and shall be disbursed upon order of the Secretary for carrying out the missions of the Department. Property accepted pursuant to this paragraph, and the proceeds thereof, shall be used as nearly as possible in accordance with the terms of the gift or bequest.

(2) For the purpose of Federal income, estate, and gift taxes, property accepted under paragraph (1) shall be considered as a gift or request to or for use of the United States.

(h) The Secretary is authorized to appoint, without regard to the civil service laws, such advisory committees as shall be appropriate for the purpose of consultation with, and advice to, the Department in performance of its functions. Such committees shall include members who are drawn from the general public and environmental organizations. Members of such committees, other than those regularly employed by the Federal Government, while attending meetings of such committees or otherwise serving at the request of the Secretary, may be paid compensation at rates not exceeding those authorized for individuals under subsection (b) of this section, and while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

(i)(1) The Secretary is authorized to enter into contracts with educational institutions, public or private agencies or organizations, or persons for the conduct of scientific or technological research into any aspect of the problems related to the programs of the Department which are authorized by statute.

(2) The Secretary shall require a showing that the institutions, agencies, organizations, or persons with which he expects to enter into contracts pursuant to this subsection have the capability of doing effective work. He shall furnish such advice and assistance as he believes will best carry out the mission of the Department, participate in coordinating all research initiated under this subsection, indicate the lines of inquiry which seems to him most important, and encourage and assist in the establishment and maintenance of cooperation by and between the institutions, agencies, organizations, or persons and between them and other research organizations, the Department, and other Federal agencies.

(3) The Secretary may from time to time disseminate in the form of reports or publications to public or private agencies or organizations, or individuals, such information as he deems pertinent on the research carried out pursuant to this section.

(4) Nothing contained in this subsection is intended to amend, modify, or repeal any provisions of law administered by the Department which authorize the making of contracts for research.

(j) No research, demonstrations, or experiments shall, after the effective date of this Act, be carried out, contracted for, sponsored, cosponsored or authorized under authority of the Act or any other law transferred to, and vested in, the Secretary, unless all information, uses, products, processes, patents and other developments resulting from such research, demonstrations, or experiments will (with such exception and limitation, if any, as the Secretary may find to be necessary in the public interest) be available to the general public.

(k)(1) So much of the personnel, property, records, and unexpended balances of appropriations, allocations, and other funds employed, used, held, available, or to be made available in connection with the functions transferred to the Secretary of the department by this Act as the Director of the Office of Management and Budget shall determine shall be transferred to the agency at such time or times as the Director shall direct.

(2) Such further measures and dispositions as the Director of the Office of Management and Budget shall deem to be necessary in order to effectuate the transfers referred to in paragraph (1) of this subsection shall be carried out in such manner as he shall direct and by such agencies as he shall designate.

(l) The Administrators appointed under this Act shall be compensated at the rate now or hereafter provided for level V of the Executive Schedule pay rates (5 U.S.C. 5314) and the Deputy Administrator appointed under this Act shall be compensated at the rate now or hereafter provided for level V of the Exexecutive Schedule pay rates (5 U.S.C. 5315).

ANNUAL REPORT

SEC. 6. The Secretary shall, as soon as practicable after the end of each fiscal year, make a report in writing to the President and to the Congress on the activities of the Department during the preceding fiscal year.

SAVINGS PROVISION

SEC. 7. (a) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issues, made, granted, or allowed to become effective—

(A) under any provision of law amended by this Act, or

(B) in the exercise of duties, powers, or functions which are transferred under this Act, by (i) any department or agency, any functions of which are transferred by this Act, or (ii) any court of competent jurisdiction, and

(2) which are in effect at the time this Act takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Secretary, Administrators, Board, or General Counsel (in the exercise of any authority respectively vested in them by this Act), by any court of competent jurisdiction, or by operation of law.

(b) The provisions of this Act shall not affect any proceedings pending at the time this section takes effect before any department or agency (or component thereof), functions of which are transferred by this Act; but such proceedings, to the extent that they relate to functions so transferred, shall be continued before the Department. Such proceedings to the extent they do not relate to functions so transferred, shall be continued before the Department or agency before which they were pending at the time of such transfer. In either case orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Secretary, Administrators, Board, or General Counsel (in the exercise of any authority respectively vested in them by this Act), by a court of competent jurisdiction, or by operation of law.

(c)(1) Except as provided in paragraph (2)—

(A) the provisions of this Act shall not affect suits commenced prior to the date this section takes effect, and

(B) in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this Act had not been enacted.

No suit, action, or other proceeding commenced by or against any officer in his official capacity as an officer of any department or agency, functions of which are transferred by this Act, shall abate by reason of the enactment of this Act. No cause of action by or against any department or agency, functions of which are transferred by this Act, or by or against any officer thereof in his official capacity shall abate by reason of the enactment of this Act. Causes of actions, suits, actions, or other proceedings may be asserted by or against the United States or such official of the Department as may be appropriate and, in any litigation pending when this section takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this subsection.

(2) If before the date on which this Act takes effect, any department or agency, or officer thereof in his official capacity, is a party to a suit, and under this Act—

(A) Such department or agency is transferred to the Secretary, or

(B) any function of such department, agency, or officer is transferred to the Secretary,

then such suit shall be continued by the Secretary (except in the case of a suit not involving functions transferred to the Secretary, in which case the suit shall be continued by the department, agency, or officer which was a party to the suit prior to the effective date of this Act).

(d) With respect to any function, power, or duty transferred by this Act and exercised after the effective date of this Act, reference in any other Federal law to any department or agency, officer or office so transferred or functions of which are so transferred shall be deemed to mean the officer or agency in which this Act vests such function after such transfer.

SEPARABILITY

SEC. 8. If any provision of this Act or the application thereof to any person or circumstances is held invalid, the remainder of this Act, and the application of such provision to other persons or circumstances shall not be affected thereby.

CODIFICATION

SEC. 9. The Secretary is directed to submit to the Congress within two years from the effective date of this Act, a proposed codification of all laws that contain the powers, duties, and functions transferred to or vested in the Secretary or the Department by this Act.

EFFECTIVE DATE; INITIAL APPOINTMENT OF OFFICERS

SEC. 10. (a) This Act shall take effect ninety days after the Secretary first takes office, or on such prior date after enactment of this Act as the President shall prescribe and publish in the Federal Register.

(b) Any of the officers provided for in this Act may (notwithstanding subsection (a)) be appointed in the manner provided for in this Act, at any time after the date of enactment of this Act. Such officers shall be compensated from the date they first take office, at the rates provided for in this Act. Such compensation and related expenses of their offices shall be paid from funds available for the functions to be transferred to the Department pursuant to this Act.

CONFORMING AMENDMENTS TO OTHER LAWS

SEC. 11. (a) Section 19(d)(1) of title 3, United States Code, as amended, is hereby amended by striking out the period at the end thereof and inserting a comma and the following: "Secretary of Environmental Quality.".

(b) Section 101 of title 5 of the United

States Code, as amended, is amended by inserting at the end the following:

"The Department of Environmental Quality."

(c) The amendment made by subsection (b) of this section shall not be construed to make applicable to the Department any provision of law inconsistent with this Act.

(d) Subchapter II (relating to Executive Schedule pay rates) of chapter 53 of title 5 of the United States Code, as amended, is amended as follows:

(1) Section 5312 is amended by adding at the end thereof the following:

"(13) Secretary of Environmental Quality."

(2) Section 5313 is amended by adding at the end thereof the following:

"(21) Under Secretary of Environmental Quality."

(3) Section 5314 is amended by adding at the end thereof the following:

"(55) Administrator, Federal Water Quality Control Administration.

"(56) Administrator, National Air Quality Control Administration.

"(57) Administrator, Environmental Protection Administration."

(4) Section 5315 is amended by adding at the end thereof the following:

"(93) Assistant Secretaries of Environmental Quality (3)."

(5) Section 5316 is amended by adding at the end thereof the following:

"(130) Assistant Secretary for Administration, Department of Environmental Quality.

(131) General Counsel, Department of Environmental Quality.

"(132) Deputy Administrators, Department of Environmental Quality (15)."

(6) Section 5317 is amended by striking out in the note thereunder "Commissioner, Federal Water Pollution Control Administration, Department of the Interior."

ABOLITIONS

SEC. 12. Subject to the provisions of section 10 of this Act, the following, exclusive of any functions, are hereby abolished:

(1) The Federal Water Quality Administration in the Department of the Interior (33 U.S.C. 466–1); and

(2) The Federal Radiation Council (73 Stat. 690; 42 U.S.C. 2021(h)).

Mr. BROWN of Ohio. Mr. Chairman, current executive branch assignments relating to Federal environmental activities are now scattered among a number of departments and agencies and their assignments bear no resemblance to the interrelated problems of the environment which must be perceived as an interlocked challenge. Having developed piecemeal, responsibility for pollution control is divided primarily according to the medium in which the contaminant occurs although pollution from a single source may be present in them all.

I have looked at this problem from several different directions and from my own observation know that research, standard setting, and policy formulation do not occur on a comprehensive basis.

Water, air, solid waste disposal, and atomic powerplant pollution should be considered together.

In the enforcement area under the Clean Air Act, there is authority vested in the Secretary of Health, Education, and Welfare to set standards and engage in enforcement. As a member of the Interstate and Foreign Commerce Committee where this authority originated, I am very much interested in seeing it transferred to an agency where more concentrated administration and coordinated research can be conducted in association with the more sophisticated research and standard setting already developed by the Water Quality Administration.

As a member of the Intergovernmental Relations Subcommittee of the Committee on Government Operations, I participated in a study of the Agricultural Research Service which disclosed the inability of the Department of Health, Education, and Welfare to get information out of the Agricultural Research Service that related the use of pesticides in which the Department of Health, Education, and Welfare was interested and over which the Agricultural Research Service had the licensing authority.

I have seen the frustrations experienced by industry and State and local governments who have had to deal with a fragmented Federal structure.

Therefore, I am delighted to see Reorganization Plan No. 3 of 1970 which would create a nucleus of research, standard setting and enforcement responsibilities in a single agency which will not be able to pass the buck to other agencies.

The standard-setting function is a critical factor in efforts to improve environmental quality and one should not underestimate its leverage. And standards must be based on sound research.

Others may question my terminology, but I look upon the Environmental Protection Agency as the beginning of a strong regulatory agency which should be expanded and strengthened with the inclusion of other environmental protection functions as time goes on. In some instances new legislation will be required and other laws will need revision since, pursuant to the reorganization provisions of 5 U.S.C. 901–913, a reorganization plan cannot create any new authorities or functions.

At the outset, the plan would combine the functions carried out by the Federal Water Quality Administration—FWQA—now in the Department of the Interior; the National Air Pollution Control Administration—NAPCA—parts of the Environmental Control Administration—ECA—and the pesticides research and regulatory programs of the Food and Drug Administration, all presently located in HEW; the pesticides registration and related authority of the Department of Agriculture; the environmental radiation protection standard-setting function of the AEC; the functions of the Federal Radiation Council; some of the pesticides research conducted by the Bureau of Commercial Fisheries; and authority to conduct ecological systems research, now vested in the Council on Environmental Quality.

One of the advantages that will accrue both to industry and to State and local governments, will be the ability to come to one place in the Federal Government concerned with most of the standard-setting that relates to poliution control. It is important that State and local governments, too, deal with the environment as an entity.

The Environmental Protection Agency will enable us to develop much more effective knowledge as to how to deal with pollution in the future. I believe it will be much more effective than what we have had in the past and I view the prospect with enthusiasm.

Therefore, I urge a vote "no" on House Resolution 1209 in order that Reorganization Plan No. 3 of 1970 may become law.

Mr. ROBISON. Mr. Chairman, I am pleased to have the opportunity today to cast my vote for Mr. Nixon's Environmental Protection Agency, EPA, which I regard as an important step toward making protection of our environment and the elimination of pollution a high priority Federal matter. There are those who criticize the EPA as not going far enough; however, in their zeal to have total immediate reform, they miss the positive aspects of the President's proposal, and they forget that this represents the first administrative reorganization aimed at zeroing-in Federal efforts to improve the environment. The testimony before the House Committee on Government Operations clearly indicates that EPA is just the first of what is anticipated to be a series of steps in eventually bringing all environmental efforts together under one roof.

Rather than being negative—an attitude which we have used all too often in considering protection of the environment—let us look on the positive side of EPA and see what changes it makes. A most important step in the area of radiation standards is moving the Federal Radiation Council's present authority to set maximum permissible radiation-absorption standards to the administrator of the EPA. As a result, the Atomic Energy Commission will no longer have authority to determine at what levels a nuclear plant would operate, but rather that decision will be vested in the EPA. Certainly this is a needed change, given the difficult dual role heretofore occupied by the AEC—that of both promoting and regulating the use of atomic energy.

In the area of water quality, the Federal Water Quality Administration will be shifted intact from the Department of Interior to the EPA; thereby allowing another pollution control agency to be located within the EPA. Although this is the second move in a relatively short period of time for this key water agency, nevertheless I believe the move is justified in order to better focus all of our attention on pollution and pollution control.

Similarly, the National Air Pollution Control Administration, the Bureau of Solid Waste Management, the Bureau of Water Hygiene, part of the Bureau of Radiological Health, and much of the research on and controls over pesticudes would be moved to the EPA.

In short, the President has taken important and innovative steps in focusing the attention and energies of one agency on the major environmental questions of our time.

There are some who would have preferred a department as opposed to an agency; there are some who would have suggested additional transfers to EPA; there are some who would have wished all of these pollution control efforts to be placed under Secretary Hickel's juris-

diction—indeed, I might have preferred such a move. But since this plan is an executive reorganization proposal, we can either approve it or disapprove it—we do not have the ability to amend it.

I think that there can be little doubt that on balance—and by a significant margin—the Environmental Protection Agency is a wise and much needed reorganization of Federal efforts, and I am pleased to have the opportunity to vote for it.

Mr. ERLENBORN. Mr. Chairman, I have no further requests for time.

Mr. HOLIFIELD. Mr. Chairman, I have no further requests for time and, therefore, ask for a vote of "no" on the resolution. A vote of "no" would defeat the resolution of disapproval and allow the reorganization plan to go into effect. I, therefore, ask for a "no" vote on the resolution.

The CHAIRMAN. There being no further requests for time, the Clerk will read.

The Clerk read as follows:

H. RES. 1209

*Resolved,* That the House of Representatives does not favor the Reorganization Plan Numbered 3 of 1970 transmitted to the Congress by the President on July 9, 1970.

Mr. HOLIFIELD. Mr. Chairman, I move that the Committee do now rise and report the resolution back to the House, with the recommendation that the resolution be rejected.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. SISK) having assumed the Chair, Mr. ANDREWS of Alabama, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration House Resolution 1209, to disapprove Reorganization Plan No. 3, had directed him to report the resolution back to the House with the recommendation that the resolution be rejected.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, the resolution, not having the affirmative vote of a majority of the authorized membership of the House, is not agreed to.

So the resolution was rejected.

---

## GENERAL LEAVE TO EXTEND

Mr. HOLIFIELD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the resolution just voted upon and include extraneous material.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

---

## CONFERENCE REPORT ON S. 1933 RAILROAD SAFETY AND HAZARDOUS MATERIALS CONTROL

Mr. STAGGERS. Mr. Speaker, I call up the conference report on the bill (S. 1933) to provide for Federal railroad safety, hazardous materials control, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

Mr. HALL. Mr. Speaker, reserving the right to object, may I inquire if the papers are now actually in the possession of the House?

The SPEAKER pro tempore. The Chair would advise the gentleman that the papers are at the desk.

Mr. HALL. I thank the Chair.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The Clerk read the statement.

(For conference report and statements, see proceedings of the House of September 24, 1970.)

Mr. STAGGERS. Mr. Speaker, this bill was passed by the House on August 6 by record vote of 358 to 0. The major differences between the House and the Senate concern the question of whether this new Federal program would be enforced in the Federal courts by Federal attorneys or in State courts by State attorneys. In substance, the House conferees prevailed on this point. As the statement of managers shows, the States may act if the Federal Government does not act. The period in which the States' standby role would come into play was reduced from 180 days to 90 days and the States under the terms of the conference may seek penalties in addition to injunctive relief. All penalties would go into the Treasury.

In all other aspects the House version was agreed to by the Senate, and I urge adoption of the conference report.

Mr. Speaker, I yield to the gentleman from Ohio (Mr. DEVINE) whatever time he might require.

Mr. DEVINE. Mr. Speaker, I reiterate what the gentleman from West Virginia has said. There was no opposition in the conference committee on this report. Our conference came out quite well. We came to an agreement, and we recommend adoption of the conference report.

Mr. ROTH. Mr. Speaker, I rise to express my wholehearted support for the conference report of S. 1933 dealing with railroad safety and hazardous materials control. Previously, on August 6, I addressed the House on this same subject and urged support for this vital legislation. I noted that the cost both financial and human of railway accidents has been distressingly high and that the tremendous growth in the transportation by rail of flammable and explosive substances constitutes an extreme hazard to our population.

The laws on the books today, many of them half a century or more old, are obviously inadequate to cope with the growing number of accidents on railroads and even more inadequate to deal with the menace of movements of hazardous materials. S. 1933 is intended to correct these inadequacies and I feel it will.

This conference report is a welcome step in that it also comes to grips with a railroad safety problem of vital concern to the people of Delaware—the high-speed rail line between Washington and New York.

Only last Thursday was the urgent need for improvement tragically underscored when a Metroliner train struck and killed a woman and her 5-month-old grandson she was carrying across the tracks at the Penn Central Station in Claymont, Del.

S. 1933 under title II, section 204, provides that the Secretary of Transportation shall prepare within 1 year after the date of enactment of this title, a comprehensive study of the problem of eliminating and protecting railroad grade crossings, including a study of measures to protect pedestrians in densely populated areas along railroad rights-of-way.

In addition the Secretary shall, using the authority of this title and his authority over transportation safety and highway construction, undertake a coordinated effort to develop and implement solutions to the grade crossing problem as well as to take measures to protect pedestrians in densely populated areas along railroad rights-of-way.

Last year, the House overwhelmingly passed the Federal-Aid Highway Act of 1969 which incorporated a legislative proposal which I had introduced to enable the Federal Government to financially assist the States concerned to remove all grade crossings along the high-speed rail line between Washington and New York. Unfortunately the Senate did not act upon this House passed bill.

I am pleased that similar proposals have again been included in the Federal-Aid Highway Act of 1970 (H.R. 19252) which was ordered reported favorably by the House Public Works Committee on Wednesday, September 23. Under this bill the Federal Government, through the Department of Transportation, would pay 90 percent of the costs in eliminating grade crossings across Federal highways and the railroads would pay 10 percent.

On State and local roads, the Federal Government would pay 80 percent, the States 10 percent, and the railroads 10 percent. I urge all my fellow Members of Congress to support these provisions to eradicate the dangers now present on the high-speed railway line.

Mr. STAGGERS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore (Mr. SISK). The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. GERALD R. FORD. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 312, nays 0, not voting 118, as follows:

[Roll No. 318]

Mr. Miller of California with Mr. Gubser.
Mr. Olsen with Mr. Schadeberg.
Mr. Galifianakis with Mr. Brock.
Mr. Henderson with Mr. Foreman.
Mr. Cabell with Mr. Zwach.
Mr. Casey with Mr. Rousselot.
Mr. Aspinall with Mr. Weicker.
Mr. Murphy of New York with Mr. Mize.
Mr. Nedzi with Mr. Minshall.
Mr. Purcell with Mr. Blackburn.
Mr. Griffin of Mississippi with Mr. Esch.
Mr. Fulton of Tennessee with Mr. Teague of California.
Mr. Fisher with Mr. Snyder.
Mr. Tunney with Mr. Conyers.
Mr. McCarthy with Mr. Powell.
Mr. Lowenstein with Mr. Diggs.
Mr. Stratton with Mr. Nix.
Mr. Rees with Mrs. Chisholm.
Mr. Anderson of California with Mr. Bob Wilson.
Mr. Adams with Mr. Burton of Utah.
Mr. Celler with Mr. Betts.
Mr. Hagan with Mr. Dennis.
Mr. Boland with Mr. Andrews of North Dakota.
Mr. Biaggi with Mr. Bow.
Mr. Dulski with Mr. Button.
Mr. Gettys with Mr. Bray.
Mr. Green of Pennsylvania with Mr. Landgrebe.
Mr. Stephens with Mr. Mathias.
Mr. Moss with Mr. Talcott.
Mr. Zablocki with Mr. Hastings.
Mr. Mollohan with Mr. McClure.
Mr. William D. Ford with Mr. Cederberg.
Mr. Gallagher with Mr. Stokes.
Mr. Landrum with Mr. Buchanan.
Mr. Watts with Mr. Halpern.
Mr. Wright with Mr. Martin.
Mr. Alexander with Mr. Meeds.
Mr. Friedel with Mr. Fish.
Mrs. Hansen of Washington with Mr. Symington.
Mr. Melcher with Mr. Scheuer.
Mr. Hungate with Mr. Udall.
Mr. de la Garza with Mr. Farbstein.
Mr. Feighan with Mr. Stubblefield.

The result of the vote was announced as above recorded.

The doors were opened.

A motion to reconsider was laid on the table.

## GENERAL LEAVE TO EXTEND

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

## PERMISSION FOR COMMITTEE ON RULES TO FILE A SPECIAL REPORT

Mr. MADDEN. Mr. Speaker, by direction of the Committee on Rules, I ask unanimous consent that the Committee on Rules have until midnight tonight to file a brief special report.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

## APPROVING REORGANIZATION PLAN NO. 4 OF 1970

Mr. HOLIFIELD. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of House Resolution 1210, to disapprove Reorganization Plan No. 4; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate on the resolution be limited to 1 hour, the time to be equally divided and controlled by the gentleman from Illinois (Mr. ERLENBORN) and myself.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from California.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of House Resolution 1210, with Mr. ANDREWS of Alabama in the chair.

The Clerk read the title of the resolution.

By unanimous consent, the first reading of the resolution was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from California (Mr. HOLIFIELD) will be recognized for 30 minutes and the gentleman from Illinois (Mr. ERLENBORN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California.

Mr. HOLIFIELD. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, House Resolution 1210 would disapprove Reorganization Plan No. 4 of 1970 submitted by President Nixon to the Congress on July 9. The plan will create a National Oceanic and Atmospheric Administration within the Department of Commerce.

This plan was referred to the Committee on Government Operations where hearings were held by the Subcommittee on Executive and Legislative Reorganization, headed by the gentleman from Minnesota. Subsequently, the full committee considered the disapproval resolution and reported it to the House with the recommendation that it be not agreed to, thereby supporting the reorganization plan. The action of the committee was nearly unanimous.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Reorganization Plan No. 4 would establish a National Oceanic and Atmospheric Administration in the Department of Commerce whose mission would be to organize a unified approach to the problems of the ocean and the atmosphere. The new agency would be composed of:

First, the Environmental Science Services Administration which we created by reorganization plan in 1965 and which is already a part of the Department of Commerce;

Second, most of the Bureau of Commercial Fisheries, now in the Department of the Interior:

Third, the marine minerals technology program of the Bureau of Mines in the Department of the Interior;

Fourth, the marine sports fishing program of the Bureau of Sports Fisheries and Wildlife in the Department of the Interior;

Fifth, the Office of Sea Grant programs of the National Science Foundation; and

Sixth, elements of the U.S. Lake Survey of the Department of the Army.

Upon the establishment of NOAA, the following programs are to be transferred to it by executive action:

Seventh, the National Oceanographic Data and Instrumentation Centers of the Department of the Navy; and

Eighth, the national data buoy program of the Department of Transportation.

NOAA will have an estimated 1971 budget of about $270 million and over 12,000 personnel. The President justifies the drawing together of these activities as making possible "a balanced Federal program to improve our understanding of the resources of the seas, and permit their development and use while guarding against the sort of thoughtless exploitation that in the past laid waste to so many of our precious natural assets." He said:

It would make possible a consolidated program for achieving a more comprehensive understanding of oceanic and atmospheric phenomena.

The new agency is a result of a recommendation of the Commission on Marine Science, Engineering, and Resources appointed by President Lyndon B. Johnson and headed by Dr. Julius Stratton. Apparently the Ash Council was not involved in this plan at all.

The principal opposition to Plan No. 4 seems to come from conservation groups who do not like to see the commercial or sports fishing programs removed from the Interior Department and put into Commerce. Essentially, they argue that the Interior Department has an orientation toward conservation and environmental protection whereas the Commerce Department is interested primarily in production and exploitation of resources. Congressman DINGELL, who is chairman of the Fish and Wildlife Subcommittee of the Committee on Merchant Marine and Fisheries, will express his views during this debate.

On the other hand, the Subcommittee on Oceanography of the Merchant Marine and Fisheries Committee supports the reorganization and its chairman testified during our hearings and will also give his views during this debate.

The committee took a very serious view of the objections that were expressed and we recognize that the Department of Commerce has not had an outstanding record of environmental protection. But, there does seem to be a certain logic in the grouping recommended and, as the President said, less dislocation would result from using Commerce as the dwelling place for the new agency.

We must remark again that additional high-level jobs are being created here and whatever benefit the plan may produce, it is not likely to be economy.

All in all, however, Plan No. 4 will help meet a most important objective in increasing our knowledge of the seas and the atmosphere and should be permitted to become law.

Mrs. HANSEN of Washington. Mr. Chairman, if the gentleman will yield, I would like to ask a few questions with regard to some reservations I have in connection with the proposed Reorganization Plan No. 4.

As the gentleman knows, the commercial fishing industry has been a very important phase of our national economy. For various reasons, the status of our commercial fishing industry has been declining during the past few years. If this very important industry, which has a vital impact on many thousands of Americans, is to be revitalized, it must receive specific and direct attention from the Federal Government. I am apprehensive that if the Bureau of Commercial Fisheries is transferred to the National Oceanic and Atmospheric Administration it will become one of several agencies competing for attention and funds and may be lost in the shuffle to the detriment of our fishermen.

Mr. HOLIFIELD. Of course, every agency and bureau has to compete for funds wherever it is located. I would not anticipate that the Bureau of Commercial Fisheries would have more difficulty in securing funds as a part of an agency concerned with the resources of the ocean than it has as a part of the vast and far-ranging Interior Department where it competes with many resource managing agencies. The Committee on Government Operations believes plan No. 4 should strengthen the agencies placed in NOAA, not weaken them.

Mrs. HANSEN of Washington. Although it is stated on page 6 of House Report 91–1465 that the Department of Commerce seems to be moving in the direction of becoming a scientific and technologic services agency with less emphasis than formerly on commerce and business, there is a question in my mind as to what extent emphasis will be given to the desperately needed research required to rejuvenate our commercial fishing industry and place it on a par with the techniques currently being used by other fishery nations. It would seem to me that under the aura of the Department of Commerce there is a good possibility that needed research may be slighted with greater emphasis being placed on the economics of fish harvest.

Mr. HOLIFIELD. Under NOAA, all phases of oceanic research should be coordinated and strengthened. This should provide more and improved research in all the marine sciences, including commercial fishery research. This is certainly the committee's intention. As I have said before the level of the agency's activities will depend on the funds recommended by OMB and approved by Congress.

Mrs. HANSEN of Washington. I share the concern expressed by various conservation groups and others interested in the protection of our biological resources about a transfer of marine sport fish activities and commercial fisheries programs from the Department of the Interior to the Department of Commerce. On page 5 of the report it is stated that the transfer will not change the orientation of these programs as directed by the Congress. Will the gentleman be so kind as to further elaborate on why the committee is so confident in this respect.

Mr. HOLIFIELD. Reorganization plans may transfer functions from one department to another, but they cannot amend the basic substantive laws governing those functions. The policies which Congress enacted into law remain just the same as they were before the functions were transferred. We trust that NOAA will administer the laws transferred to

it with great vigor, as intended by Congress.

Mrs. HANSEN of Washington. The proposed reorganization also provides for the transfer of functions vested in the Secretary of the Interior relating to migratory marine species of game fish. It has frequently been stated in hearings before the Appropriations Committee that the distinction between sport fish and commercial fish matters is frequently a matter of judgment. Could the gentelman give me more detailed information on just what is involved in this transfer and indicate the basis on which this determination was made?

Mr. HOLIFIELD. Regardless of fine distinctions, most commercial fish live all or a large part of their lives in the ocean as do marine sport fish. They are clearly within the scope of the duties of an agency concerned with the resources of the ocean.

Mrs. HANSEN of Washington. Section 4(b) of Reorganization Plan No. 4 provides—

> Such further measures and dispositions as the Director of the Office of Management and Budget shall deem to be necessary in order to effectuate the transfers referred to in subsection (a) of this section shall be carried on in such manner as he shall direct and by such agencies as he shall designate.

During the past few years I have found the Bureau of the Budget to be not too friendly to the best interests of the Bureau of Commercial Fisheries. Consequently, I naturally suspect any carte blanche authority which is given to that office with regard to commercial fishery activities. Could the gentleman explain just what is involved here?

Mr. HOLIFIELD. This is a common ancillary provision in reorganization plans to allow the physical movement of personnel, equipment, and supplies and to permit the creation of the necessary new accounts, et cetera. We do not regard it as giving the Office of Management and Budget any carte blanche authority which would modify statutory program requirements.

Mrs. HANSEN of Washington. I understand it is proposed that various overhead or administrative functions would also be transferred under this planned reorganization. I have reference to various positions and activities, for example, in the Office of the Secretary, Department of the Interior, that might be related to Bureau of Commercial Fishery work on a pro rata basis. To what extent will the Secretary of the Interior have control over the transfer of these positions or activities?

Mr. HOLIFIELD. The actual transfers will be determined by the Office of Management and Budget. However, it is obvious that the Office will have to work and cooperate with the Secretary of the Interior in determining exactly which personnel, property, and funds shall be transferred.

Mrs. HANSEN of Washington. The National Council on Marine Resources and Engineering Development currently has an active role in oceanographic matters. In the event Reorganization Plan No. 4 is approved, what will be the effect on the activities on the National Council on Marine Resources and Engineering Development?

Mr. HOLIFIELD. Reorganization Plan No. 4 does not mention any function of the National Council on Marine Resources and Engineering Development and therefore does not change or transfer any such function.

Mr. ERLENBORN. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, Reorganization Plan No. 4 represents the second major plank in the President's program to organize the Government more effectively to fight pollution and to stimulate the intelligent management and use of our Nation's resources. These organizational proposals, in turn, are part of the President's even grander environmental design to raise the quality of life by providing the necessary talent, funds, authority, management, and leadership to eliminate pollution, overcome waste disposal problems, expand park and recreational facilities preserve and upgrade land resources, and many additional tasks.

The House has just approved the plan to create the Environmental Protection Agency to rid our environment of pollution. Now, there is before us the opportunity to establish an agency to deal more effectively with our vast oceans and atmosphere. This agency will be the National Oceanic and Atmospheric Administration—NOAA—which is to be located in the Department of Commerce. It is to be headed by an Administrator who will hold the rank comparable with that of Under Secretary and will report directly to the Secretary.

The oceans, Mr. Chairman, constitute three-fourths of the entire earth's surface. Yet, they remain the least understood, least developed, and least protected of the planet's resources. Why is this so? Admittedly, man's limited abilty to date to operate in an ocean environment has been a cause. But, the same could also be said about space ventures. Yet, we are now walking on the moon and surveying other celestial bodies. The fact is that, up to now, we have failed to organize our efforts, in Government or out, to meet this challenge properly and to provide the necessary incentives to spur on efforts in both sectors. Yet, this is what must be done and done immediately.

The intelligent use of the oceans is vital for our economy, defense, and quality of life. The population of the earth is expanding at a rate that will require us to improve the use of marine resources for food if the hungry of the world are to be fed. As a member of the Commission on Population Growth and the American Future, I can testify to this fact. Similarly, mineral resources from the oceans will become increasingly important in the future. Little is understood today concerning the interaction between the sea and the atmosphere. A better understanding of this will provide a significant expansion in the control and modification of the weather and in improvement of environmental quality. Agriculture and transportation will be benefited, pollution will be materially curtailed, our land resources will be better protected—all through a broadened comprehension of our oceans and atmosphere.

The establishment of NOAA will especially contribute to an improved use of our marine environment by providing coordination, direction, and overview; identifying and assessing the Nation's marine goals and activities; establishing a balance between exploration, resource development, conservation, engineering, and science; and engaging in research and development of the oceans and atmosphere on an integrated basis.

Programs and functions now scattered among four separate departments and one agency are to be transferred to NOAA. The Commerce Department will contribute a number of major activities now located in the Environmental Science Services Administration: Weather Bureau, Coast and Geodetic Survey, Environmental Data Service, National Environmental Satellite Center, and ESSA Research Laboratories.

From the Interior Department will come the Bureau of Commercial Fisheries functions related to the marine environment, marine sports fish activities, and the Marine Minerals Technology Center.

From the National Science Foundation: Office of Sea Grant program.

From the Department of the Army: Elements of the U.S. Lake Survey.

By Executive Order of the President: Department of Navy: National Oceanographic Data Center, and National Oceanographic Instrumentation Center.

Department of Transportation: National data buoy development project.

It will be seen from the above that Reorganization No. 4 is no mere gesture to environmental protection. Rather, it constitutes a sophisticated design to pull together in one place the bulk of the oceanic and atmospheric programs within Government in an effort to develop a unified approach to what could well be the most important priority effort in ecology in the coming decade.

The reorganization locates NOAA within the Commerce Department because, as indicated above, that is where the bulk of the new agency programs, manpower and finances will come from initially. Thus, a minimum amount of reshuffling will have to take place. When completed, NOAA will employ more than 13,000 personnel and have an estimated 1971 budget of about $330 million. Approximately 83 percent of its employees and 73 percent of its funds will be drawn from ESSA.

There are those who have criticized this reorganization on the grounds that it is wrong to locate marine resource programs in the Department of Commerce. These arguments basically center around the proposition that the need exists today to preserve rather than exploit such resources and that such preservation would more likely occur in the Interior Department or in a new conservation-oriented agency than in the Commerce Department which, because of its commercial activities, is exploitive in nature.

As for creation of a new agency, I strongly believe that we may have too

many agencies floating around loose today as it is. I supported the establishment of the Environmental Protection Agency in the belief that it is necessary to set up a separate agency to police antipollution activities without the burden of also managing substantive financial assistance programs. Such is not necessary or desirable in the present case, however, since the proper organization and supportive arrangements already exist within the Department of Commerce to assume this new responsibility.

As for locating oceanic programs or even just marine resource activities in the Interior Department, the past record of such department in conservation endeavors has not been that commendable with all due respect to the many loyal and qualified individuals who are employed there. In addition, the purpose of this reorganization is to pull together, on a unified basis, research, exploration, development, conservation, monitoring, and educational activities as they relate as broadly as possible to oceanic and atmospheric functions. This surely cannot be accomplished by keeping some activities in Interior, some in Commerce and some in 40 other places as some people would seem to have us do.

While I can only praise many programs and efforts undertaken by conservation groups, I respectfully believe they are advocating too narrow an approach in this case. Preservation alone is not enough—either in this instance or in general. The greatest benefit for man requires that a balance be developed between a wise conserving of our natural resources and an intelligent use. This can best be accomplished by wedding science, technology, commercial enterprise, and conservation together as is proposed to be done here in the creation of NOAA. The splintering, dividing and fractionalizing of operations that logically should be integrated will serve no one's best interest.

The purpose of this reorganization is to pull together in one place the facilities, personnel, and authority necessary to protect and advance oceanic and atmospheric programs. This can best be done by locating operations in the Commerce Department which is best suited to carry out this unified endeavor. Over 60 percent of the budget and manpower today in Commerce are devoted to scientific and technological purposes. It employs scores of topflight scientists. Its atmospheric operations uniquely complement the oceanic programs to be brought over. The vessels of the Coast and Geodetic Survey, when combined with those of the other agencies to be transferred, will provide incalculable information and data on marine and geological matters. Mapping services, environmental data gathering, research laboratories, training, testing, equipment, facilities, and many other related functions, now scattered among various departments and agencies, will become closely associated under Reorganization Plan No. 4 to provide for the first time a priority-oriented, systems approach to the development and protection of the oceans and the atmosphere.

We are on the verge, I believe of some major breakthrough in this area for the betterment of man. Approval of this plan can contribute to this endeavor. Moreover, we can do it without having to create a new department or independent agency with all the disruption and disorientation that can cause. Some have pointed to the proposal by the Commission of Marine Sciences, Engineering, and Resources—Stratton Commission—as support for creation of an independent agency. In answer to that one need only note that Dr. Stratton himself has announced support for this plan, as do all but one member of the Merchant Marine and Fisheries Committee, including Congressmen LENNON and MOSHER who served on the Stratton Commission. In addition, many other educators, scientists, businessmen, and experts in this field have endorsed this reorganization. This broad support is, in my opinion, convincing evidence of the merits of the plan.

I thereby urge the appropal of this reorganization plan by casting a "no" vote against the resolution of disapproval.

Mr. DON H. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I am happy to yield to the gentleman from California.

Mr. DON H. CLAUSEN. The gentleman, I believe, was on the floor when I directed a question to Chairman HOLIFIELD on Reorganization Plan No. 3, as it related to the jurisdictional question of committees now handling the prime legislative responsibilities, such as I asked with respect to water quality and pollution control legislation for the Rivers and Harbors Subcommittee of the Committee on Public Works.

Does the same thing apply in this Reorganization Plan No. 4 which is before us for consideration?

Mr. ERLENBORN. In my opinion, the answer to that is "Yes."

By a reorganization plan we do not create or do away with any functions at the executive level. We transfer them from one agency to another or create a new agency to transfer them into, but this in no way affects the underlying jurisdiction based on legislation or jurisdiction of the various committees that have had jurisdiction over separate programs in the past. So the legislative jurisdiction should not be affected by the adoption of the reorganization plan, I would say.

Mr. HALL. Will the gentleman yield?

Mr. ERLENBORN. I am glad to yield to the gentleman from Missouri.

Mr. HALL. Further proceeding along the lines of the discourse that just occurred on the floor, Mr. Chairman, it may not be generally known, but there has been for a long time an informal arrangement as far as control of at least the research and development of oceanography is concerned. This has been chaired and funded both as to authorization and appropriation by the armed services through the U.S. Navy. In recent years 76 percent of the funding has come through that body, and it is one of the examples of where defense funds go for the weal of the entire Nation and not just armed defense. I believe it is also decided that at least as far as research and development test and evaluation is concerned that the perpetual chairmanship of the Committee on Oceanography, this informal, loose arrangement, should be in the hands of the Navy and that the Navy does thereby designate such a person to chair this program. Again I am sure that the coordination would be complete inasmuch as armed service officers are adept at and are indeed trained in and taught to do staff coordination in most of their endeavors.

Does the gentleman have knowledge as to whether or not this reorganization plan would take over the functions of that prior arrangement with its informal, but very effective organization?

Mr. ERLENBORN. I wish I could answer the gentleman's question, but, in all honesty, I do not know. I can say that it is contemplated that upon the creation of NOAA by Executive order the President will transfer from the Department of the Navy the National Oceonographic Data Center and the National Oceanographic Instrumentation Center. If these are the functions that the gentleman has reference to, it is possible that there may be some effect.

Mr. HALL. I will say to the gentleman that the functions I have reference to go much deeper than that. I am conscious of those two areas and, of course, I am conscious of the President's as well as the Commander in Chief's authority to transfer these agences, but I just thought perhaps it had been discussed. I hope that a legislative record could be made on this on the floor.

Mr. ERLENBORN. I thank the gentleman.

Mr. MOSHER. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Ohio (Mr. MOSHER) who may be able to answer the gentleman's question better than I can.

Mr. MOSHER. Commenting on the question of the gentleman from Missouri, I can assure him that it was the philosophy of the Stratton Commission and its recommendations, and our subcommittee in considering the legislation in which this reorganization plan is rooted felt that it pretty much followed the Commission's recommendations. It was the philosophy of that Commission that NOA would not in any way interfere with the oceanographic responsibilities and efforts of the Department of the Navy. However, I think I should make the statement that the gentleman from Missouri just made when he was talking about the Navy's role in coordinating oceanography.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ERLENBORN. Mr. Chairman, I yield myself 5 additional minutes.

Mr. MOSHER. Will the gentleman yield further?

Mr. ERLENBORN. I yield to the gentleman from Ohio.

I am sure that the gentleman from Missouri recognizes the existence now and has for several years of the Marine Council on Marine Science in the Office of the Presidency in which the Under Secretary of the Navy participates as a member and which is really the coordinating body for all of this oceanographic

effort. That has been true for several years. The Navy is a very active participant in that council.

Mr. HALL. Mr. Chairman, if the gentleman will yield further——

Mr. ERLENBORN. I yield futher to the gentleman from Missouri.

Mr. HALL. For the record I would simply state to the gentleman from Ohio that I appreciate his comments and add that the gentleman from Missouri does know about the Coordinating Council on Marine Science. In fact, if one would review the record, one would find that I stated and tried to develop a legislative record at the time it was first founded and funded, trying to establish the difference between civilian and military control over some of these areas that we need to protect and at the same time bring them together and tie them together with one ribbon.

Mr. LENNON. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from North Carolina.

Mr. LENNON. Mr. Chairman, in further response to the distinguished gentleman from Missouri, the successor to Admiral Walters, the oceanographer of the Navy, Adm. W. W. Behrens, Jr., was in my office this morning and this question was raised. He visited my office to have me assure anyone that may raise this question that the Navy was supporting this reorganization plan very strongly and wanted to make that crystal clear, that these matters you refer to have been worked out.

Mr. ERLENBORN. I thank the gentleman for his contribution.

Mr. Chairman, I would again call the attention of the Members of the House to the fact that the gentleman from North Carolina (Mr. LENNON) and the gentleman from Ohio (Mr. MOSHER) both testified before our Subcommittee on Executive and Legislative Reorganization in support of the plan. Their testimony was most impressive and most knowledgeable as members of the Committee on Merchant Marine and Fisheries which has worked in this area for many years. Their testimony was in complete support of this reorganization plan. I would recommend that we follow the advice of these gentlemen and cast a "no" vote on this resolution.

Mr. HOLIFIELD. Mr. Chairman, I yield 5 minutes to the gentleman from North Carolina (Mr. LENNON).

Mr. LENNON. Mr. Chairman, on July 28 of this year the distinguished gentleman from Ohio (Mr. MOSHER), the ranking Republican member on the Oceanography Subcommittee, and myself in the capacity as chairman of the Subcommittee on Oceanography, had the great honor of appearing before the Executive and Legislative Reorganization Subcommittee of the Committee on Government Operations. At that time I had the honor of stating to this distinguished subcommittee that one of the 36 members of the Committee on Merchant Marine and Fisheries, which is the parent committee to the Oceanography Subcommittee, that 35 members had authorized me to say to that subcommittee that they were in full support of Reorganization Plan No. 4.

I think the members of the Committee of the Whole House on the State of the Union who are present today should recognize the fact that the Oceanography Subcommittee came into being in 1959. Its first chairman was the distinguished gentleman from California, Mr. GEORGE MILLER, who served less than a year and then, of course NASA was created and and he became chairman of that distinguished committee of the House of Represenatives. The gentleman from California (Mr. MILLER) was succeeded by my distinguished friend in a matter of about 6 months, the gentleman from Michigan, Mr. JOHN DINGELL. Then when the gentleman from Michigan became chairman of the Subcommittee on Fish and Wildlife, it was my honor to move to the chairmanship of the Subcommittee on Oceanography.

I have the great honor also of serving as the ranking Democrat on the Fish and Wildlife Subcommittee.

Mr. Chairman, we have spent many years in trying to find a solution to the proliferation of the various facets of oceanography and marine science programs that exist in so many agencies, departments, and bureaus of the Federal Government and have been there since their inception.

I am reminded of the fact that if, when NASA came into being we had had as many as seven to 10 Federal agencies, bureaus, or departments who were interested in space, we would never have been able to put a man on the moon. Fortunately, the only single agency of the Federal Government that was interested in space was the Air Force, and we had no problem, and that is the reason we went on as we did.

I shall not take the time to tell you the history of the Stratton Commission and its report, but I am here today to say to you that Dr. Julius Stratton, who headed this Commission, gives his unqualified support to Reorganization Plan No. 4. And I am here to tell you also that Dr. Edwin Wenk, Jr., who was Executive Director of the Marine Sciences Council, which has members at Cabinet level, with the exception of the three-member council, that he unqualifiedly supports Reorganization Plan No. 4. The only component of any department that is not included in Reorganization Plan No. 4, which was investigated by the Stratton Commission, is the Coast Guard. I want to make crystal clear that I would have preferred a legislative independent organization, but I am a realist, and I think we are moving today in the right direction in bringing together these essential components of marine science.

I believe that the future of the oceans, both in the area of food for human beings and in exploitation, if you will, in connection with its economic stake, are the most valuable things that we can see today, and I urge the Members of this House to vote "no" on the resolution of disapproval of Reorganization Plan No. 4.

Mr. FOUNTAIN. Mr. Chairman, will the gentleman yield?

Mr. LENNON. I yield to the distinguished gentleman from North Carolina.

Mr. FOUNTAIN. Mr. Chairman, I want to take this occasion to commend my distinguished colleague from North Carolina, the gentleman in the well (Mr. LENNON) for the splendid work he has done as the chairman of the Oceanography Subcommittee of the Committee on Merchant Marine and Fisheries, and also the members of his subcommittee for the support they have given Mr. LENNON.

I recall talking to him a number of years back when he was advocating a greater show of interest on our part in the area of oceanography. He has been one of the legislative pioneers who has encouraged this Congress to show and to take a greater interest in this subject, and to give it a more preeminent place in our thoughts and actions—especially in terms of research and development of the tremendous undeveloped wealth which lies on the seabeds of the oceans of the world.

In 1967 I had the honor of being one of the congressional delegates to the United Nations, representing the Government of the United States. A resolution was offered calling upon the United Nations to seek to take over the ocean beds of the world and develop them on behalf of the underfed and underdeveloped nations of the world. The distinguished gentleman from Michigan (Mr. BROOMFIELD), our other congressional delegate to the United Nations, and I both became concerned about this, and the gentleman in the well testified before the appropriate subcommittee of the House Committee on Foreign Affairs, on which I was also serving, and expressed his great concern over any such premature action by that body.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HOLIFIELD. Mr. Chairman, I yield 2 additional minutes to the gentleman from North Carolina.

Mr. FOUNTAIN. And the testimony of the gentleman from North Carolina (Mr. LENNON) and the action of the members of his subcommittee were helpful to us as delegates to the United Nations. Our entire delegation was able to negotiate a compromise which resulted in the seabed resolution being referred to a subcommittee of the United Nations for further and more careful consideration. Since that time I think we have been able to work this matter out on a more cooperative basis with other nations. I hope we will not be outtraded.

Again, Mr. Chairman, I want to compliment my colleague, the gentleman from North Carolina (Mr. LENNON), for the interest he has shown in this extremely important field—the field of oceanography. As I see it, oceanography has an even more vital potential in the long run than had the field of space where we entered upon that journey, because we now know that the ocean beds contain tremendous quantities of food, and the world is hungry, needs that food.

My colleague from North Carolina (Mr. LENNON), in the years that lie ahead in my opinion will have reason to be proud of the initiations he has taken in encouraging the Congress and the executive branch of this Government to move full speed ahead in oceanography .

I thank the gentleman for yielding.

Mr. LENNON. I thank the gentleman for his generous remarks.

I would remind the Members of the Committee that the Committee on Merchant Marine and Fisheries is constituted of members from every one of our coastal States from Maine to Miami on the Atlantic seaboard and the Gulf States and Pacific States, and in most of those States that have the Great Lakes in them.

So you see how generally we are interested in this program of Reorganization Plan No. 4.

Mr. ERLENBORN. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, I rise in support of Reorganization Plan No. 4 to create a National Oceanic and Atmospheric Administration.

Organization is at least as important as programs, personnel, and money in determining whether the goals and objectives of legislation are to be carried out. We need only examine the past administration of health, education, manpower, pollution control, and consumer protection programs, among others, to see this.

In the past, as many know, I have taken a strong position against some reorganizations on the ground that they could cause more harm than good. Today, however, I am here to support this reorganization plan as I did earlier with plan No. 3.

As I view it, the President has laid out for Congress an intelligent and logical legislation package for action on environmental protection, including increased authority and money to fight pollution, protect land resources, prevent exploitation, meet the population issue, face the problem of world poverty and hunger, and conserve precious resources. That which we are taking up today is part of the organization phase of the President's blueprint—one which I believe will contribute significantly to improving the quality of life not only in the United States, but throughout the world.

It is for us here in this country, with our zeal for pollution control and our wealth for accomplishing improvement, to exercise the initiative and leadership required to preserve and improve our global environment. We, in essence, have the "room to maneuver" and the resources to lead the way. Without appearing to sound overly grim, I firmly believe that, if we fail in this endeavor, the long-range future of man is dim.

Beyond question, one of the major areas of neglect today is that relating to our oceans and atmosphere. We have tolerated pollution, permitted exploitation, ignored the benefits of a managed aquaculture, overlooked sound mineral resource management, and, in general, disregarded the necessity to deal with these two areas as an integrated whole. Instead, in research, exploration, development, training, facilities, vessels, equipment, and related matters, we have permitted the establishment and proliferation of multiple, independent, uncoordinated, and specialized units within a myriad of departments, agencies, and bureaus. At times, and for certain purposes, it is sound to establish an independent structure. We have done that today by approving Reorganization Plan No. 3 to establish the Environmental Protection Agency. Such cannot be the case, however, when it comes to managing our marine resources and atmosphere.

Creation of NOAA will put an end to this fractured existence by merging those functions of the Environmental Science Services Administration—Weather Bureau, Coast and Geodetic Survey, Environmental Data Service, National Environmental Satellite Center, and ESSA Research Laboratories—which are located in the Department of Commerce with the Commercial, Fisheries and Marine Sport Fish programs and Marine Minerals Technology Center, located in the Interior Department. In addition, there is to be transferred to NOAA the Office of Sea Grants Program from the National Science Foundation and elements of the U.S. Lake Survey from the Corps of Engineers. The President, in turn, has announced his intention of transferring by Executive order the National Oceanographic Data Center and the Instrumentation Center from the Navy Department and the National Data Buoy Project from the Department of Transportation.

NOAA, upon absorbing all these functions and authorities, will operate as an autonomous agency within the Commerce Department. It will be headed by an official who will hold a rank comparable to that of Under Secretary and will report to the Secretary.

There are those who oppose this reorganization plan on the basis that it is better to leave things where they are or to locate some of the above operations in a new department which will be more conservation minded than the Commerce Department has been in the past. While fully appreciating the sincere motives of those opposed, I do not believe their argument to be sound or well thought through.

As for leaving these functions where they are, I believe the present improper use or failure to use effectively existing resources is answer enough. About all one could say to a policy of do-nothing in this instance is that things might not get much worse under such circumstances. But, that can be no answer today as far as environmental pollution and resource depletion is concerned. A look at our failing domestic fishing industry, at the worldwide mining of marine and mineral resources, at the lack of understanding over the interaction between the sea and atmosphere, and at the waste of our lands must surely convince even those who do not choose to see a bold, unified attack on these little-understood problems must be launced.

As for locating some of the functions, to be affected by this reorganization, in a new conservation-oriented department, I can only stress that organizational independence under the wrong circumstances can constitute a one-way street to nowhere, and separation of conservation from management and use will lead to neither sound management and use or effective conservation.

To insure the soundest and sanest use of our marine resources in relation with the atmosphere, it is necessary to:

Accelerate the exploration and development of marine resources;

Expand knowledge of the marine and atmospheric environment;

Develop fundamental technology;

Promote conservation;

Rehabilitate fisheries;

Implement manpower and training programs;

Coordinate programs with other Federal, State and local operations;

Promote and advance the field of aquaculture;

Monitor, map, chart and otherwise increase data collection;

Encourage private initiative and investment;

Improve and coordinate programs at the international level;

Improve weather forecasts and environmental modification.

These functions and those related to them can, in my opinion, be best located within the Department of Commerce which increasingly over the years has upgraded and expanded its scientific and technological activities to the point today where such activities represent 60 percent of the Department's efforts. ESSA, already located in Commerce, will constitute the bulk of NOAA, as presently to be constituted. To shift these duties out of that Department and thereby contribute to downgrading its excellent efforts and reputation in the fields of science and technology would not only be unsound from the standpoint of economy and efficiency, but would also deny NOAA other important services which Commerce is able to supply, including those offered by the National Bureau of Standards and its international bureaus.

In order to meet intelligently the pollems of pollution which face us in the world's oceans, we must find out what is happening now and determine what steps can be taken to solve the problems we find developing or already existing. We dare not delay. Someplace down the road, we may want to establish a cabinet level department of natural resources, but to delay action until such a reorganization idea winds its tortured way through the conflicting interests represented in the Congress would be a disservice to a vital problem which is immediate.

There is pressing need for supporting this reorganization plan, Mr. Chairman. It has received wide support from scientists, educators, businessmen, and Members of Congress who are most knowledgeable and competent in this area.

I urge approval of Reorganization Plan No. 4.

Mr. ERLENBORN. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. Mr. Chairman, I, too, rise in support of Reorganization Plan No. 4, and in opposition to the resolution of disapproval.

Mr. Chairman, we are finally beginning to awaken to the realization that we live on a planet with finite resources and a delicately balanced ecosystem. All

the air, all the water, and most natural resources now available for sustaining life are all that are ever going to be available. So, when we pollute our air and water, despoil our lands, make species of animal life extinct, destroy tidal areas, and heedlessly exploit mineral resources, we are, in essence, either putting in serious jeopardy future generations or at least assuring their marginal existence.

We have just enacted Reorganization Plan No. 3 to establish an improved organization to fight pollution. At other times Congress has and will continue to expand programs and finances to attack the pollution problems, preserve land areas, and similar endeavors. Now is the time to vote in support of Reorganization Plan No. 4 to create a National Oceanic and Atmospheric Administration—NOAA—within the Department of Commerce to enable us more effectively to safeguard and develop marine resources and the atmospheric environment.

Without question, the oceans and the outer regions of space are the last great frontiers of man. We have organized to explore space; up to now we have failed to do the same for the oceans, even though they constitute three-fourths of our earth's surface. Yet within these regions of water, may be man's greatest resource for survival. Its food resources and mineral deposits constitute a reserve that we must carefully and knowingly research, explore, develop, and conserve. Through the establishment of NOAA we will take a bold step to meet our obligations.

NOAA will pull together these functions in the Commerce Department now administered by the Environmental Science Services Administration. These include the Weather Bureau and Coast and Geodetic Survey plus environmental data gathering, storage and retrieval operations and research laboratories. Matched with these will be the commercial fishery, marine sport fishing and marine minerals technology programs of the Interior Department which will permit a balanced program for the oceans and atmosphere in the shape of facilities, research, trained personnel, vessels, equipment, and know-how. To further support this effort, the sea grants program of the National Science Foundation and elements of the U.S. Lake Survey of the Corps of Engineers are to be transferred, while the President has announced his intention to transfer to NOAA the Navy's oceanographic data activities and instrumentation center and the Transportation Department's national data buoy program.

It is recognized that NOAA will not have under one roof all existing Federal programs dealing with the ocean and atmosphere. The intention has been, instead, to create a nucleus of the most important civilian programs and permit a solid beginning to be made before other consolidations are to be considered.

A general consensus exists among scientists, Members of Congress, businessmen, educators, and others, expert and knowledgeable in this area, that this plan is a sound approach and they endorse this reorganization.

There has been some effort to generate opposition to this plan on the grounds that the Department of Commerce is primarily commercially oriented and will thereby exploit rather than conserve our marine resources. To me this is unjustified. In the first place, to recommend a separation of conservation from exploration and development can only mean administrative chaos, divisiveness and bureaucratic myopia. The loser, of course, is the public. Second, we cannot properly separate any of the above functions from advanced scientific and technological capabilities. The latter is itself a scarce resource. The Commerce Department, in fact, has one of the few qualified, in-depth capabilities in Government—60 percent of its operations are devoted to that end.

You can neither take conservation out of development, nor science and technology out of either without disastrous consequences. Third, to place the activities of a NOAA office in some corner by itself, as some suggest, will most likely not have the positive regenerative consequences that its advocates maintain. The secret of organization today is to develop a broad systems orientation with an in-depth backup to resources, men and ideas in order to force consideration of programs and needs. Their interrelation are so obviously essential, but yet insufficiently explored, that we are already frightfully negligent in mounting an effective coordinated attack in this area.

Bold new efforts are required to restore and protect environmental quality. Man's life depends upon a willingness to meet problems of pollution, exploitation and degradation of our ecological community.

I believe the President has taken a solid step forward by proposing the establishment of NOAA and I urge adoption of Reorganization Plan No. 4.

Mr. HOLIFIELD. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Chairman, we have before us a classic example of the power to delegate running wild.

This is perhaps one of the worst pieces of reorganization legislation that is going to be before this Committee, I believe, in this year or any other.

You know, I think here is a very excellent example of why the Congress should not extend the reorganization act. Here the entire oceanographic management program of the United States is being moved around inside the Federal Government without a word of consultation to the conservation organizations—without a word of consultation to the State game management agencies—and without a word of consultation with most of the Members of the Congress.

I have had a number of meetings with Secretary of Commerce Stans as to how he proposes to administer the portions of programs being transferred into his hands. I discussed the Fish and Wildlife Coordination Act, a great piece of legislation that deals with preservation, of wet lands and of waters, and wildlife. He has no idea how he is going to administer that statute as it affects his agency under plan No. 4. It moves into the hands of the Department of Commerce, the preservation of whales and of all endangered oceanographic species which are now Federal Responsibilities under two Federal Endangered Species Statutes.

Mr. Stans has no idea how those proposals are going to be implemented and how the precious resources entrusted to his administration are going to be cared for.

The Congress has had no opportunity to be in on the development of this program.

What is needed here is the creation of a Department of Natural Resources and a piece of legislation to this end is now pending, which is authored by my colleague and friend, the gentleman from California (Mr. Moss) and I, the two authors of the disapproval resolution now before the Congress. It is H.R. 19194, the text of which I insert here:

H.R. 19194

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Department of Natural Resources Act".

DECLARATION OF PURPOSE

SEC. 2. (a) The Congress hereby declares and finds that the establishment of a Department of Natural Resources is necessary in the public interest and to protect the public health and welfare; to assure the coordinated, effective protection, conservation, and enhancement of the Nation's resources; to achieve a more comprehensive understanding of the oceans and their resources and the atmosphere; to encourage and foster cooperation of Federal, State, and local agencies and foreign governments and private organizations and agencies and individuals toward the prompt achievement of the natural resource and oceanic and atmospheric protection and enhancement objectives set forth in this and many other Acts of Congress; to stimulate technological advances in protecting, conserving, and enhancing natural resources when it is in the public interest to develop such resources for the public benefit; to provide opportunities for urban and rural dwellers to know and enjoy such resources; to provide leadership nationally and internationally in the identification and solution of natural resource and oceanic and atmospheric problems; and to develop, further define, and to recommend to the President and the Congress new and improved programs, including the adequate financing of such programs and existing programs, and to accomplish those objectives with full and appropriate consideration of the need to encourage the growth and development of the Nation, to improve the daily lives of all of the people of the Nation, and to preserve our national security.

(b) It is hereby declared to be the national policy that the protection, conservation, and enhancement of the Nation's natural resources and the oceans and the atmosphere in productive harmony with the environmental quality, social, economic, and other requirements of present and future generations of Americans is in the paramount interest of the United States.

DEPARTMENT OF NATURAL RESOURCES

SEC. 3. (a) The Department of the Interior in hereby redesignated as the Department

of Natural Resources (hereinafter referred to as the "Department"), and the Secretary of the Interior is hereby redesignated the Secretary of Natural Resources (hereinafter referred to as the "Secretary").

(b) There shall be in the Department three additional Assistant Secretaries, who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall perform such functions, powers, and duties as the Secretary shall prescribe from time to time. The Assistant Secretaries shall be for oceanic and atmospheric preservation, for national parks and forests, and for international affairs of the Department. The Assistant Secretary for Fish and Wildlife and Parks is hereby redesignated as the Assistant Secretary for Fish and Wildlife.

(c) There is hereby established within the Department a National Oceanic and Atmospheric Administration which shall be headed by an Administrator who shall be appointed by the President, by and with the advice and consent of the Senate. There shall also be five Deputy Administrators: for Research; for Exploration and Development; for Loans and Grants; for International Coordination and Program Planning; and for Administration and Public Information.

(d) In addition to such functions, powers, and duties specified in this Act to be carried out by the Administrator, he shall carry out such other functions, powers, and duties as the Secretary may prescribe. The Administrator shall report to the Secretary through the applicable Assistant Secretary and the Under Secretary. Each Deputy Administrator (according to such order as the Administrator shall prescribe) shall act for, and exercise the duties of, the Administrator during his absence or disability. The Administrator shall prescribe the functions, powers, and duties of each Deputy Administrator.

(e) The functions, powers, and duties as are specified in this Act to be carried out by the Administrator shall not be transferred elsewhere in the Department unless specifically provided for by reorganization plan submitted pursuant to provisions of chapter 9 of title 5, United States Code, or by Act of Congress enacted after the effective date of this Act.

TRANSFERS TO DEPARTMENT

SEC. 4. (a) There are hereby transferred to the Secretary to be administered by him through the Administrator of the National Oceanic and Atmospheric Administration all functions, powers, and duties of the:

(1) Secretary of Commerce under the laws and provisions of laws administered by him through the Environmental Science Services Administration;

(2) the Secretary of Transportation under laws administered by him for carrying out the national data buoy project; and

(3) the National Science Foundation under the National Sea Grant College and Program Act of 1966, as amended.

(b) There are hereby transferred to the Secretary to be administered by him all functions, powers, and duties of the Secretary of Agriculture under the laws and provisions of laws administered by him through the National Forest Service.

(c) The Secretary shall, within one hundred and eighty days after the effective date of this Act, transfer to the Administrator any function of any other agency or office or part thereof of the Department if the Secretary determines that such function relates primarily to functions transferred to the Secretary under this section.

(d) The Secretary, in administering the programs transferred under this section, shall coordinate his activities with those of the departments and agencies which administer them prior to the effective date of this Act.

(e) Within one hundred and eighty days after the effective date of this Act, the President may transfer to the Secretary any function of any other agency or office or part thereof if the President determines that such function relates primarily to functions transferred to the Secretary under this section.

ADMINISTRATIVE PROVISIONS

SEC. 5. (a) (1) So much of the personnel, property, records, and unexpended balances of appropriations, allocations, and other funds employed, used, held, available, or to be made available in connection with the functions transferred to the Secretary or the Department by this Act as the Director of the Office of Management and Budget shall determine shall be transferred to the agency at such time or times as the Director shall direct.

(2) Such further measures and dispositions as the Director of the Office of Management and Budget shall deem to be necessary in order to effectuate the transfers referred to in paragraph (1) of this subsection shall be carried out in such manner as he shall direct and by such agencies as he shall designate.

(b) The Administrator appointed under this Act shall be compensated at the rate now or hereafter provided for level V of the Executive Schedule pay rates (5 U.S.C. 5314) and the Deputy Administrators appointed under this Act shall be compensated at the rate now or hereafter provided for level V of the Executive Schedule pay rates (5 U.S.C. 5315).

ANNUAL REPORT

SEC. 6. The Secretary shall as soon as practicable after the end of each fiscal year, make a report in writing to the President and to the Congress on the activities of the Department during the preceding fiscal year.

SAVINGS PROVISIONS

SEC. 7. (a) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective—

(A) under any provision of law amended by this Act, or

(B) in the exercise of duties, powers, or functions which are transferred under this Act, by (i) any department or agency, any functions of which are transferred by this Act, or (ii) any court of competent jurisdiction, and

(2) which are in effect at the time this Act takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Secretary or Administrator (in the exercise of any authority respectively vested in them by this Act), by any court of competent jurisdiction, or by operation of law.

(b) the provisions of this Act shall not affect any proceedings pending at the time this section takes effect before any department or agency (or component thereof), functions of which are transferred by this Act; but such proceedings, to the extent that they relate to functions so transferred, shall be continued before the Department. Such proceedings to the extent they do not relate to functions so transferred, shall be continued before the department or agency which they were pending at the time of such transfer. In either case orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Secretary or Administrator (in the exercise of any authority respectively vested in them by this Act), by a court of competent jurisdiction, or by operation of law.

(c) (1) Except as provided in paragraph (2)—

(A) the provisions of this Act shall not affect suits commenced prior to the date this section takes effect, and

(B) in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this Act had not been enacted.

No suit, action, or other proceeding commenced by or against any officer in his official capacity as an officer of any department or agency, functions of which are transferred by this Act, shall abate by reason of the enactment of this Act. No cause of action by or against any department or agency, functions of which are transferred by this Act, or by or against any officer thereof in his official capacity shall abate by reason of the enactment of this Act. Causes of actions, suits, actions, or other proceedings may be asserted by or against the United States or such official of the Department as may be appropriate and, in any litigation pending when this section takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this subsection.

(2) If before the date on which this Act takes effect, any department or agency, or officer thereof in his official capacity, is a party to a suit, and under this Act—

(A) such department or agency is transferred to the Secretary, or

(B) any function of such department, agency, or officer is transferred to the Secretary,

then such suit shall be continued by the Secretary (except in the case of a suit not involving functions transferred to the Secretary, in which case the suit shall be continued by the department, agency, or officer which was a party to the suit prior to the effective date of this Act).

(d) With respect to any function, power, or duty transferred by this Act and exercised after the effective date of this Act, reference in any other Federal law to any department or agency, officer or office so transferred or functions of which are so transferred shall be deemed to mean the officer or agency in which this Act vests such function after such transfer.

SEPARABILITY

SEC. 8. If any provision of this Act or the application thereof to any person or circumstances is held invalid, the remainder of this Act, and the application of such provision to other persons or circumstances shall not be affected thereby.

CODIFICATION

SEC. 9. The Secretary is directed to submit to the Congress within two years from the effective date of this Act, a proposed codification of all laws that contain the powers, duties, and functions transferred to or vested in the Secretary or the Department by this Act.

EFFECTIVE DATE; INITIAL APPOINTMENT OF OFFICERS

SEC. 10. (a) This Act shall take effect ninety days after the effective date of this Act, or on such prior date after enactment of this Act as the President shall prescribe and publish in the Federal Register.

(b) Any of the officers provided for in this Act may (notwithstanding subsection (a)) be appointed in the manner provided for in this Act, at any time after the date of enactment of this Act. Such officers shall be compensated from the date they first take office, at the rates provided for in this Act. Such compensation and related expenses of their offices shall be paid from funds available for the functions to be transferred to the Department pursuant to this Act.

ABOLITIONS

SEC. 11. Subject to the provisions of section 10 of this Act, the following, exclusive of any functions, are hereby abolished:

(1) The Environmental Science Services Administration in the Department of Commerce (established by Reorganization Plan

No. 2 of 1965, 79 Stat. 1318), including the offices of Administrator of the Environmental Science Services Administration and Deputy Administrator of the Environmental Science Services Administration.

CONFORMING AMENDMENTS TO OTHER LAWS

SEC. 12. (a) Section 19(d)(1) of title 3, United States Code, as amended, is hereby amended by striking out "Secretary of the Interior," and inserting therein "Secretary of Natural Resources,".

(b) Section 101 of title 5 of the United States Code, as amended, is hereby amended by striking "The Department of the Interior." and inserting therein "The Department of Natural Resources.".

(c) The amendment made by subsection (b) of this section shall not be construed to make applicable to the Department any provision of law inconsistent with this Act.

(d) Subchapter II (relating to Executive Schedule pay rates) of chapter 53 of title 5 of the United States Code, as amended, is amended as follows:

(1) Section 5312 is amended by striking out "(6) Secretary of the Interior." and inserting therein "(6) Secretary of Natural Resources."

(2) Section 5314 is amended by adding at the end thereof the following:

"(55) Administrator National Oceanic and Atmospheric Administration."

(3) Section 5315 is amended by striking out "(18) Assistant Secretaries of the Interior (5)." and inserting therein "(18) Assistant Secretaries of Natural Resources (8)."

(4) Section 5316 is amended:

(A) by striking out "(36) Chief Forester of the Forest Service, Department of Agriculture." and inserting therein "(36) Chief Forester of the Forest Service, Department of Natural Resources."; and

(B) by adding at the end thereof the following:

"(132) Deputy Administrators, Department of Environmental Quality (5)."

(5) Section 5316 and the note under section 5317 are amended by striking out "Department of the Interior" wherever it appears in such sections and inserting in lieu thereof the following: "Department of Natural Resources".

I believe it is important to take a look at the agency that is going to have control of the oceans living resources. The basic charter or statute which established in 1903 the Department of Commerce says that this commission is to "foster, promote, develop foreign and domestic commerce, mining, manufacturing and shipping and fishing industries" it says nothing of preservation of natural resources. Not one word about the preservation of natural resources for the future.

The fishery resources that were under the administration of the Department of Commerce were so poorly administered that in a time long past, they were transferred from the inefficient and incompetent administration of that agency and moved over into the Department of the Interior where they have been well managed.

Indeed, I would point out that the legislation that is now before us would put the fox in charge of the chicken coop. The Department of Commerce is constituted as a servant of business and industry. As the spokesman for industry—in fact the exploiters and polluters—it has done what they wished. I believe that we should have an agency of this kind within the Federal Government. Industry needs assistance, encouragement and a spokesman.

But I do not believe that we should be so foolish as to expect an agency constituted to serve the polluters, the industrial users, and the exploiters is going to be concerned with the long-range preservation program. And programs for long range management and protection of resources should not be entrusted to such a government entry. And I would point out to my colleagues that that is the precise question before us today—whether we are going to give to the exploiters, the polluters ,and the abusers of our natural resources the preservation of the great oceanic treasure that belongs not only to this Nation but to the entire populace of the world.

There is something rather more to be ascertained and to be concerned with here. The President's Council on Environmental Quality was not consulted about this legislation. Indeed, very few people on the hill received any consultation by the agency before the presentation of the plan. I would point out that after the plan was published in a number of meetings with the Department of Commerce I continually asked questions that were entirely unanswered, and was expected and assumed to take on faith that it would be well administered.

I am not elected as Representative of the people to swallow the plans and the protestations of the Department of Commerce without better information and answers. I am always aware that an agency that is trying to make a raid on the jurisdiction of another agency is prepared to promise almost anything, no matter how outrageous and how little in conformity with its intentions, in order to succeed in carrying out its goal and its end.

You know the private organizations that have worked with this Congress and with most of us in the Congress, and that have been concerned with the creation of a sound environmental policy and with wise preservation and use of our natural resources are without exception opposed to the creation of NOAA in the Department of Commerce. The International Association of Game and Fish Conservation Commissioners just passed a unanimous resolution against the movement of NOAA to the Department of Commerce. I would point out that this includes all the game and fish conservation agencies of the United States, Canada, and Mexico. I would point out that the Sierra Club, the National Wildlife Federation, the Audubon Society, the Isaak Walton League, the Wildlife Management Institute, the Sports Fishing Institute, and every other major national conservation organization, without exception, is opposed to turning the future of this Nation and the future our oceanic resources over to the Department of Commerce.

The reason is very simple. This reorganization proposal is going to turn over the custody of the chicken coop to the fox. Some of my colleagues tell me we are going to make a conservation-oriented organization out of the Department of Commerce. I would be willing to believe that the very day these same friends and colleagues who hand me a silk purse made out of a sow's ear.

The kind of clientele, the history, and the record of that agency do not engender any trust or any belief that they are anything other than what their basic charter started them out to be; and that is servants and lackeys of the polluters and the exploiters and those who would destroy the natural resources that are going to be entrusted to their care.

I am aware that it is always appealing to say that this is going to bring about preservation, this is going to mean enhancement, this is part of a great plan to preserve the natural resources of the Nation.

But I will tell you that we had before my subcommittee the Chairman of the President's Council on Environmental Quality. I said to him:

Mr. Train, can you tell us what qualifications are present in the Department of Commerce for the ocean resource management programs to be transferred, to the Department of Commerce?

I must tell you that he, as the President's chief adviser on matters of environment, pollution control, and preservation of natural resources of this Nation and of this world could not point out to a single qualification of the Department of Commerce, not one, whereby they could be entrusted with the preservation of oceanic resources.

I just want to give a brief catalog of some of the statutes that will be turned over to this agency:

The Fish and Wildlife Coordination Act—something which says that in the consideration of every Federal or federally financed programs for water development, that the agency concerned has to take appropriate steps to preserve fish and wildlife values.

The Anadromous Fish Act, something in which the Department of Commerce has no interest or experience whatsoever, which has brought back and restored anadromous fish in many parts of this land.

The Endangered Species Act, set up to preserve species endangered because of activities of man and environmental changes in the world.

They are going to turn over the great nearly extinct whales of the world to the Department of Commerce, which has a long record of service to the exploiters and users of whale oil and things of this kind. That will also happen to the other endangered species of the sea. The next attempted raid will be on the coastal zones of the United States, so the poluters and exploiters can get their hands on these resources.

I would warn my colleagues the fight to preserve the Nation's resources is a difficult one. We make little wins and suffer big losses. I would point out that, of the losses to be cataloged during the year of 1970, perhaps the biggest single loss the Nation is going to undergo is the turning over of our natural resources to the Department of Commerce and the setting up of NOAA in an agency that has no record of concern or interest in conservation matters.

I would point out what is needed here is an affirmative vote on the resolution. Such a vote will say we will work with the administration on an appropriate national maritime and resources program, but we want to be consulted and to participate legislatively in creation of a proper plan of action. We have expertise in these matters far beyond that which we will find in most of the departments, so far beyond that which certainly we will find in the Department of Commerce. It will say we want to work with the administration to come forward with a far better and far more responsive program. The Congress has a duty to resolve unanswered questions and consider how NOAA is going to interrelate with all the statutes which are involved in the preservation of a decent environment and in the preservation of our oceanographic resources.

I would point out if we do that, we would certainly come up with a proposal to create a Department of National Resources. It is folly to hand over the oceanographic endeavors of this Nation to the polluters and despoilers and plunderers of nature. Such precious resources must be kept in an organization within the Federal Government at Cabinet level and not again reduced far down into the hierarchy of the Department. Proponents of this measure can say NOAA is going to be in a department which is going to be concerned with environmental matters, and I suspect even have a few people in the agency who will feel such concern, but I suspect they will be so low in the Department of Commerce as to be almost totally incapable of having their views heard.

I would point out more importantly that conservation of our oceanographic resources and the wise management of them will, instead of being upgraded by this proposal, be downgraded, because where we have an Assistant Secretary in charge of the program now, we will in the future have only low-level bureaucrats, clearly prisoners of high level bureaucrats selected by industry on the basis of philosophy and record of service to exploiters and polluters. The Nation and conservation of precious resources demand better.

Mr. ERLENBORN. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. MOSHER).
